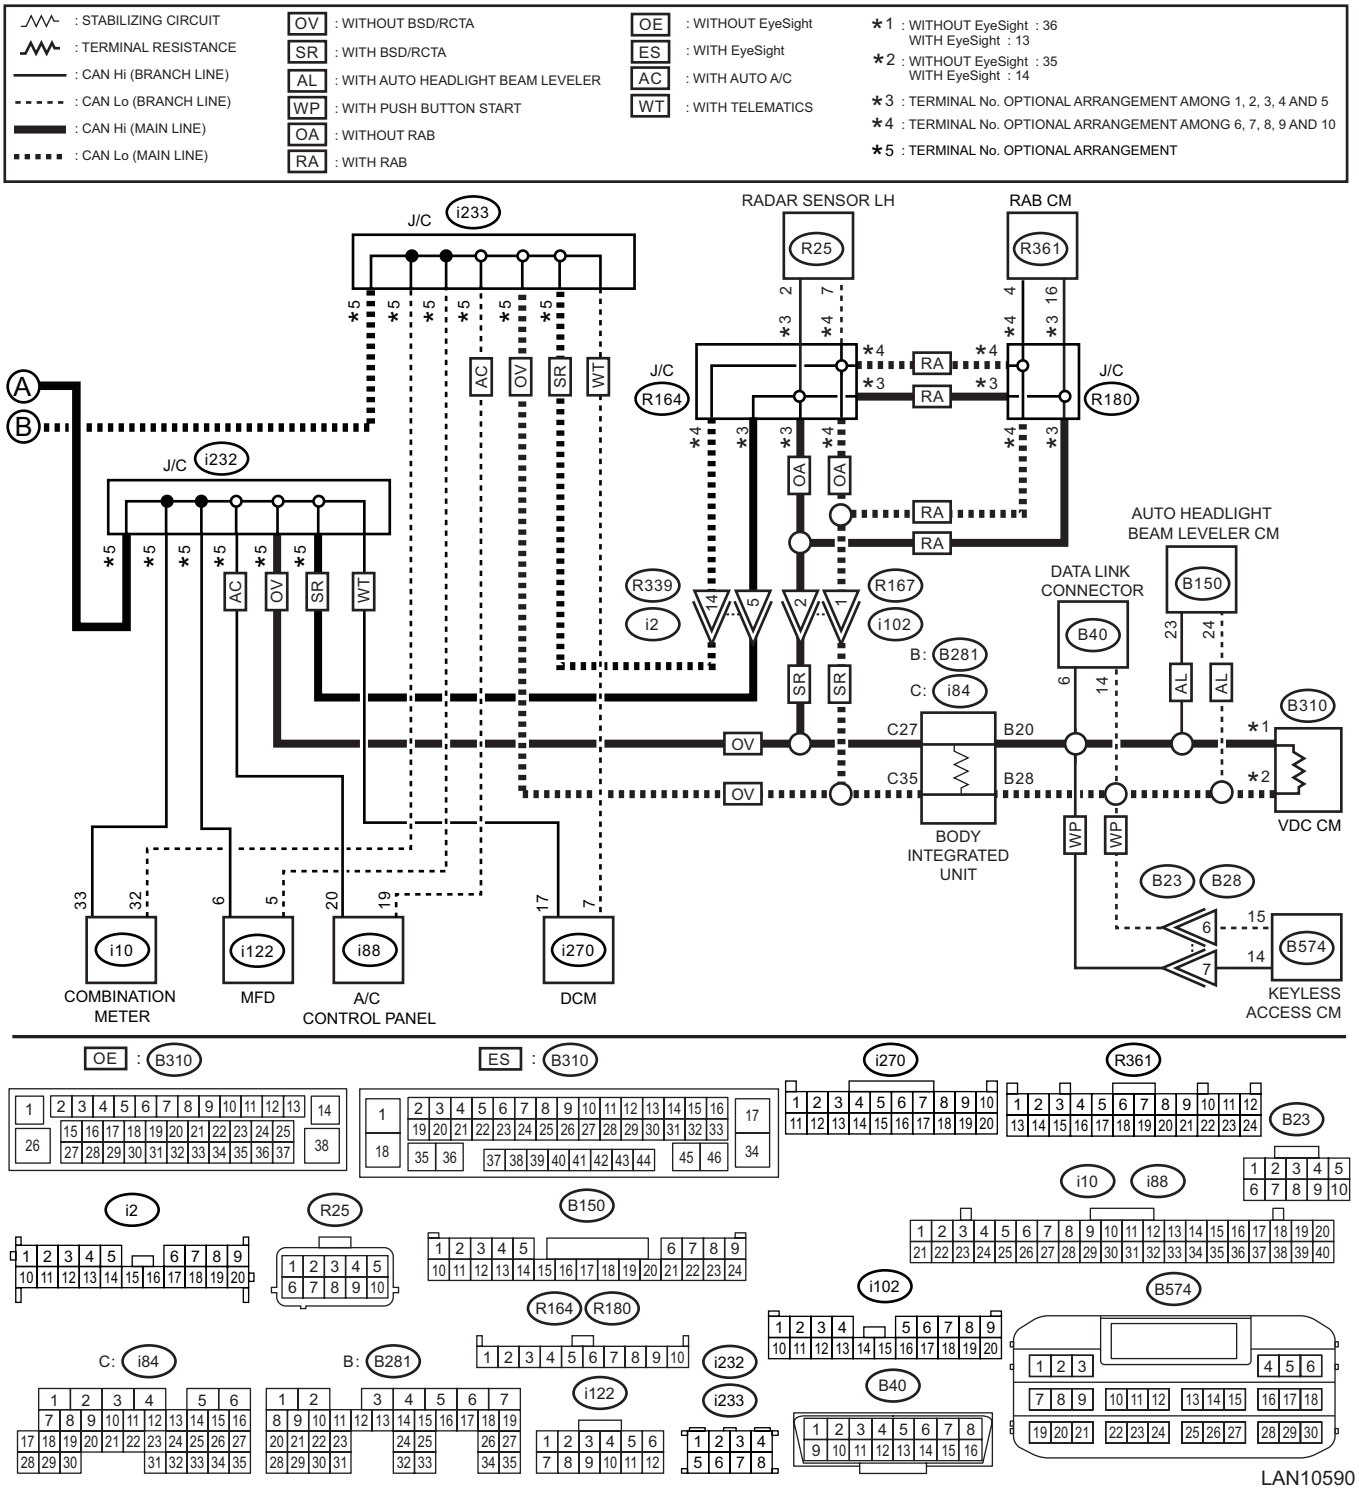
2	**CHECK RELATED LINES.** Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(B231) No. 2 — (B40) No. 14:*** ***(B231) No. 3 — (B40) No. 6:***	Is the resistance 10 Ω or more?	Repair or replace the open circuit of steering angle sensor related lines.	Check DTC of VDC CM. <Ref. to VDC(diag)-28, OPERATION, Read Diagnostic Trouble Code (DTC).>

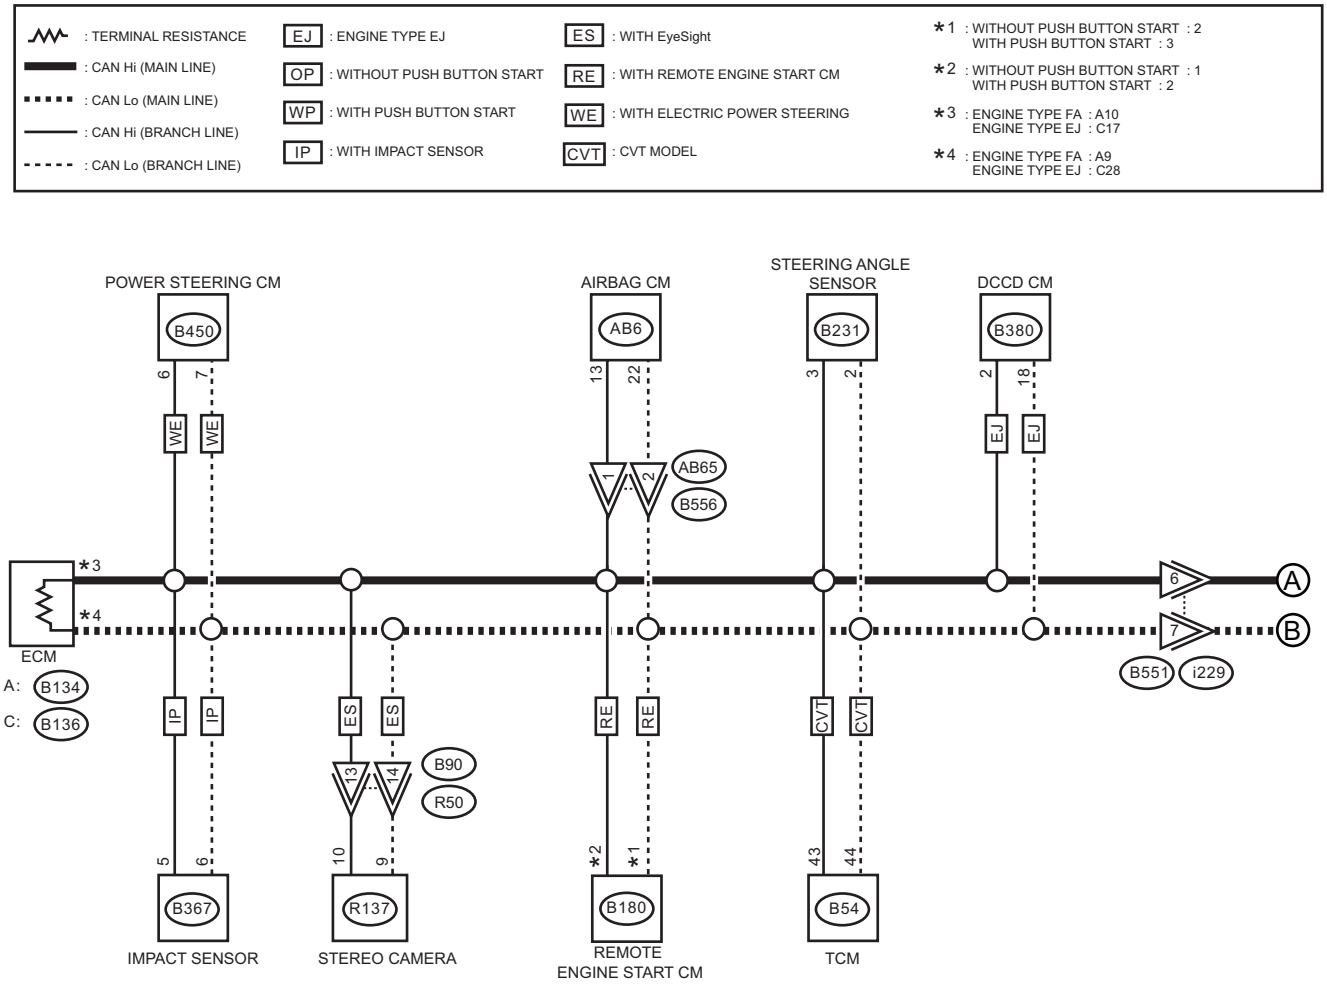
8. RELATED LINE 53 — 61 Ω (A/C CONTROL PANEL)



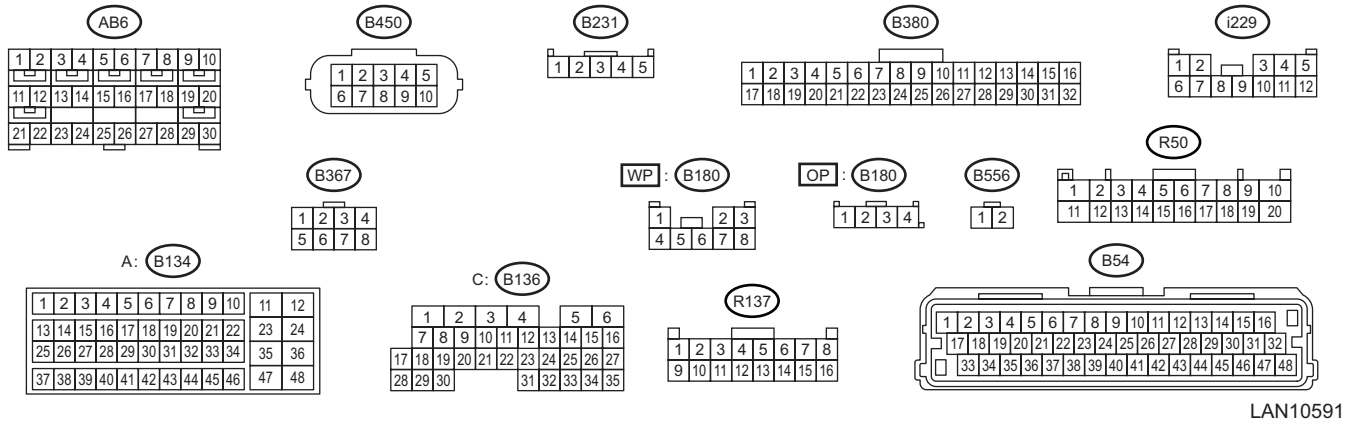
WIRING DIAGRAM:

CAN communication system <Ref. to WI-113, WIRING DIAGRAM, CAN Communication System.>

LAN10591

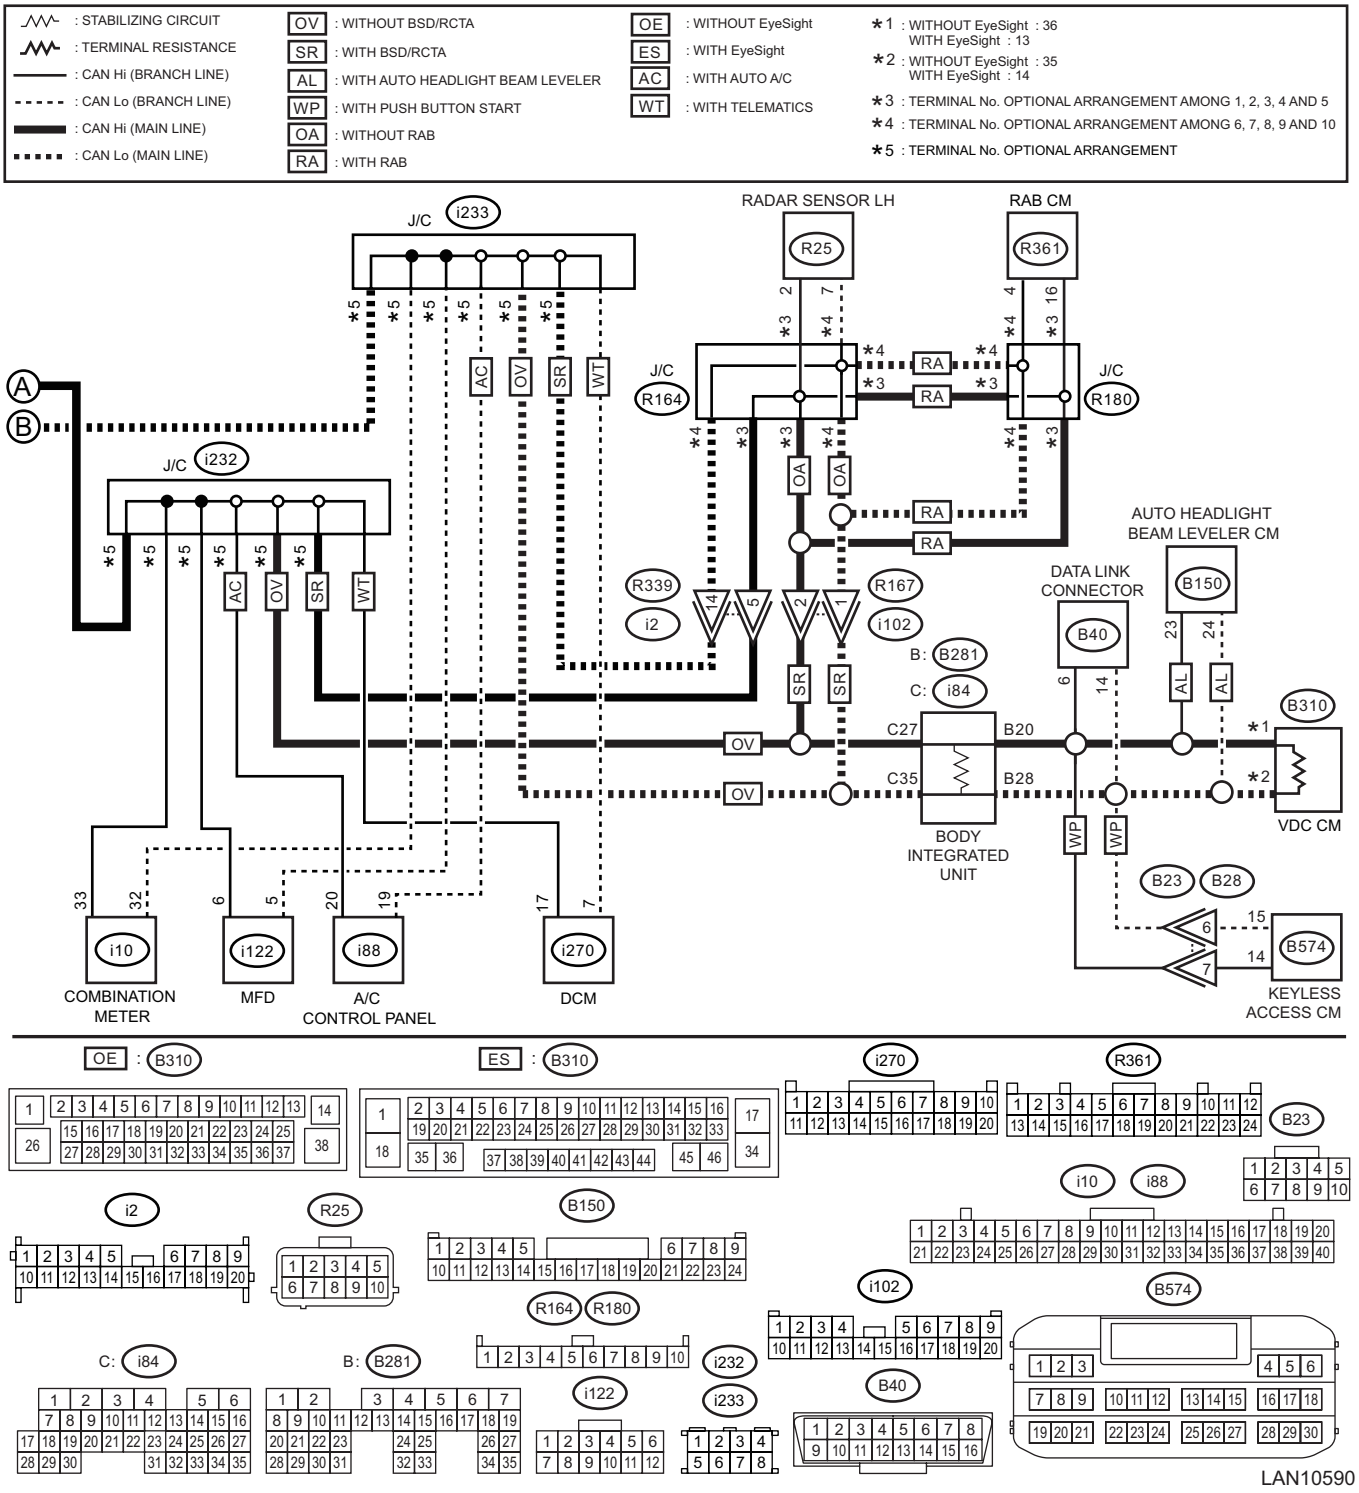


Step		Check	Yes	No
1	**CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.** 1) Disconnect the A/C control panel connector. 2) Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(i88) No. 19 — (i88) No. 20:***	Is the resistance 400 Ω or more?	Related lines between A/C control panel and main wiring harness is open, or main wiring harness is open at two places or more.	Go to step **2**.



Step		Check	Yes	No
2	**CHECK RELATED LINES.** Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(i88) No. 19 — (B40) No. 14:*** ***(i88) No. 20 — (B40) No. 6:***	Is the resistance 10 Ω or more?	Repair or replace the open circuit of A/C control panel related lines.	Check the DTC of A/C control panel. <Ref. to AC(diag)-43, Read Diagnostic Trouble Code (DTC).>

9. RELATED LINES 53 — 61 Ω (POWER STEERING CM)

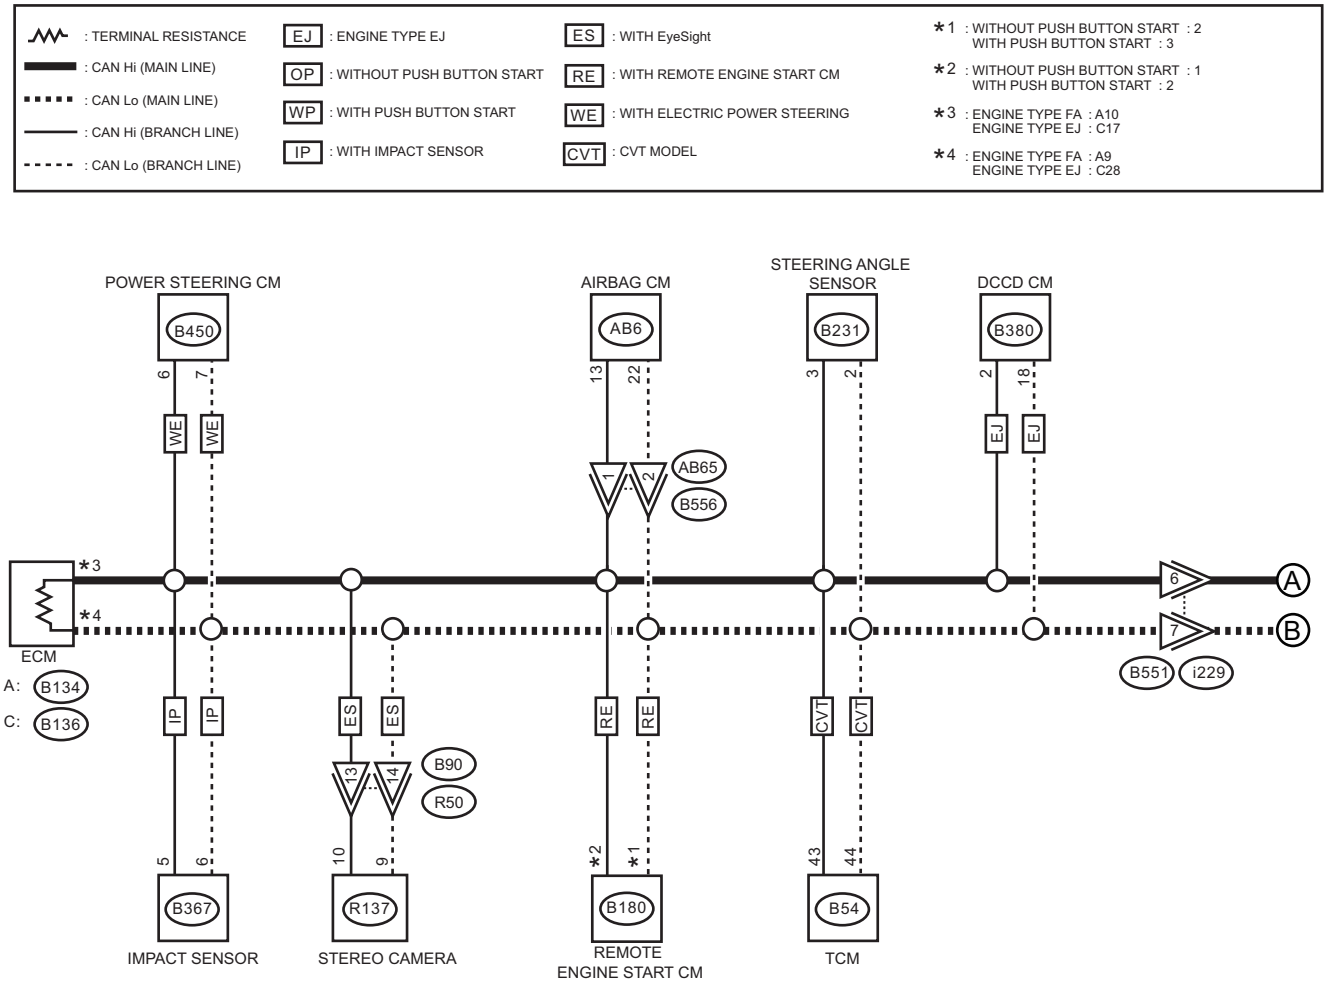


WIRING DIAGRAM:

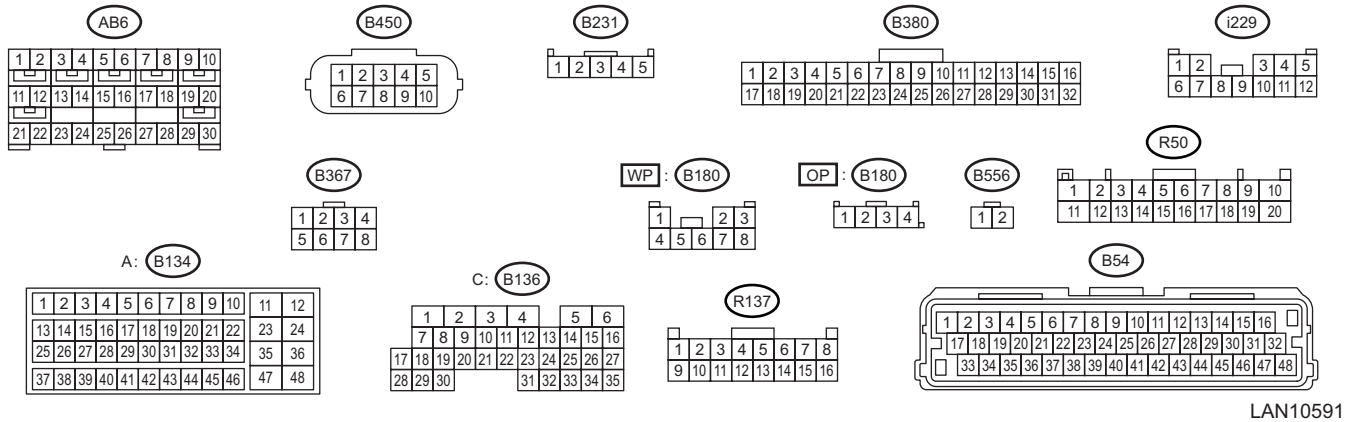
CAN communication system <Ref. to WI-113, WIRING DIAGRAM, CAN Communication System.>

LAN10591

LAN10590

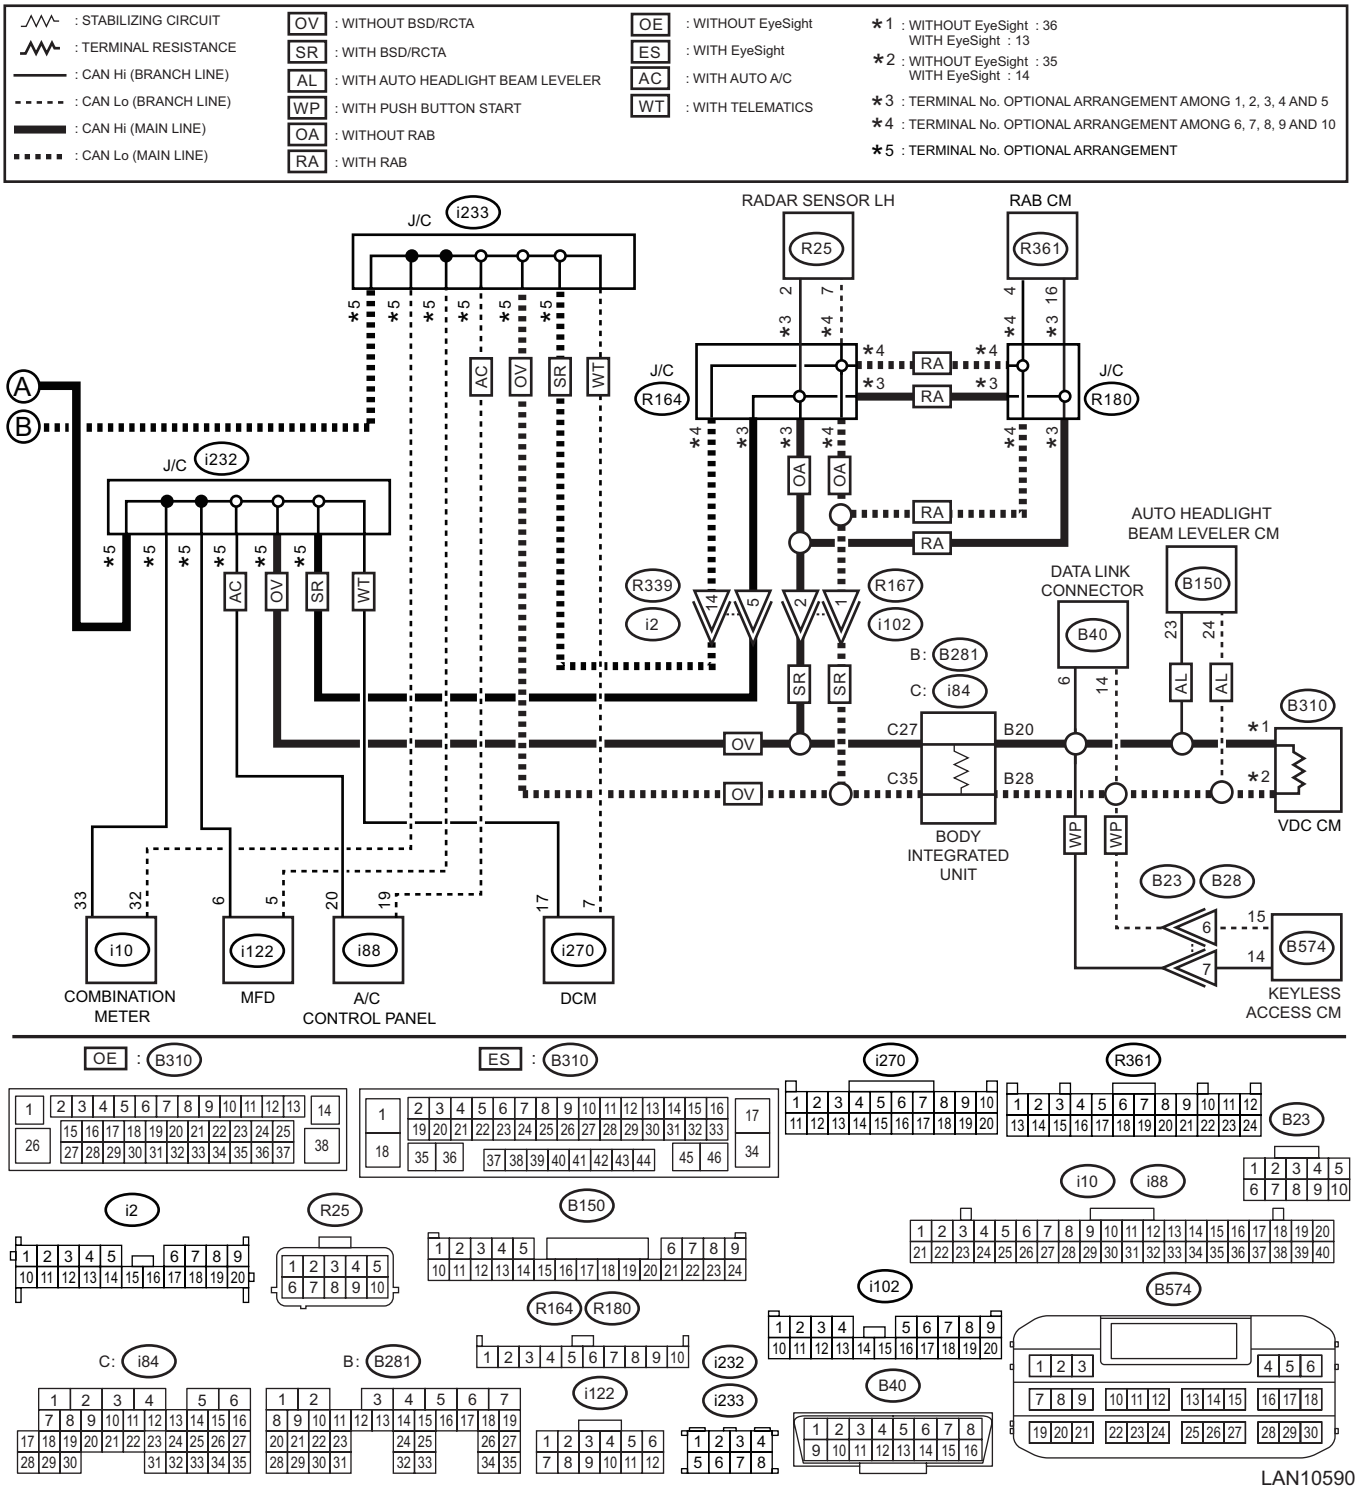


Step		Check	Yes	No
1	**CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.** 1) Disconnect the power steering CM connector. 2) Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(B450) No. 6 — (B450) No. 7:***	Is the resistance 400 Ω or more?	Related lines or main wiring harness between power steering CM and main wiring harness is open at two places or more.	Go to step **2**.



Step		Check	Yes	No
2	**CHECK RELATED LINES.** Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(B450) No. 6 — (B40) No. 6:*** ***(B450) No. 7 — (B40) No. 14:***	Is the resistance 10 Ω or more?	Repair or replace the open circuit portion of power steering CM related lines.	Check DTC of power steering CM. <Ref. to PS(diag)-16, OPERATION, Read Diagnostic Trouble Code (DTC).>

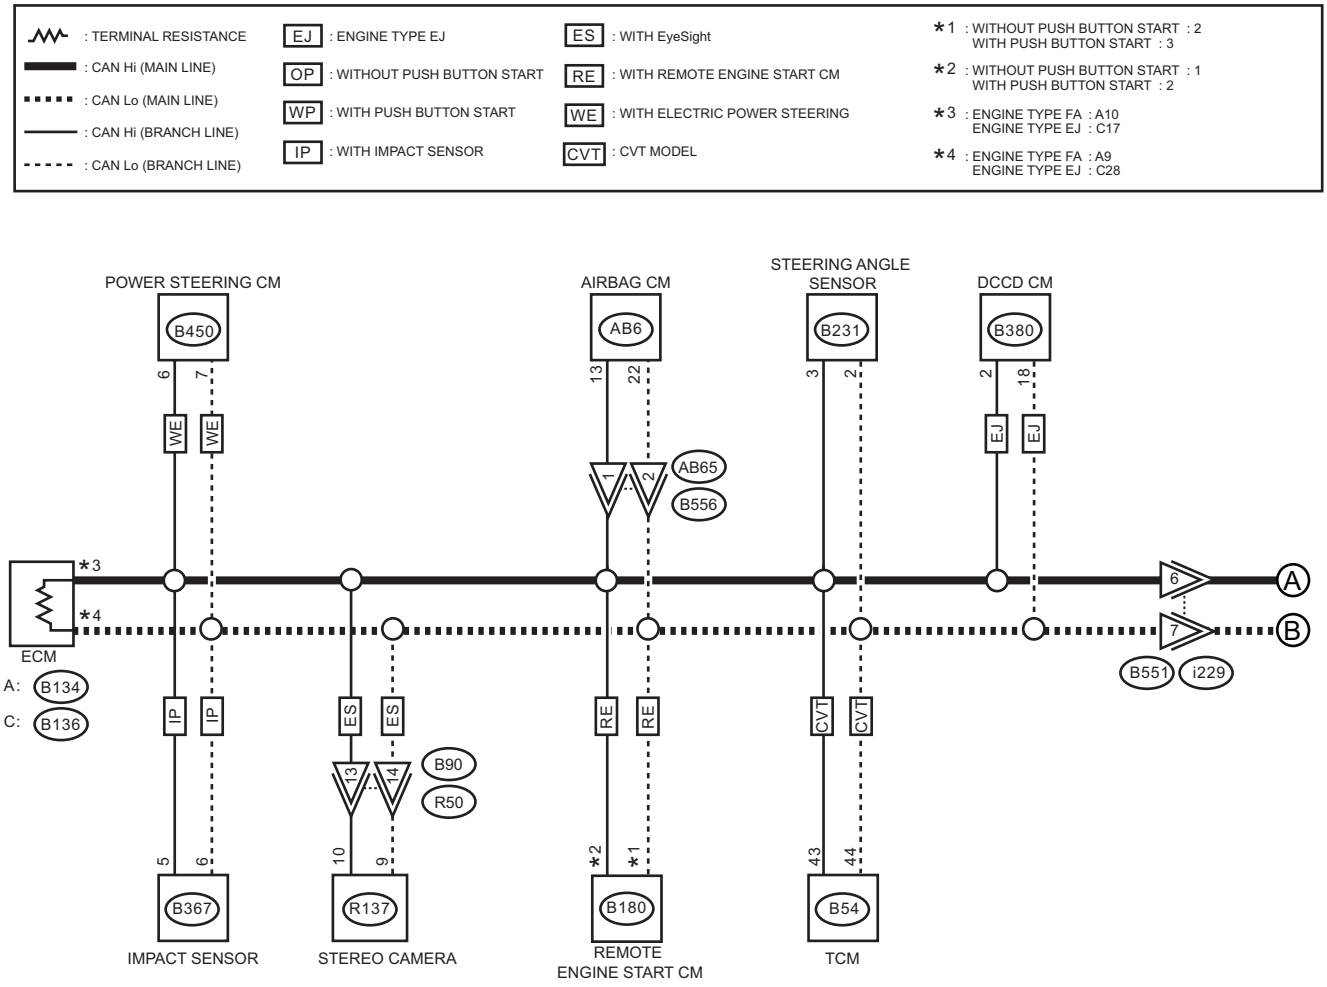
10.RELATED LINES 53 — 61 Ω (COMBINATION METER)



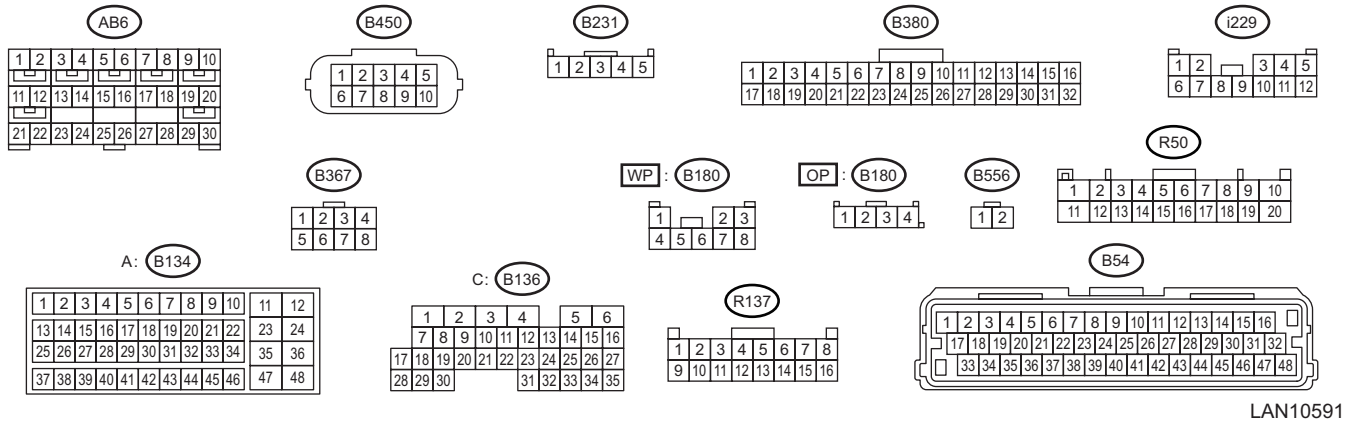
WIRING DIAGRAM:

CAN communication system <Ref. to WI-113, WIRING DIAGRAM, CAN Communication System.>

LAN10591

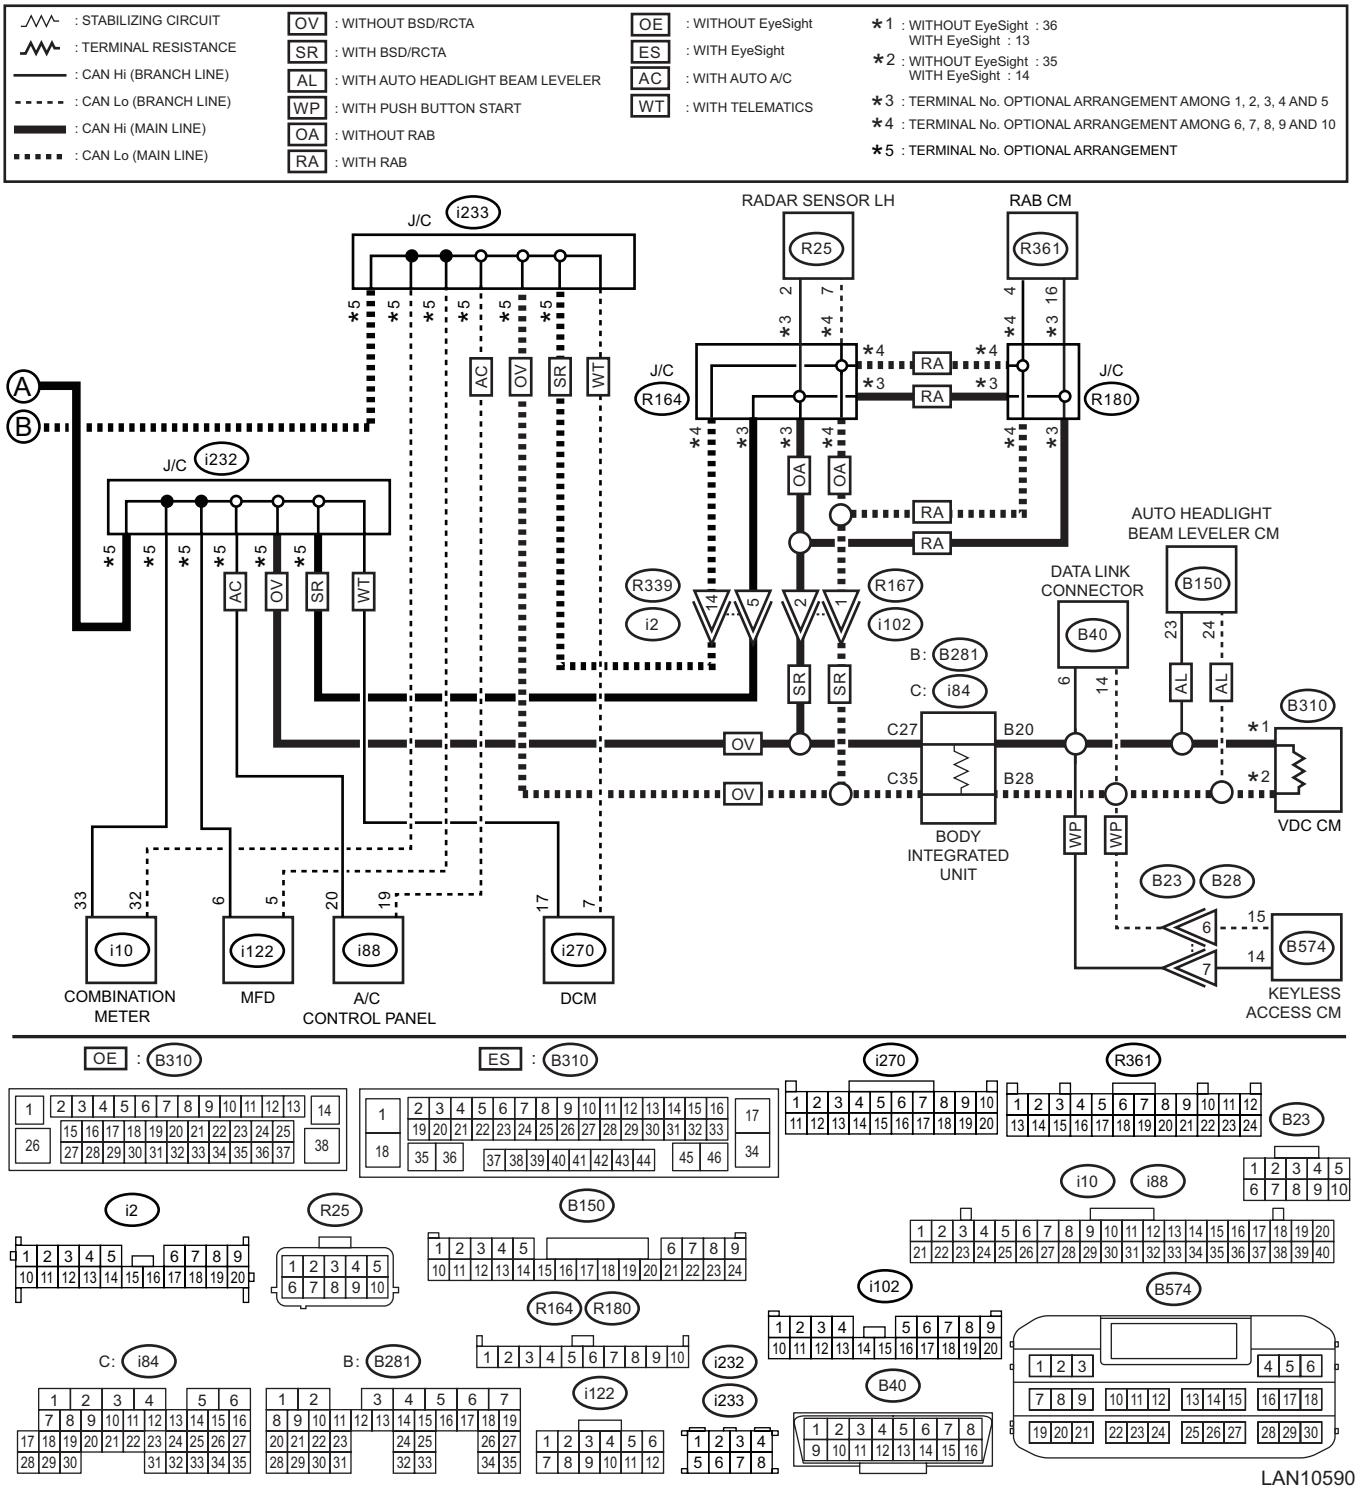


Step		Check	Yes	No
1	**CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.** 1) Disconnect the combination meter connector. 2) Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(i10) No. 32 — (i10) No. 33:***	Is the resistance 400 Ω or more?	Related lines between combination meter and main wiring harness is open, or main wiring harness is open at two places or more.	Go to step **2**.



Step		Check	Yes	No
2	**CHECK RELATED LINES.** Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(i10) No. 32 — (B40) No. 14:*** ***(i10) No. 33 — (B40) No. 6:***	Is the resistance 10 Ω or more?	Repair or replace the open circuit of combination meter related lines.	Check DTC of combination meter. <Ref. to IDI(diag)-13, Read Diagnostic Trouble Code (DTC).>

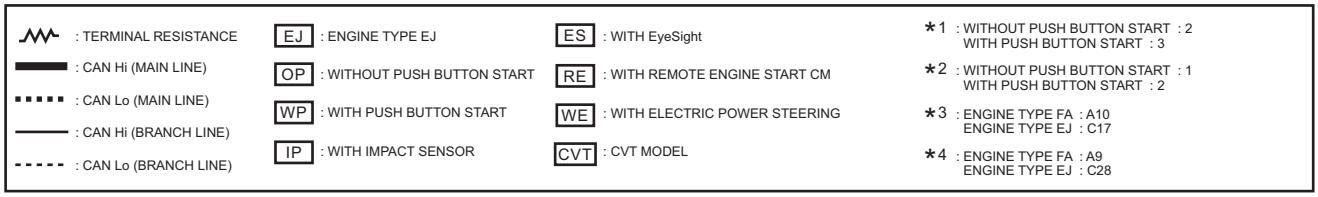
11.RELATED LINES 53 — 61 Ω (MFD)



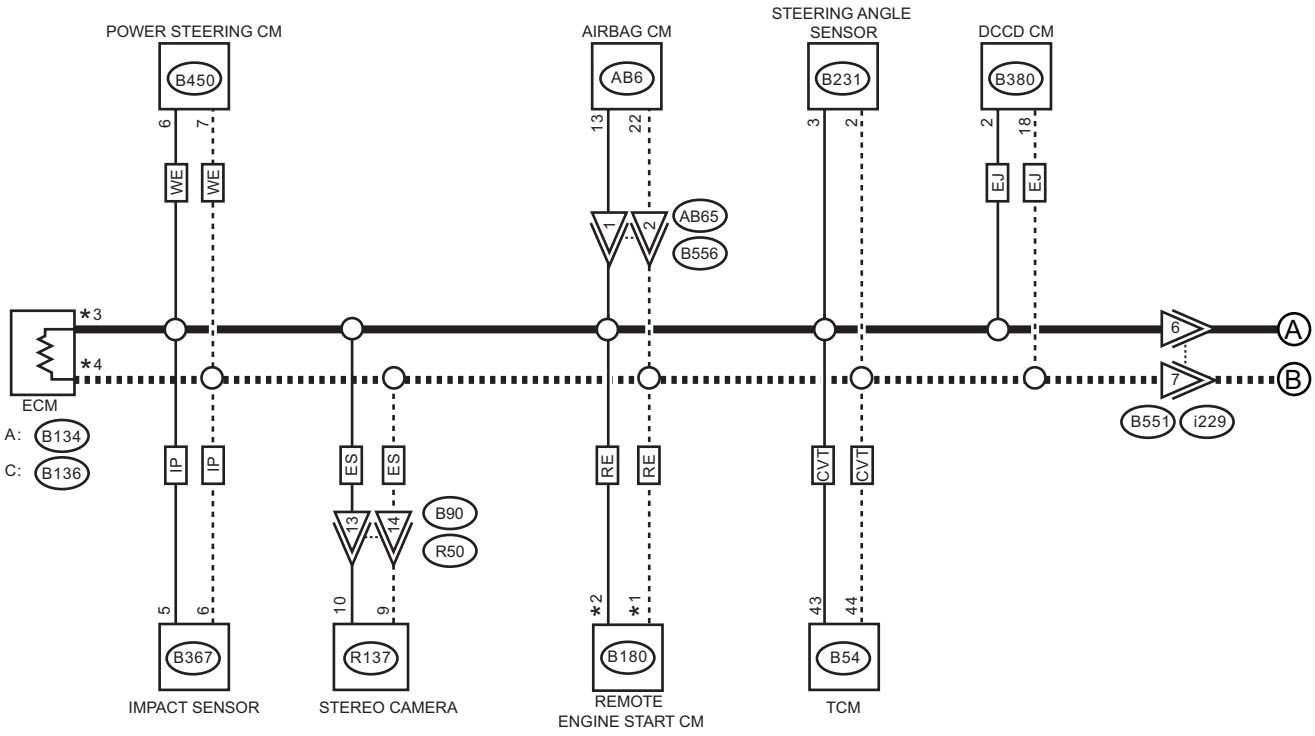
WIRING DIAGRAM:

CAN communication system <Ref. to WI-113, WIRING DIAGRAM, CAN Communication System.>

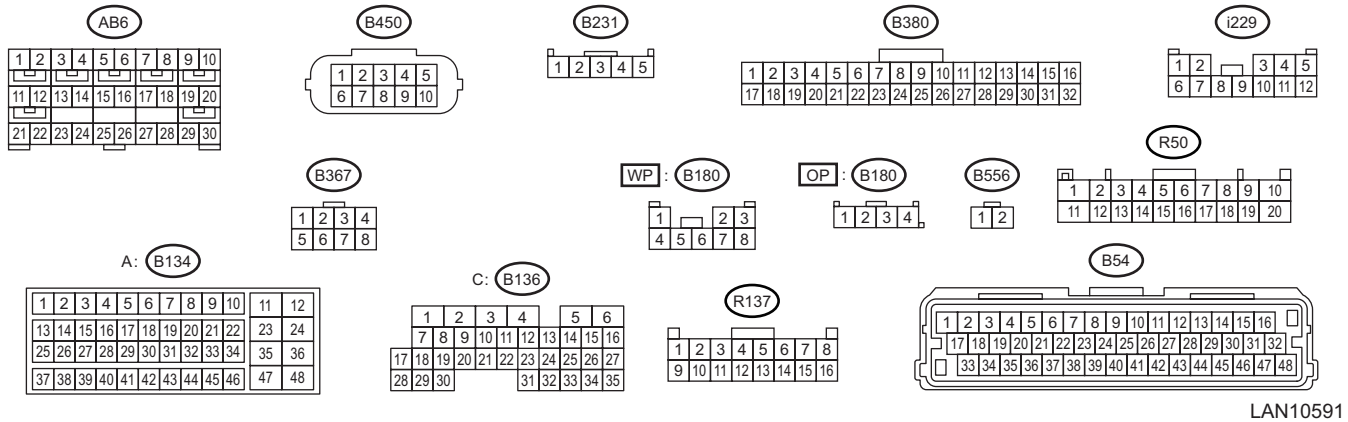
LAN10591



Step		Check	Yes	No
1	**CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.** 1) Disconnect the MFD connector. 2) Using the tester, measure the resistance between terminals. ***Connector & terminal (i122) No. 5 — (i122) No. 6:***	Is the resistance 400 Ω or more?	Related lines between MFD and main wiring harness is open, or main wiring harness is open at two places or more.	Go to step **2**.



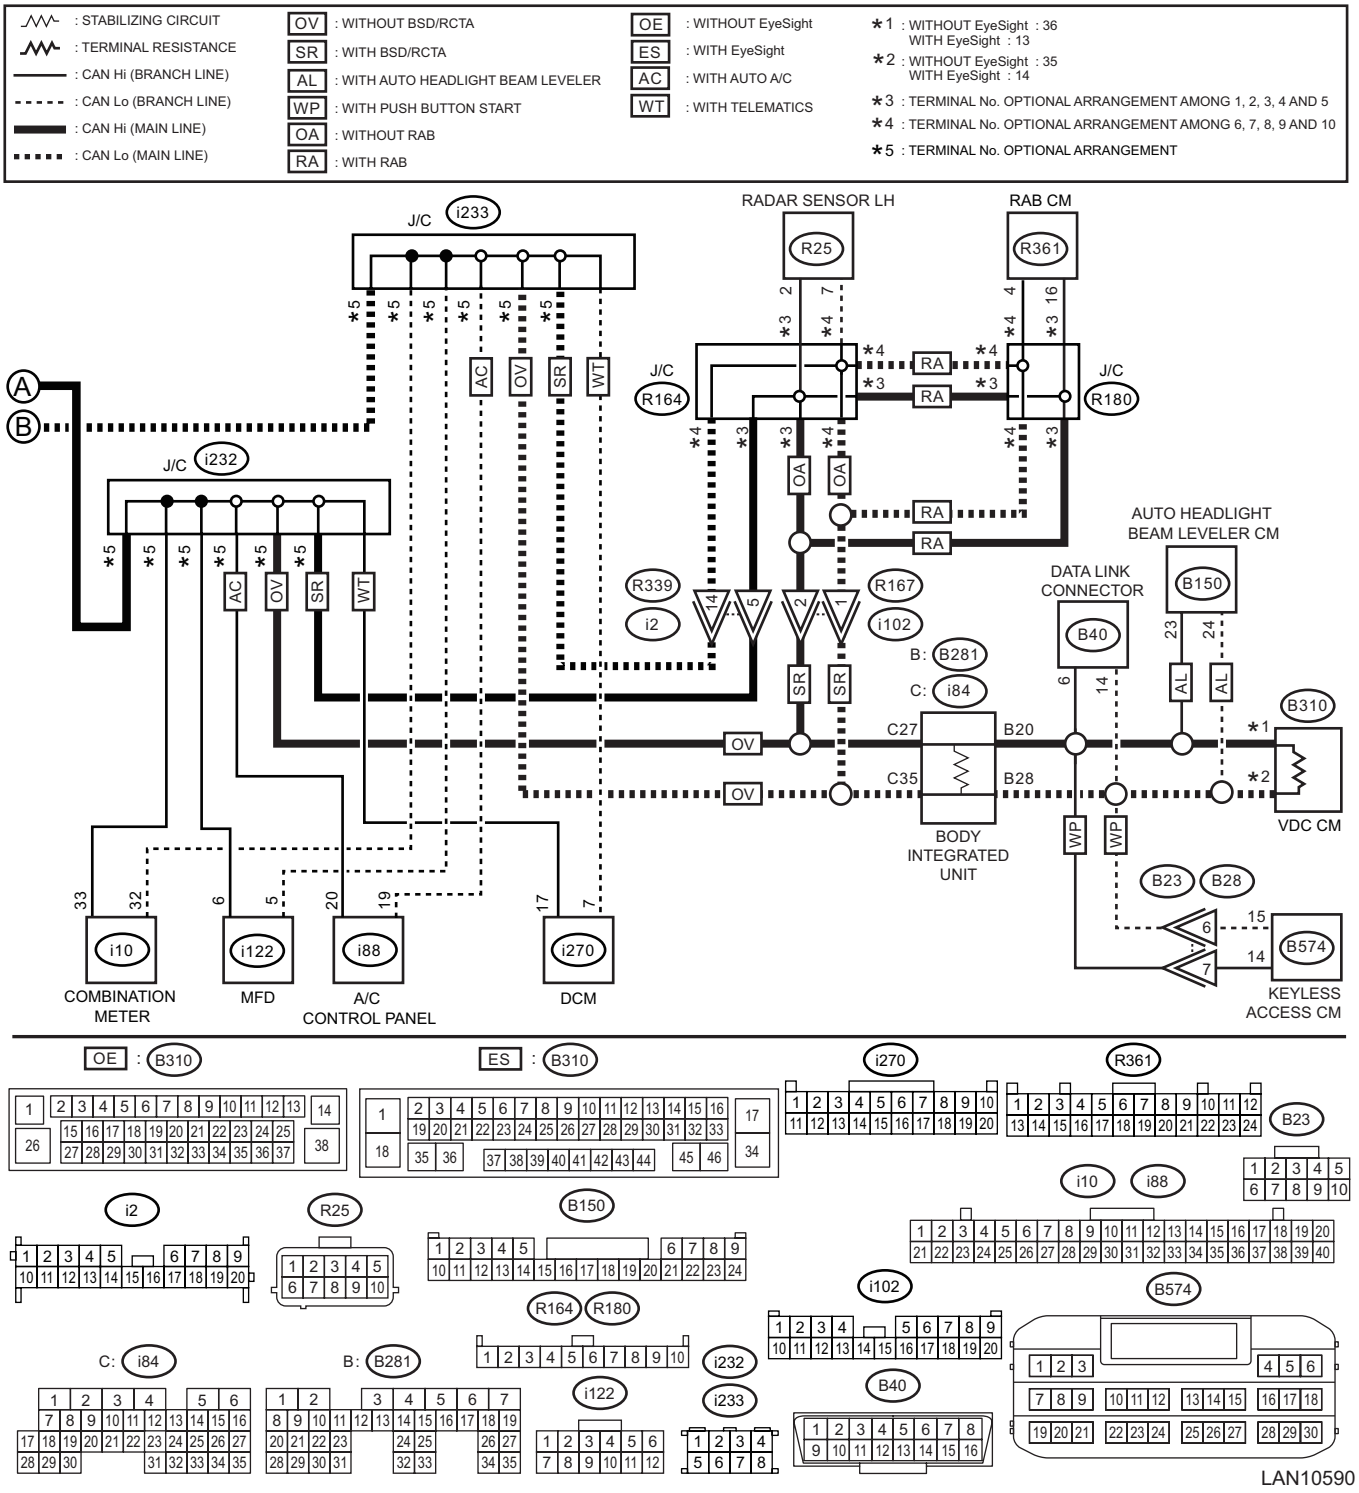
Step		Check	Yes	No
2	**CHECK RELATED LINES.** Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(i122) No. 5 — (B40) No. 14:*** ***(i122) No. 6 — (B40) No. 6:***	Is the resistance 10 Ω or more?	Repair or replace the open circuit of MFD related lines.	Check DTC of MFD. <Ref. to IDI(diag)-13, Read Diagnostic Trouble Code (DTC).>



12.RELATED LINES 53 — 61 Ω (AIRBAG CM SYSTEM)

WIRING DIAGRAM:

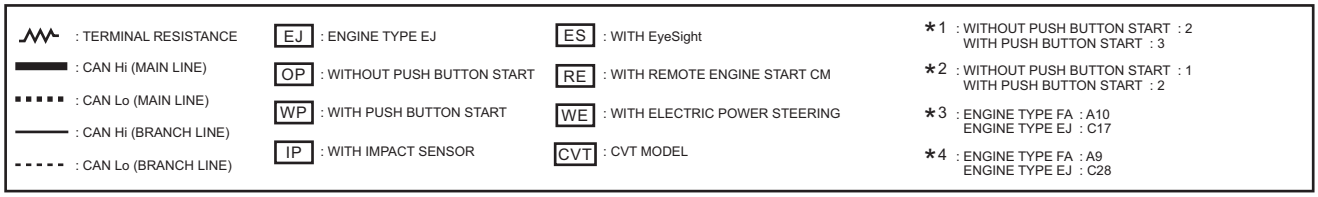
CAN communication system <Ref. to WI-113, WIRING DIAGRAM, CAN Communication System.>



LAN10591

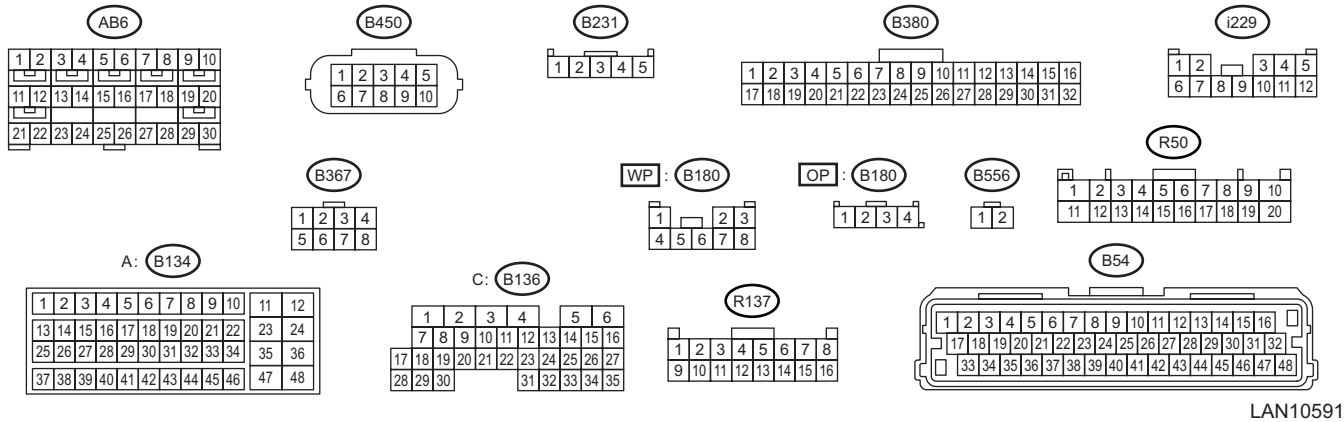
CAN Communication Circuit Check

CAUTION:



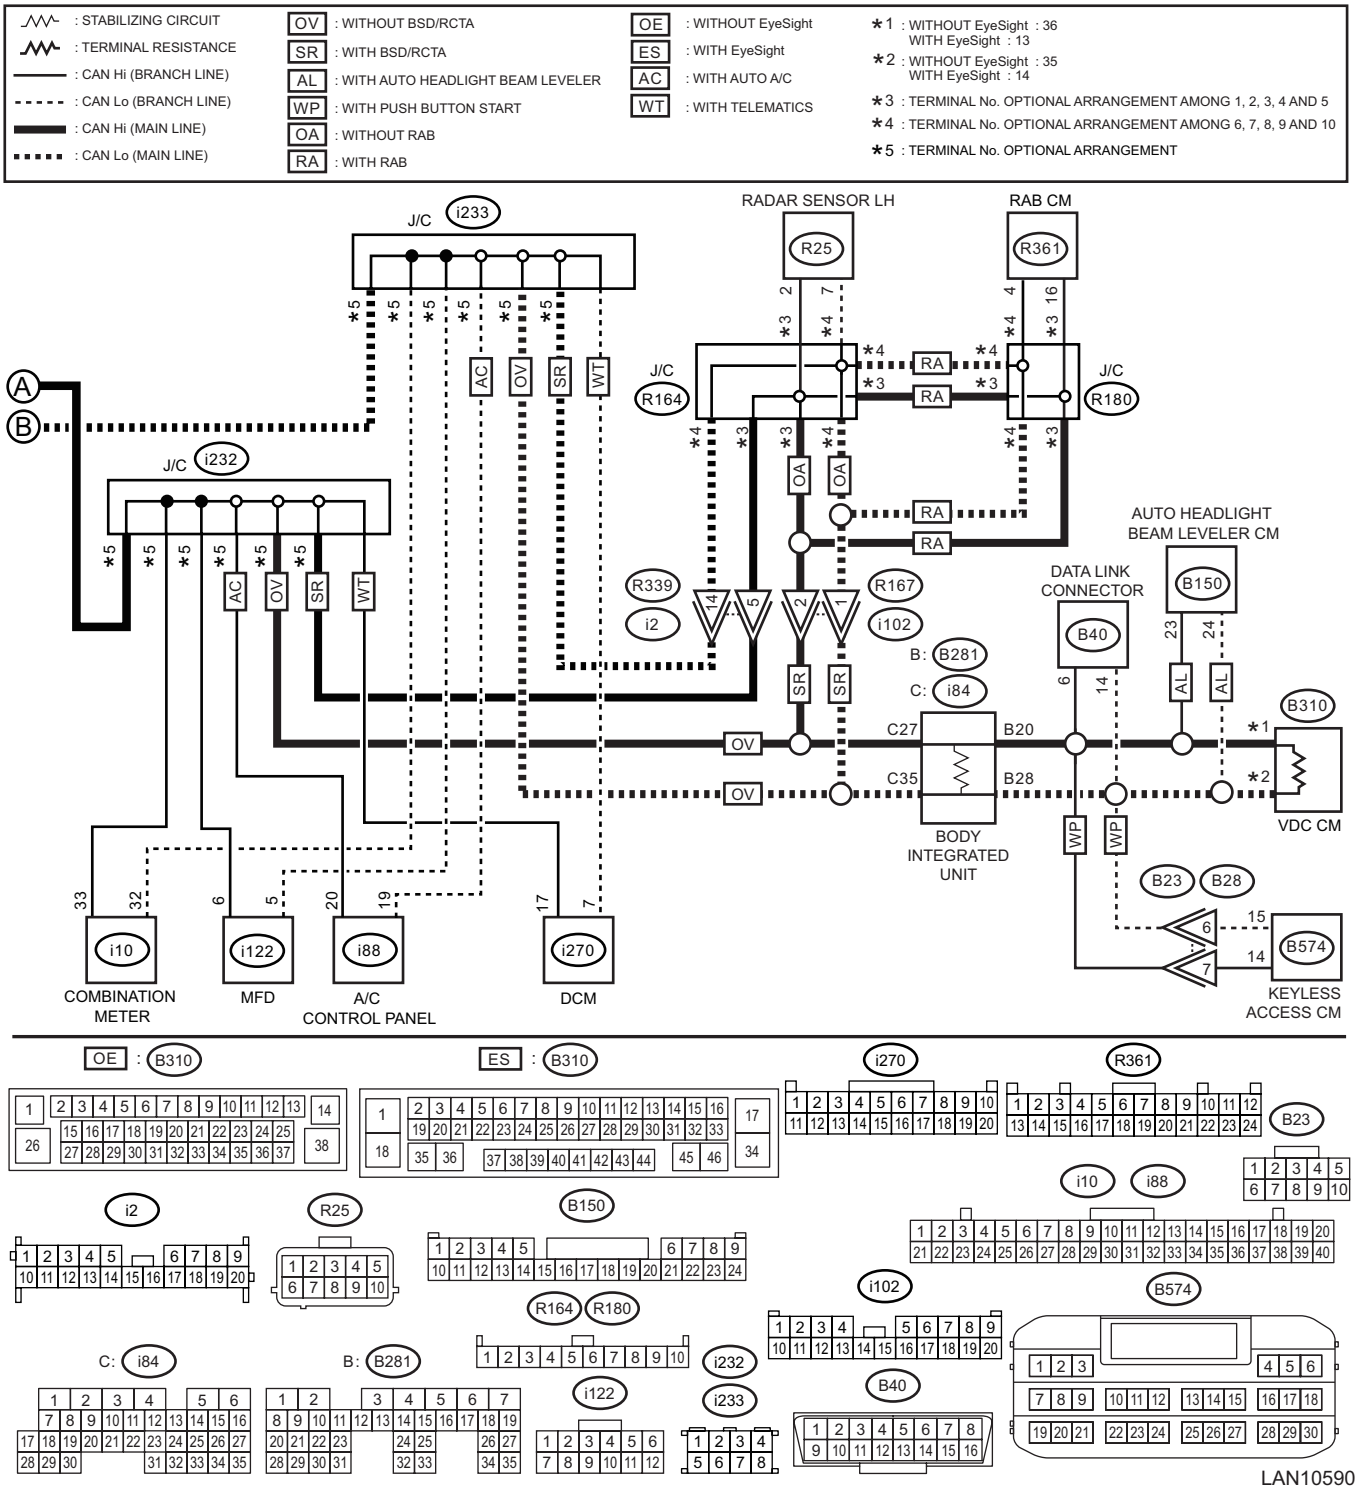
- **When checking the airbag system, refer to the cautions regarding the airbag system prior to the inspection. <Ref. to AB-2, General Description.>**
- **To measure the voltage and resistance of airbag system component, be sure to use the specified test harness. <Ref. to AB(diag)-4, General Description.>**

	Step	Check	Yes	No
1	**CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.** 1) Disconnect the airbag CM connector. 2) Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(AB6) No. 13 — (AB6) No. 22:***	Is the resistance 400 Ω or more?	Related lines between airbag CM and main wiring harness is open, or main wiring harness is open at two places or more.	Go to step **2**.
2	**CHECK RELATED LINES.** Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(AB6) No. 22 — (B40) No. 14:*** ***(AB6) No. 13 — (B40) No. 6:***	Is the resistance 10 Ω or more?	Repair or replace the open circuit portion of airbag CM related lines.	Check DTC of airbag CM. <Ref. to AB(diag)-22, Read Diagnostic Trouble Code (DTC).>



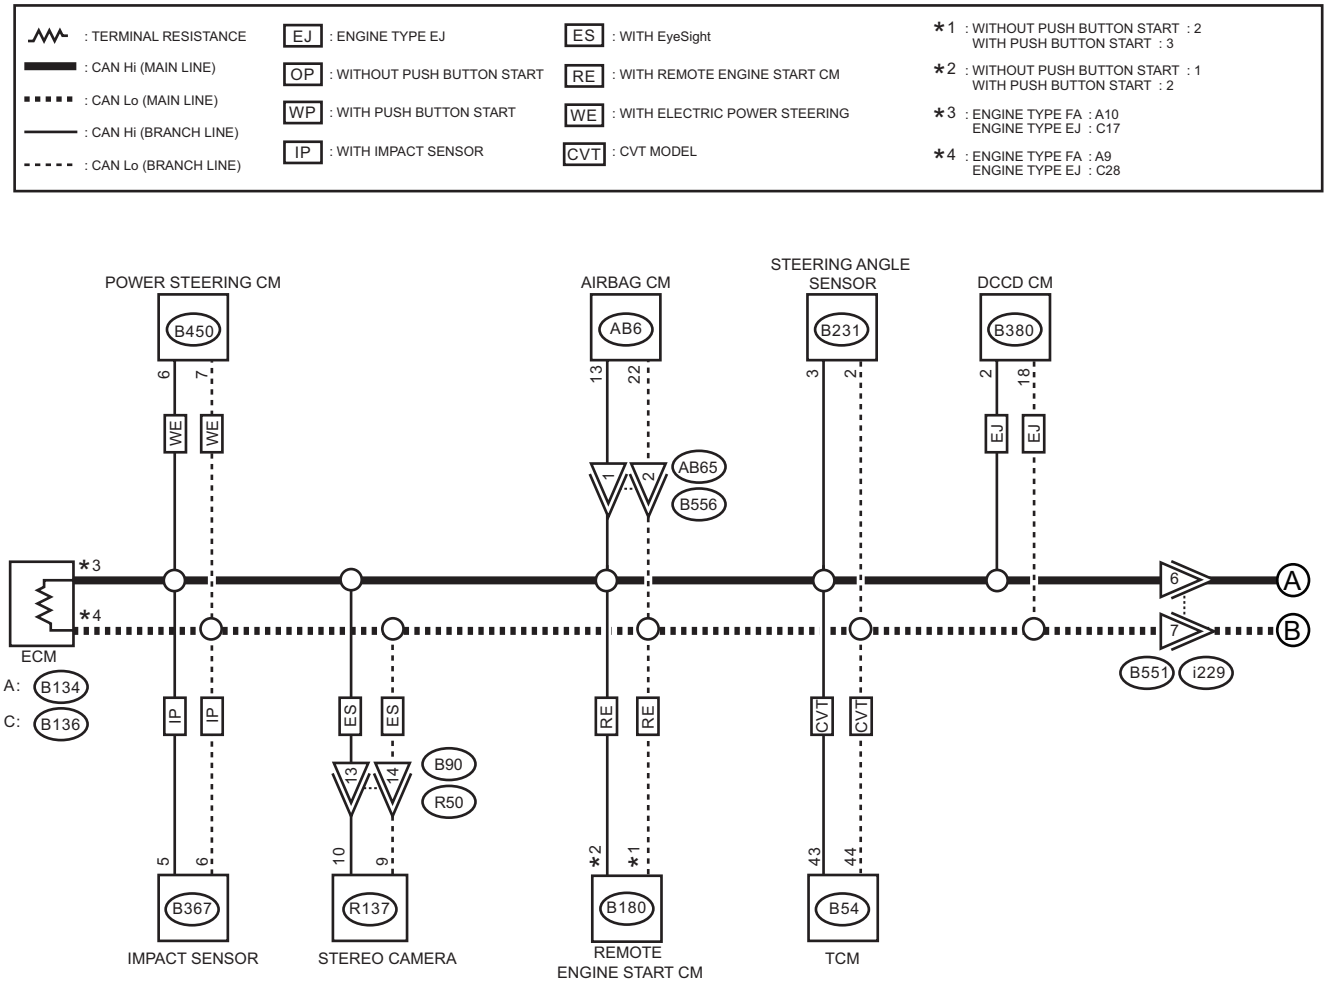
13.RELATED LINES 53 — 61 Ω (KEYLESS ACCESS SYSTEM)

WIRING DIAGRAM:

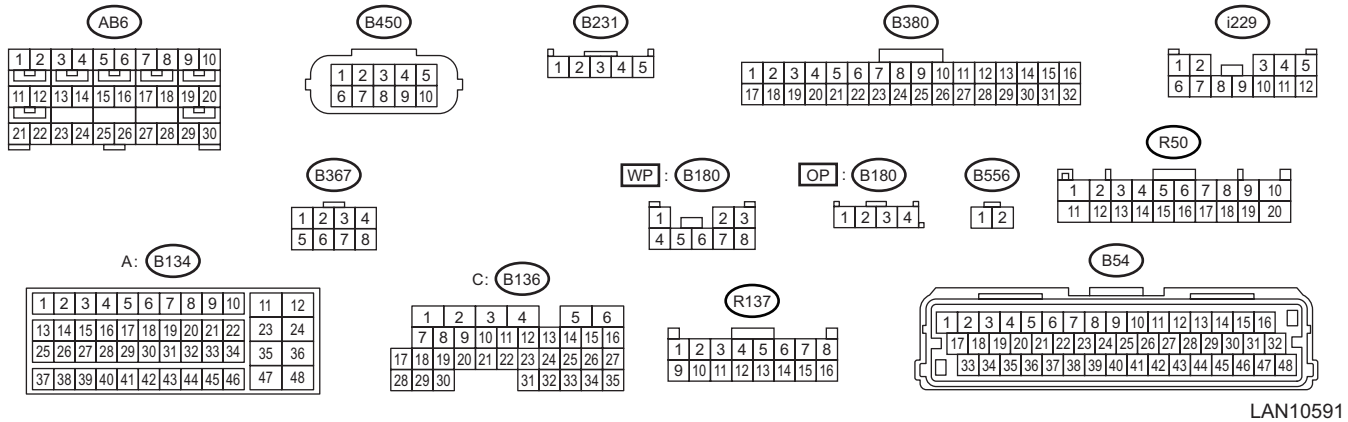


CAN communication system <Ref. to WI-113, WIRING DIAGRAM, CAN Communication System.>

LAN10591

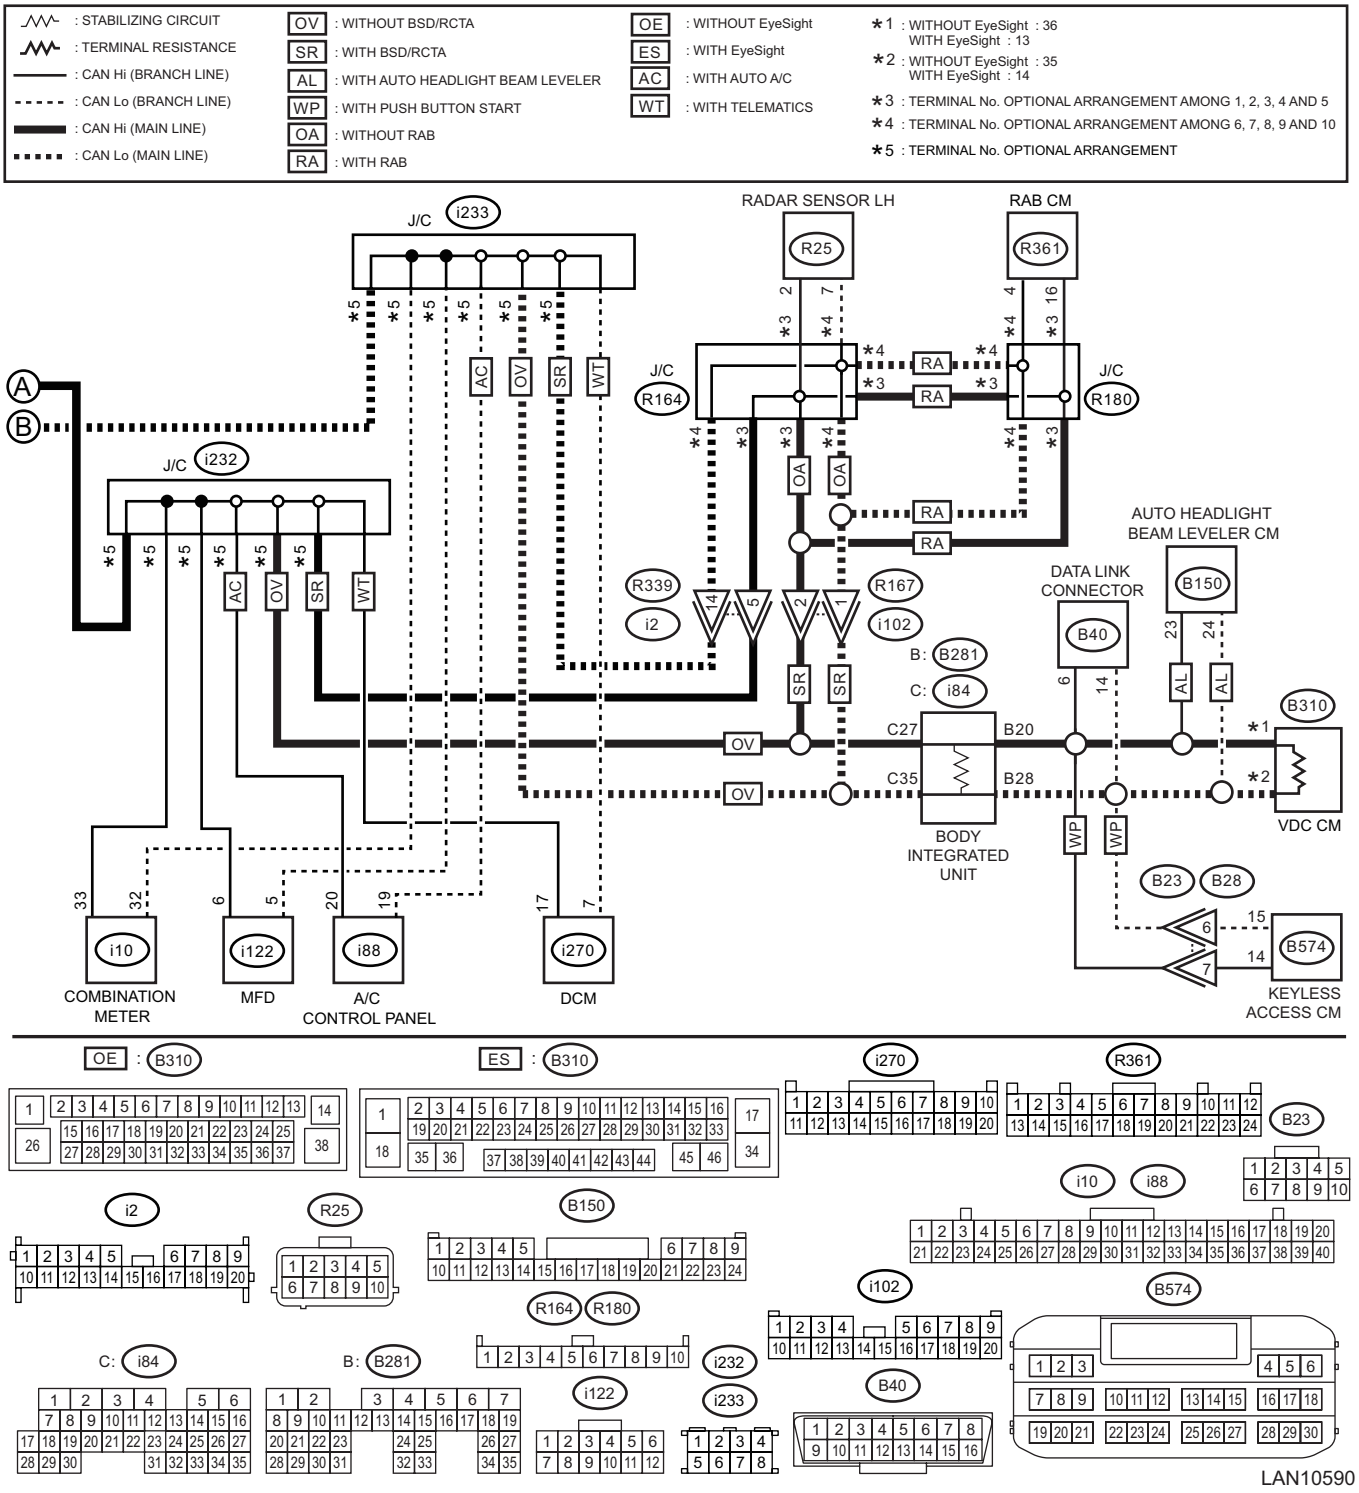


Step		Check	Yes	No
1	**CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.** 1) Disconnect the keyless access CM connector. 2) Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(B574) No. 14 — (B574) No. 15:***	Is the resistance 400 Ω or more?	Related lines between keyless access CM and main wiring harness is open, or main wiring harness is open at two places or more.	Go to step **2**.



