# PRECAUTIONS

## PRECAUTIONS

PFP:00001

### Service Notice

EIS003UV

- When removing or installing various parts, place a cloth or padding onto the vehicle body to prevent scratches.
- Handle trim, molding instruments, grille, etc. carefully during removing or installing. Be careful not to oil or damage them.
- Apply sealing compound where necessary when installing parts.
- When applying sealing compound, be careful that the sealing compound does not protrude from parts.
- When replacing any metal parts (for example body outer panel, member, etc.), be sure to take rust prevention measures.

### Precautions for Supplemental Restraint System (SRS) “AIR BAG” and “SEAT BELT PRE-TENSIONER”

EIS003UN

The Supplemental Restraint System such as “AIR BAG” and “SEAT BELT PRE-TENSIONER”, used along with a front seat belt, helps to reduce the risk or severity of injury to the driver and front passenger for certain types of collision. Information necessary to service the system safely is included in the SRS and SB section of this Service Manual.

#### **WARNING:**

- **To avoid rendering the SRS inoperative, which could increase the risk of personal injury or death in the event of a collision which would result in air bag inflation, all maintenance must be performed by an authorized NISSAN/INFINITI dealer.**
- **Improper maintenance, including incorrect removal and installation of the SRS, can lead to personal injury caused by unintentional activation of the system. For removal of Spiral Cable and Air Bag Module, see the SRS section.**
- **Do not use electrical test equipment on any circuit related to the SRS unless instructed to in this Service Manual. SRS wiring harnesses can be identified by yellow and/or orange harness connectors.**

### Precautions

EIS00108

- When removing or disassembling any part, be careful not to damage or deform it. Protect parts, which may get in the way with cloth.
- When removing parts with a screwdriver or other tool, protect parts by wrapping them with vinyl or tape.
- Keep removed parts protected with cloth.
- If a clip is deformed or damaged, replace it.
- If an un reusable part is removed, replace it with a new one.
- Tighten bolts and nuts firmly to the specified torque.
- After re-assembly has been completed, make sure each part functions correctly.
- Remove stains in the following way.

Water-soluble stains:

Dip a soft cloth in warm water, and then squeeze it tightly. After wiping the stain, wipe with a soft dry cloth.

Oil stain:

Dissolve a synthetic detergent in warm water (density of 2 to 3% or less), dip the cloth, then clean off the stain with the cloth. Next, dip the cloth in fresh water and squeeze it tightly. Then clean off the detergent completely. Then wipe the area with a soft dry cloth.

