

MB991152

A technical line drawing of a mechanical assembly. A central vertical shaft is the primary component. To its left, a large, angled plate is secured with several screws. Below this plate, a bracket-like structure is visible. To the right of the shaft, there are several circular components, possibly pistons or valves, connected by a common mechanism. The entire assembly is enclosed within a circular frame, suggesting it's a cross-section or a view of a rotating part. The drawing is composed of clean, black lines on a white background.