Step		Check	Yes	No
2	**CHECK RELATED LINES.** Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(B574) No. 15 — (B40) No. 14:*** ***(B574) No. 14 — (B40) No. 6:***	Is the resistance 10 Ω or more?	Repair or replace the open circuit of keyless access CM related lines.	Check DTC of keyless access CM. <Ref. to KPS(diag)-26, OPERATION, Read Diagnostic Trouble Code (DTC).>

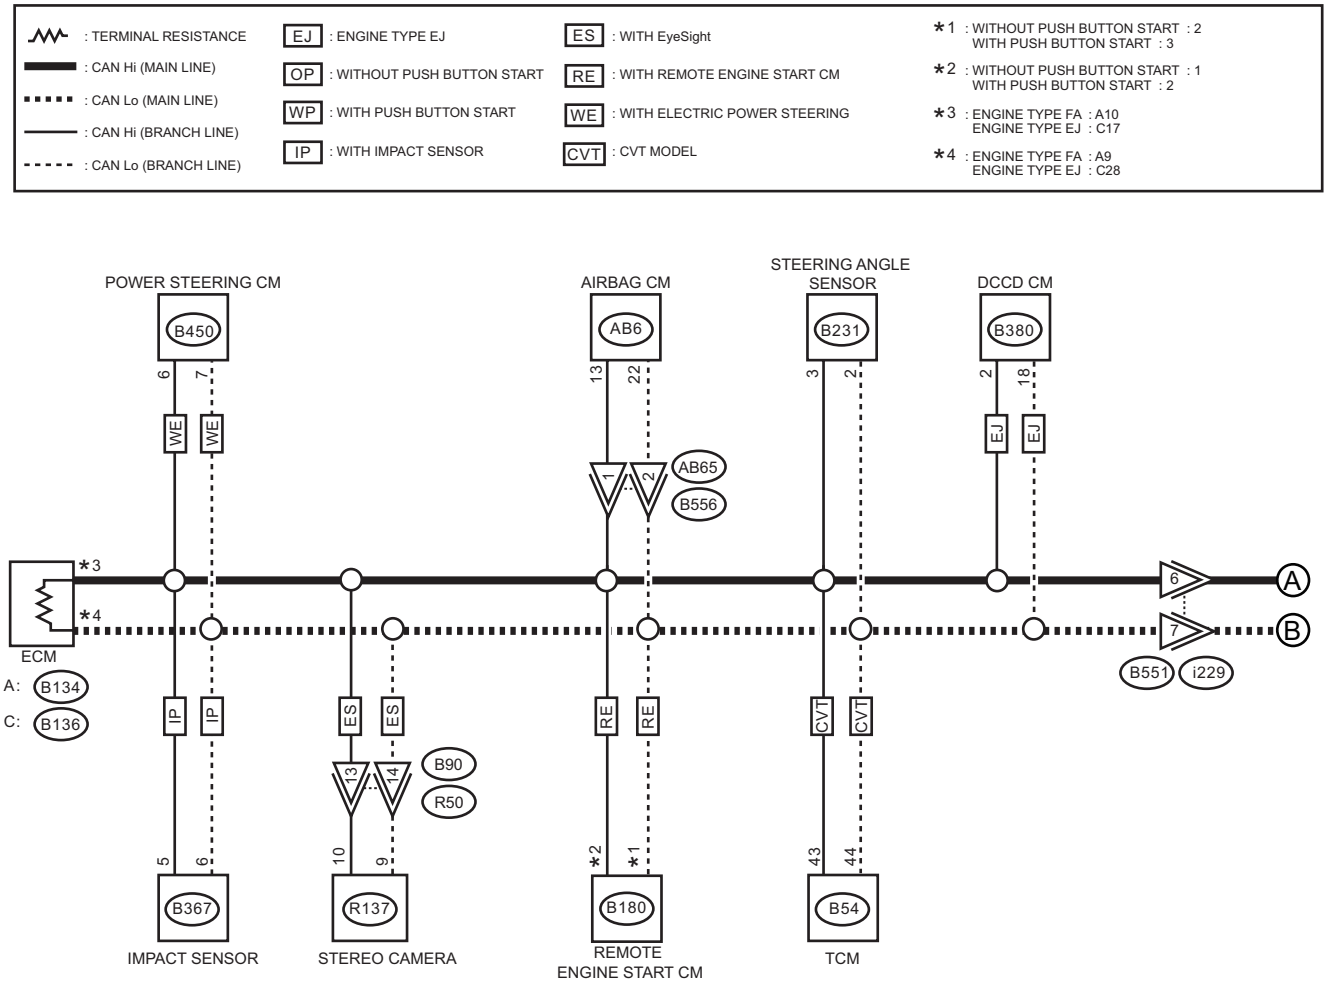
14.RELATED LINES 53 — 61 Ω (HEADLIGHT BEAM LEVELER)



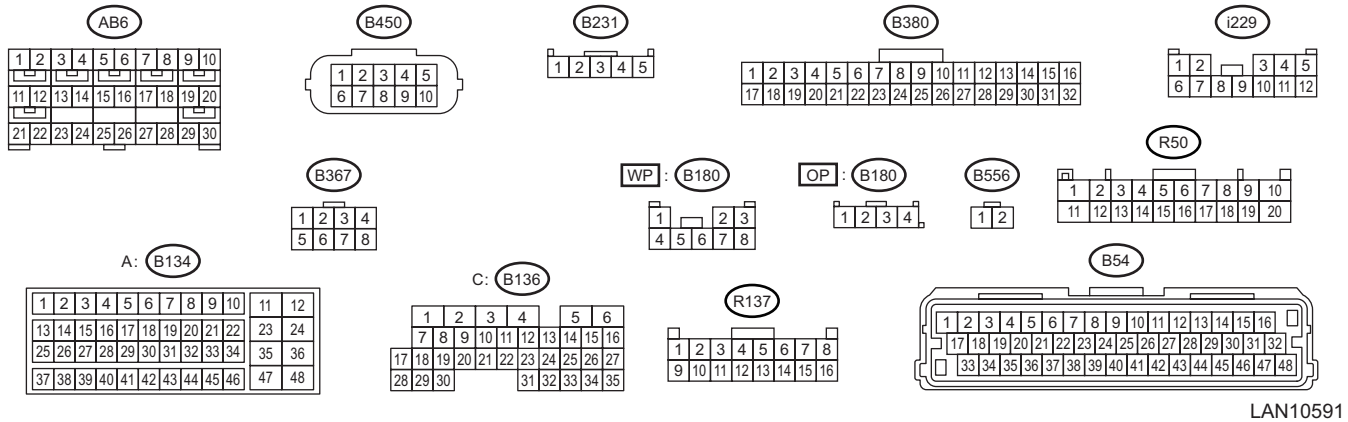
WIRING DIAGRAM:

CAN communication system <Ref. to WI-113, WIRING DIAGRAM, CAN Communication System.>

LAN10591



Step		Check	Yes	No
1	**CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.** 1) Disconnect the headlight beam leveler CM connector. 2) Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(B150) No. 23 — (B150) No. 24:***	Is the resistance 400 Ω or more?	Related lines between headlight beam leveler CM and main wiring harness is open, or main wiring harness is open at two places or more.	Go to step **2**.



Step		Check	Yes	No
2	**CHECK RELATED LINES.** Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(B150) No. 24 — (B40) No. 14:*** ***(B150) No. 23 — (B40) No. 6:***	Is the resistance 10 Ω or more?	Repair or replace the open circuit portion of headlight beam leveler CM related lines.	Check DTC of headlight beam leveler system. <Ref. to AL(diag)-10, Read Diagnostic Trouble Code (DTC).>

15.RELATED LINES 53 — 61 Ω (REMOTE ENGINE STARTER)

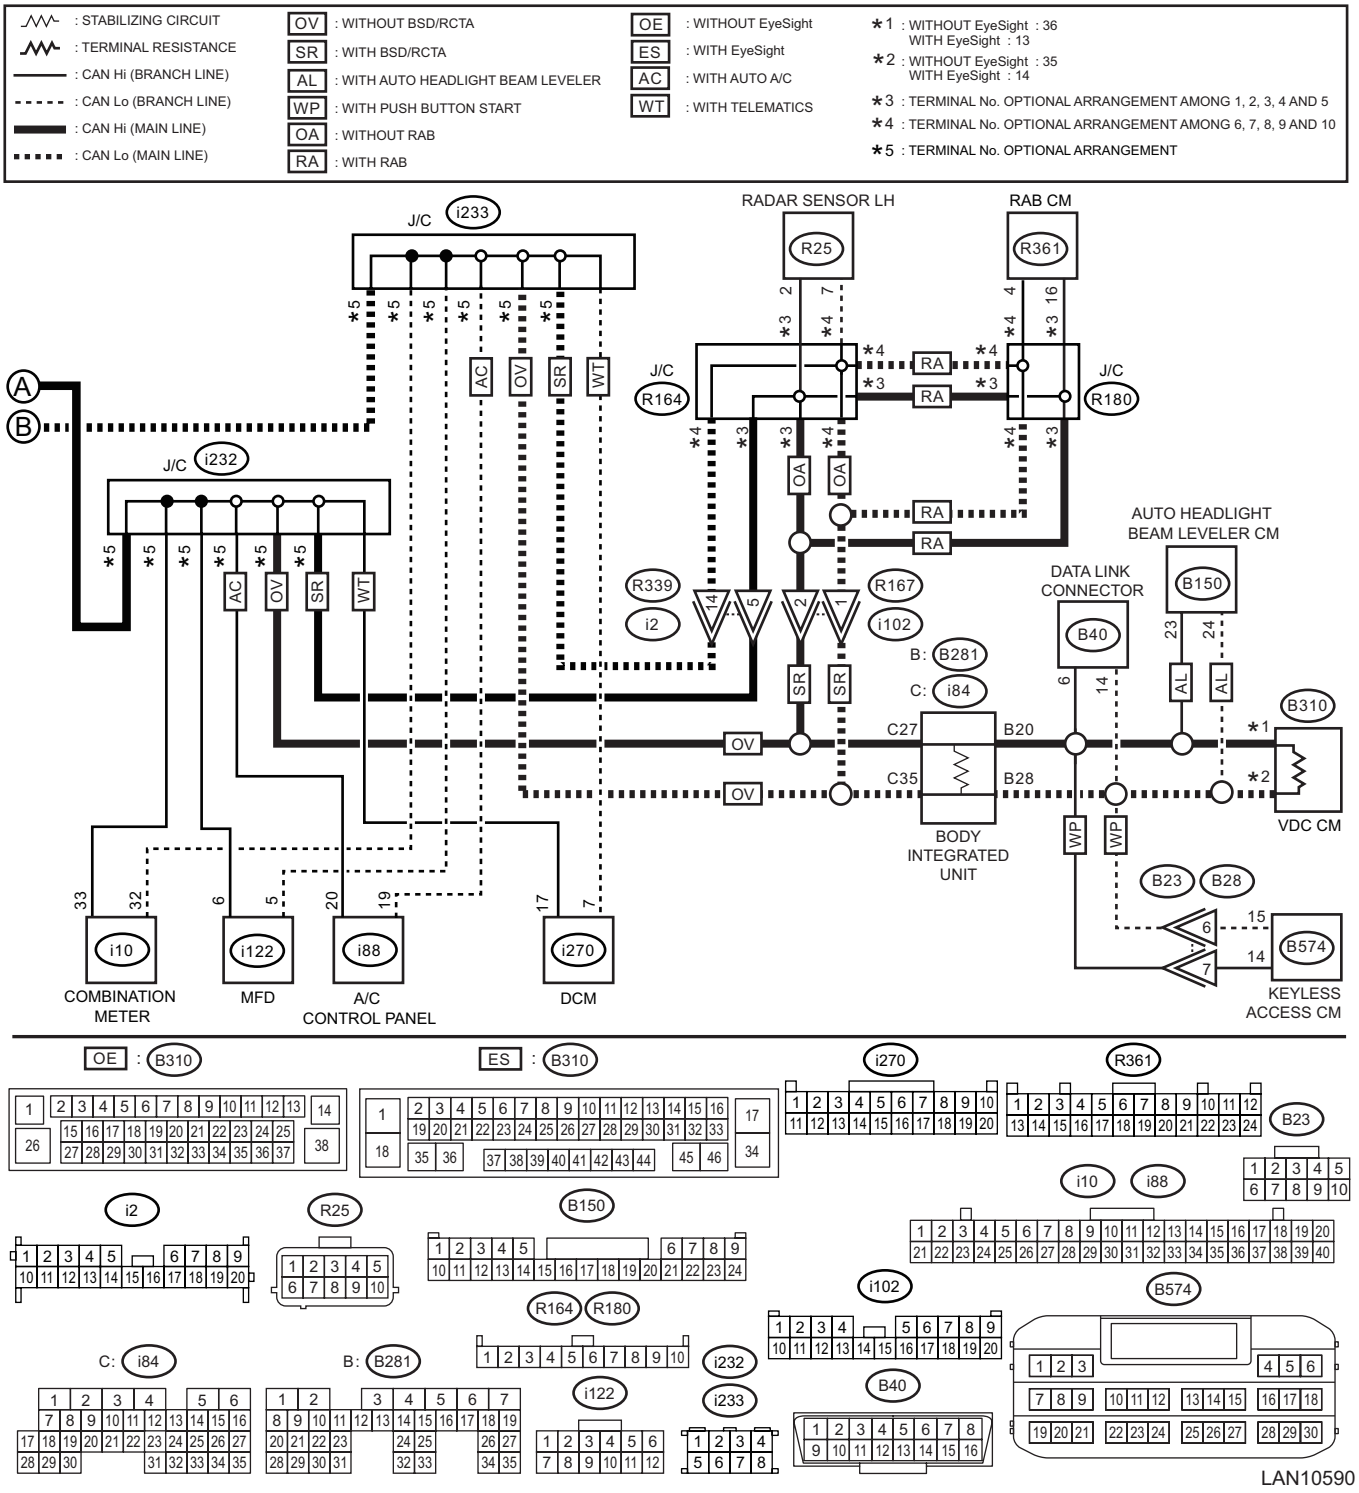
LAN10590

	Step	Check	Yes	No
1	**CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.** 1) Disconnect the remote engine start CM connector. 2) Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***Without push button start*** ***(B180) No. 1 — (B180) No. 2:*** ***With push button start*** ***(B180) No. 2 — (B180) No. 3:***	Is the resistance 400 Ω or more?	Related lines between remote engine start CM and main wiring harness is open, or main wiring harness is open at two places or more.	Go to step **2**.
2	**CHECK RELATED LINES.** Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***Without push button start*** ***(B180) No. 1 — (B40) No. 6:*** ***(B180) No. 2 — (B40) No. 14:*** ***With push button start*** ***(B180) No. 2 — (B40) No. 6:*** ***(B180) No. 3 — (B40) No. 14:***	Is the resistance 10 Ω or more?	Repair or replace the open circuit of remote engine start CM related lines.	The communication harness is normal. Check the remote engine starter CM or the mobile key.

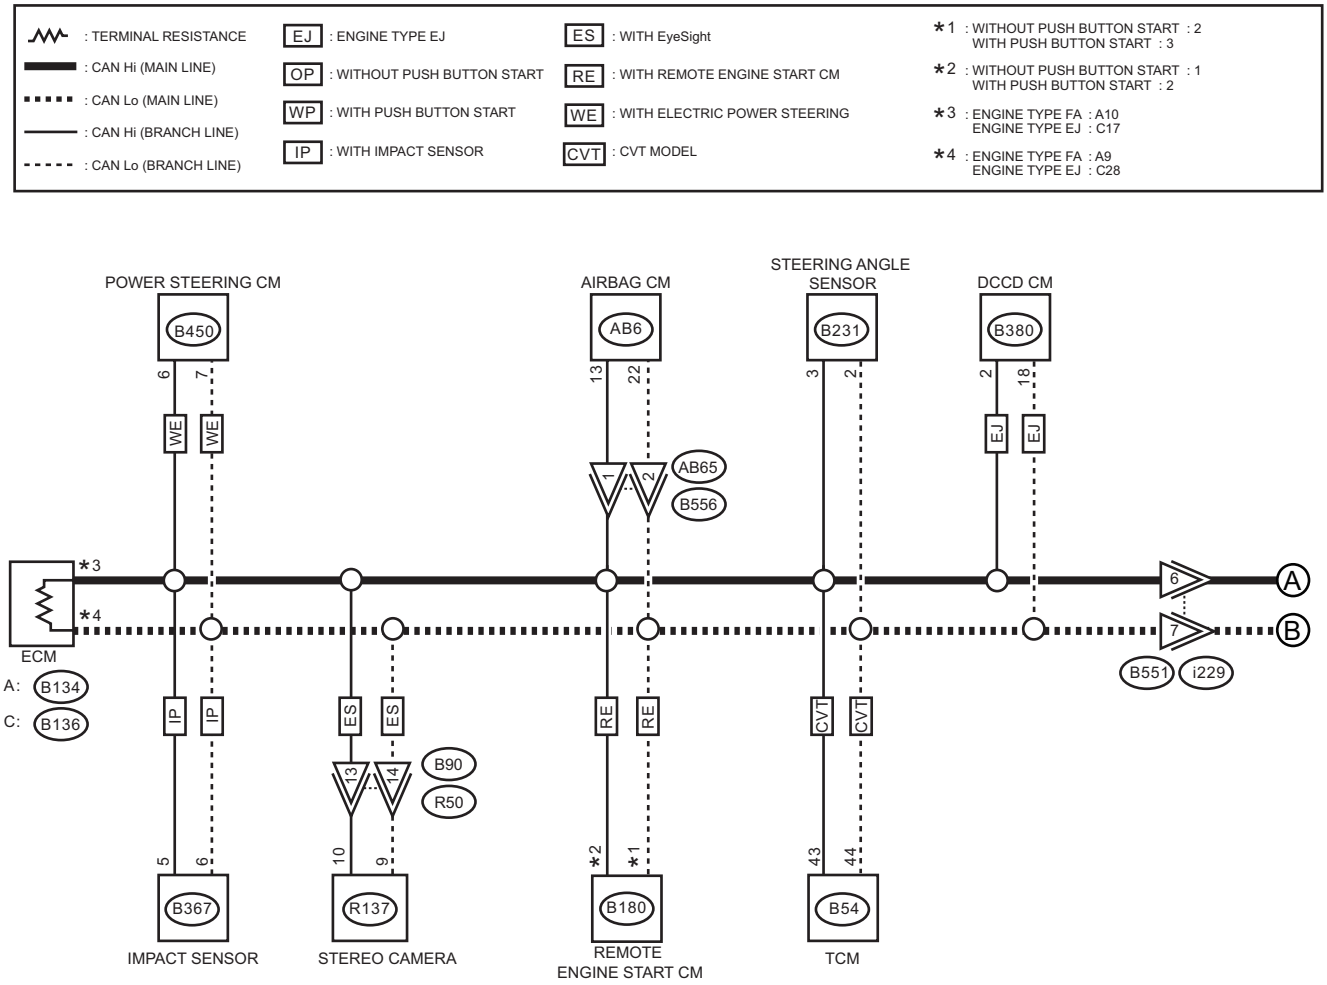
16.RELATED LINES 53 — 61 Ω (IMPACT SENSOR SYSTEM)



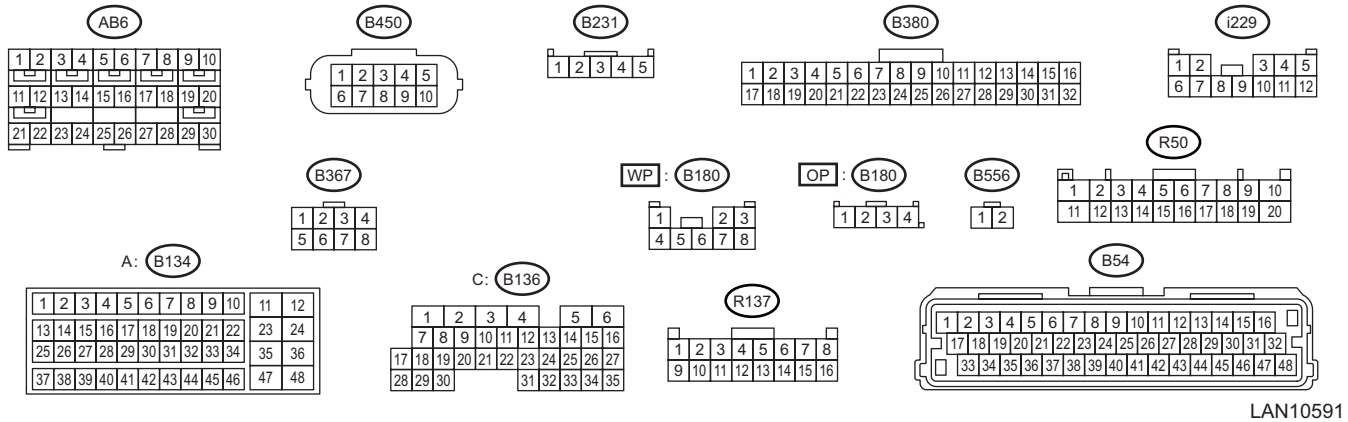
WIRING DIAGRAM:

CAN communication system <Ref. to WI-113, WIRING DIAGRAM, CAN Communication System.>

LAN10591

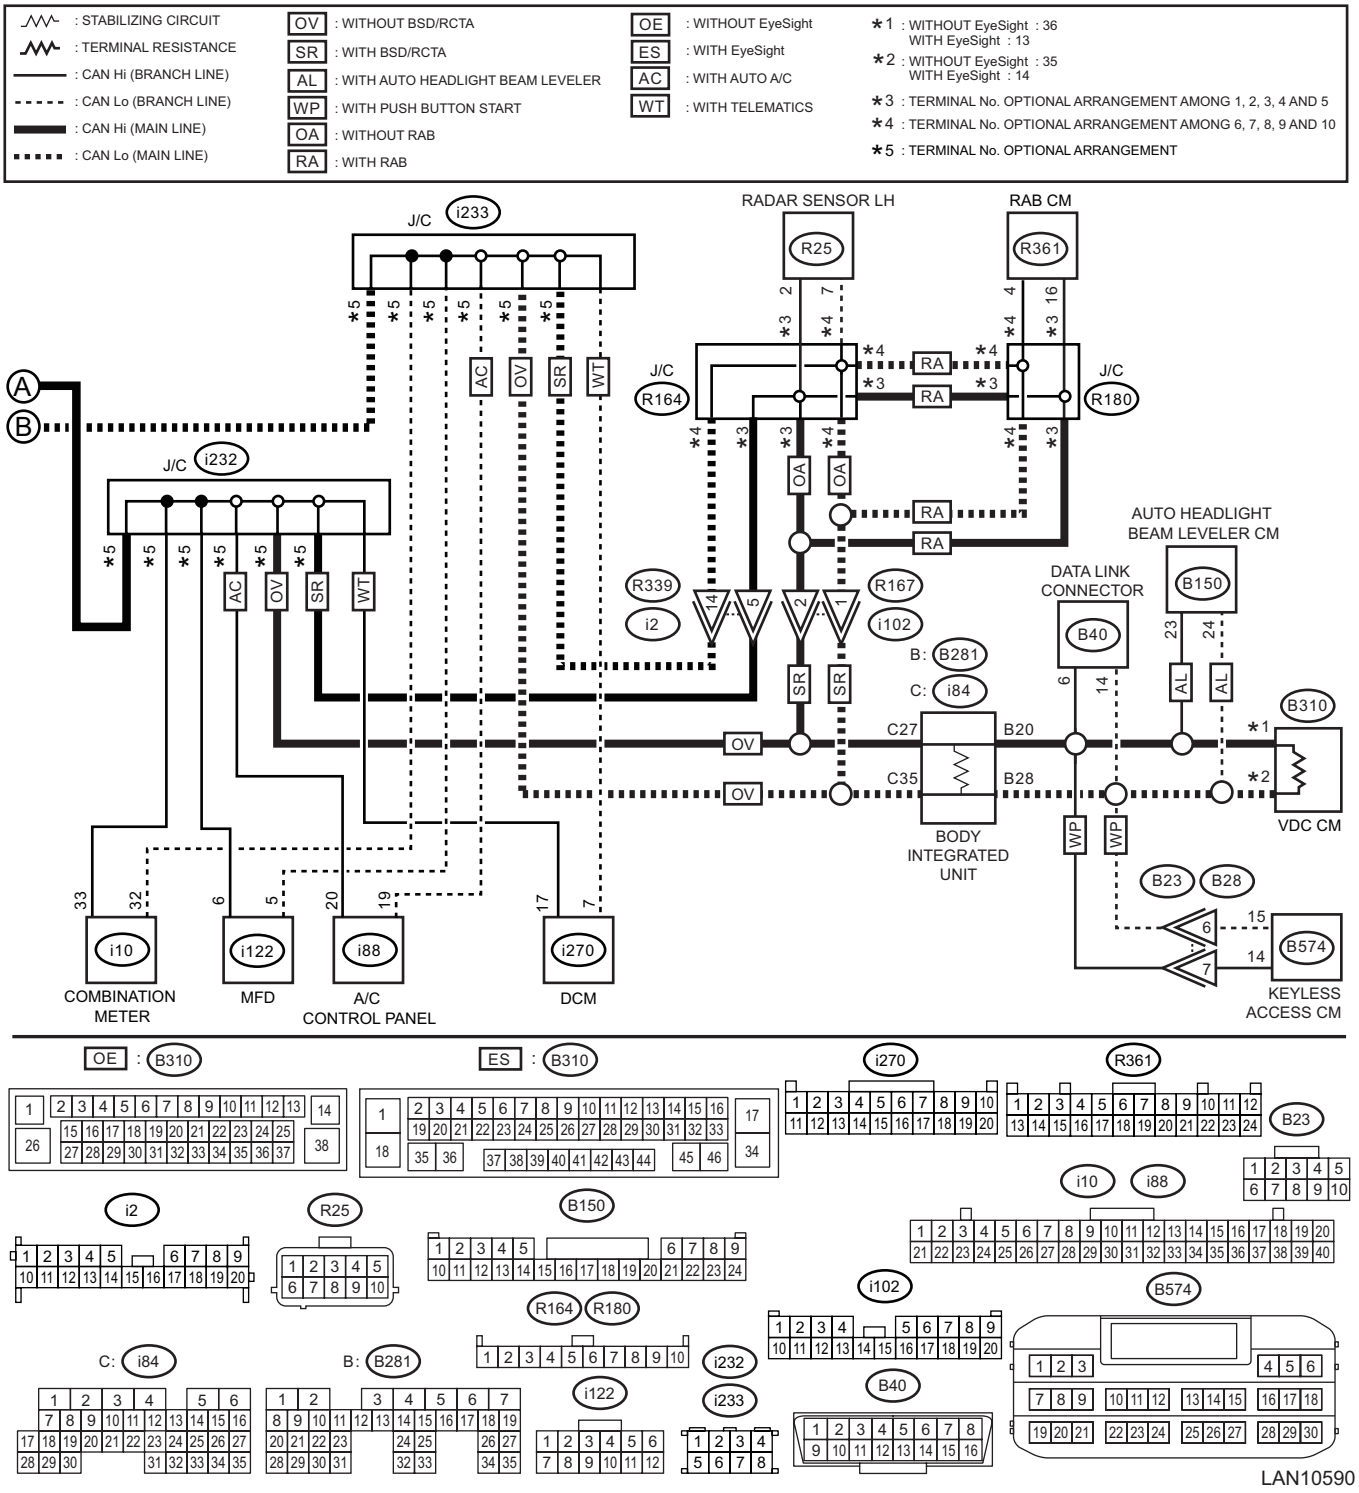


Step		Check	Yes	No
1	**CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.** 1) Disconnect the impact sensor connector. 2) Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(B367) No. 5 — (B367) No. 6:***	Is the resistance 400 Ω or more?	Related lines between the impact sensor and main wiring harness is open, or main wiring harness is open at two places or more.	Go to step **2**.



Step		Check	Yes	No
2	**CHECK RELATED LINES.** Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(B367) No. 6 — (B40) No. 14:*** ***(B367) No. 5 — (B40) No. 6:***	Is the resistance 10 Ω or more?	Repair or replace the open circuit of the impact sensor system related lines.	The communication harness is normal. Check the impact sensor.

17.RELATED LINES 53 — 61 Ω (DCCD)

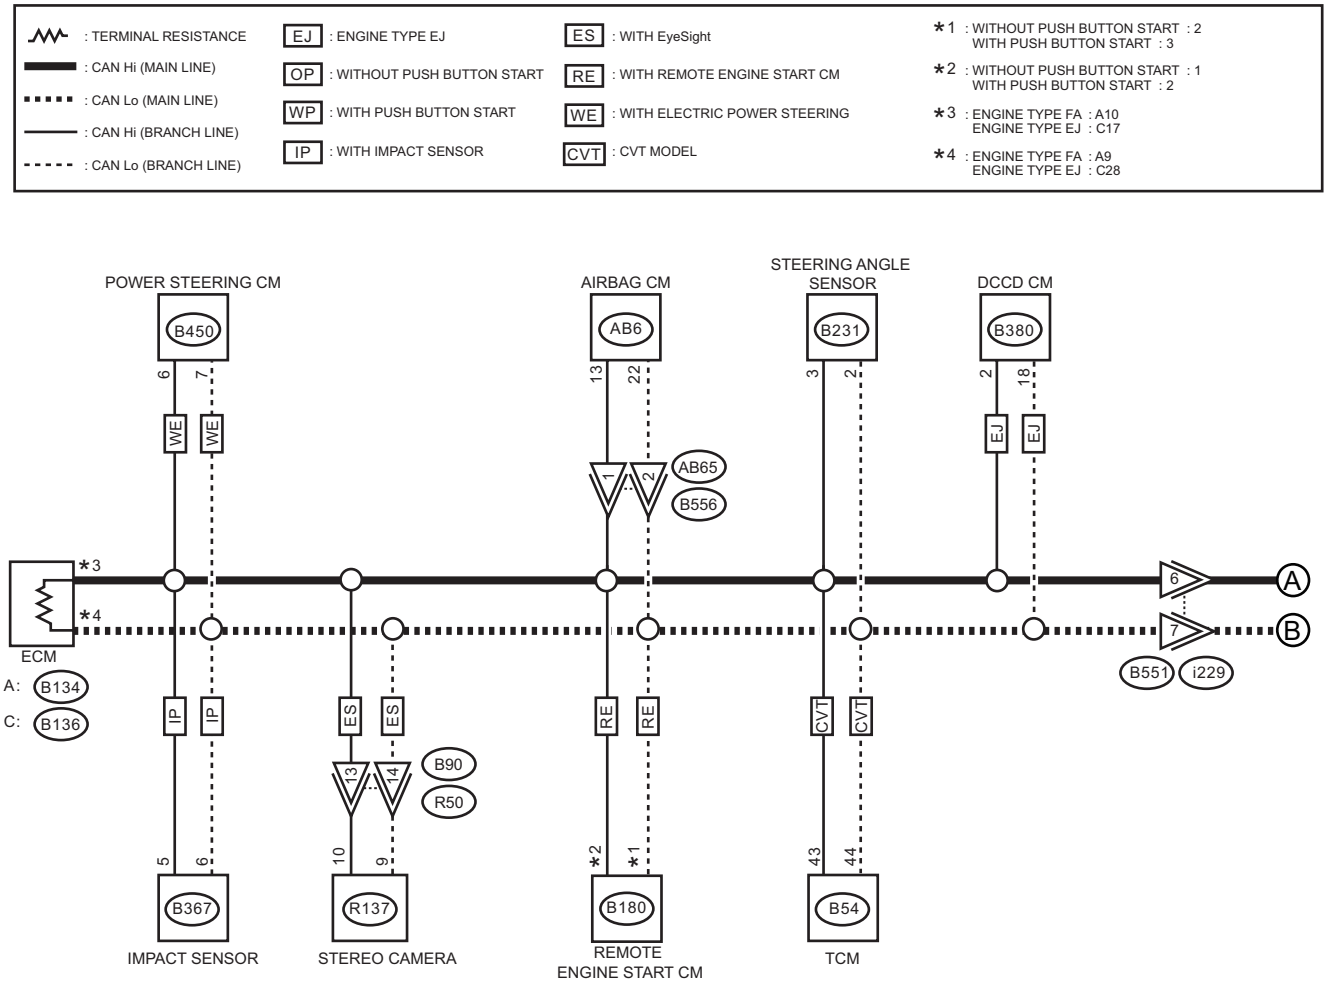


WIRING DIAGRAM:

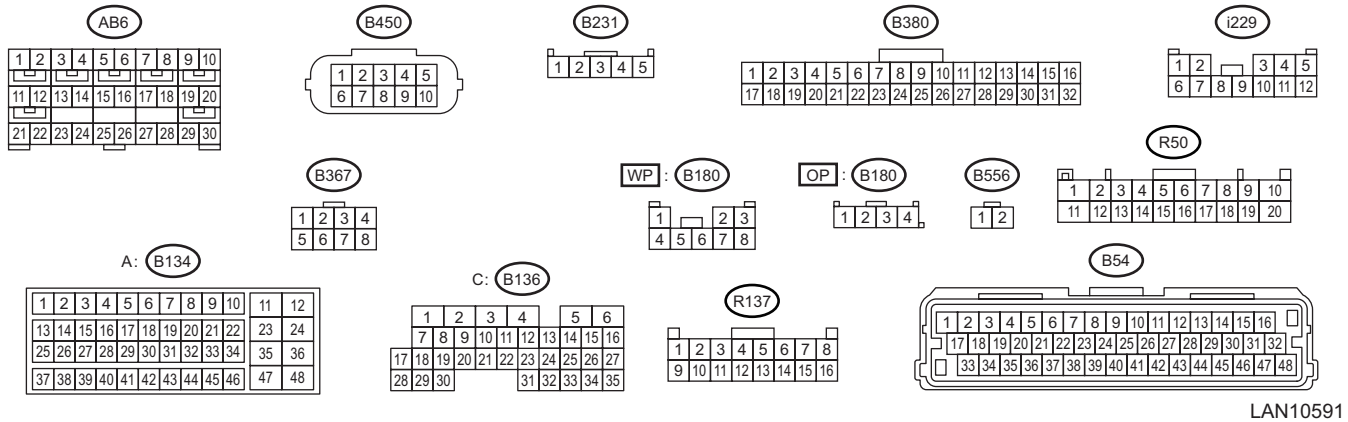
CAN communication system <Ref. to WI-113, WIRING DIAGRAM, CAN Communication System.>

LAN10591

LAN10590

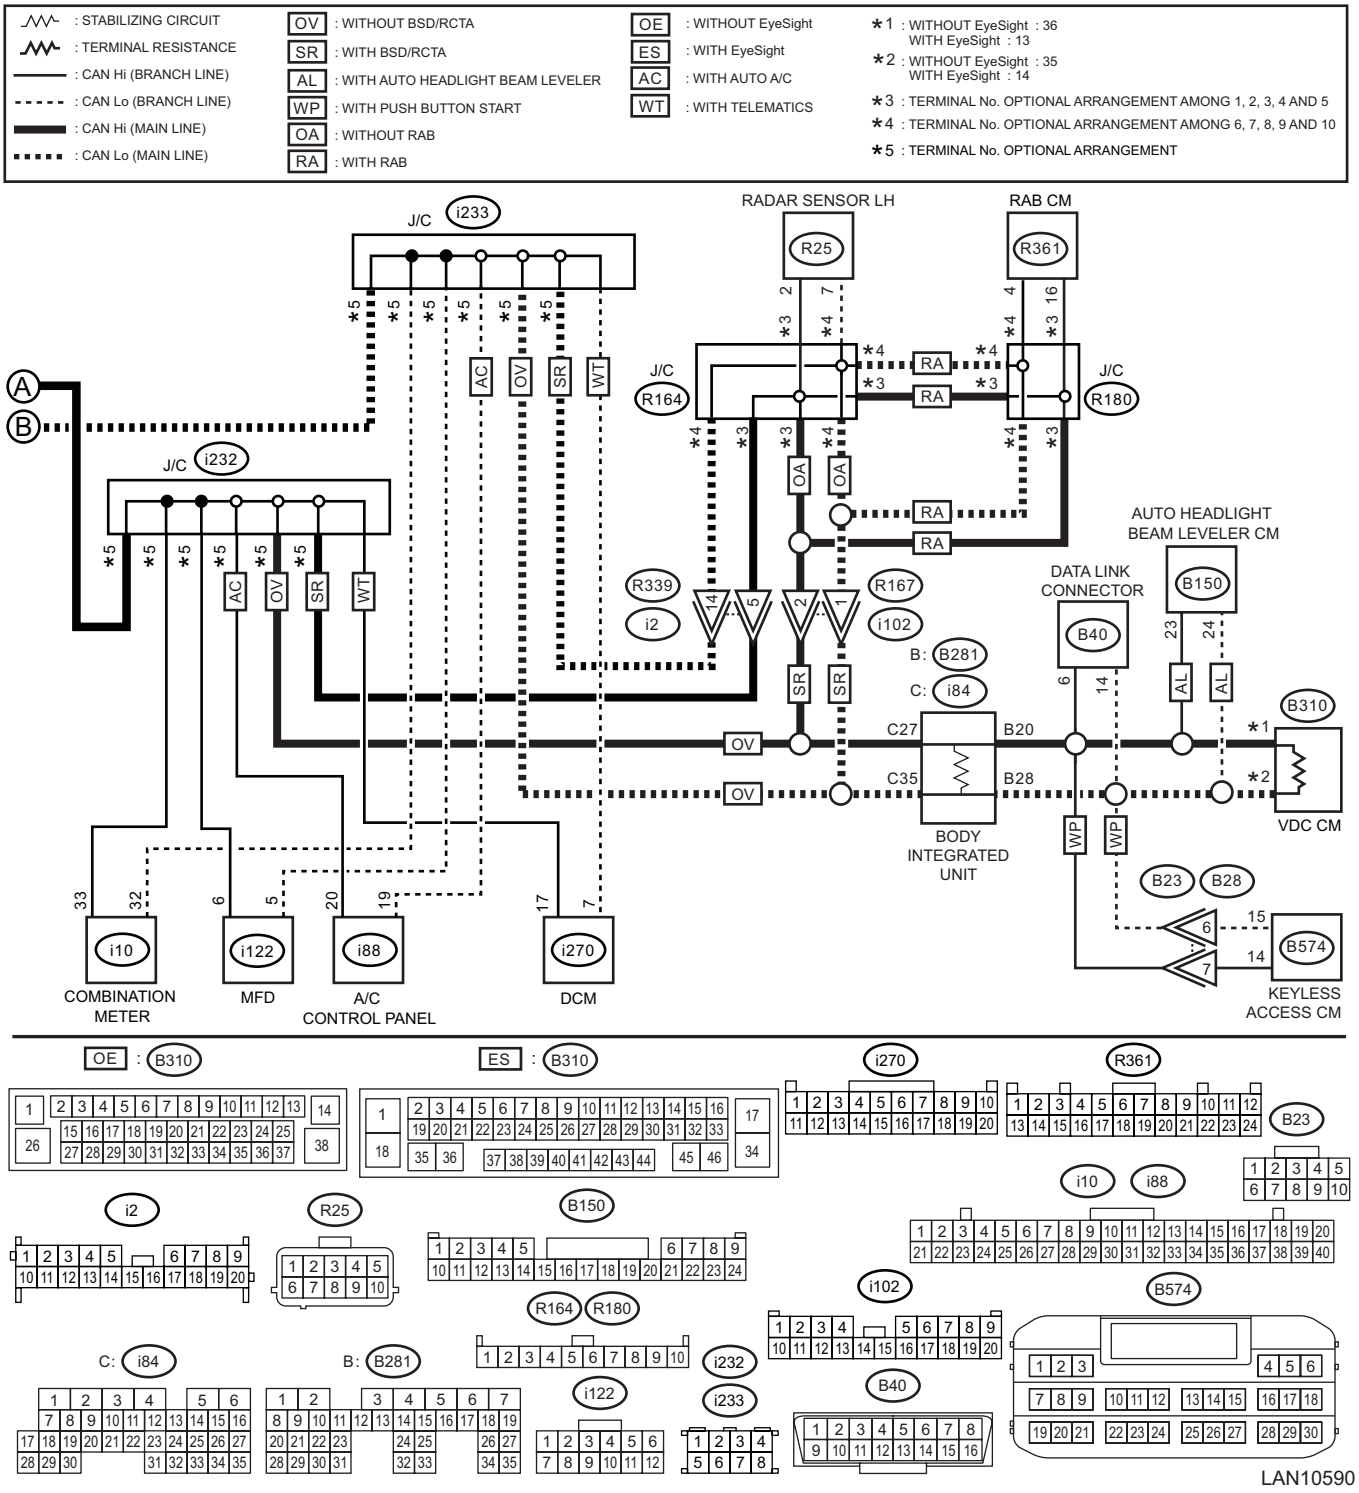


Step		Check	Yes	No
1	**CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.** 1) Disconnect the DCCD CM connector. 2) Using the tester, measure the resistance between terminals. ***Connector & terminal (B380) No. 2 — (B380) No. 18:***	Is the resistance 400 Ω or more?	Related lines between DCCD CM and main wiring harness is open, or main wiring harness is open at two places or more.	Go to step **2**.



Step		Check	Yes	No
2	**CHECK RELATED LINES.** Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(B380) No. 18 — (B40) No. 14:*** ***(B380) No. 2 — (B40) No. 6:***	Is the resistance 10 Ω or more?	Repair or replace the open portion of DCCD CM related lines.	The communication harness is normal. Check the DCCD CM. <Ref. to 6MT(diag)-9, Read Diagnostic Trouble Code (DTC).>

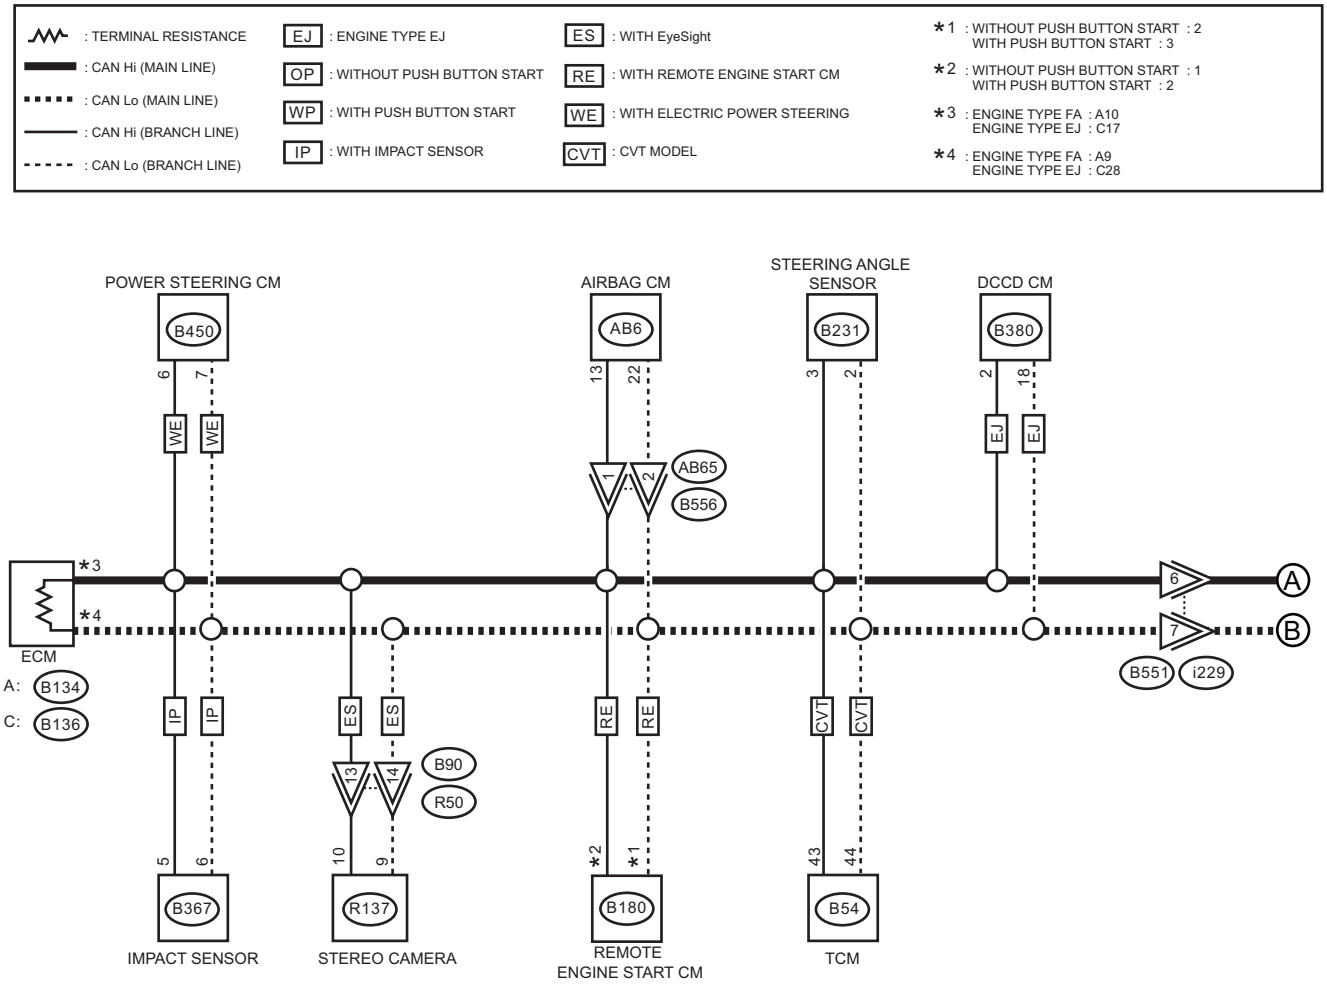
18.RELATED LINES 53 — 61 Ω (BSD/RCTA)



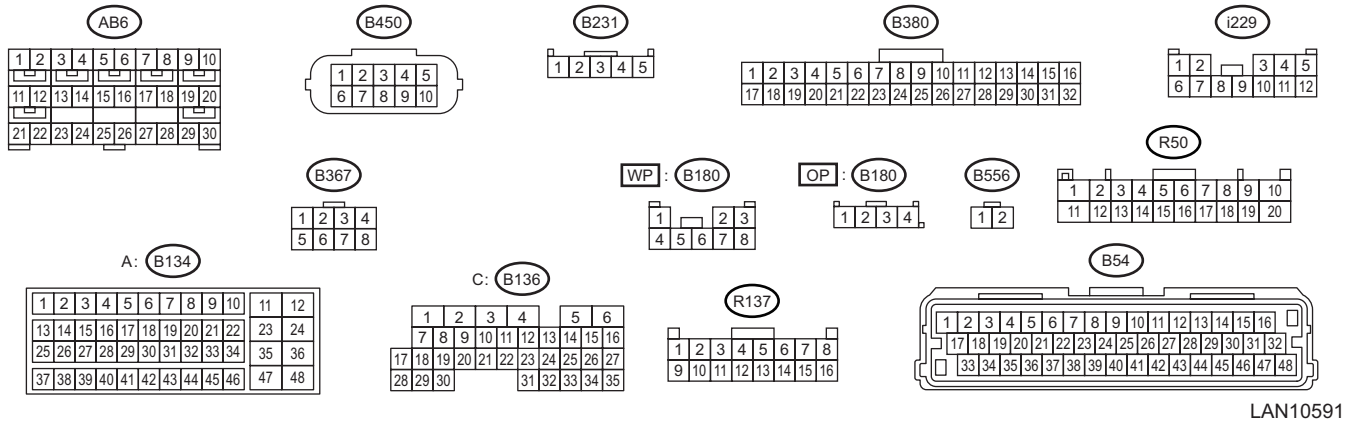
WIRING DIAGRAM:

CAN communication system <Ref. to WI-113, WIRING DIAGRAM, CAN Communication System.>

LAN10591

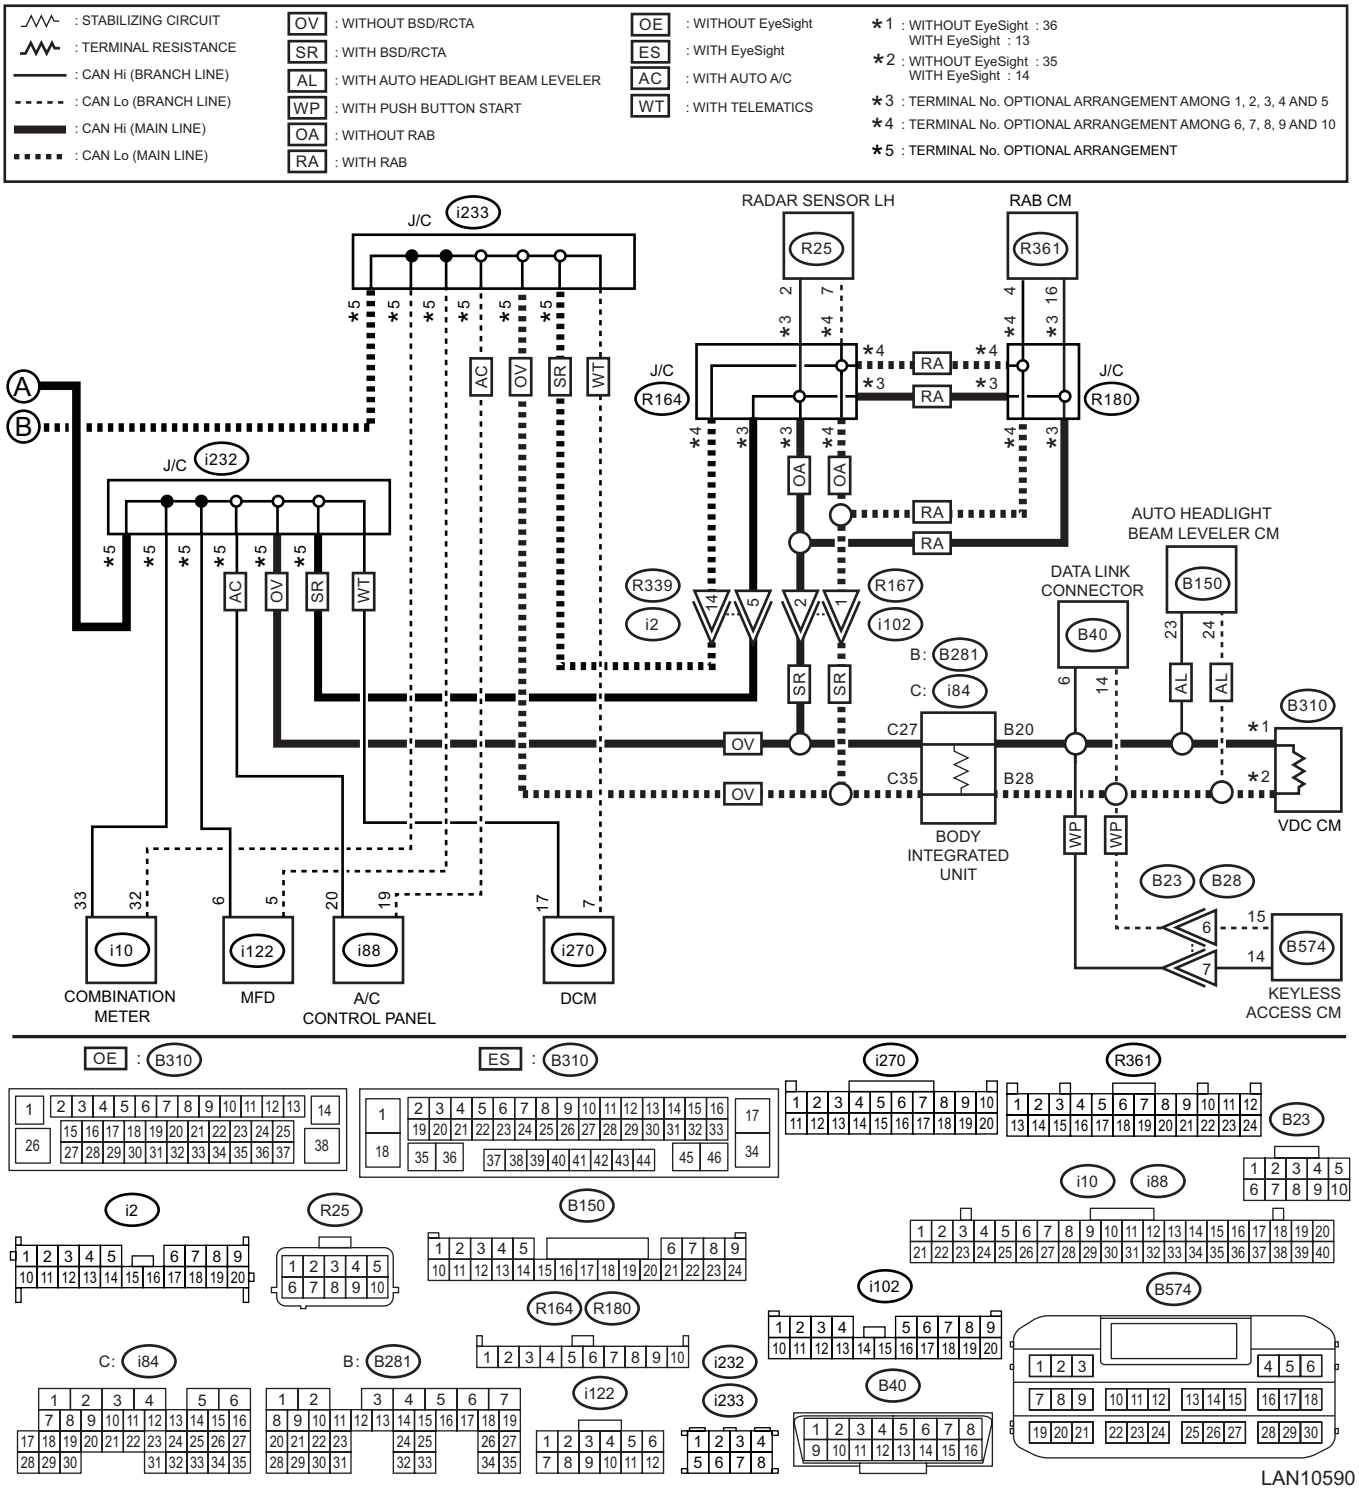


Step		Check	Yes	No
1	**CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.** 1) Disconnect the radar sensor LH connector. 2) Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(R25) No. 2 — (R25) No. 7:***	Is the resistance 400 Ω or more?	Related lines between radar sensor LH and main wiring harness is open, or main wiring harness is open at two places or more.	Go to step **2**.



Step		Check	Yes	No
2	**CHECK RELATED LINES.** Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(R25) No. 2 — (B40) No. 6:*** ***(R25) No. 7 — (B40) No. 14:***	Is the resistance 10 Ω or more?	Repair or replace the open circuit of the Subaru Rear Vehicle Detection related lines.	The communication harness is normal. Check DTC of radar sensor. <Ref. to RVD(diag)-12, OPERATION, Read Diagnostic Trouble Code (DTC).>

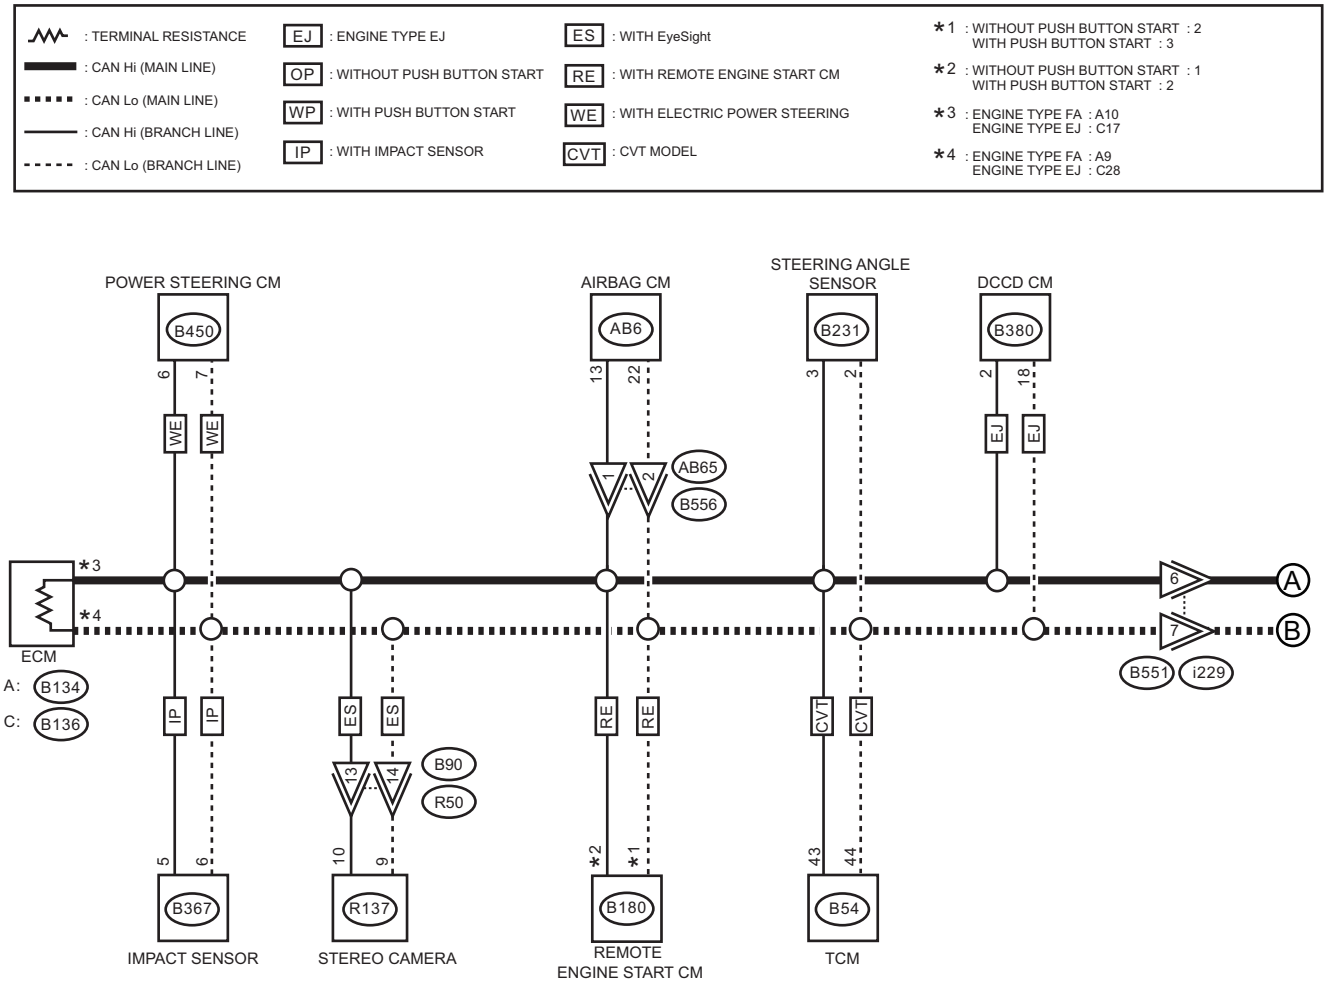
19.RELATED LINES 53 — 61 Ω (STEREO CAMERA)



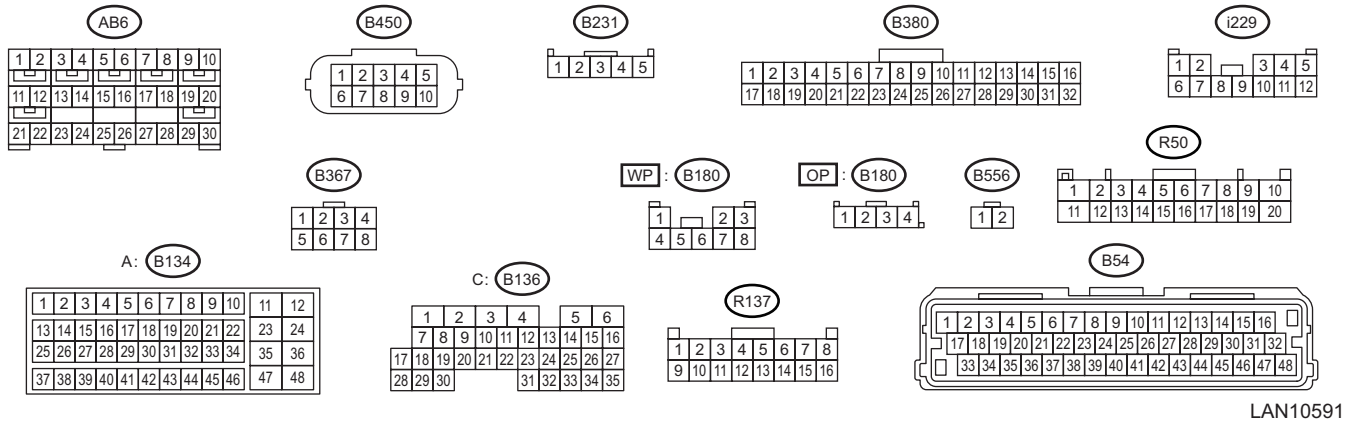
WIRING DIAGRAM:

CAN communication system <Ref. to WI-113, WIRING DIAGRAM, CAN Communication System.>

LAN10591

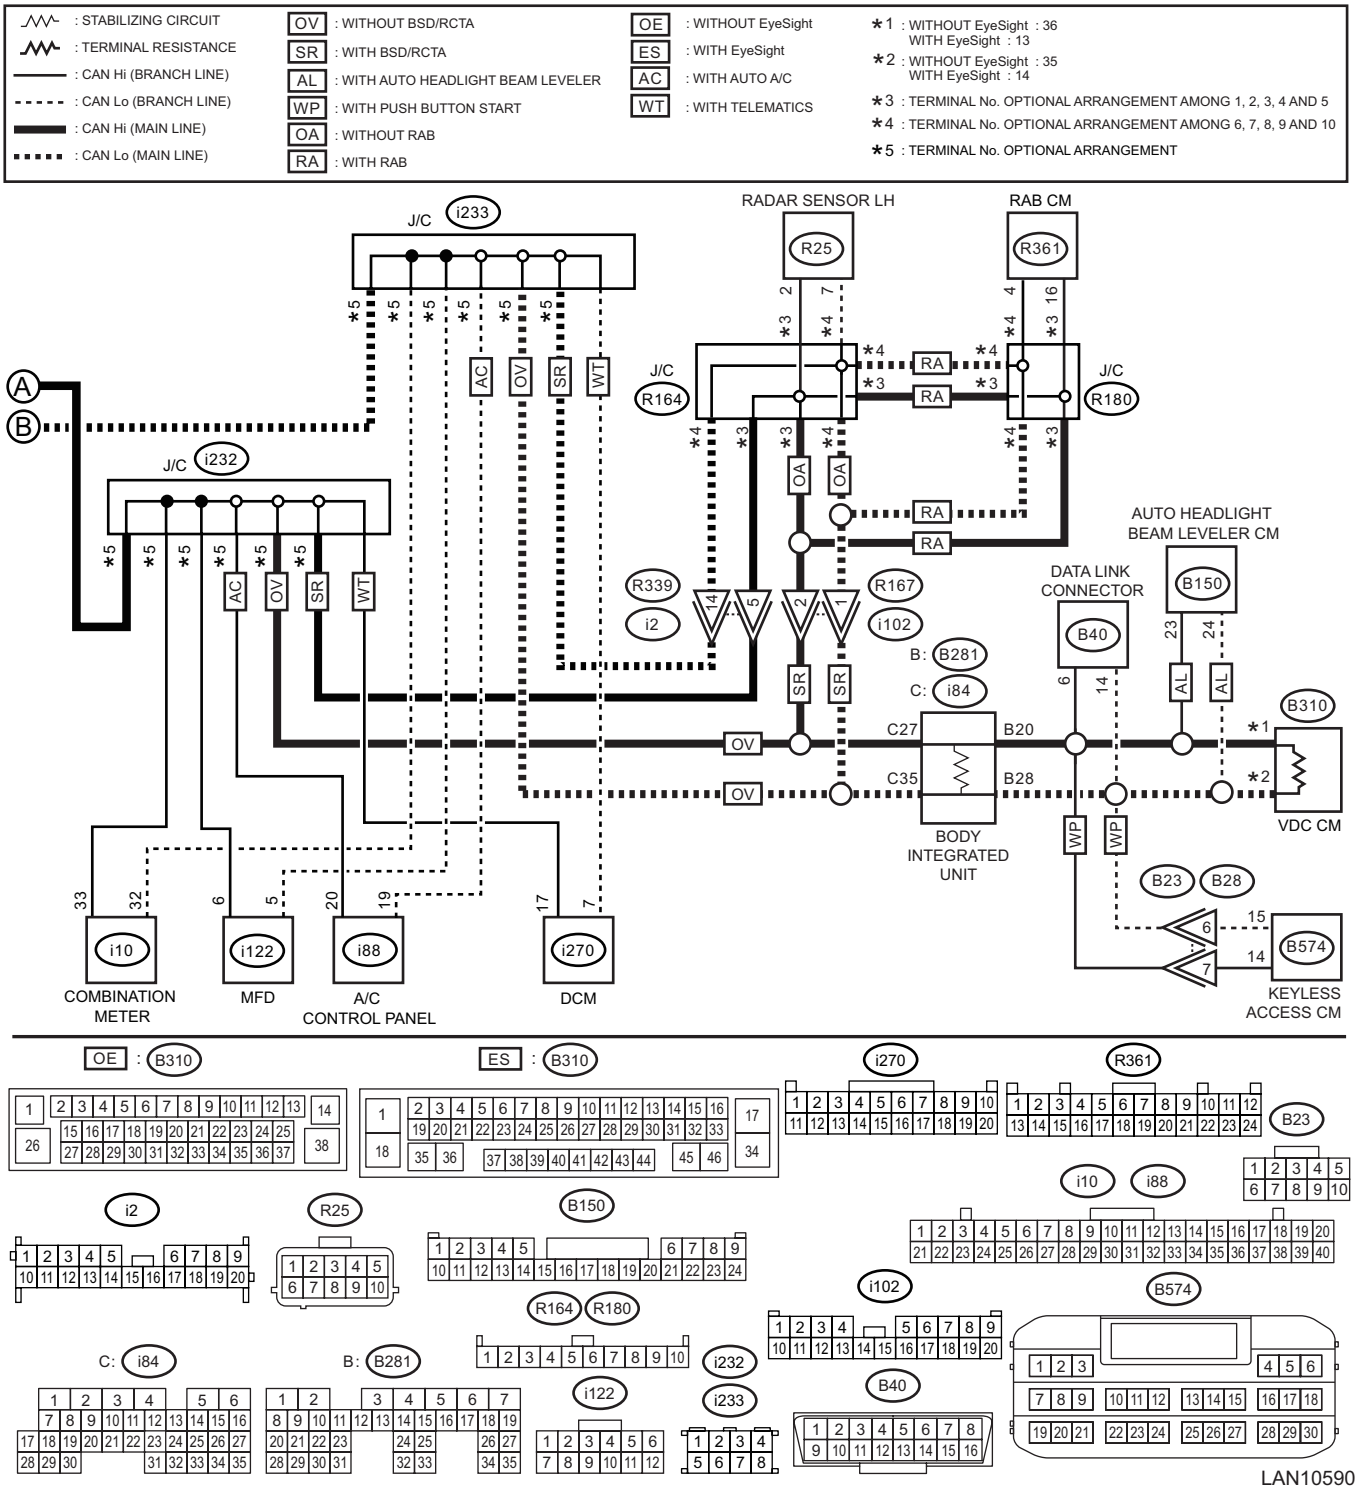


Step		Check	Yes	No
1	**CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.** 1) Disconnect the stereo camera connector. 2) Using the tester, measure the resistance between terminals. ***Connector & terminal (R137) No. 10 — No. 9:***	Is the resistance 400 Ω or more?	Related lines between stereo camera and main wiring harness is open, or main wiring harness is open at two places or more.	Go to step **2**.



Step		Check	Yes	No
2	**CHECK RELATED LINES.** Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(R137) No. 9 — (B40) No. 14:*** ***(R137) No. 10 — (B40) No. 6:***	Is the resistance 10 Ω or more?	Repair or replace the open circuit of stereo camera related lines.	Check DTC of stereo camera. <Ref. to ES(diag)-43, Diagnostic Code(s) Display.>

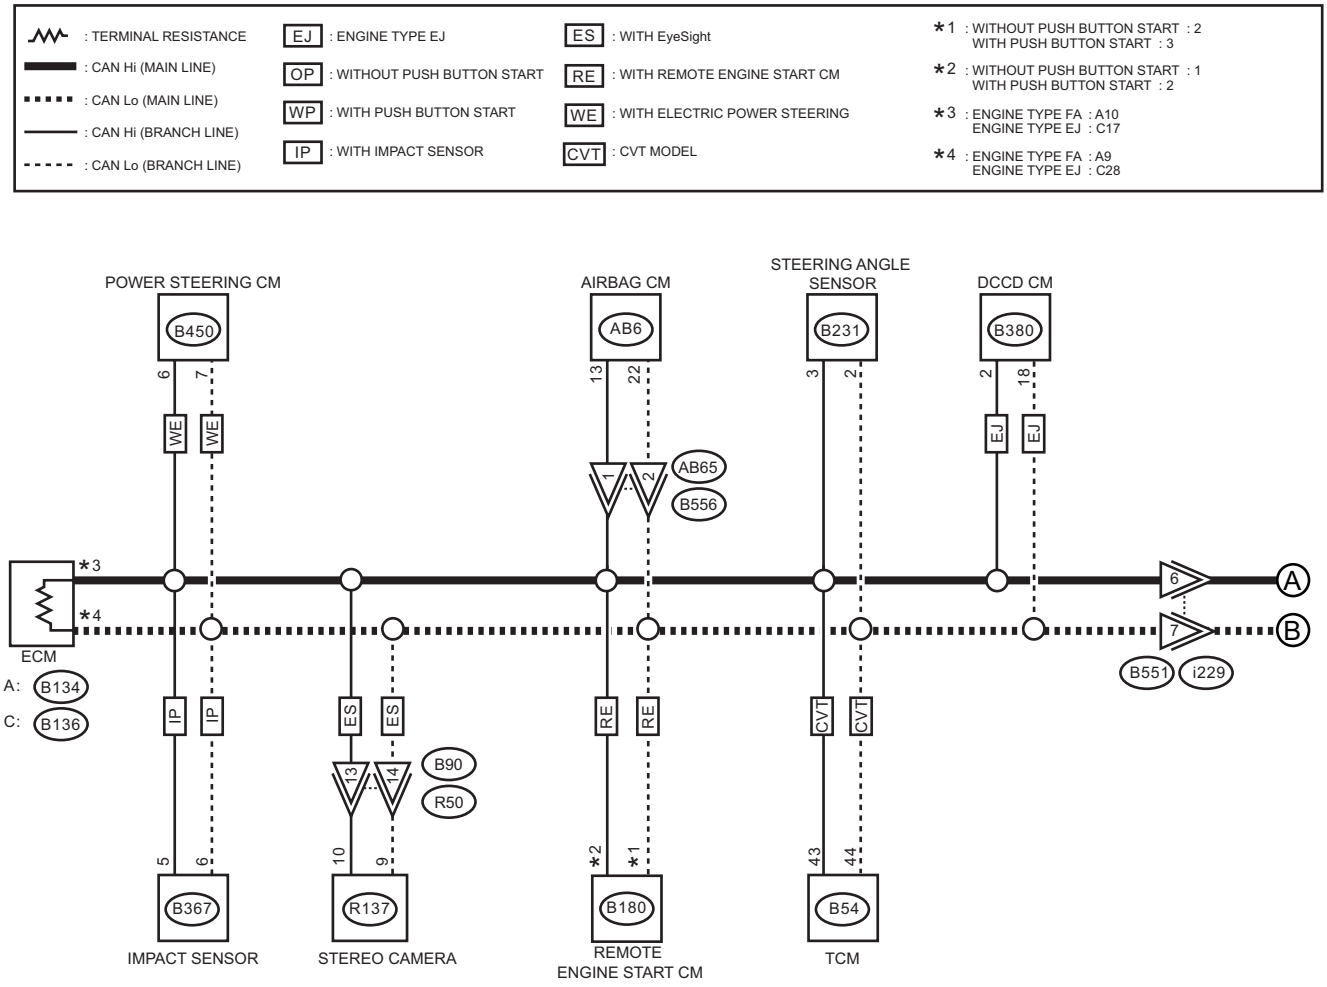
20.RELATED LINES 53 — 61 Ω (TELEMATICS)



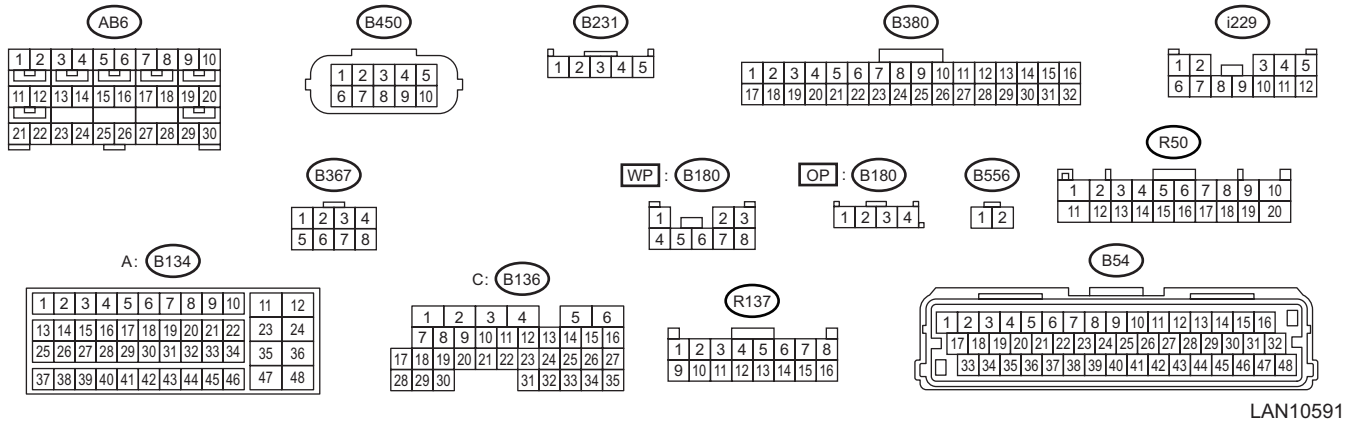
WIRING DIAGRAM:

CAN communication system <Ref. to WI-113, WIRING DIAGRAM, CAN Communication System.>

LAN10591

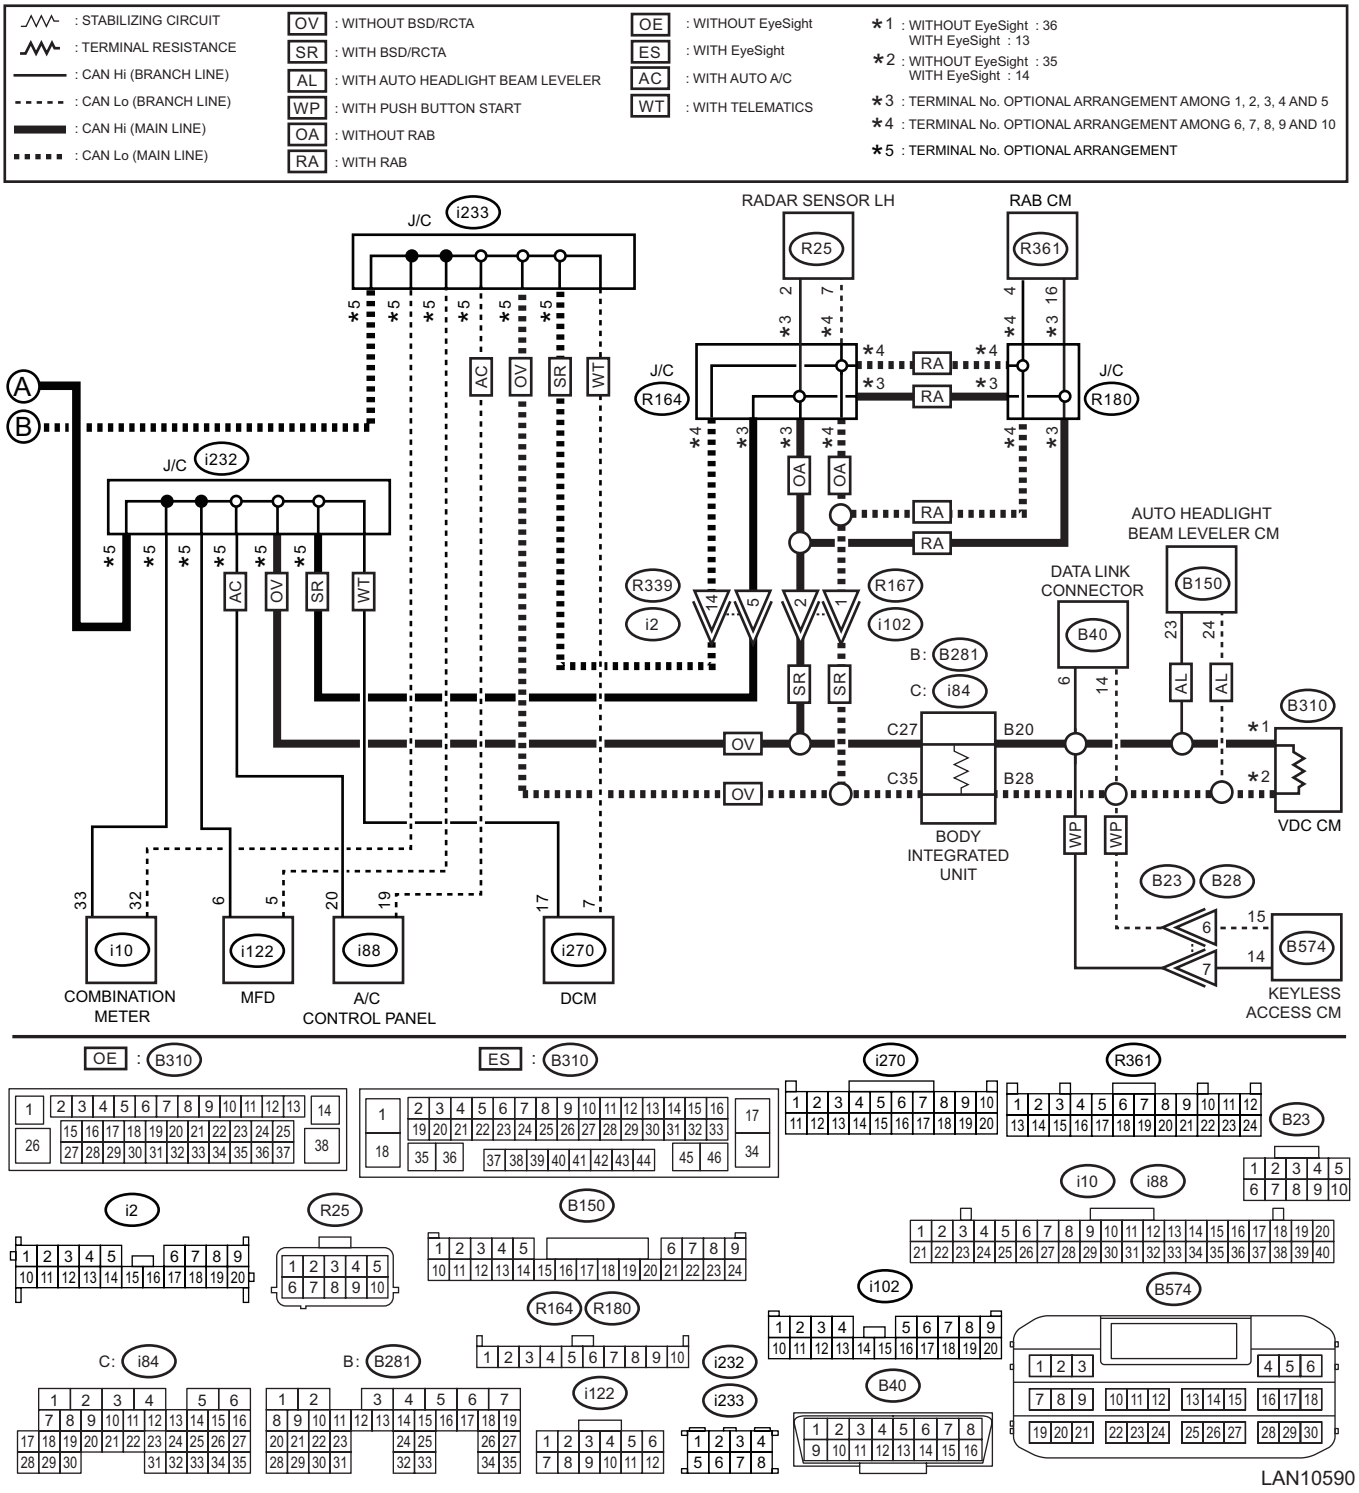


Step		Check	Yes	No
1	**CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.** 1) Disconnect the DCM connector. 2) Using the tester, measure the resistance between terminals. ***Connector & terminal (i270) No. 7 — No. 17:***	Is the resistance 400 Ω or more?	Related lines between DCM and main wiring harness is open, or main wiring harness is open at two places or more.	Go to step **2**.



Step		Check	Yes	No
2	**CHECK RELATED LINES.** Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(i270) No. 17 — (B40) No. 6:*** ***(i270) No. 7 — (B40) No. 14:***	Is the resistance 10 Ω or more?	Repair or replace the open circuit of telematics system related lines.	The communication harness is normal. Check DTC of the telematics. <Ref. to ES(diag)-43, Diagnostic Code(s) Display.>

21.RELATED LINES 53 — 61 Ω (RAB)



WIRING DIAGRAM:

CAN communication system <Ref. to WI-113, WIRING DIAGRAM, CAN Communication System.>

LAN10591

Step		Check	Yes	No
1	**CHECK BETWEEN RELATED LINES AND MAIN WIRING HARNESS.** 1) Disconnect the RAB CM connector. 2) Using the tester, measure the resistance between terminals. ***Connector & terminal (R361) No. 4 — No. 16:***	Is the resistance 400 Ω or more?	Related lines between RAB CM and main wiring harness is open, or main wiring harness is open at two places or more.	Go to step **2**.

