

A: REMOVAL

- NOTE:

This diagram illustrates the connection of the rearview mirror camera cable to the vehicle's wiring harness. The camera cable, which has a multi-pin connector, is shown being plugged into a corresponding multi-pin connector on the vehicle's harness. The harness is secured with a bolt and nut. A separate component, possibly a fuse or a relay, is shown below the main connection point.

CAUTION:

Diagram illustrating the AT-06638 connector assembly. The assembly consists of a mounting plate (A) and a connector housing (B). The mounting plate is shown attached to the top of the connector housing. The connector housing features a multi-pin interface on the left side.

- CVT(TR690)-123**

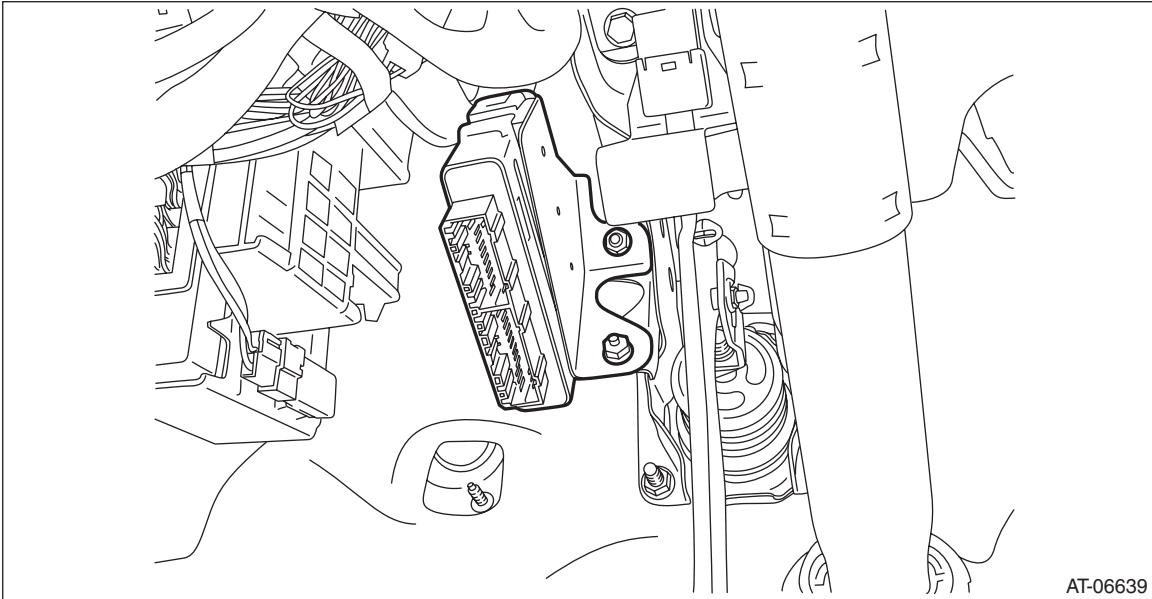

Transmission Control Module (TCM)

CONTINUOUSLY VARIABLE TRANSMISSION

2) Install the TCM.

Tightening torque:

7.5 N·m (0.8 kgf-m, 5.5 ft-lb)

AT-06639

3) Install the harness connector to TCM.

4) Connect the battery ground terminal.

5) Perform the operation of AT learning mode. <Ref. to CVT(diag)-26, Learning Control.>
