

MB991994

This technical diagram illustrates the assembly of a valve stem seal. On the left, a side view shows the seal being installed onto the valve stem. On the right, a top-down view shows the seal seated within the valve guide. A hammer is shown striking the top of the seal to drive it into place. Two callout lines originate from the text labels: one points to the seal in the side view, and the other points to the seal in the top-down view.