Step		Check	Yes	No
2	**CHECK RELATED LINES.** Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(R361) No. 4 — (B40) No. 14:*** ***(R361) No. 16 — (B40) No. 6:***	Is the resistance 10 Ω or more?	Repair or replace the open circuit of RAB related lines.	The communication harness is normal. Check DTC of RAB. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>

10.List of Diagnostic Trouble Code (DTC)

A: LIST

DTC	Item	Note
U0073	CONTROL MODULE COMMUNICATION BUS OFF	<Ref. to LAN(diag)-115, DTC U0073 CONTROL MODULE COMMUNICATION BUS OFF, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

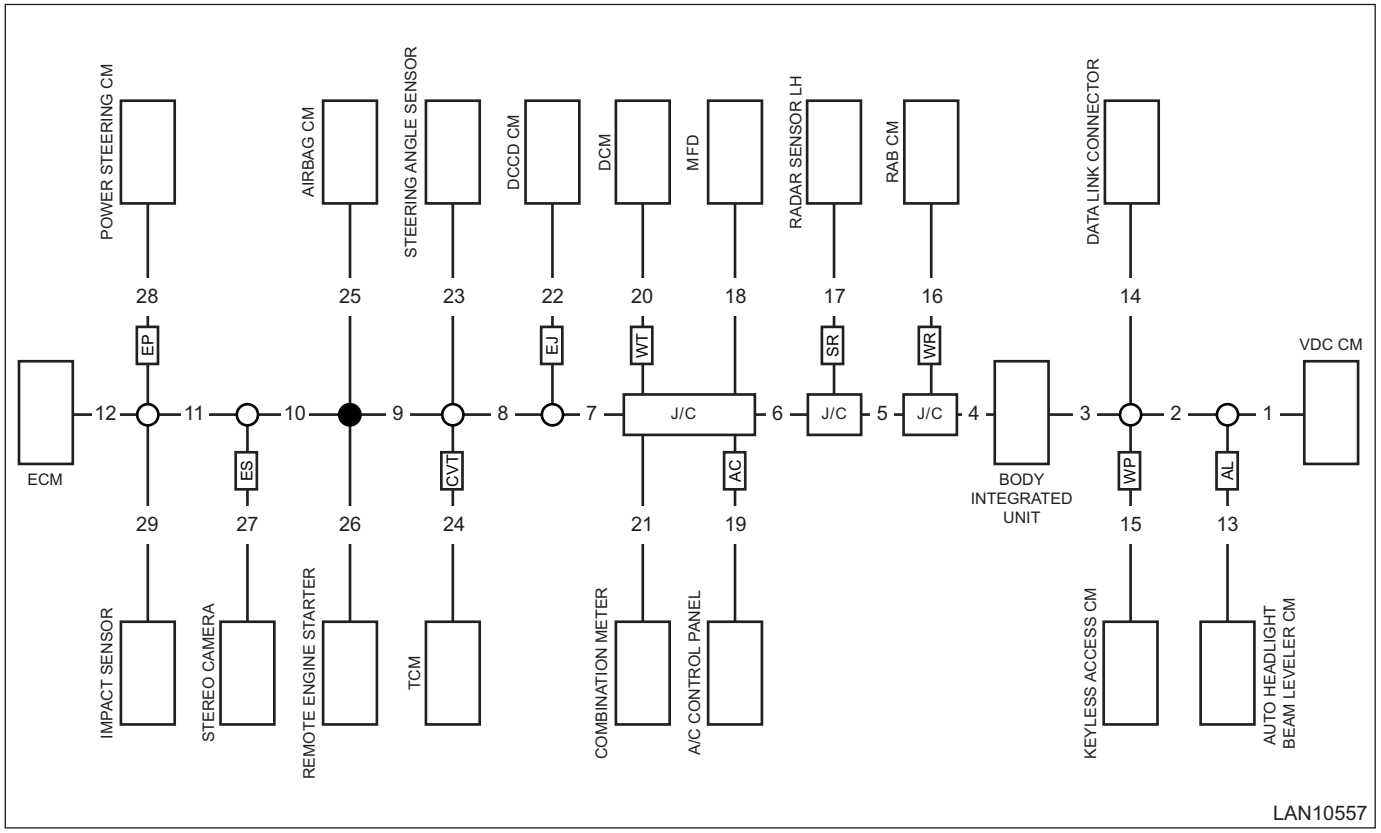
LAN10587



(A) Installation check
(B) Bus off detection
(C) Data no-receive detection
(D) Data abnormal detection

VDC: VDC CM
AHL: Auto headlight beam leveler CM
KPS: Keyless access CM
BIU: Body integrated unit
RAB: RAB CM
RAD: Radar sensor
MFD: High grade MFD
A/C: A/C control panel
DCM: Data communication module
MET: Combination meter
DCCD: Driver's control center differential CM
TCM: Transmission CM
A/B: Airbag CM
CAM: Stereo camera
EPS: Power steering CM
ECM: Engine CM

Step		Check	Yes	No
1	**MODULE INSTALLATION CHECK.** 1) Using the check sheet for communication for initializing, check the vehicle installation module (module targeted for CAN communication). 2) Write "-" marks in the field for installation check (A) if the vehicle to be inspected does not have relevant module. 3) Write "-" marks in all blank fields on the same row that the "-" mark has filled in.	Was the module installation check on the left performed?	Go to step **2**.	Perform the module installation check, Go to step **2**.

	Step	Check	Yes	No
2	**CHECK DTC (BUS OFF DETECTION / DATA NOT RECEIVED).** Check the DTC. NOTE: It becomes impossible for CAN diagnostic module to read DTC, if there is a current malfunction of open harness (data not received). If this occurs, perform the “Check using the check sheet of communication for initializing” <Ref. to LAN(diag)-14, CHECK USING THE CHECK SHEET OF COMMUNICATION FOR INITIALIZING, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, Subaru Select Monitor.>, and use this check sheet to confirm that the corresponding part becomes the past malfunction.	Is DTC bus off or data not received?	Perform the diagnosis for the displayed DTCs.	Perform the communication check, Go to step **3**.
3	**CHECK DTC (BUS OFF DETECTION / DATA NOT RECEIVED).** Mark “X” in the field corresponding to the DTCs that has been detected by each module in the DTC check sheet.	Were all the corresponding field in the DTC check sheet filled?	Go to step **4**.	Fill all the corresponding field in the DTC check sheet, Go to step **4**.
4	**CHECK CAN COMMUNICATION LINE.** Check the CAN communication line by referring to the example of DTC data not received.	Is CAN communication line faulty?	Repair or replace the faulty portion of the harness.	Perform the diagnosis for the displayed DTCs.

2. EXAMPLE OF DTC DATA NOT RECEIVED

AL: With auto headlight beam leveler system
WP: With keyless access with push button start system
WR: With Reverse Automatic Braking
SR: With BSD/RCTA
AC: With automatic air conditioner
WT: With telematics
EJ: Engine type EJ model
CVT: CVT model
ES: With EyeSight
WE: With electric power steering

11.Diagnostic Procedure with Diagnostic Trouble Code (DTC)

A: DTC U0073 CONTROL MODULE COMMUNICATION BUS OFF

DTC DETECTING CONDITION:
Integrated unit communication is shut down because of high speed CAN error.
TROUBLE SYMPTOM:
CAN communication is not normal.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (CURRENT MALFUNCTION).** 1) Start the engine. 2) Using the Subaru Select Monitor, read DTC of CAN system.	Is U0073 a current malfunction?	Go to step **3**.	It may be a temporary poor contact. Perform the clear memory.
3	**CHECK CAN COMMUNICATION CIRCUIT.** Check CAN communication circuit. <Ref. to LAN(diag)-38, PROCEDURE, CAN Communication Circuit Check.>	Is CAN communication circuit faulty?	Repair the faulty portion, following the diagnosis procedure.	Go to step **4**.
4	**CHECK DTC.** 1) Perform the inspection using the DTC check sheet. <Ref. to LAN(diag)-111, CHECK USING THE DTC CHECK SHEET, LIST, List of Diagnostic Trouble Code (DTC).> 2) Using the Subaru Select Monitor, read DTC of CAN system.	Is U0073 a current malfunction?	Go to step **5**.	System is normal.
5	**CHECK CONTROL MODULE.** 1) Turn the ignition switch to OFF. 2) Disconnect the control modules other than body integrated unit in order. NOTE: When disconnecting ECM or VDC CM, connect resistance of 120 Ω between CAN Hi and CAN Lo as an alternative of end resistance. 3) Turn the ignition switch to ON. 4) Using the Subaru Select Monitor, read DTC of CAN system.	Is there any control module that U0073 is not detected as current malfunction?	Replace the control module.	Repeat 1) to 4) in step 3 until U0073 is not detected.

B: DTC U0100 LOST COMMUNICATION WITH ECM/PCM "A"

DTC DETECTING CONDITION:
No data is received from ECM.
TROUBLE SYMPTOM:
Cooperation control of transmission may not operate properly.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0100 a current malfunction?	Go to step **4**.	Go to step **6**.
4	**CHECK DTC (CURRENT MALFUNCTION).** 1) Check CAN communication circuit. <Ref. to LAN(diag)-38, CAN Communication Circuit Check.> 2) Read the DTC using Subaru Select Monitor.	Is U0100 a current malfunction?	Go to step **5**.	Go to step **6**.
5	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the engine data no-receive detected in several modules?	Replace the ECM. <Ref. to FU(w/o STI)-124, Engine Control Module (ECM).> <Ref. to FU(STI)-56, Engine Control Module (ECM).>	Replace the module that the DTC has been detected.
6	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0100 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **7**.
7	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

C: DTC U0101 LOST COMMUNICATION WITH TCM

DTC DETECTING CONDITION:
No data is received from TCM.
TROUBLE SYMPTOM:
Cooperation control with transmission is not performed.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0101 a current malfunction?	Go to step **4**.	Go to step **6**.
4	**CHECK DTC (CURRENT MALFUNCTION).** 1) Check CAN communication circuit. <Ref. to LAN(diag)-38, CAN Communication Circuit Check.> 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0101 a current malfunction?	Go to step **5**.	Go to step **6**.
5	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the transmission data no-receive detected in several modules?	Replace the TCM. <Ref. to CVT(TR690)-126, Transmission Control Module (TCM).>	Replace the module that the DTC has been detected.
6	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0101 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **7**.
7	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

D: DTC U0122 LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE

DTC DETECTING CONDITION:
No data from VDCCM is received.
TROUBLE SYMPTOM:
ABS warning light and VDC warning light illuminate.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0122 a current malfunction?	Go to step **4**.	Go to step **6**.
4	**CHECK DTC (CURRENT MALFUNCTION).** 1) Check CAN communication circuit. <Ref. to LAN(diag)-38, CAN Communication Circuit Check.> 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0122 a current malfunction?	Go to step **5**.	Go to step **6**.
5	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the VDC data no-receive detected in several modules?	Replace the VDC CM. <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>	Replace the module that the DTC has been detected.
6	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0122 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **7**.
7	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

E: DTC U0126 LOST COMMUNICATION WITH STEERING ANGLE SENSOR MODULE

DTC DETECTING CONDITION:
No data is received from steering angle sensor.
TROUBLE SYMPTOM:
VDC CM does not operate normally.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0126 a current malfunction?	Go to step **4**.	Go to step **6**.
4	**CHECK DTC (CURRENT MALFUNCTION).** 1) Check CAN communication circuit. <Ref. to LAN(diag)-38, CAN Communication Circuit Check.> 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0126 a current malfunction?	Go to step **5**.	Go to step **6**.
5	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the steering angle sensor data no-receive detected in several modules?	Replace the steering angle sensor. <Ref. to VDC-28, Steering Angle Sensor.>	Replace the module that the DTC has been detected.
6	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0126 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **7**.
7	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

F: DTC U0128 LOST COMMUNICATION WITH PARK BRAKE CONTROL MODULE

DTC DETECTING CONDITION:
No data from VDCCM is received.
TROUBLE SYMPTOM:
ABS warning light and VDC warning light illuminate.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0128 a current malfunction?	Go to step **4**.	Go to step **6**.
4	**CHECK DTC (CURRENT MALFUNCTION).** 1) Check CAN communication circuit. <Ref. to LAN(diag)-38, CAN Communication Circuit Check.> 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0128 a current malfunction?	Go to step **5**.	Go to step **6**.
5	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the electronic parking data no-receive detected in several modules?	Replace the VDC CM. <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>	Replace the module that the DTC has been detected.
6	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0128 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **7**.
7	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

G: DTC U0131 LOST COMMUNICATION WITH POWER STEERING CONTROL MODULE

DTC DETECTING CONDITION:
No data is received from power steering CM.
TROUBLE SYMPTOM:
Cooperation control with power steering CM does not operate properly.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0131 a current malfunction?	Go to step **4**.	Go to step **6**.
4	**CHECK DTC (CURRENT MALFUNCTION).** 1) Check CAN communication circuit. <Ref. to LAN(diag)-38, CAN Communication Circuit Check.> 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0131 a current malfunction?	Go to step **5**.	Go to step **6**.
5	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the electric power steering data no-receive detected in several modules?	Replace the power steering CM. <Ref. to PS-100, Power Steering Control Module.>	Replace the module that the DTC has been detected.
6	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0131 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **7**.
7	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

H: DTC U0140 LOST COMMUNICATION WITH BODY CONTROL MODULE

DTC DETECTING CONDITION:
No data is received from body integrated unit.
TROUBLE SYMPTOM:
Cooperation control with body integrated unit does not operate properly.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0140 a current malfunction?	Go to step **4**.	Go to step **6**.
4	**CHECK DTC (CURRENT MALFUNCTION).** 1) Check CAN communication circuit. <Ref. to LAN(diag)-38, CAN Communication Circuit Check.> 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0140 a current malfunction?	Go to step **5**.	Go to step **6**.
5	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the body integrated data no-receive detected in several modules?	Replace the body integrated unit. <Ref. to SL-81, Body Integrated Unit.>	Replace the module that the DTC has been detected.
6	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0140 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **7**.
7	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

I: DTC U0151 LOST COMMUNICATION WITH RESTRAINTS CONTROL MODULE

DTC DETECTING CONDITION:
No data is received from airbag CM.
TROUBLE SYMPTOM:
Cooperation control with airbag CM does not operate properly.

CAUTION:
When checking the airbag system, refer to the cautions regarding the airbag system prior to the inspection. <Ref. to AB-9, CAUTION, General Description.>

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0151 a current malfunction?	Go to step **4**.	Go to step **6**.
4	**CHECK DTC (CURRENT MALFUNCTION).** 1) Check CAN communication circuit. <Ref. to LAN(diag)-38, CAN Communication Circuit Check.> 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0151 a current malfunction?	Go to step **5**.	Go to step **6**.
5	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the airbag data no-receive detected in several modules?	Replace the airbag CM. <Ref. to AB-47, Airbag Control Module.>	Replace the module that the DTC has been detected.
6	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0151 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **7**.
7	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

J: DTC U0155 LOST COMMUNICATION WITH INSTRUMENT PANEL CLUSTER (IPC) CONTROL MODULE

DTC DETECTING CONDITION:
No data is received from combination meter.
TROUBLE SYMPTOM:
Display of combination meter does not operate properly.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0155 a current malfunction?	Go to step **4**.	Go to step **6**.
4	**CHECK DTC (CURRENT MALFUNCTION).** 1) Check CAN communication circuit. <Ref. to LAN(diag)-38, CAN Communication Circuit Check.> 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0155 a current malfunction?	Go to step **5**.	Go to step **6**.
5	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the meter data no-receive detected in several modules?	Replace the meter. <Ref. to IDI-13, Combination Meter.>	Replace the module that the DTC has been detected.
6	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0155 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **7**.
7	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

K: DTC U0156 LOST COMMUNICATION WITH INFORMATION CENTER "A"

DTC DETECTING CONDITION:
No data is received from MFD.
TROUBLE SYMPTOM:
Display of MFD does not operate properly.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0156 a current malfunction?	Go to step **4**.	Go to step **6**.
4	**CHECK DTC (CURRENT MALFUNCTION).** 1) Check CAN communication circuit. <Ref. to LAN(diag)-38, CAN Communication Circuit Check.> 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0156 a current malfunction?	Go to step **5**.	Go to step **6**.
5	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the MFD data no-receive detected in several modules?	Replace the MFD. <Ref. to IDI-13, Combination Meter.>	Replace the module that the DTC has been detected.
6	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0156 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **7**.
7	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

L: DTC U0164 LOST COMMUNICATION WITH HVAC CONTROL MODULE

DTC DETECTING CONDITION:
No data is received from A/C control panel.
TROUBLE SYMPTOM:
Cooperation control of air conditioner does not operate properly.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0164 a current malfunction?	Go to step **4**.	Go to step **6**.
4	**CHECK DTC (CURRENT MALFUNCTION).** 1) Check CAN communication circuit. <Ref. to LAN(diag)-38, CAN Communication Circuit Check.> 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0164 a current malfunction?	Go to step **5**.	Go to step **6**.
5	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the air conditioner data no-receive detected in several modules?	Replace the A/C control panel. <Ref. to AC-43, Control Panel.>	Replace the module that the DTC has been detected.
6	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0164 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **7**.
7	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

M: DTC U0181 LOST COMMUNICATION WITH HEADLAMP LEVELING CONTROL MODULE

DTC DETECTING CONDITION:
No data is received from auto headlight beam leveler CM.
TROUBLE SYMPTOM:
Coordination control of auto headlight beam leveler CM does not operate normally.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0181 a current malfunction?	Go to step **4**.	Go to step **6**.
4	**CHECK DTC (CURRENT MALFUNCTION).** 1) Check CAN communication circuit. <Ref. to LAN(diag)-38, CAN Communication Circuit Check.> 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0181 a current malfunction?	Go to step **5**.	Go to step **6**.
5	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the air conditioner data no-receive detected in several modules?	Replace the auto headlight beam leveler CM. <Ref. to LI-74, Auto Headlight Beam Leveler Control Module.>	Replace the module that the DTC has been detected.
6	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0181 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **7**.
7	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

N: DTC U0327 SOFTWARE INCOMPATIBILITY WITH VEHICLE SECURITY CONTROL MODULE

DTC DETECTING CONDITION:
No data is received from keyless access CM.
TROUBLE SYMPTOM:
Cooperation control of keyless access does not operate properly.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0327 a current malfunction?	Go to step **4**.	Go to step **6**.
4	**CHECK DTC (CURRENT MALFUNCTION).** 1) Check CAN communication circuit. <Ref. to LAN(diag)-38, CAN Communication Circuit Check.> 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0327 a current malfunction?	Go to step **5**.	Go to step **6**.
5	**CHECK DTC (CURRENT MALFUNCTION).** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the smart data no-receive detected in several modules?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Replace the module that the DTC has been detected.
6	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0327 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **7**.
7	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

O: DTC U0401 INVALID DATA RECEIVED FROM ECM/PCM "A"

DTC DETECTING CONDITION:
Defective data from ECM.
TROUBLE SYMPTOM:
Defective data on CAN communication occurs.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (U-CODE).** Check the displayed DTC.	Is DTC for the bus off or the data no-receive displayed?	Perform the diagnosis for DTCs for the displayed bus off or the data no-receive.	Go to step **4**.
4	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0401 a current malfunction?	Go to step **5**.	Go to step **7**.
5	**CHECK DTC (CURRENT MALFUNCTION).** 1) Turn the ignition switch to OFF. 2) Disconnect the ECM connector. 3) Connect the disconnected connectors. 4) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0401 a current malfunction?	Go to step **6**.	Go to step **7**.
6	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the engine data abnormal detected in several modules?	Replace the ECM. <Ref. to FU(w/o STI)-124, Engine Control Module (ECM).> <Ref. to FU(STI)-56, Engine Control Module (ECM).>	Replace the module that the DTC has been detected.
7	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Using the Subaru Select Monitor, read DTC of CAN system. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0401 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **8**.
8	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

P: DTC U0402 INVALID DATA RECEIVED FROM TCM

DTC DETECTING CONDITION:
Received error data from TCM.
TROUBLE SYMPTOM:
Sport indicator light blinks.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (U-CODE).** Check the displayed DTC.	Is DTC for the bus off or the data no-receive displayed?	Perform the diagnosis for DTCs for the displayed bus off or the data no-receive.	Go to step **4**.
4	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0402 a current malfunction?	Go to step **5**.	Go to step **7**.
5	**CHECK DTC (CURRENT MALFUNCTION).** 1) Turn the ignition switch to OFF. 2) Disconnect the TCM connector. 3) Connect the disconnected connectors. 4) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0402 a current malfunction?	Go to step **6**.	Go to step **7**.
6	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the transmission data abnormal detected in several modules?	Replace the TCM. <Ref. to CVT(TR690)-126, Transmission Control Module (TCM).>	Replace the module that the DTC has been detected.
7	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Using the Subaru Select Monitor, read DTC of CAN system. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0402 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **8**.
8	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

Q: DTC U0416 INVALID DATA RECEIVED FROM VEHICLE DYNAMICS CONTROL MODULE

DTC DETECTING CONDITION:
Data from VDCCM is faulty.
TROUBLE SYMPTOM:
ABS warning light and VDC warning light illuminate.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (U-CODE).** Check the displayed DTC.	Is DTC for the bus off or the data no-receive displayed?	Perform the diagnosis for DTCs for the displayed bus off or the data no-receive.	Go to step **4**.
4	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0416 a current malfunction?	Go to step **5**.	Go to step **7**.
5	**CHECK DTC (CURRENT MALFUNCTION).** 1) Turn the ignition switch to OFF. 2) Disconnect the VDC CM connector. 3) Connect the disconnected connectors. 4) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0416 a current malfunction?	Go to step **6**.	Go to step **7**.
6	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the VDC data abnormal detected in several modules?	Replace the VDC CM. <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>	Replace the module that the DTC has been detected.
7	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Using the Subaru Select Monitor, read DTC of CAN system. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0416 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **8**.
8	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

R: DTC U0417 INVALID DATA RECEIVED FROM PARK BRAKE CONTROL MODULE

DTC DETECTING CONDITION:
Data from VDCCM is faulty.
TROUBLE SYMPTOM:
ABS warning light and VDC warning light illuminate.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (U-CODE).** Check the displayed DTC.	Is DTC for the bus off or the data no-receive displayed?	Perform the diagnosis for DTCs for the displayed bus off or the data no-receive.	Go to step **4**.
4	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0417 a current malfunction?	Go to step **5**.	Go to step **7**.
5	**CHECK DTC (CURRENT MALFUNCTION).** 1) Turn the ignition switch to OFF. 2) Disconnect the VDC CM connector. 3) Connect the disconnected connectors. 4) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0417 a current malfunction?	Go to step **6**.	Go to step **7**.
6	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the electronic parking data abnormal detected in several modules?	Replace the VDC CM. <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>	Replace the module that the DTC has been detected.
7	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Using the Subaru Select Monitor, read DTC of CAN system. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0417 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **8**.
8	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

S: DTC U0420 INVALID DATA RECEIVED FROM POWER STEERING CONTROL MODULE

DTC DETECTING CONDITION:
Defective data was transmitted from EPS CM.
TROUBLE SYMPTOM:
Cooperation control with EPS CM does not operate properly.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (U-CODE).** Check the displayed DTC.	Is DTC for the bus off or the data no-receive displayed?	Perform the diagnosis for DTCs for the displayed bus off or the data no-receive.	Go to step **4**.
4	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0420 a current malfunction?	Go to step **5**.	Go to step **7**.
5	**CHECK DTC (CURRENT MALFUNCTION).** 1) Turn the ignition switch to OFF. 2) Disconnect the power steering CM connector. 3) Connect the disconnected connectors. 4) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0420 a current malfunction?	Go to step **6**.	Go to step **7**.
6	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the electric power steering data abnormal detected in several modules?	Replace the power steering CM. <Ref. to PS-100, Power Steering Control Module.>	Replace the module that the DTC has been detected.
7	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Using the Subaru Select Monitor, read DTC of CAN system. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0420 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **8**.
8	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

T: DTC U0422 INVALID DATA RECEIVED FROM BODY CONTROL MODULE

DTC DETECTING CONDITION:
Defective data was transmitted from body integrated unit.
TROUBLE SYMPTOM:
Cooperation control with body integrated unit does not operate properly.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (U-CODE).** Check the displayed DTC.	Is DTC for the bus off or the data no-receive displayed?	Perform the diagnosis for DTCs for the displayed bus off or the data no-receive.	Go to step **4**.
4	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0422 a current malfunction?	Go to step **5**.	Go to step **7**.
5	**CHECK DTC (CURRENT MALFUNCTION).** 1) Turn the ignition switch to OFF. 2) Disconnect the body integrated unit connector. 3) Connect the disconnected connectors. 4) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0422 a current malfunction?	Go to step **6**.	Go to step **7**.
6	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the body integrated data abnormal detected in several modules?	Replace the body integrated unit. <Ref. to SL-81, Body Integrated Unit.>	Replace the module that the DTC has been detected.
7	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Using the Subaru Select Monitor, read DTC of CAN system. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0422 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **8**.
8	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

U: DTC U0423 INVALID DATA RECEIVED FROM INSTRUMENT PANEL CLUSTER CONTROL MODULE

DTC DETECTING CONDITION:
Defective data was transmitted from combination meter.
TROUBLE SYMPTOM:
Display of combination meter does not operate properly.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (U-CODE).** Check the displayed DTC.	Is DTC for the bus off or the data no-receive displayed?	Perform the diagnosis for DTCs for the displayed bus off or the data no-receive.	Go to step **4**.
4	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0423 a current malfunction?	Go to step **5**.	Go to step **7**.
5	**CHECK DTC (CURRENT MALFUNCTION).** 1) Turn the ignition switch to OFF. 2) Disconnect the combination meter connector. 3) Connect the disconnected connectors. 4) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0423 a current malfunction?	Go to step **6**.	Go to step **7**.
6	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the meter data abnormal detected in several modules?	Replace the combination meter. <Ref. to IDI-13, Combination Meter.>	Replace the module that the DTC has been detected.
7	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Using the Subaru Select Monitor, read DTC of CAN system. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0423 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **8**.
8	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

V: DTC U0424 INVALID DATA RECEIVED FROM HVAC CONTROL MODULE

DTC DETECTING CONDITION:
Defective data was transmitted from A/C control panel.
TROUBLE SYMPTOM:
Cooperation control of air conditioner does not operate properly.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (U-CODE).** Check the displayed DTC.	Is DTC for the bus off or the data no-receive displayed?	Perform the diagnosis for DTCs for the displayed bus off or the data no-receive.	Go to step **4**.
4	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0424 a current malfunction?	Go to step **5**.	Go to step **7**.
5	**CHECK DTC (CURRENT MALFUNCTION).** 1) Turn the ignition switch to OFF. 2) Disconnect the A/C control panel connector. 3) Connect the disconnected connectors. 4) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0424 a current malfunction?	Go to step **6**.	Go to step **7**.
6	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the air conditioner data abnormal detected in several modules?	Replace the A/C control panel. <Ref. to AC-43, Control Panel.>	Replace the module that the DTC has been detected.
7	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0424 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **8**.
8	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

W: DTC U0427 INVALID DATA RECEIVED FROM VEHICLE SECURITY CONTROL MODULE

DTC DETECTING CONDITION:
Defective data was transmitted from keyless access CM.
TROUBLE SYMPTOM:
Cooperation control of keyless access does not operate properly.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (U-CODE).** Check the displayed DTC.	Is DTC for the bus off or the data no-receive displayed?	Perform the diagnosis for DTCs for the displayed bus off or the data no-receive.	Go to step **4**.
4	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0427 a current malfunction?	Go to step **5**.	Go to step **7**.
5	**CHECK DTC (CURRENT MALFUNCTION).** 1) Turn the ignition switch to OFF. 2) Disconnect the keyless access CM connector. 3) Connect the disconnected connectors. 4) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0427 a current malfunction?	Go to step **6**.	Go to step **7**.
6	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the smart data abnormal detected in several modules?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Replace the module that the DTC has been detected.
7	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0427 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **8**.
8	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

X: DTC U0428 INVALID DATA RECEIVED FROM STEERING ANGLE SENSOR MODULE

DTC DETECTING CONDITION:
Defective data was transmitted from steering angle sensor.
TROUBLE SYMPTOM:
VDC CM does not operate normally.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (U-CODE).** Check the displayed DTC.	Is DTC for the bus off or the data no-receive displayed?	Perform the diagnosis for DTCs for the displayed bus off or the data no-receive.	Go to step **4**.
4	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0428 a current malfunction?	Go to step **5**.	Go to step **7**.
5	**CHECK DTC (CURRENT MALFUNCTION).** 1) Turn the ignition switch to OFF. 2) Disconnect the steering angle sensor connector. 3) Connect the disconnected connectors. 4) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0428 a current malfunction?	Go to step **6**.	Go to step **7**.
6	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the steering angle sensor data abnormal detected in several modules?	Replace the steering angle sensor. <Ref. to VDC-28, Steering Angle Sensor.>	Replace the module that the DTC has been detected.
7	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Using the Subaru Select Monitor, read DTC of CAN system. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0428 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **8**.
8	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

Y: DTC U0452 INVALID DATA RECEIVED FROM RESTRAINTS CONTROL MODULE

DTC DETECTING CONDITION:
Invalid data was transmitted from airbag CM.
TROUBLE SYMPTOM:
The airbag does not operate normally.

CAUTION:
When checking the airbag system, refer to the cautions regarding the airbag system prior to the inspection. <Ref. to AB-9, CAUTION, General Description.>

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (U-CODE).** Check the displayed DTC.	Is DTC for the bus off or the data no-receive displayed?	Perform the diagnosis for DTCs for the displayed bus off or the data no-receive.	Go to step **4**.
4	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0452 a current malfunction?	Go to step **5**.	Go to step **7**.
5	**CHECK DTC (CURRENT MALFUNCTION).** 1) Turn the ignition switch to OFF. 2) Disconnect the airbag CM connector. 3) Connect the disconnected connectors. 4) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0452 a current malfunction?	Go to step **6**.	Go to step **7**.
6	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the airbag CM data abnormal detected in several modules?	Replace the airbag CM. <Ref. to AB-47, Airbag Control Module.>	Replace the module that the DTC has been detected.
7	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Using the Subaru Select Monitor, read DTC of CAN system. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0452 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **8**.
8	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

Z: DTC U0457 INVALID DATA RECEIVED FROM INFORMATION CENTER "A"

DTC DETECTING CONDITION:
Defective data was transmitted from MFD.
TROUBLE SYMPTOM:
MFD does not operate normally.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (U-CODE).** Check the displayed DTC.	Is DTC for the bus off or the data no-receive displayed?	Perform the diagnosis for DTCs for the displayed bus off or the data no-receive.	Go to step **4**.
4	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0457 a current malfunction?	Go to step **5**.	Go to step **7**.
5	**CHECK DTC (CURRENT MALFUNCTION).** 1) Turn the ignition switch to OFF. 2) Disconnect the MFD connector. 3) Connect the disconnected connectors. 4) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0457 a current malfunction?	Go to step **6**.	Go to step **7**.
6	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the MFD invalid data detected in several modules?	Replace the MFD. <Ref. to IDI-20, Multi-function Display (MFD).>	Replace the module that the DTC has been detected.
7	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Using the Subaru Select Monitor, read DTC of CAN system. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0457 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **8**.
8	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

AA:DTC U0482 INVALID DATA RECEIVED FROM HEADLAMP LEVELING CONTROL MODULE

DTC DETECTING CONDITION:
Invalid data was transmitted from auto headlight beam leveler CM.
TROUBLE SYMPTOM:
The auto headlight beam leveler does not operate normally.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (U-CODE).** Check the displayed DTC.	Is DTC for the bus off or the data no-receive displayed?	Perform the diagnosis for DTCs for the displayed bus off or the data no-receive.	Go to step **4**.
4	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U0482 a current malfunction?	Go to step **5**.	Go to step **7**.
5	**CHECK DTC (CURRENT MALFUNCTION).** 1) Turn the ignition switch to OFF. 2) Disconnect the auto headlight beam leveler CM connector. 3) Connect the disconnected connectors. 4) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0482 a current malfunction?	Go to step **6**.	Go to step **7**.
6	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the MFD invalid data detected in several modules?	Replace the auto headlight beam leveler CM. <Ref. to LI-74, Auto Headlight Beam Leveler Control Module.>	Replace the module that the DTC has been detected.
7	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Using the Subaru Select Monitor, read DTC of CAN system. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0482 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **8**.
8	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

AB:DTC U1073 CONTROL MODULE COMMUNICATION BUS "SONAR-CAN" OFF

DTC DETECTING CONDITION:
RAB CM communication is shut down because of high speed CAN error.
TROUBLE SYMPTOM:
CAN communication is not normal.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (CURRENT MALFUNCTION).** 1) Start the engine. 2) Using the Subaru Select Monitor, read DTC of CAN system.	Is U1073 a current malfunction?	Go to step **3**.	It may be a temporary poor contact. Perform the clear memory.
3	**CHECK CAN COMMUNICATION CIRCUIT.** Check CAN communication circuit. <Ref. to LAN(diag)-38, PROCEDURE, CAN Communication Circuit Check.>	Is CAN communication circuit faulty?	Repair the faulty portion, following the diagnosis procedure.	Go to step **4**.
4	**CHECK DTC.** 1) Perform the inspection using the DTC check sheet. <Ref. to LAN(diag)-111, CHECK USING THE DTC CHECK SHEET, LIST, List of Diagnostic Trouble Code (DTC).> 2) Using the Subaru Select Monitor, read DTC of CAN system.	Is U1073 a current malfunction?	Go to step **5**.	System is normal.
5	**CHECK CONTROL MODULE.** 1) Turn the ignition switch to OFF. 2) Disconnect the control modules other than body integrated unit in order. NOTE: When disconnecting ECM or VDC CM, connect resistance of 120 Ω between CAN Hi and CAN Lo as an alternative of end resistance. 3) Turn the ignition switch to ON. 4) Using the Subaru Select Monitor, read DTC of CAN system.	Is there any control module that U1073 is not detected as a current malfunction?	Replace the control module.	Repeat 1) to 4) in step 3 until U1073 is not detected.

AC:DTC U1135 LOST COMMUNICATION WITH DCCD CONTROL MODULE

DTC DETECTING CONDITION:
No data is received from DCCD CM.
TROUBLE SYMPTOM:
Cooperation control of DCCD does not operate properly.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U1135 a current malfunction?	Go to step **4**.	Go to step **6**.
4	**CHECK DTC (CURRENT MALFUNCTION).** 1) Check CAN communication circuit. <Ref. to LAN(diag)-38, CAN Communication Circuit Check.> 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U1135 a current malfunction?	Go to step **5**.	Go to step **6**.
5	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the DCCD data reception error detected in several modules?	Replace the DCCD CM. <Ref. to ES-8, Stereo Camera.>	Replace the module that the DTC has been detected.
6	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U1135 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **7**.
7	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

AD:DTC U1201 CAN-HS COUNTER ABNORMAL

DTC DETECTING CONDITION:
Communication is unstable because of high speed CAN communication error.
TROUBLE SYMPTOM:
- Display of combination meter indicates faulty.
- Control faulty may occur due to CAN communication error.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK CAN COMMUNICATION CIRCUIT.** Check CAN communication circuit. <Ref. to LAN(diag)-38, PROCEDURE, CAN Communication Circuit Check.>	Is CAN communication circuit faulty?	Repair the faulty portion, following the diagnosis procedure.	Go to step **3**.
3	**CHECK DTC (BUS OFF).** 1) Start the engine. 2) Using the Subaru Select Monitor, read DTC of CAN system. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U0073 a current malfunction?	Perform the diagnosis of U0073. <Ref. to LAN(diag)-115, DTC U0073 CONTROL MODULE COMMUNICATION BUS OFF, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>	Go to step **4**.
4	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U1201 a current malfunction?	Go to step **5**.	It is possible that temporary poor communication occurs. Perform the clear memory.
5	**CHECK DTC (CURRENT MALFUNCTION).** 1) Turn the ignition switch to ON. 2) Using the Subaru Select Monitor, read DTC of CAN system. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U1201 a current malfunction?	Go to step **6**.	It is possible that temporary poor communication occurs. Perform the clear memory.
6	**CHECK CONTROL MODULE.** 1) Turn the ignition switch to OFF. 2) Disconnect the control modules other than body integrated unit in order. NOTE: When disconnecting ECM or VDC CM, connect resistance of 120 Ω between CAN Hi and CAN Lo as an alternative of end resistance. 3) Turn the ignition switch to ON. 4) Using the Subaru Select Monitor, read DTC of CAN system. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is there any control module that U1201 is not detected as current malfunction?	Replace the control module.	Repeat 1) to 4) in step 5 until U1201 is not detected.

AE:DTC U1232 LOST COMMUNICATION WITH REAR/SIDE RADAR CONTROL MODULE

DTC DETECTING CONDITION:
No data is received from radar sensor.
TROUBLE SYMPTOM:
Cooperation control of radar sensor does not operate properly.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U1232 a current malfunction?	Go to step **4**.	Go to step **6**.
4	**CHECK DTC (CURRENT MALFUNCTION).** 1) Check CAN communication circuit. <Ref. to LAN(diag)-38, CAN Communication Circuit Check.> 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U1232 a current malfunction?	Go to step **5**.	Go to step **6**.
5	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the Subaru Rear Vehicle Detection data no-receive detected in several modules?	Replace the radar sensor LH. <Ref. to RVD-6, Radar Sensor.>	Replace the module that the DTC has been detected.
6	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U1232 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **7**.
7	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

AF:DTC U1233 LOST COMMUNICATION WITH RAB CONTROL MODULE

DTC DETECTING CONDITION:
No data is received from RAB CM.
TROUBLE SYMPTOM:
Coordination control of RAB CM does not operate normally.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U1233 a current malfunction?	Go to step **4**.	Go to step **6**.
4	**CHECK DTC (CURRENT MALFUNCTION).** 1) Check CAN communication circuit. <Ref. to LAN(diag)-38, CAN Communication Circuit Check.> 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U1233 a current malfunction?	Go to step **5**.	Go to step **6**.
5	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the sonar data no-receive detected in several modules?	Replace the RAB CM.	Replace the module that the DTC has been detected.
6	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U1233 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **7**.
7	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

AG:DTC U1235 LOST COMMUNICATION WITH EyeSight

DTC DETECTING CONDITION:
No data from stereo camera is received.
TROUBLE SYMPTOM:
Cooperation control of EyeSight does not operate properly.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U1235 a current malfunction?	Go to step **4**.	Go to step **6**.
4	**CHECK DTC (CURRENT MALFUNCTION).** Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U1235 a current malfunction?	Go to step **5**.	Go to step **6**.
5	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the EyeSight data no-receive detected in several modules?	Replace the stereo camera. <Ref. to ES-8, Stereo Camera.>	Replace the module that the DTC has been detected.
6	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U1235 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **7**.
7	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

AH:DTC U1433 INVALID DATA RECEIVED FROM EyeSight

DTC DETECTING CONDITION:
Defective data was transmitted from stereo camera.
TROUBLE SYMPTOM:
Cooperation control of EyeSight does not operate properly.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (U-CODE).** Check the displayed DTC.	Is DTC for the bus off or the data no-receive displayed?	Perform the diagnosis for DTCs for the displayed bus off or the data no-receive.	Go to step **4**.
4	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U1433 a current malfunction?	Go to step **5**.	Go to step **7**.
5	**CHECK DTC (CURRENT MALFUNCTION).** 1) Turn the ignition switch to OFF. 2) Disconnect the stereo camera connector. 3) Connect the disconnected connectors. 4) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U1433 a current malfunction?	Go to step **6**.	Go to step **7**.
6	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the EyeSight data abnormal detected in several modules?	Replace the stereo camera. <Ref. to ES-8, Stereo Camera.>	Replace the module that the DTC has been detected.
7	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Using the Subaru Select Monitor, read DTC of CAN system. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U1433 a current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **8**.
8	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

AI: DTC U1534 INVALID DATA RECEIVED FROM SONAR ECU

DTC DETECTING CONDITION:
Defective data was transmitted from RAB CM.
TROUBLE SYMPTOM:
Coordination control of RAB CM does not operate normally.

	Step	Check	Yes	No
1	**CHECK CAN COMMUNICATION HARNESS.** Perform the basic diagnostic procedure to check for fault in CAN communication harness. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Was the basic diagnostic procedure performed up to step 7?	Go to step **2**.	Perform the basic diagnostic procedure. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
2	**CHECK DTC (OTHER THAN U-CODE).** Check the displayed DTC.	Are DTCs other than U*** displayed?	Perform the diagnosis for DTCs other than the displayed U-code.	Go to step **3**.
3	**CHECK DTC (U-CODE).** Check the displayed DTC.	Is DTC for the bus off or the data no-receive displayed?	Perform the diagnosis for DTCs for the displayed bus off or the data no-receive.	Go to step **4**.
4	**CHECK DTC (CURRENT MALFUNCTION).** Check the displayed DTC.	Is U1534 current malfunction?	Go to step **5**.	Go to step **7**.
5	**CHECK DTC (CURRENT MALFUNCTION).** 1) Turn the ignition switch to OFF. 2) Disconnect the RAB CM connector. 3) Connect the disconnected connectors. 4) Read the DTC using Subaru Select Monitor. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U1534 current malfunction?	Go to step **6**.	Go to step **7**.
6	**CHECK DTC.** Using the Subaru Select Monitor, read DTC of all the systems. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is the sonar invalid data detected in several modules?	Replace the RAB CM.	Replace the module that the DTC has been detected.
7	**CHECK HARNESS.** 1) Shake the harness, and check for poor contact. 2) Using the Subaru Select Monitor, read DTC of CAN system. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is U1534 current malfunction?	Repair the poor contact of harness, or replace the harness.	Go to step **8**.
8	**CHECK CONNECTOR.** Check the connector used for high speed CAN for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC.

12.Diagnostics with Phenomenon

A: LIST

Symptoms	Reference
DTC other than U-code is displayed.	<Ref. to LAN(diag)-151, DTC OTHER THAN U-CODE IS DISPLAYED, INSPECTION, Diagnostics with Phenomenon.>
Faster/slower vehicle speed than the actual speed is displayed.	<Ref. to LAN(diag)-151, FASTER/SLOWER VEHICLE SPEED THAN THE ACTUAL SPEED IS DISPLAYED, INSPECTION, Diagnostics with Phenomenon.>
More/less fuel than the actual amount is displayed.	<Ref. to LAN(diag)-152, MORE/LESS FUEL THAN THE ACTUAL AMOUNT IS DISPLAYED, INSPECTION, Diagnostics with Phenomenon.>
Fuel level warning light illuminates despite of sufficient fuel.	<Ref. to LAN(diag)-152, FUEL LEVEL WARNING LIGHT ILLUMINATES DESPITE OF SUFFICIENT FUEL, INSPECTION, Diagnostics with Phenomenon.>
Engine coolant temperature light blinks in red and blue alternately.	<Ref. to LAN(diag)-153, ENGINE COOLANT TEMPERATURE LIGHT BLINKS IN RED AND BLUE ALTERNATELY, INSPECTION, Diagnostics with Phenomenon.>
[S], [I] or [S#] indicator is blinking.	<Ref. to LAN(diag)-153, [S], [I] OR [S#] INDICATOR IS BLINKING, INSPECTION, Diagnostics with Phenomenon.>
The VDC warning light illuminates.	<Ref. to LAN(diag)-154, THE VDC WARNING LIGHT ILLUMINATES, INSPECTION, Diagnostics with Phenomenon.>
VDC-OFF indicator illuminates.	<Ref. to LAN(diag)-154, VDC-OFF INDICATOR ILLUMINATES, INSPECTION, Diagnostics with Phenomenon.>
Brake warning light illuminates.	<Ref. to LAN(diag)-155, BRAKE WARNING LIGHT ILLUMINATES, INSPECTION, Diagnostics with Phenomenon.>
Shift position is not displayed.	<Ref. to LAN(diag)-155, SHIFT POSITION IS NOT DISPLAYED, INSPECTION, Diagnostics with Phenomenon.>
AT oil temperature warning light is blinking.	<Ref. to LAN(diag)-156, AT OIL TEMPERATURE WARNING LIGHT IS BLINKING, INSPECTION, Diagnostics with Phenomenon.>
Door indicator is not displayed.	<Ref. to LAN(diag)-156, DOOR INDICATOR IS NOT DISPLAYED, INSPECTION, Diagnostics with Phenomenon.>
Clearance indicator does not illuminate.	<Ref. to LAN(diag)-157, CLEARANCE INDICATOR DOES NOT ILLUMINATE, INSPECTION, Diagnostics with Phenomenon.>
HI beam indicator does not illuminate.	<Ref. to LAN(diag)-157, HI BEAM INDICATOR DOES NOT ILLUMINATE, INSPECTION, Diagnostics with Phenomenon.>
Front fog light indicator does not illuminate.	<Ref. to LAN(diag)-158, FRONT FOG LIGHT INDICATOR DOES NOT ILLUMINATE, INSPECTION, Diagnostics with Phenomenon.>
Illumination is fixed at the maximum brightness.	<Ref. to LAN(diag)-158, ILLUMINATION IS FIXED AT THE MAXIMUM BRIGHTNESS, INSPECTION, Diagnostics with Phenomenon.>
Cruise control indicator does not illuminate.	<Ref. to LAN(diag)-159, CRUISE CONTROL INDICATOR DOES NOT ILLUMINATE, INSPECTION, Diagnostics with Phenomenon.>
AWD indicator illuminates.	<Ref. to LAN(diag)-159, AWD INDICATOR ILLUMINATES, INSPECTION, Diagnostics with Phenomenon.>
Hill hold indicator does not illuminate.	<Ref. to LAN(diag)-160, HILL HOLD INDICATOR DOES NOT ILLUMINATE, INSPECTION, Diagnostics with Phenomenon.>

B: INSPECTION

1. DTC OTHER THAN U-CODE IS DISPLAYED

	Step	Check	Yes	No
1	**CHECK DTC (CURRENT MALFUNCTION).** 1) Start the engine. 2) Read all DTCs. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is DTC other than U-code displayed.	Perform the diagnosis for DTC other than the U-code.	Perform troubleshooting according to phenomenon of the problem. (If no phenomenon of the problem is present, it is normal currently.)

2. FASTER/SLOWER VEHICLE SPEED THAN THE ACTUAL SPEED IS DISPLAYED

	Step	Check	Yes	No
1	**CHECK THE ACTUAL VEHICLE SPEED.** Check that the vehicle speed indicated in the meter matches with the actual vehicle speed.	Does the vehicle speed match?	Currently, it is normal.	Go to step **2**.
2	**CHECK DTC (CURRENT MALFUNCTION).** Read DTC of combination meter. <Ref. to IDI(diag)-13, Read Diagnostic Trouble Code (DTC).>	Is DTC U0122 LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE displayed?	Perform the diagnosis according to the basic diagnostic procedure in LAN SYSTEM (DIAGNOSTICS). <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Go to step **3**.
3	**CHECK SPEEDOMETER.** Connect the Subaru Select Monitor, and perform forced operation of the speedometer with «Active Test» for the combination meter. <Ref. to IDI(diag)-20, System Operation Check Mode.>	Do the indicated vehicle speed on Subaru Select Monitor and the speedometer indication match?	Perform a unit inspection for the vehicle speed sensor.	Replace the combination meter. <Ref. to IDI-13, Combination Meter.>

3. MORE/LESS FUEL THAN THE ACTUAL AMOUNT IS DISPLAYED

	Step	Check	Yes	No
1	**CHECK DTC (CURRENT MALFUNCTION).** Read DTC of combination meter. <Ref. to IDI(diag)-13, Read Diagnostic Trouble Code (DTC).>	Is «DTC B1500 FUEL SENDER OPEN/SHORT-CIRCUIT DETECTION» displayed?	Perform the diagnosis for the displayed DTCs.	Go to step **2**.
2	**CHECK DTC (CURRENT MALFUNCTION).** 1) Start the engine. 2) Read all DTCs. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is DTC U**** displayed?	Perform the diagnosis according to the basic diagnostic procedure in LAN SYSTEM (DIAGNOSTICS). <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Go to step **3**.
3	**CHECK FUEL GAUGE.** Connect the Subaru Select Monitor, and perform forced operation of the fuel gauge with «Active Test» for the combination meter. <Ref. to IDI(diag)-20, System Operation Check Mode.>	Do the indicated amount on Subaru Select Monitor and the fuel gauge indication match?	Perform a unit inspection for the fuel sub level sensor and the fuel level sensor. <Ref. to FU(STI)-89, Fuel Sub Level Sensor.> <Ref. to FU(STI)-88, Fuel Level Sensor.>	Replace the combination meter. <Ref. to IDI-13, Combination Meter.>

4. FUEL LEVEL WARNING LIGHT ILLUMINATES DESPITE OF SUFFICIENT FUEL

	Step	Check	Yes	No
1	**CHECK DTC (CURRENT MALFUNCTION).** Read DTC of combination meter. <Ref. to IDI(diag)-13, Read Diagnostic Trouble Code (DTC).>	Is «DTC B1500 FUEL SENDER OPEN/SHORT-CIRCUIT DETECTION» displayed?	Perform the diagnosis for the displayed DTCs.	Go to step **2**.
2	**CHECK DTC (CURRENT MALFUNCTION).** 1) Start the engine. 2) Read all DTCs. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is DTC U**** displayed?	Perform the diagnosis according to the basic diagnostic procedure in LAN SYSTEM (DIAGNOSTICS). <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Go to step **3**.
3	**CHECK FUEL LEVEL WARNING LIGHT.** Connect the Subaru Select Monitor, and perform forced operation of the fuel level warning light with «Active Test» for the combination meter. <Ref. to IDI(diag)-20, System Operation Check Mode.>	Do the indicated amount on Subaru Select Monitor and the fuel level warning light indication match?	Perform a unit inspection for the fuel sub level sensor and the fuel level sensor. <Ref. to FU(STI)-89, Fuel Sub Level Sensor.> <Ref. to FU(STI)-88, Fuel Level Sensor.>	Replace the combination meter. <Ref. to IDI-13, Combination Meter.>

5. ENGINE COOLANT TEMPERATURE LIGHT BLINKS IN RED AND BLUE ALTERNATELY

	Step	Check	Yes	No
1	**CHECK DTC (CURRENT MALFUNCTION).** Read DTC of engine. <Ref. to EN(STI)(diag)-47, Read Diagnostic Trouble Code (DTC).> <Ref. to EN(w/o STI)(diag)-63, Read Diagnostic Trouble Code (DTC).>	Is any of «DTC P0116 ENGINE COOLANT TEMPERATURE SENSOR 1 CIRCUIT RANGE/PERFORMANCE»«DTC P0117 ENGINE COOLANT TEMPERATURE SENSOR 1 CIRCUIT LOW»«DTC P0118 ENGINE COOLANT TEMPERATURE SENSOR 1 CIRCUIT HIGH» displayed?	Perform the diagnosis for the displayed DTCs.	Go to step **2**.
2	**CHECK DTC (CURRENT MALFUNCTION).** 1) Start the engine. 2) Read all DTCs. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is DTC U**** displayed?	Perform the diagnosis according to the basic diagnostic procedure in LAN SYSTEM (DIAGNOSTICS). <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Go to step **3**.
3	**CHECK THE ENGINE COOLANT TEMPERATURE LIGHT.** Connect the Subaru Select Monitor, and perform forced operation of the engine coolant temperature light with «Active Test» for the combination meter. <Ref. to IDI(diag)-20, System Operation Check Mode.>	Do the indicated amount on Subaru Select Monitor and the engine coolant temperature light indication match?	Perform a unit inspection of the engine coolant temperature sensor. <Ref. to FU(STI)-33, Engine Coolant Temperature Sensor.>	Replace the combination meter. <Ref. to IDI-13, Combination Meter.>

6. [S], [I] OR [S#] INDICATOR IS BLINKING

	Step	Check	Yes	No
1	**CHECK DTC (CURRENT MALFUNCTION).** Read DTC of engine and combination meter. <Ref. to EN(STI)(diag)-47, Read Diagnostic Trouble Code (DTC).> <Ref. to EN(w/o STI)(diag)-63, Read Diagnostic Trouble Code (DTC).> <Ref. to IDI(diag)-13, Read Diagnostic Trouble Code (DTC).>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs.	Go to step **2**.
2	**CHECK DTC (CURRENT MALFUNCTION).** 1) Start the engine. 2) Read all DTCs. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is DTC U**** displayed?	Perform the diagnosis according to the basic diagnostic procedure in LAN SYSTEM (DIAGNOSTICS). <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Go to step **3**.
3	**CHECK THE ENGINE COOLANT TEMPERATURE LIGHT.** Connect the Subaru Select Monitor, and perform forced operation of the SI-DRIVE indication with «Active Test» for the combination meter. <Ref. to IDI(diag)-20, System Operation Check Mode.>	Do the indicated amount on Subaru Select Monitor and the SI-DRIVE indication match?	Check the engine. <Ref. to EN(w/o STI)(diag)-2, Basic Diagnostic Procedure.>	Replace the combination meter. <Ref. to IDI-13, Combination Meter.>

7. THE VDC WARNING LIGHT ILLUMINATES

	Step	Check	Yes	No
1	**CHECK DTC (CURRENT MALFUNCTION).** Read DTC of the VDC. <Ref. to VDC(diag)-28, Read Diagnostic Trouble Code (DTC).>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs.	Go to step **2**.
2	**CHECK DTC (CURRENT MALFUNCTION).** 1) Start the engine. 2) Read all DTCs. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is DTC U**** displayed?	Perform the diagnosis according to the basic diagnostic procedure in LAN SYSTEM (DIAGNOSTICS). <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Go to step **3**.
3	**CHECK VDC WARNING LIGHT.** Connect the Subaru Select Monitor, and perform forced operation of «VDC operation/failure indicator» with «Active Test» for the combination meter. <Ref. to IDI(diag)-20, System Operation Check Mode.>	Do the indication on Subaru Select Monitor and indication of «VDC operation/failure indicator» match?	Check the VDC warning light. <Ref. to VDC(diag)-31, Warning Light Illumination Pattern.>	Replace the combination meter. <Ref. to IDI-13, Combination Meter.>

8. VDC-OFF INDICATOR ILLUMINATES

	Step	Check	Yes	No
1	**CHECK DTC (CURRENT MALFUNCTION).** Read DTC of the VDC. <Ref. to VDC(diag)-28, Read Diagnostic Trouble Code (DTC).>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs.	Go to step **2**.
2	**CHECK DTC (CURRENT MALFUNCTION).** 1) Start the engine. 2) Read all DTCs. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is DTC U**** displayed?	Perform the diagnosis according to the basic diagnostic procedure in LAN SYSTEM (DIAGNOSTICS). <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Go to step **3**.
3	**CHECK VDC OFF INDICATOR LIGHT.** Connect the Subaru Select Monitor, and perform forced operation of «VDC OFF indicator» with «Active Test» for the combination meter. <Ref. to IDI(diag)-20, System Operation Check Mode.>	Do the indication on Subaru Select Monitor and indication of «VDC OFF indicator» match?	Check the VDC OFF indicator light. <Ref. to VDC(diag)-31, Warning Light Illumination Pattern.>	Replace the combination meter. <Ref. to IDI-13, Combination Meter.>

9. BRAKE WARNING LIGHT ILLUMINATES

	Step	Check	Yes	No
1	**CHECK DTC (CURRENT MALFUNCTION).** Read DTC of the VDC. <Ref. to VDC(diag)-28, Read Diagnostic Trouble Code (DTC).>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs.	Go to step **2**.
2	**CHECK DTC (CURRENT MALFUNCTION).** 1) Start the engine. 2) Read all DTCs. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is DTC U**** displayed?	Perform the diagnosis according to the basic diagnostic procedure in LAN SYSTEM (DIAGNOSTICS). <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Go to step **3**.
3	**CHECK BRAKE WARNING LIGHT.** Connect the Subaru Select Monitor, and perform forced operation of «BRAKE warning» with «Active Test» for the combination meter. <Ref. to IDI(diag)-20, System Operation Check Mode.>	Do the indication on Subaru Select Monitor and indication of «BRAKE warning» match?	Check the brake warning light. <Ref. to VDC(diag)-31, Warning Light Illumination Pattern.>	Replace the combination meter. <Ref. to IDI-13, Combination Meter.>

10.SHIFT POSITION IS NOT DISPLAYED

	Step	Check	Yes	No
1	**CHECK DTC (CURRENT MALFUNCTION).** Read the DTC of the TCM. <Ref. to CVT(diag)-18, Read Diagnostic Trouble Code (DTC).>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs.	Go to step **2**.
2	**CHECK DTC (CURRENT MALFUNCTION).** 1) Start the engine. 2) Read all DTCs. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is DTC U**** displayed?	Perform the diagnosis according to the basic diagnostic procedure in LAN SYSTEM (DIAGNOSTICS). <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Go to step **3**.
3	**CHECK SHIFT INDICATOR.** Connect the Subaru Select Monitor, and perform forced operation of the shift indicator with «Active Test» for the combination meter. <Ref. to IDI(diag)-20, System Operation Check Mode.>	Do the indication on Subaru Select Monitor and the shift indicator indication match?	Check the shift indicator. <Ref. to CVT(diag)-169, Diagnostic Procedure without Diagnostic Trouble Code (DTC).>	Replace the combination meter. <Ref. to IDI-13, Combination Meter.>

11.AT OIL TEMPERATURE WARNING LIGHT IS BLINKING

	Step	Check	Yes	No
1	**CHECK DTC (CURRENT MALFUNCTION).** Read the DTC of the TCM. <Ref. to CVT(diag)-18, Read Diagnostic Trouble Code (DTC).>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs.	Go to step **2**.
2	**CHECK DTC (CURRENT MALFUNCTION).** 1) Start the engine. 2) Read all DTCs. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is DTC U**** displayed?	Perform the diagnosis according to the basic diagnostic procedure in LAN SYSTEM (DIAGNOSTICS). <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Go to step **3**.
3	**CHECK AT OIL TEMP LIGHT.** Connect the Subaru Select Monitor, and perform forced operation of «AT (CVT) oil temperature warning» with «Active Test» for the combination meter. <Ref. to IDI(diag)-20, System Operation Check Mode.>	Do the indication on Subaru Select Monitor and indication of «AT (CVT) oil temperature warning» match?	Go to step **4**.	Replace the combination meter. <Ref. to IDI-13, Combination Meter.>
4	**PERFORM CVT LEARNING.** Connect the Subaru Select Monitor and perform the CVT learning. <Ref. to CVT(diag)-26, Learning Control.>	Does the AT oil temperature warning light go off?	Currently, it is normal.	Check the AT OIL TEMP light. <Ref. to CVT(diag)-28, AT OIL TEMP Warning Light Display.>

12.DOOR INDICATOR IS NOT DISPLAYED

	Step	Check	Yes	No
1	**CHECK DTC (CURRENT MALFUNCTION).** Read the DTC of the body integrated unit. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs.	Go to step **2**.
2	**CHECK DTC (CURRENT MALFUNCTION).** 1) Start the engine. 2) Read all DTCs. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is DTC U**** displayed?	Perform the diagnosis according to the basic diagnostic procedure in LAN SYSTEM (DIAGNOSTICS). <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Go to step **3**.
3	**CHECK DOOR INDICATOR.** Connect the Subaru Select Monitor, and perform forced operation of the door indicator with «Active Test» for the combination meter. <Ref. to IDI(diag)-20, System Operation Check Mode.>	Do the indication on Subaru Select Monitor and the door indicator indication match?	Go to step **4**.	Replace the combination meter. <Ref. to IDI-13, Combination Meter.>
4	**CHECK DATA MONITOR FOR BODY INTEGRATED UNIT.** Connect the Subaru Select Monitor, and display data monitor of the body integrated unit: «Driver's door SW input»«P-door SW input»«Rear right door SW input»«Rear left door SW input». <Ref. to BC(diag)-17, Read Current Data.>	Do the door open/close and data indication match?	Replace the body integrated unit. <Ref. to SL-81, Body Integrated Unit.>	Inspect door switch circuit. <Ref. to SL-17, INSPECTION, Keyless Entry System.>

13.CLEARANCE INDICATOR DOES NOT ILLUMINATE

	Step	Check	Yes	No
1	**CHECK DTC (CURRENT MALFUNCTION).** Read the DTC of the body integrated unit. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs.	Go to step **2**.
2	**CHECK DTC (CURRENT MALFUNCTION).** 1) Start the engine. 2) Read all DTCs. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is DTC U**** displayed?	Perform the diagnosis according to the basic diagnostic procedure in LAN SYSTEM (DIAGNOSTICS). <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Go to step **3**.
3	**CHECK CLEARANCE INDICATOR.** Connect the Subaru Select Monitor, and perform forced operation of «Position light indicator» with «Active Test» for the combination meter. <Ref. to IDI(diag)-20, System Operation Check Mode.>	Do the indication on Subaru Select Monitor and the clearance indicator indication match?	Go to step **4**.	Replace the combination meter. <Ref. to IDI-13, Combination Meter.>
4	**CHECK DATA MONITOR FOR BODY INTEGRATED UNIT.** Connect the Subaru Select Monitor, and display the data monitor of the body integrated unit: «Lighting I Switch Input». <Ref. to BC(diag)-17, Read Current Data.>	Do the switch operation and data indication match?	Replace the body integrated unit. <Ref. to SL-81, Body Integrated Unit.>	Check the clearance light. <Ref. to LI-11, Clearance Light and Illumination Light System.>

14.HI BEAM INDICATOR DOES NOT ILLUMINATE

	Step	Check	Yes	No
1	**CHECK DTC (CURRENT MALFUNCTION).** Read the DTC of the body integrated unit. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs.	Go to step **2**.
2	**CHECK DTC (CURRENT MALFUNCTION).** 1) Start the engine. 2) Read all DTCs. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is DTC U**** displayed?	Perform the diagnosis according to the basic diagnostic procedure in LAN SYSTEM (DIAGNOSTICS). <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Go to step **3**.
3	**CHECK HI BEAM INDICATOR.** Connect the Subaru Select Monitor, and perform forced operation of «High-beam indicator» with «Active Test» for the combination meter. <Ref. to IDI(diag)-20, System Operation Check Mode.>	Do the indication on Subaru Select Monitor and the HI beam indicator indication match?	Go to step **4**.	Replace the combination meter. <Ref. to IDI-13, Combination Meter.>
4	**CHECK DATA MONITOR FOR BODY INTEGRATED UNIT.** Connect the Subaru Select Monitor, and display the data monitor of the body integrated unit: «Dimmer Hi Switch Input». <Ref. to BC(diag)-17, Read Current Data.>	Do the switch operation and data indication match?	Replace the body integrated unit. <Ref. to SL-81, Body Integrated Unit.>	Check the headlight system. <Ref. to LI-6, Headlight System.>

15.FRONT FOG LIGHT INDICATOR DOES NOT ILLUMINATE

	Step	Check	Yes	No
1	**CHECK DTC (CURRENT MALFUNCTION).** Read the DTC of the body integrated unit. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs.	Go to step **2**.
2	**CHECK DTC (CURRENT MALFUNCTION).** 1) Start the engine. 2) Read all DTCs. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is DTC U**** displayed?	Perform the diagnosis according to the basic diagnostic procedure in LAN SYSTEM (DIAGNOSTICS). <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Go to step **3**.
3	**CHECK THE FRONT FOG LIGHT INDICATOR.** Connect the Subaru Select Monitor, and perform forced operation of «Front fog light indicator» with «Active Test» for the combination meter. <Ref. to IDI(diag)-20, System Operation Check Mode.>	Do the indication on Subaru Select Monitor and the front fog light indicator indication match?	Go to step **4**.	Replace the combination meter. <Ref. to IDI-13, Combination Meter.>
4	**CHECK DATA MONITOR FOR BODY INTEGRATED UNIT.** Connect the Subaru Select Monitor, and display the data monitor of the body integrated unit: «Front fog lamp SW input». <Ref. to BC(diag)-17, Read Current Data.>	Do the switch operation and data indication match?	Replace the body integrated unit. <Ref. to SL-81, Body Integrated Unit.>	Check the front fog light system. <Ref. to LI-12, Front Fog Light System.>

16.ILLUMINATION IS FIXED AT THE MAXIMUM BRIGHTNESS

	Step	Check	Yes	No
1	**CHECK DTC (CURRENT MALFUNCTION).** Read DTC of combination meter. <Ref. to IDI(diag)-13, Read Diagnostic Trouble Code (DTC).>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs.	Go to step **2**.
2	**CHECK DTC (CURRENT MALFUNCTION).** 1) Start the engine. 2) Read all DTCs. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is DTC U**** displayed?	Perform the diagnosis according to the basic diagnostic procedure in LAN SYSTEM (DIAGNOSTICS). <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Go to step **3**.
3	**CHECK ILLUMINATION.** Connect the Subaru Select Monitor, and perform forced operation of «Illumination check» with «Active Test» for the combination meter. <Ref. to IDI(diag)-20, System Operation Check Mode.>	Do the indication on Subaru Select Monitor and the indicator indication match?	Check the clearance light & illumination light system. <Ref. to LI-11, Clearance Light and Illumination Light System.>	Replace the combination meter. <Ref. to IDI-13, Combination Meter.>

17.CRUISE CONTROL INDICATOR DOES NOT ILLUMINATE

	Step	Check	Yes	No
1	**CHECK DTC (CURRENT MALFUNCTION).** 1) Start the engine. 2) Read all DTCs. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is DTC U**** displayed?	Perform the diagnosis according to the basic diagnostic procedure in LAN SYSTEM (DIAGNOSTICS). <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Go to step **2**.
2	**CHECK DATA MONITOR OF ENGINE.** Display the data monitor of engine «Main Switch» using Subaru Select Monitor. <Ref. to EN(w/o STI)(diag)-46, DISPLAY CURRENT ENGINE DATA, OPERATION, Subaru Select Monitor.> <Ref. to EN(STI)(diag)-36, DISPLAY CURRENT ENGINE DATA (NORMAL MODE), OPERATION, Subaru Select Monitor.>	Do the switch operation and data indication match?	Replace the combination meter. <Ref. to IDI-13, Combination Meter.>	Check the cruise control command switch. <Ref. to CC-6, Cruise Control Command Switch.>

18.AWD INDICATOR ILLUMINATES

	Step	Check	Yes	No
1	**CHECK MODE.** Connect the Subaru Select Monitor and change to AWD mode. NOTE: When AWD ON/OFF switching mode is not available, go to step 2.	Did the AWD indicator go off?	Currently, it is normal.	Go to step **2**.
2	**CHECK DTC (CURRENT MALFUNCTION).** Read the DTC of the TCM. <Ref. to CVT(diag)-18, Read Diagnostic Trouble Code (DTC).>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs.	Go to step **3**.
3	**CHECK DTC (CURRENT MALFUNCTION).** 1) Start the engine. 2) Read all DTCs. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is DTC U**** displayed?	Perform the diagnosis according to the basic diagnostic procedure in LAN SYSTEM (DIAGNOSTICS). <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Go to step **4**.
4	**CHECK AWD INDICATOR.** Connect the Subaru Select Monitor, and perform forced operation of «AWD warning» with «Active Test» for the combination meter. <Ref. to IDI(diag)-20, System Operation Check Mode.>	Do the indication on Subaru Select Monitor and the AWD indicator indication match?	Check the AWD indicator. <Ref. to CVT(diag)-31, AWD Warning Light Display.> <Ref. to 6MT(diag)-15, AWD Warning Light Display.>	Replace the combination meter. <Ref. to IDI-13, Combination Meter.>

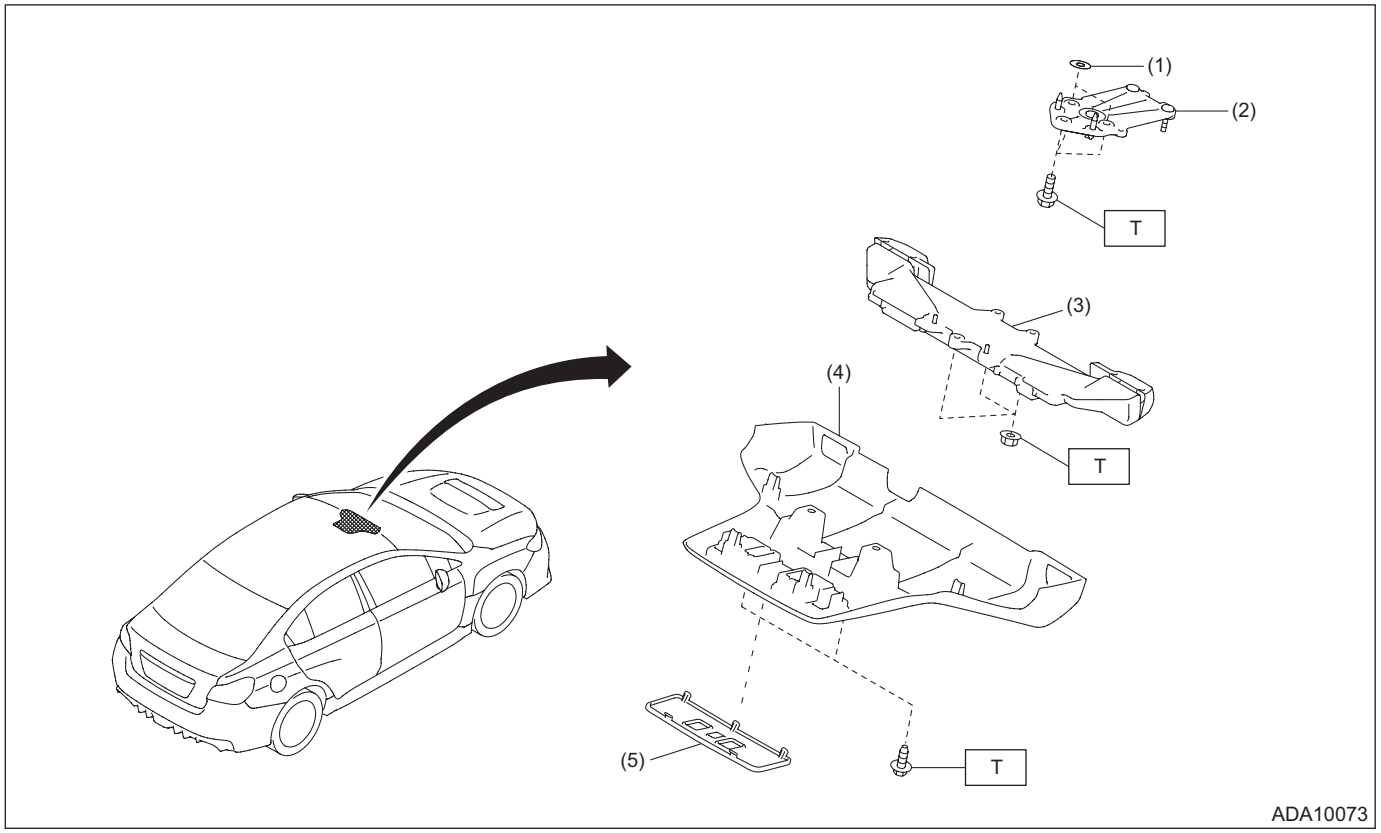
19.HILL HOLD INDICATOR DOES NOT ILLUMINATE

	Step	Check	Yes	No
1	**CHECK DTC (CURRENT MALFUNCTION).** Read DTC of the VDC. <Ref. to VDC(diag)-28, Read Diagnostic Trouble Code (DTC).>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs.	Go to step **2**.
2	**CHECK DTC (CURRENT MALFUNCTION).** 1) Start the engine. 2) Read all DTCs. <Ref. to LAN(diag)-36, Read Diagnostic Trouble Code (DTC).>	Is DTC U**** displayed?	Perform the diagnosis according to the basic diagnostic procedure in LAN SYSTEM (DIAGNOSTICS). <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Check the hill hold indicator light. <Ref. to VDC(diag)-31, Warning Light Illumination Pattern.>

EyeSight

ES

		Page
1.	General Description	2
2.	Relay and Fuse	5
3.	EyeSight System	6
4.	Control Unit	7
5.	Stereo Camera	8
6.	Camera Adjustment, Inspection	13
7.	Switches and Harness	35
8.	Combination Meter	37
9.	Transmission Control Module (TCM)	38
10.	Stop Light & Brake Switch	39
11.	VDC Control Module and Hydraulic Control Unit (VDCCM&H/U)	40
12.	Power Steering Control Module	41
13.	Roll Connector	42
14.	Body Integrated Unit	43
15.	Reverse Automatic Braking CM	44
16.	Diagnostics with Phenomenon	45



1. General Description

A: LOCATION

Refer to “LOCATION” of “EyeSight (DIAGNOSTICS)” section. <Ref. to ES(diag)-15, LOCATION, Electrical Component Location.>

B: COMPONENT

1. STEREO CAMERA

(1) Shim (washer)
(2) Camera plate
(3) Stereo camera
(4) Stereo camera cover ASSY
(5) Cap

Tightening torque: N·m (kgf-m, ft-lb)
T: 5.5±1 (0.56±0.1, 4.1±0.7)

C: CAUTION

• Before disconnecting connectors of sensors or units, be sure to disconnect the ground cable from battery. When replacing the audio and MFD parts provided with memory functions, record the memory contents before disconnecting the battery ground cable.
• Be careful of the following items. Failing to do so may cause the airbag system malfunction.
  – Yellow connectors and harnesses with yellow tapes around them are the connectors and harnesses for the airbag system. When using a tester on these circuits, follow the cautions of “AIRBAG SYSTEM”. <Ref. to AB-9, CAUTION, General Description.>
  – Be careful not to damage the airbag system wiring harness when servicing the electrical parts around the steering column.
• When removing, installing or replacing the VDCCM&H/U, VDCCM&H/U bracket, steering wheel or steering angle sensor (steering roll connector), perform “VSC(VDC) Centering Mode” of the VDC. <Ref. to VDC-17, VDC SENSOR MIDPOINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>
• If the damage is found in the glass repair prohibited area, always replace the glass. <Ref. to ES(diag)-8, WINDSHIELD GLASS AND DASHBOARD, INSPECTION, General Description.>
Damage in the prohibited area can affect the recognition of the stereo camera even if it is repaired, and thereby EyeSight function may not operate properly.
• When the suspension-related components have been removed, installed or replaced, or the wheel alignment is adjusted, perform “Clear Active Lane Keep System Learning Value”. <Ref. to ES(diag)-50, OPERATION, CLEAR ACTIVE LANE KEEP SYSTEM LEARNING VALUE.>

D: PREPARATION TOOL

1. SPECIAL TOOL

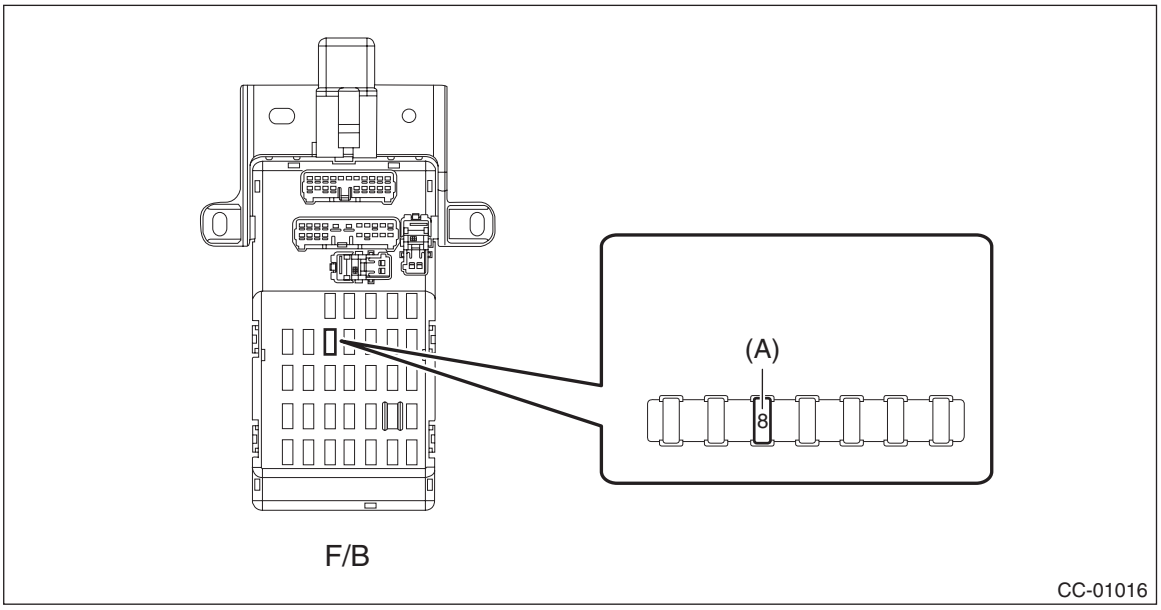


ILLUSTRATION	TOOL NUMBER	DESCRIPTION	REMARKS
 ST87599VA000	87599VA000	RANDOM CHART	Used for adjusting stereo camera.
 STSSM4	—	SUBARU SELECT MONITOR 4	Used for setting of each function and troubleshooting for electrical system. NOTE: For detailed operation procedures of Subaru Select Monitor 4, refer to “Application help”.

2. GENERAL TOOL

TOOL NAME	REMARKS
Circuit tester	Used for measuring resistance, voltage and current.
DST-i	Used together with Subaru Select Monitor 4.
Measure (5 m (16 ft) or more)	Used for adjusting stereo camera.
Leveling line	
Plumb bob	
Packing tape	

2. Relay and Fuse

A: LOCATION

Relay & fuse box	Fuse 7.5 A (stop light and brake switch, brake light relay)	(A)

NOTE:
For other related fuses, refer to the wiring diagram. <Ref. to WI-31, Power Supply Circuit.>

B: INSPECTION

1. CHECK FUSE

1) Remove the fuse and inspect visually.
2) If the fuse is blown out, replace the fuse.

NOTE:
If the fuse is blown again, check the system wiring harness.

3. EyeSight System

A: WIRING DIAGRAM

Refer to “EyeSight System” in the wiring diagram. <Ref. to WI-222, WIRING DIAGRAM, EyeSight System.>

B: INSPECTION

Refer to “Basic Diagnostic Procedure” of “EyeSight (DIAGNOSTICS)” section. <Ref. to ES(diag)-2, Basic Diagnostic Procedure.>

C: NOTE

For procedure of each component in the EyeSight system, refer to the respective section.

- Control module: <Ref. to ES-7, Control Unit.>

NOTE:
System control of the EyeSight is performed by each module. For procedure, refer to the following sections.

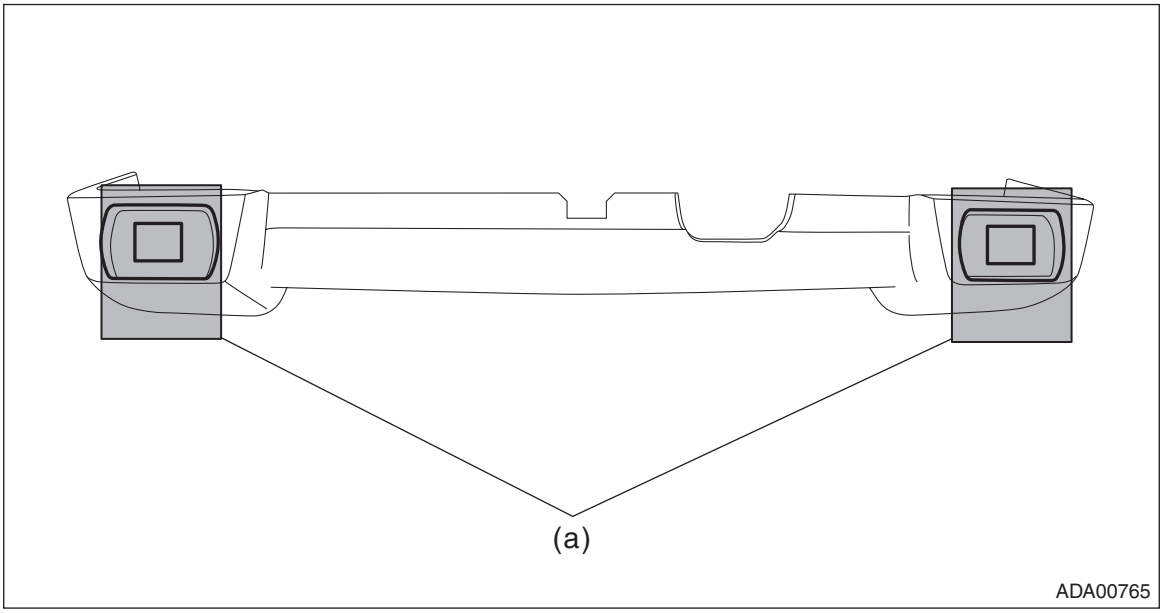
  – Engine control module (ECM): <Ref. to FU(w/o STI)-124, Engine Control Module (ECM).>
  – Transmission control module (TCM): <Ref. to CVT(TR690)-126, Transmission Control Module (TCM).>
  – VDC control module & hydraulic control unit (VDCCM&H/U): <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>
  – Stereo camera: <Ref. to ES-8, Stereo Camera.>
  – Power steering control module: <Ref. to PS-100, Power Steering Control Module.>
  – Body integrated unit: <Ref. to SL-81, Body Integrated Unit.>
  – Reverse Automatic Braking CM: <Ref. to RAB-6, Reverse Automatic Braking CM.>

- Stereo camera: <Ref. to ES-8, Stereo Camera.>
- Combination meter: <Ref. to IDI-13, Combination Meter.>
- Stop light and brake switch: <Ref. to BR-100, Stop Light Switch.>
- Switches and harness: <Ref. to ES-35, Switches and Harness.>
- Roll connector (steering angle sensor): <Ref. to AB-58, Roll Connector.>

4. Control Unit

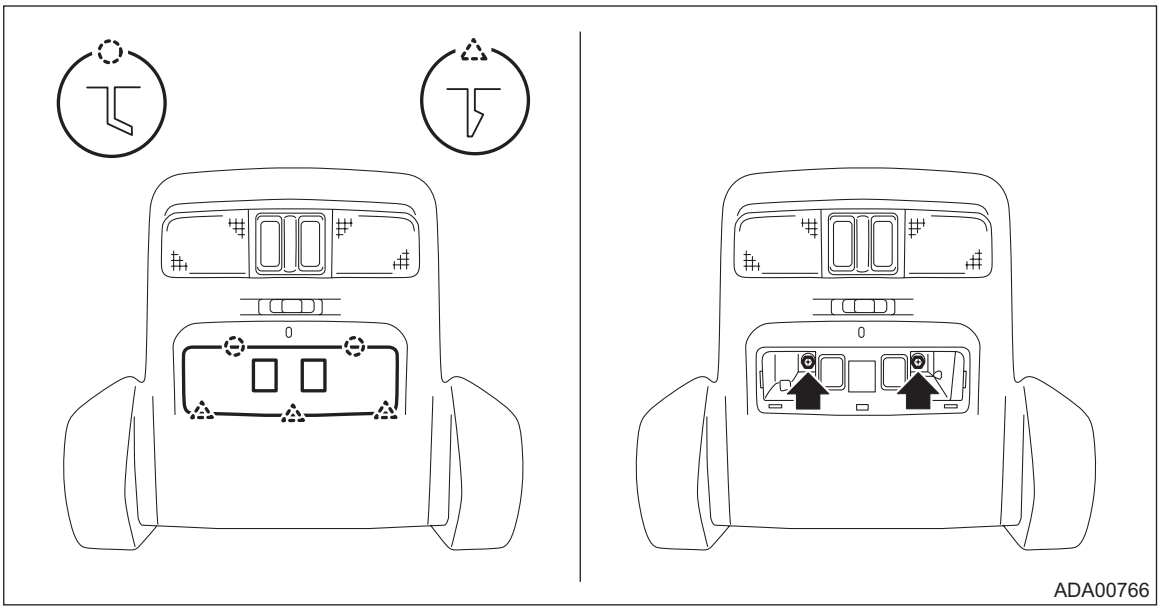
A: NOTE

System control of the EyeSight is performed by each module. For procedure, refer to the following sections.



