

PROPELLER SHAFT

DRIVE SHAFT SYSTEM

1. Propeller Shaft

The propeller shaft uses constant velocity joints for quiet operation of the driveline components. The center joint is a double offset joint (DOJ) type which can extend and retract in the axial directions.

DS-00162

- (1) Center bearing
- (2) Double offset joint (DOJ)

- (A) Transmission side
- (B) Rear differential side
