

Timing mark

This technical diagram illustrates a camshaft timing system. A timing chain is shown at the top, with a small black dot labeled 'Timing mark' indicating a specific reference point. Below the chain is a large sprocket with a central hub and several holes around its perimeter. A smaller sprocket is positioned below it, connected by the chain. The bottom of the diagram shows the engine block and a connecting rod. A label 'Timing mark' with an arrow points to the black dot on the chain.