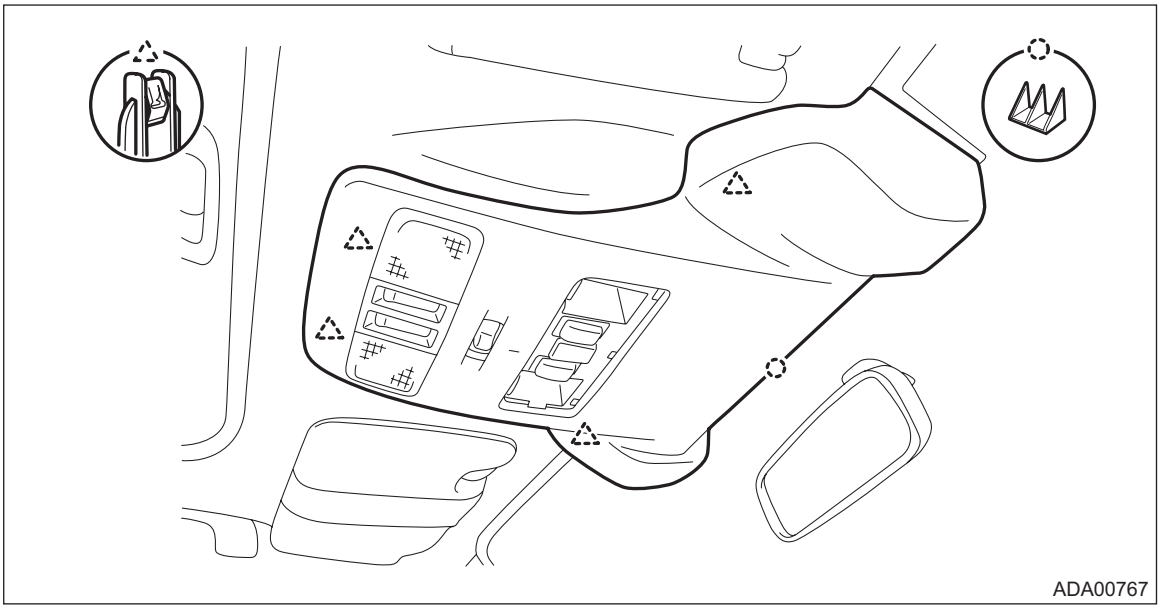
- Engine control module (ECM): <Ref. to FU(w/o STI)-124, Engine Control Module (ECM).>
- Transmission control module (TCM): <Ref. to CVT(TR690)-126, Transmission Control Module (TCM).>
- VDC control module (VDCCM): <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDC-CM&H/U).>
- Stereo camera: <Ref. to ES-8, Stereo Camera.>
- Power steering control module: <Ref. to PS-100, Power Steering Control Module.>
- Body integrated unit: <Ref. to SL-81, Body Integrated Unit.>
- Reverse Automatic Braking CM: <Ref. to RAB-6, Reverse Automatic Braking CM.>

5. Stereo Camera

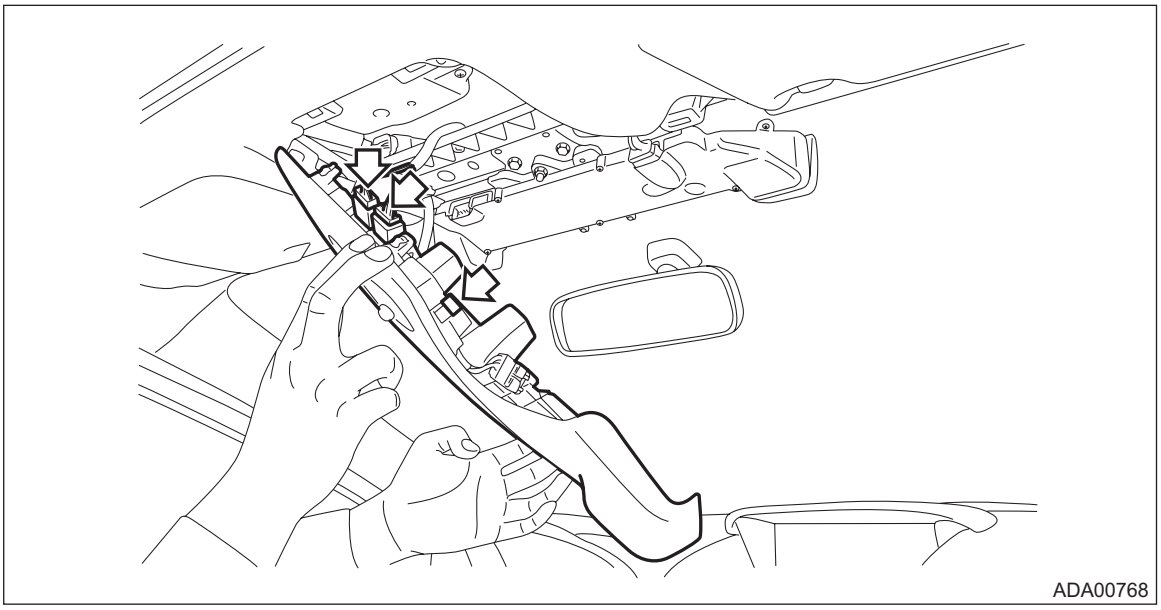


A: REMOVAL

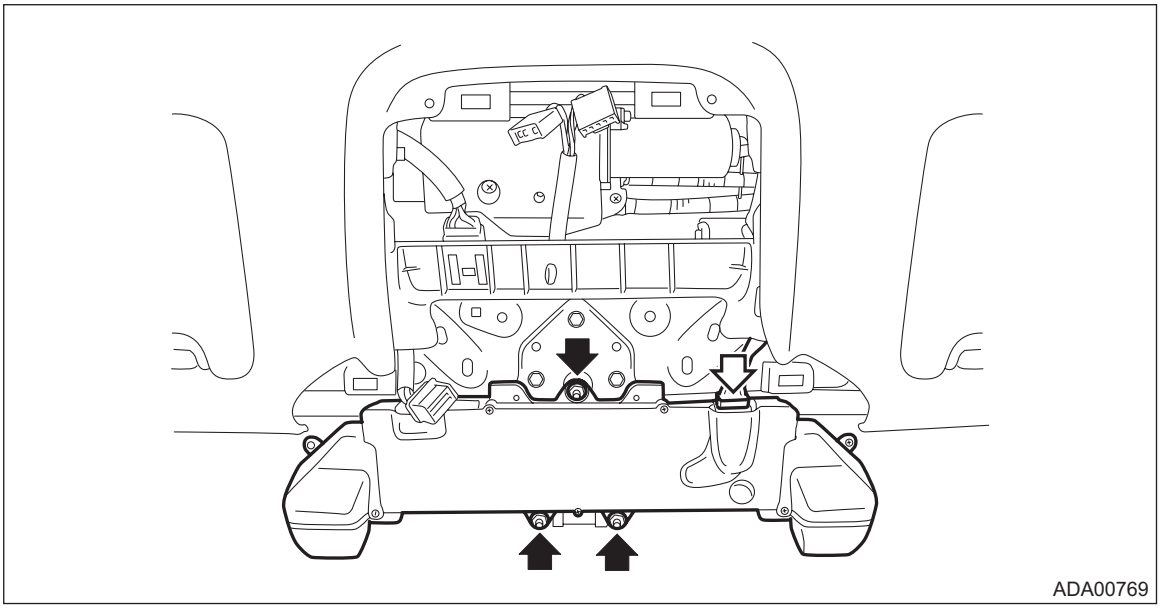
CAUTION:
• When the stereo camera or windshield glass has been replaced, removed or installed, always perform the adjustment and inspection of the camera. (When the stereo camera has been replaced with a new part, the camera remains in a failed state until adjustment and inspection are performed.)
• Since the stereo camera is a precision equipment, install the protective cover before handling it. (New stereo camera is equipped with a protective cover as a service part.)
• During removal, do not hold at the left and right cameras.
• Do not apply any impact to the stereo camera. (Even the slightest shock will deviate the optical axis of the camera, resulting in the loss of normal operation of the camera.)
• Do not disassemble the stereo camera.
• Attach the protective cover to the replacement part, put it into the box in the same way as the other parts and return it.
• Do not touch the lens filter on the stereo camera. If touched, replace the stereo camera.
• When removing the stereo camera cover assembly, cover with dust-free paper such as copy paper to avoid interference with the lens filter section, and attach the paper using tape while being careful not to let the adhesive surface contact the glass surface. Be sure to remove the paper after the procedure.
Also, do not put your hand on the polyurethane section of the windshield contact surface. Doing so may cause the polyurethane section to be removed, which may interfere with the normal operation if it hangs down in front of the lens filter section.
1) Disconnect the ground cable from battery. <Ref. to NT-6, BATTERY, NOTE, Note.>



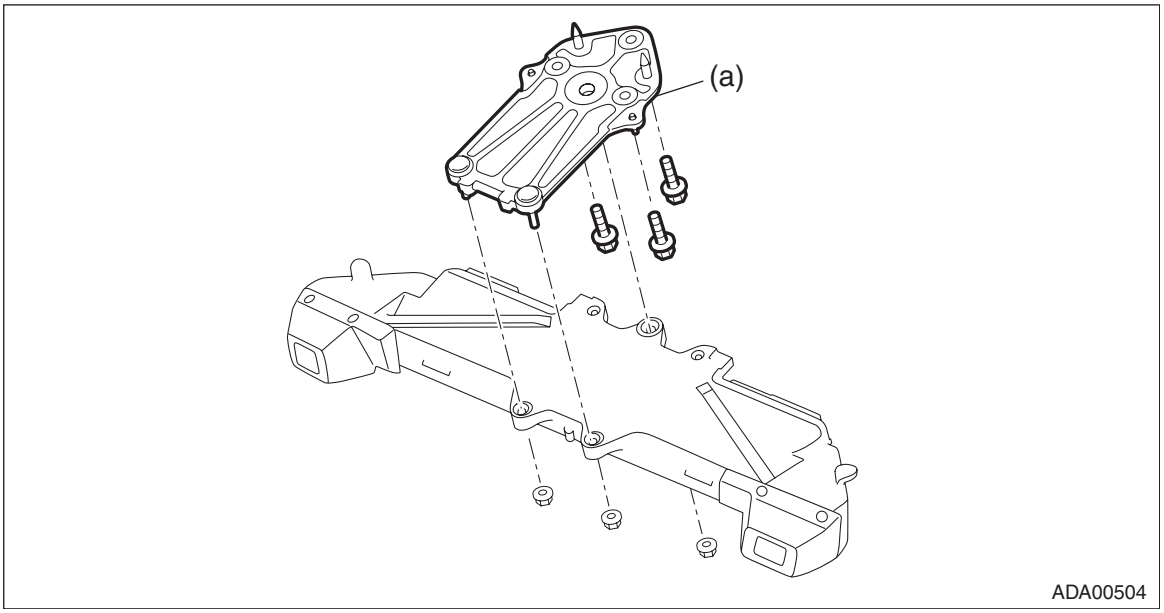
NOTE:
For model with battery sensor, disconnect the ground terminal from battery sensor.
2) Attach dust-free paper (a) such as copy paper to the stereo camera cover assembly.



3) Remove the stereo camera cover assembly.
(1) Disconnect the claws and hooks and remove the cap.
(2) Remove the bolt.



(3) Pull down the rear of the stereo camera cover assembly, and then release the clips.
(4) Release the hook on the front side of stereo camera cover assembly.



(5) Disconnect the connectors, and remove the stereo camera cover assembly.

4) Remove the stereo camera.
(1) Disconnect the connector.
(2) Remove the nuts, and then remove the stereo camera.

NOTE:
Remove the camera plate (a) as required.

B: INSTALLATION

CAUTION:
• Do not remove the protective cover until just before installing the stereo camera cover assembly. Using the bolt and nut, install the stereo camera with the protective cover attached, connect the connectors, and then remove the protective cover.
• Do not apply any impact to the stereo camera. (Even the slightest shock will deviate the optical axis of the camera, resulting in the loss of normal operation of the camera.)
• During installation, do not hold at the left and right cameras.
• Do not change the installation position of the stereo camera or do not modify the surrounding structure.
• Remove the protective cover, install the stereo camera cover assembly, and then perform adjustment and inspection of the stereo camera. <Ref. to ES-13, Camera Adjustment, Inspection.>
• Do not touch the lens filter on the stereo camera. If touched, replace the stereo camera.
• When installing the stereo camera cover assembly, cover with dust-free paper such as copy paper to avoid interference with the lens filter section, and attach the paper using tape while being careful not to let the adhesive surface contact the glass surface. Be sure to remove the paper after the procedure.
Also, do not put your hand on the polyurethane section of the windshield contact surface. Doing so may cause the polyurethane section to be removed, which may interfere with the normal operation if it hangs down in front of the lens filter section.
• When installing the stereo camera cover assembly, take care so that the harness does not interfere with the stereo camera or does not get caught.
• Do not allow the stereo camera cover assembly to come in contact with the stereo camera. Install the stereo camera cover assembly precisely so that it will not block the visibility of the camera.
• Because the stereo camera is incompatible, be sure to check the part number before installation.
1) Attach the camera plate.

Tightening torque:
5.5±1 N·m (0.56±0.1 kgf-m, 4.1±0.7 ft-lb)

NOTE:
Align the positioning pins of camera plate to the positioning holes of front rail.

2) Install the stereo camera.

Tightening torque:
5.5±1 N·m (0.56±0.1 kgf-m, 4.1±0.7 ft-lb)

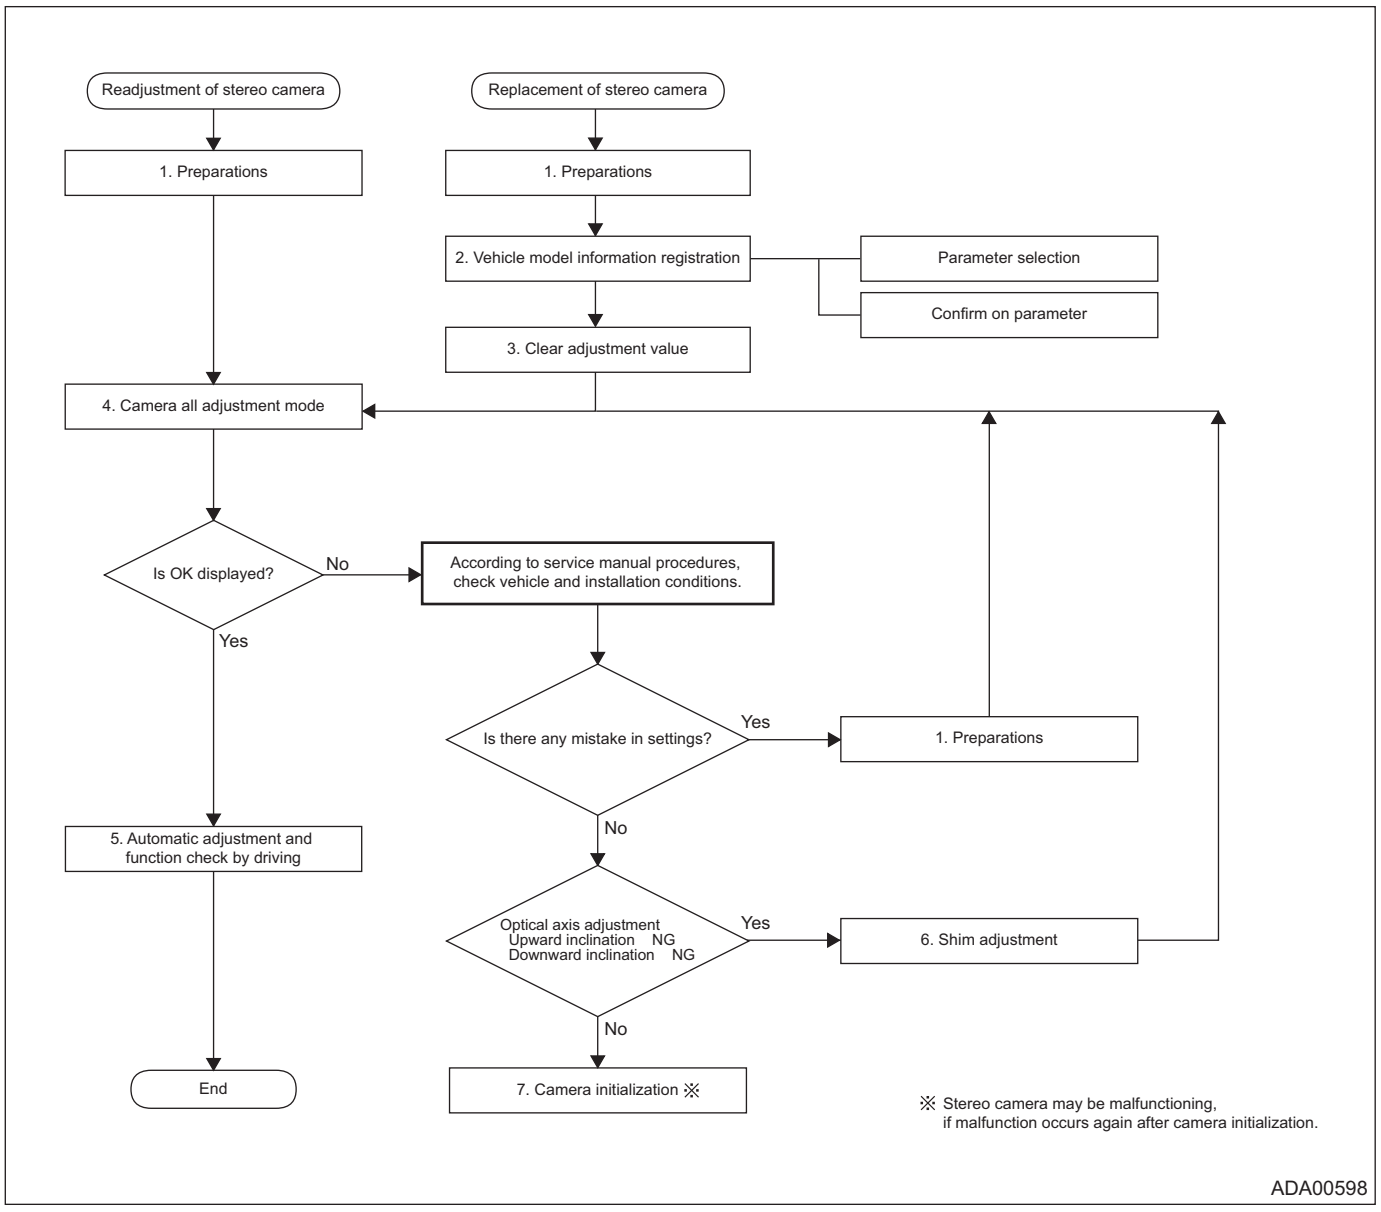
NOTE:
Align the positioning holes of stereo camera to the positioning pins of camera plate.
3) Install the stereo camera cover assembly.

Tightening torque:
5.5±1 N·m (0.56±0.1 kgf-m, 4.1±0.7 ft-lb)
4) Connect the battery ground terminal. <Ref. to NT-6, BATTERY, NOTE, Note.>
5) Perform the adjustment or inspection of the stereo camera. <Ref. to ES-13, Camera Adjustment, Inspection.>

6. Camera Adjustment, Inspection

A: PROCEDURE

CAUTION:
- **Perform the camera adjustment and inspection at curb weight without passengers.**
- **Handle RANDOM CHART (ST) carefully so as not to break it with the adhesive force of the tape.**



Perform inspection or adjustment according to the following procedures.
- Readjustment of stereo camera

Perform the adjustment in the following order: [1. Preparations] → [4. Camera all adjustment mode (replacement/removal)] → [5. Automatic adjustment and function check by driving].
- Replacement of stereo camera

Perform the replacement in the following order: [1. Preparations] → [2. Vehicle Model Information Registration] → [3. Adjustment value clear] → [4. Camera all adjustment mode (replacement/removal)] → [5. Automatic adjustment and function check by driving].

NOTE:
- When the stereo camera or windshield glass has been removed or installed, always perform readjustment of the stereo camera.

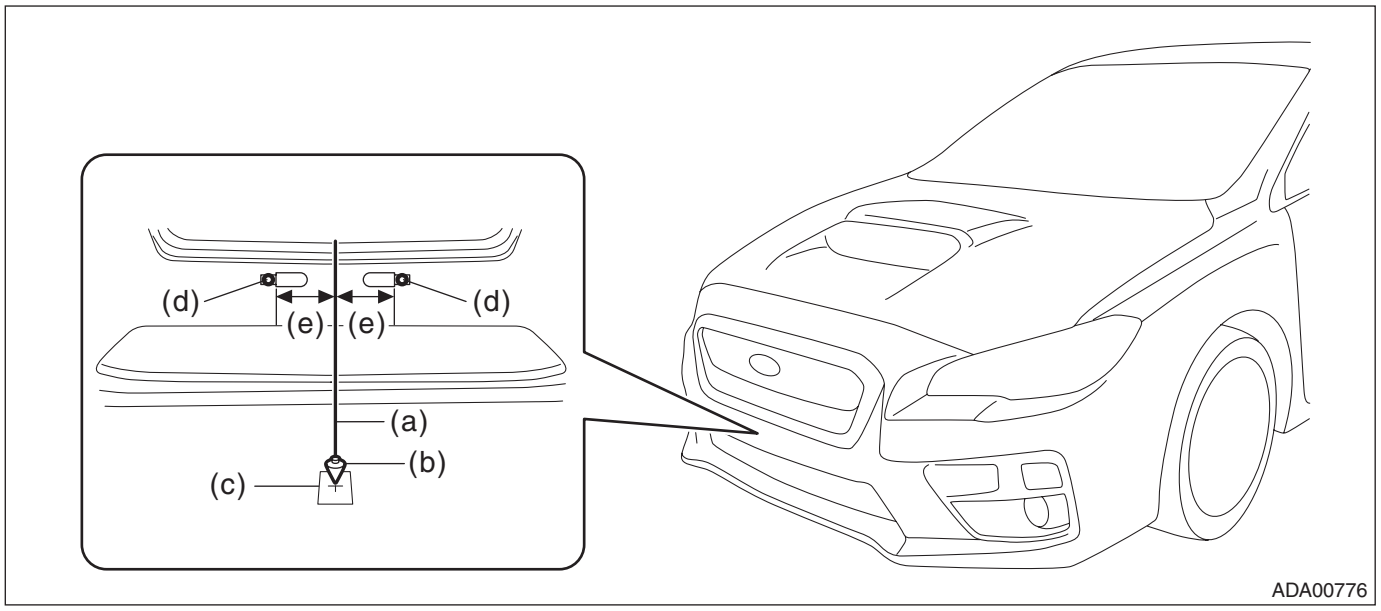
- If aiming is started when the model information is not registered, NG termination will occur because the implementation conditions are not met.

1. PREPARATIONS

Perform the preparation of the adjustment and inspection for the stereo camera.

- **When performing adjustment or inspection by affixing RANDOM CHART onto partition**

1) Before preparation, check the following items.
   (1) The headlight is off.
   (2) The vehicle is parked on a level surface.
   (3) The inflation pressure of tires is correct.
   (4) The vehicle does not have load.
   (5) The front wheels are directed to the straight ahead position, when the steering wheel is set to the center position.

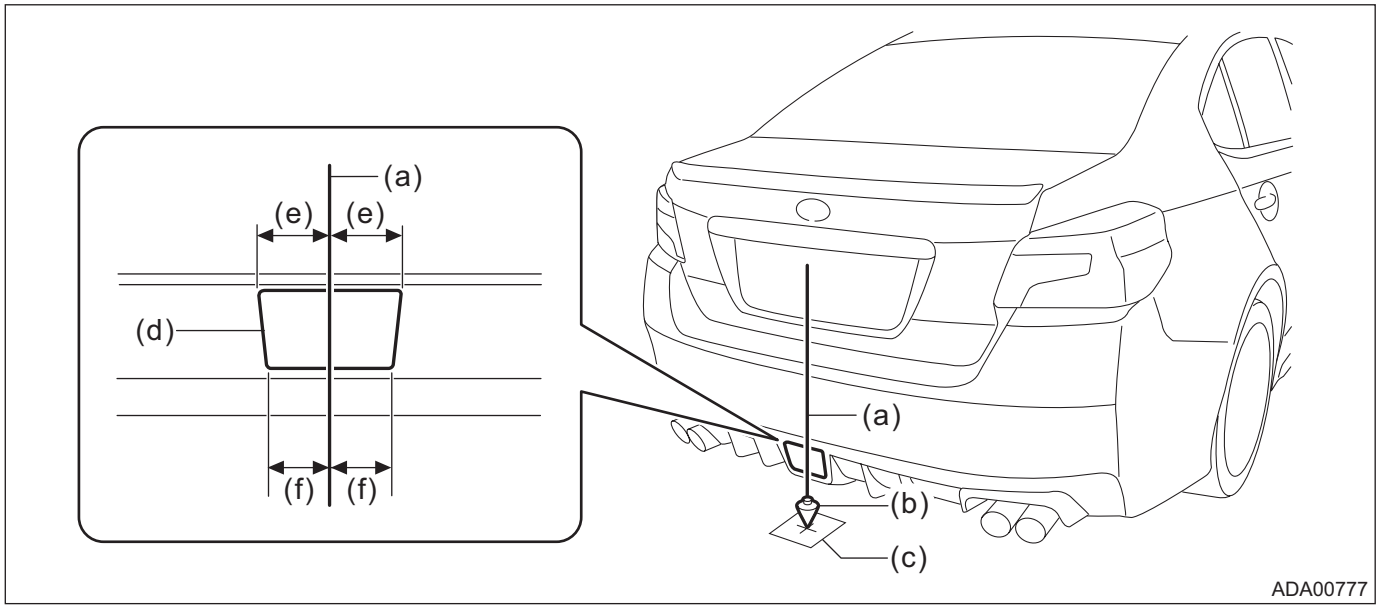


NOTE:
When the front wheels are not directed to the straight ahead position, adjust the alignment. <Ref. to FS-14, ADJUSTMENT, Wheel Alignment.>

2) Prepare the Subaru Select Monitor, measure, plumb bob, leveling line and RANDOM CHART (ST).

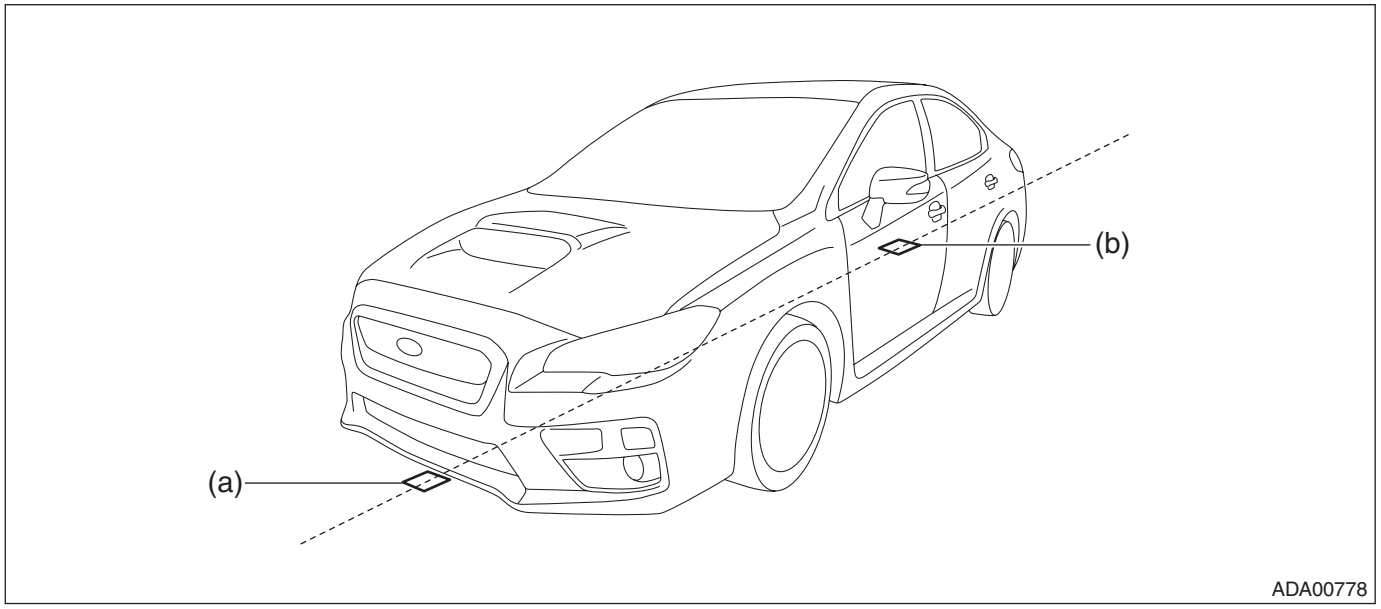
Preparation tool:
ST: RANDOM CHART (87599VA000)

3) Stop the vehicle on a level surface where approximately 5 m (16.41 ft) space can be secured in front of the vehicle.



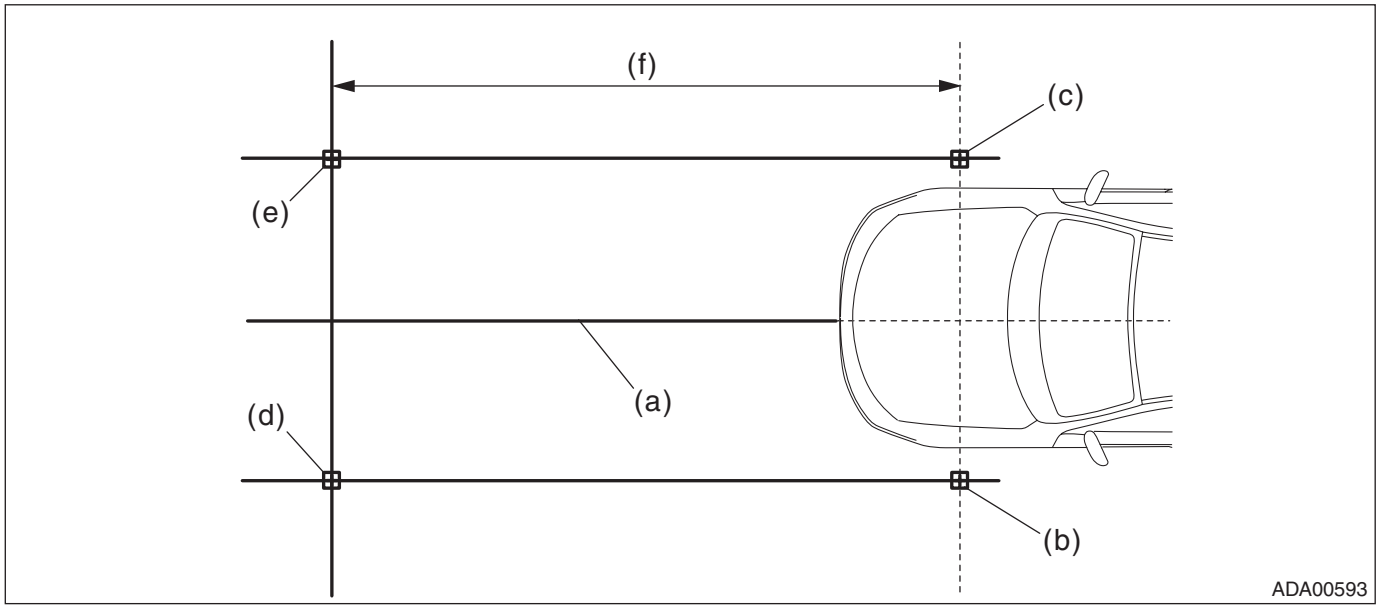
4) Suspend the plumb bob with leveling line from front center position of vehicle (center of the license plate base), and mark the position where the plumb bob touches the ground. (Point A)

(a) Leveling line
(b) Plumb bob
(c) Point A
(d) License plate base
(e) Same distance



NOTE:
Stick the packing tape etc. on the floor, then make a marking on the tape.

5) Suspend the plumb bob with leveling line from rear center position of vehicle (center of the cover - rear bumper B), and mark the position where the plumb bob touches the ground. (Point B)

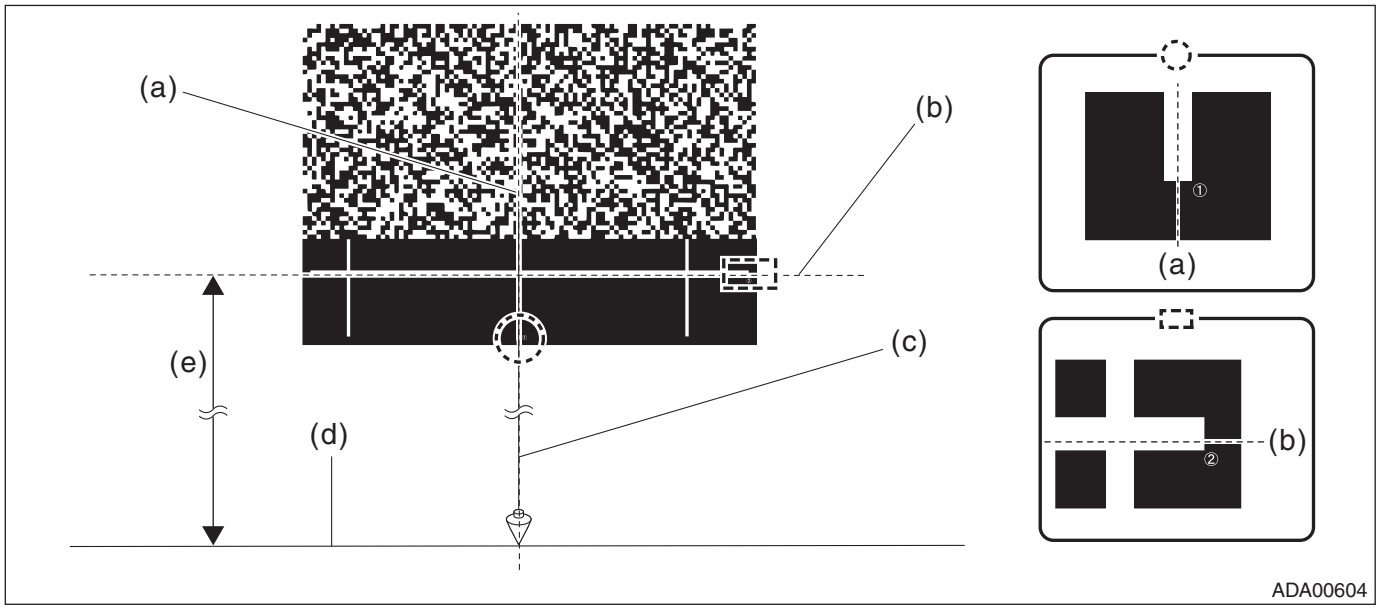


(a) Leveling line
(b) Plumb bob
(c) Point B
(d) Cover - rear bumper B
(e) Same distance
(f) Same distance

NOTE:
Stick the packing tape etc. on the floor, then make a marking on the tape.
6) Strain approximately 5 m (16.41 ft) leveling line from the marking point B through the marking point A toward front of the vehicle, and fix it with packing tape. (A-B line)

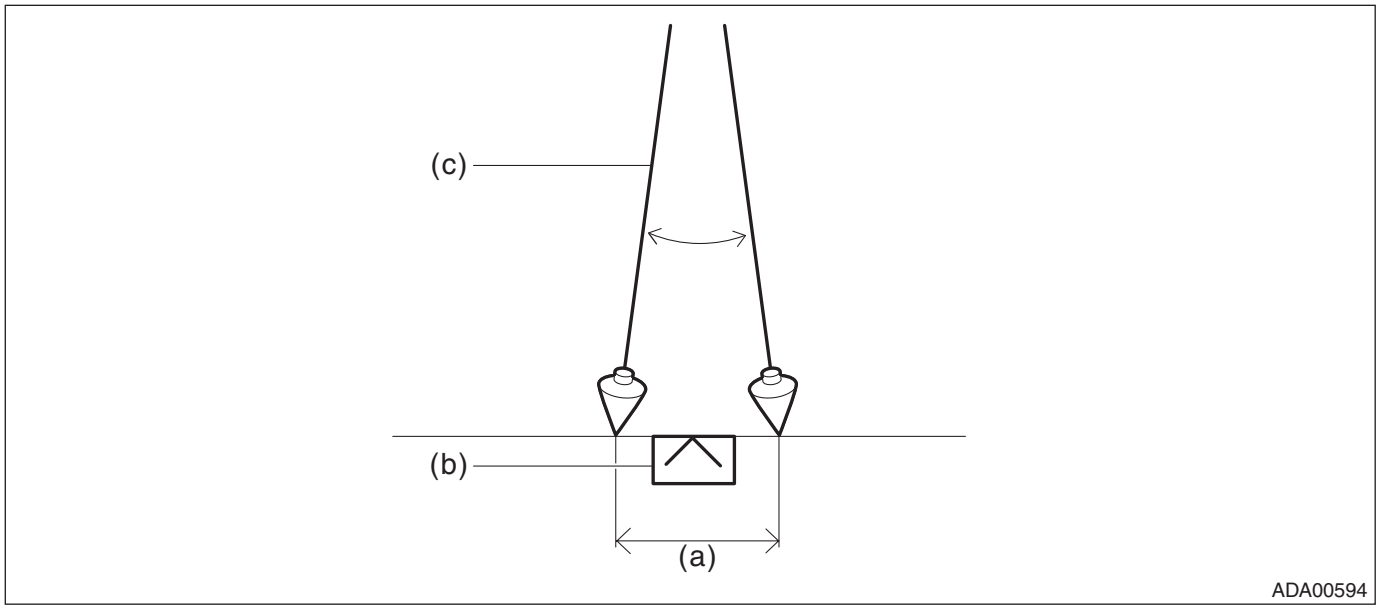
(a) Point A
(b) Point B

NOTE:
Confirm that there is no wet condition or unevenness on the floor, to strain the leveling line correctly.
7) Mark the installation position of the partition.
(1) Suspend the plumb bob from the center of each front wheel, and mark the point C and point D.
(2) Strain the leveling lines from the point C and point D toward the front of vehicle parallel to the vehicle body center line (A-B line), and fix the leveling lines with packing tape.
(3) Make markings at the points 4,000 mm (13 ft, 1 1/2 in) ahead of the vehicle from the point C and point D. (Point E and point F)
(4) Strain the leveling line so that it passes through the point E and point F. (E-F line)



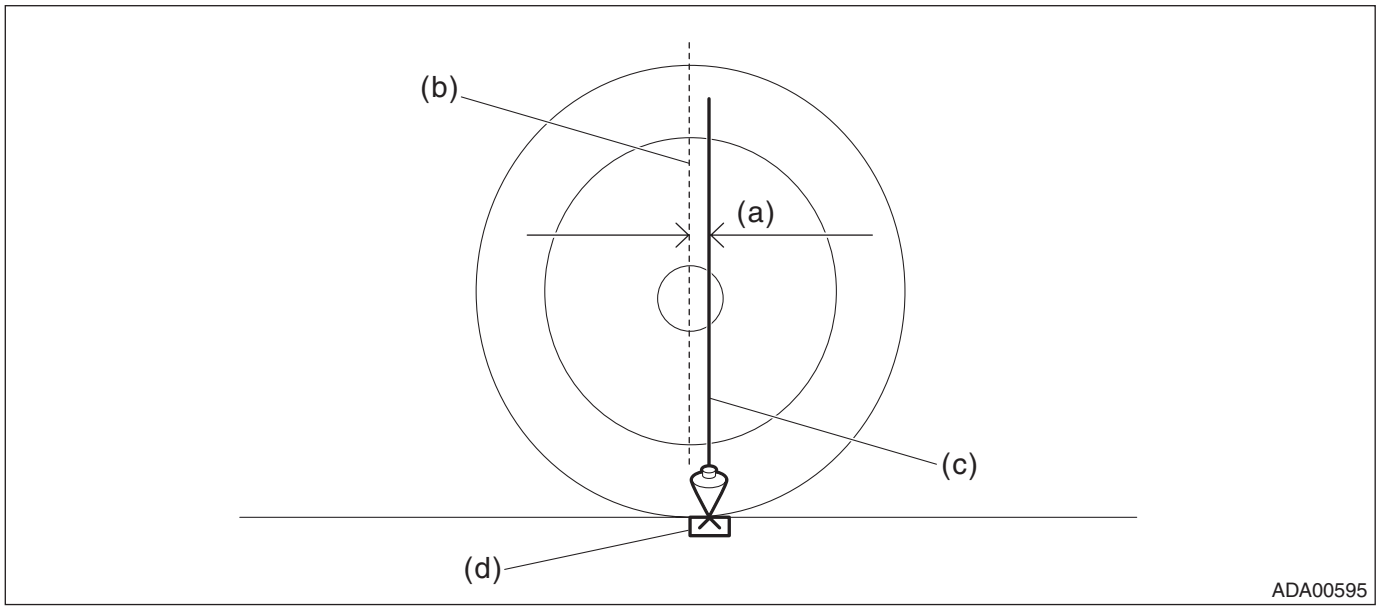
(a) Vehicle body center line (A-B line)
(b) Point C
(c) Point D
(d) Point E
(e) Point F
(f) 4,000 mm (13 ft, 1 1/2 in)

8) Place the partition and RANDOM CHART.



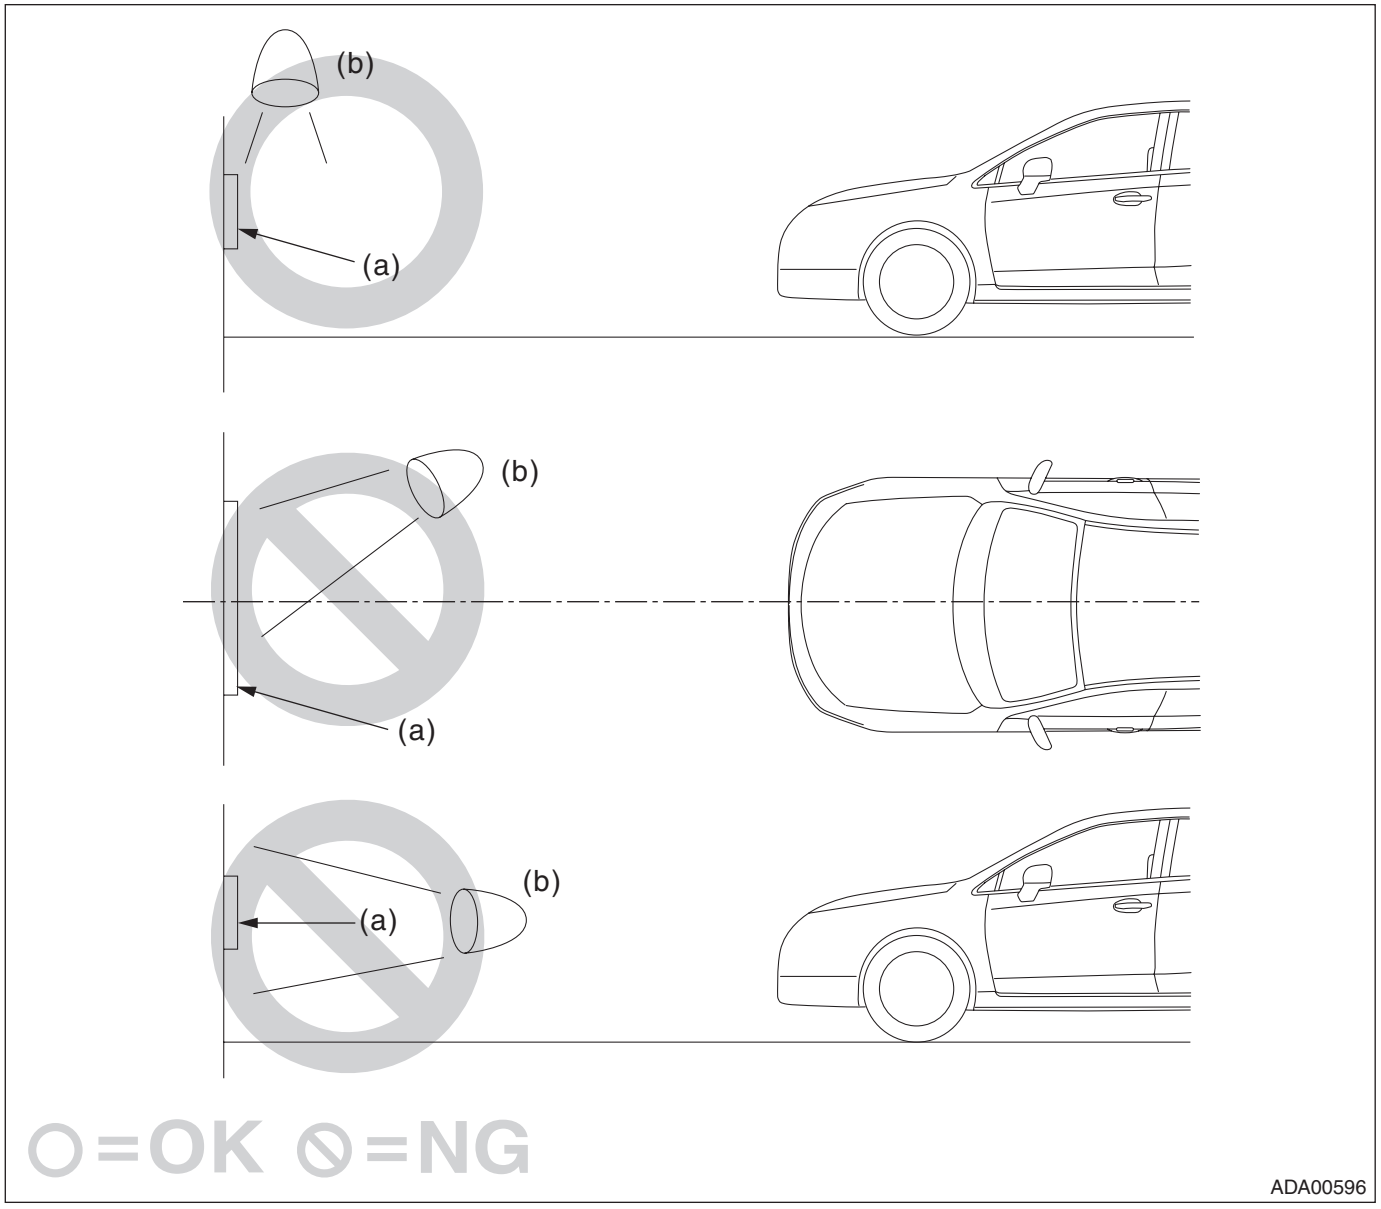
CAUTION:
• Affix the RANDOM CHART onto the vertical partition with flat surface.
• When affixing the RANDOM CHART using tape, place the tape within 10 mm (0.39 in) from the edge of the CHART. In this case, do not affix with lustrous tapes which may reflect the light.
• Perform the adjustment work at lighted places. If the lighting is not enough, adjustment cannot be done, and accuracy rate may not be acquired.
• The adjustment in the outdoors cannot be recommended. Note the sun position, when adjusting it in outdoor by necessity. (It is not acceptable when the sunlight comes from front or rear of the vehicle)

(1) Using the plumb bob, attach the RANDOM CHART on the wall or partition, so that the setting reference (vertical line) center is aligned with the vehicle body center line (leveling line) and the height of the setting reference (horizontal line) center from the floor is 1,000 mm (3 ft, 3 3/8 in).
(2) Adjust the partition so that it is parallel to E-F line.



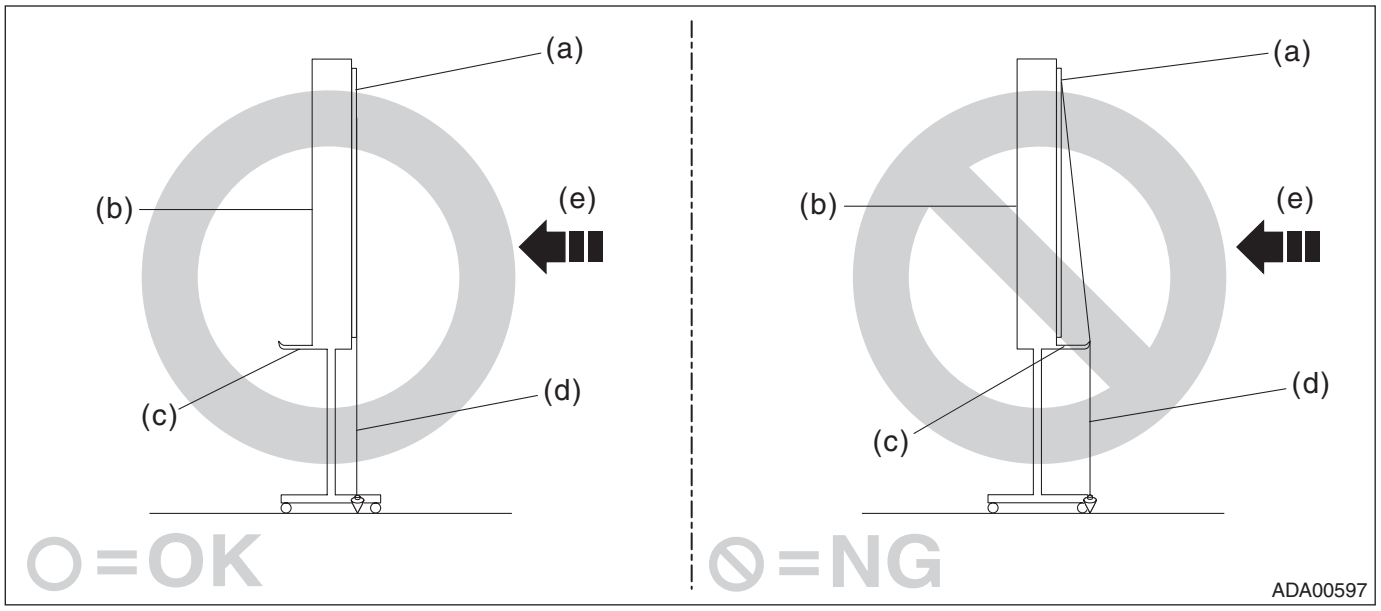
(a) ① = Setting reference (vertical line) and vehicle body center line (A-B line)
(b) ② = Setting reference (horizontal line)
(c) Plumb bob
(d) E-F line
(e) 1,000 mm (3 ft, 3 3/8 in)

CAUTION:
- **Centering accuracy of the plumb bob shall be ±4 mm (±0.16 in) or less.**



(a) ±4 mm (±0.16 in) (b) Marking (c) Plumb bob

- **Positioning accuracy of the measure shall be ±2 mm (±0.08 in) or less.**
- **Centering accuracy of the tire shall be ±4 mm (±0.16 in) or less.**



(a) ±4 mm (±0.16 in) (c) Plumb bob (d) Marking
(b) Tire center line

• Apply the lighting from the upper direction of RANDOM CHART, and make adjustment so that brightness is even in the CHART. (If the lighting is applied from the position where light reflects at RANDOM CHART, the adjustment cannot be done, because the reflected light enters the camera.)

(a) RANDOM CHART (b) Lighting

• When using a white board as a partition, affix the RANDOM CHART on the flat surface without protrusion such as penholder. When suspending the plumb bob, suspend it vertically from the RANDOM CHART while avoiding any protrusion.

(a) RANDOM CHART
(b) White board
(c) Protrusion (penholder, etc.)
(d) Plumb bob
(e) Vehicle travel direction

9) Turn the ignition switch to OFF.
10) Check the windshield glass and the dashboard. <Ref. to ES(diag)-8, WINDSHIELD GLASS AND DASHBOARD, INSPECTION, General Description.>

CAUTION:
If there are any dirt, object or reflection from dashboard within the visibility of stereo camera, the correct adjustment and inspection can not be performed. Especially, do not put paper etc. on the dashboard.
11) Connect the Subaru Select Monitor.

NOTE:
- Use the Subaru Select Monitor equipped with the latest version of the software.
- For detailed operation procedures, refer to “Application help”.

12) Turn the ignition switch to ON.
13) Wait for 10 seconds.
14) On «Start» display, select «Diagnosis».
15) On «Vehicle selection» display, enter vehicle information and select «Confirmed».
16) On «Main Menu» display, select «Each System».
17) Select «EyeSight» on «Select System» display while pressing the pre-collision brake OFF switch and the lane departure warning OFF switch mounted on stereo camera cover assembly at the same time, and then select «Enter».

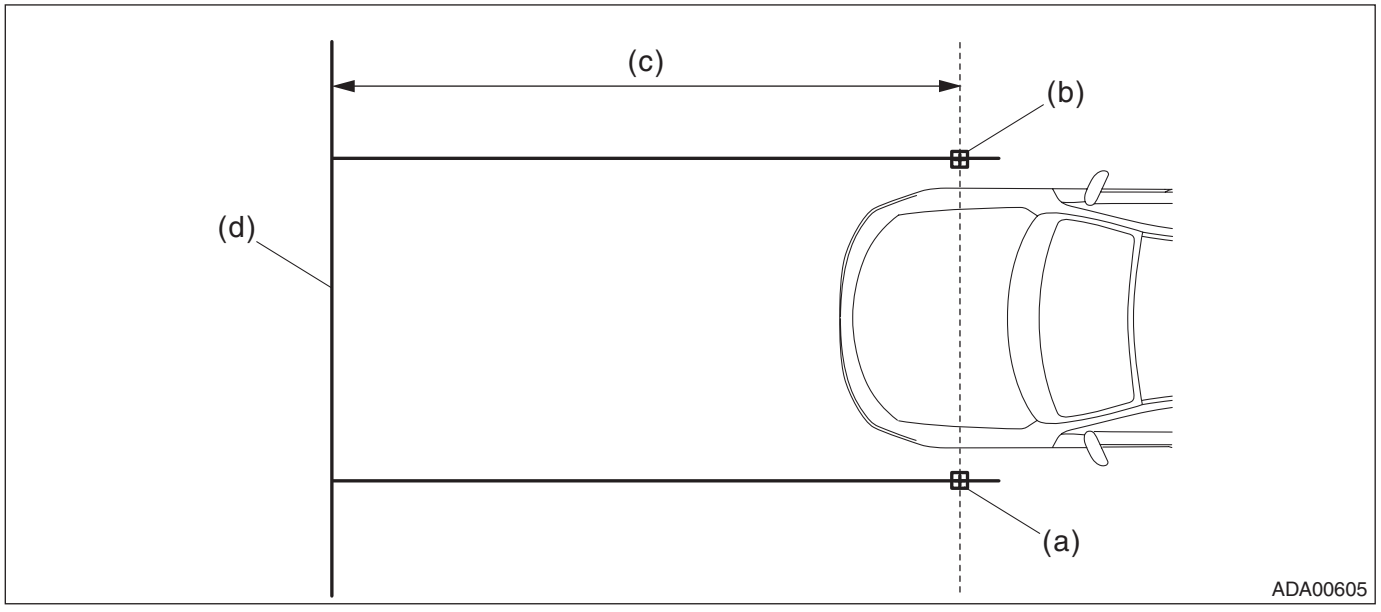
NOTE:
If «EyeSight» is selected without pressing two switches at the same time, the camera adjustment items are not displayed in «Work Support». (for preventing misoperation)
Also, the message is not displayed, when the camera does not finish the start-up (approx. 10 seconds after ignition switch ON). In this case, repeat from the selection of «EyeSight».
18) On «Select Function» display, select «Work Support».

19) From the work support item list, select and perform camera adjustment or other inspections.

NOTE:
• When performing {Camera adjustment, inspection}, pre-collision brake OFF indicator light, lane departure warning OFF indicator light in the meter will illuminate, and the normal function will be disabled.
• After camera adjustment, the function will be enabled, when the ignition switch is turned to OFF and system is restarted.

• When performing adjustment or inspection by affixing RANDOM CHART onto wall

1) Before preparation, check the following items.
(1) The headlight is off.
(2) The vehicle is parked on a level surface.
(3) The inflation pressure of tires is correct.
(4) The vehicle does not have load.
(5) The front wheels are directed to the straight ahead position, when the steering wheel is set to the center position.

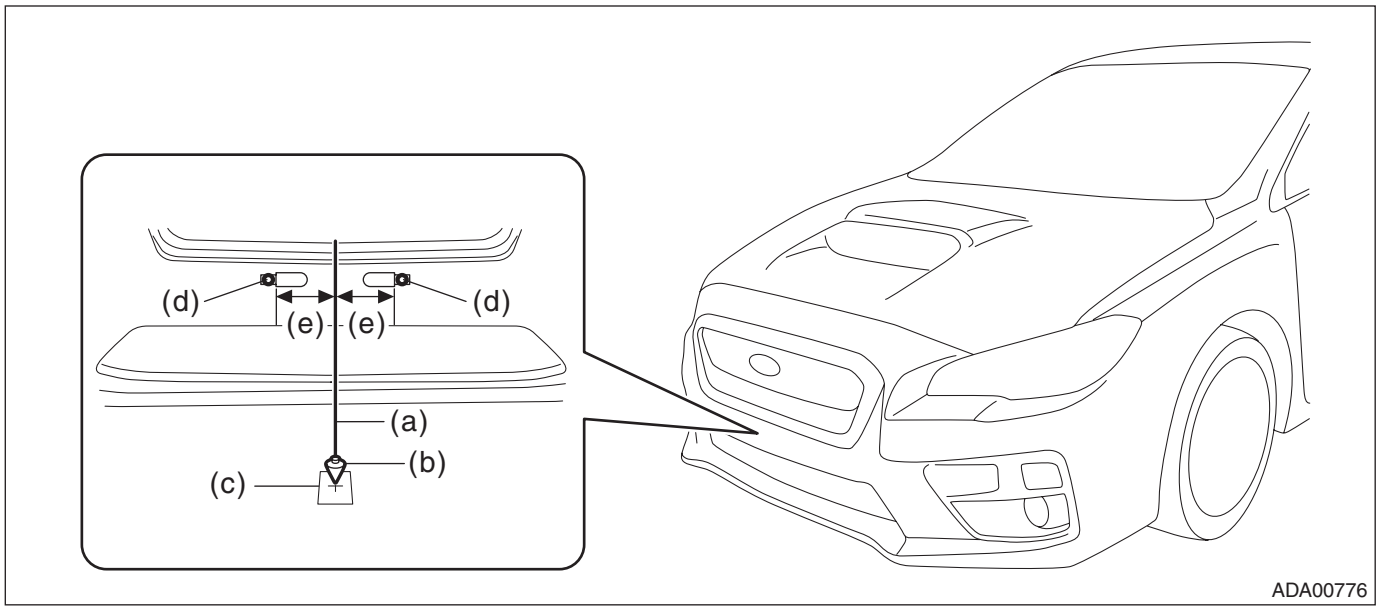


NOTE:
When the front wheels are not directed to the straight ahead position, adjust the alignment. <Ref. to FS-14, ADJUSTMENT, Wheel Alignment.>

2) Prepare the Subaru Select Monitor, measure, plumb bob, leveling line and RANDOM CHART (ST).

Preparation tool:
ST: RANDOM CHART (87599VA000)

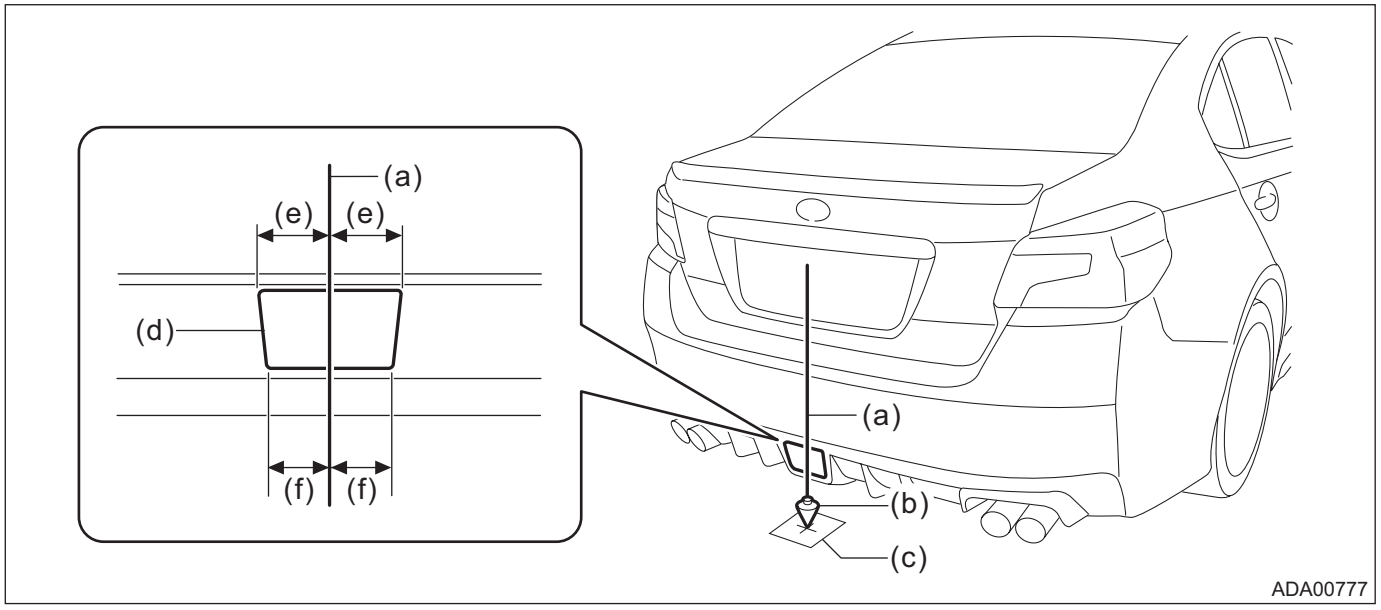
3) Mark the park position of the vehicle.
(1) Strain the leveling line so that it is at right angles to wall on which the RANDOM CHART is affixed, and fix the leveling line with packing tape.
(2) Make a marking 4,000 mm (13 ft, 1 1/2 in) away from the wall where the leveling line is fixed. (Point A and point B)



NOTE:
Stick the packing tape etc. on the floor, then make a marking on the tape.
(3) Strain the leveling line so that it passes through the point A and point B. (A-B line)

(a) Point A
(b) Point B
(c) 4,000 mm (13 ft, 1 1/2 in)
(d) Wall

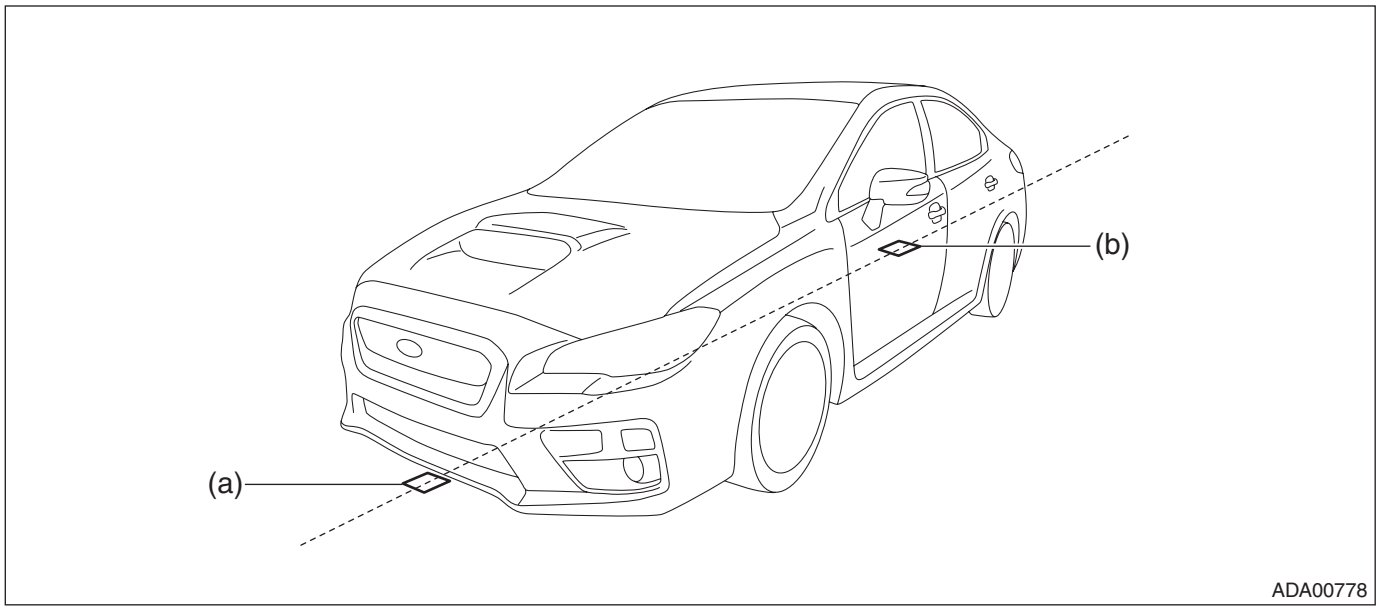
4) Suspend the plumb bob from the center of each front wheel of the vehicle, and place the vehicle so that it is aligned with the leveling line (A-B line).



5) Suspend the plumb bob with leveling line from front center position of vehicle (center of the license plate base), and mark the position where the plumb bob touches the ground. (Point C)

(a) Leveling line
(b) Plumb bob
(c) Point C
(d) License plate base
(e) Same distance

NOTE:
Stick the packing tape etc. on the floor, then make a marking on the tape.

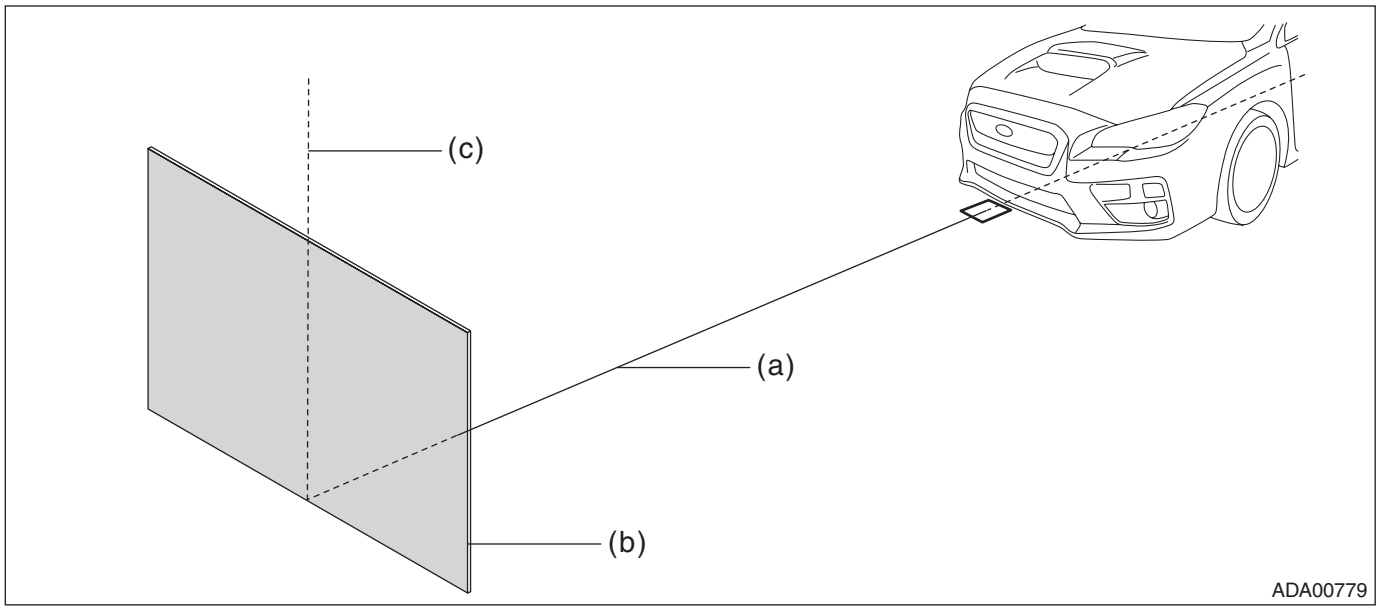


6) Suspend the plumb bob with leveling line from rear center position of vehicle (center of the cover - rear bumper B), and mark the position where the plumb bob touches the ground. (Point D)

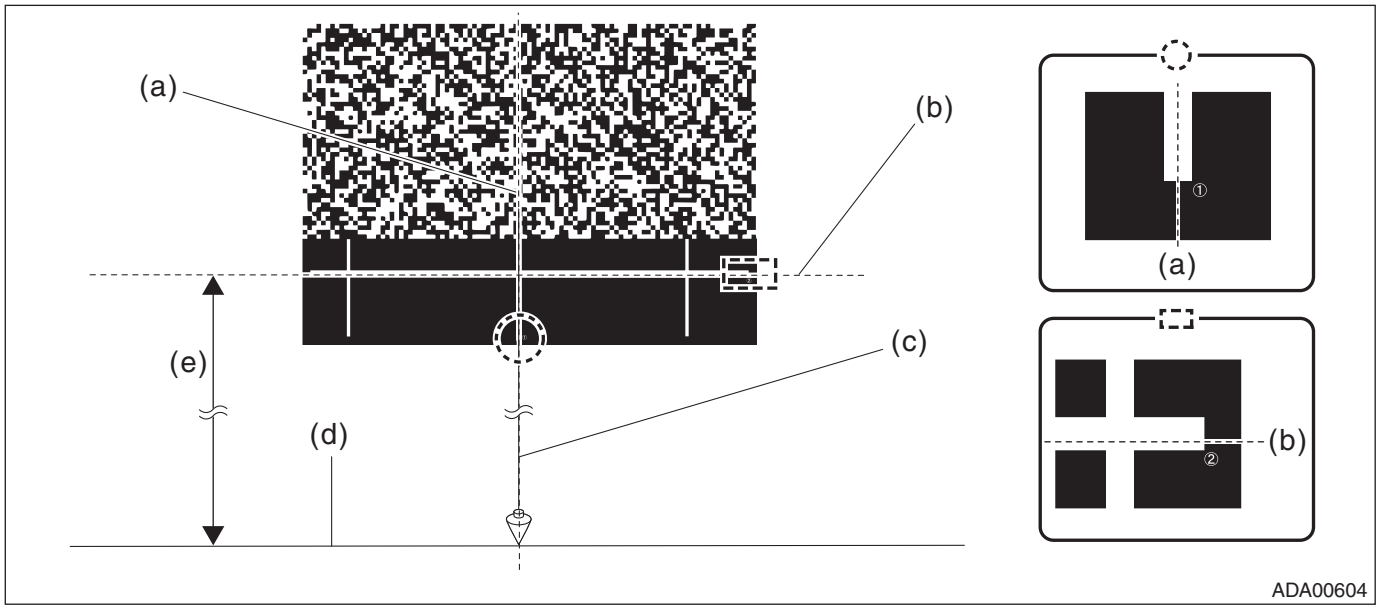
(a) Leveling line
(b) Cover - rear bumper B
(c) Plumb bob
(d) Point D
(e) Same distance
(f) Same distance

NOTE:
Stick the packing tape etc. on the floor, then make a marking on the tape.

7) Strain the leveling line from the making point D through the marking point C to the wall, and fix it with packing tape. (C-D line)



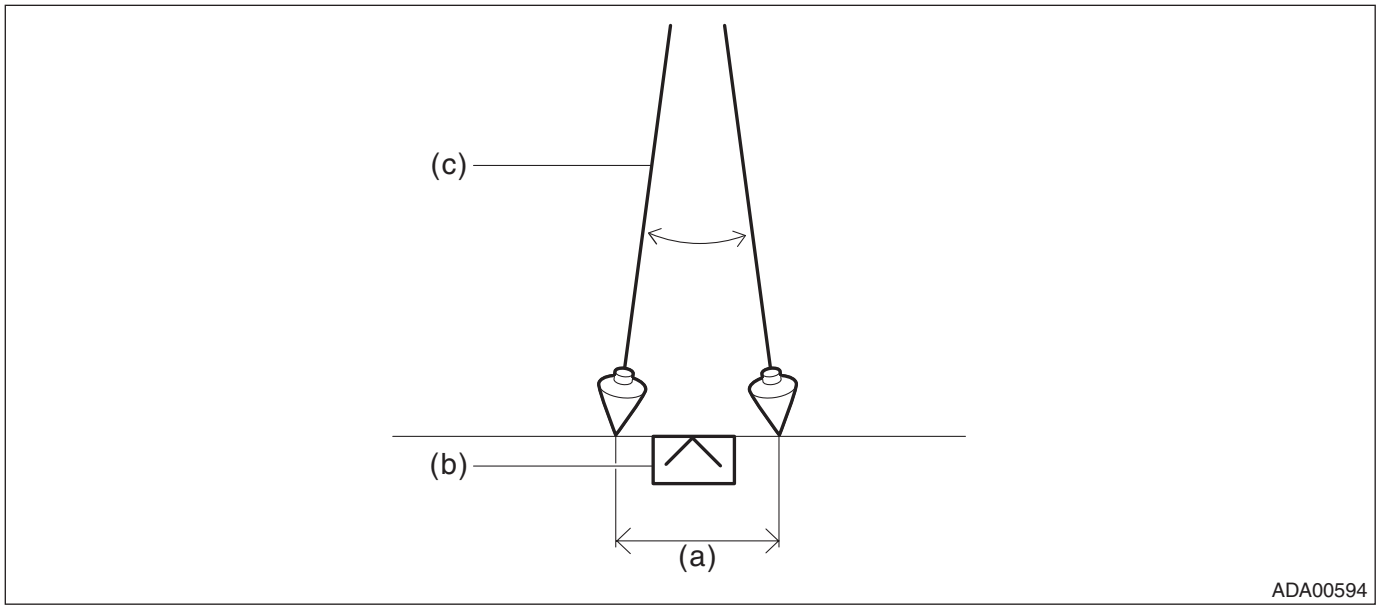
(a) Point C (b) Point D



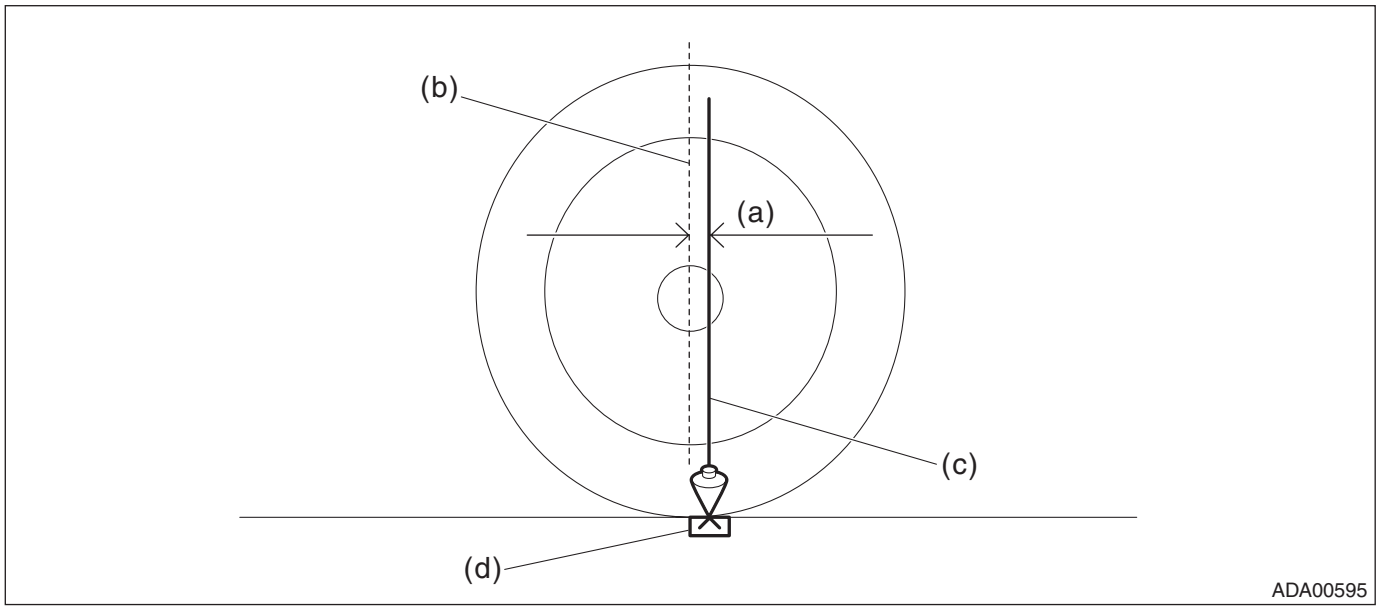
8) Place the RANDOM CHART.

CAUTION:
• Affix the RANDOM CHART onto the vertical wall, etc. with flat surface.
• When affixing the RANDOM CHART using tape, place the tape within 10 mm (0.39 in) from the edge of the CHART. In this case, do not affix with lustrous tapes which may reflect the light.
• Perform the adjustment work at lighted places. If the lighting is not enough, adjustment cannot be done, and accuracy rate may not be acquired.
• The adjustment in the outdoors cannot be recommended. Note the sun position, when adjusting it in outdoor by necessity. (It is not acceptable when the sunlight comes from front or rear of the vehicle)

(1) Using the plumb bob, attach the RANDOM CHART on a wall, so that the setting reference (vertical line) center is aligned with the vehicle body center line (leveling line) and the height of the setting reference (horizontal line) center from the floor is 1,000 mm (3 ft, 3 3/8 in).

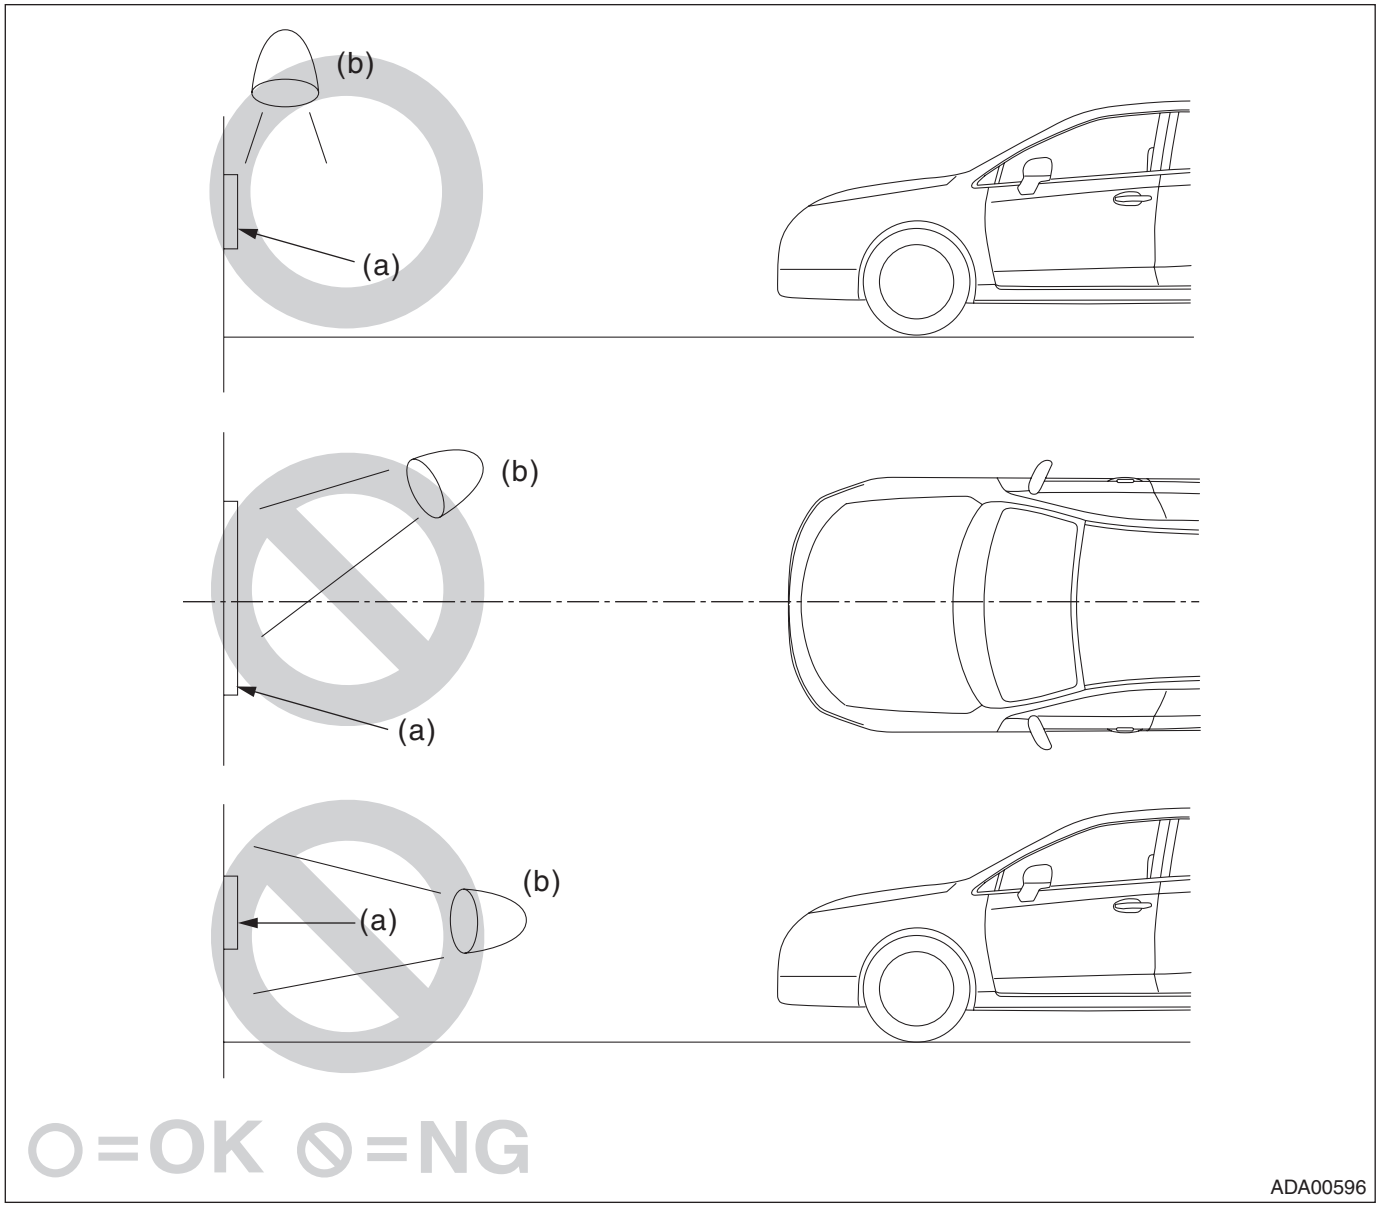


(a) Vehicle body center line (C-D line)
(b) Wall
(c) Setting reference (vertical line)



(a) ① = Setting reference (vertical line) and vehicle body center line (C-D line)
(b) ② = Setting reference (horizontal line)
(c) Plumb bob
(d) Floor
(e) 1,000 mm (3 ft, 3 3/8 in)

CAUTION:
- **Centering accuracy of the plumb bob shall be ±4 mm (±0.16 in) or less.**



(a) ±4 mm (±0.16 in) (b) Marking (c) Plumb bob

- **Positioning accuracy of the measure shall be ±2 mm (±0.08 in) or less.**
- **Centering accuracy of the tire shall be ±4 mm (±0.16 in) or less.**

(a) ±4 mm (±0.16 in) (c) Plumb bob (d) Marking
(b) Tire center line

• Apply the lighting from the upper direction of RANDOM CHART, and make adjustment so that brightness is even in the CHART. (If the lighting is applied from the position where light reflects at RANDOM CHART, the adjustment cannot be done, because the reflected light enters the camera.)

