

Driveshafts

Reassembly : Roller type joint

1. Reassemble the driveshafts in reverse order of disassembly.

GREASE : Thoroughly, pack the inboard CV joint with high quality grease and the outboard CV joint and bearings with high quality molybdenum grease when reassembling the driveshaft.

2. Install the rollers and bearing races on the spider shafts, then slide the spider assembly into the inboard shaft joint.
CAUTION: Avoid getting oil or grease on the rubber parts.

3. Slide the boots into place and install new boot bands C on the small ends.
Position the bands so they are centered between the locating humps at each end of the driveshaft. Expand and compress the boots until they return to their normal shape and length.
