

Wind Deflector Installation

Installation is done in the reverse order of removal. When installing, make sure to insert the deflector ends tightly into the guide rails and arrange the deflector and rails in parallel.

Closing Force Check (Motor Installed)

1. After installing all removed parts, have a helper hold the switch to close the sunroof while you measure force required to stop it. Attach spring scale as shown. Read force as soon as glass stops moving, then immediately release the switch and spring scale.

CAUTION: When using the spring scale, protect the leading edge of the sunroof with a shop rag.

Closing Force: 196–245 N
(20–30 kg, 44–55 lb)

2. If force is not within specification, adjust by turning sunroof motor clutch adjusting nut. After adjusting, install a new lockwasher and bend it flat against the adjusting nut.