(a) RANDOM CHART (b) Lighting

9) Turn the ignition switch to OFF.
10) Check the windshield glass and the dashboard. <Ref. to ES(diag)-8, WINDSHIELD GLASS AND DASHBOARD, INSPECTION, General Description.>

CAUTION:
If there are any dirt, object or reflection from dashboard within the visibility of stereo camera, the correct adjustment and inspection can not be performed. Especially, do not put paper etc. on the dashboard.
11) Connect the Subaru Select Monitor.

NOTE:
- Use the Subaru Select Monitor equipped with the latest version of the software.
- For detailed operation procedures, refer to “Application help”.

12) Turn the ignition switch to ON.
13) Wait for 10 seconds.

14) On «Start» display, select «Diagnosis».
15) On «Vehicle selection» display, enter vehicle information and select «Confirmed».
16) On «Main Menu» display, select «Each System».
17) Select «EyeSight» on «Select System» display while pressing the pre-collision brake OFF switch and the lane departure warning OFF switch mounted on stereo camera cover assembly at the same time, and then select «Enter».

NOTE:
If «EyeSight» is selected without pressing two switches at the same time, the camera adjustment items are not displayed in «Work Support». (for preventing misoperation)
Also, the message is not displayed, when the camera does not finish the start-up (approx. 10 seconds after ignition switch ON). In this case, repeat from the selection of «EyeSight».
18) On «Select Function» display, select «Work Support».
19) From the work support item list, select and perform camera adjustment or other inspections.

NOTE:
• When performing {Camera adjustment, inspection}, pre-collision brake OFF indicator light, lane departure warning OFF indicator light in the meter will illuminate, and the normal function will be disabled.
• After camera adjustment, the function will be enabled, when the ignition switch is turned to OFF and system is restarted.

2. VEHICLE INFORMATION REGISTRATION

Perform when replacing stereo camera. (Do not perform when performing stereo camera re-adjustment and inspection)
Register the vehicle information according to the procedure of “Selection of Parameter”, and confirm the vehicle information content in “Confirm on parameter”.

PARAMETER SELECTION

NOTE:
• To check the applied model, refer to the “Model number plate” attached to the vehicle. <Ref. to ID-2, IDENTIFICATION, Identification.>
• If you entered a wrong applied model, you can re-write it.
1) Connect the Subaru Select Monitor.

NOTE:
• Use the Subaru Select Monitor equipped with the latest version of the software.
• For detailed operation procedures, refer to “Application help”.
2) On «Start» display, select «Diagnosis».
3) On «Vehicle selection» display, enter vehicle information and select «Confirmed».
4) On «Main Menu» display, select «Each System».
5) On «Select System» display, select «EyeSight» and then select «Enter».
6) On «Select Function» display, select «Work Support».
7) From the work support item list, select «Selection of Parameter».
8) Check the applied model and option code indicated on the “Model number plate”. <Ref. to ID-2, IDENTIFICATION, Identification.>
9) Enter the applied model of 7-digit alphanumeric characters and press the Enter key.
10) When the option code input screen appears after entering the applied model, enter the option code consisting of 3-digit alphanumeric characters, and press the Enter key.
11) When the confirmation screen indicating the vehicle information appears, check that the correct applied model and OP code are displayed and click the «OK» button.

NOTE:
When the displayed applied model and OP code are different from those of the vehicle, perform registration operations again after clicking the «OK» button.
Note that checking the digit corresponding to OP code is not required if “*” or “_” is displayed for OP code.

PARAMETER CHECK

NOTE:
The parameter data registered in the stereo camera is shown on the display.
1) Connect the Subaru Select Monitor.

NOTE:
- Use the Subaru Select Monitor equipped with the latest version of the software.
- For detailed operation procedures, refer to “Application help”.

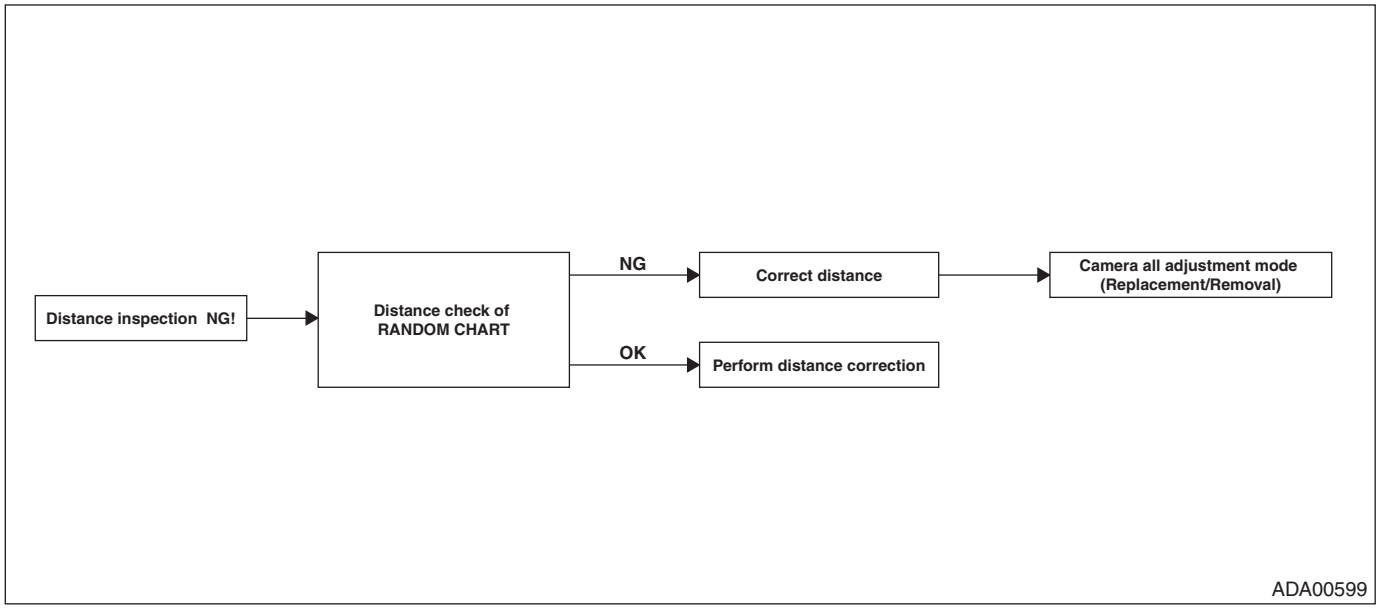
2) On «Start» display, select «Diagnosis».
3) On «Vehicle selection» display, enter vehicle information and select «Confirmed».
4) On «Main Menu» display, select «Each System».
5) On «Select System» display, select «EyeSight» and then select «Enter».
6) On «Select Function» display, select «Work Support».
7) From the work support item list, select «Confirm on parameter».
8) On the «Confirm on parameter» display screen, check that the applied model and OP code of the target vehicle are displayed, and click the «OK» button.
9) If the applied model and OP code of the target vehicle are not displayed on the «Confirm on parameter» display screen, perform parameter selection and registration.

NOTE:
Note that checking the digit corresponding to OP code is not required if “*” or “_” is displayed for OP code.

3. ADJUSTMENT VALUE CLEAR

Perform when replacing stereo camera. (Do not perform when performing stereo camera re-adjustment and inspection)
1) From the work support item list, select «Clear adjustment value».
2) When «Make the following adjustment/inspection. Please push OK if ready.» is displayed, if preparation is ready, select «OK».
3) When «Clear the adjustment value.» is displayed, select «OK».
4) When «Clearing adjustment value...» is displayed, wait until process finishes.
5) When the adjustment value clear is finished correctly, and «Adjustment value cleared OK!» is displayed, select «OK» to finish.
6) Turn the ignition switch to OFF and wait for approx. 5 seconds or more.

CAUTION:
If the ignition switch OFF period is short, the adjustment value clear can not be performed correctly.
7) Next, perform the camera all adjustment mode (replacement/removal). <Ref. to ES-28, CAMERA ALL ADJUSTMENT MODE (REPLACEMENT/REMOVAL), PROCEDURE, Camera Adjustment, Inspection.>



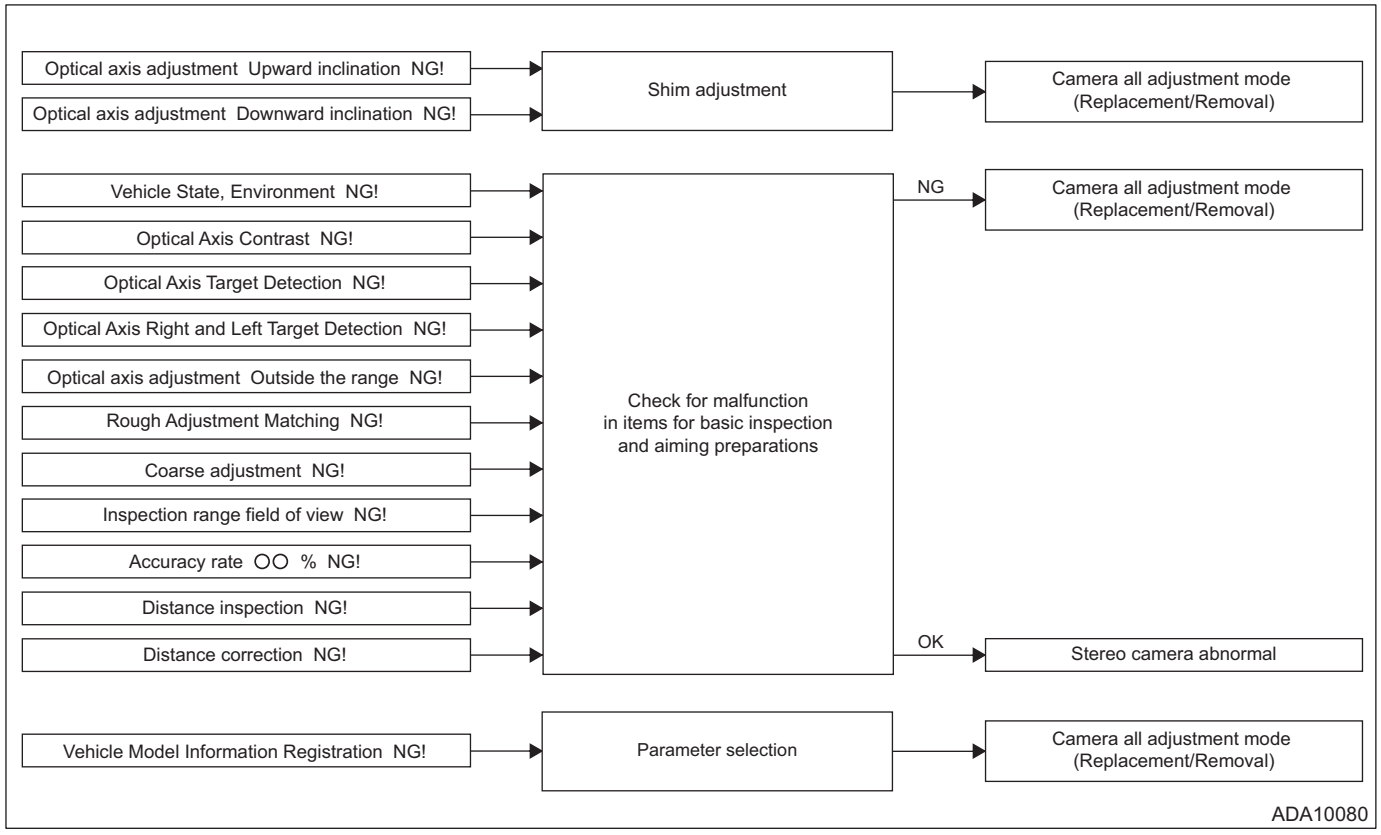
4. CAMERA ALL ADJUSTMENT MODE (REPLACEMENT/REMOVAL)

Perform this procedure when the stereo camera is replaced or re-adjustment is necessary (when stereo camera malfunctioning, when stereo camera reinstalled, when windshield glass replaced).

CAUTION:
- **When the stereo camera is replaced, be sure to perform the «Clear adjustment value» first. When {Clear adjustment value} was skipped, restart the procedure from {Clear adjustment value} again. <Ref. to ES-28, ADJUSTMENT VALUE CLEAR, PROCEDURE, Camera Adjustment, Inspection.>**
- **Perform the camera adjustment and inspection at curb weight without passengers.**
- **When the camera all adjustment mode is performed, the procedures must be completed correctly to the end. Otherwise, the warning is displayed on the meter LCD when the vehicle moves.**

1) From the work support item list, select «Camera all adjustment mode (replacement/removal)».
2) When «Make the following adjustment/inspection. Please push OK if ready.» is displayed, if preparation is ready, select «OK».
3) When «In process...» is displayed, wait until inspection finishes.
4) When the accuracy rate inspection is finished correctly, and «Accuracy rate ○○% OK!» is displayed, select «OK» to go to step 9).

5) When «Distance inspection NG!» is displayed, refer to the NOTE below.



NOTE:
Distance check and adjustment of RANDOM CHART <Ref. to ES-14, PREPARATIONS, PROCEDURE, Camera Adjustment, Inspection.>

6) When «Perform distance correction.» is displayed, select «OK». When the distance correction is finished correctly, and «Distance correction OK!» is displayed, select «OK» and proceed to the accuracy rate inspection.

7) When «Perform accuracy rate inspection.» is displayed, select «OK». When the accuracy rate inspection is finished correctly, and «Accuracy rate ○○% OK!» is displayed, select «OK» to go to next.

8) When «○○ NG!» is displayed during adjustment, refer to the NOTE below.

LIST

Error code	Display	Check items on error	Remarks
1401	«Vehicle State, Environment NG!»	Check body integrated unit.	—
1402	«Vehicle Model Information Registration NG!»	Confirm the part numbers and parameters (variant setting information) of EyeSight system components, and reconfirm that the unit should be installed to that vehicle. To confirm the components, check each item.	—
1403	«Optical Axis Contrast NG!»	1. Make sure that the stereo camera cover is installed correctly. 2. There should be no obstacles that blocks the stereo camera. 3. Stereo camera and camera plate are assembled with no gap. 4. Random chart for ver. 3 must be used. 5. There should be no obstacles that blocks the random chart. 6. Random chart must be set correctly for the vehicle. 7. Grid pattern of random chart should not be dirty or damaged. 8. Lighting circumstance for random chart should be normal. 9. Make sure that the headlight is off. 10.There should be no objects (reflection) on the instrument panel. 11.Dirt should not adhere to the windshield or the lens filter of the stereo camera. 12.There should be no crack on the windshield. NOTE: Detecting measures for the error codes 1403, 1404, 1405, 1406 and 1407 are different. Check items on error with high relevance are shown in the remarks.	Highly relevant with the check items 1 to 12.
1404	«Optical Axis Target Detection NG!»		Highly relevant with the check items 4, 6, 7, 8, 9, 10, 11 and 12.
1405	«Optical Axis Target Detection NG!»		Highly relevant with the check items 4, 6, 7, 8, 9, 10, 11 and 12.
1406	«Optical Axis Right and Left Target Detection NG!»		Highly relevant with the check items 1 to 12.
1407	«Out of the Optical Axis Adjustment Range NG!»		Highly relevant with the check items 3 and 6.
1408	«Optical axis adjustment Upward inclination NG!»	1. Random chart must be set correctly for the vehicle. 2. Aiming is performed with the vehicle at curb weight. 3. There should be no malfunction in the suspension. If there are no problems above, perform shim adjustment so that optical axis turns downward.	—
1409	«Optical axis adjustment Downward inclination NG!»	1. Random chart must be set correctly for the vehicle. 2. Aiming is performed with the vehicle at curb weight. 3. There should be no malfunction in the suspension. If there are no problems above, perform shim adjustment so that optical axis turns upward.	—

Error code	Display	Check items on error	Remarks
140A	«Rough Adjustment Matching NG!»	1. Make sure that the stereo camera cover is installed correctly. 2. There should be no obstacles that blocks the stereo camera. 3. Stereo camera and camera plate are assembled with no gap. 4. There should be no obstacles that blocks the random chart. 5. Random pattern of random chart should not be dirty or damaged. 6. Lighting circumstance for random chart should be normal. 7. There should be no objects (reflection) on the instrument panel. 8. Dirt should not adhere to the windshield or the lens filter of the stereo camera. 9. There should be no crack on the windshield. NOTE: Detecting measures for the error codes 140A, 140B and 140C are different. Check items on error with high relevance are shown in the remarks.	Highly relevant with the check items 1 to 9.
140B	«Coarse adjustment NG!»		Highly relevant with the check items 3, 5, 7 and 9.
140C	«Coarse adjustment NG!»		Highly relevant with the check items 3, 5, 7 and 9.
140E	«Inspection range field of view NG!»	1. Make sure that the stereo camera cover is installed correctly. 2. There should be no obstacles that blocks the random chart. 3. Random pattern of random chart should not be dirty or damaged. 4. Lighting circumstance for random chart should be normal. 5. There should be no objects (reflection) on the instrument panel. 6. Dirt should not adhere to the windshield or the lens filter of the stereo camera. 7. There should be no crack on the windshield. 8. Windshield for EyeSight should be assembled.	—
140F	«Distance inspection NG!»	1. Distance from random chart to wheel center of the vehicle should be 4,000 mm (13.12 ft). 2. Lighting circumstance for random chart should be normal.	—
1410	«Accuracy rate 00% NG !»	1. Lighting circumstance for random chart should be normal. 2. Random pattern of random chart should not be dirty or damaged. 3. There should be no objects (reflection) on the instrument panel. 4. Dirt should not adhere to the windshield or the lens filter of the stereo camera. 5. There should be no crack on the windshield.	—
1501	«Distance correction NG!»	When «Distance inspection NG!» is displayed and distance correction is performed without inspection, check the following. 1. Distance from random chart to wheel center of the vehicle should be 4,000 mm (13.12 ft). 2. Lighting circumstance for random chart should be normal.	—

NOTE:
• Shim adjustment: <Ref. to ES-34, SHIM ADJUSTMENT, PROCEDURE, Camera Adjustment, Inspection.>
• Basic inspection items: <Ref. to ES(diag)-8, INSPECTION, General Description.>
• Aiming preparation items: <Ref. to ES-14, PREPARATIONS, PROCEDURE, Camera Adjustment, Inspection.>
9) Turn the ignition switch to OFF and wait for approx. 10 seconds. (time necessary to save adjustment and inspection result)

CAUTION:
• If the ignition switch OFF period after adjustment and inspection finished is short, the adjustment and inspection result cannot be saved correctly. The warning is displayed on the meter LCD, when the vehicle moves.
• When aiming begins, normal recognition process stops and the warning is displayed on the meter LCD. The warning display will be cleared by turning the ignition switch OFF → ON.
• If the steering wheel is operated many times during adjustment and inspection preparation, the power steering control module is overheated. Therefore, you may have to wait for at least 10 seconds after turning the ignition switch to OFF.
10) Turn the ignition switch to ON. Make sure the «Aiming Completion Status» of «Data monitor» is «Exit» using Subaru Select Monitor.
11) Perform the {Clear Memory}, and turn the ignition switch to OFF.
12) Next, perform the automatic adjustment and function check by driving. <Ref. to ES-33, AUTOMATIC ADJUSTMENT AND FUNCTION CHECK BY DRIVING, PROCEDURE, Camera Adjustment, Inspection.>

5. AUTOMATIC ADJUSTMENT AND FUNCTION CHECK BY DRIVING

NOTE:
• Perform the automatic adjustment and function check by driving to improve the recognition accuracy of stereo camera, when the stereo camera is replaced or re-adjusted, or the EyeSight function does not operate correctly.
• The automatic adjustment and function check by driving adjust the stereo camera more in detail, based on the stereo camera adjustment using RANDOM CHART.
1) Perform this procedure after finishing stereo camera adjustment and inspection.
2) Connect the Subaru Select Monitor.

NOTE:
• Use the Subaru Select Monitor equipped with the latest version of the software.
• For detailed operation procedures, refer to “Application help”.
3) On «Start» display, select «Diagnosis».
4) On «Vehicle selection» display, enter vehicle information and select «Confirmed».
5) On «Main Menu» display, select «Each System».
6) On «Select System» display, select «EyeSight» and then select «Enter».
7) On «Select Function» display, select «Data Monitor».
8) From the data monitor item list, select «Automatic Adjustment Status».
9) Drive the vehicle until «Automatic adjustment status» displays «0F», «1F», «2F» or «3F».

CAUTION:
• For the automatic adjustment, drive the vehicle on straight road with white lines on both sides at a speed of 40 km/h (25 MPH) or more for at least five minutes, while maintaining distance from the preceding vehicle 40 m (132 ft) or more.
• Maintain the following conditions until «Automatic adjustment status» displays «0F», «1F», «2F» or «3F».
– Turn the active lane keep and cruise main to OFF.
– Hold down the pre-collision brake OFF switch for two seconds to turn OFF the pre-collision brake function.

Display	Content	Unit of measure	Note (at idling)
Automatic adjustment status	Index for automatic adjustment operation performed by the driving test after the completion of the optical axis adjustment	—	«0F», «1F», «2F» or «3F» is displayed when completed.

NOTE:
• It may takes long until «0F», «1F», «2F» or «3F» is displayed depends on the road condition etc.
• For new vehicles, «00» may be displayed. A test-drive is not necessary before delivery because high-accuracy aiming setting has been performed at the factory.
10) From the data monitor item list, display «Lane recognition status» to check if any of the following appears.

NOTE:
When driving does not continue until «0F», «1F», «2F» or «3F» is displayed, it may take long before recognition completes.
• Recognizing white lines on both sides during driving at 40 km/h (25 MPH) or more: «03»
• Recognizing white lines on both sides with lane width 3 m (10 ft) or more during driving at 65 km/h (40 MPH) or more: «05»

Display	Content	Unit of measure	Note (at idling)
Lane recognition status	Display of lane recognition status	—	Recognized when vehicle lane can be seen by 20 m (66 ft) or more.

11) From the data monitor item list, display «Preceding vehicle distance» to check if the distance from the preceding vehicle is approximately the same.

6. SHIM ADJUSTMENT

1) Turn the ignition switch to OFF.
2) Detach the stereo camera cover assembly, and remove the stereo camera. <Ref. to ES-8, REMOVAL, Stereo Camera.>
3) Remove the stereo camera plate, and insert the shim into the vehicle body and camera plate.

Preparation items:
Genuine part: Shim (washer) (031105000)

NOTE:
- Inserting the shim into the vehicle front side makes camera downward.
- Inserting the shim into the vehicle rear side makes camera upward.
- There is a case that the shim may be inserted at the production line, but it is not abnormal.

4) Install the stereo camera plate.

Tightening torque:
5.5±1 N·m (0.56±0.1 kgf-m, 4.1±0.7 ft-lb)

5) Install the stereo camera and stereo camera cover assembly. <Ref. to ES-11, INSTALLATION, Stereo Camera.>
6) Perform the camera all adjustment mode (replacement/removal). <Ref. to ES-28, CAMERA ALL ADJUSTMENT MODE (REPLACEMENT/REMOVAL), PROCEDURE, Camera Adjustment, Inspection.>

7. CAMERA INITIALIZATION

This is a recovery measures prepared for the data failure caused by the low battery voltage during data storage to inside the stereo camera.

CAUTION:
Do not usually perform camera initialization because it will clear the aiming data and/or DTCs.
Perform the camera initialization only when the aiming result is NG even if the vehicle is placed correctly as shown in the flowchart described in “A: Procedure”. After camera initialization, perform the aiming in the same procedure as for camera replacement.
1) Connect the Subaru Select Monitor.

NOTE:
- Use the Subaru Select Monitor equipped with the latest version of the software.
- For detailed operation procedures, refer to “Application help”.

2) Turn the ignition switch to ON.
3) Wait for 10 seconds.
4) On «Start» display, select «Diagnosis».
5) On «Vehicle selection» display, enter vehicle information and select «Confirmed».
6) On «Main Menu» display, select «Each System».
7) On «Select System» display, select «EyeSight» and then select «Enter».
8) On «Select Function» display, select «DTC».
9) Select «Clear Memory» while pressing the pre-collision brake OFF switch and the lane departure warning OFF switch mounted on stereo camera cover assembly at the same time.
10) Turn the ignition switch to OFF.
11) Wait for 5 seconds.
12) Next, perform the clear adjustment value. <Ref. to ES-28, ADJUSTMENT VALUE CLEAR, PROCEDURE, Camera Adjustment, Inspection.>

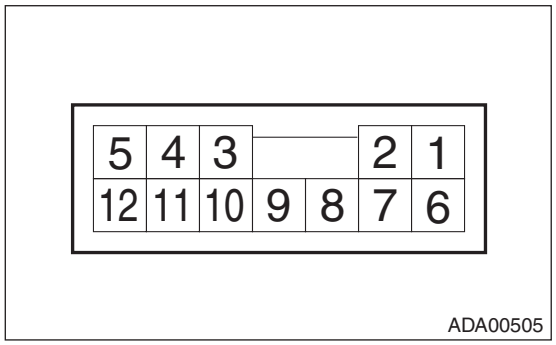
7. Switches and Harness

A: NOTE

1. PRE-COLLISION BRAKE OFF & LANE DEPARTURE WARNING OFF SWITCH

The pre-collision brake OFF & lane departure warning OFF switch is integrated in the stereo camera cover assembly.
If the pre-collision brake OFF & lane departure warning OFF switch is faulty, replace the stereo camera cover assembly. <Ref. to ES-8, Stereo Camera.>

2. EyeSight STEERING SWITCH



For the removal and installation operation procedures for the EyeSight steering switch, refer to “CRUISE CONTROL SYSTEM” section. <Ref. to CC-6, Cruise Control Command Switch.>

B: INSPECTION

1. PRE-COLLISION BRAKE OFF SWITCH AND LANE DEPARTURE WARNING OFF SWITCH

1) Measure the resistance between connector terminals.

Preparation tool:
Circuit tester

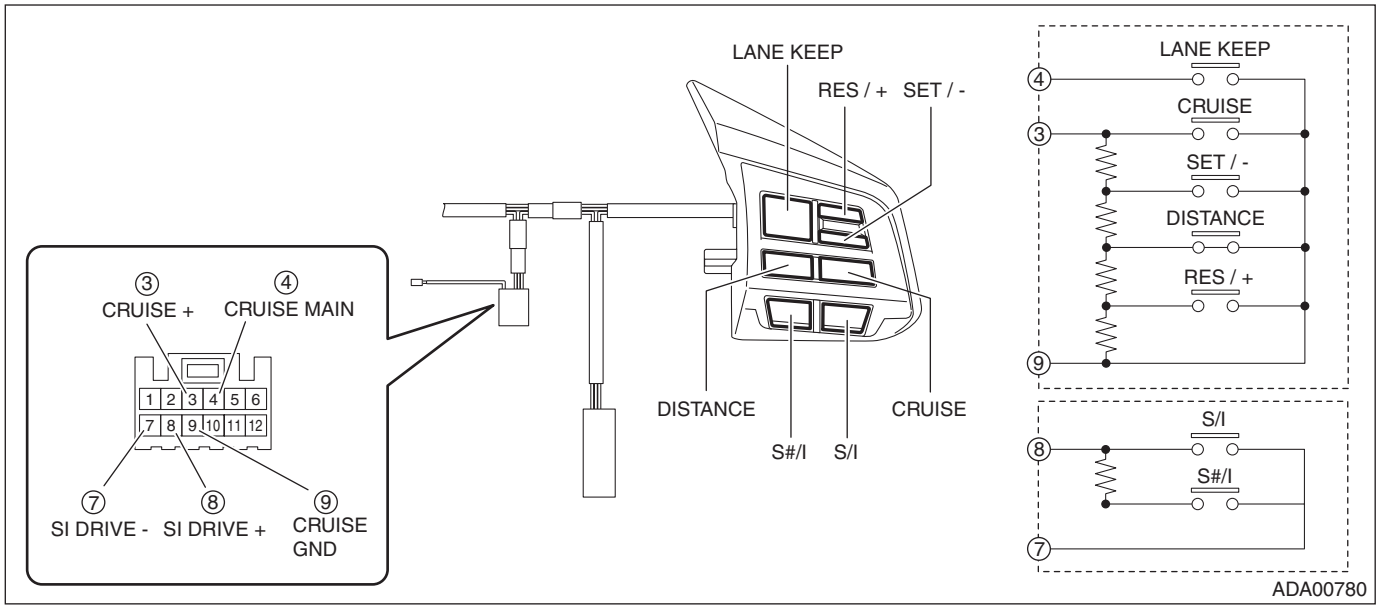
- Pre-collision brake OFF switch

Terminal No.	Inspection conditions	Standard
10 — 8	OFF	Approx. 1 kΩ
	ON	Less than 1 Ω

- Lane departure warning OFF switch

Terminal No.	Inspection conditions	Standard
9 — 8	OFF	Approx. 1 kΩ
	ON	Less than 1 Ω

2) Apply battery voltage between the connector terminals to check lighting condition of illumination inside the switch.



Terminal No.	Inspection conditions	Specification
6 (+) — 7 (–)	Apply battery voltage.	Light ON

3) Replace the stereo camera cover assembly if faulty is found in the inspection.

2. EyeSight STEERING SWITCH

1) Measure the resistance between connector terminals.

Preparation tool:
Circuit tester

Terminal No.	Inspection conditions		Standard
3 — 9	CRUISE SET/– DISTANCE RES/+	All OFF	Approx. 4,020 Ω
	CRUISE	ON	Less than 1 Ω
	SET/–	ON	Approx. 250 Ω
	DISTANCE	ON	Approx. 680 Ω
	RES/+	ON	Approx. 1,470 Ω
4 — 9	LANE KEEP	OFF	1 MΩ or more
		ON	Less than 1 Ω
8 — 7	S/I S#/I	All OFF	1 MΩ or more
	S/I	ON	Less than 1 Ω
	S#/I	ON	Approx. 1,800 Ω

2) Apply battery voltage between the connector terminals to check lighting condition of illumination inside the switch.

Terminal No.	Inspection conditions	Specification
10 (+) — 11 (–)	Apply battery voltage.	Light ON

3) Replace the EyeSight steering switch if it is found defective.

8. Combination Meter

A: NOTE

For the operation procedures for combination meter, refer to “INSTRUMENTATION/DRIVER INFO” section. <Ref. to IDI-13, Combination Meter.>

9. Transmission Control Module (TCM)

A: NOTE

For the operation procedures for transmission control module (TCM), refer to “CONTINUOUSLY VARIABLE TRANSMISSION” section. <Ref. to CVT(TR690)-126, Transmission Control Module (TCM).>

10.Stop Light & Brake Switch

A: NOTE

For the operation procedures for stop light and brake switch, refer to “BRAKE” section. <Ref. to BR-100, Stop Light Switch.>

11.VDC Control Module and Hydraulic Control Unit (VDCCM&H/U)

A: NOTE

For the operation procedures for VDC control module & hydraulic control module (VDCCM&H/U), refer to “VEHICLE DYNAMICS CONTROL (VDC)” section. <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>

12.Power Steering Control Module

A: NOTE

For the operation procedures for power steering control module, refer to “POWER ASSISTED SYSTEM (POWER STEERING)” section. <Ref. to PS-100, Power Steering Control Module.>

13.Roll Connector

A: NOTE

For the operation procedures for roll connector (steering angle sensor), refer to “AIRBAG SYSTEM” section. <Ref. to AB-58, Roll Connector.>

14.Body Integrated Unit

A: NOTE

Refer to the “SECURITY AND LOCKS” section for operation procedures of the body integrated unit. <Ref. to SL-81, Body Integrated Unit.>

15.Reverse Automatic Braking CM

A: NOTE

For the operation procedures for Reverse Automatic Braking CM, refer to “Reverse Automatic Braking” section. <Ref. to RAB-6, Reverse Automatic Braking CM.>

16.Diagnostics with Phenomenon

A: INSPECTION

Refer to “Diagnostics with Phenomenon” of “EyeSight (DIAGNOSTICS)” section. <Ref. to ES(diag)-51, Diagnostics with Phenomenon.>

EyeSight (DIAGNOSTICS)

ES(diag)

Page

6. Subaru Select Monitor 21
7. Read Current Data 24
8. Real-time Diagnosis 42
9. Diagnostic Code(s) Display 43
10. Freeze Frame Data Display 48
11. Clear Memory Mode 49
12. Clear Active Lane Keep System Learning Value 50
13. Diagnostics with Phenomenon 51
14. EyeSight Temporary Code(s) Display 71
15. ECM Cancel Code(s) Display 79
16. ACC Cancel Code(s) Display 82
17. Active Lane Keep System Code(s) Display 84
18. Diagnostic Procedure with Diagnostic Trouble Code (DTC) 85
19. Diagnostic Procedure with ECU Cancel Code 111

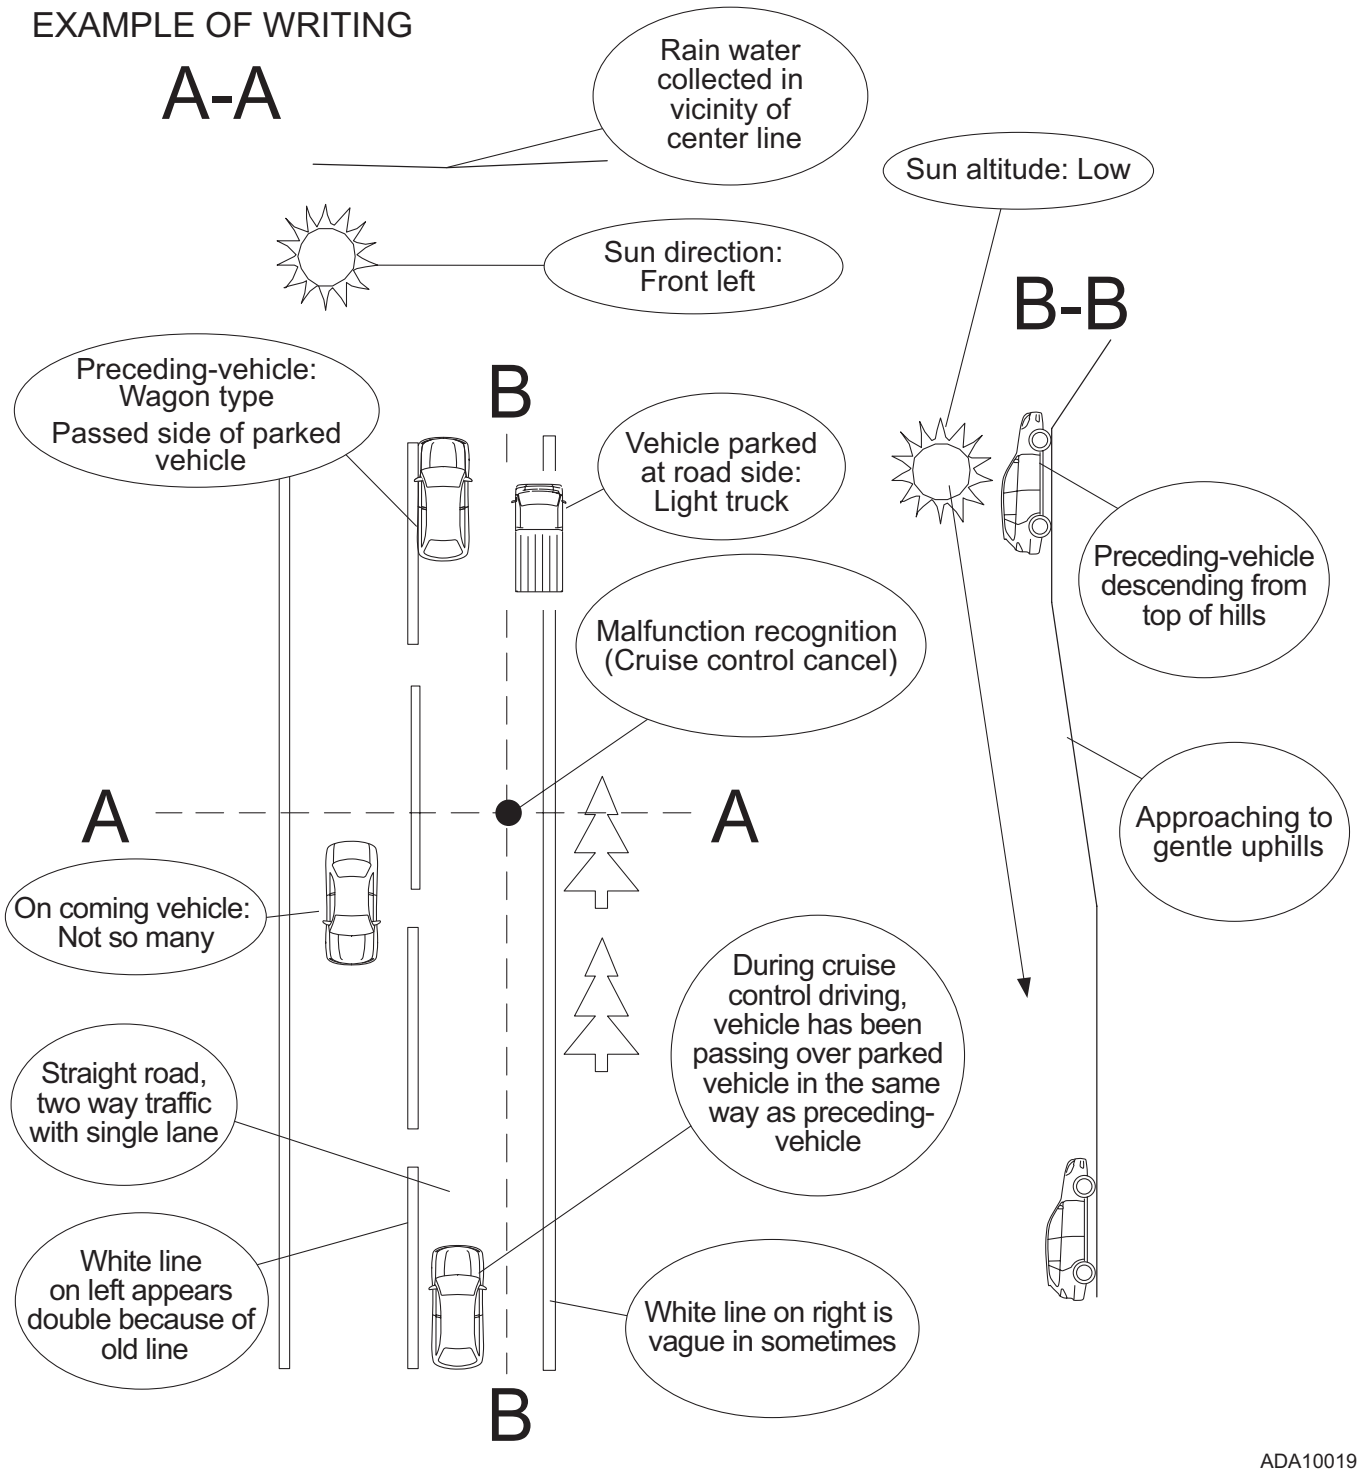
1. Basic Diagnostic Procedure

A: PROCEDURE

CAUTION:
• Start the diagnosis after the engine has started. (Cruise control main switch does not turn on even if it is pressed before the engine starts.)
• When performing diagnosis, observe the legal speed limit on the road.
• ECM cancel code, ACC cancel code and lane keep assist code are not the diagnostic trouble codes (DTCs). These codes will also appear when the cruise control or the active lane keep is cancelled by the driver's operation. Do not confuse them.
• Be sure to get an assistant to support the diagnosis while driving, and have him/her operate the select monitor.
• Be sure to record the following data before performing the Clear Memory. (Data must be obtained before inspection because the Clear Memory operation deletes previous faults and temporary stop history.)
– All diagnostic trouble codes (DTCs)
– DTC of stereo camera (current malfunction, past malfunction)
– Freeze frame data of stereo camera
– ACC cancel code of stereo camera
– Lane keep assist code of stereo camera
– EyeSight temporary stop code of stereo camera
– Current data of stereo camera
(To obtain the data concerning camera adjustment information, previous trouble or temporary stop history, all data must be measured for a few seconds after the engine has started.)
• When a temporary stop occurs, stereo camera may be affected by a small amount of dirt that would not be perceived by the driver. In this case, cleaning the windshield glass is effective. <Ref. to ES(diag)-8, WINDSHIELD GLASS AND DASHBOARD, INSPECTION, General Description.>

	Step	Check	Yes	No
1	**PREPARATION BEFORE INSPECTION.** Using the Check List for Interview, confirm the condition of the malfunction occurrence from the user. <Ref. to ES(diag)-3, CHECK, Check List for Interview.>	Is there any component that obviously seems to affect the malfunction?	Repair or replace the component that seems to affect the malfunction.	Go to step **2**.
2	**CHECK DTC.** Read the DTC using Subaru Select Monitor. <Ref. to ES(diag)-43, Diagnostic Code(s) Display.> NOTE: When communication with the stereo camera could not be established, check the circuit. <Ref. to ES(diag)-22, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, INSPECTION, Subaru Select Monitor.>	Is DTC displayed on Subaru Select Monitor?	Perform the diagnosis according to DTC and freeze frame data. <Ref. to ES(diag)-43, Diagnostic Code(s) Display.> <Ref. to ES(diag)-48, Freeze Frame Data Display.> If the diagnostic codes other than the stereo camera are displayed, refer to the diagnosis for the relevant codes.	Go to step **3**.
3	**PERFORM DIAGNOSTICS WITH PHENOMENON.** Using the diagnostics with phenomenon, perform inspection. <Ref. to ES(diag)-51, Diagnostics with Phenomenon.>	Is the vehicle free from any problem described in the diagnostics with phenomenon? / Are indicators normal?	Finish the diagnosis.	Perform the diagnosis according to the diagnostics with phenomenon.

2. Check List for Interview



A: CHECK

Inspect the following items regarding the vehicle's state.

Writer/ Inspector	Writer's name		
	Inspector's Name		
Vehicle information	Car accessory equipment condition	Car accessory is installed to the windshield glass.	No/Yes (Position:)
		Other	No/Yes (Accessory's name:)
	Is there any modification for the following items?	Suspension?	Not changed / Changed (Specifically:)
		Headlight?	Not changed / Changed (Specifically:)
		Tire size?	Not changed / Changed (Specifically:)
		Front wiper?	Not changed / Changed (Specifically:)
	How is the condition around camera?	Is there any scratch or damage on the windshield glass?	No/Yes (Specifically:)
		Are antennas, etc. attached on the prohibited area?	No/Yes (Specifically:)
		Is wide mirror or accessory attached?	No/Yes (Specifically:)
	How is the surface condition of the windshield glass?	Presence of oil film, fogging, dirt and/or glass coating	No/Yes (Specifically:)
	How is the condition of the dashboard?	Is there anything that can be easily reflected against the windshield glass on the dashboard?	No/Yes (Specifically:)
	How is the deterioration of the wiper?	Does any streak or uneven wiping area remain in front of the camera?	No/Yes (Specifically:)
	How is the condition of the tire?	Is there any wear? Is there any excessive wear difference?	No/Yes (Specifically:)
		Is the air pressure proper?	Proper/Improper (Specifically:)
	How is the condition of the camera lens filter?	Is there finger print adhesion or cracks on the lens filter?	No/Yes (Specifically:)
Description of malfunction	What kind of malfunction has been detected?	Failure / temporary stop / faulty operation of adaptive cruise control / faulty operation of pre-collision brake / other faulty operations	
	What kind of DTC and/or cancel code is displayed?		
	How is the meter display?	EyeSight warning light	Off/On/Blink
		Pre-collision brake OFF indicator light	Off/On
		Lane departure warning OFF indicator light	Off/On
		Multi-information display	• Halt: camera view defectiveness • Halt: camera temperature range outside • Halt

Check List for Interview

Occurrence conditions	Occurrence date		Occurrence location	
	Vehicle speed at occurrence	Approx. km/h (MPH)	Occurrence timing	During driving / during stopping / continues after engine has started
	Road type	Express way / limited highway / main highway / general road	Weather	Fine/cloudy/rainy/snowy/other
	Road condition ①	Dry/slippery (Rainy • compacted snow • icy road)	Ambient temperature	Approx. ° C(°F)
	Road condition ②	Asphalt / gravel / earth and sand / other	Position of solar radiation	Described in the detailed chart when the weather is fine.
	Road shape	Uphill / downhill / bank / roll / uneven surface	Time elapsed after engine start	Immediately after engine start / within 5 minutes after engine start / more than 5 minutes after engine start
	Wiper operation status	OFF/INT/LO/HI/AUTO	Light on status	Off / LO On / HI On
	Vehicle weight	Number of passengers: ( ), Did the vehicle carry heavy load? (No/Yes (Approx. kg))		
	Detailed chart (Refer to the example of description.)			
	In case of malfunction caused by temporary stop or faulty operation, describe the details by referring to the example below so that the following conditions can be recognized. (Images taken with a digital camera, etc. are acceptable.) • Road shape (straight, curve, tunnel, number of lane, etc.) • Road grade and it's change • Presence of white line, guardrails and/or side wall (degree of clarity) • Position of the sun • Presence and shape of preceding vehicle, oncoming vehicle, vehicle running on the next lane or pedestrian • Presence and shape of surrounding building or structure • Traveled course of own vehicle and preceding vehicle			

EXAMPLE OF WRITING
A-A
Rain water collected in vicinity of center line
Sun direction: Front left
Sun altitude: Low
B-B
Preceding-vehicle: Wagon type
Passed side of parked vehicle
B
Vehicle parked at road side: Light truck
Preceding-vehicle descending from top of hills
Malfunction recognition (Cruise control cancel)
A
A
Approaching to gentle uphills
On coming vehicle: Not so many
During cruise control driving, vehicle has been passing over parked vehicle in the same way as preceding-vehicle
Straight road, two way traffic with single lane
White line on left appears double because of old line
White line on right is vague in sometimes
B
ADA10019

3. General Description

A: CAUTION

1. AIRBAG SYSTEM

Airbag system wiring harness is routed near the cruise control command switch.

CAUTION:
• Do not use the electrical test equipment on the airbag system wiring harnesses and connector circuits.
• Be careful not to damage the airbag system wiring harness when servicing the cruise control command switch.

2. EyeSight

CAUTION:
• Do not hold the camera unit of the stereo camera.
• Do not touch the lens on the stereo camera.
• Do not clean the lens of the stereo camera.
• When cleaning the windshield glass, use care so that the glass cleaner, etc. does not come in contact with the lens of the stereo camera.
• Do not make an impact or apply excessive force to the stereo camera.
• Do not disassemble the stereo camera.
• Do not change the installation position of the stereo camera or do not modify the surrounding structure.
• If the stereo camera or windshield glass is removed or replaced, always adjust or check the stereo camera.
• When lifting up the vehicle to rotate the tires, turn off the pre-crash function.
• Stereo camera axis may be displaced even in a minor collision. So be sure to adjust the stereo camera even when the EyeSight warning light is not illuminated or when the "Stereo Camera Temporary Stop" is not displayed on the multi-information display.
• When removing the stereo camera cover assembly, cover it with a copy paper or similar dust-free paper to avoid any interference to the camera lens, and tape the paper while being careful not to let the adhesive surface contact the glass surface. Be sure to remove the paper after the procedure. <Ref. to ES-8, REMOVAL, Stereo Camera.>

B: PREPARATION TOOL

1. SPECIAL TOOL

ILLUSTRATION	TOOL NUMBER	DESCRIPTION	REMARKS
 STSSM4	—	SUBARU SELECT MONITOR 4	Used for setting of each function and trouble-shooting for electrical system. NOTE: For detailed operation procedures of Subaru Select Monitor 4, refer to “Application help”.

2. GENERAL TOOL

TOOL NAME	REMARKS
Circuit tester	Used for measuring resistance, voltage and current.
Masking tape	Used for removing and installing stereo camera cover assembly.
DST-i	Used for Subaru Select Monitor 4.

C: INSPECTION

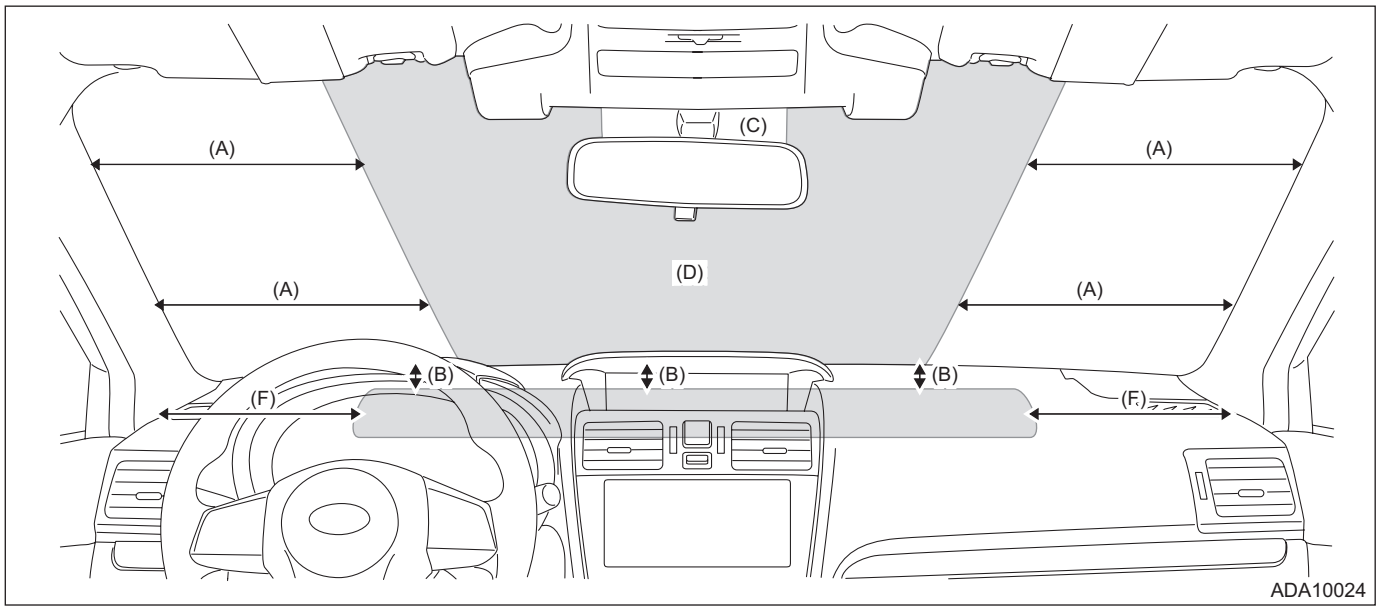
1. BATTERY

Check the battery. <Ref. to SC(w/o STI)-51, INSPECTION, Battery.> <Ref. to SC(STI)-24, INSPECTION, Battery.>

2. WINDSHIELD GLASS AND DASHBOARD

Remove the windshield glass and dashboard in front of the stereo camera.

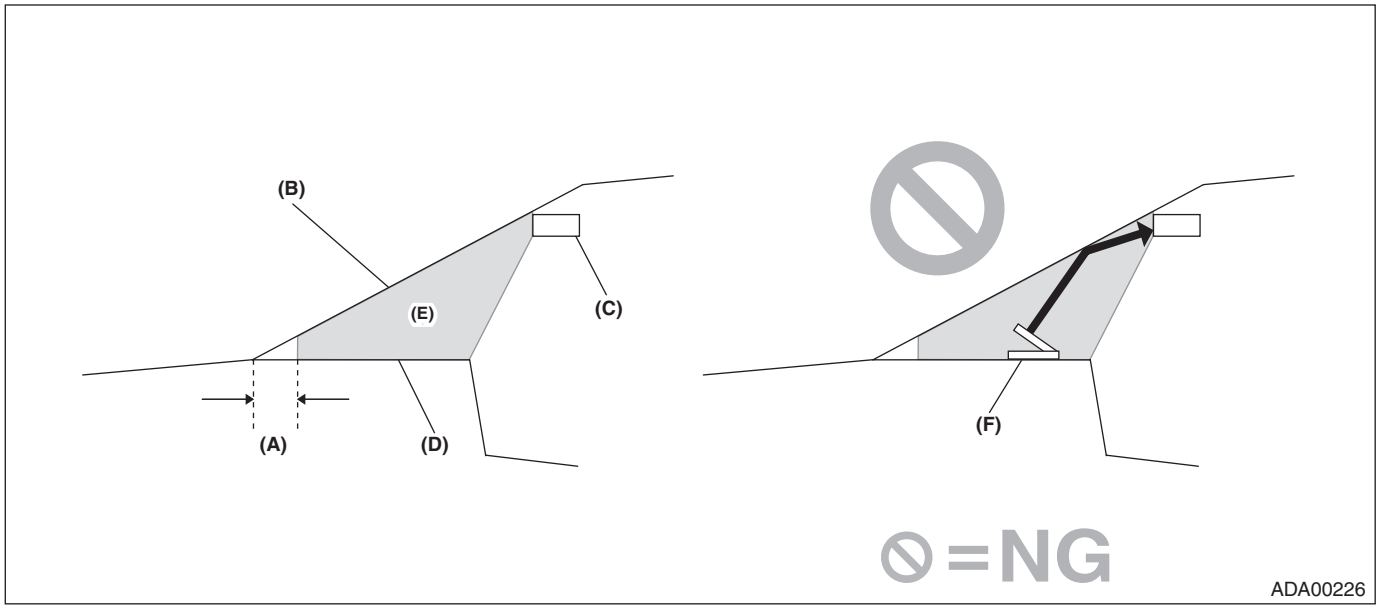
Standard:



There must be no oil film, dirt, scratch or fogging that obstructs the forward visibility of the stereo camera.

Do not stick or attach the aftermarket parts on the prohibited area (D) shown in the figure below.

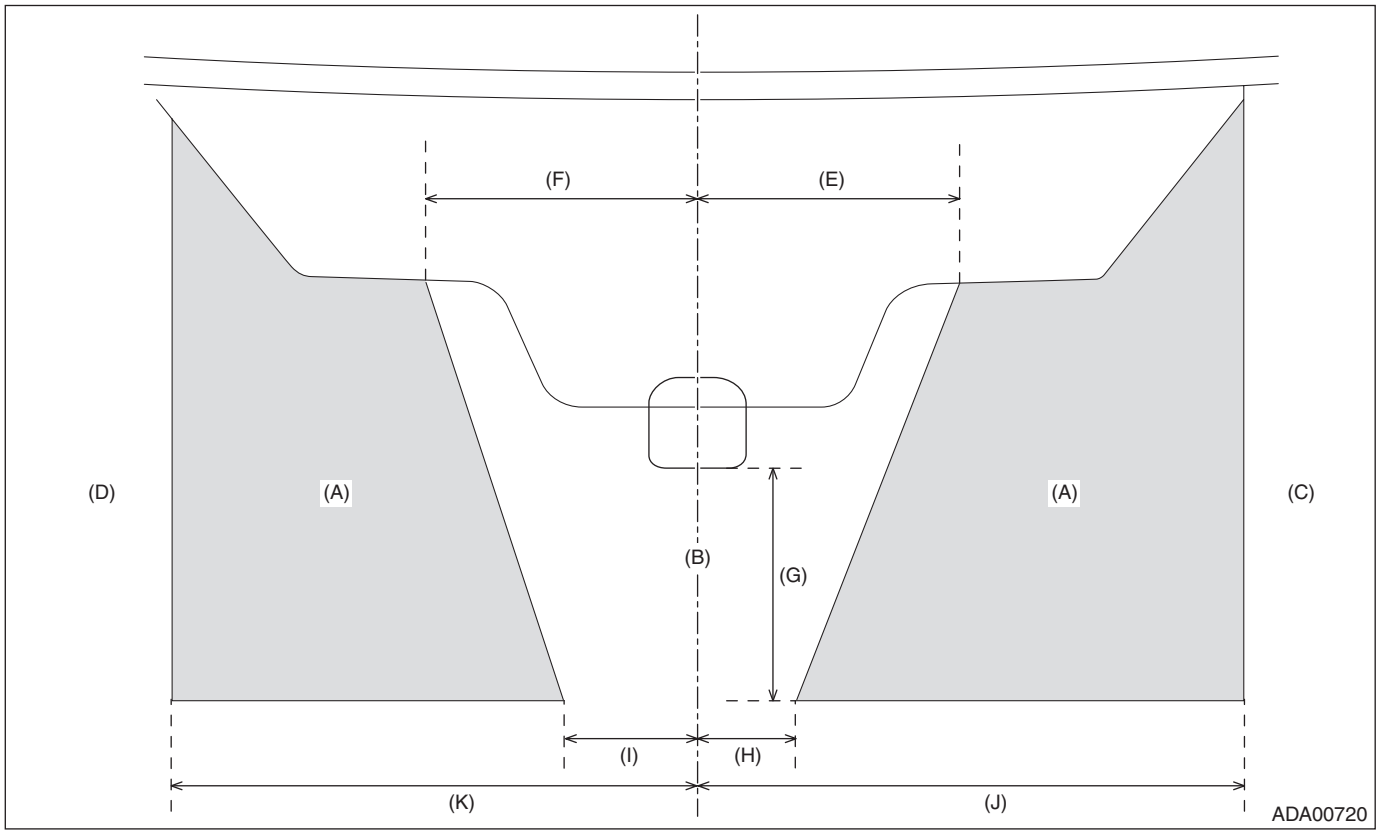
Even outside the prohibited area, if the abnormal operation occurs due to the reflection of the light or the reflection on the glass, change the adhering position or installation position.



- ***Application of stickers or antennas, installation of wide-type mirror***
  - ***This will affect the visibility of the stereo camera, causing the function not to operate correctly.***
- ***Placement of navigation unit, ETC or other things on the dashboard***
  - ***These things will be reflected on the windshield glass, affecting the recognition of the stereo camera, thus causing the function not to operate correctly.***

- Front view

(A) 300 mm (11.8 in)
(B) 120 mm (4.7 in)
(C) Ceramic area
(D) Prohibited area
(E) 200 mm (7.8 in)

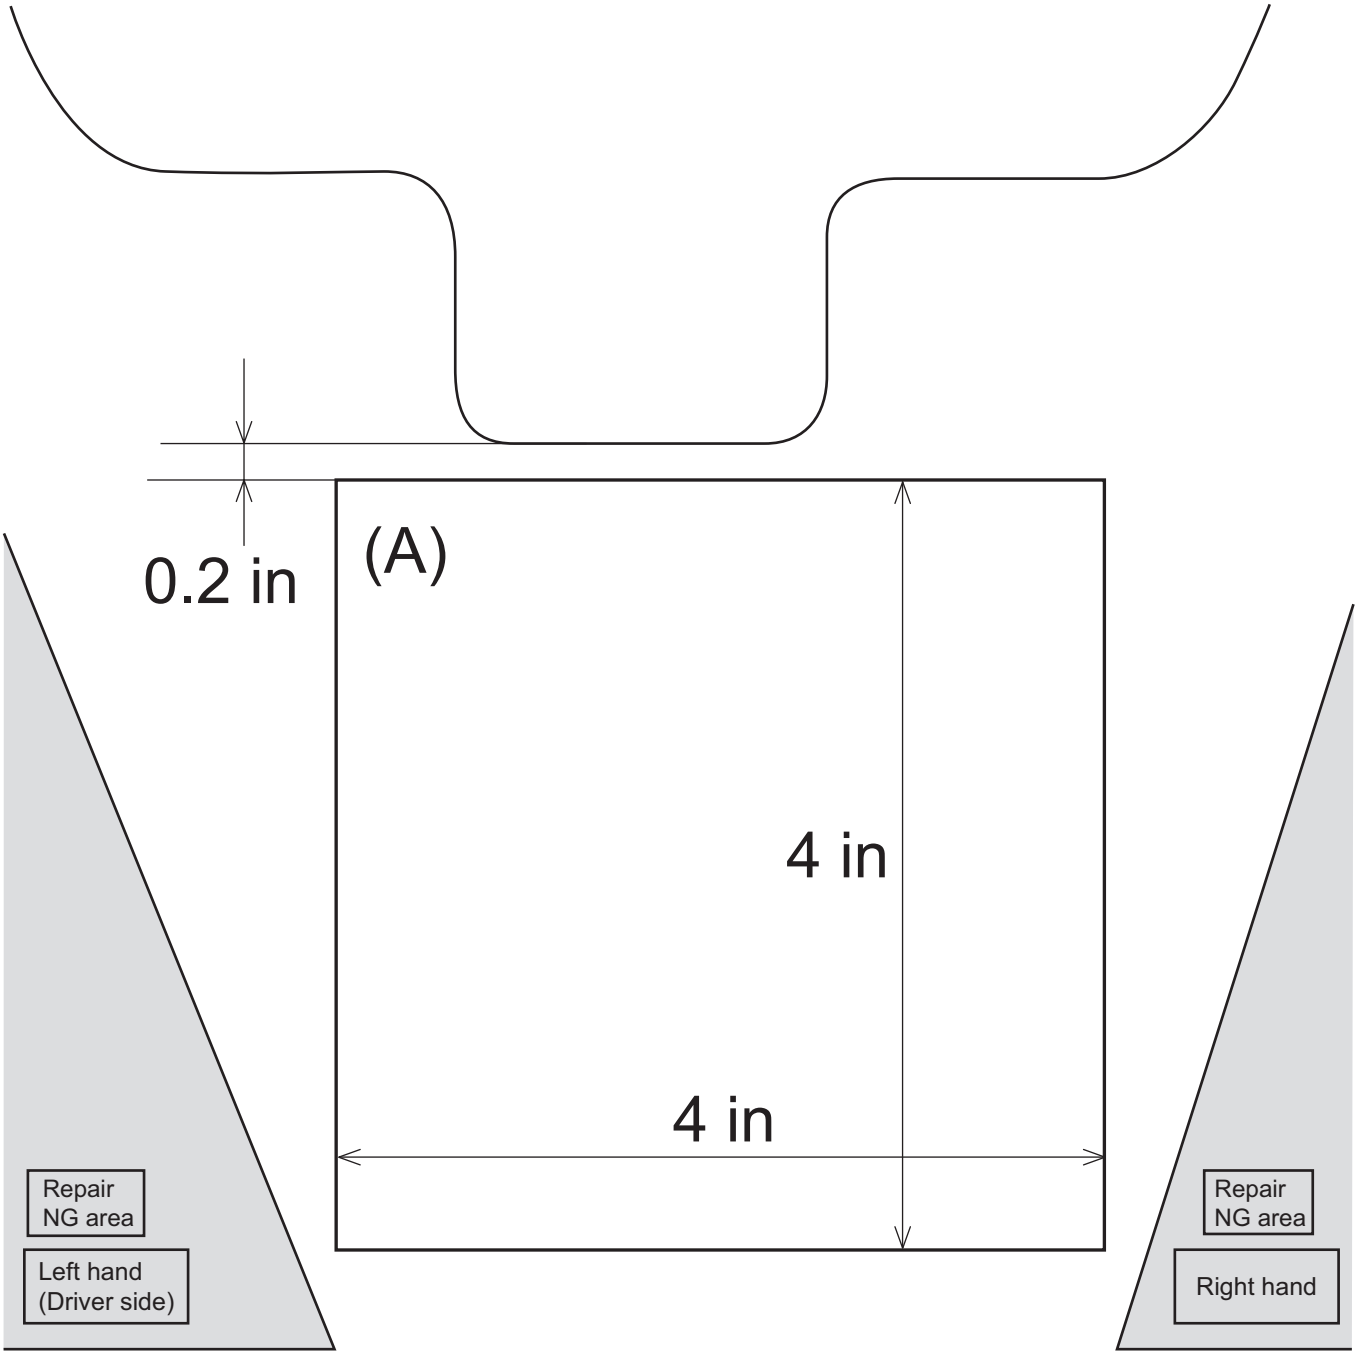


- Side view

(A) 120 mm (4.7 in)
(B) Windshield glass
(C) Stereo camera cover
(D) Dashboard
(E) Prohibited area
(F) External monitor etc.

NOTE:
- Clean the windshield glass if dirt or fogging is found on the glass. Repair or replace the glass if damage is found.
  – When cleaning the inner side of the windshield glass, be careful not to touch the lens of the stereo camera. Take care so that the glass cleaner is not applied to the lens. (As with the removal procedure of the stereo camera, cover the opening of camera cover with a copy paper or similar dust-free paper before the procedure, in order to avoid any interference to the camera lens, and tape the paper while being careful not to let the adhesive surface contact the glass surface. Be sure to remove the paper after the procedure. <Ref. to ES-8, REMOVAL, Stereo Camera.>
  – When replacing the windshield glass, be sure to replace the part for the EyeSight.
  – If the glass is removed or replaced, always perform the stereo camera adjustment and inspection.
- If the damage is found in the glass repair prohibited area shown in the figure below, replace the glass.

– Damage in the prohibited area can affect the recognition of the stereo camera even if it is repaired, and thereby EyeSight function may not operate properly.



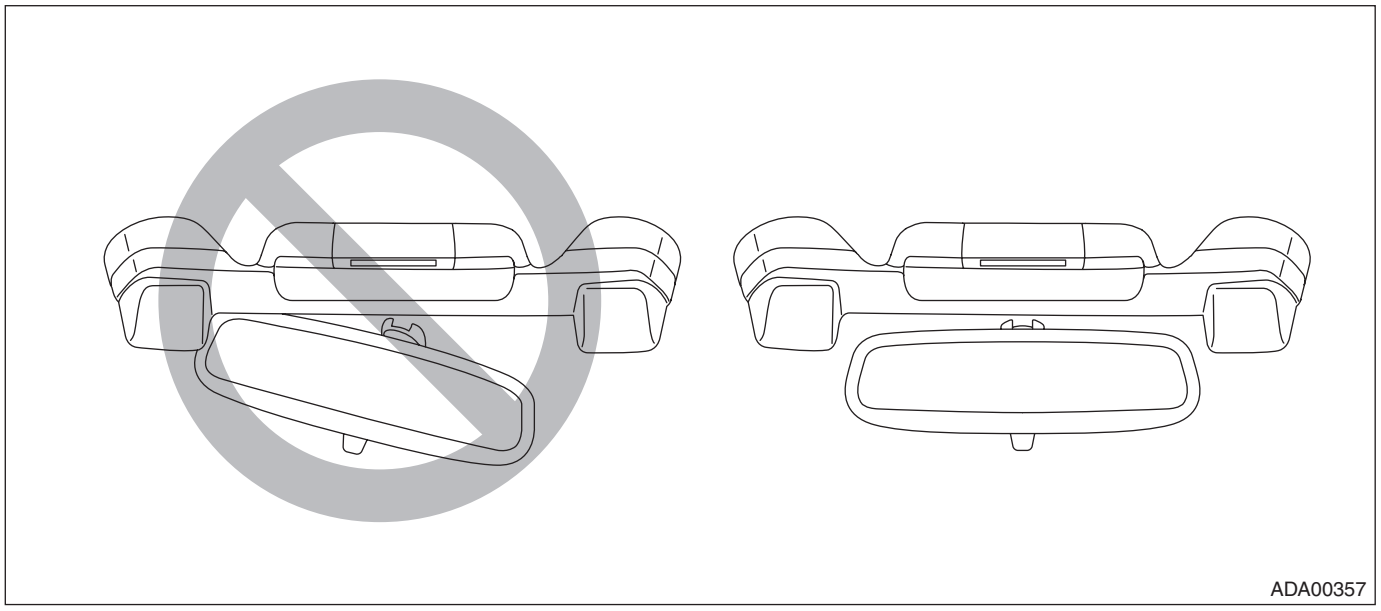
(A)	Glass repair prohibited area	(E)	130 mm (5.1 in)	(I)	65 mm (2.6 in)
(B)	Glass repairable area	(F)	135 mm (5.3 in)	(J)	280 mm (11.0 in)
(C)	Glass repairable area (Driver's side)	(G)	120 mm (4.7 in)	(K)	280 mm (11.0 in)
(D)	Glass repairable area (Passenger's side)	(H)	40 mm (1.6 in)		

- Install the ETC transponder inside the area (A) shown in the figure below.

Before installing, attach a full-scale copy of the following figure onto the windshield glass surface to install the parts to correct positions.

– Align the position with respect to the end of the ceramic area.
– Prepare a full-scale copy in which the reference dimension on the upper part of the figure actually has 4 inches long.
– Only the transponder with a thickness of 1.5 inches or less can be used.

ADA10018



• Relocate any aftermarket parts out of the prohibited area.
• Do not touch the lens on the stereo camera. Do not clean the lens of the stereo camera. (If the lens surface is touched, the stereo camera must be replaced as it is impossible to clean the lens surface for ensuring quality.)

3. REAR VIEW MIRROR

Check the rear view mirror condition.

Standard:

The rear view mirror other than genuine parts shall not be used. (Wide mirrors shall not be used)
The visibility of the stereo camera shall not be blocked.
— This will affect the visibility of the stereo camera, causing the system not to operate correctly.

4. FRONT WIPER

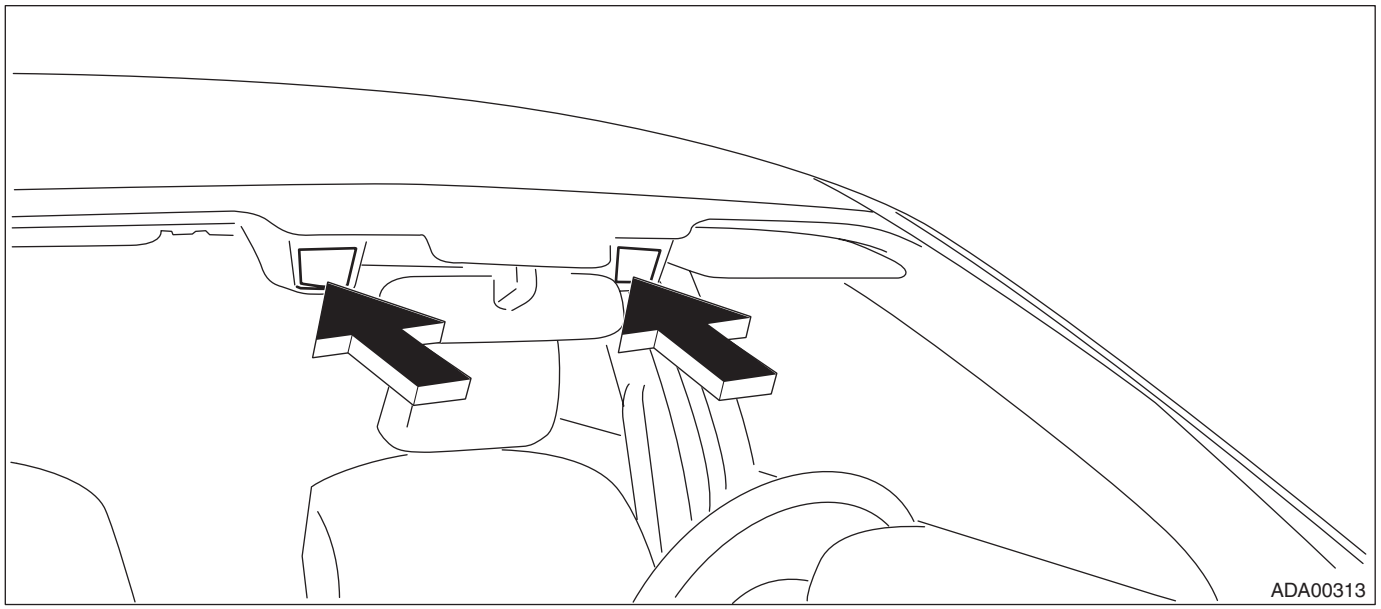
Check the wiping condition of windshield glass.

Standard:

Use Subaru genuine part only for wiper blade body and blade rubber.
— Using the part other than genuine part will affect the recognition of the stereo camera, which may cause the function not to operate correctly.
Do not continue using the damaged blade rubber.
— The glass may be damaged. If the wiping performance decreases, or if the distinct streak is found, replace it as soon as possible.

NOTE:
Clean the windshield glass if there is an oil film or any dirt on the surface.

5. TIRE INFLATION PRESSURE



Check the tire air pressure.

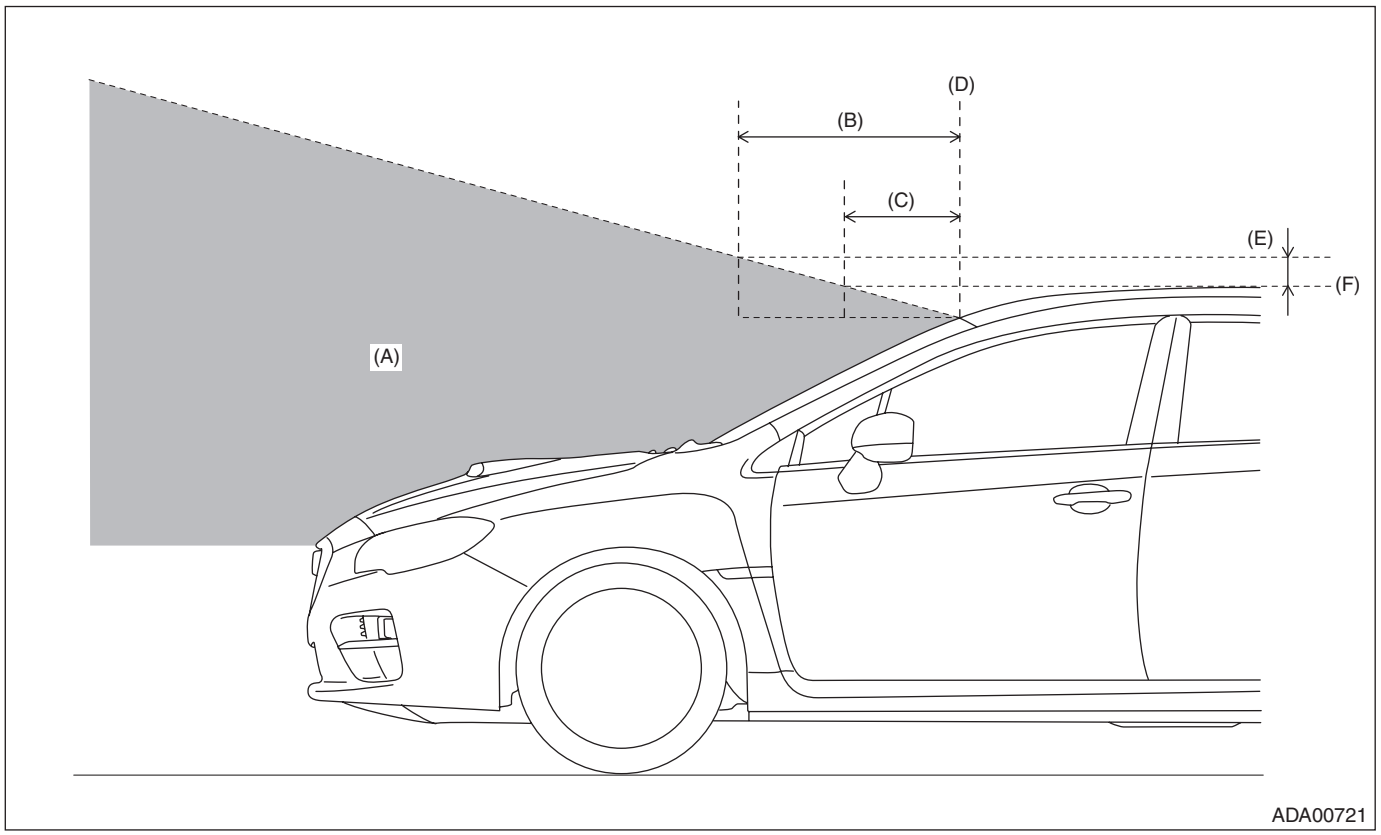
Standard:

Adjust to the specified air pressure. <Ref. to WT-2, SPECIFICATION, General Description.>
Do not install worn tire or tires with excessive wear difference.
Install tires with specified size.

6. STEREO CAMERA

Through the windshield glass, check if there are any fingerprints or faults such as crack found on lens filters at the left and right camera lenses of the stereo camera.

NOTE:

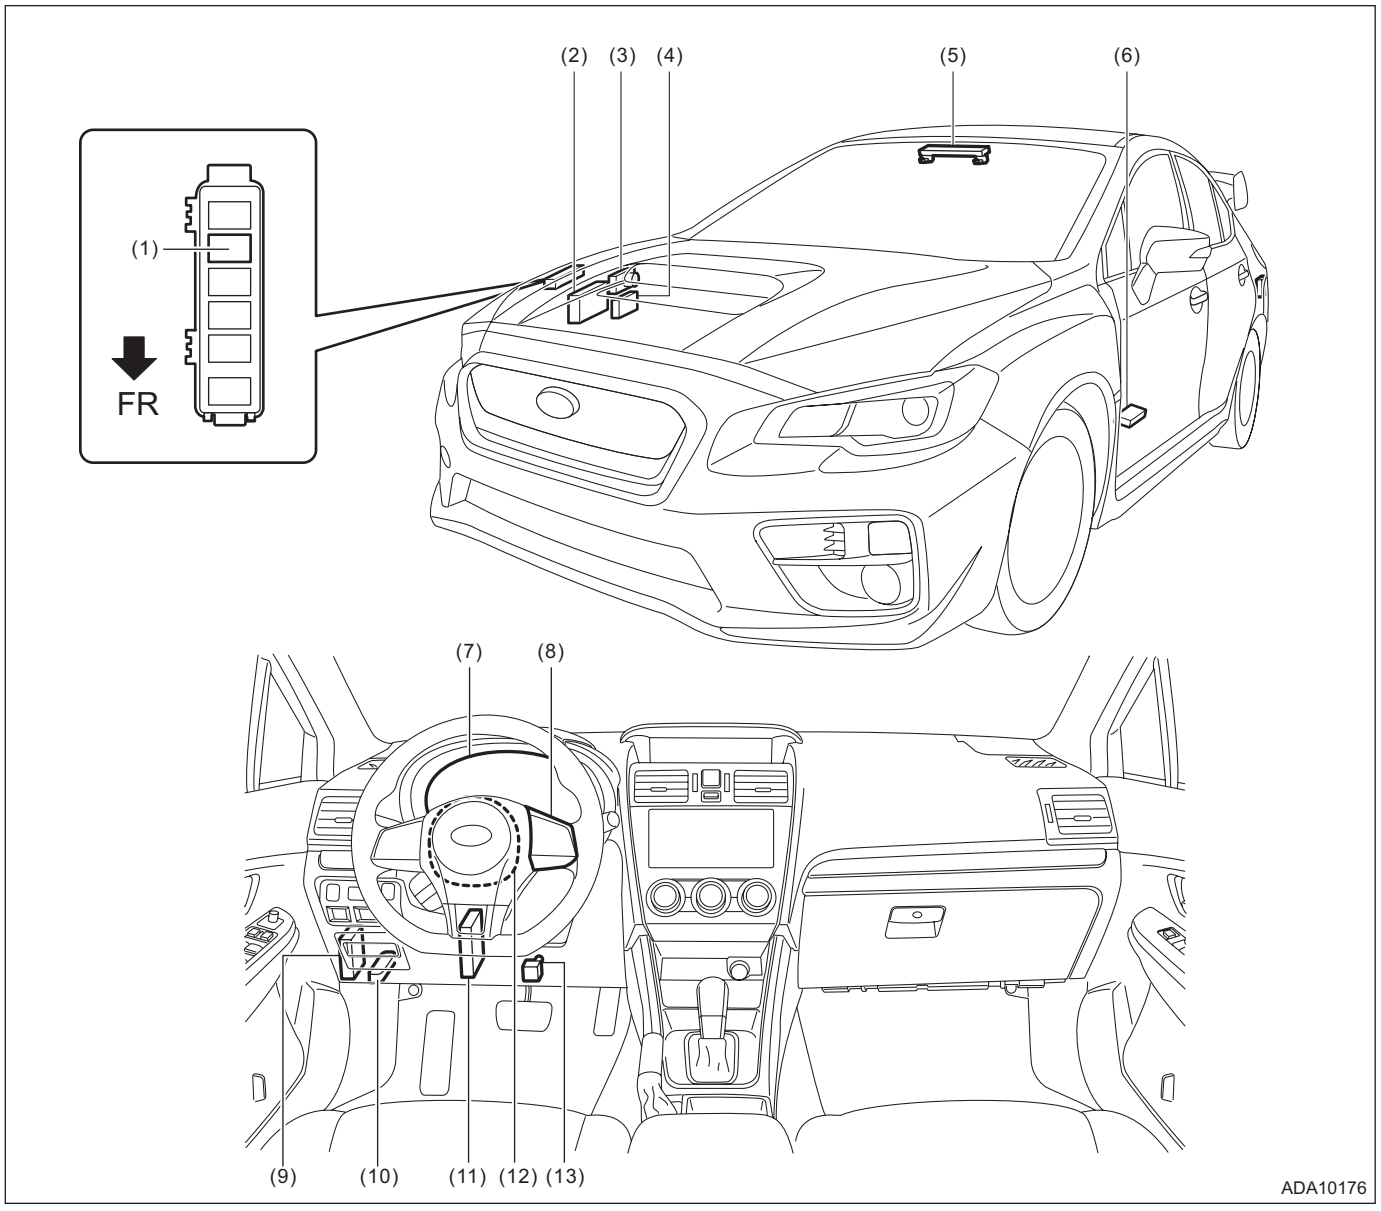


- Do not remove the camera or camera cover to check the lens.
- When spider's web or insects are found within the camera view or inside the lens hood, remove it by blowing air etc. while taking care not to touch the lens surface. Do not use a hand or a cloth.
- Thin and uniform adhesion of dust, dirt or tobacco stains to the lens filter surface resulting from normal use will not be an obstacle. Do not attempt to clean in such cases.
- If an oil film such as a fingerprint or any excessive dirt adheres, or if the lens filter cracks, replace the stereo camera. <Ref. to ES-8, Stereo Camera.>
- If the fingerprint adhesions or cracks occur on the lens filter, the following failures may arise.
  – The vehicle may not be able to detect the preceding vehicle or obstacle due to the effects of the headlight of the oncoming vehicle.
  – The vehicle may not be able to detect the preceding vehicle or obstacle due to the effects of the brake light operation of the preceding vehicle.
  – All the functions of the EyeSight may be suspended by the self-diagnosis function equipped with the camera.
  – When the lens filter is broken, the vehicle may not be able to detect the preceding vehicle or obstacle all day and all night.
- Do not clean the lens filter with any cleaner. It is quite difficult to uniformly clean both of the right and left lenses, and such an attempt just ends up spreading dirt and will cause problems as same as those from oil film.

