

Sunroof

Cable Replacement

With sunroof out of the car, remove the guide rail mounting nuts, lift off the guide rails, and remove the cables with rear mount brackets attached.

NOTE: Fill the groove in each grommet with sealant and apply molybdenum grease to the inner cable.

Rear Mount Bracket Disassembly

1. Remove the side guides from the rear mount brackets.

NOTE: Replace the guides with new ones whenever they are disassembled.

2. Pry the E-clip off the pin, and remove the rear mount bracket from the cable.

Drag Check (Motor Removed)

Before installing the sunroof motor, measure effort required to close sliding panel using a spring scale as shown.

CAUTION: When using the spring scale, protect the leading edge of the sunroof with a shop rag.

If load is over 98 N (10 kg, 22 lb), check side clearance and glass height adjustment (page 14-40).
