

<4G1>

A detailed line drawing of an engine compartment, viewed from above. The drawing shows various engine components, including the intake manifold, valve cover, and timing belt. A specific component, the PCV valve, is highlighted with a leader line pointing to it. The valve is a small, cylindrical component with a spring-loaded valve inside. It is located near the base of the valve cover. The drawing is a technical illustration, likely from a service manual, showing the correct location for the PCV valve.

PCV valve