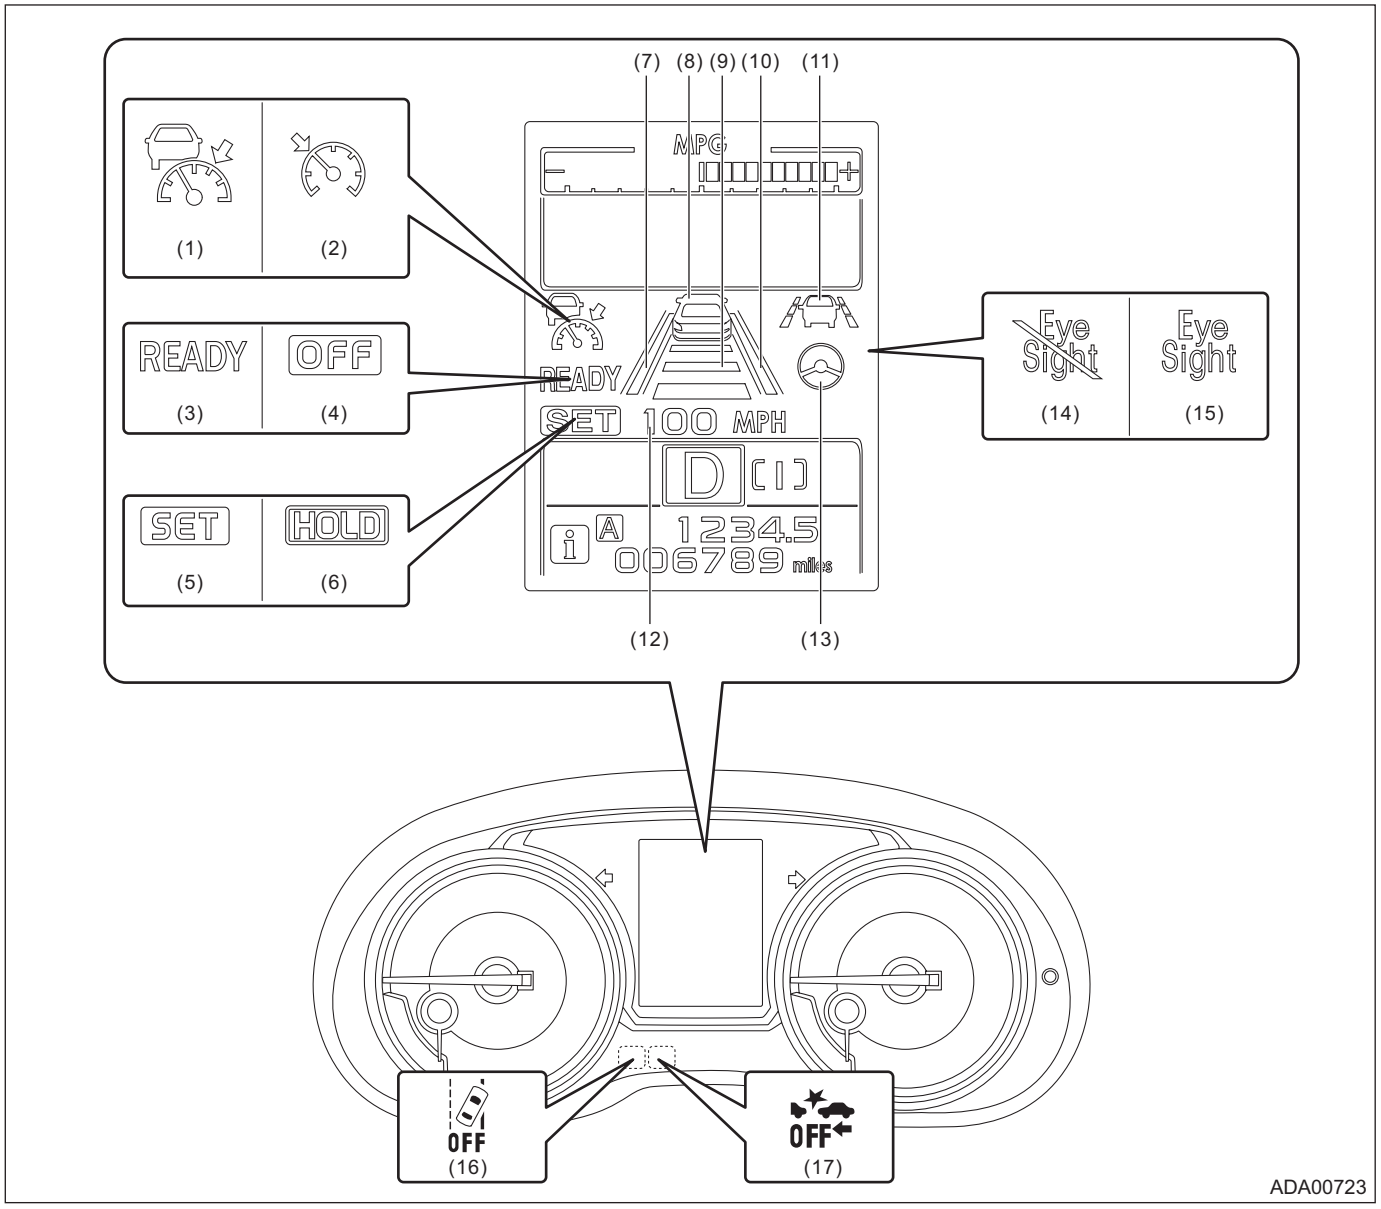
7. LOAD ON THE ROOF

Check that load on the roof is not sticking out to the front of the stereo camera.

Standard:

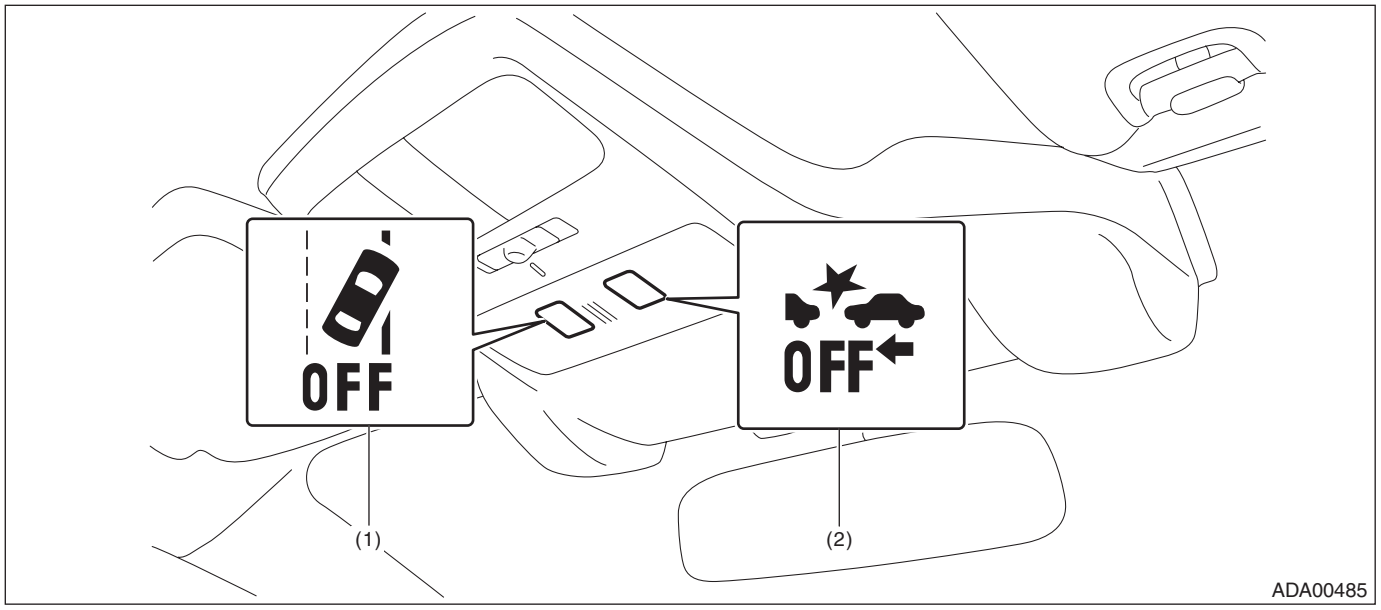


The load on the roof is placed outside the prohibited area (A) shown in the figure below.

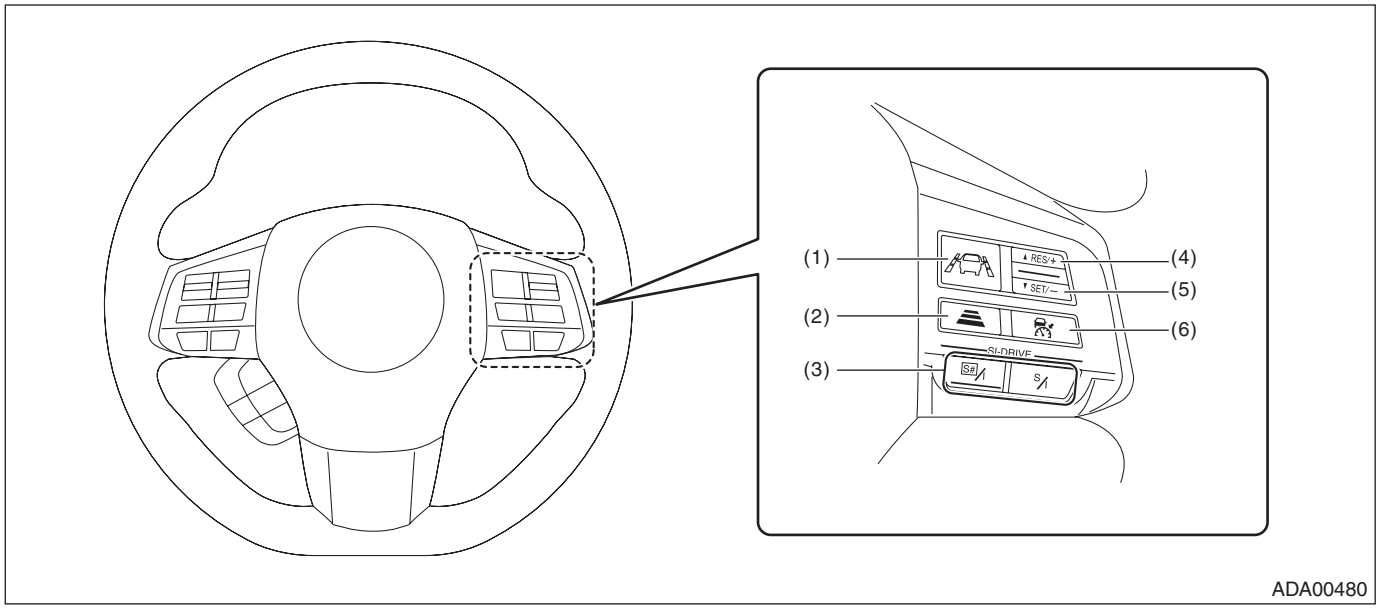


(A) Prohibited area
(B) 870 mm (34.3 in)
(C) 500 mm (19.7 in)
(D) Windshield glass upper end
(E) 100 mm (3.9 in)
(F) Highest surface of the roof

4. Electrical Component Location



A: LOCATION



(1) Brake light relay
(2) ECM
(3) VDC CM
(4) Power steering CM
(5) Stereo camera
(6) RAB CM
(7) Combination meter
(8) EyeSight steering switch

		ALL OFF → lane keep switch ON	0.0 V — 2.5 V

2. ENGINE CONTROL MODULE (ECM)

For details on the input/output signals for the engine control module, refer to ENGINE (DIAGNOSTICS). <Ref. to EN(w/o STI)(diag)-21, ELECTRICAL SPECIFICATION, Engine Control Module (ECM) I/O Signal.>

3. VDC CONTROL MODULE (VDCCM)

For details on the input/output signals for VDC control module, refer to VDC (DIAGNOSTICS). <Ref. to VDC(diag)-17, ELECTRICAL SPECIFICATION, Control Module I/O Signal.>

4. TRANSMISSION CONTROL MODULE (TCM)

For details on the input/output signals for the transmission control module, refer to AUTOMATIC TRANSMISSION (DIAGNOSTICS). <Ref. to CVT(diag)-10, Transmission Control Module (TCM) I/O Signal.>

5. BODY INTEGRATED UNIT

Refer to the BODY CONTROL SYSTEM (DIAGNOSTICS) for the I/O Signal of the body integrated unit. <Ref. to BC(diag)-6, ELECTRICAL SPECIFICATION, Control Module I/O Signal.>

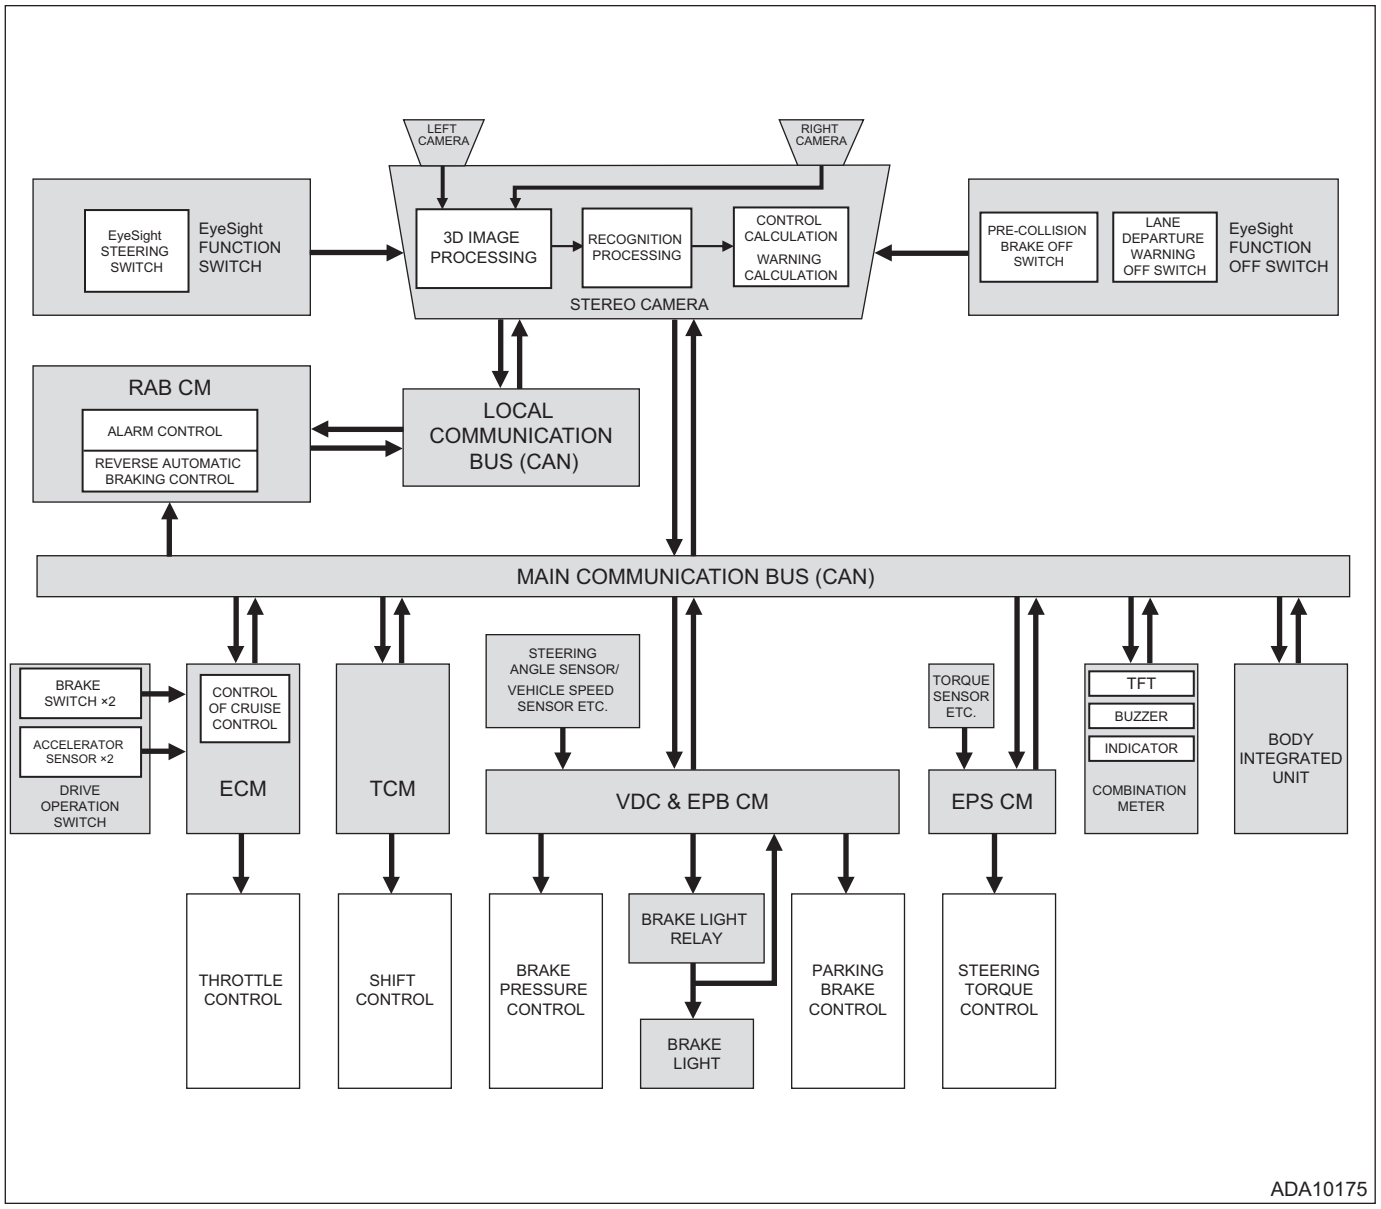
6. COMBINATION METER

For details on the input/output signals for the combination meter, refer to INSTRUMENTATION/DRIVER INFO (DIAGNOSTICS). <Ref. to IDI(diag)-7, ELECTRICAL SPECIFICATION, Control Module I/O Signal.>

7. POWER STEERING CM

Refer to the POWER ASSISTED SYSTEM (POWER STEERING) (DIAGNOSTICS) for the I/O signal of the power steering CM. <Ref. to PS(diag)-9, ELECTRICAL SPECIFICATION, Control Module I/O Signal.>

8. RAB CM



For details on the input/output signals for RAB CM, refer to RAB (DIAGNOSTICS). <Ref. to RAB(diag)-7, ELECTRICAL SPECIFICATION, Control Module I/O Signal.>

B: WIRING DIAGRAM

Refer to “EyeSight System” in the wiring diagram. <Ref. to WI-222, EyeSight System.>

C: SYSTEM BLOCK DIAGRAM

Main signals used between stereo camera and relevant CM

6. Subaru Select Monitor

A: OPERATION

1. GENERAL DESCRIPTION

For on-board diagnosis function of the EyeSight, use the Subaru Select Monitor.
The on-board diagnosis function operates in three categories, which are used depending on the type of problems.
1) Diagnosis with diagnostic trouble code (DTC):
When the electrical failure occurs in the EyeSight, DTC is detected from the stereo camera. If the DTC is detected, the relevant DTC is displayed by illuminating or blinking the EyeSight warning light. To check the details concerning the DTC, use the Subaru Select Monitor.
2) Diagnosis with cancel code and lane keep assist code:
(1) This category of diagnosis requires actual driving of the vehicle in order to determine the cause in such a case when the set speed is cancelled during cruise control driving or the control is cancelled during active lane keep driving although any cancel condition is not entered.
(2) With ECM cancel code and stereo camera ACC cancel code, cancel condition (Code No.) is stored when detected during cruise control driving. With lane keep assist code of stereo camera, cancel condition (Code No.) is stored if active lane keeping does not operate or if control cancel occurs during active lane keep driving.

CAUTION:
• With ECM cancel code, not only the cruise control "cancel" occurred (although the driver does not input the "cancel" operation), but also the "cancel" condition input by the driver is stored.
• The latest memory contents of the ECM cancel code (latest code) is cleared when the ignition switch is turned to OFF. However, memory contents set by the diagnosis of faulty switches related to the system and cruise control will remain as trouble history (memory code) after the ignition switch is turned to OFF.
3) Real-time diagnosis:
Real-time diagnosis function is used to determine whether or not the input signal system is in good order, according to signal emitted from switches, sensors, etc.
(1) Vehicle cannot be driven at cruise speed when the problem occurs in the cruise control system or relevant circuits.
(2) Monitor the signal conditions from switches and sensors.

2. BASIC OPERATION

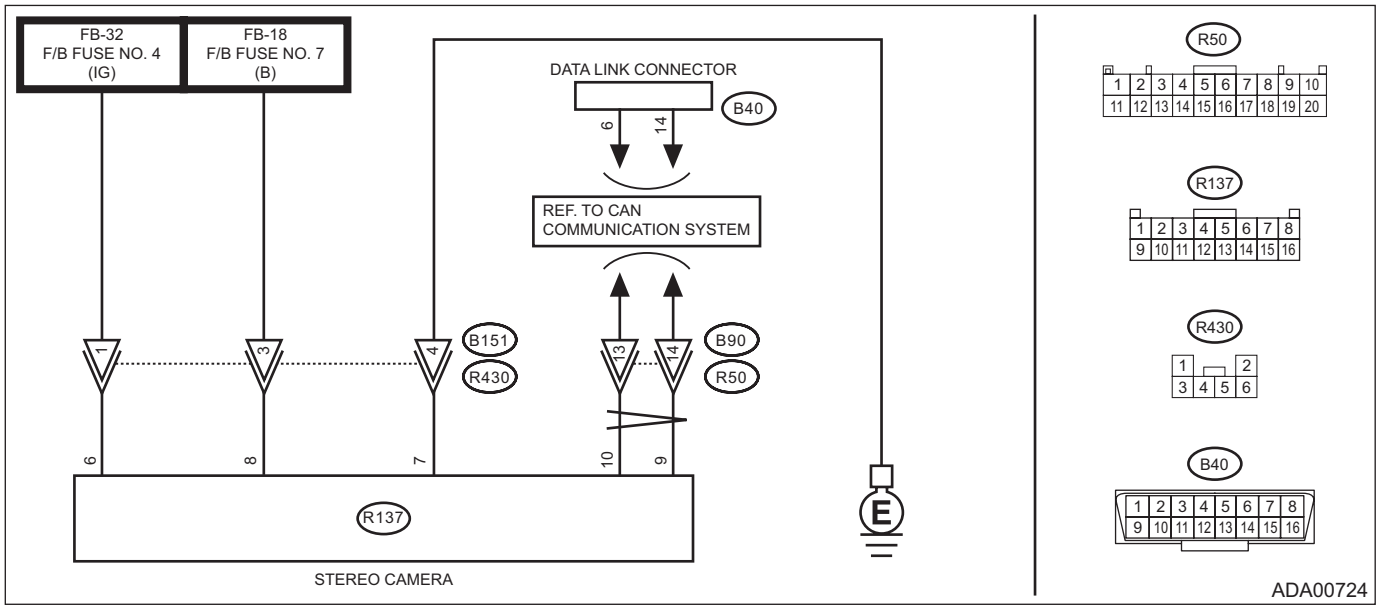
For operation procedures, refer to "Application help".

B: INSPECTION

1. COMMUNICATION FOR INITIALIZING IMPOSSIBLE

- Communication error with stereo camera

DETECTING CONDITION:



- Defective harness connector
- Power supply circuit malfunction
- Defective stereo camera
- Defective CAN system
- Defective Subaru Select Monitor

TROUBLE SYMPTOM:

- EyeSight warning light blinks.

WIRING DIAGRAM:

EyeSight System <Ref. to WI-222, WIRING DIAGRAM, EyeSight System.>

Step		Check	Yes	No
1	**CHECK IGNITION SWITCH.**	Is the ignition switch ON?	Go to step **2**.	Turn the ignition switch to ON, and select «EyeSight» using the Subaru Select Monitor.
2	**CHECK BATTERY.** 1) Turn the ignition switch to OFF. 2) Measure the battery voltage.	Is the voltage 10 V or more?	Go to step **3**.	Charge or replace the battery.
3	**CHECK BATTERY TERMINAL.**	Is the battery terminal contact proper?	Go to step **4**.	Connect the battery terminal securely or replace it.
4	**CHECK SUBARU SELECT MONITOR COMMUNICATION.** 1) Turn the ignition switch to ON. 2) Using the Subaru Select Monitor, check whether the communication can be executed normally.	Is the communication between Subaru Select Monitor and body integrated unit normal?	Go to step **5**.	Check the connection of the Subaru Select Monitor, and perform communication with the body integrated unit again.
5	**CHECK LAN SYSTEM.** Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **6**.	Perform the inspection according to the diagnosis for LAN system.

	Step	Check	Yes	No
6	**CHECK HARNESS CONNECTOR BETWEEN STEREO CAMERA AND DATA LINK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the stereo camera connector. 3) Measure the resistance between the stereo camera and the data link connector. ***Connector & terminal*** ***(R137) No. 10 — (B40) No. 6:*** ***(R137) No. 9 — (B40) No. 14:***	Is the resistance less than 10 Ω?	Go to step **7**.	Repair or replace the harness and connectors between the stereo camera and data link connector.
7	**CHECK POWER SUPPLY CIRCUIT.** 1) Turn the ignition switch to ON. 2) Measure the voltage between stereo camera and chassis ground. ***Connector & terminal*** ***(R137) No. 6 (+) — Chassis ground (–):***	Is the voltage 10 V or more?	Go to step **8**.	Check the power supply system circuit, and if any fault is found, repair the defective parts or replace the harness.
8	**CHECK GROUND CIRCUIT.** 1) Turn the ignition switch to OFF, then disconnect the ground cable from battery. 2) Measure the resistance between harness connector of stereo camera and chassis ground. ***Connector & terminal*** ***(R137) No. 7 — Chassis ground:***	Is the resistance less than 10 Ω?	Go to step **9**.	Check the harness from stereo camera to chassis ground.
9	**CHECK CONNECTOR.**	Is there poor contact of stereo camera connector?	Repair the connector, or replace harness.	Replace the stereo camera. <Ref. to ES-8, REMOVAL, Stereo Camera.>

7. Read Current Data

A: OPERATION

1. STEREO CAMERA

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «EyeSight» and select «Enter».
5) On «Select Function» display, select «Data Monitor».

NOTE:
For detailed operation procedures, refer to “Application help”.

Steering Assistance Operation Status	Lane keep control operation status	—	• Normal • Assist stop • Limited Assist
EyeSight Recognition Status (EPS)	EyeSight recognition status signal	—	• Not Detect • Detect
Absolute Steering Angle Detection	Absolute angle detection signal (not used)	—	• No detection • detection
Steering Angle Sensor Signal	Steering angle sensor signal	deg	—
Yaw Rate Value (Right -) (Left +)	Yaw rate value signal	rad/sec	—
Lateral G Sensor Value (Right -) (Left +)	Lateral acceleration signal	m/s^2	—
Steering Control Torque Target	Steering control instruction signal	Nm	—
Additional Steering Torque(Active Lane Keep System)	Additional steering torque signal (lane keep)	Nm	—
EPS Motor Operation Current	Motor operation current value	A	—
EPS Torque	Torque sensor main value	Nm	—
EPS Torque (Detailed)	Torque sensor value (resolution improved)	Nm	—
EPS Motor Operation Current (Steering Support High Speed)	Motor operation current value (high speed steering support)	Arms	—
Target Current Value (EPS)	Final target current value	Arms	—
EPS Motor Absolute Angle	Motor absolute angle	deg	—
Driver Throttle Input Override Control	Instruction signal of AT false start prevention control Or instruction signal of AT false start (reverse) prevention control	—	• OFF • ON
Adaptive Cruise Control Torque Down	Torque down prohibition signal of stereo camera	—	• ON • OFF
Initial Inspection Distance Accuracy Rate	Accuracy rate of initial inspection distance	%	—
Initial inspection distance	Initial inspection distance	—	—
Initial Optical Axis (X-Axis)	Initial optical axis (X-axis)	pix	—
Initial Optical Axis (X-Axis2)	Initial optical axis (X-axis 2)	pix	—
Initial Optical Axis (Y-Axis)	Initial optical axis (Y-axis)	pix	—

Display	Content	Unit of measure	Reference
Initial Left Image Rotation Deviation Correction Value	Initial left image, rotation deviation correction value	—	—
Initial Left Image Vertical Deviation Correction Value	Initial left image, vertical deviation correction value	—	—
Initial Right Image Rotation Deviation Correction Value	Initial right image, rotation deviation correction value	—	—
Initial Distance Correction Value	Initial distance correction value	—	—
Initial Invalid Distance Data Count	Number of initial invalid distance data	—	—
Initial Other Inspection	Another initial inspection	—	—
Initial Error Code	Initial error code	—	—
DC-Ratio	Accuracy rate of inspection distance	%	—
Distance	Inspection distance	—	—
Optical Axis (X-Axis)	Optical axis (X-axis)	pix	—
Optical Axis (X-Axis2)	Optical axis (X-axis 2)	pix	—
Optical Axis (Y-Axis)	Optical axis (Y-axis)	pix	—
Left Image Rotation Deviation Correction Value	Left image, rotation deviation correction value	—	—
Left Image Vertical Deviation Correction Value	Left image, vertical deviation correction value	—	—
Right Image Rotation Deviation Correction Value	Right image, rotation deviation correction value	—	—
Distance Correction Value	Distance correction value	—	—
Invalid Distance Data Count	Number of invalid distance data	—	—
Other Inspection	Other inspection	—	—
Error Code	Error code detailed information	—	—
Camera Battery Open Status (+B)	Display of stereo camera battery (+B circuit) status	—	• Connect • Disconnected
Image ON/OFF status	ON/OFF status of present image sensor	—	• OFF • ON
Camera Temperature (Current)	Current temperature display of stereo camera internal circuit	°C	—
Camera temperature, operation status	Camera temperature and operation status	—	• Normal • High Temp. • Low Temp.
Camera Temperature (Previous Maximum Value)	Display of stereo camera internal circuit temperature (past MAX value)	°C	—
Ignition SW ON Count When Camera Temperature (Previous Maximum Value)	Ignition switch ON count when stereo camera internal circuit temperature is displayed (past MAX value)	times	—
Camera Temperature (Previous Minimum Value)	Display of stereo camera internal circuit temperature (past MIN value)	°C	—
Ignition SW ON Count When Camera Temperature (Previous Minimum Value)	Ignition switch ON count when stereo camera internal circuit temperature is displayed (past MIN value)	times	—
EyeSight Temporary 0 Continuation Count	Continuation count of EyeSight temporary stop 0	times	—
EyeSight Temporary 1 Continuation Count	Continuation count of EyeSight temporary stop 1	times	—
EyeSight Temporary 2 Continuation Count	Continuation count of EyeSight temporary stop 2	times	—
EyeSight Temporary 3 Continuation Count	Continuation count of EyeSight temporary stop 3	times	—

Display	Content	Unit of measure	Reference
EyeSight Temporary 4 Continuation Count	Continuation count of EyeSight temporary stop 4	times	—
EyeSight Temporary 5 Continuation Count	Continuation count of EyeSight temporary stop 5	times	—
EyeSight Temporary 6 Continuation Count	Continuation count of EyeSight temporary stop 6	times	—
EyeSight Temporary 7 Continuation Count	Continuation count of EyeSight temporary stop 7	times	—
EyeSight HALT Code	EyeSight halt code signal	—	• OFF • E1(No Camera View) • E2(Out of Temp. Range) • E3(Other)
Ambient Air Temperature(Indication)	Ambient air temperature signal	°C	—
Ambient Air Temperature(Control)	Outside temperature for control signal	°C	—
Head lamp : small	Headlight small signal status	—	• OFF • ON
Headlight SW (LO)	Headlight LO switch operation status	—	• OFF • ON
Head Lamp High Beam	Headlight Hi beam signal status	—	• OFF • ON
Wiper SW (Front)	Front wiper switch operation status	—	• OFF • ON
VDC OFF SW	VDC OFF signal	—	• OFF • ON
VDC "OFF" Indicator Status	VDC OFF indicator status	—	• OFF • ON
EyeSight Input Control Suspended Status (EPS)	Overheat protection limit signal	—	• No detection • detection
Camera Failure Real-Time Check (At The Time of Failure)	Camera failure real-time information at the time of failure	—	—
Camera Temperature (At The Time of Failure)	Camera temperature sensor at the time of failure	°C	—
Image ON/OFF Status/Sensor Ready Status (At The Time of Failure)	Image ON/OFF status at the time of failure	—	• OFF • ON
Adaptive Cruise Control Failure (EyeSight → Combination Meter)	Stereo camera failure signal for combination meter	—	• Normal • Abnormal
VDC Sensor Failure	VDC sensor failure signal	—	• Normal • Abnormal
ABS System Failure	ABS system failure signal	—	• Normal • Abnormal
Vehicle Speed Sensor Failure	Vehicle speed sensor failure signal	—	• Normal • Abnormal
Adaptive Cruise Control Failure (EyeSight → VDC)	Failure signal of stereo camera to VDC control module	—	• Normal • Abnormal
EyeSight Reception (VDC)	Failure signal of stereo camera	—	• Not yet received • Receive
EPB Error Status	Electronic parking brake error information signal	—	• Normal • Stroke Too Short • Urgent Release • Pulling Power Abnormal

Display	Content	Unit of measure	Reference
Hill Start Assist Operation Status	Hill start assist operation status signal	—	• Not Operating • Operate
EyeSight Failure	EyeSight failure signal	—	• Normal • Abnormal
Engine Failure	Engine failure signal	—	• Normal • Abnormal
Transmission Failure	TCM failure signal	—	• Normal • Abnormal
EyeSight Failure (EPS → EyeSight)	Failure signal for EyeSight (EPS)	—	• Normal • Abnormal
Adaptive Cruise Control Failure (EyeSight → EPS)	Stereo camera failure signal for EPS control module	—	• Normal • Abnormal
ETC Failure	Electronic throttle control failure signal	—	• Normal • Abnormal
EEPROM Failure	Failure signal of combination meter	—	• Normal • Abnormal
Brake Lamp SW Fail Status	Brake light switch failure signal	—	• Normal • Abnormal
Brake Lamp Relay Drive	Brake light relay drive status signal	—	• Not Operating • Operating
EyeSight Communication Error (VDC)	Stereo camera communication failure signal	—	• Normal • Abnormal
Judgment of Lost Communication with Adaptive Cruise Control ECM CAN	No-receive signal of EyeSight CAN data	—	• Normal • Not Receive
EyeSight Received Data (ECM)	NG signal of stereo camera data	—	• Normal • Abnormal
Steering Angle Sensor Status	Steering angle sensor status	—	• Normal • Abnormal
Steering Angle Sensor Error Code	Steering angle sensor error code signal	—	• Normal • EEPROM Abnormal • IG Voltage Drop • Counter Overflow • ROM Trouble • RAM Trouble • Magnetometric Sensor Trouble
EyeSight Customization Change Request (Combination Meter → EyeSight)	EyeSight customization change request signal	—	• OFF • ON
EyeSight Customization Reset Request (Combination Meter → EyeSight)	EyeSight customization reset request signal	—	• OFF • ON
Target Gear Position	Target gear position signal	—	• P • R • Auto Neutral • 6 • 5 • 4 • 3 • 2 • 1 • N

Display	Content	Unit of measure	Reference
Transmission Shift Control Mode	TCM shift control mode signal	—	• Position Fixed Mode • Gear Fixed Mode • Position Fixed Temporary • Gear Fixed Temporary • M Position • D Range • ” — ” display
Shift Position	Shift position information	—	• Error • P • R • N • D • D-S • 3 • 2 • 1
CVT 8-speed Mode Control	CVT multi-stage speed control signal when EyeSight operates	—	• Not Operating • Operate
Lock Up Status	Lock up information	—	• Converter • Slip Lock Up • Lock Up
Brake Lamp Status	Brake light state signal	—	• OFF • ON
Brake Vectoring Control Operation	Active torque vectoring control operation status	—	• Not Operating • Operate
EyeSight Specification	EyeSight judgment signal	—	• No • Yes
Vehicle Height	Vehicle height information	—	• Unclear • OBK • Standard
Fuel Type	Fuel type	—	• Gasoline • Diesel
Engine Displacement	Engine displacement	—	• 1500 cc • 2000 cc • 2500 cc • 3000 cc • 3600 cc • 1600 cc
Camshaft Type	Engine type	—	• SOHC • DOHC
Number of Cylinders	Number of cylinder for engine	—	• 4 Cylinder • 6 Cylinder
Turbo	Presence or absence of turbo	—	• Turbo • NA
Vehicle Type	Vehicle type information signal	—	• Impreza Type • Forester Type • Exiga Type • Legacy/Outback Type • WRX Type

Display	Content	Unit of measure	Reference
Destination Code	Destination code signal	—	• Japan • U.S(U4,U5,U6) • Canada(C0) • EURO(Left)(EC,EA,E2,EL) • General(Left)(K4) & Latin America(C4) • Middle & Near East(KS) • U.K(EK) • Thailand/Singapore(ER,EN) • Australia(KA,KC) • China(EH) • South Korea(C6)
WGN/SDN	Vehicle type signal	—	• SEDAN • WAGON
Drive System	Driving method of AWD	—	• AWD • VTD • 2WD
AT Type	AT type	—	• CVT(TR58) • 4AT • 5AT • 6AT • CVT(TR690)
Idling Stop Specification	Auto Start Stop judgment signal	—	• No • Yes
EPB Check 1	Electronic parking brake failure information signal	—	• Abnormal • Normal
EPB Check 2	Electronic parking brake failure information signal	—	• Abnormal • Normal
EPB Check 3	Electronic parking brake failure information signal	—	• Abnormal • Normal
Steering Control Check 1	Stereo camera transmission data abnormal	—	• Normal • Abnormal
Steering Control Check 2	Steering control instruction value from stereo camera abnormal	—	• Normal • Abnormal
Active Lane Keep System Standby Status	Active lane keep assist stand-by status	—	• NG • OK
Lane Departure Prevention Assist Canceled Reason Control Check	Active lane keep, reason of cancelling the lane departure prevention assist	—	—
Active Lane Keep System Canceled Reason Control Check	Reason of cancelling the lane keep assist (system failure)	—	—

2. ENGINE CONTROL MODULE (ECM)

For current data of engine control module, refer to ENGINE (DIAGNOSTICS). <Ref. to EN(w/o STI)(diag)-46, Subaru Select Monitor.>

3. VDC CONTROL MODULE (VDCCM)

For current data of VDC control module, refer to VDC (DIAGNOSTICS). <Ref. to VDC(diag)-20, READ CURRENT DATA, OPERATION, Subaru Select Monitor.>

4. TRANSMISSION CONTROL MODULE (TCM)

For current data of transmission control module, refer to CVT (DIAGNOSTICS). <Ref. to CVT(diag)-14, READ CURRENT DATA, OPERATION, Subaru Select Monitor.>

5. BODY INTEGRATED UNIT

For current data of body integrated unit, refer to BODY CONTROL (DIAGNOSTICS). <Ref. to BC(diag)-17, LIST, Read Current Data.>

6. POWER STEERING CM

For current data of power steering CM, refer to POWER ASSISTED SYSTEM (POWER STEERING) (DIAGNOSTICS). <Ref. to PS(diag)-11, READ CURRENT DATA, OPERATION, Subaru Select Monitor.>

7. COMBINATION METER

For current data of the combination meter, refer to INSTRUMENTATION/DRIVER INFO (DIAGNOSTICS). <Ref. to IDI(diag)-16, LIST, Read Current Data.>

8. RAB CM

For details on the current data for RAB CM, refer to RAB (DIAGNOSTICS). <Ref. to RAB(diag)-14, LIST, Read Current Data.>

8. Real-time Diagnosis

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «EyeSight» and select «Enter».
5) On «Select Function» display, select «Data Monitor».
6) Check that the display changes and the contents are correct when performing the operations as follows.

- Depress and release the brake pedal. (Stop light switch and brake switch are turned ON.)
  - Item «Brake Lamp SW (BIU)» «Brake SW Input» «Brake Lamp SW (VDC)»
- Turn the main switch to ON.
  - Item «Cruise Control SW Voltage (Port14)» and «Cruise Control SW Voltage (Port16)»
- Turn the “SET/–” switch to ON.
  - Item «Cruise Control SW Voltage (Port14)» and «Cruise Control SW Voltage (Port16)»
- Turn the “RES/+” switch to ON.
  - Item «Cruise Control SW Voltage (Port14)» and «Cruise Control SW Voltage (Port16)»
- Turn the “Vehicle distance” switch to ON.
  - Item «Cruise Control SW Voltage (Port14)» and «Cruise Control SW Voltage (Port16)»
- Turn the “Lane keep” switch to ON.
  - Item «Cruise Control SW Voltage (Port14)» and «Cruise Control SW Voltage (Port16)»
- Operate the shift lever.
  - Item «Current gear position»
- Press and hold the pre-collision brake OFF switch.
  - Item «Pre-Collision Brake OFF Indicator»
- Press and hold the lane departure warning OFF switch.
  - Item «Lane Departure Warning OFF Indicator»

NOTE:
For detailed operation procedures, refer to “Application help”.

9. Diagnostic Code(s) Display

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «EyeSight» and select «Enter».
5) On «Select Function» display, select «DTC».

NOTE:
- For detailed operation procedures, refer to “Application help”.
- For details concerning DTC, refer to “List of Diagnostic Trouble Code (DTC)”. <Ref. to ES(diag)-43, LIST, Diagnostic Code(s) Display.>
- Up to ten codes can be stored. When more than ten codes are output, they will not be stored.
- The same code is stored only once, and even when the same code occurs several times, information will not be updated.

B: LIST

- List of Diagnostic Trouble Code (DTC)

DTC	Item	Contents of diagnosis	Reference
U0073	CONTROL MODULE COMMUNICATION BUS OFF	Detected when bus off status (the stereo camera detects the failure and is disconnected from CAN line) occurs.	<Ref. to ES(diag)-85, DTC U0073 CONTROL MODULE COMMUNICATION BUS OFF, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0100	LOST COMMUNICATION WITH ECM/PCM “A”	Detected when CAN data from ECM is not transmitted to stereo camera.	<Ref. to ES(diag)-85, DTC U0100 LOST COMMUNICATION WITH ECM/PCM “A”, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0101	LOST COMMUNICATION WITH TCM	Detected when CAN data from TCM is not transmitted to stereo camera.	<Ref. to ES(diag)-85, DTC U0101 LOST COMMUNICATION WITH TCM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0122	LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE	Detected when CAN data from VDC is not transmitted to stereo camera.	<Ref. to ES(diag)-85, DTC U0122 LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0126	LOST COMMUNICATION WITH STEERING ANGLE SENSOR MODULE	Detected when CAN data from steering angle sensor is not transmitted to stereo camera.	<Ref. to ES(diag)-85, DTC U0126 LOST COMMUNICATION WITH STEERING ANGLE SENSOR MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0131	LOST COMMUNICATION WITH POWER STEERING CONTROL MODULE	Detected when CAN data from EPS CM is not transmitted to stereo camera.	<Ref. to ES(diag)-85, DTC U0131 LOST COMMUNICATION WITH POWER STEERING CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0140	LOST COMMUNICATION WITH BODY CONTROL MODULE	Detected when CAN data from body integrated unit is not transmitted to stereo camera.	<Ref. to ES(diag)-85, DTC U0140 LOST COMMUNICATION WITH BODY CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0155	LOST COMMUNICATION WITH INSTRUMENT PANEL CLUSTER (IPC) CONTROL MODULE	Detected when CAN data from combination meter is not transmitted to stereo camera.	<Ref. to ES(diag)-85, DTC U0155 LOST COMMUNICATION WITH INSTRUMENT PANEL CLUSTER (IPC) CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

DTC	Item	Contents of diagnosis	Reference
U0401	INVALID DATA RECEIVED FROM ECM/PCM “A”	Failure counter diagnosis of engine control module (ECM)	<Ref. to ES(diag)-86, DTC U0401 INVALID DATA RECEIVED FROM ECM/PCM “A”, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0402	INVALID DATA RECEIVED FROM TCM	Failure counter diagnosis of automatic transmission control module (TCM)	<Ref. to ES(diag)-86, DTC U0402 INVALID DATA RECEIVED FROM TCM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0416	INVALID DATA RECEIVED FROM VEHICLE DYNAMICS CONTROL MODULE	Failure counter diagnosis of VDC control module (VDC CM)	<Ref. to ES(diag)-86, DTC U0416 INVALID DATA RECEIVED FROM VEHICLE DYNAMICS CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0420	INVALID DATA RECEIVED FROM POWER STEERING CONTROL MODULE	Failure counter diagnosis of EPS CM	<Ref. to ES(diag)-86, DTC U0420 INVALID DATA RECEIVED FROM POWER STEERING CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0422	INVALID DATA RECEIVED FROM BODY CONTROL MODULE	Failure counter diagnosis of body integrated unit	<Ref. to ES(diag)-86, DTC U0422 INVALID DATA RECEIVED FROM BODY CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0423	INVALID DATA RECEIVED FROM INSTRUMENT PANEL CLUSTER CONTROL MODULE	Failure counter diagnosis of combination meter	<Ref. to ES(diag)-86, DTC U0423 INVALID DATA RECEIVED FROM INSTRUMENT PANEL CLUSTER CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0428	INVALID DATA RECEIVED FROM STEERING ANGLE SENSOR MODULE	Failure counter diagnosis of steering angle sensor	<Ref. to ES(diag)-86, DTC U0428 INVALID DATA RECEIVED FROM STEERING ANGLE SENSOR MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U1073	CONTROL MODULE COMMUNICATION BUS "SONAR-CAN" OFF	Detected when bus off status (the stereo camera detects the failure and is disconnected from the local CAN line) occurs.	<Ref. to ES(diag)-86, DTC U1073 CONTROL MODULE COMMUNICATION BUS "SONAR-CAN" OFF, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U1233	LOST COMMUNICATION WITH RAB CONTROL MODULE	Detected when CAN data from RAB CM is not transmitted to the stereo camera.	<Ref. to ES(diag)-86, DTC U1233 LOST COMMUNICATION WITH RAB CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U1534	INVALID DATA RECEIVED FROM SONAR ECU	Failure counter diagnosis of RAB CM	<Ref. to ES(diag)-87, DTC U1534 INVALID DATA RECEIVED FROM SONAR ECU, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2801	TCM ABNORMAL	Detected when error occurs in the automatic transmission.	<Ref. to ES(diag)-87, DTC B2801 TCM ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2802	ETC ABNORMAL	Detected when error occurs in the electronic throttle control.	<Ref. to ES(diag)-87, DTC B2802 ETC ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2803	EPB OPERATION PROHIBIT	Detected when error occurs in EPB operation, or when executing VDC brake maintenance mode. (EPB operation prohibited)	<Ref. to ES(diag)-87, DTC B2803 EPB OPERATION PROHIBIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

DTC	Item	Contents of diagnosis	Reference
B2804	EPB NO ACTIVITY DETECTED	Detected when error occurs in the EPB operation. (EPB operation abnormal)	<Ref. to ES(diag)-87, DTC B2804 EPB NO ACTIVITY DETECTED, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2806	ECM ABNORMAL	Detected when error occurs in the engine control module (ECM).	<Ref. to ES(diag)-87, DTC B2806 ECM ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2807		Detected when cruise indicator illumination request from ECM and ON/OFF information of cruise function do not match.	<Ref. to ES(diag)-87, DTC B2807 ECM ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2809	VDC MALFUNCTION	Detected when error occurs in the VDC.	<Ref. to ES(diag)-87, DTC B2809 VDC MALFUNCTION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B280A	VDC ECHO BACK DISAGREEMENT	Detected when error occurs in the VDC. (VDC brake control malfunction 1)	<Ref. to ES(diag)-88, DTC B280A VDC ECHO BACK DISAGREEMENT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B280B	VDC BRAKE FLUID PRESSURE	Detected when error occurs in the VDC. (VDC brake control malfunction 3)	<Ref. to ES(diag)-88, DTC B280B VDC BRAKE FLUID PRESSURE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B280F	COMBINATION METER MALFUNCTION	Detected when error occurs in the CAN communication with combination meter.	<Ref. to ES(diag)-88, DTC B280F COMBINATION METER MALFUNCTION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2810	INCOMPATIBLE WITH EyeSight (COMBINATION METER)	Detected when different (undesignated) type of combination meter is installed.	<Ref. to ES(diag)-88, DTC B2810 INCOMPATIBLE WITH EyeSight (COMBINATION METER), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2811	EPS ABNORMAL	EPS abnormal	<Ref. to ES(diag)-88, DTC B2811 EPS ABNORMAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2814	POWER SUPPLY LOW VOLTAGE	Detected when battery voltage is below specified value or when the +B harness of the stereo camera is broken.	<Ref. to ES(diag)-89, DTC B2814 POWER SUPPLY LOW VOLTAGE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2815	POWER SUPPLY HIGH VOLTAGE	Detected when battery voltage exceeds the specified value.	<Ref. to ES(diag)-90, DTC B2815 POWER SUPPLY HIGH VOLTAGE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2817	BRAKE LAMP	Detected when error occurs in the brake light illumination circuit.	<Ref. to ES(diag)-90, DTC B2817 BRAKE LAMP, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B281B	STEERING ANGLE SENSOR FAIL	Detected when error occurs in the steering angle sensor system.	<Ref. to ES(diag)-91, DTC B281B STEERING ANGLE SENSOR FAIL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B281C	INCOMPATIBLE WITH EyeSight (EPS)	Detected when the EPS CM which is not exclusively for EyeSight is installed.	<Ref. to ES(diag)-91, DTC B281C INCOMPATIBLE WITH EyeSight (EPS), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B281E	RAB CONTROL MODULE	Detected when there is a malfunction in sonar sensor or RAB CM.	<Ref. to ES(diag)-92, DTC B281E RAB CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

DTC	Item	Contents of diagnosis	Reference
B281F	Reverse Automatic Braking OVERRIDE	Detected when a stop hold command is output from RAB CM even when an accelerator override is generated by the driver.	<Ref. to ES(diag)-92, DTC B281F Reverse Automatic Braking OVERRIDE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2821	Reverse Automatic Braking CONTROL PROHIBITION	Detected when error occurs in RAB CM.	<Ref. to ES(diag)-92, DTC B2821 Reverse Automatic Braking CONTROL PROHIBITION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28A0	VEHICLE MODEL JUDGMENT	Detected when the model code stored in EEPROM and the model code used for CAN data are different, or when +B harness of the stereo camera is broken at aiming completion.	<Ref. to ES(diag)-93, DTC B28A0 VEHICLE MODEL JUDGMENT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28A1	EyeSight COMMUNICATION(ECM)	Abnormal judgment for stereo camera by ECM Or detected when the stereo camera or ECM is assembled incorrectly.	<Ref. to ES(diag)-95, DTC B28A1 EyeSight COMMUNICATION(ECM), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28A2	EyeSight COMMUNICATION(VDC)	Abnormal judgment for stereo camera data by VDC	<Ref. to ES(diag)-96, DTC B28A2 EyeSight COMMUNICATION(VDC), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28A3	EyeSight COMMUNICATION(METER)	Abnormal judgment for stereo camera data by combination meter	<Ref. to ES(diag)-97, DTC B28A3 EyeSight COMMUNICATION(METER), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28A4	EyeSight COMMUNICATION(EPS)	Abnormal judgment for stereo camera data by EPS CM	<Ref. to ES(diag)-98, DTC B28A4 EyeSight COMMUNICATION(EPS), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28A5	ENGINE TORQUE LIMITER CONTROL PROHIBIT	Detected when error occurs in the transmission data from stereo camera to ECM.	<Ref. to ES(diag)-99, DTC B28A5 ENGINE TORQUE LIMITER CONTROL PROHIBIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28A6	INTERNAL STEREO CAMERA COMMUNICATION 1	Detected when an communication error occurs inside the stereo camera.	<Ref. to ES(diag)-100, DTC B28A6 INTERNAL STEREO CAMERA COMMUNICATION 1, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28A7	STEREO CAMERA RECOGNITION(TARGET)	Detected when error occurs in the communication data inside the control module due to external factors such as noises.	<Ref. to ES(diag)-100, DTC B28A7 STEREO CAMERA RECOGNITION(TARGET), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28A8	INTERNAL STEREO CAMERA COMMUNICATION 2		<Ref. to ES(diag)-100, DTC B28A8 INTERNAL STEREO CAMERA COMMUNICATION 2, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28A9	STEREO CAMERA SYNCHRONIZED RECOGNITION DATA		<Ref. to ES(diag)-100, DTC B28A9 STEREO CAMERA SYNCHRONIZED RECOGNITION DATA, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28AA	STEREO CAMERA MICROCOMPUTER 1	Detected when error occurs in the communication with microcomputer 1 system inside the stereo camera.	<Ref. to ES(diag)-100, DTC B28AA STEREO CAMERA MICROCOMPUTER 1, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28AB	STEREO CAMERA MICROCOMPUTER 2	Detected when error occurs in the communication with microcomputer 2 system inside the stereo camera.	<Ref. to ES(diag)-100, DTC B28AB STEREO CAMERA MICROCOMPUTER 2, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

DTC	Item	Contents of diagnosis	Reference
B28AC	STEREO CAMERA ASIC	Detected when error occurs in the ASIC system inside the stereo camera.	<Ref. to ES(diag)-101, DTC B28AC STEREO CAMERA ASIC, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28AD	STEREO CAMERA IMAGE RECOGNITION	Detected when error occurs in the stereo camera image system.	<Ref. to ES(diag)-101, DTC B28AD STEREO CAMERA IMAGE RECOGNITION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28AE	INTERNAL STEREO CAMERA POWER SUPPLY	Detected when error occurs in the internal power supply system of stereo camera.	<Ref. to ES(diag)-101, DTC B28AE INTERNAL STEREO CAMERA POWER SUPPLY, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28AF	STEREO CAMERA ADJUSTMENT INCOMPLETE	Detected when adjustment/inspection of camera has not been completed normally.	<Ref. to ES(diag)-101, DTC B28AF STEREO CAMERA ADJUSTMENT INCOMPLETE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28B1	STEREO CAMERA AUTOMATIC ADJUSTMENT	Detected when the optical axis of stereo camera is deviated in lateral direction or when the fluctuation range of automatic adjustment value has been enlarged.	<Ref. to ES(diag)-101, DTC B28B1 STEREO CAMERA AUTOMATIC ADJUSTMENT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28B2	STEREO CAMERA HIGH TEMPERATURE	Detected when the temperature of the stereo camera excessively increases. (When this DTC is detected, the camera will not return to the normal state after performing adjustment or inspection. In this case, always replace the stereo camera.)	<Ref. to ES(diag)-101, DTC B28B2 STEREO CAMERA HIGH TEMPERATURE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28B3	STEREO CAMERA LOW TEMPERATURE	Detected when the temperature of the stereo camera excessively decreases. (When this DTC is detected, the camera will not return to the normal state after performing adjustment or inspection. In this case, always replace the stereo camera.)	<Ref. to ES(diag)-102, DTC B28B3 STEREO CAMERA LOW TEMPERATURE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28B5	+B CIRCUIT OPEN	Detected when there is an open circuit in power supply line of the stereo camera.	<Ref. to ES(diag)-102, DTC B28B5 +B CIRCUIT OPEN, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28B6	PRE-COLLISION OFF SWITCH	Pre-collision brake switch or harness is faulty. Detected also when the switch is held down for over 45 seconds.	<Ref. to ES(diag)-103, DTC B28B6 PRE-COLLISION OFF SWITCH, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28B7	LDP OFF SWITCH	Lane departure warning OFF switch or harness is faulty. Detected also when the switch is held down for over 45 seconds.	<Ref. to ES(diag)-105, DTC B28B7 LDP OFF SWITCH, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28B8	EyeSight STEERING SWITCH 1	Detected when EyeSight steering switch is malfunctioning, when the harness is abnormal or when there is an open circuit.	<Ref. to ES(diag)-107, DTC B28B8 EyeSight STEERING SWITCH 1, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28B9	EyeSight STEERING SWITCH 2		<Ref. to ES(diag)-108, DTC B28B9 EyeSight STEERING SWITCH 2, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B28BA	STEERING ANGLE AND STEREO CAMERA CORRELATION MISALIGNED	• Detected when the center point of steering angle sensor deviates. • Detected when there is an excessive deviation in the alignment.	<Ref. to ES(diag)-109, DTC B28BA STEERING ANGLE AND STEREO CAMERA CORRELATION MISALIGNED, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

10.Freeze Frame Data Display

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «EyeSight» and select «Enter».
5) On «Select Function» display, select «DTC».
6) On «DTC» display, select «FFD».

NOTE:
- For detailed operation procedures, refer to “Application help”.
- Freeze frame data is stored for three DTCs. Allocation of the three DTCs are as follows:
  – DTC that occurred first.
  – DTC that occurred first during the latest driving cycle (from IGN ON to IGN OFF).
  – DTC that occurred first during the second latest driving cycle.
  – However, DTCs will be stored in order of occurrence until these three DTCs are stored.
- For details on freeze frame data, refer to List of freeze frame data. <Ref. to ES(diag)-48, LIST, Freeze Frame Data Display.>
- Freeze frame data is cleared in Clear Memory Mode. <Ref. to ES(diag)-49, Clear Memory Mode.>

B: LIST

- List of freeze frame data

Display	Content	Unit
ECU Power Supply Voltage (IG)	Display of input voltage of stereo camera	V
Engine Speed	Engine speed	rpm
Accel opening angle	Acceleration opening angle signal	%
Brake Fluid Target Pressure	Target value of brake fluid pressure	MPa
Master Cylinder Actual Fluid Pressure	Brake pressure	MPa
Right Front Wheel W/C Actual Fluid Pressure	Right front wheel cylinder fluid pressure	MPa
Left Front Wheel W/C Actual Fluid Pressure	Left front wheel cylinder fluid pressure	MPa
Brake SW Input	Brake switch signal status	—
Brake Lamp SW (BIU)	Brake light switch signal status	—
Brake Lamp SW (VDC)	Brake light switch status	—
Trip Count	Timestamp information_Trip counter	times
Count	Timestamp information_original count identification information	—
Time Count [msec]	Timestamp information_time counter	ms
Drive Wheel Average Speed	Average wheel speed signal	km/h
Brake Lamp Command	Brake lamp light up command signal	—
EPB Activate Request	Electronic parking brake activate request	—
EPB Operation Status	Electronic parking brake operation status signal	—
Idle SW for EPB Control	Idle switch signal for electronic parking brake control	—
Driver Brake Detection	Driver brake detection signal	—
Brake Control Actuation	Brake operation permission signal	—
Pre-Collision Brake Assist Command	Pre-collision brake assist command signal	—
Pre-Collision Brake Action	Pre-collision brake command signal	—
Risk Avoidance Assist standby Command	Risk avoidance assist stand-by command signal	—
Adaptive Cruise Control Torque Down	Torque down prohibition signal of stereo camera	—
Hill Descent Control Status	Hill descent control status signal	—
Engine Failure	Engine failure signal	—
Brake Lamp SW Fail Status	Brake light switch failure signal	—

11.Clear Memory Mode

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «EyeSight» and select «Enter».
5) On «Select Function» display, select «DTC».
6) On «DTC» display, select «Clear Memory».

NOTE:
For detailed operation procedures, refer to “Application help”.

12.Clear Active Lane Keep System Learning Value

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «EyeSight» and select «Enter».
5) On «Select Function» display, select «Work Support».
6) On «Work Support» display, select «Clear Active Lane Keep System Learning Value».

NOTE:
- When suspension parts are replaced or wheel alignment is adjusted, perform «Clear Active Lane Keep System Learning Value».
- For detailed operation procedures, refer to “Application help”.

13.Diagnostics with Phenomenon

A: DIAGNOSTIC PROCEDURE WITH PHENOMENON

1. TEMPORARY STOP OF EyeSight

Phenomenon		Check Item	Reference
1	Temporary stop occurs frequently. EyeSight temporary stop indicator illuminates frequently.	(1) Check EyeSight temporary stop code. <Ref. to ES(diag)-71, EyeSight Temporary Code(s) Display.>	For details on temporary stop codes, refer to Check list (Camera temporary stop). Check list (Camera temporary stop) <Ref. to ES(diag)-75, CHECK LIST (CAMERA TEMPORARY STOP), LIST, EyeSight Temporary Code(s) Display.> When there is a relevant item in the check list, it can be the cause of malfunction. Eliminate the cause, and check that the malfunction has been improved. If not solved, the stereo camera may be malfunctioning.

2. ADAPTIVE CRUISE CONTROL, CONVENTIONAL CRUISE CONTROL

Phenomenon		Check Item	Reference
1	Cruise control switch is not turned to ON. (CRUISE indicator light does not illuminate) Or cruise control was cancelled without operating the cruise switch.	(1) Check the ECM cruise control cancel code.	Perform the diagnosis according to displayed cancel code. <Ref. to ES(diag)-79, ECM Cancel Code(s) Display.> If not displayed, go to (2).
		(2) Perform the real-time diagnosis. Check the input signal of cruise control system.	Real-time Diagnosis <Ref. to ES(diag)-42, Real-time Diagnosis.> When normal, go to (4). When abnormal, go to (3).
		(3) Check the EyeSight steering switch.	Check EyeSight steering switch <Ref. to ES(diag)-70, CHECK EyeSight STEERING SWITCH, Diagnostics with Phenomenon.>
		(4) Check the CRUISE indicator.	Inspection of cruise indicator <Ref. to ES(diag)-69, CHECK ADAPTIVE CRUISE CONTROL INDICATOR LIGHT/CONSTANT SPEED CRUISE CONTROL INDICATOR LIGHT AND CRUISE SET INDICATOR LIGHT, Diagnostics with Phenomenon.>
2	Cruise control cannot be set. Or cruise control is cancelled without releasing operation. NOTE: • Do not turn the ignition switch to OFF after the cruise control is deactivated. • Do not operate the EyeSight steering switch after the cruise control is deactivated. If the above is performed, the cancel code the ECM will be cleared.	(1) Check the ECM cruise control cancel code.	Perform the diagnosis according to displayed cancel code. <Ref. to ES(diag)-79, ECM Cancel Code(s) Display.> If not displayed, go to (2).
		(2) Perform the real-time diagnosis. Check the input signal of cruise control system.	Real-time Diagnosis <Ref. to ES(diag)-42, Real-time Diagnosis.> When normal, go to (6). When abnormal, go to the relevant items for (3), (4), (5).
		(3) Check the EyeSight steering switch.	Check EyeSight steering switch <Ref. to ES(diag)-70, CHECK EyeSight STEERING SWITCH, Diagnostics with Phenomenon.>
		(4) Check stop light switch and brake switch.	Inspection of stop light switch and brake switch <Ref. to BR-96, Brake Pedal.> <Ref. to CC(diag)-17, 12, Diagnostic Procedure with Cancel Code.>
		(5) Check the neutral position switch.	Inspection of neutral position switch <Ref. to CC(diag)-22, 14, Diagnostic Procedure with Cancel Code.> <Ref. to CC(diag)-28, 62, Diagnostic Procedure with Cancel Code.>
		(6) Check vehicle speed sensor.	Inspection of vehicle speed sensor <Ref. to CC(diag)-27, 22, Diagnostic Procedure with Cancel Code.>

Phenomenon		Check Item	Reference
3	SET indicator does not illuminate.	Check the SET indicator.	Inspection of SET indicator <Ref. to ES(diag)-69, CHECK ADAPTIVE CRUISE CONTROL INDICATOR LIGHT/ CONSTANT SPEED CRUISE CONTROL INDICATOR LIGHT AND CRUISE SET INDICATOR LIGHT, Diagnostics with Phenomenon.>
4	Vehicle speed is not held within set speed ±3 km/h (±2 MPH) on a level road.	Check the vehicle speed sensor.	Inspection of vehicle speed sensor <Ref. to CC(diag)-27, 22, Diagnostic Procedure with Cancel Code.>
5	Vehicle speed does not increase or does not return to set speed after RES/+ switch has been pressed.	(1) Perform the real-time diagnosis. Check the input signal of cruise control system.	Real-time Diagnosis <Ref. to ES(diag)-42, Real-time Diagnosis.> When abnormal, go to (2).
		(2) Check the RES/+ switch.	Inspection of RES/+ switch <Ref. to ES(diag)-70, CHECK EyeSight STEERING SWITCH, Diagnostics with Phenomenon.>
6	Vehicle speed does not decrease after SET/– switch has been pressed.	(1) Perform the real-time diagnosis. Check the input signal of cruise control system.	Real-time Diagnosis <Ref. to ES(diag)-42, Real-time Diagnosis.> When abnormal, go to (2).
		(2) Check the SET/– switch.	Inspection of SET/– switch <Ref. to ES(diag)-70, CHECK EyeSight STEERING SWITCH, Diagnostics with Phenomenon.>
7	Cruise control is not deactivated after the cruise switch is pressed.	(1) Perform the real-time diagnosis. Check the input signal of cruise control system.	Real-time Diagnosis <Ref. to ES(diag)-42, Real-time Diagnosis.> When abnormal, go to (2).
		(2) Check the cruise switch.	Inspection of cruise switch <Ref. to ES(diag)-70, CHECK EyeSight STEERING SWITCH, Diagnostics with Phenomenon.>
8	Following distance does not change, even after the following distance switch is pressed.	(1) Perform the real-time diagnosis. Check the input signal of cruise control system.	Real-time Diagnosis <Ref. to ES(diag)-42, Real-time Diagnosis.> When abnormal, go to (2).
		(2) Check the following distance switch.	Inspection of following distance switch <Ref. to ES(diag)-70, CHECK EyeSight STEERING SWITCH, Diagnostics with Phenomenon.>
9	Cruise control is not released after brake pedal has been depressed.	(1) Perform the real-time diagnosis. Check the input signal of cruise control system.	Real-time Diagnosis <Ref. to ES(diag)-42, Real-time Diagnosis.> When abnormal, go to (2).
		(2) Check stop light switch and brake switch.	Inspection of stop light switch and brake switch <Ref. to CC(diag)-17, 12, Diagnostic Procedure with Cancel Code.> <Ref. to BR-101, INSTALLATION, Stop Light Switch.>
10	Cruise control is not released after shifting to the neutral position.	(1) Perform the real-time diagnosis. Check the input signal of cruise control system.	Real-time Diagnosis <Ref. to ES(diag)-42, Real-time Diagnosis.> When abnormal, go to (2).
		(2) Check the neutral position switch.	Inspection of neutral position switch <Ref. to CC(diag)-22, 14, Diagnostic Procedure with Cancel Code.>

Phenomenon		Check Item	Reference
11	Acceleration or deceleration does not occur according to the preceding vehicle. The preceding vehicle is difficult to be detected. Braking force is weaker than usual. Alarm for requiring more brake pedal force does not sound.	(1) Using CHECK LIST (ADAPTIVE CRUISE CONTROL), check the condition and respond to it. 1) Does it apply to the condition that the use of adaptive cruise control is not desired? 2) Does it apply to the condition or the object that is hard to be recognized by the stereo camera? 3) Does it apply to the driving condition that the preceding vehicle cannot be recognized or the vehicle on the next lane or the object on the roadside may be recognized by mistake? 4) Does it apply to the condition that brake force may become poor? 5) Does it apply to the condition that the alarm for requiring more brake pedal force does not sound even in a short vehicle distance?	Check list (Adaptive cruise control) <Ref. to ES(diag)-59, CHECK LIST (ADAPTIVE CRUISE CONTROL), DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> When there is a relevant item in the check list, it can be the cause of malfunction. Eliminate the cause, and check that the malfunction has been improved. If not solved, go to (2).
		(2) Check the windshield glass and dashboard.	Inspection of windshield glass and dashboard <Ref. to ES(diag)-8, WINDSHIELD GLASS AND DASHBOARD, INSPECTION, General Description.> When normal, go to (3).
		(3) Check the front wiper.	Inspection of front wiper <Ref. to ES(diag)-12, FRONT WIPER, INSPECTION, General Description.> When normal, go to (4).
		(4) Check the stereo camera.	Check stereo camera. <Ref. to ES(diag)-13, STEREO CAMERA, INSPECTION, General Description.> When normal, go to (5).
		(5) Bleed air from brake system.	Air bleeding from brake system <Ref. to BR-89, BRAKE LINE, PROCEDURE, Air Bleeding.> Go to (6).
		(6) Check the optical axis of the stereo camera.	Adjust the optical axis of the stereo camera. <Ref. to ES-13, PROCEDURE, Camera Adjustment, Inspection.>

3. PRE-COLLISION BRAKE, AT RAPID START PREVENTION CONTROL

	Phenomenon	Check Item	Reference
1	Pre-collision brake does not operate. Or the pre-collision brake operates, but the vehicle cannot stop safely before collision. Or the pre-collision brake is released automatically. Or the pre-collision brake assist does not operate.	(1) Check that the pre-collision brake OFF indicator light goes off.	If this indicator light illuminates, the operation is not performed.
		(2) Using CHECK LIST (PRE-COLLISION BRAKE), check the following and respond to it. 1) Does it apply to the condition that the pre-collision brake does not operate, or there is a high possibility that the vehicle cannot stop safely before collision with the pre-collision brake? 2) Does it apply to the condition that there is a high possibility that the pre-collision brake does not operate due to the recognition status of the stereo camera? 3) Does it apply to the condition that the system does not operate correctly and the turning OFF of the pre-collision brake is desired? 4) Does it apply to the condition that the pre-collision brake OFF indicator light illuminates?	Check list (Pre-collision brake) <Ref. to ES(diag)-61, CHECK LIST (PRE-COLLISION BRAKE), DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> When there is a relevant item in the check list, it can be the cause of malfunction. Eliminate the cause, and check that the malfunction has been improved. If not solved, the stereo camera may be malfunctioning.
2	Pre-collision brake operates improperly. Or the pre-collision brake is not released. Or the pre-collision brake assist operates improperly.	(1) Using CHECK LIST (PRE-COLLISION BRAKE), check the following and respond to it. 1) Does it apply to the condition that turning OFF of the pre-collision brake is desired? 2) Does it apply to the condition that the pre-collision brake may operate?	Check list (Pre-collision brake) <Ref. to ES(diag)-61, CHECK LIST (PRE-COLLISION BRAKE), DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> When there is a relevant item in the check list, it can be the cause of malfunction. Eliminate the cause, and check that the malfunction has been improved. If not solved, the stereo camera may be malfunctioning.
3	Pre-collision brake OFF indicator light does not go off. Or the pre-collision brake OFF indicator light illuminates automatically.	(1) Check that this failure occurs during engine start.	Light illumination for a while after the engine start is a normal.
		(2) Check EyeSight temporary stop code to see if temporary stop has occurred.	If the EyeSight temporary stop code is displayed, check the diagnosis from the List of EyeSight temporary stop code, and perform the corresponding operations. <Ref. to ES(diag)-71, EyeSight Temporary Code(s) Display.> If the cancel code is not displayed, go to (3).
		(3) Check the pre-collision brake OFF switch.	Inspection of pre-collision brake OFF switch <Ref. to ES(diag)-103, DTC B28B6 PRE-COLLISION OFF SWITCH, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
4	Pre-collision brake OFF indicator light does not illuminate. Or the pre-collision brake OFF indicator light goes off automatically.	(1) Check that this failure occurs during engine start.	Even if the pre-collision brake is turned off, it is turned on again when the engine switch is turned off and the engine has restarted.
		(2) Check the pre-collision brake OFF switch.	Inspection of pre-collision brake OFF switch <Ref. to ES(diag)-103, DTC B28B6 PRE-COLLISION OFF SWITCH, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

Phenomenon		Check Item	Reference
5	AT rapid start prevention control does not operate. Or the AT rapid start prevention control is released automatically.	(1) Check that the pre-collision brake OFF indicator light goes off.	If this indicator light illuminates, the operation is not performed.
		(2) Using CHECK LIST (AT RAPID START PREVENTION CONTROL), check the following and respond to it. 1) Does it apply to the condition that the AT rapid start prevention control may not operate? 2) Does it apply to the condition that the pre-collision brake OFF indicator light illuminates?	Check list (AT rapid start prevention control) <Ref. to ES(diag)-64, CHECK LIST (AT RAPID START PREVENTION CONTROL), DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> When there is a relevant item in the check list, it can be the cause of malfunction. Eliminate the cause, and check that the malfunction has been improved. If not solved, the stereo camera may be malfunctioning.
6	AT rapid start prevention control operates improperly. Or the AT rapid start prevention control is not released.	(1) Using CHECK LIST (AT RAPID START PREVENTION CONTROL), check the following and respond to it. 1) Does it apply to the condition that turning OFF of the AT rapid start prevention control is desired? 2) Does it apply to the condition that the AT rapid start prevention control may operate?	Check list (AT rapid start prevention control) <Ref. to ES(diag)-64, CHECK LIST (AT RAPID START PREVENTION CONTROL), DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> When there is a relevant item in the check list, it can be the cause of malfunction. Eliminate the cause, and check that the malfunction has been improved. If not solved, the stereo camera may be malfunctioning.

4. LANE DEPARTURE WARNING, SWAY WARNING, FORWARD VEHICLE'S START MONITORING FUNCTION

Phenomenon		Check Item	Reference
1	Lane departure warning does not operate. Or the lane departure warning is released automatically.	(1) Check that the lane departure warning OFF indicator light goes off.	If this indicator light illuminates, the operation is not performed.
		(2) Using CHECK LIST (LANE DEPARTURE WARNING, SWAY WARNING, FORWARD VEHICLE'S START MONITORING FUNCTION), check the following and respond to it. 1) Does it apply to the condition that the lane departure warning does not operate or is difficult to operate? 2) Does it apply to the condition that the lane departure warning OFF indicator light illuminates?	Check list (lane departure warning, sway warning, forward vehicle's start monitoring function) <Ref. to ES(diag)-65, CHECK LIST (LANE DEPARTURE WARNING, SWAY WARNING, FORWARD VEHICLE'S START MONITORING FUNCTION), DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> When there is a relevant item in the check list, it can be the cause of malfunction. Eliminate the cause, and check that the malfunction has been improved. If not solved, the stereo camera may be malfunctioning.

Phenomenon		Check Item	Reference
2	Lane departure warning operates improperly. Or the lane departure warning is not released.	(1) Using CHECK LIST (LANE DEPARTURE WARNING, SWAY WARNING, FORWARD VEHICLE'S START MONITORING FUNCTION), check the following and respond to it. 1) Does it apply to the condition that the vehicle lane is recognized erroneously and the lane departure warning may operate?	Check list (lane departure warning, sway warning, forward vehicle's start monitoring function) <Ref. to ES(diag)-65, CHECK LIST (LANE DEPARTURE WARNING, SWAY WARNING, FORWARD VEHICLE'S START MONITORING FUNCTION), DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> When there is a relevant item in the check list, it can be the cause of malfunction. Eliminate the cause, and check that the malfunction has been improved. If not solved, the stereo camera may be malfunctioning.
3	Lane departure warning OFF indicator light does not go off. Or the lane departure warning OFF indicator light illuminates automatically.	(1) Check that this failure occurs during engine start.	Light illumination for a while after the engine start is a normal. Even if the engine switch is turned off and the engine is restarted, the status before the engine switch off is maintained.
		(2) Check EyeSight temporary stop code to see if temporary stop has occurred.	If the EyeSight temporary stop code is displayed, check the diagnosis from the List of EyeSight temporary stop code, and perform the corresponding operations. <Ref. to ES(diag)-71, EyeSight Temporary Code(s) Display.> If the cancel code is not displayed, go to (3).
		(3) Check the lane departure warning OFF indicator light.	Inspection of lane departure warning OFF indicator light <Ref. to ES(diag)-105, DTC B28B7 LDP OFF SWITCH, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
4	Lane departure warning OFF indicator light does not illuminate. Or the lane departure warning OFF indicator light goes off automatically.	(1) Check the lane departure warning OFF indicator light.	Inspection of lane departure warning OFF indicator light <Ref. to ES(diag)-105, DTC B28B7 LDP OFF SWITCH, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
5	Sway warning does not operate. Or the sway warning is released automatically.	(1) Check that the lane departure warning OFF indicator light goes off.	If this indicator light illuminates, the operation is not performed.
		(2) Using CHECK LIST (LANE DEPARTURE WARNING, SWAY WARNING, FORWARD VEHICLE'S START MONITORING FUNCTION), check the following and respond to it. 1) Does it apply to the condition that the sway warning may not operate? 2) Does it apply to the condition that the lane departure warning OFF indicator light illuminates?	Check list (lane departure warning, sway warning, forward vehicle's start monitoring function) <Ref. to ES(diag)-65, CHECK LIST (LANE DEPARTURE WARNING, SWAY WARNING, FORWARD VEHICLE'S START MONITORING FUNCTION), DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> When there is a relevant item in the check list, it can be the cause of malfunction. Eliminate the cause, and check that the malfunction has been improved. If not solved, the stereo camera may be malfunctioning.
6	Sway warning operates improperly. Or the sway warning is not released.	(1) Using CHECK LIST (LANE DEPARTURE WARNING, SWAY WARNING, FORWARD VEHICLE'S START MONITORING FUNCTION), check the following and respond to it. 1) Does it apply to the condition that the sway warning may operate improperly?	Check list (lane departure warning, sway warning, forward vehicle's start monitoring function) <Ref. to ES(diag)-65, CHECK LIST (LANE DEPARTURE WARNING, SWAY WARNING, FORWARD VEHICLE'S START MONITORING FUNCTION), DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> When there is a relevant item in the check list, it can be the cause of malfunction. Eliminate the cause, and check that the malfunction has been improved. If not solved, the stereo camera may be malfunctioning.

Phenomenon		Check Item	Reference
7	Forward vehicle's start monitoring function does not operate. Or the forward vehicle's start monitoring function is released automatically.	(1) Using CHECK LIST (LANE DEPARTURE WARNING, SWAY WARNING, FORWARD VEHICLE'S START MONITORING FUNCTION), check the following and respond to it. 1) Does it apply to the condition that the forward vehicle's start monitoring function does not operate even when the preceding vehicle has already started?	Check list (lane departure warning, sway warning, forward vehicle's start monitoring function) <Ref. to ES(diag)-65, CHECK LIST (LANE DEPARTURE WARNING, SWAY WARNING, FORWARD VEHICLE'S START MONITORING FUNCTION), DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> When there is a relevant item in the check list, it can be the cause of malfunction. Eliminate the cause, and check that the malfunction has been improved. If not solved, the stereo camera may be malfunctioning.
8	Forward vehicle's start monitoring function operates improperly. Or the forward vehicle's start monitoring function is not released.	(1) Using CHECK LIST (LANE DEPARTURE WARNING, SWAY WARNING, FORWARD VEHICLE'S START MONITORING FUNCTION), check the following and respond to it. 1) Does it apply to the condition that the forward vehicle's start monitoring function operates even when the preceding vehicle has not yet started?	Check list (lane departure warning, sway warning, forward vehicle's start monitoring function) <Ref. to ES(diag)-65, CHECK LIST (LANE DEPARTURE WARNING, SWAY WARNING, FORWARD VEHICLE'S START MONITORING FUNCTION), DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> When there is a relevant item in the check list, it can be the cause of malfunction. Eliminate the cause, and check that the malfunction has been improved. If not solved, the stereo camera may be malfunctioning.

5. ACTIVE LANE KEEP (LANE DEPARTURE PREVENTION)

NOTE:
Check the following first.
- Adaptive cruise control is not set.

