

# Fuel Cut Valve

FUEL INJECTION (FUEL SYSTEMS)

## 30.Fuel Cut Valve

### A: REMOVAL

#### WARNING:

Place "NO FIRE" signs near the working area.

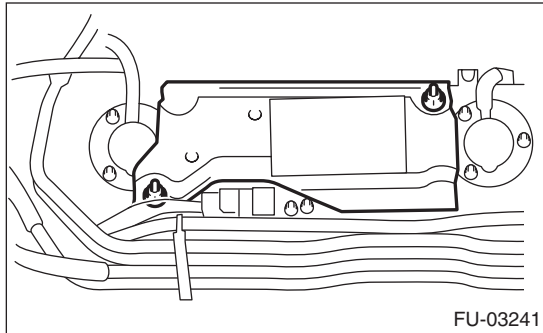

#### CAUTION:

- Be careful not to spill fuel.
- Catch the fuel from hoses using a container or cloth.

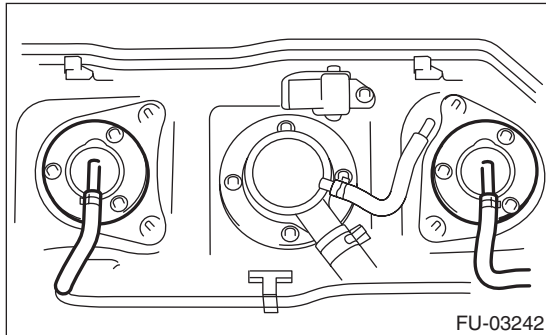

1) Remove the fuel tank.

<Ref. to FU(H4DOTC)-52, REMOVAL, Fuel Tank.>

2) Remove the protect cover.

3) Loosen the clip and disconnect the evaporation hose from the fuel cut valve.

4) Remove the bolts which install the fuel cut valve.

### B: INSTALLATION

Install in the reverse order of removal while being careful of the following.

- Make sure the sealing portion is free from fuel or foreign matter before installation.

#### NOTE:

Use a new gasket.

#### Tightening torque:

**4.4 N·m (0.45 kgf-m, 3.3 ft-lb)**
