

MD998738

A detailed technical line drawing of an engine component assembly. The central focus is a large, circular, flange-like part with a central circular opening and six smaller circular holes around its perimeter. This part is connected to a vertical shaft or rod. To the right, there is a large, circular pulley or flywheel with a central hub and two smaller circular features. Below the central part, there is a complex assembly of various components, including what appears to be a valve or a small piston, with several circular openings and a serrated edge on the right side. The drawing is a black and white line art, typical of technical manuals.