Phenomenon		Check Item	Reference
1	Lane keep switch is not turned to ON. (Lane keep indicator light does not illuminate in white.)	(1) Perform the real-time diagnosis. Check the input signal of EyeSight system.	Real-time Diagnosis <Ref. to ES(diag)-42, Real-time Diagnosis.> When normal, go to (3). When abnormal, go to (2).
		(2) Check the lane keep switch.	Check EyeSight steering switch <Ref. to ES(diag)-70, CHECK EyeSight STEERING SWITCH, Diagnostics with Phenomenon.>
		(3) Check the combination meter.	INSTRUMENTATION/DRIVER INFO (DIAGNOSTICS) <Ref. to IDI(diag)-2, COMBINATION METER, PROCEDURE, Basic Diagnostic Procedure.>

Phenomenon		Check Item	Reference
2	Lane keep (lane departure prevention) does not turn to standby mode. (Lane indicator light does not illuminate.) Lane keep (lane departure prevention) does not operate. (Lane keep indicator light does not illuminate in green.) Though lane keep (lane departure prevention) is operating, the vehicle departs out of the lane due to poor assistance.	(1) Read the lane departure prevention deactivate code. <Ref. to ES(diag)-84, Active Lane Keep System Code(s) Display.>	When there is a relevant item in the lane departure prevention deactivate code, it can be the cause of malfunction. Eliminate the cause, and check that the malfunction has been improved. If not solved, go to (2).
		(2) Using CHECK LIST (LANE KEEP), check the current conditions and respond to it. 1) Does it apply to the condition that use of lane keeping is not desired? 2) Does it apply to the condition or the object that is hard to be recognized by the stereo camera? 3) Does it apply to the road condition that the white line is difficult to be recognized?	Check list (lane keep) <Ref. to ES(diag)-67, CHECK LIST (ACTIVE LANE KEEP), DIAGNOSTIC PROCEDURE WITH PHENOMENON, Diagnostics with Phenomenon.> When there is a relevant item in the check list, it can be the cause of malfunction. Eliminate the cause, and check that the malfunction has been improved. If not solved, go to (3).
		(3) Check the windshield glass and dashboard.	Inspection of windshield glass and dashboard <Ref. to ES(diag)-8, WINDSHIELD GLASS AND DASHBOARD, INSPECTION, General Description.> When normal, go to (4).
		(4) Check the front wiper.	Inspection of front wiper <Ref. to ES(diag)-12, FRONT WIPER, INSPECTION, General Description.> When normal, go to (5).
		(5) Check the optical axis of the headlights.	Headlight optical axis adjustment <Ref. to LI-29, ADJUSTMENT, Headlight Assembly.> When normal, go to (6).
		(6) Check the stereo camera.	CHECK STEREO CAMERA. <Ref. to ES(diag)-13, STEREO CAMERA, INSPECTION, General Description.> When normal, go to (7).
		(7) Check the tires and wheel alignment.	When normal, go to (8).
		(8) Check the optical axis of the stereo camera.	Adjust the optical axis of the stereo camera. <Ref. to ES-13, PROCEDURE, Camera Adjustment, Inspection.>
3	Lane keep (lane departure prevention) is cancelled without releasing operation.	Read the lane departure prevention deactivate code. <Ref. to ES(diag)-84, Active Lane Keep System Code(s) Display.>	When there is a relevant item in the lane departure prevention deactivate code, it can be the cause of malfunction. Eliminate the cause, and check that the malfunction has been improved.

6. CHECK LIST (ADAPTIVE CRUISE CONTROL)

Item name			Yes/No	
[1]: When the vehicle does not accelerate or decelerate according to the preceding vehicle, or when it is difficult to detect the preceding vehicle.				
1	Check that the current status applies to the condition that the use of adaptive cruise control is not desired.			
	1	Tire pressure is not correct.	Yes	No
	2	The vehicle is equipped with the temporary spare tire.	Yes	No
	3	The vehicle is equipped with worn tire or tires with excessive wear difference.	Yes	No
	4	The vehicle is equipped with the tires out of specification.	Yes	No
	5	The suspension has been modified.	Yes	No
	6	The vehicle is equipped with the tire chain.	Yes	No
	7	Headlight is dirty or the optical axis is deviated. (The vehicle cannot correctly emit the headlight beam against the object and recognize it.)	Yes	No
	8	The driving of own vehicle is unstable due to an accident or failure.	Yes	No
	9	The brake warning light illuminates.	Yes	No
	10	Vehicle is tilted by the heavy load.	Yes	No
	11	Passenger capacity is exceeded.	Yes	No
	12	The vehicle is towing the trailer or other vehicle.	Yes	No
	13	The vehicle drives on the general road (other than limited highway). (Depending on the road environment (complicated roads etc.), the vehicle may not be able to drive according to the traffic condition, which may lead to the traffic accident.)	Yes	No
	14	The vehicle drives on the sharp bend.	Yes	No
	15	The vehicle drives on the slippery roads such as icy road or snow-covered road. (Tires can spin, losing the vehicle control.)	Yes	No
	16	The vehicle drives under the traffic condition that the certain vehicle distance is difficult to be maintained due to frequent acceleration and deceleration. (The vehicle may not be able to drive according to the traffic condition.)	Yes	No
	17	There is a steep downhill. (The vehicle may drive at higher speed than the set vehicle speed.)	Yes	No
	18	The vehicle performs adaptive driving while recognizing the preceding vehicle on the steep downhills. (Brake can be overheated.)	Yes	No
	19	The vehicle drives on the road with repeated steep uphills and downhills or crossover. (The vehicle may not be able to recognize the preceding vehicle or may recognize the road surface, and appropriate control may not be performed.)	Yes	No
	20	The vehicle is entering the interchange, service area, parking area, junction or tollgate. (The vehicle may not be able to recognize the preceding vehicle.)	Yes	No
	21	When the surrounding brightness (such as inlet and outlet of a tunnel) suddenly changes.	Yes	No
	22	There are water, snow or sandy dust raised by the preceding vehicle or oncoming vehicle, or sand or smoke blown in the wind, or moisture in front of own vehicle. (The vehicle may not be able to recognize the preceding vehicle or may recognize the water, and appropriate control may not be performed.)	Yes	No
	23	The windshield glass is covered with fog, snow, dirt, frost or sandy dust.	Yes	No
	24	The raindrops, water drops or dirt on the windshield glass are not wiped off sufficiently. (The vehicle may not be able to recognize the preceding vehicle, and appropriate control may not be performed.)	Yes	No
	25	Canoes etc. loaded on the roof block the visibility of the stereo camera.	Yes	No

		Item name	Yes/No	
2	Check that the current status applies to the condition or the object that is hard to be recognized by the stereo camera.			
	1	That was a vehicle with large speed difference (low-speed driving vehicle, stopping vehicle, oncoming vehicle).	Yes	No
	2	That was a cutting-in vehicle.	Yes	No
	3	That was a motorcycle, bicycle, pedestrian or animal, etc.	Yes	No
	4	It was dim in the evening or in the morning.	Yes	No
	5	The headlight did not illuminate during nighttime hours or inside the tunnel.	Yes	No
	6	The tail light of the preceding vehicle did not illuminate during nighttime hours or inside the tunnel.	Yes	No
	7	The vehicle was exposed to the intense light (backlight such as sunlight or headlight high-beam light) from the front of the vehicle.	Yes	No
	8	The rearmost surface of the preceding vehicle was small, low or uneven. That was a truck equipped with an unloaded platform without gate, a vehicle that the luggage was protruding from the rear end of the vehicle, a vehicle of special shape (carrier car, side car, etc.) or a vehicle with low vehicle height.	Yes	No
	9	There was an object extremely close to the bumper of the own vehicle.	Yes	No
3	Check that the current status applies to the driving condition that the preceding vehicle cannot be recognized or the vehicle on the next lane or the object on the roadside may be recognized by mistake.			
	1	The vehicle began adaptive cruise control from the condition that the vehicle distance was short immediately after the preceding vehicle was cut in.	Yes	No
	2	The vehicle drives on the curve, outlet and inlet of the curve, or the road with many curves in succession. (Recognition may not be performed properly, because the preceding vehicle is out of recognition area.)	Yes	No
	3	The position against the preceding vehicle deviated laterally.	Yes	No
	4	There were some objects just near the road side.		
	5	The speed difference against the preceding vehicle was large.	Yes	No
	6	Other vehicle cut ahead of the own vehicle.	Yes	No
	7	The vehicle distance was extremely short.	Yes	No
	8	The own vehicle swayed in the vehicle lane.	Yes	No
	9	The road surface was uneven due to roll or unpaved track.	Yes	No
	10	The vehicle drove on the narrow lane because of the lane closure or construction work.	Yes	No
	11	The driving of own vehicle was unstable due to an accident or failure.	Yes	No
	12	The own vehicle was loaded with the extremely heavy load in the luggage compartment or on the rear seat.	Yes	No
[2]: When braking force is weaker than usual.				
1	Check that the current status applies to the condition that brake force may become poor.			
	1	The vehicle status (loading amount, passenger, etc.) was inappropriate.	Yes	No
	2	The road surface was very steep, slippery, sharp turn, or uneven.	Yes	No
	3	The service maintenance condition of the vehicle (brake system, tire wear, tire pressure, spare tire, etc.) was inappropriate.	Yes	No
	4	The brake was cold at low ambient temperature or immediately after the driving had started.	Yes	No
	5	The symptom occurred between immediately after engine started and after a while the vehicle started driving (Completion of warming up operation can be used as an indication.).	Yes	No
	6	The brake force becomes poor due to the overheating of the brake on the downhills.	Yes	No
	7	The brake force becomes poor because of the wet brake after driving onto the puddle or washing the vehicle.	Yes	No
[3]: When the alarm for requiring more brake pedal force does not sound.				
1	Check that the current status applies to the condition that the alarm for requiring more brake pedal force does not sound even in a short vehicle distance.			
	1	The speed difference between own vehicle and preceding vehicle (when the vehicle speed of the own vehicle was approximately the same as that of the preceding vehicle) was small.	Yes	No
	2	The vehicle speed of the preceding vehicle was faster than that of the own vehicle (when the vehicle distance was getting longer).	Yes	No
	3	Other vehicle cut in extremely close to the own vehicle.	Yes	No
	4	The preceding vehicle decelerated abruptly.	Yes	No
	5	There are many continuous uphills and downhills.	Yes	No

7. CHECK LIST (PRE-COLLISION BRAKE)

Item name			Yes/No	
[1]: When pre-collision brake did not operate, or when vehicle could not stop safely before collision in spite of pre-collision brake operation.				
1	Check that the current status applies to the condition that the pre-collision brake does not operate, or there is a high possibility that the vehicle cannot stop safely before collision in spite of pre-collision brake operation.			
	1	Conditions such as the followings occurred: 1) Vehicle speed difference with the preceding vehicle is small. 2) Distance from the preceding vehicle is long. 3) Lateral deviation (offset amount) is large.	Yes	No
	2	The vehicle status (loading amount, number of passenger, etc.) was inappropriate.	Yes	No
	3	The road surface was very steep, slippery, sharp turn, or uneven.	Yes	No
	4	There was problem for the frontal visibility. (Rain, snow, fog, smoke, etc.)	Yes	No
	5	The objects were livestock, animals, guardrail, telephone pole, tree, fence, wall, etc.	Yes	No
	6	The object was motorcycle, bicycle, or pedestrian. However, the system could not recognize the object due to surrounding brightness, motion, posture, and/or angle.	Yes	No
	7	Crash avoidance operation (accelerator pedal, brake pedal, steering wheel, etc.) was performed.	Yes	No
	8	The service maintenance condition of the vehicle (brake system, tire wear, tire pressure, spare tire, etc.) was inappropriate.	Yes	No
	9	The vehicle is towing the trailer or other vehicle.	Yes	No
	10	The brake was cold at low ambient temperature or immediately after the driving had started.	Yes	No
	11	The brake force becomes poor due to the overheating of the brake on the downhills.	Yes	No
	12	The brake force becomes poor because of the wet brake after driving onto the puddle or washing the vehicle.	Yes	No

		Item name	Yes/No	
2	Check that the current status applies to the condition that there is a high possibility that the pre-collision brake does not operate depending on the recognition status of the stereo camera.			
	1	It was bad weather (heavy rain, snowstorm, dense fog).	Yes	No
	2	The field of view was insufficient due to water, snow or sandy dust raised by the preceding vehicle or oncoming vehicle, or the moisture, sand or smoke blown in the wind.	Yes	No
	3	The headlight did not illuminate during nighttime hours or inside the tunnel.	Yes	No
	4	The tail light of the preceding vehicle did not illuminate during nighttime hours or inside the tunnel.	Yes	No
	5	The vehicle approached the motorcycle, bicycle or pedestrian in the night.	Yes	No
	6	It was dark in the evening or in the morning.	Yes	No
	7	The rearmost surface of the preceding vehicle was small, low or uneven. That was a truck equipped with an unloaded platform without gate, a vehicle that the luggage was protruding from the rear end of the vehicle, a vehicle of special shape (carrier car, side car, etc.) or a vehicle with low vehicle height.	Yes	No
	8	There was a wall in front of the stopping vehicle.	Yes	No
	9	There was an object close to the vehicle.	Yes	No
	10	That was a vehicle stopped sideways.	Yes	No
	11	That was a vehicle which was oncoming or driving in reverse.	Yes	No
	12	The object was small seen from the stereo camera. (Small animals, infants, person squatting down or lying down)	Yes	No
	13	The preceding vehicle made a sharp turn, or performed abrupt acceleration or deceleration.	Yes	No
	14	Other vehicle, motorcycle, bicycle or pedestrian existed extremely close to the bumper of the own vehicle.	Yes	No
	15	The speed difference was 5 km/h (3.1 MPH) or less. (The control is performed in close distance. Depending on the objects shape and size, the rear end surface may be outside the camera visibility area.)	Yes	No
	16	Other vehicle, motorcycle, bicycle or pedestrian cut in from the side or jumped in front of the own vehicle.	Yes	No
	17	The own vehicle changed the vehicle lane, and followed the preceding vehicle right behind.	Yes	No
	18	The vehicle was exposed to the intense light (backlight such as sunlight or headlight high-beam light) from the front of the vehicle.	Yes	No
	19	The windshield glass was covered with fog, snow, dirt, frost or sandy dust.	Yes	No
	20	The windshield glass has not yet been wiped off sufficiently during or after the use of the window washer.	Yes	No
	21	The recognition of the object was imperfect due to the raindrop or droplet of the window washer or the wiper blade blocking the visibility of the stereo camera.	Yes	No
	22	Canoes etc. loaded on the roof blocked the visibility of the stereo camera.	Yes	No
	23	Other vehicle, motorcycle, bicycle or pedestrian existed out of the illuminating area of the headlight.	Yes	No
	24	The vehicle drove on the sharp turn, steep uphills or steep downhills.	Yes	No
	25	The road surface was uneven due to roll or unpaved track.	Yes	No
	26	The vehicle passed through the outlet or inlet of a tunnel.	Yes	No
	27	The object was fence or wall.	Yes	No
	28	The object was a plate of glass, mirror wall or door.	Yes	No
3	Check that the current status applies to the condition that the system does not operate correctly and the turning OFF of the pre-collision brake is desired.			
	1	Tire pressure is not correct.	Yes	No
	2	The vehicle is equipped with the temporary spare tire.	Yes	No
	3	The vehicle is equipped with worn tire or tires with excessive wear difference.	Yes	No
	4	The vehicle is equipped with the tires out of specification.	Yes	No
	5	The suspension has been modified.	Yes	No
	6	The vehicle is equipped with the tire chain.	Yes	No
	7	Headlight is dirty or the optical axis is deviated. (The vehicle cannot correctly emit the headlight beam against the object and recognize it.)	Yes	No
	8	The driving status of own vehicle is unstable due to an accident or failure.	Yes	No
	9	The brake warning light illuminates.	Yes	No
	10	Vehicle is tilted by the heavy load. Or, passenger capacity is exceeded.	Yes	No

Item name			Yes/No	
4	Check that the current status applies to the condition that the pre-collision brake OFF indicator light illuminates. (When the pre-collision brake OFF indicator light illuminates, the pre-collision brake does not operate.)			
	1	The pre-collision brake is turned off, using the pre-collision brake OFF switch.	Yes	No
	2	Approximately for 7 seconds after the engine has started.	Yes	No
	3	EyeSight is malfunctioning.	Yes	No
	4	EyeSight is stopped temporarily.	Yes	No
[2]: When pre-collision brake operated improperly.				
1	Check that the current status applies to the condition that turning OFF of the pre-collision brake is desired.			
	1	The vehicle is towed.	Yes	No
	2	The vehicle is loaded on the carrier car.	Yes	No
	3	The chassis dynamometer or free roller is used.	Yes	No
	4	The vehicle is lifted up, engine is started and the tire is spun.	Yes	No
	5	The vehicle passes through the banners, flags, drooping branches or grass while making contact with them.	Yes	No
	6	The vehicle performs sporty driving on the circuit.	Yes	No
	7	When the vehicle uses the movable type car wash machine.	Yes	No
2	Check that the current status applies to the condition that the pre-collision brake may operate.			
	1	The vehicle passes through the ETC gate at a speed exceeding the specification.	Yes	No
	2	The vehicle drives close to the preceding vehicle.	Yes	No
	3	The vehicle drives on the place where the road surface gradient changed suddenly.	Yes	No
	4	The vehicle passes through the moisture or mass of smoke.	Yes	No
	5	When the exhaust gas emitted from the preceding vehicle is visible clearly at cold weather.	Yes	No
	6	There is an obstacle on the curve or crossing.	Yes	No
	7	The vehicle passes through close to other vehicle or obstacle.	Yes	No
	8	The vehicle parks close to the wall in front or to other vehicle.	Yes	No

8. CHECK LIST (AT RAPID START PREVENTION CONTROL)

Item name			Yes/No	
[1]: When AT rapid start prevention control did not operate.				
1	Check that the current status applies to the condition that the AT rapid start prevention control may not operate.			
	1	Conditions such as the followings occurred: 1) Distance from the front object is long. 2) Vehicle speed difference is small. 3) Lateral deviation (offset amount) is large.	Yes	No
	2	It was bad weather (heavy rain, snowstorm, dense fog).	Yes	No
	3	The visibility was insufficient due to sand or smoke blown in the air.	Yes	No
	4	The vehicle approached the object in the evening, in the morning or in the night.	Yes	No
	5	The vehicle approached the object in the dark place (e.g. closed-in parking lot).	Yes	No
	6	The height of the object was low. (low wall, low guardrail, vehicle with low height etc.)	Yes	No
	7	The object was small seen from the stereo camera. (Small animals, infants, person squatting down or lying down)	Yes	No
	8	The object or rearmost area of the preceding vehicle (trailer, etc.) was small. Or the vehicle approached them too close. (The system triggers the operation by recognizing the area other than the rearmost section, resulting in insufficient control.)	Yes	No
	9	The object such as other vehicle, motorcycle, bicycle or pedestrian cut in from the side or jumped in front of the own vehicle.	Yes	No
	10	The own vehicle changed the vehicle lane when it started, and approached right behind the object.	Yes	No
	11	The vehicle was exposed to the intense light (backlight such as sunlight or headlight high-beam light) from the front of the vehicle.	Yes	No
	12	The windshield glass was covered with fog, snow, dirt, frost or sandy dust.	Yes	No
	13	The windshield glass has not yet been wiped off sufficiently during or after the use of the window washer.	Yes	No
	14	The recognition of the object was imperfect due to the raindrop or droplet of the window washer or the wiper blade blocking the visibility of the stereo camera.	Yes	No
	15	Canoes etc. loaded on the roof blocked the visibility of the stereo camera.	Yes	No
	16	The object existed out of the illuminating area of the headlight.	Yes	No
	17	The vehicle drove on the sharp turn, steep uphills or steep downhills.	Yes	No
	18	The object was a fence or wall with even pattern (striped pattern or bricks) or unpatterned surface.	Yes	No
	19	The object was a plate of glass, mirror wall or door.	Yes	No
	20	Crash avoidance operation (accelerator pedal, brake pedal, steering wheel, etc.) was performed.	Yes	No
2	Check that the current status applies to the condition that the pre-collision brake OFF indicator light illuminates. (When the pre-collision brake OFF indicator light illuminates, the AT rapid start prevention control does not operate.)			
	1	The pre-collision brake was turned off, using the pre-collision brake OFF switch.	Yes	No
	2	Approximately for 7 seconds after the engine has started.	Yes	No
	3	EyeSight is malfunctioning.	Yes	No
	4	EyeSight is stopped temporarily.	Yes	No
[2]: When AT rapid start prevention control operated improperly.				
1	Check that the current status applies to the condition that the releasing of the AT rapid start prevention control is desired.			
	1	The vehicle is towed.	Yes	No
	2	The vehicle is loaded on the carrier car.	Yes	No
	3	The chassis dynamometer or free roller is used.	Yes	No
	4	The vehicle is lifted up, engine is started and the tire is spun.	Yes	No
	5	The vehicle passes through the banners, flags, drooping branches or grass while making contact with them.	Yes	No
	6	The vehicle performs sporty driving on the circuit.	Yes	No

		Item name	Yes/No	
2	Check that the current status applies to the condition that the AT rapid start prevention control may operate.			
	1	The vehicle passes through the ETC gate at a speed exceeding the specification.	Yes	No
	2	The vehicle drives close to the preceding vehicle.	Yes	No
	3	The vehicle drives on the place where the road surface gradient changed suddenly.	Yes	No
	4	The vehicle passes through the moisture or mass of smoke.	Yes	No
	5	There is an obstacle on the curve or crossing.	Yes	No
	6	The vehicle passes through close to other vehicle or obstacle.	Yes	No
	7	The vehicle parks close to the wall in front or to other vehicle.	Yes	No

9. CHECK LIST (LANE DEPARTURE WARNING, SWAY WARNING, FORWARD VEHICLE'S START MONITORING FUNCTION)

		Item name	Yes/No	
[1]: When the lane departure warning did not operate.				
1	Check that the current status applies to the condition that the lane departure warning does not operate or is difficult to operate.			
	1	The lane departure warning is turned off.	Yes	No
	2	The vehicle speed of the own vehicle is approximately less than 50 km/h (31 MPH).	Yes	No
	3	That was approximately 7 seconds period after the lane departure warning had occurred once.	Yes	No
	4	The steering wheel was turned fully or rapidly.	Yes	No
	5	The brake pedal is depressed.	Yes	No
	6	The vehicle is accelerated by depressing the accelerator pedal.	Yes	No
	7	The vehicle distance from the preceding vehicle is short.	Yes	No
	8	That was approximately 7 seconds period while the turn signal indicator was operating or after the lever was returned.	Yes	No
	9	The vehicle has not returned inside the vehicle lane after the operation of the lane departure warning.	Yes	No
	10	The width of the vehicle lane is narrow.	Yes	No
	11	The vehicle lane is difficult to be recognized seen from the stereo camera. (Lane line (white line, etc.) does not exist or is fading out. Or the color of the lane line is very similar to that of the road surface, and difficult to be seen. Or the width of the lane line is very thin.)	Yes	No
	12	The preceding vehicle performed crash avoidance action to avoid the obstacle, and the own vehicle performed steering operation after the preceding vehicle.	Yes	No
2	Check that the current status applies to the condition that the lane departure warning OFF indicator light illuminates. (When the lane departure warning OFF indicator light illuminates, the lane departure warning does not operate.)			
	1	The lane departure warning is turned off, using the lane departure warning OFF switch.	Yes	No
	2	Approximately for 7 seconds after the engine has started.	Yes	No
	3	EyeSight is malfunctioning.	Yes	No
	4	EyeSight is stopped temporarily.	Yes	No
[2]: When the lane departure warning malfunctioned.				
1	Check that the current status applies to the condition that the vehicle lane is recognized erroneously and the lane departure warning may operate.			
	1	There was the tire track on the wet road or snow-covered road.	Yes	No
	2	There was the boundary line between snow-covered area and asphalt or on the trace of road repair.	Yes	No
	3	There was the double vehicle lane.	Yes	No
	4	The shadow of the guardrail was detected by mistake.	Yes	No

		Item name	Yes/No	
[3]: When the sway warning did not operate.				
1	Check that the current status applies to the condition that the sway warning may not operate.			
	1	The vehicle drove on the road with many curves in succession.	Yes	No
	2	The vehicle speed changed greatly.	Yes	No
	3	That was immediately after the vehicle lane had changed.	Yes	No
	4	The vehicle lane was difficult to be recognized seen from the stereo camera. (Lane line (white line, etc.) does not exist or is fading out. Or the color of the lane line is very similar to that of the road surface, and difficult to be seen. Or the width of the lane line is very thin.)	Yes	No
	5	That was immediately after the sway had begun.	Yes	No
2	Check that the current status applies to the condition that the lane departure warning OFF indicator light illuminates. (When the lane departure warning OFF indicator light illuminates, the sway warning does not operate.)			
	1	The lane departure warning is turned off, using the lane departure warning OFF switch.	Yes	No
	2	Approximately for 7 seconds after the engine has started.	Yes	No
	3	EyeSight is malfunctioning.	Yes	No
	4	EyeSight is stopped temporarily.	Yes	No
[4]: When the sway warning malfunctioned.				
1	Check that the current status applies to the condition that the sway warning may operate.			
	1	That was after the sway had stopped.	Yes	No
	2	The driver lost concentration on driving the vehicle due to fatigue or looking away.	Yes	No
[5]: When the forward vehicle's start monitoring function did not operate or when it malfunctioned.				
1	Check that the current status applies to the condition that the forward vehicle's start monitoring function does not operate even when the preceding vehicle has already started, or that the forward vehicle's start monitoring function operates even when the preceding vehicle has not yet started.			
	1	The motorcycle cut in the space between the own vehicle and the stopped preceding vehicle.	Yes	No
	2	The vehicle could not recognize the preceding vehicle properly due to the weather condition or road shape.	Yes	No
	3	The stereo camera lost sight of the preceding vehicle.	Yes	No
	4	The driver did not depress the brake pedal with select lever in D, M or N range. (At this time, forward vehicle's start monitoring function does not operate.)	Yes	No
	5	The forward vehicle's start monitoring function was turned OFF via the customization function.	Yes	No

10.CHECK LIST (ACTIVE LANE KEEP)

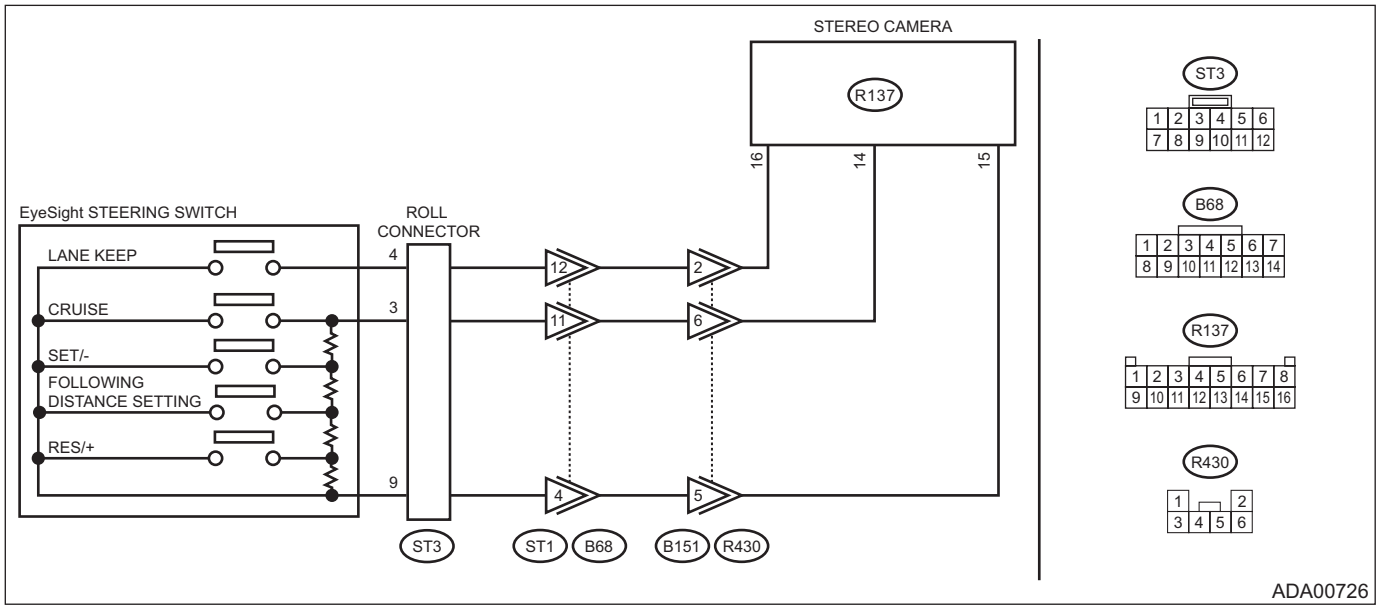
Item name			Yes/No	
1	Check that the current status applies to the condition that use of lane keeping is not desired.			
	1	An object was placed on the dashboard.	Yes	No
	2	Tire pressure is not correct.	Yes	No
	3	The vehicle is equipped with the temporary spare tire.	Yes	No
	4	The vehicle is equipped with worn tire or tires with excessive wear difference.	Yes	No
	5	The vehicle is equipped with the tires out of specification.	Yes	No
	6	The flat tire is repaired using the temporary repair kit.	Yes	No
	7	The suspension (including STI parts) has been modified.	Yes	No
	8	Wheel balance is abnormal (balance weight falls off, slides off, etc.).	Yes	No
	9	Wheel alignment is out of the specified value.	Yes	No
	10	The steering wheel has been replaced with a non-genuine part.	Yes	No
	11	The steering wheel is off-center.	Yes	No
	12	The lighting devices, such as headlights and fog lights, have been modified.	Yes	No
	13	An abnormal vibration can be felt on the steering wheel.	Yes	No
	14	The steering wheel operation is heavier than usual.	Yes	No
	15	An error occurs, for example, no display appears in the combination meter or no alarm sounds.	Yes	No
	16	The headlight cannot illuminate the road surface sufficiently because the headlight is dirty, attached with ice, snow or mud, or the optical axis is deviated.	Yes	No
	17	The driving status of own vehicle was unstable due to an accident or failure.	Yes	No
	18	The vehicle carried heavy load.	Yes	No
	19	Passenger capacity was exceeded.	Yes	No
	20	The vehicle towed another vehicle.	Yes	No
	21	The vehicle drove on a general road (other than limited highways).	Yes	No
	22	The vehicle drove on a road with sharp curves, such as an urban highway.	Yes	No
	23	The vehicle drove on a slippery road such as icy roads or snow-covered roads.	Yes	No
	24	The vehicle drove on a lane restricted road or a temporary road due to road construction.	Yes	No
	25	The vehicle drove on a road where obsolete white lines did not disappear completely.	Yes	No
	26	On the road surface there were some snow, puddles, snow melting agent, cracks, road repair traces, obsolete white lines.	Yes	No
	27	The vehicle entered the interchange, service area, parking area, junction or tollgate.	Yes	No
	28	The vehicle drove on a road where the surrounding brightness (such as inlet and outlet of a tunnel) suddenly changed.	Yes	No
	29	The vehicle drove on a road where there was some water or sandy dust raised by a preceding vehicle or oncoming vehicle, or sand or smoke blown in the wind, or moisture in front of own vehicle.	Yes	No
	30	The windshield glass was covered with fog, snow, dirt, frost or sandy dust.	Yes	No
	31	The raindrops, water drops or dirt on the windshield glass were not wiped off sufficiently.	Yes	No
	32	Canoes etc. loaded on the roof block the visibility of the stereo camera.	Yes	No
	33	The vehicle drove immediately after the stereo camera was replaced or adjusted.	Yes	No

		Item name	Yes/No	
2	Check that the current status applies to the condition or the object, such as a white line, that is hard to be recognized by the stereo camera.			
	1	The vehicle drove when it was dark in the evening or in the morning.	Yes	No
	2	The vehicle drove under the road condition, such as rainy or snowy weather, that the white line was difficult to be recognized.	Yes	No
	3	The headlight did not illuminate during nighttime hours or inside the tunnel.	Yes	No
	4	The vehicle was exposed to the intense light (backlight such as sunlight or headlight) from the front of the vehicle.	Yes	No
	5	The vehicle drove on a road where the driving lane was yellow.	Yes	No
	6	The vehicle drove on a road where the color of the lane division line was similar to the color of the road surface, which was difficult to be recognized.	Yes	No
	7	The vehicle drove on a road where the width of the lane division line was narrow.	Yes	No
	8	The vehicle drove on a road where the lane division line did not exist or almost disappeared.	Yes	No
	9	The vehicle drove on a road where the width of the driving lane was narrow.	Yes	No
	10	The vehicle drove on a road where there was a fork lane, such as an interchange outlet of the highway, or an intersection.	Yes	No
	11	The vehicle drove on a road where the surrounding brightness (such as inlet and outlet of a tunnel) suddenly changed.	Yes	No
	12	The vehicle drove on a road where the white line had a special shape, such as a double line.	Yes	No
	13	The vehicle drove under the condition that the white line was difficult to be recognized due to the short distance to the preceding vehicle.	Yes	No
	14	Another vehicle cut in ahead of the vehicle from the next lane, or the preceding vehicle changed the driving lane.	Yes	No
	15	The vehicle drove on a road where the curve shape changed suddenly.	Yes	No
	16	A shadow of the guardrail formed on the white line.	Yes	No
3	Check that the current status applies to the condition that sufficient performance of lane keeping cannot be achieved.		Yes	No
	1	The vehicle was subjected to cross wind.	Yes	No
	2	The vehicle is equipped with winter tires or non-genuine tires.	Yes	No
	3	The vehicle drove on a uphill or a downhill where the road surface gradient suddenly changed.	Yes	No
	4	The vehicle drove on an uneven, rolling or jointed road surface.	Yes	No
	5	The vehicle drove on a road where the road surface cross gradient changed suddenly or was large.	Yes	No
	6	The acceleration or deceleration speed was large.	Yes	No
	7	The vehicle drove immediately after the tire was replaced or the tire air pressure was changed.	Yes	No
	8	The vehicle drove immediately after the vehicle weight was extremely changed.	Yes	No
	9	The vehicle drove immediately after the stereo camera was repaired, adjusted or replaced.	Yes	No
	10	The vehicle drove immediately after the suspension or steering system was repaired or replaced.	Yes	No
	11	The vehicle drove immediately after the engine was started at a low outside temperature.	Yes	No

B: CHECK ADAPTIVE CRUISE CONTROL INDICATOR LIGHT/CONSTANT SPEED CRUISE CONTROL INDICATOR LIGHT AND CRUISE SET INDICATOR LIGHT

TROUBLE SYMPTOM:
Adaptive cruise control or conventional cruise control can be set, but adaptive cruise control indicator light/constant speed cruise control indicator light and cruise SET indicator light do not illuminate.

	Step	Check	Yes	No
1	**CHECK ADAPTIVE CRUISE CONTROL INDICATOR LIGHT/CONSTANT SPEED CRUISE CONTROL INDICATOR LIGHT AND CRUISE SET INDICATOR LIGHT.** Check the combination meter. <Ref. to IDI(diag)-20, OPERATION, System Operation Check Mode.>	Does adaptive cruise control indicator light/constant speed cruise control indicator light and cruise SET indicator light illuminate?	Go to step **2**.	Replace the meter case assembly. <Ref. to IDI-13, Combination Meter.>
2	**CHECK LAN SYSTEM.** Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Is the check result OK?	Replace the stereo camera. <Ref. to ES-8, Stereo Camera.>	Perform the diagnosis according to diagnosis for LAN system.



C: CHECK EyeSight STEERING SWITCH

TROUBLE SYMPTOM:

- Cruise control cannot be set. (Cancelled immediately.)
- Cruise control cannot be released.

WIRING DIAGRAM:

EyeSight System <Ref. to WI-222, WIRING DIAGRAM, EyeSight System.>

Step		Check	Yes	No
1	**CHECK EyeSight STEERING SWITCH CIRCUIT.** 1) Remove the driver's airbag module. <Ref. to AB-32, REMOVAL, Driver's Airbag Module.> 2) Disconnect the EyeSight steering switch harness connector. 3) Turn the ignition switch to ON. 4) Measure the voltage between harness connector terminal and chassis ground. ***Connector & terminal*** ***(ST3) No. 3 (+) — Chassis ground (–):*** ***(ST3) No. 4 (+) — Chassis ground (–):***	Is the voltage 5 V or more?	Go to step **2**.	Check for open/short circuit or poor contact in the harness between EyeSight steering switch and ECM and in the steering roll connector.
2	**CHECK EyeSight STEERING SWITCH CIRCUIT.** 1) Turn the ignition switch to OFF. 2) Remove the EyeSight steering switch. <Ref. to CC-6, REMOVAL, Cruise Control Command Switch.> 3) Measure the resistance between harness connector terminal and chassis ground. ***Connector & terminal*** ***(ST3) No. 9 — Chassis ground:***	Is the resistance less than 10 Ω?	Go to step **3**.	Check for open circuit between EyeSight steering switch and chassis ground.
3	**CHECK EyeSight STEERING SWITCH.** Check EyeSight steering switch. <Ref. to CC-7, INSPECTION, Cruise Control Command Switch.>	Is the check result OK?	Replace the stereo camera. <Ref. to ES-8, Stereo Camera.>	Replace the EyeSight steering switch.

14.EyeSight Temporary Code(s) Display

A: OPERATION

If the EyeSight pause code is detected from the stereo camera, all the functions of the EyeSight excluding the conventional cruise control stop temporarily and cannot be used. When the failure is resolved, the function starts operating.

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «EyeSight» and select «Enter».
5) On «Select Function» display, select «Cancel Code».
6) On «Cancel Code» display, select «EyeSight HALT Code».

NOTE:

- For detailed operation procedures, refer to “Application help”.
- Temporary stop is not released even if the lane departure warning OFF switch or pre-collision brake OFF switch is pressed.
- Depending on the situation, temporary stop may not be released even if the ignition switch is turned off.
- Up to 20 codes can be stored.
- Stored codes will be cleared by Clear Memory.
- For details on EyeSight temporary stop codes, refer to List of EyeSight temporary stop code. <Ref. to ES(diag)-72, LIST, EyeSight Temporary Code(s) Display.>

B: LIST

- List of EyeSight temporary stop code

EyeSight pause code	Item	Contents of diagnosis	Reference
E5	Stereo Camera Temporary Stop	The operation stopped temporarily due to vertical deviation of the optical axis of the stereo camera. (During CRUISE MAIN ON, "Temporary stop" is displayed in the multi-information display.)	Perform inspection concerning the item for E5 of the "CHECK LIST (CAMERA TEMPORARY STOP)". <Ref. to ES(diag)-75, CHECK LIST (CAMERA TEMPORARY STOP), LIST, EyeSight Temporary Code(s) Display.> This code may be displayed when the rear of the vehicle is lowered by the overload. When the failure is resolved, and the operation returns from the temporary stop status after driving for a while, it is normal. If this code is displayed in an ordinary use under which the vehicle is not tilted, readjust the stereo camera. <Ref. to ES-13, PROCEDURE, Camera Adjustment, Inspection.> If the same cancel code is still detected after readjustment, replace the stereo camera. <Ref. to ES-8, REMOVAL, Stereo Camera.>
CC CD		Temporary stop was performed due to the bad weather, backlight, fogged window or dirty window interfering with the recognition function of the stereo camera. And this code may be displayed also when the front of the camera is blocked by the hand or when it is very dark around the vehicle or when the vehicle is surrounded by the blanket of snow and nothing can be seen from the stereo camera. (During CRUISE MAIN ON, "Temporary stop Camera view defectiveness" is displayed in the multi-information display.)	Investigate the following items No. 1 and No. 2, and check that the possible cause of the temporary stop is applied either to No. 1 or No. 2. 1. Perform inspection concerning the item for CC and CD of the "CHECK LIST (CAMERA TEMPORARY STOP)". <Ref. to ES(diag)-75, CHECK LIST (CAMERA TEMPORARY STOP), LIST, EyeSight Temporary Code(s) Display.> When there is a relevant item in the check list, it can be the cause of malfunction. 2. Read the temporary stop count stored in the temporary stop count of current data, and check the cause of the temporary stop occurred in the past from "LIST OF CONTENTS FOR CAMERA TEMPORARY STOP: 0 — 23 COUNTS". <Ref. to ES(diag)-77, LIST OF CONTENTS FOR CAMERA TEMPORARY STOP, LIST, EyeSight Temporary Code(s) Display.> When the causes of the temporary stop for No. 1 and No. 2 correspond, drive the vehicle for a while after the cause of the temporary stop has been eliminated. If the operation returns from the temporary stop status, it is normal. (However, when the temporary stop takes place and is cancelled repeatedly, the temporary stop status is kept for a while to delay the return of the operation, which prevents the irritation.) When this is not the case, check the stereo camera and its periphery. <Ref. to ES(diag)-8, WINDSHIELD GLASS AND DASHBOARD, INSPECTION, General Description.> <Ref. to ES(diag)-12, FRONT WIPER, INSPECTION, General Description.> <Ref. to ES(diag)-13, STEREO CAMERA, INSPECTION, General Description.>
CE		The temperature of the stereo camera became excessively high or low, and the operation stopped temporarily. (During CRUISE MAIN ON, "Temporary stop Camera temperature range outside" is displayed in the multi-information display.)	Perform inspection concerning the item for CE of the "CHECK LIST (CAMERA TEMPORARY STOP)". <Ref. to ES(diag)-75, CHECK LIST (CAMERA TEMPORARY STOP), LIST, EyeSight Temporary Code(s) Display.> When the operation returns from the temporary stop status after the failure is resolved, it is normal. When the operation does not return from the temporary status even if driving the vehicle for a while after the failure has been resolved, replace the stereo camera. <Ref. to ES-8, REMOVAL, Stereo Camera.>
33		Detected when engine speed is 300 rpm or less. (Not detected at an initial ignition switch ON.) (During CRUISE MAIN ON, "Temporary stop" is displayed in the multi-information display.)	Detected when the engine speed drops below 300 rpm after the engine has started once. If the same EyeSight temporary stop code is detected again when the engine is restarted, check the ECM. <Ref. to EN(w/o STI)(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

EyeSight Temporary Code(s) Display

EyeSight pause code	Item	Contents of diagnosis	Reference
C0	Pre-Collision Second Braking Activation	The operation stopped temporarily because the pre-collision secondary brake operated three times between engine starting and stopping. (This is not a normal driving operation, or the system may be malfunctioning.) (During CRUISE MAIN ON, “Temporary stop” is displayed in the multi-information display.)	This code may be displayed when the pre-collision brake is operated intentionally. Turn the ignition switch to OFF, and restart after a while. If the operation returns from the temporary stop status, it is normal. When temporary stop status continues with a code other than C0 after restart, perform diagnosis according to the code. When temporary stop status continues with the code of C0 after restart, the stereo camera may be malfunctioning. Replace the stereo camera. <Ref. to ES-8, REMOVAL, Stereo Camera.>
A0	CAN Diagnosis	The voltage dropped below 10 V immediately after IGN ON. (During CRUISE MAIN ON, “Temporary stop” is displayed in the multi-information display.)	This code may be displayed when the engine is not started for a while with the ignition switch ON and when the engine has started after that. This is a normal operation. If this is not the case, the supply voltage may be malfunctioning. <Ref. to ES(diag)-89, DTC B2814 POWER SUPPLY LOW VOLTAGE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
A1	ECM Reprogramming	The operation stopped temporarily because the control module (CM) is being reprogrammed. (During CRUISE MAIN ON, “Temporary stop” is displayed in the multi-information display.)	After the completion of the reprogramming operation, turn the ignition to OFF and restart. If the operation returns from the temporary stop status, it is normal.
F9	EPS Input Control Suspended	The operation stopped temporarily because an assist limitation (overheat prevention control) was operated in order to prevent the electric power steering malfunction due to overheat.	This code may be displayed when the steering wheel is operated repeatedly while the vehicle is stopped or running in very low speed. After stopping the engine, leave the vehicle for approximately 30 minutes to cool down, and restart the engine. If the operation returns from the temporary stop status, it is normal.
		The operation stopped temporarily because of an electric power steering voltage decrease.	This code may be displayed when battery power is low. Replace or charge the battery, and restart the engine. If the operation returns from the temporary stop status, it is normal.
		The operation stopped temporarily because of an electric power steering bus off.	Electric power steering detected a failure and was disconnected from CAN line.
FA	EPS Input Control Suspended	The operation stopped temporarily because the center point of steering angle sensor deviated.	This code may be displayed when the center point of steering angle sensor deviates when removing and installing the steering etc. If the system returns from the temporary stop status after inspecting/adjusting the center point and driving the vehicle for a while, it is normal.
		The operation stopped temporarily because there was an excessive deviation in the alignment. (During CRUISE MAIN ON, “Temporary stop” is displayed in the multi-information display.)	This code may be displayed when vehicle underbody parts are damaged by a car accident etc, or when the underbody parts are replaced. If the system returns from the temporary stop status after replacing the parts and driving the vehicle for a while, it is normal.

NOTE:
*: Automatic adjustment by driving
1. Drive vehicle at a speed from 45 km/h (25 MPH) to 100 km/h (62 MPH).
2. Drive the vehicle so that the distance from the preceding vehicle is 40 m (131 ft) or more or there are no preceding vehicles. (To recognize both right and left white lines)
3. Drive the vehicle on a road where right and left white lines are clearly recognized and there are many straight segments. (If there are no corresponding general roads, drive the vehicle on a limited highway.)
4. Display the current data «Lane recognition status» with Subaru Select Monitor, and then drive the vehicle on a road where Subaru Select Monitor indicates 03 or 05 (the system recognizes both white lines). <Ref. to ES(diag)-24, STEREO CAMERA, OPERATION, Read Current Data.>

CAUTION:
When performing operations by one person, use Save of the current data for the Subaru Select Monitor to save «Lane recognition status». Check the saved data after stopping the vehicle.

1. CHECK LIST (CAMERA TEMPORARY STOP)

Even when the set status of the adaptive cruise control is canceled or when a temporary stop status occurs, the EyeSight temporary stop code will not be retained for the following conditions.

- When the VDC operation is stopped by pressing the VDC OFF switch
- When the pre-collision brake operation is stopped by pressing the pre-collision brake OFF switch
- When the lane departure warning is stopped by pressing the lane departure warning OFF switch
- Immediately after the engine start

When these cases does not apply but the EyeSight temporary stop code is displayed, perform the inspection according to the following items.

Item name			Yes/No	
[1]: EyeSight temporary stop code [CC, CD] (At this time, “HALT(E1 camera view defectiveness)” is displayed in the multi-information display.)				
1	Check that the current status applies to the condition that are difficult to be recognized by the stereo camera.			
	1	It was bad weather (heavy rain, snowstorm, dense fog; especially when the oil film adheres to the windshield glass, the glass coating agent is used, or when the old wiper is used).	Yes	No
	2	The vehicle was exposed to the intense light (backlight such as sunlight or headlight high-beam light) from the front of the vehicle.	Yes	No
	3	The raindrops, water drops or dirt on the windshield glass are not wiped off sufficiently.	Yes	No
	4	The windshield glass is covered with fog, snow, dirt, frost or sandy dust, and either of them blocks the visibility of the stereo camera.	Yes	No
	5	The vehicle was tilted excessively by the heavy load.	Yes	No
	6	Canoes etc. loaded on the roof blocked the visibility of the stereo camera.	Yes	No
	7	The field of view was insufficient due to water or snow raised by the preceding vehicle or oncoming vehicle, or the moisture, sand, smoke or sandy dust blown in the wind.	Yes	No
	8	The vehicle passed through the outlet or inlet of a tunnel.	Yes	No
	9	The rearmost area of preceding vehicle was small (trailer, etc.), low or uneven.	Yes	No
	10	The object was a fence or wall with even pattern (striped pattern or bricks) or unpatterned surface.	Yes	No
	11	The object was a plate of glass, mirror wall or door.	Yes	No
	12	The tail light of the preceding vehicle did not illuminate during nighttime hours or inside the tunnel.	Yes	No
	13	The vehicle passed through the banners, flags, drooping branches or grass.	Yes	No
	14	The vehicle drove on the steep uphills or steep downhills.	Yes	No
	15	Front of the camera was blocked by the hand.	Yes	No
	16	It was very dark and there was no obstacle around the vehicle.	Yes	No
	17	The surrounding ground surface was similarly colored. (There is snow as far as the eye can see.)	Yes	No
	18	Dirt such as fingerprint adhered to the lens portion of the stereo camera.	Yes	No
	19	Stable recognition was difficult because of reflection to the windshield glass.	Yes	No
	20	The stereo camera was subject to impact, and the displacement or distortion occurred.	Yes	No
[2]: EyeSight temporary stop code [CE] (At this time, “HALT(E2 camera temperature range outside)” is displayed in the multi-information display.)				
1	Check that the current status applies to the condition that the temperature of the stereo camera becomes excessively high or low.			
	1	The compartment temperature was high. (For example: The vehicle was left under the scorching sun.) Or the compartment temperature was low. (For example: The vehicle was left under the frigid environment.)	Yes	No
[3]: EyeSight temporary stop code [E5] (At this time, “Temporary stop” is displayed in the multi-information display.)				
1	Check that the current status applies to the condition that the vertical deviation occurs on the stereo camera optical axis.			
	1	The vehicle was tilted excessively by the heavy load.	Yes	No
	2	The vehicle drove on the steep uphills or steep downhills.	Yes	No
	3	The stereo camera was subject to impact, and the displacement or distortion occurred.	Yes	No
[4]: EyeSight temporary stop code [33] (At this time, “Temporary stop” is displayed in the multi-information display.)				
1	Check that the current status applies to the condition that the engine speed drops to 300 rpm or below.		Yes	No
[5]: EyeSight temporary stop code [C0] (At this time, “Temporary stop” is displayed in the multi-information display.)				
1	Check that the current status applies to the condition that the pre-collision secondary brake operated three times between starting and stopping of engine.		Yes	No

EyeSight Temporary Code(s) Display

	Item name	Yes/No	
[6]: EyeSight temporary stop code [A0] (At this time, “Temporary stop” is displayed in the multi-information display.)			
1	Check that the current status applies to the condition that the voltage dropped below 10 V immediately after the ignition ON.	Yes	No
[7]: EyeSight temporary stop code [A1] (At this time, “Temporary stop” is displayed in the multi-information display.)			
1	Check that the control module (CM) is currently being reprogrammed.	Yes	No
[8]: EyeSight temporary stop code [F9] (At this time, “Temporary stop” is displayed in the multi-information display.)			
1	Check that the current status applies to the condition that the steering wheel is operated repeatedly when the vehicle stops or moves very slowly.	Yes	No
[9]: EyeSight temporary stop code [FA] (At this time, “Temporary stop” is displayed in the multi-information display.)			
1	Check that this is applied to the condition that the wheel alignment is extremely misaligned.	Yes	No
2	Check that this is applied to the condition that the center point of the steering angle sensor is misaligned.	Yes	No

2. LIST OF CONTENTS FOR CAMERA TEMPORARY STOP

Read the camera temporary stop count from Current Data Display & Save of Subaru Select Monitor, estimate the possible cause of the temporary stop according to the chart below. (After clearing the memory, the number of occurrences for each temporary stop is accumulated.)

Displayed item	Main causes	Possible conditions for temporary stop (including events occurring less frequently)
EyeSight Temporary 0 Count	Front of the camera is blocked by hand, dirty window glass	Backlight, dirty window glass, fogged window glass, frost on the window glass, oil film on the window glass, raindrop adhering to the window glass, fingerprint adhering to the lens, deteriorated wiper, front of the camera is blocked by hand, bad weather (heavy rain, snowstorm, dense fog), unpatterned wall, water or snow raised by preceding vehicle
EyeSight Temporary 1 Count	Front of the camera is blocked by hand, dirty window glass	Backlight, dirty window glass, fogged window glass, frost on the window glass, oil film on the window glass, raindrop adhering to the window glass, fingerprint adhering to the lens, deteriorated wiper, front of the camera is blocked by hand, bad weather (heavy rain, snowstorm, dense fog), water or snow raised by preceding vehicle, very dark and no obstacle around the vehicle, unpatterned wall, blanket of snow around the vehicle and no obstacle is found
EyeSight Temporary 2 Count	Fogged window glass, frost on the window glass	Dirty window glass, fogged window glass, frost on the window glass, oil film on the window glass, raindrop adhering to the window glass, fingerprint adhering to the lens, deteriorated wiper, front of the camera is blocked by hand, bad weather (heavy rain, snowstorm, dense fog), unpatterned wall, water or snow raised by preceding vehicle
EyeSight Temporary 3 Count	Backlight	Backlight, dirty window glass, fogged window glass, frost on the window glass, oil film on the window glass, raindrop adhering to the window glass, fingerprint adhering to the lens, deteriorated wiper, bad weather (heavy rain, snowstorm, dense fog), unpatterned wall, water or snow raised by preceding vehicle
EyeSight Temporary 4 Count	Water raised by preceding vehicle	Backlight, dirty window glass, fogged window glass, frost on the window glass, oil film on the window glass, raindrop adhering to the window glass, fingerprint adhering to the lens, deteriorated wiper, front of the camera is blocked by hand, bad weather (heavy rain, snowstorm, dense fog), unpatterned wall, water or snow raised by preceding vehicle, use of the window washer
EyeSight Temporary 5 Count	Dirty window glass, fogged window glass, oil film on the window glass	Dirty window glass, fogged window glass, frost on the window glass, oil film on the window glass, raindrop adhering to the window glass, fingerprint adhering to the lens, deteriorated wiper, bad weather (heavy rain, snowstorm, dense fog), water or snow raised by preceding vehicle
EyeSight Temporary 6 Count	Storm of rain	Dirty window glass, fogged window glass, frost on the window glass, oil film on the window glass, raindrop adhering to the window glass, fingerprint adhering to the lens, deteriorated wiper, bad weather (heavy rain, snowstorm, dense fog), water or snow raised by preceding vehicle, use of the window washer
EyeSight Temporary 7 Count	Object on the dashboard reflected against the windshield glass	Object on the dashboard reflected against the windshield glass, snowstorm
EyeSight Temporary 8 Count	Dirty window glass, bad weather	Backlight, dirty window glass, fogged window glass, frost on the window glass, oil film on the window glass, raindrop adhering to the window glass, fingerprint adhering to the lens, deteriorated wiper, front of the camera is blocked by hand, object on the dashboard reflected against the windshield glass, bad weather (heavy rain, snowstorm, dense fog), unpatterned wall, water drop raised by preceding vehicle, steep slope, continuous sharp curve, banner, grass, preceding vehicle with large uneven surface (trailer, etc.), preceding vehicle driving in the night without illuminating the tail light, preceding vehicle with snow adhered, use of the window washer
EyeSight Temporary 9 Count	Not used	—
EyeSight Temporary 10 Count	Not used	—

EyeSight Temporary Code(s) Display

Displayed item	Main causes	Possible conditions for temporary stop (including events occurring less frequently)
EyeSight Temporary 11 Count	Not used	—
EyeSight Temporary 12 Count	Camera has been deformed by hitting it.	The stereo camera was subject to impact, and the displacement or distortion occurred.
EyeSight Temporary 13 Count	Not used	—
EyeSight Temporary 14 Count	Not used	—
EyeSight Temporary 15 Count	Not used	—
EyeSight Temporary 16 Count	Not used	—
EyeSight Temporary 17 Count	Not used	—
EyeSight Temporary 18 Count	Not used	—
EyeSight Temporary 19 Count	Not used	—
EyeSight Temporary 20 Count	Not used	—
EyeSight Temporary 21 Count	The vehicle is tilted excessively by the heavy load.	• The vehicle is tilted excessively by the heavy load. • The vehicle drives on the steep uphills or steep downhills. • The stereo camera was subject to impact, and the displacement or distortion occurred.
EyeSight Temporary 22 Count	Camera has been deformed by hitting it.	The stereo camera was subject to impact, and the displacement or distortion occurred.
EyeSight Temporary 23 Count	Camera has been deformed by hitting it.	The stereo camera was subject to impact, and the displacement or distortion occurred.
EyeSight Temporary 24 Count	Camera has been deformed by hitting it.	The stereo camera was subject to impact, and the displacement or distortion occurred.
EyeSight Temporary 25 Count	Camera has been deformed by hitting it.	The stereo camera was subject to impact, and the displacement or distortion occurred.
EyeSight Temporary 26 Count	Dirty window glass left for a long time	Dirty window glass, fogged window glass, frost on the window glass, raindrop adhering to the window glass, fingerprint adhering to the lens
EyeSight Temporary 27 Count	Not used	—
EyeSight Temporary 28 Count	Can't see anything in a complete darkness.	The vehicle drove in a complete darkness with the headlight turned off. Or, the camera was blinded when driving.
EyeSight Temporary 29 Count	Not used	—
EyeSight Temporary 30 Count	Not used	—
EyeSight Temporary 31 Count	In a high temperature of 70°C (158°F) or more or in a low temperature of –10°C (14°F) or less	—

15.ECM Cancel Code(s) Display

A: OPERATION

1) On «Main Menu» display, select «Each System».
On «Select System» display, select «Engine Control System».
2) Drive vehicle at 40 km/h (25 MPH) or more and set the cruise control.

CAUTION:
- **When performing diagnosis, observe the legal speed limit on the road.**
- **The cancel code will also appear when the cruise control is cancelled by the driver's operation. Do not confuse them.**
- **Be sure to get an assistant to support the diagnosis while driving, and have him/her operate the select monitor.**

3) When the set speed is cancelled by itself (without any cancel operations such as applying brake) or when the cruise control could not be set by performing the setting operation, select the «Cancel Code(s) Display» on the engine malfunction diagnosis screen.

NOTE:
The «Current» and «The past» are contained in the cancel code. The latest code recognized during current test drive is displayed in «Current». Cancel codes resulting from fault diagnosis of switches relating to the system and cruise control are also displayed in «The past».
4) Perform Engine DTC Clear Memory operation. <Ref. to EN(w/o STI)(diag)-82, OPERATION, Clear Memory Mode.>
Cancel codes for switches relating to the system and cruise control are deleted by clearing memory on the engine side.

NOTE:
- For detailed operation procedures, refer to “Application help”.
- The latest code will be cleared by turning ignition switch to OFF.
- For details on cancel codes, refer to List of ECM cruise control cancel code. <Ref. to ES(diag)-80, LIST, ECM Cancel Code(s) Display.>

B: LIST

• List of ECM cruise control cancel code(s)
When the cruise control is cancelled, the ECM outputs the following cancel codes.

Cancel code	Item	Contents of diagnosis	Reference
11	Main switch	Main switch of the EyeSight steering switch is turned to OFF, and the cruise control is released.	This DTC is displayed without operating the main switch. <Ref. to ES(diag)-111, 11, Diagnostic Procedure with ECU Cancel Code.>
12	Stop & Brake switch	Stop light switch or brake switch is turned to ON, and then the cruise control is released.	This DTC is displayed without depressing the brake pedal. <Ref. to ES(diag)-112, 12, Diagnostic Procedure with ECU Cancel Code.>
14	Neutral switch	Neutral position switch is turned to ON, and then the cruise control is released.	This DTC is displayed without shifting to neutral position. <Ref. to ES(diag)-114, 14, Diagnostic Procedure with ECU Cancel Code.>
15	Cancel switch	Cancel switch is turned to ON, and then the cruise control is released.	This DTC is displayed without operating the cancel switch. <Ref. to ES(diag)-115, 15, Diagnostic Procedure with ECU Cancel Code.>
16	Ignition switch	Ignition switch is turned to OFF, and then the cruise control is released.	This DTC is displayed without operating the ignition switch. <Ref. to ES(diag)-115, 16, Diagnostic Procedure with ECU Cancel Code.>
21	Abnormality of switches when Ignition switch on	When the ignition switch is turned to ON, each switch of the EyeSight steering switch is already turned ON.	This DTC is displayed when turning ignition switch to ON without operating the EyeSight steering switch. <Ref. to ES(diag)-115, 21, Diagnostic Procedure with ECU Cancel Code.>
22	Abnormality of change in vehicle speed	Malfunction of vehicle speed signal variation is detected.	<Ref. to ES(diag)-116, 22, Diagnostic Procedure with ECU Cancel Code.>
24	Abnormality of switches related to cruise control	Open circuit of the EyeSight steering switch is detected during cruise driving. (The system is judged as model without cruise control.)	This DTC is displayed with normal operation. <Ref. to ES(diag)-116, 24, Diagnostic Procedure with ECU Cancel Code.>
31	Engine Speed	• Abnormal increase of engine speed is detected. • Gear is placed in Neutral, 1st or Reverse position.	Cruise in 2nd shift position or more. <Ref. to ES(diag)-116, 31, Diagnostic Procedure with ECU Cancel Code.>
32	Cruse Control out of Range	• Vehicle speed exceeds the controllable range during cruising. • Set operation was performed at vehicle speed unavailable for setting. • RESUME operation was performed without memorized vehicle speed.	This DTC is displayed, though the vehicle speed is increased to the speed available for cruise set and set operation was performed again. <Ref. to ES(diag)-116, 32, Diagnostic Procedure with ECU Cancel Code.>
34	Prohibition of cruise control at continuing big Accel. angle	The vehicle has been driven at higher speed than set vehicle speed for an abnormally long time (approximately 10 minutes) during cruise driving.	<Ref. to ES(diag)-116, 34, Diagnostic Procedure with ECU Cancel Code.>
35	Prohibition of cruise control at vehicle speed F/B malfunction	Set vehicle speed cannot be kept because of some reasons (steep uphill, parking brake, abnormal decrease of engine output, etc.) during cruise driving.	<Ref. to ES(diag)-116, 35, Diagnostic Procedure with ECU Cancel Code.>
41	VDC/TCS Operating	Vehicle dynamics control (VDC), TCS or EPB is operated during cruise driving or cruise setting.	<Ref. to ES(diag)-117, 41, Diagnostic Procedure with ECU Cancel Code.>
43	ABS/VDC Failure	When the cruise switch is ON, ABS or vehicle dynamics control (VDC) system malfunction is detected.	<Ref. to ES(diag)-117, 43, Diagnostic Procedure with ECU Cancel Code.>

Cancel code	Item	Contents of diagnosis	Reference
44	Body Integrated unit Failure	When the cruise switch is ON, body integrated unit system malfunction is detected.	<Ref. to ES(diag)-117, 44, Diagnostic Procedure with ECU Cancel Code.>
45	Meter Failure	When the cruise switch is ON, combination meter malfunction is detected.	<Ref. to ES(diag)-117, 45, Diagnostic Procedure with ECU Cancel Code.>
47	Adaptive cruise control ECM abnormal	When the cruise switch is ON, stereo camera malfunction is detected.	Check the DTCs related to stereo camera.
49	TCM Failure	Transmission control module (TCM) malfunction is detected during cruise driving or cruise setting.	<Ref. to ES(diag)-117, 49, Diagnostic Procedure with ECU Cancel Code.>
53	Adaptive Cruise Control Forced Cancel	Stereo camera detects the release command of the cruise control during cruise driving or cruise setting operation.	Check the stereo camera. Check the ACC cancel code. <Ref. to ES(diag)-82, ACC Cancel Code(s) Display.>
54	Release SW	Brake control module detects the brake pedal operation by the driver during cruise driving or cruise setting operation.	If this code is detected when the brake pedal is not depressed intentionally, check the release switch.
55	Adaptive cruise control reception data abnormal	When the cruise switch is ON, malfunction is detected in the reception data from the stereo camera.	Check the cancel code of stereo camera.
61	Brake Switch Failure	Malfunction in the stop light & brake switch is detected.	<Ref. to ES(diag)-117, 61, Diagnostic Procedure with ECU Cancel Code.>
62	Neutral Switch Failure	Neutral position switch malfunction is detected.	<Ref. to ES(diag)-117, 62, Diagnostic Procedure with ECU Cancel Code.>
63	Abnormality 1 of change in vehicle speed	Malfunction of vehicle speed signal variation is detected. This code may be displayed by a sudden starting of the vehicle on a road with low μ and with the VDC OFF. In this case, restart the engine and perform the cruise setting again. If the cancel code is not displayed, the vehicle is in normal status.	<Ref. to ES(diag)-117, 63, Diagnostic Procedure with ECU Cancel Code.>
64	Engine Sensor Failure 1	Malfunction related to engine is detected.	<Ref. to ES(diag)-118, 64, Diagnostic Procedure with ECU Cancel Code.>
65	Abnormality 1 of switches related to cruise control	Malfunction of the EyeSight steering switch is detected. (When the switch is pressed ON for a long time (approximately two minutes), stuck ON condition is detected.)	<Ref. to ES(diag)-118, 65, Diagnostic Procedure with ECU Cancel Code.>
66	Cruise Control Calculation Error	Malfunction of the cruise control calculation (microcomputer) is detected.	<Ref. to ES(diag)-118, 66, Diagnostic Procedure with ECU Cancel Code.>

16.ACC Cancel Code(s) Display

A: OPERATION

When the ACC cancel code is detected from the stereo camera, the cruise control will be cancelled.
1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «EyeSight» and select «Enter».
5) On «Select Function» display, select «Cancel Code».
6) On «Cancel Code» display, select «ACC Cancel Code(s) Display».

NOTE:
- For detailed operation procedures, refer to “Application help”.
- Up to 8 codes can be stored. When more than eight codes are output, the oldest code will be deleted to store the latest code.
- Stored codes will be cleared by Clear Memory.
- For details on ACC cancel codes, refer to List of ACC cancel code. <Ref. to ES(diag)-82, LIST, ACC Cancel Code(s) Display.>

B: LIST

- List of ACC cancel code(s)

ACC cancel code	Item	Contents of diagnosis
02	Adaptive mode: Stop holding	Displayed when the cruise control is cancelled after the own vehicle stops following the preceding vehicle.
04	Adaptive mode: Camera temporary stop	Displayed when the cruise control is canceled by the EyeSight temporarily stop while driving in the adaptive cruise mode.
08	Common:Vehicle Speed Sensor Abnormal	Displayed when the cruise control is canceled due to a wheel speed sensor malfunction.
09	Common: Brake operation	Displayed when the cruise control is canceled by the brake operation of the driver.
0A	Common: Pre-crash brake	Displayed when the cruise control is canceled because the pre-collision brake function is activated.
0B	Common: AT manual mode	Displayed when the cruise control is canceled because the AT manual mode is selected or paddle operation is performed.
0C	Common: VDC switch OFF	Displayed when the VDC function is turned OFF by the VDC OFF switch and the cruise control is canceled.
0D	Common:Any Door is Opened	Displayed when the cruise control is canceled because either of the driver’s door, passenger’s door, or rear doors is opened.
0E	Common:Driver Seat Belt Unfastened	Displayed when the cruise control is canceled because the driver’s seat belt is unfastened.
0F	Common: EPB operation	Displayed when the cruise control is canceled because the EPB is activated.
10	Common: EPB special mode	Displayed when the cruise control is canceled by an irregular operation of a driver, which repeats activation/deactivation of the EPB.
11	Common: High speed	This item is displayed when the own vehicle speed becomes approximately 160 km/h (99 MPH) or more and the cruise control is canceled.
12	Common:AT Gear Range	Displayed in the following situations: The driver performed the SET or RES operation to drive the vehicle either in the adaptive cruise mode or in the constant speed mode, but that operation was not accepted because it was done immediately after shifting into D range.
13	Common:Steep Sloping Road	Displayed when the road surface was judged to be too steep and therefore the cruise control is canceled.
14	Common: ABS operation	Displayed when the cruise control is canceled because the ABS is activated.
15	Common: Large steering operation	Displayed when the cruise control is canceled because the steering wheel is fully turned.
16	Adaptive mode: Stop judgment	Displayed when the cruise control is cancelled after the own vehicle stops following the preceding vehicle while driving in the adaptive cruise control mode.

ACC cancel code	Item	Contents of diagnosis
17	Common:Parking Brake Activation	Displayed when the cruise control is cancelled because the parking brake is applied.
18	Adaptive mode: Stop forced cancellation	Displayed when the cruise control is cancelled under the following situations: The own vehicle stops following the preceding vehicle while driving in the adaptive cruise control mode, and the driver repeats the SET or RES operation and the automatic brake control continues for 120 seconds.
19	Common:X-Mode	Displayed when the cruise control is canceled because the X mode is activated.
1B	Common:VDC Activation	Displayed when the cruise control is canceled because the VDC is activated.
1C	Common:Cancel SW Operation	This item is displayed when the cruise control is canceled by the operation of CANCEL switch.
1D	Common:Cruise SW OFF	This item is displayed when the cruise control is canceled by turning the cruise switch OFF.
1E	CC Mode:Max Speed Exceeded	Displayed when the cruise control is canceled because the own vehicle speed exceeds the controllable range while driving in the constant speed mode.
1F	ACC Mode:Max Speed Exceeded	Displayed when the cruise control is canceled because the own vehicle speed exceeds the controllable range while driving in the adaptive cruise mode.

NOTE:
- “Adaptive cruise mode”: Adaptive cruise control
- “Constant speed mode”: Conventional cruise control
- “Common”: Adaptive cruise control and conventional cruise control

17.Active Lane Keep System Code(s) Display

A: OPERATION

Lane Departure Prevention Deactivate Code(s) Display: The lane departure prevention deactivate code is output, when the lane keep (lane departure prevention) is canceled during the operation or the standby state is canceled.

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «EyeSight» and select «Enter».
5) On «Select Function» display, select «Cancel Code».
6) On «Cancel Code» display, select «Lane Departure Prevention Assist Deactivate Code(s) Display».

NOTE:

- For detailed operation procedures, refer to “Application help”.
- Up to 8 codes can be stored. When more than eight codes are output, the oldest code will be deleted to store the latest code.
- Stored codes will be cleared by Clear Memory.
- For details on lane keep assist codes, refer to List of lane keep assist code. <Ref. to ES(diag)-84, OPERATION, Active Lane Keep System Code(s) Display.>

B: LIST

- List of lane keep assist code

Code	Item	Contents of diagnosis
04	Lateral Acceleration is Large	Detected when control output value exceeds the controllable range by a driving operation such as rounding a curve at high speed or making a sharp turn.
0C	Lane Recognition Prohibition(Environmental Factor)	Detected when a driving lane width is narrowed.
18	Out of Control Return Possibility Range	Detected when lane departure prevention control continues for a predetermined time.
37	Yaw Rate Sensor Abnormal(Control)	Detected when the difference between actual yaw rate and expected yaw rate becomes the specified value or more.
50	Camera Adjustment Abnormal 1	Detected when the accuracy of camera learning values is not sufficient. Usually detected after replacing the camera and performing an aiming, and resolved by an automatic adjustment while driving.
52	Yaw Rate Sensor Abnormal(Recognition)	Detected when the vehicle weaves all over the road or when the camera condition is not good and therefore white lines are not correctly recognized.

18.Diagnostic Procedure with Diagnostic Trouble Code (DTC)

A: DTC U0073 CONTROL MODULE COMMUNICATION BUS OFF

Detected when an error occurs in the CAN line. (Bus off)

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

B: DTC U0100 LOST COMMUNICATION WITH ECM/PCM “A”

Detected when CAN data from engine control module (ECM) is not transmitted to stereo camera.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

C: DTC U0101 LOST COMMUNICATION WITH TCM

Detected when CAN data from TCM is not transmitted to stereo camera.
When lost communication with TCM and TCM abnormal occur simultaneously, perform diagnosis for lost communication with TCM first.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

D: DTC U0122 LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE

Detected when CAN data from VDC is not transmitted to stereo camera.
When lost communication with vehicle dynamics control and vehicle dynamics control module abnormal or VDC echo back disagreement occur simultaneously, perform diagnosis for lost communication with vehicle dynamics control first.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

E: DTC U0126 LOST COMMUNICATION WITH STEERING ANGLE SENSOR MODULE

Detected when CAN data from steering angle sensor is not transmitted to stereo camera.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

F: DTC U0131 LOST COMMUNICATION WITH POWER STEERING CONTROL MODULE

Detected when CAN data from EPS CM is not transmitted to stereo camera.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

G: DTC U0140 LOST COMMUNICATION WITH BODY CONTROL MODULE

Detected when CAN data from body integrated unit is not transmitted to stereo camera.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

H: DTC U0155 LOST COMMUNICATION WITH INSTRUMENT PANEL CLUSTER (IPC) CONTROL MODULE

Detected when CAN data from combination meter is not transmitted to stereo camera.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

I: DTC U0401 INVALID DATA RECEIVED FROM ECM/PCM “A”

Failure counter diagnosis of engine control module (ECM)

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

J: DTC U0402 INVALID DATA RECEIVED FROM TCM

Failure counter diagnosis of automatic transmission control module (TCM)

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

K: DTC U0416 INVALID DATA RECEIVED FROM VEHICLE DYNAMICS CONTROL MODULE

Failure counter diagnosis of VDC control module (VDC CM)

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

L: DTC U0420 INVALID DATA RECEIVED FROM POWER STEERING CONTROL MODULE

Failure counter diagnosis of EPS CM

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

M: DTC U0422 INVALID DATA RECEIVED FROM BODY CONTROL MODULE

Failure counter diagnosis of body integrated unit

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

N: DTC U0423 INVALID DATA RECEIVED FROM INSTRUMENT PANEL CLUSTER CONTROL MODULE

Failure counter diagnosis of combination meter

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

O: DTC U0428 INVALID DATA RECEIVED FROM STEERING ANGLE SENSOR MODULE

Failure counter diagnosis of steering angle sensor

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

P: DTC U1073 CONTROL MODULE COMMUNICATION BUS "SONAR-CAN" OFF

Detected when the bus off status (the stereo camera detects the failure and is disconnected from the local CAN line) occurs.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

Q: DTC U1233 LOST COMMUNICATION WITH RAB CONTROL MODULE

Detected when CAN data from RAB CM did not reach the stereo camera.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

R: DTC U1534 INVALID DATA RECEIVED FROM SONAR ECU

Failure counter diagnosis of RAB CM.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

S: DTC B2801 TCM ABNORMAL

Detected when error occurs in the automatic transmission.
When lost communication with TCM and TCM abnormal occur simultaneously, perform diagnosis for lost communication with TCM first.

NOTE:
Check the automatic transmission. <Ref. to CVT(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

T: DTC B2802 ETC ABNORMAL

Detected when error occurs in the electronic throttle control.

NOTE:
Check the electronic throttle control. <Ref. to EN(w/o STI)(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

U: DTC B2803 EPB OPERATION PROHIBIT

EPB operation is prohibited.
When the DTC is detected by the brake maintenance mode for VDC, the system malfunction does not exist. Therefore, perform Clear Memory Mode. <Ref. to ES(diag)-49, Clear Memory Mode.>

NOTE:
Check the VDC. <Ref. to VDC(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

V: DTC B2804 EPB NO ACTIVITY DETECTED

EPB control is abnormal.

NOTE:
Check the VDC. <Ref. to VDC(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

W: DTC B2806 ECM ABNORMAL

Detected when error occurs in the engine control module (ECM).

NOTE:
Perform check of the ECM. <Ref. to EN(w/o STI)(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

X: DTC B2807 ECM ABNORMAL

Detected when cruise indicator illumination request from ECM and ON/OFF information of cruise function do not match.

NOTE:
Perform check of the ECM. <Ref. to EN(w/o STI)(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

Y: DTC B2809 VDC MALFUNCTION

Detected when error occurs in the VDC. (VDC failure)
When lost communication with vehicle dynamics control and vehicle dynamics control module abnormal or VDC echo back disagreement occur simultaneously, perform diagnosis for lost communication with vehicle dynamics control first.

NOTE:
Check the VDC. <Ref. to VDC(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

Z: DTC B280A VDC ECHO BACK DISAGREEMENT

Detected when error occurs in the VDC. (VDC brake control malfunction 1)
When lost communication with vehicle dynamics control and vehicle dynamics control module abnormal or VDC echo back disagreement occur simultaneously, perform diagnosis for lost communication with vehicle dynamics control first.

NOTE:
Check the VDC. <Ref. to VDC(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AA:DTC B280B VDC BRAKE FLUID PRESSURE

Detected when error occurs in the VDC. (VDC brake control malfunction 3)

NOTE:
Check the VDC. <Ref. to VDC(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AB:DTC B280F COMBINATION METER MALFUNCTION

Malfunction is detected in the combination meter.
DTC DETECTING CONDITION:
Defective combination meter
TROUBLE SYMPTOM:
- All functions of EyeSight system do not operate.
- EyeSight warning light blinks or illuminates.
- Combination meter does not illuminate.

NOTE:
Check the combination meter. <Ref. to IDI-9, INSPECTION, Combination Meter System.>

AC:DTC B2810 INCOMPATIBLE WITH EyeSight (COMBINATION METER)

Detected when the combination meter, which is not designed exclusively for EyeSight is installed.
DTC DETECTING CONDITION:
Incorrect specifications of combination meter
TROUBLE SYMPTOM:
All functions of EyeSight system do not operate.

NOTE:
Replace the combination meter with the one designed for EyeSight. <Ref. to IDI-13, Combination Meter.>

AD:DTC B2811 EPS ABNORMAL

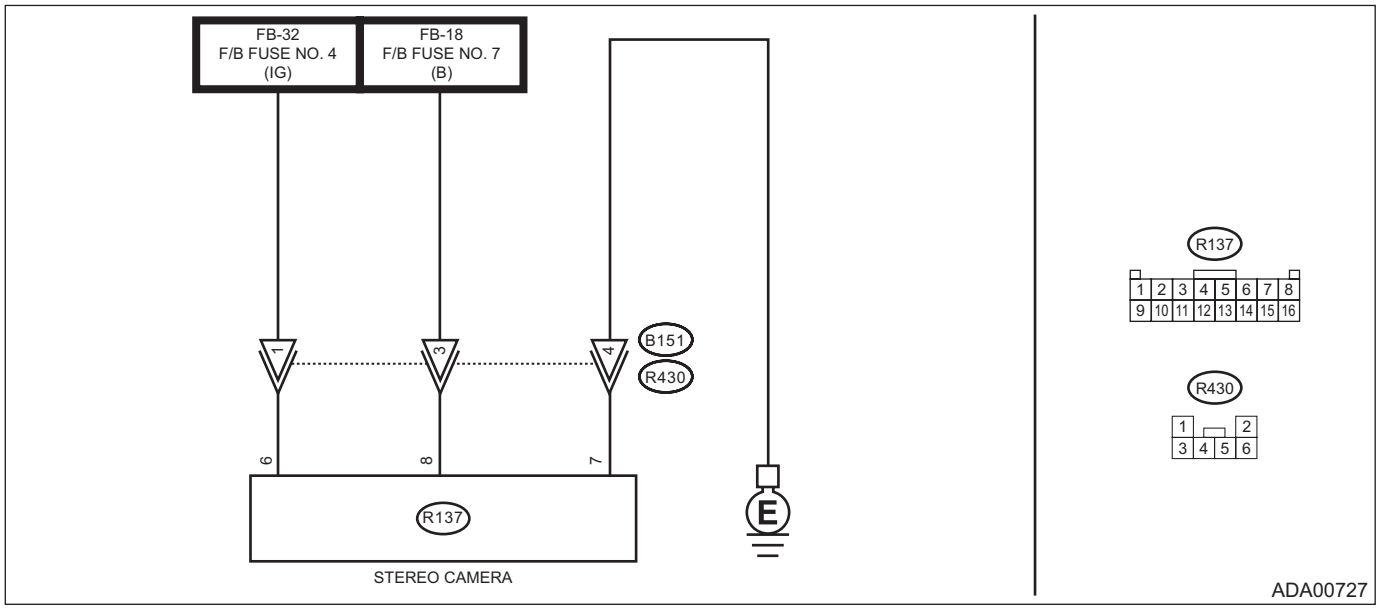
Malfunction is detected in the electric power steering.

NOTE:
Check the electric power steering. <Ref. to PS(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AE:DTC B2814 POWER SUPPLY LOW VOLTAGE

Detected when the status of 7.0 V or less continues approximately for 5 seconds and is judged to be low-voltage malfunction, or when the +B harness of the stereo camera is broken.

DTC DETECTING CONDITION:



- Input voltage to stereo camera is out of specifications.
- Defective stereo camera control harness (open circuit in +B harness)
- Defective stereo camera

TROUBLE SYMPTOM:

- All functions of EyeSight system do not operate.
- EyeSight warning light blinks or illuminates.
- Cruise indicator light blinks.
- Malfunction indicator light illuminates.
- VDC warning light illuminates.
- ATF temperature warning light illuminates.

WIRING DIAGRAM:

EyeSight System <Ref. to WI-222, WIRING DIAGRAM, EyeSight System.>

Step		Check	Yes	No
1	**CHECK GENERATOR.** 1) Start the engine and idle for a while. 2) Measure the voltage between generator terminal B and chassis ground. ***Connector & terminal*** ***Generator terminal B (+) — Chassis ground (–):***	Is the voltage 10 V or more?	Go to step **2**.	Check the generator. <Ref. to SC(STI)-18, Generator.> <Ref. to SC(w/o STI)-31, Generator.>
2	**CHECK BATTERY TERMINAL.** Turn the ignition switch to OFF.	Is the battery terminal connected securely?	Go to step **3**.	Tighten the battery terminal securely.
3	**CHECK FUSE.** Check the fuse. <Ref. to ES-5, Relay and Fuse.>	Is the check result OK?	Go to step **4**.	Replace the faulty fuse. When the replaced fuse blows out easily, check the short circuit in harness.

	Step	Check	Yes	No
4	**CHECK HARNESS (POWER SUPPLY CIRCUIT).** 1) Disconnect the stereo camera. 2) Turn the ignition switch to ON. 3) Measure the voltage between harness connector of stereo camera and chassis ground. ***Connector & terminal*** ***(R137) No. 6 (+) — Chassis ground (–):*** ***(R137) No. 8 (+) — Chassis ground (–):***	Is the voltage 10 V or more?	Go to step **5**.	Check the power supply system circuit, and if any fault is found, repair the defective parts or replace the harness.
5	**CHECK HARNESS (GROUND CIRCUIT).** 1) Turn the ignition switch to OFF. 2) Disconnect the ground cable from battery. 3) Measure the resistance between stereo camera and chassis ground. ***Connector & terminal*** ***(R137) No. 7 — Chassis ground:***	Is the resistance less than 10 Ω?	Go to step **6**.	Check the ground system circuit, and if any fault is found, repair the defective parts or replace the harness.
6	**CHECK POOR CONTACT OF CONNECTORS.** Check stereo camera connector.	Is there poor contact of the connector?	Repair the connector.	Go to step **7**.
7	**CHECK STEREO CAMERA.** 1) Connect all connectors and battery terminals securely. 2) Start the engine, drive the vehicle at 40 km/h (25 MPH) or more, stop the vehicle and then stop the engine. 3) After 3 seconds or more have elapsed, restart the engine. 4) Clear the memory. <Ref. to ES(diag)-49, Clear Memory Mode.> 5) Read the DTC. <Ref. to ES(diag)-43, Diagnostic Code(s) Display.>	Is DTC B2814 or B2815 displayed?	Replace the stereo camera. <Ref. to ES-8, REMOVAL, Stereo Camera.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, or temporary open or short circuit of harness may be the cause.

AF:DTC B2815 POWER SUPPLY HIGH VOLTAGE

Detected when the status for the battery voltage of 16 V or more continues approximately for 5 seconds and is judged to be abnormally high voltage.
Refer to DTC B2814 for DTC detecting condition, trouble symptom and diagnostic procedure. <Ref. to ES(diag)-89, DTC B2814 POWER SUPPLY LOW VOLTAGE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

AG:DTC B2817 BRAKE LAMP

DTC DETECTING CONDITION:

- Defective brake light relay
- Defective brake light switch
- Defective VDC

TROUBLE SYMPTOM:

- All functions of EyeSight system do not operate.
- EyeSight warning light illuminates.
- Brake light does not go off or illuminate.

NOTE:
When DTC B2817 is detected, check VDC system. <Ref. to VDC(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AH:DTC B281B STEERING ANGLE SENSOR FAIL

DTC DETECTING CONDITION:
Defective steering angle sensor
TROUBLE SYMPTOM:
All functions of EyeSight system do not operate.

