

■ TORQUE CONVERTER

We are strengthening parts, raising efficiency and improving fuel consumption with the use of the new 3UZ-FE engine. The torque converter clutch supports flex lock-up clutch control, thus improving the fuel economy.

■ PLANETARY GEAR UNIT

1. General

The planetary gear unit of the A650E automatic transmission that has been adopted on the new LS430 is based on the A650E of the previous LS400.

Along with the increased output of the engine, we have optimized the specifications of the clutches and brakes. Additionally, mechanical loss has been reduced and fuel consumption improved.