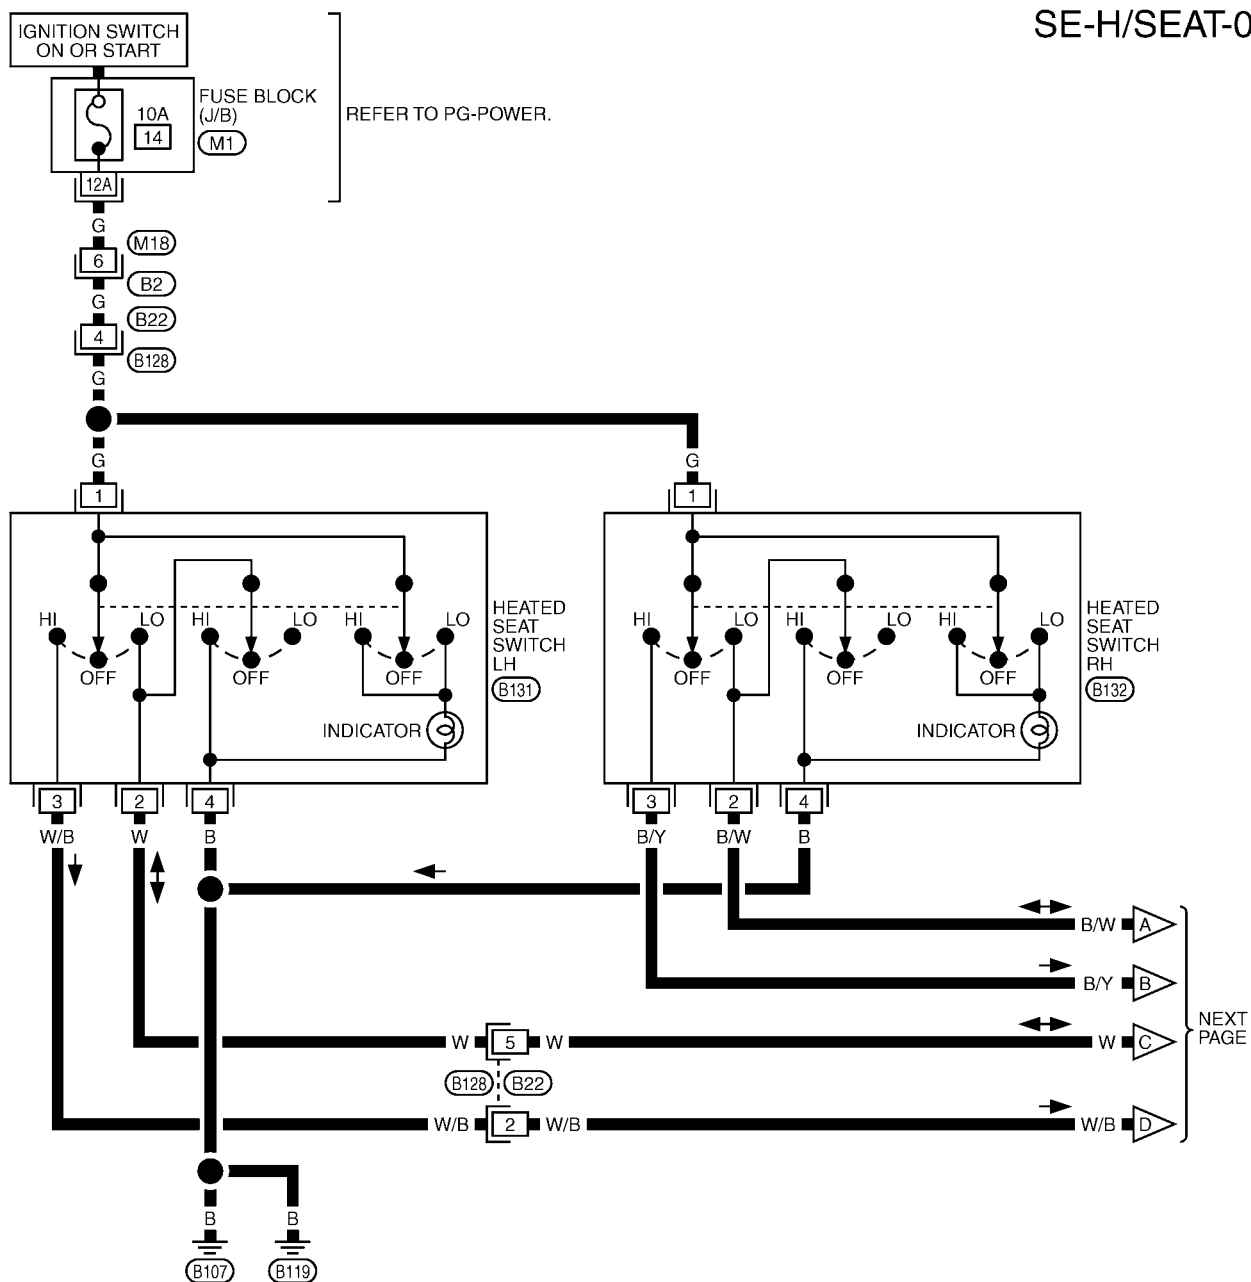

- Do not use any organic solvent, such as thinner or benzene.

## Removal and Installation

EIS000NO

1. Remove slide cover.

### NOTE:

1. Slide the seat forward.
2. Undo the outer slide cover front fitting and then undo the rear fitting.
3. Pull cover up rearward.

2. Remove vehicle mounting bolts.
3. Disconnect the connector and remove seat.

### NOTE:

When removing and installing, using clothes, protect the parts from damage where it may interfere with others.

## Disassembly and Assembly of Seat Back

### SEAT BACK TRIM (SIDE AIR BAG EQUIPPED AND GENUINE LEATHER SEAT)

EIS000NP

1. Unfasten fastener on the back of seat back.
2. Remove lower retainer.

3. Remove nuts, and remove inner cross-fixed stay.

## FRONT SEAT

- Pick up and push up the headrest holder tab to remove.

**NOTE:**

Before installing the headrest holder, check its front, rear, right and left orientation for correct installation.

- After removing seat back trim & pad, remove hog rings to separate pad and trim.

### Removal of Seat Back Assembly

- To remove seat back assembly, follow steps 1 - 2. After that, remove side air bag connector and bolts.

**NOTE:**

When assembling the seat back frame, make sure that the reclining device are locked on both sides, and be sure to temporarily tighten the bolts, then tighten them finally.

### SEAT BACK TRIM [WITHOUT SIDE AIR BAG (EXCEPT GENUINE LEATHER SEAT)]

- Disengage retainers in the lower part at the back of seat back.

- Pull off seat back trim.

- Pick up and push up the headrest holder tab to remove.

**NOTE:**

Before installing the headrest holder, check its front, rear, right and left orientation for correct installation.

- Remove seat back trim.

# FRONT SEAT

## Removal of Seat Back Assembly

- To remove seat back assembly, follow steps 1 - 2. After that, remove bolts.

### NOTE:

When assembling the seat back frame, make sure that the reclining device are locked on both sides, and be sure to temporarily tighten the bolts, then tighten them finally.

## Disassembly and Assembly of Seat Cushion Trim

EIS000NQ

1. Pull up tabs of reclining lever from inside. Slide the knob forward for removal.

2. Hang a wire on the snap ring, and pull upward to remove. Remove lifter dial.

3. Remove seat harness and bolts from back of seat cushion.

### NOTE:

When installing bolts, make sure both sides of the slide are locked. Be sure to temporarily tighten the bolts before final tightening.

4. Remove retainer from back side of the cushion.

5. Pull off trim and remove hog rings.
