

J

<AS&G>

The diagram illustrates the installation of a capacitor unit on the left-hand side of a front seat assembly. A thick black arrow points to the capacitor unit, which is a small rectangular component with two circular terminals. It is being positioned near a metal bracket and a cable. The seat assembly is shown in a partially disassembled state, with various mechanical parts and wiring visible. A thin line points from the text 'Front seat assembly (LH)' to the seat structure.
