

GENERAL

EXHAUST

1. General

- The exhaust system consists of left and right exhaust manifolds, a front joint pipe, a turbocharger joint pipe, a center exhaust pipe, a rear exhaust pipe and a muffler. The pre catalytic converter is incorporated in the turbocharger joint pipe, the front catalytic converter is incorporated in the center exhaust pipe, and the rear catalytic converter is incorporated in the rear exhaust pipe.
- The exhaust system features an excellent sound suppression design; the rear exhaust pipe has a chamber in addition to a large capacity muffler.