NOTE:
Check the steering angle sensor. <Ref. to VDC(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AI: DTC B281C INCOMPATIBLE WITH EyeSight (EPS)

Detected when the EPS CM which is not exclusively for EyeSight is installed.
DTC DETECTING CONDITION:
Incorrect specifications of EPS CM.
TROUBLE SYMPTOM:
All functions of EyeSight system do not operate.

NOTE:
Replace the EPS CM with the one exclusively designed for EyeSight.

AJ:DTC B281E RAB CONTROL MODULE

DTC DETECTING CONDITION:
- Defective RAB CM.
- Defective unit that is cooperatively controlled with stereo camera.

TROUBLE SYMPTOM:
- The Reverse Automatic Braking function does not operate.
- RAB warning light illuminates.
- All functions of EyeSight do not operate. (Functions terminated due to a cooperative control unit failure)
- EyeSight warning light illuminates. (Functions terminated due to a cooperative control unit failure)

	Step	Check	Yes	No
1	**CHECK DTCS (DETERMINING A FAILURE OF COOPERATIVE CONTROL UNIT).** Read the DTC related to EyeSight using the Subaru Select Monitor. <Ref. to ES(diag)-43, Diagnostic Code(s) Display.>	Is DTC other than DTC B281E displayed?	Perform the diagnosis for the displayed DTCs.	Go to step **2**.
2	**CHECK DTC.** Read the DTC related to the Reverse Automatic Braking using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs.	Finish the diagnosis.

AK:DTC B281F Reverse Automatic Braking OVERRIDE

DTC DETECTING CONDITION:
Defective RAB CM.

TROUBLE SYMPTOM:
- The Reverse Automatic Braking function does not operate.
- RAB warning light illuminates.

NOTE:
Check the Reverse Automatic Braking. <Ref. to RAB(diag)-2, Basic Diagnostic Procedure.>

AL:DTC B2821 Reverse Automatic Braking CONTROL PROHIBITION

DTC DETECTING CONDITION:
Defective RAB CM.

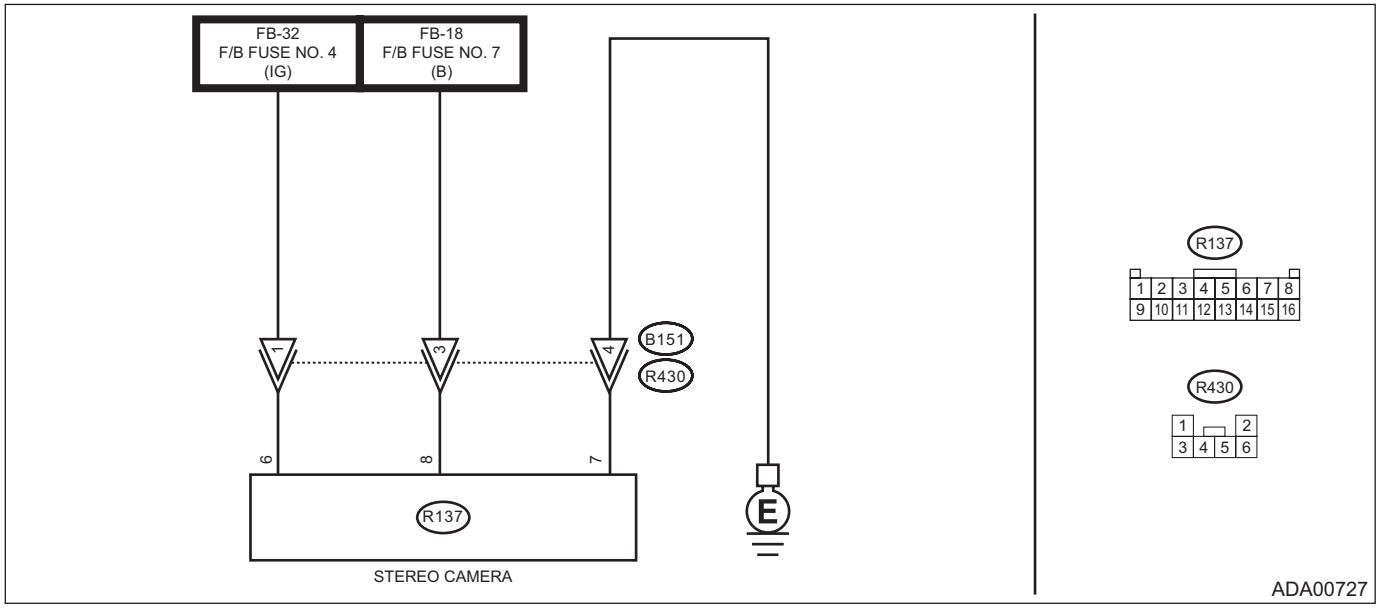
TROUBLE SYMPTOM:
- The Reverse Automatic Braking function does not operate.
- RAB warning light illuminates.

NOTE:
Check the Reverse Automatic Braking. <Ref. to RAB(diag)-2, Basic Diagnostic Procedure.>

AM:DTC B28A0 VEHICLE MODEL JUDGMENT

Detected when the model code for stereo camera and the model code used for CAN data are different.

DTC DETECTING CONDITION:



- Defective CAN system
- Defective stereo camera
- In the aiming operation, there is an open circuit in the +B harness of the stereo camera.
- In the completion of the aiming operation, the switching from IGN OFF to IGN ON takes place too early, and the recording of the model information has not yet been finished.

TROUBLE SYMPTOM:

- All functions of EyeSight system do not operate.
- EyeSight warning light illuminates.

WIRING DIAGRAM:

EyeSight System <Ref. to WI-222, WIRING DIAGRAM, EyeSight System.>

Step		Check	Yes	No
1	**CHECK RELATED CM.** Check the part number of the ECM, TCM, VDC CM and combination meter.	Is each CM a genuine part?	Go to step **2**.	Replace the non-genuine CM with a genuine one.
2	**CHECK STEREO CAMERA.** 1) Remove the camera cover. 2) Check the part number of the stereo camera.	Is the stereo camera genuine?	Go to step **3**.	Replace the stereo camera. <Ref. to ES-8, REMOVAL, Stereo Camera.>
3	**CHECK LAN SYSTEM.** Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Is DTC for LAN system displayed?	Perform the diagnosis of DTCs for LAN system.	Go to step **4**.
4	**CHECK MODEL REGISTRATION INFORMATION.** Check the «Model registration information» from the current data of stereo camera. <Ref. to ES(diag)-24, Read Current Data.>	Does vehicle and data correspond?	Perform the adjustment or inspection of the camera. <Ref. to ES-13, Camera Adjustment, Inspection.>	Go to step **5**.
5	**CHECK FUSE.** Check the fuse. <Ref. to ES-5, Relay and Fuse.>	Is the check result OK?	Go to step **6**.	Replace the faulty fuse. When the replaced fuse blows out easily, check the short circuit in harness.

	Step	Check	Yes	No
6	**CHECK HARNESS (POWER SUPPLY CIRCUIT).** 1) Disconnect the stereo camera. 2) Turn the ignition switch to ON. 3) Measure the voltage between harness connector of stereo camera and chassis ground. ***Connector & terminal*** ***(R137) No. 6 (+) — Chassis ground (–):*** ***(R137) No. 8 (+) — Chassis ground (–):***	Is the voltage 10 V or more?	Go to step **7**.	Check the power supply system circuit, and if any fault is found, repair the defective parts or replace the harness.
7	**CHECK HARNESS (GROUND CIRCUIT).** 1) Turn the ignition switch to OFF. 2) Disconnect the ground cable from battery. 3) Measure the resistance between stereo camera and chassis ground. ***Connector & terminal*** ***(R137) No. 7 — Chassis ground:***	Is the resistance less than 10 Ω?	Go to step **8**.	Check the ground system circuit, and if any fault is found, repair the defective parts or replace the harness.
8	**CHECK POOR CONTACT OF CONNECTORS.** Check stereo camera connector.	Is there poor contact of the connector?	Repair the connector.	Go to step **9**.
9	**CHECK STEREO CAMERA.** 1) Connect all connectors and battery terminals securely. 2) Clear the memory. <Ref. to ES(diag)-49, Clear Memory Mode.> 3) Read the DTC. <Ref. to ES(diag)-43, Diagnostic Code(s) Display.>	Is DTC B28A0 displayed?	Replace the stereo camera. <Ref. to ES-8, REMOVAL, Stereo Camera.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, or temporary open or short circuit of harness may be the cause.

AN:DTC B28A1 EyeSight COMMUNICATION(ECM)

Detected when the engine control module (ECM) detects the malfunction of stereo camera, or when the stereo camera or ECM is assembled incorrectly.

DTC DETECTING CONDITION:

- Defective CAN system
- Defective engine control module (ECM)
- Defective stereo camera
- Incorrect assembly of stereo camera (when the stereo camera designed for EyeSight (Ver. 2) type vehicle is installed to the EyeSight (Ver. 3) type vehicle, etc.)
- Incorrect assembly of ECM (when the ECM designed for another model is installed, etc.)

TROUBLE SYMPTOM:

- All functions of EyeSight system do not operate.
- EyeSight warning light illuminates.

	Step	Check	Yes	No
1	**CHECK ECM.** Check the part number of the ECM.	Is the ECM genuine?	Go to step **2**.	Replace the ECM. <Ref. to FU(w/o STI)-124, Engine Control Module (ECM).>
2	**CHECK STEREO CAMERA.** 1) Remove the camera cover. 2) Check the part number of the stereo camera.	Is the stereo camera genuine?	Go to step **3**.	Replace the stereo camera. <Ref. to ES-8, REMOVAL, Stereo Camera.>
3	**CHECK LAN SYSTEM.** Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is DTC for LAN system displayed?	Perform the diagnosis of DTCs for LAN system.	Go to step **4**.
4	**CHECK ECM.** Perform the diagnosis for the engine. <Ref. to EN(w/o STI)(diag)-2, Basic Diagnostic Procedure.>	Is DTC for engine displayed?	Perform the diagnosis for DTC for the engine.	Go to step **5**.
5	**CHECK CONNECTOR.** Check the ECM connector and the stereo camera connector.	Is the check result OK?	Go to step **6**.	Repair or replace the connector.
6	**CHECK STEREO CAMERA.** Read the DTC. <Ref. to ES(diag)-43, Diagnostic Code(s) Display.>	Is DTC other than DTC B28A1 displayed?	Perform the diagnosis for DTC other than DTC B28A1.	Go to step **7**.
7	**CHECK STEREO CAMERA.** 1) Clear the memory. <Ref. to ES(diag)-49, Clear Memory Mode.> 2) Read the DTC. <Ref. to ES(diag)-43, Diagnostic Code(s) Display.>	Is DTC B28A1 displayed?	Replace the stereo camera. <Ref. to ES-8, REMOVAL, Stereo Camera.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, or temporary open or short circuit of harness may be the cause.

AO:DTC B28A2 EyeSight COMMUNICATION(VDC)

Detected when the VDC control module (VDCCM) detects the malfunction of stereo camera.

DTC DETECTING CONDITION:

- Defective CAN system
- Defective VDC control module (VDCCM)
- Defective stereo camera

TROUBLE SYMPTOM:

- All functions of EyeSight system do not operate.
- EyeSight warning light illuminates.

	Step	Check	Yes	No
1	**CHECK LAN SYSTEM.** Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is DTC for LAN system displayed?	Perform the diagnosis of DTCs for LAN system.	Go to step **2**.
2	**CHECK VDC.** Perform the diagnosis for VDC. <Ref. to VDC(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is DTC for VDC displayed?	Perform the diagnosis for DTC for VDC.	Go to step **3**.
3	**CHECK CONNECTOR.** Check the VDC connector and the stereo camera connector.	Is the check result OK?	Go to step **4**.	Repair or replace the connector.
4	**CHECK STEREO CAMERA.** Read the DTC. <Ref. to ES(diag)-43, Diagnostic Code(s) Display.>	Is DTC other than DTC B28A2 displayed?	Perform the diagnosis for DTC other than DTC B28A2.	Go to step **5**.
5	**CHECK STEREO CAMERA.** 1) Clear the memory. <Ref. to ES(diag)-49, Clear Memory Mode.> 2) Read the DTC. <Ref. to ES(diag)-43, Diagnostic Code(s) Display.>	Is DTC B28A2 displayed?	Replace the stereo camera. <Ref. to ES-8, REMOVAL, Stereo Camera.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, or temporary open or short circuit of harness may be the cause.

AP:DTC B28A3 EyeSight COMMUNICATION(METER)

Detected when the combination meter detects the malfunction of stereo camera.

DTC DETECTING CONDITION:

- Defective CAN system
- Defective combination meter
- Defective stereo camera

TROUBLE SYMPTOM:

- All functions of EyeSight system do not operate.
- EyeSight warning light illuminates.

	Step	Check	Yes	No
1	**CHECK LAN SYSTEM.** Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is DTC for LAN system displayed?	Perform the diagnosis of DTCs for LAN system.	Go to step **2**.
2	**CHECK COMBINATION METER.** Check the combination meter. <Ref. to IDI(diag)-2, COMBINATION METER, PROCEDURE, Basic Diagnostic Procedure.>	Is DTC for combination meter displayed?	Perform the diagnosis for DTC for the combination meter.	Go to step **3**.
3	**CHECK CONNECTOR.** Check the combination meter connector and the stereo camera connector.	Is the check result OK?	Go to step **4**.	Repair or replace the connector.
4	**CHECK STEREO CAMERA.** Read the DTC. <Ref. to ES(diag)-43, Diagnostic Code(s) Display.>	Is DTC other than DTC B28A3 displayed?	Perform the diagnosis for DTC other than DTC B28A3.	Go to step **5**.
5	**CHECK STEREO CAMERA.** 1) Clear the memory. <Ref. to ES(diag)-49, Clear Memory Mode.> 2) Read the DTC. <Ref. to ES(diag)-43, Diagnostic Code(s) Display.>	Is DTC B28A3 displayed?	Replace the stereo camera. <Ref. to ES-8, REMOVAL, Stereo Camera.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, or temporary open or short circuit of harness may be the cause.

AQ:DTC B28A4 EyeSight COMMUNICATION(EPS)

Detected when the power steering control module (EPS CM) detects the malfunction of stereo camera.

DTC DETECTING CONDITION:

- Defective CAN system
- Defective EPS CM
- Defective stereo camera

TROUBLE SYMPTOM:

- All functions of EyeSight system do not operate.
- EyeSight warning light illuminates.

	Step	Check	Yes	No
1	**CHECK LAN SYSTEM.** Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is DTC for LAN system displayed?	Perform the diagnosis of DTCs for LAN system.	Go to step **2**.
2	**CHECK EPS CM.** Perform the diagnosis for the power steering system. <Ref. to PS(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is DTC for power steering system displayed?	Perform the diagnosis for DTC for the EPS.	Go to step **3**.
3	**CHECK CONNECTOR.** Check the EPS CM connector and the stereo camera connector.	Is the check result OK?	Go to step **4**.	Repair or replace the connector.
4	**CHECK STEREO CAMERA.** Read the DTC. <Ref. to ES(diag)-43, Diagnostic Code(s) Display.>	Is DTC other than DTC B28A4 displayed?	Perform the diagnosis for DTC other than DTC B28A4.	Go to step **5**.
5	**CHECK STEREO CAMERA.** 1) Clear the memory. <Ref. to ES(diag)-49, Clear Memory Mode.> 2) Read the DTC. <Ref. to ES(diag)-43, Diagnostic Code(s) Display.>	Is DTC B28A4 displayed?	Replace the stereo camera. <Ref. to ES-8, REMOVAL, Stereo Camera.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, or temporary open or short circuit of harness may be the cause.

AR:DTC B28A5 ENGINE TORQUE LIMITER CONTROL PROHIBIT

Detected when abnormal data is transmitted from stereo camera to engine control module (ECM) and the engine control module (ECM) prohibits the AT rapid start prevention control, or when the engine control module (ECM) prohibits the AT rapid start prevention control.

DTC DETECTING CONDITION:

- Defective CAN system
- Defective engine control module (ECM)
- Defective stereo camera
- Defective combination meter
- Incorrect assembly of combination meter (when the combination meter that is not for EyeSight is installed.)

TROUBLE SYMPTOM:

- All functions of EyeSight system do not operate.
- EyeSight warning light illuminates.

	Step	Check	Yes	No
1	**CHECK COMBINATION METER.** Check the part number of the combination meter.	Is the combination meter genuine?	Go to step **2**.	Replace the combination meter. <Ref. to IDI-13, Combination Meter.>
2	**CHECK LAN SYSTEM.** Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Is DTC for LAN system displayed?	Perform the diagnosis of DTCs for LAN system.	Go to step **3**.
3	**CHECK ECM.** Perform the diagnosis for the engine. <Ref. to EN(w/o STI)(diag)-2, Basic Diagnostic Procedure.>	Is DTC for engine displayed?	Perform the diagnosis for DTC for the engine.	Go to step **4**.
4	**CHECK CONNECTOR.** Check the ECM connector and the stereo camera connector.	Is the check result OK?	Go to step **5**.	Repair or replace the connector.
5	**CHECK STEREO CAMERA.** Read the DTC. <Ref. to ES(diag)-43, Diagnostic Code(s) Display.>	Is DTC other than DTC B28A5 displayed?	Perform the diagnosis for DTC other than DTC B28A5.	Go to step **6**.
6	**CHECK STEREO CAMERA.** 1) Clear the memory. <Ref. to ES(diag)-49, Clear Memory Mode.> 2) Read the DTC again. <Ref. to ES(diag)-43, Diagnostic Code(s) Display.>	Is DTC B28A5 displayed?	Replace the stereo camera. <Ref. to ES-8, REMOVAL, Stereo Camera.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, or temporary open or short circuit of harness may be the cause.

AS:DTC B28A6 INTERNAL STEREO CAMERA COMMUNICATION 1

Detected when communication error occurs inside the stereo camera.
DTC DETECTING CONDITION:
Communication error occurs inside the stereo camera.
TROUBLE SYMPTOM:
All functions of EyeSight system do not operate.

	Step	Check	Yes	No
1	**CHECK RESTARTING.** 1) Turn the ignition switch to OFF. 2) Start the engine. 3) Read the DTC related to the stereo camera using the Subaru Select Monitor. <Ref. to ES(diag)-43, Diagnostic Code(s) Display.>	Is DTC B28A6 displayed after restarting the engine?*1	Replace the stereo camera. <Ref. to ES-8, REMOVAL, Stereo Camera.>	Clear the memory, in which temporary communication failure occurs and complete the step.

*1: When malfunction is detected after restarting the engine, 0 is registered in IG counter. Other values can be regarded as DTCs detected in the past.

AT:DTC B28A7 STEREO CAMERA RECOGNITION(TARGET)

Detected when error occurs in the communication data inside the control module caused by external factors such as noises.

NOTE:
If DTC B28A7 is still detected after the engine has restarted, replace the stereo camera. <Ref. to ES-8, REMOVAL, Stereo Camera.>

AU:DTC B28A8 INTERNAL STEREO CAMERA COMMUNICATION 2

Detected when error occurs in the communication data inside the control module caused by external factors such as noises.

NOTE:
If DTC B28A8 is still detected after the engine has restarted, replace the stereo camera. <Ref. to ES-8, REMOVAL, Stereo Camera.>

AV:DTC B28A9 STEREO CAMERA SYNCHRONIZED RECOGNITION DATA

Detected when error occurs in the communication data inside the control module caused by external factors such as noises.

NOTE:
If DTC B28A9 is still detected after the engine has restarted, replace the stereo camera. <Ref. to ES-8, REMOVAL, Stereo Camera.>

AW:DTC B28AA STEREO CAMERA MICROCOMPUTER 1

Detected when communication error occurs due to malfunction of microcomputer inside the stereo camera.
DTC DETECTING CONDITION:
Communication error occurs due to malfunction of microcomputer inside the stereo camera.
TROUBLE SYMPTOM:
All functions of EyeSight system do not operate.
Refer to DTC B28A6 for diagnostic procedure. <Ref. to ES(diag)-100, DTC B28A6 INTERNAL STEREO CAMERA COMMUNICATION 1, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

AX:DTC B28AB STEREO CAMERA MICROCOMPUTER 2

Detected when communication error occurs due to malfunction of microcomputer inside the stereo camera.
DTC DETECTING CONDITION:
Communication error occurs due to malfunction of microcomputer inside the stereo camera.
TROUBLE SYMPTOM:
All functions of EyeSight system do not operate.
Refer to DTC B28A6 for diagnostic procedure. <Ref. to ES(diag)-100, DTC B28A6 INTERNAL STEREO CAMERA COMMUNICATION 1, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

AY:DTC B28AC STEREO CAMERA ASIC

Detected when communication error occurs due to malfunction of ASIC.
DTC DETECTING CONDITION:
Communication error occurs due to malfunction of ASIC.
TROUBLE SYMPTOM:
All functions of EyeSight system do not operate.
Refer to DTC B28A6 for diagnostic procedure. <Ref. to ES(diag)-100, DTC B28A6 INTERNAL STEREO CAMERA COMMUNICATION 1, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

AZ:DTC B28AD STEREO CAMERA IMAGE RECOGNITION

Detected when improper image recognition occurs in the microcomputer inside the stereo camera.
DTC DETECTING CONDITION:
Improper image recognition occurs in the microcomputer inside the stereo camera.
TROUBLE SYMPTOM:
All functions of EyeSight system do not operate.
Refer to DTC B28A6 for diagnostic procedure. <Ref. to ES(diag)-100, DTC B28A6 INTERNAL STEREO CAMERA COMMUNICATION 1, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

BA:DTC B28AE INTERNAL STEREO CAMERA POWER SUPPLY

Detected when improper power supply inside the stereo camera occurs.
DTC DETECTING CONDITION:
Improper power supply inside the stereo camera occurs.
TROUBLE SYMPTOM:
All functions of EyeSight system do not operate.
Refer to DTC B28A6 for diagnostic procedure. <Ref. to ES(diag)-100, DTC B28A6 INTERNAL STEREO CAMERA COMMUNICATION 1, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

BB:DTC B28AF STEREO CAMERA ADJUSTMENT INCOMPLETE

Detected when adjustment or inspection of stereo camera has not been completed normally.
DTC DETECTING CONDITION:
- Operation is aborted during adjustment or inspection of the stereo camera.
- After the replacement of the stereo camera, adjustment or inspection of camera has not yet been performed.

TROUBLE SYMPTOM:
All functions of EyeSight system do not operate.
For diagnostic procedure, perform adjustment/inspection of camera. When the adjustment or inspection of camera is performed, and if it is not completed successfully, replace the camera.

BC:DTC B28B1 STEREO CAMERA AUTOMATIC ADJUSTMENT

Detected when the optical axis of stereo camera is deviated in lateral direction or when the fluctuation range of automatic adjustment value has expanded.

NOTE:
Readjust the stereo camera. <Ref. to ES-13, PROCEDURE, Camera Adjustment, Inspection.>
If DTC B28B1 is still detected after readjustment, replace the stereo camera. <Ref. to ES-8, REMOVAL, Stereo Camera.>

BD:DTC B28B2 STEREO CAMERA HIGH TEMPERATURE

Detected when the temperature of the stereo camera excessively increases.

NOTE:
When DTC B28B2 is detected, performing adjustment or inspection of the camera will not return to the normal state. In this case, always replace the stereo camera. <Ref. to ES-8, REMOVAL, Stereo Camera.>

BE:DTC B28B3 STEREO CAMERA LOW TEMPERATURE

Detected when the temperature of the stereo camera excessively decreases.

NOTE:
When DTC B28B3 is detected, performing adjustment or inspection of the camera will not return to the normal state. In this case, always replace the stereo camera. <Ref. to ES-8, REMOVAL, Stereo Camera.>

BF:DTC B28B5 +B CIRCUIT OPEN

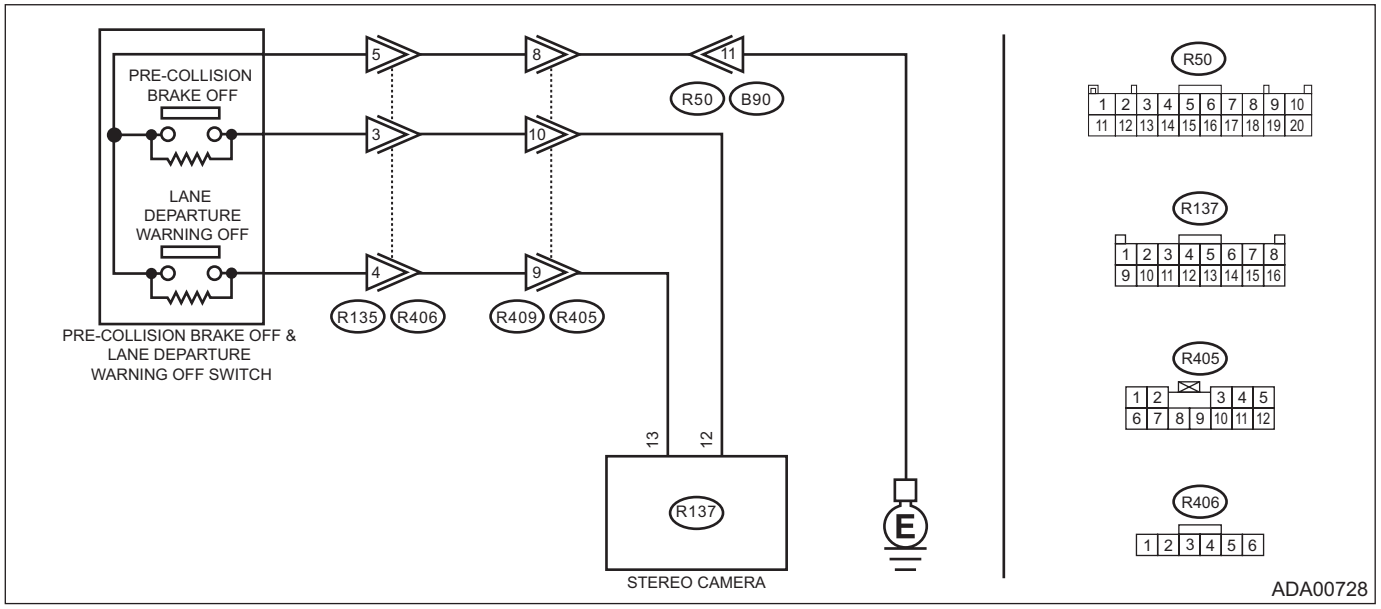
Detected when there is an open circuit in power supply line.

NOTE:
Refer to DTC B2814 for diagnostic procedure. <Ref. to ES(diag)-89, DTC B2814 POWER SUPPLY LOW VOLTAGE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

BG:DTC B28B6 PRE-COLLISION OFF SWITCH

Detected when pre-collision brake OFF switch circuit is not installed, open-circuited or is stuck to ON.

DTC DETECTING CONDITION:



- Wiring of pre-collision brake OFF switch is not connected.
- Pre-collision brake OFF switch circuit is open.
- Pre-collision brake OFF switch circuit stays ON for 45 seconds or more.

TROUBLE SYMPTOM:

All functions of EyeSight system do not operate.

WIRING DIAGRAM:

EyeSight System <Ref. to WI-222, WIRING DIAGRAM, EyeSight System.>

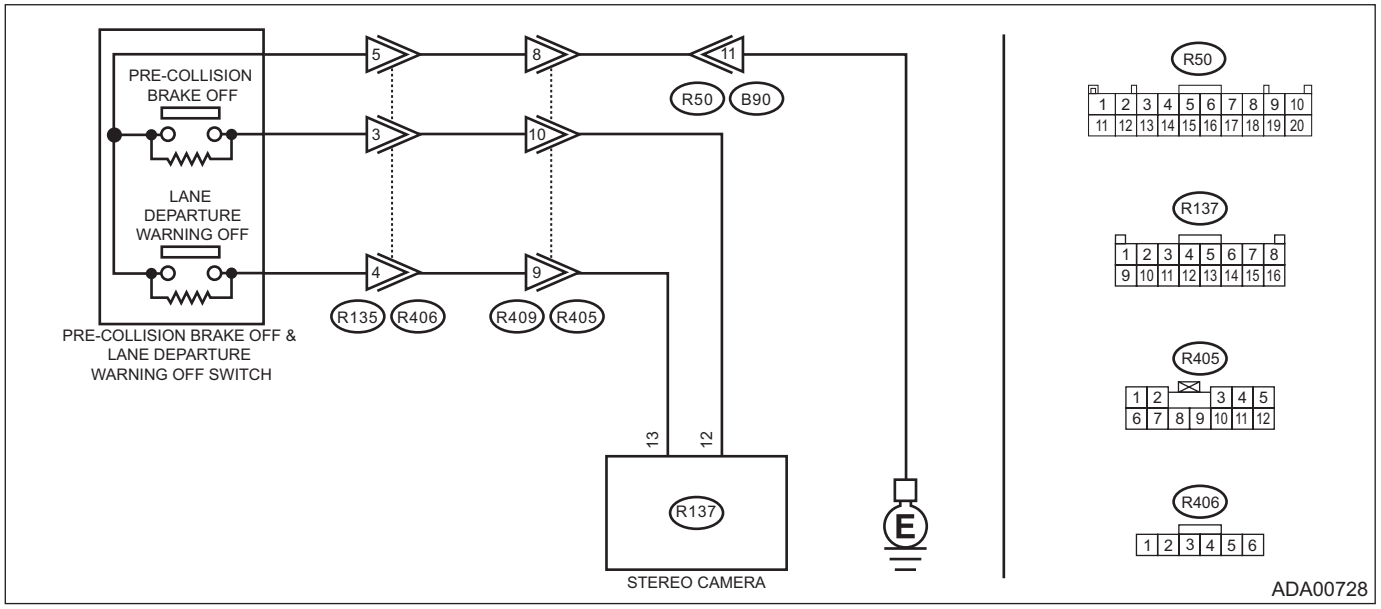
Step		Check	Yes	No
1	**CHECK CURRENT DATA.** Confirm the current data «Pre-Collision Brake OFF SW» of EyeSight using Subaru Select Monitor. <Ref. to ES(diag)-24, Read Current Data.>	Does the display change according to ON/OFF operation of the pre-collision brake OFF switch?	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, or temporary open or short circuit of harness may be the cause.	Go to step **2**.

Step		Check	Yes	No
2	**CHECK HARNESS.** 1) Disconnect the stereo camera connector and the pre-collision brake OFF switch connector. 2) Using the tester, measure the resistance between the stereo camera connector and pre-collision brake OFF switch connector as well as chassis ground. ***Connector & terminal*** ***(R137) No. 12 — (R406) No. 3:*** ***(R406) No. 5 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **3**.	Repair or replace an open circuit in harness between the stereo camera connector and pre-collision brake OFF switch connector or between the pre-collision brake OFF switch connector and chassis ground.
3	**CHECK HARNESS.** Using the tester, measure the resistance between the pre-collision brake OFF switch connector and chassis ground. ***Connector & terminal*** ***(R406) No. 3 — Chassis ground:***	Is the resistance 1 MΩ or more?	Check the pre-collision brake OFF switch. <Ref. to ES-35, INSPECTION, Switches and Harness.>	Repair or replace the short circuit to ground in harness between the stereo camera connector and pre-collision brake OFF switch connector.

BH:DTC B28B7 LDP OFF SWITCH

Detected when lane departure warning OFF switch circuit is not installed, open-circuited, or is stuck to ON.

DTC DETECTING CONDITION:



- Wiring of lane departure warning OFF switch is not connected.
- Lane departure warning OFF switch circuit is open.
- Lane departure warning OFF switch circuit stays ON for 45 seconds or more.

TROUBLE SYMPTOM:

All functions of EyeSight system do not operate.

WIRING DIAGRAM:

EyeSight System <Ref. to WI-222, WIRING DIAGRAM, EyeSight System.>

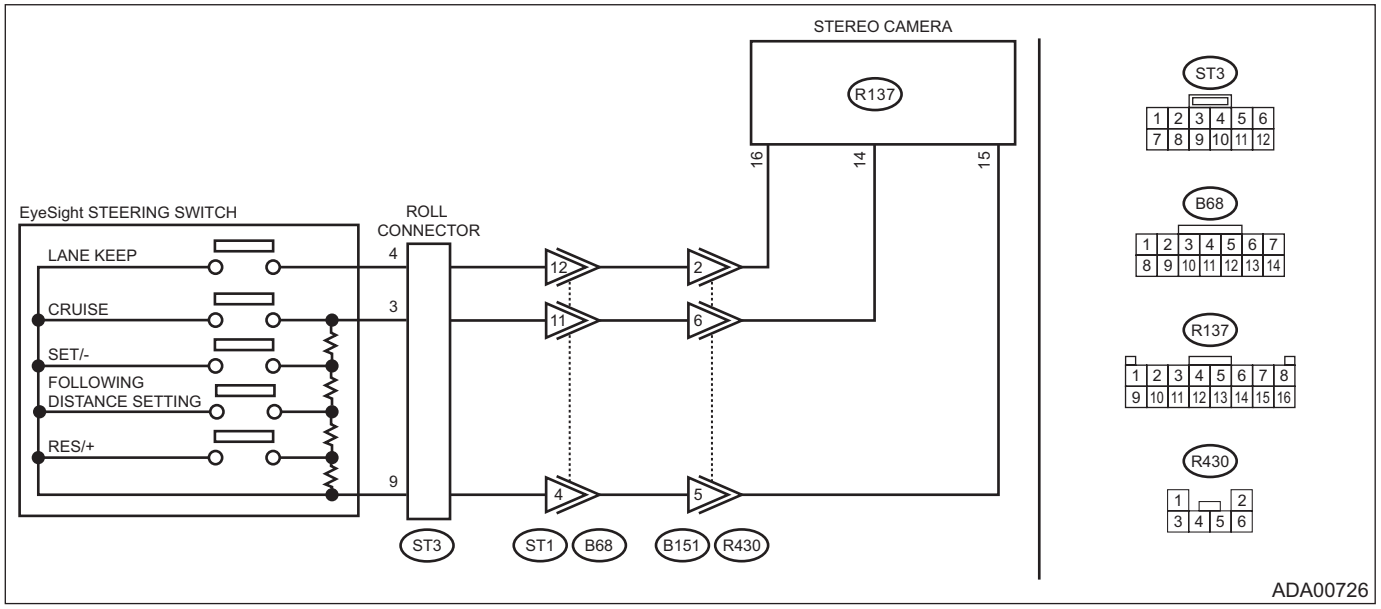
Step		Check	Yes	No
1	**CHECK CURRENT DATA.** Confirm the current data «Lane Departure Warning OFF SW» of EyeSight using Subaru Select Monitor. <Ref. to ES(diag)-24, Read Current Data.>	Does the display change according to the lane departure warning OFF switch ON/OFF operation?	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, or temporary open or short circuit of harness may be the cause.	Go to step **2**.

Step		Check	Yes	No
2	**CHECK HARNESS.** 1) Disconnect the stereo camera connector and the lane departure warning OFF switch connector. 2) Using the tester, measure the resistance between the stereo camera connector and lane departure warning OFF switch connector. ***Connector & terminal*** ***(R137) No. 13 — (R406) No. 4:*** ***(R406) No. 5 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **3**.	Repair or replace an open circuit in harness between the stereo camera connector and lane departure warning OFF switch connector or between the lane departure warning OFF switch connector and chassis ground.
3	**CHECK HARNESS.** Using the tester, measure the resistance between the lane departure warning OFF switch connector and chassis ground. ***Connector & terminal*** ***(R406) No. 4 — Chassis ground:***	Is the resistance 1 MΩ or more?	Check the lane departure warning OFF switch. <Ref. to ES-35, INSPECTION, Switches and Harness.>	Repair or replace the short circuit to ground in harness between the stereo camera connector and lane departure warning OFF switch connector.

BI: DTC B28B8 EyeSight STEERING SWITCH 1

Detected when steering switch for EyeSight is not installed, is open-circuited or is stuck to ON.

DTC DETECTING CONDITION:



- Wiring of the EyeSight steering switch is not connected.
- EyeSight steering switch circuit is open.
- EyeSight steering switch circuit stays ON.

TROUBLE SYMPTOM:

All functions of EyeSight system do not operate.

WIRING DIAGRAM:

EyeSight System <Ref. to WI-222, WIRING DIAGRAM, EyeSight System.>

	Step	Check	Yes	No
1	**CHECK CURRENT DATA.** Confirm the current data «Cruise Control SW Voltage (Port14)» and «Cruise Control SW Voltage (Port16)» of EyeSight using Subaru Select Monitor. <Ref. to ES(diag)-24, Read Current Data.>	Is the voltage according to the pressed EyeSight steering switch displayed?	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, or temporary open or short circuit of harness may be the cause.	Go to step **2**.
2	**CHECK HARNESS.** 1) Disconnect the stereo camera connector and EyeSight steering switch connector. 2) Using the tester, measure the resistance between stereo camera connector and EyeSight steering switch connector. ***Connector & terminal*** ***(ST3) No. 4 — (R137) No. 16:*** ***(ST3) No. 3 — (R137) No. 14:*** ***(ST3) No. 9 — (R137) No. 15:***	Is the resistance less than 1 Ω?	Go to step **3**.	Repair or replace an open circuit in harness between the stereo camera connector and the EyeSight steering switch connector.

	Step	Check	Yes	No
3	**CHECK HARNESS.** Using the tester, measure the resistance between EyeSight steering switch connector and chassis ground. ***Connector & terminal*** ***(ST3) No. 4 — Chassis ground:*** ***(ST3) No. 3 — Chassis ground:*** ***(ST3) No. 9 — Chassis ground:***	Is the resistance 1 MΩ or more?	Check the EyeSight steering switch. <Ref. to ES-35, INSPECTION, Switches and Harness.>	Repair or replace the short circuit to ground in harness between the stereo camera connector and the EyeSight steering switch connector.

BJ:DTC B28B9 EyeSight STEERING SWITCH 2

Detected when steering switch for EyeSight is not installed, is open-circuited or is stuck to ON.
Refer to DTC B28B8 for diagnostic procedure. <Ref. to ES(diag)-107, DTC B28B8 EyeSight STEERING SWITCH 1, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

BK:DTC B28BA STEERING ANGLE AND STEREO CAMERA CORRELATION MISALIGNED

- Detected when the center point of the steering angle sensor is misaligned.
- Detected when the alignment is extremely misaligned.

DTC DETECTING CONDITION:

- Defective wheel alignment
- Defective VDC CM
- Defective stereo camera

TROUBLE SYMPTOM:

- All functions of EyeSight system do not operate.
- EyeSight warning light illuminates.

NOTE:

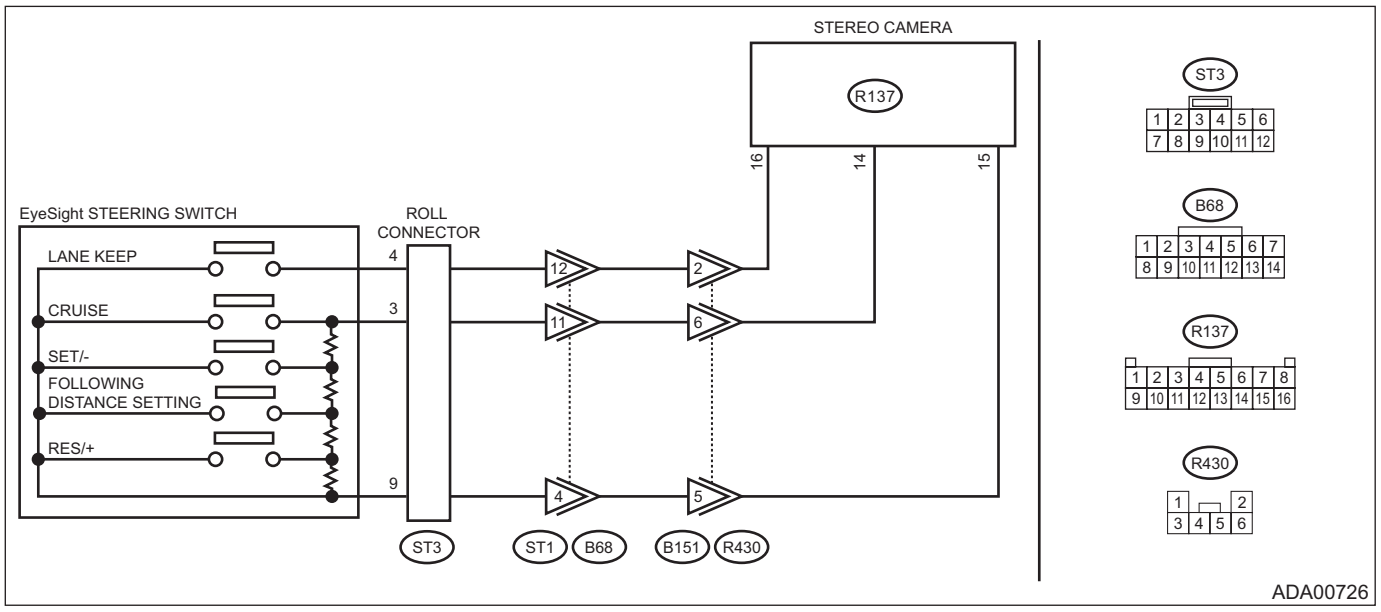
- Prior confirmation is required to check if the work related to alignment has been performed or there is an accident history.
- Record the value of current data «Active Lane Keep System Control Learning Value 3» of stereo camera using Subaru Select Monitor.

	Step	Check	Yes	No
1	**CHECK DTC.** Read DTC of the VDC. <Ref. to VDC(diag)-2, Basic Diagnostic Procedure.>	Is DTC related to steering angle sensor displayed?	Perform the diagnosis for DTC for VDC, Go to step **2**.	Go to step **2**.
2	**CHECK DRIVING CONDITION.** Check the driving condition.	Is the steering wheel obviously tilted when the vehicle is in the straight ahead position? (Check if it is obviously tilted at the closest point between the column cover and the steering wheel.)	Perform the wheel alignment adjustment. <Ref. to FS-10, Wheel Alignment.>, and Go to step **3**.	Go to step **3**.
3	**CHECK CURRENT DATA.** 1) Display the current data «Steer Angle Sensor Op» of stereo camera using Subaru Select Monitor. NOTE: Do not use «Steering Angle Sensor Value (Right +) (Left -)» when checking. 2) Check the value when the vehicle is in the straight ahead position.	Is the value from –2 to+2 degrees?	Go to step **4**.	Perform «VSC(VDC) Centering Mode» for VDC. <Ref. to VDC-17, VDC SENSOR MID-POINT SETTING MODE, ADJUSTMENT, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).> Repeat the step 3. Go to step **3**.
4	**CHECK JOB CONTENT.** Check the job contents performed so far. (To identify whether the problem belongs to the vehicle or the stereo camera.)	Is one of the following actions performed: steering angle sensor diagnosis, wheel alignment adjustment or VDC sensor centering mode?	Go to step **5**.	Replace the stereo camera. <Ref. to ES-8, Stereo Camera.>
5	**LANE KEEP ASSIST LEARNING VALUE CLEAR.** 1) Perform «Clear Active Lane Keep System Learning Value». <Ref. to ES(diag)-50, CLEAR ACTIVE LANE KEEP SYSTEM LEARNING VALUE.> 2) Turn the ignition switch OFF → ON. 3) Display the current data «Active Lane Keep System Control Learning Value 3» of stereo camera using Subaru Select Monitor.	Is the value of «Active Lane Keep System Control Learning Value 3» 0?	Go to step **6**.	Performing «Clear Active Lane Keep System Learning Value» is not complete. Go to step **7**.

	Step	Check	Yes	No
6	**CHECK DTC.** 1) Clear the memory. <Ref. to ES(diag)-49, Clear Memory Mode.> 2) Turn the ignition switch OFF → ON. 3) Read the DTC. <Ref. to ES(diag)-43, Diagnostic Code(s) Display.>	Is DTC B28BA displayed?	Clearing the memory is not complete. Go to step **7**.	The current state is normal. Finish the diagnosis.
7	**CHECK SUBARU SELECT MONITOR CONNECTION.** Check the connection of Subaru Select Monitor.	Is there any fault in the harness and connection between Subaru Select Monitor and stereo camera?	Replace the harness or repair the connection. In case that the step 5 is not performed Go to step **5**. In case that the step 5 has been performed Go to step **6**.	Replace the stereo camera. <Ref. to ES-8, Stereo Camera.>

19.Diagnostic Procedure with ECU Cancel Code

A: 11



Detected, when the CRUISE switch is pressed. Or, when an error related to the CRUISE switch occurs.

TROUBLE SYMPTOM:

- Cruise control cannot be set. (Cancelled immediately.)
- Cruise control cannot be released.

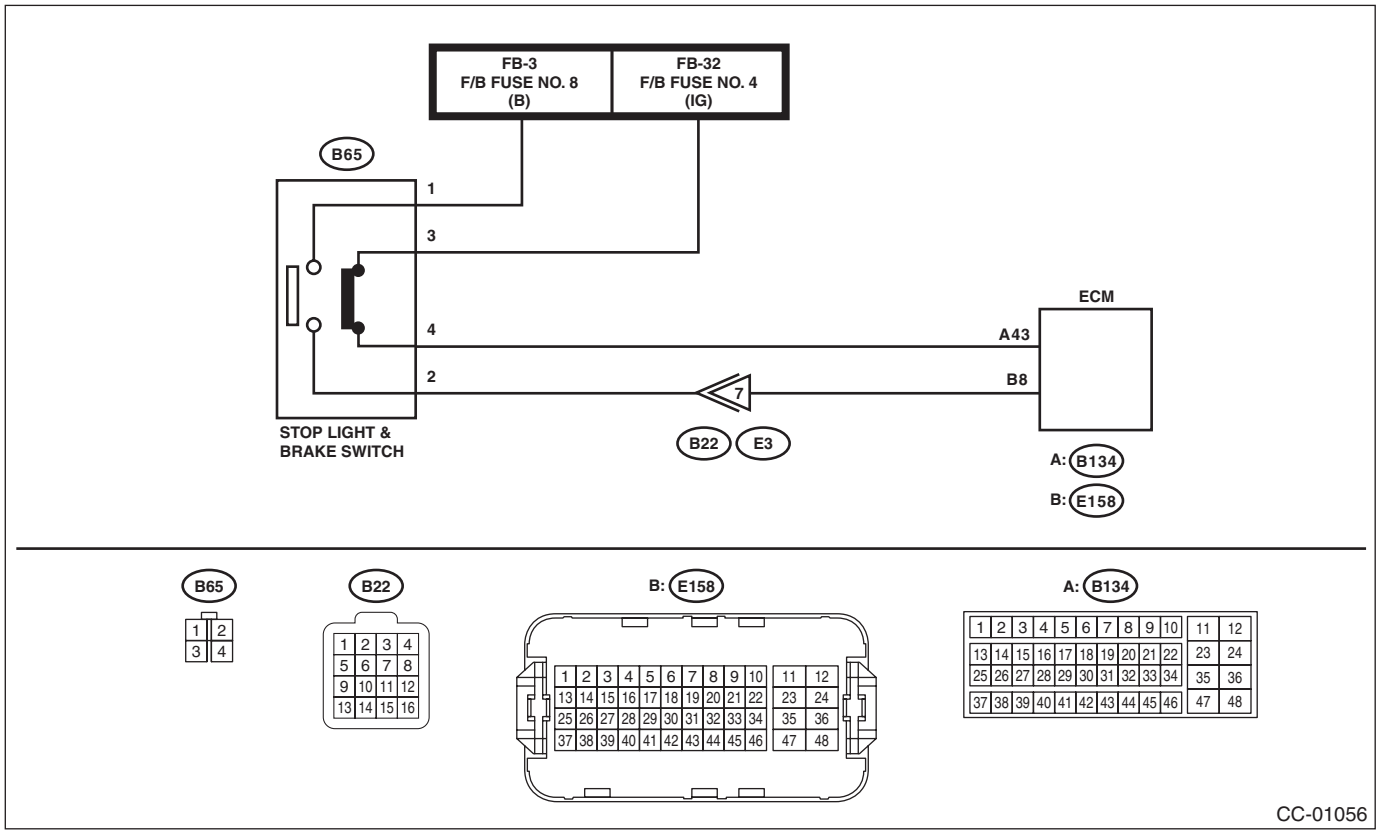
WIRING DIAGRAM:

Cruise control system <Ref. to WI-135, WIRING DIAGRAM, Cruise Control System.>

	Step	Check	Yes	No
1	**CHECK CRUISE CONTROL COMMAND SWITCH CIRCUIT.** 1) Remove the driver's airbag module. <Ref. to AB-32, REMOVAL, Driver's Airbag Module.> 2) Disconnect the harness connector of cruise control command switch. 3) Turn the ignition switch to ON. 4) Measure the voltage between harness connector terminal and chassis ground. ***Connector & terminal*** ***(ST3) No. 3 (+) — Chassis ground (–):*** ***(ST3) No. 4 (+) — Chassis ground (–):***	Is the voltage 5 V or more?	Go to step **2**.	Check the harness between cruise control command switch and stereo camera, and the steering roll connector for open or short circuit, or for poor contact.
2	**CHECK CRUISE CONTROL COMMAND SWITCH CIRCUIT.** 1) Turn the ignition switch to OFF. 2) Remove the cruise control command switch. <Ref. to CC-6, REMOVAL, Cruise Control Command Switch.> 3) Measure the resistance between harness connector terminal and chassis ground. ***Connector & terminal*** ***(ST3) No. 9 — Chassis ground:***	Is the resistance less than 10 Ω?	Go to step **3**.	Check for open circuit between the cruise control command switch, stereo camera and chassis ground, and check the stereo camera.
3	**CHECK CRUISE CONTROL COMMAND SWITCH.** Measure the resistance between switch terminals, when the cruise control command switch is not pressed. ***Terminals*** ***No. 3 — No. 9:***	Is the resistance approximately 4 kΩ?	Go to step **4**.	Replace the cruise control command switch. <Ref. to CC-6, Cruise Control Command Switch.>

	Step	Check	Yes	No
4	**CHECK CANCEL SWITCH.** 1) Turn the ignition switch to OFF. 2) Remove the cruise control command switch. <Ref. to CC-6, REMOVAL, Cruise Control Command Switch.> 3) Measure the resistance between switch terminals with the CANCEL switch pressed. ***Terminals*** ***No. 3 — No. 9:***	Is the resistance with the CANCEL switch pressed approximately less than 1 Ω?	Go to step **5**.	Replace the cruise control command switch. <Ref. to CC-6, Cruise Control Command Switch.>
5	**INSPECTION OF SET/– SWITCH.** Measure the resistance between switch terminals with the SET/– switch pressed. ***Terminals*** ***No. 3 — No. 9:***	Is the resistance with the SET/– switch pressed approximately 250 Ω?	Go to step **6**.	Replace the cruise control command switch. <Ref. to CC-6, Cruise Control Command Switch.>
6	**CHECK RES/+ SWITCH CIRCUIT.** Measure the resistance between the switch terminals with the RES/+ switch pressed. ***Terminals*** ***No. 3 — No. 9:***	Is the resistance with the RES/+ switch pressed approximately 1,500 Ω?	Replace the stereo camera. <Ref. to ES-8, REMOVAL, Stereo Camera.>	Replace the cruise control command switch. <Ref. to CC-6, Cruise Control Command Switch.>

B: 12



Detected when the brake pedal is depressed, or the error related to the stop light & brake switch occurred.

TROUBLE SYMPTOM:

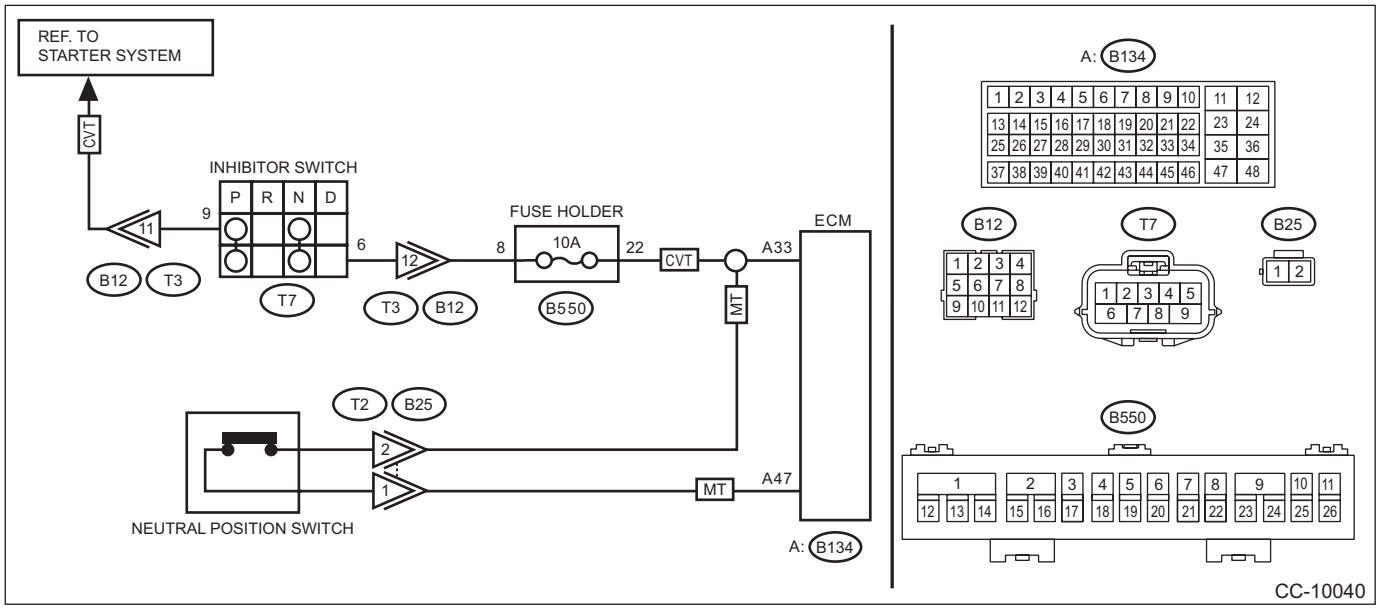
- Cruise control cannot be set.
- Cruise control cannot be released.

WIRING DIAGRAM:

Cruise control system <Ref. to WI-135, WIRING DIAGRAM, Cruise Control System.>

	Step	Check	Yes	No
1	**CHECK STOP LIGHT & BRAKE SWITCH.** Check the stop light & brake switch. <Ref. to CC-9, Stop Light & Brake Switch.>	Are the check results for the stop light & brake switch unit, and installation position OK?	Go to step **2**.	Replace the stop light & brake switch. Or adjust the installation position.
2	**CHECK STOP LIGHT & BRAKE SWITCH CIRCUIT.** 1) Turn the ignition switch to OFF. 2) Disconnect the stop light & brake switch harness connector. 3) Turn the ignition switch to ON. 4) Measure the voltage between harness connector terminal and chassis ground. ***Connector & terminal*** ***(B65) No. 3 (+) — Chassis ground (–):***	Is the voltage 10 V or more?	Go to step **3**.	• Check the fuse No. 8 (fuse & relay box). • Check for open or short circuit in harness between the stop light & brake switch and the fuse & relay box.
3	**CHECK STOP LIGHT & BRAKE SWITCH CIRCUIT.** Measure the voltage between harness connector terminal and chassis ground. ***Connector & terminal*** ***(B65) No. 1 (+) — Chassis ground (–):***	Is the voltage 10 V or more?	Go to step **4**.	• Check the fuse No. 4 (fuse & relay box). • Check for open or short circuit in harness between the stop light & brake switch and the fuse & relay box.
4	**CHECK STOP LIGHT & BRAKE SWITCH CIRCUIT.** 1) Turn the ignition switch to OFF. 2) Disconnect the harness connector of ECM. 3) Measure the resistance between ECM harness connector terminal and stop light & brake switch harness connector terminal. ***Connector & terminal*** ***(B134) No. 43 — (B65) No. 4:*** ***(E158) No. 8 — (B65) No. 2:***	Is the resistance less than 10 Ω?	Replace the ECM. <Ref. to FU(w/o STI)-124, Engine Control Module (ECM).>	Repair the harness.

C: 14



Detected when the select lever is shifted to the neutral position, or when an error related to the neutral position switch occurs.

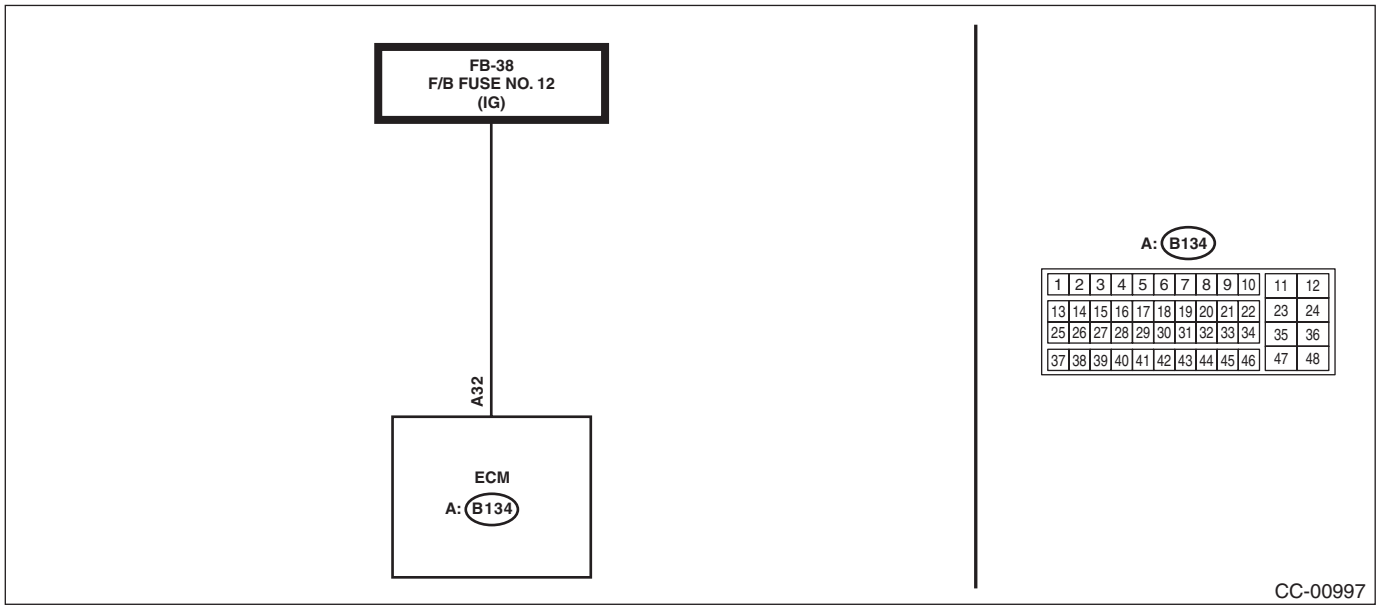
TROUBLE SYMPTOM:

Cruise control cannot be set.

WIRING DIAGRAM:

Cruise control system <Ref. to WI-135, WIRING DIAGRAM, Cruise Control System.>

Step		Check	Yes	No
1	**CHECK INHIBITOR SWITCH CIRCUIT.** 1) Turn the ignition switch to OFF. 2) Disconnect the inhibitor switch harness connector. 3) Turn the ignition switch to ON. 4) Measure the voltage between harness connector terminal and chassis ground. ***Connector & terminal*** ***(T7) No. 6 (+) — Chassis ground (–):***	Is the voltage 10 V or more?	Go to step **2**.	Check for open or short circuit in the harness between inhibitor switch and ECM.
2	**CHECK INHIBITOR SWITCH CIRCUIT.** 1) Turn the ignition switch to OFF. 2) Disconnect the starter motor harness connector. 3) Measure the resistance between the inhibitor switch harness connector terminal and the starter motor. ***Connector & terminal*** ***(T7) No. 9 — Starter motor:***	Is the resistance less than 10 Ω?	Go to step **3**.	Repair the harness.
3	**CHECK INHIBITOR SWITCH.** Remove and check the inhibitor switch. <Ref. to CC-11, Inhibitor Switch.>	Is the check result OK?	Replace the ECM. <Ref. to FU(w/o STI)-124, Engine Control Module (ECM).>	Replace the inhibitor switch.



D: 15

Detected when the CANCEL switch is pressed, or when an error related to the CRUISE switch occurs.
TROUBLE SYMPTOM:
- Cruise control cannot be set. (Cancelled immediately.)
- Cruise control cannot be released.

Refer to 11 for diagnostic procedure.
<Ref. to ES(diag)-111, 11, Diagnostic Procedure with ECU Cancel Code.>

E: 16

Detected when the ignition switch is turned to OFF, or when an error related to the ignition switch occurs.
TROUBLE SYMPTOM:
Cruise control cannot be set.
WIRING DIAGRAM:
Cruise control system <Ref. to WI-135, WIRING DIAGRAM, Cruise Control System.>

Step		Check	Yes	No
1	**CHECK IGNITION SWITCH CIRCUIT.** 1) Turn the ignition switch to OFF. 2) Disconnect the ECM harness connector. 3) Turn the ignition switch to ON. 4) Measure the voltage between harness connector terminal and chassis ground. ***Connector & terminal*** ***(B134) No. 32 (+) — Chassis ground (–):***	Is the voltage 10 V or more?	Check for poor contact of ECM connector.	• Check the fuse No. 12 (fuse & relay box). • Check open or short circuit in harness between the ignition switch and ECM.

F: 21

Cruise control command switch malfunction is detected.
TROUBLE SYMPTOM:
- Cruise control cannot be set. (Cancelled immediately.)
- Cruise control cannot be released.

Refer to 11 for diagnostic procedure.
<Ref. to ES(diag)-111, 11, Diagnostic Procedure with ECU Cancel Code.>

G: 22

Malfunction related to vehicle speed sensor is detected.
DIAGNOSIS:
Open or short circuit in the vehicle speed sensor system.
TROUBLE SYMPTOM:
Cruise control cannot be set. (Cancelled immediately.)

	Step	Check	Yes	No
1	**CHECK ABS OR VDC WARNING LIGHT.** 1) Turn the ignition switch to ON. 2) After the initial operation of the combination meter finished, check if the ABS or VDC warning light stays illuminated.	Does the warning light stay illuminated?	Check the VDCCM. <Ref. to VDC(diag)-2, Basic Diagnostic Procedure.>	Go to step **2**.
2	**CHECK DTC OF LAN COMMUNICATION CIRCUIT.** Read the DTC of body integrated unit using Subaru Select Monitor. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC displayed?	Perform inspection according to DTC.	Replace the ECM. <Ref. to FU(w/o STI)-124, Engine Control Module (ECM).>

H: 24

Switch malfunction related to cruise control is detected.
TROUBLE SYMPTOM:
- Cruise control cannot be set. (Cancelled immediately.)
- Cruise control cannot be released.

Refer to 11 for diagnostic procedure.
<Ref. to ES(diag)-111, 11, Diagnostic Procedure with ECU Cancel Code.>

I: 31

Malfunction related to engine speed signal is detected.
Abnormal increase of engine speed is detected.
Gear is placed in 1st (MT model only) or Reverse position.
Drive with the gear in 2nd position or higher, and perform the cruise setting again. It is normal if the cancel code is not detected.

J: 32

Detected outside the system operation vehicle speed range.
Increase the vehicle speed to the speed available for cruise set and perform the cruise set operation again.
If the cancel code is detected even when the cruise setting is performed again, perform the diagnosis for 22.
Refer to 22 for diagnostic procedure.
<Ref. to ES(diag)-116, 22, Diagnostic Procedure with ECU Cancel Code.>

K: 34

The vehicle was driven at higher speed than the set vehicle speed for a long time (approximately 10 minutes) during cruise driving.
The cancel code is detected when the vehicle was driven for a long time at the higher speed than the speed available for cruise set through the accelerator operation.
Perform the cruise setting again. It is normal if the cancel code is not detected.

L: 35

Detected when the vehicle speed feedback is not possible.
Set vehicle speed cannot be maintained because of some reasons (steep uphill, parking brake forgotten to be returned to the home position, etc.) during cruise driving.
The cancel code is detected when the driving condition is not suitable for cruise control.
Eliminate the probable cause, and perform the cruise set operation again.

M: 41

VDC/TCS/EPB is operated.
Vehicle dynamics control (VDC), TCS/EPB is operated during cruise driving or cruise set operation.
<Ref. to VDC(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

N: 43

- Detected that part or all of the functions of ABS/VDC are not able to function.

Detected that part or all of the functions of ABS/VDC are not able to function during cruise driving or cruise set operation.
<Ref. to VDC(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

- The CRUISE indicator did not illuminate even if the CRUISE switch is pressed before the engine starts.

Detected when the CRUISE switch is pressed during the initial diagnosis of ABS/VDC. After starting the engine, wait until the initial illumination of the ABS/VDC warning light ends, and then press the CRUISE switch again. It is normal if the CRUISE indicator illuminates.

O: 44

Body integrated unit malfunction is detected.
Body integrated unit system malfunction is detected during cruise driving or cruise setting operation.
<Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

P: 45

Combination meter malfunction is detected.
Combination meter malfunction is detected during cruise driving or cruise setting operation.
<Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

Q: 49

Automatic transmission malfunction is detected.
Automatic transmission malfunction is detected during cruise driving or cruise setting operation.
<Ref. to CVT(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

R: 61

Malfunction in the stop light & brake switch is detected.
TROUBLE SYMPTOM:

- Cruise control cannot be set.
- Cruise control cannot be released.

Refer to 12 for diagnostic procedure.
<Ref. to ES(diag)-112, 12, Diagnostic Procedure with ECU Cancel Code.>

S: 62

Neutral position switch malfunction is detected.
TROUBLE SYMPTOM:
Cruise control cannot be set.
Refer to 14 for diagnostic procedure.
<Ref. to ES(diag)-114, 14, Diagnostic Procedure with ECU Cancel Code.>

T: 63

Malfunction of vehicle speed signal variation is detected.
TROUBLE SYMPTOM:
Cruise control cannot be set. (Cancelled immediately.)
Refer to 22 for diagnostic procedure.
<Ref. to ES(diag)-116, 22, Diagnostic Procedure with ECU Cancel Code.>

NOTE:
This cancel code may be detected when the vehicle suddenly started with VDC OFF on low μ road surface. In this case, restart the engine and perform the cruise control setting operation again. If the cancel code is not detected, it is normal.

U: 64

Malfunction related to engine is detected.
For diagnostic procedure, refer to the malfunction diagnostic procedure for the engine.
<Ref. to EN(w/o STI)(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

V: 65

Cruise control command switch malfunction is detected.
When the command switch is pressed ON for a long time (approximately two minutes), stuck ON condition is detected.
TROUBLE SYMPTOM:
- Cruise control cannot be set. (Cancelled immediately.)
- Cruise control cannot be released.

Refer to 11 for diagnostic procedure.
<Ref. to ES(diag)-111, 11, Diagnostic Procedure with ECU Cancel Code.>

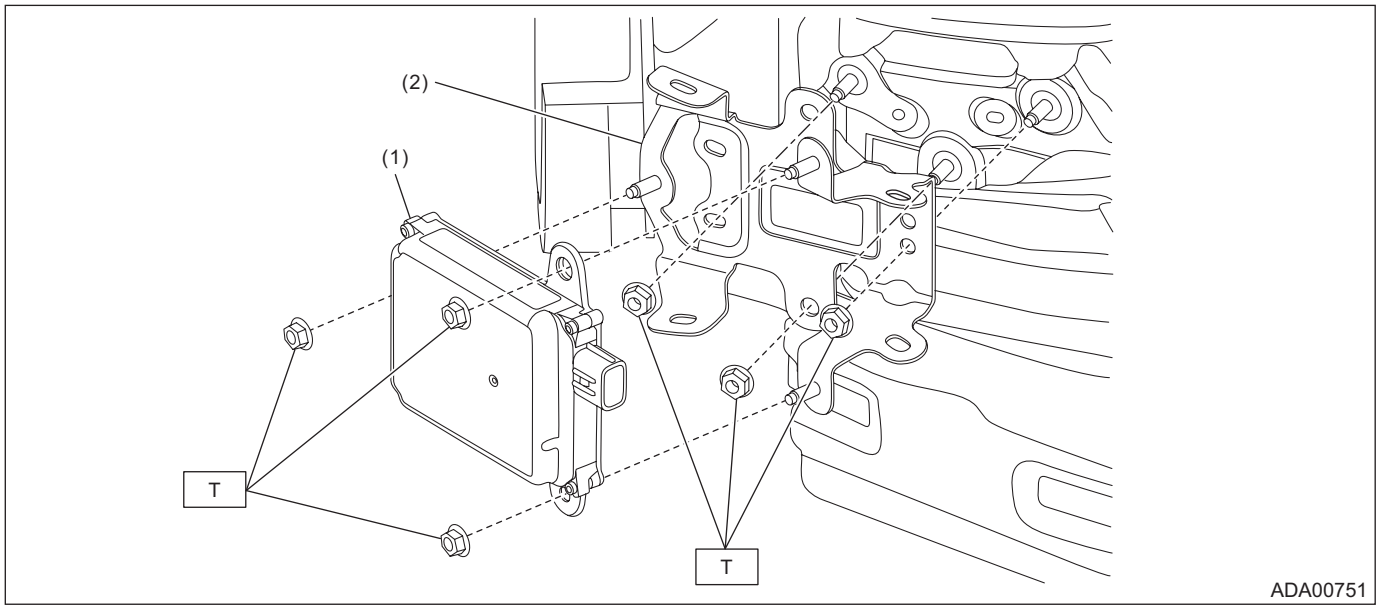
W: 66

Cruise control calculation malfunction is detected.
For diagnostic procedure, refer to the malfunction diagnostic procedure for the engine.
<Ref. to EN(w/o STI)(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

Blind Spot Detection/Rear Cross Traffic Alert

RVD

		Page
1.	General Description	2
2.	Relay and Fuse	4
3.	Blind Spot Detection/Rear Cross Traffic Alert	5
4.	Radar Sensor	6
5.	Switches and Harness	12
6.	Combination Meter	14
7.	Outer Mirror Assembly	15
8.	Diagnostics with Phenomenon	16



1. General Description

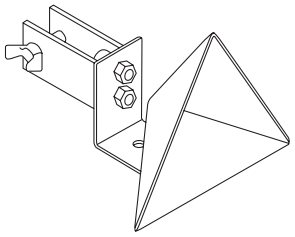
A: LOCATION

Refer to “LOCATION” of “Blind Spot Detection/Rear Cross Traffic Alert (DIAGNOSTICS)” section. <Ref. to RVD(diag)-7, LOCATION, Electrical Component Location.>

B: COMPONENT

1. RADAR SENSOR

(1) Radar sensor (master & slave) (2) Radar bracket



Tightening torque: N·m (kgf-m, ft-lb)
T: 7.5 (0.8, 5.5)

C: CAUTION

• Before disconnecting connectors of sensors or units, be sure to disconnect the ground cable from battery. When replacing the electrical parts provided with memory functions that store contents specified by a customer, record the memory contents before disconnecting the battery ground cable.
• For precautions for rear vehicle detection function, refer to “CAUTION” in “Blind Spot Detection/Rear Cross Traffic Alert (DIAGNOSTICS)” section. <Ref. to RVD(diag)-4, CAUTION, General Description.>

D: PREPARATION TOOL

1. SPECIAL TOOL

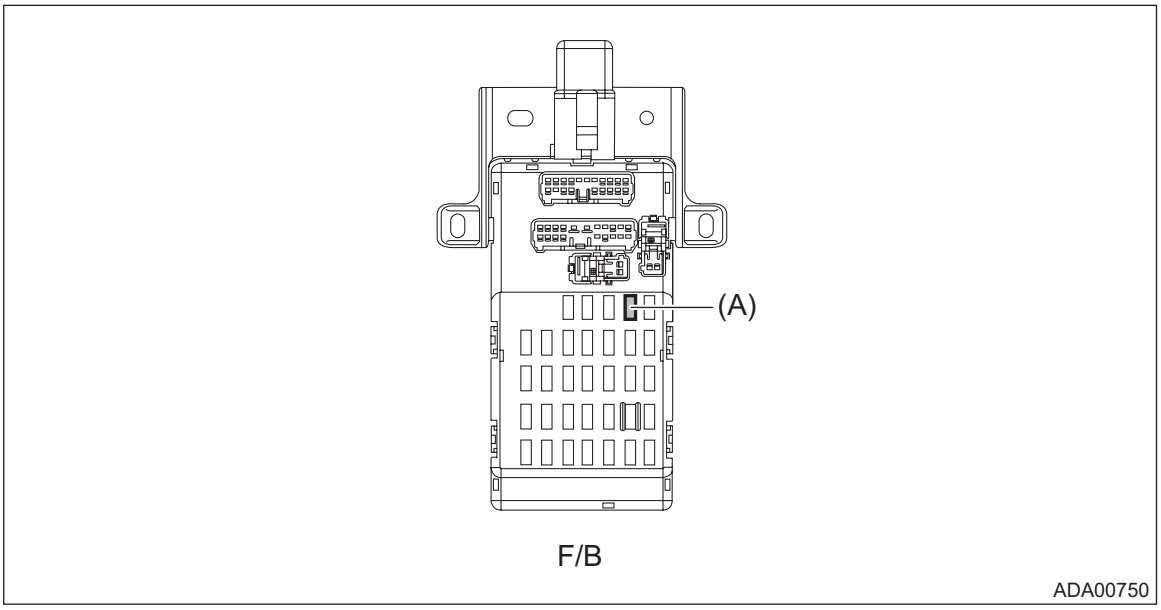


ILLUSTRATION	TOOL NUMBER	DESCRIPTION	REMARKS
 ST87699AL00A	87699AL00A	Radar reflector	Used for adjusting the radar axis of the radar sensor. NOTE: Attach the radar reflector to a round pole with a diameter of approx. 20 mm (0.79 in) or a 20-mm (0.79-in) square pole.
 STSSM4	—	SUBARU SELECT MONITOR 4	Used for setting of each function and trouble-shooting for electrical system. NOTE: For detailed operation procedures of Subaru Select Monitor 4, refer to “Application help”.

2. GENERAL TOOL

TOOL NAME	REMARKS
Circuit tester	Used for measuring resistance, voltage and current.
DST-i	Used together with Subaru Select Monitor 4.
Measure (5 m (16 ft) or more)	Used for adjusting the radar axis of the radar sensor.
Leveling line	
Plumb bob	
Packing tape	
Stand, tripod, etc.	

2. Relay and Fuse

A: LOCATION

Fuse & Relay Box	Fuse 10 A (radar sensor LH (master), radar sensor RH (slave), BSD/RCTA OFF switch)	(A)

NOTE:
For other related fuses, refer to the wiring diagram. <Ref. to WI-31, Power Supply Circuit.>

B: INSPECTION

1. CHECK FUSE

1) Remove the fuse and inspect visually.
2) If the fuse is blown out, replace the fuse.

NOTE:
If the fuse is blown again, check the system wiring harness.

3. Blind Spot Detection/Rear Cross Traffic Alert

A: WIRING DIAGRAM

Refer to “Blind Spot Detection/Rear Cross Traffic Alert” in the wiring diagram. <Ref. to WI-110, WIRING DIAGRAM, Blind Spot Detection/Rear Cross Traffic Alert.>

B: INSPECTION

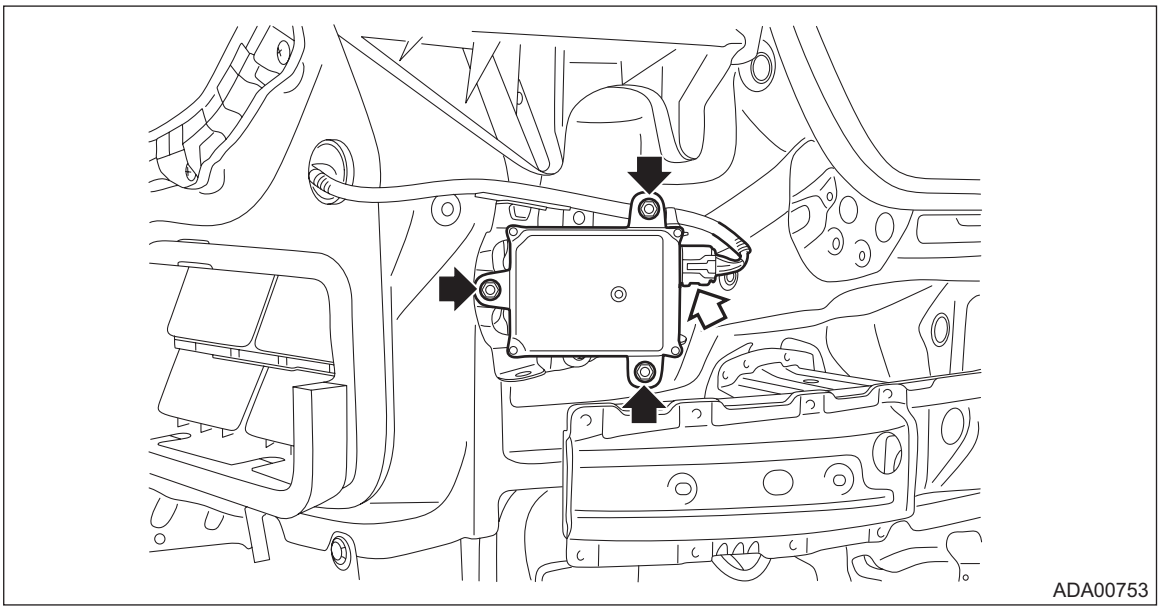
Refer to “Basic Diagnostic Procedure” of “Blind Spot Detection/Rear Cross Traffic Alert (DIAGNOSTICS)” section. <Ref. to RVD(diag)-2, Basic Diagnostic Procedure.>

C: NOTE

For procedure of each component in the Subaru Rear Vehicle Detection system, refer to the respective sections.

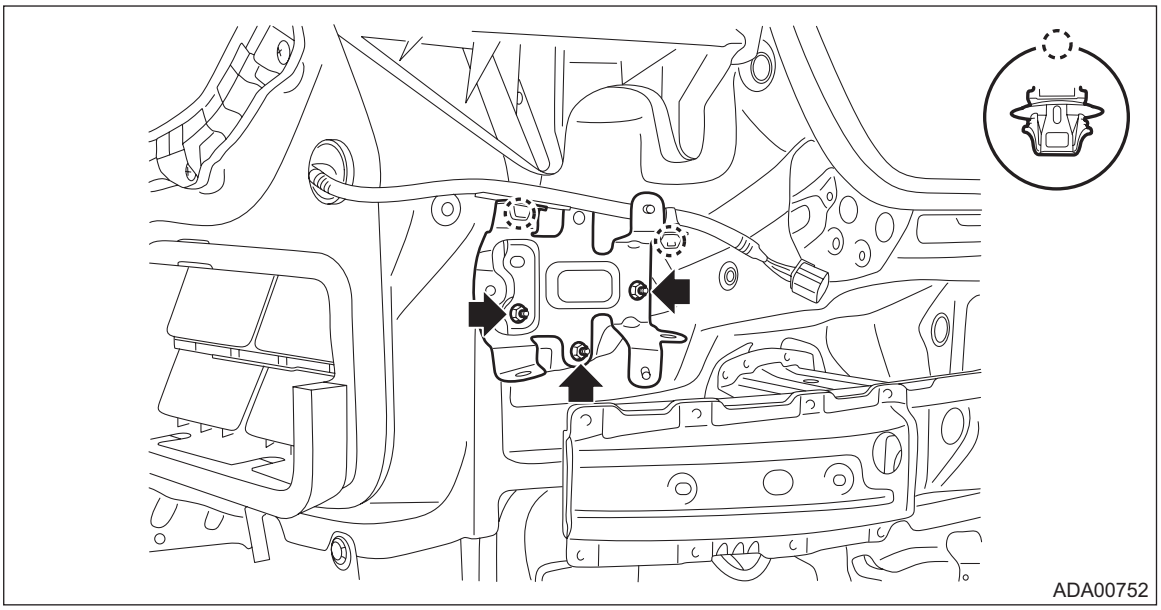
- Radar sensor: <Ref. to RVD-6, Radar Sensor.>
- BSD/RCTA OFF switch: <Ref. to RVD-12, Switches and Harness.>
- Combination meter: <Ref. to IDI-13, Combination Meter.>
- Outer mirror assembly: <Ref. to GW-27, Outer Mirror Assembly.>

4. Radar Sensor



A: REMOVAL

1. RADAR SENSOR LH (MASTER)



1) Disconnect the ground cable from battery. <Ref. to NT-6, BATTERY, NOTE, Note.>

NOTE:
For model with battery sensor, disconnect the ground terminal from battery sensor.

2) Remove the bumper face - rear. <Ref. to EI-41, REMOVAL, Rear Bumper.>
3) Remove the radar sensor LH (master).
   (1) Disconnect the connector.
   (2) Remove the nut and remove the radar sensor LH.

4) Remove the radar bracket.
   (1) Remove the harness clamp.
   (2) Remove the nut and remove the radar bracket.

2. RADAR SENSOR RH (SLAVE)

NOTE:
For the procedure of radar sensor RH (slave), refer to “RADAR SENSOR LH (MASTER)”.

B: INSTALLATION

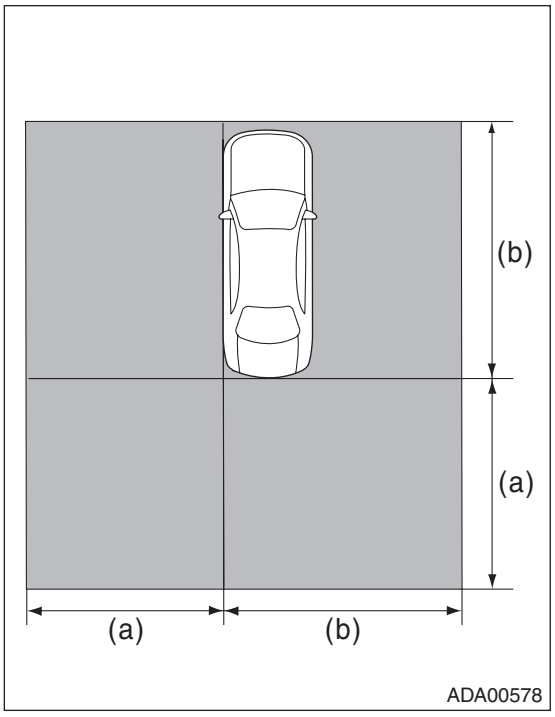
1) Install the radar bracket.

Tightening torque:
7.5 N·m (0.8 kgf-m, 5.5 ft-lb)
2) Install the radar sensor.

Tightening torque:
7.5 N·m (0.8 kgf-m, 5.5 ft-lb)
3) Install the bumper face - rear.
4) Connect the battery ground terminal. <Ref. to NT-6, BATTERY, NOTE, Note.>
5) Perform the adjustment of the radar sensor radar axis. <Ref. to RVD-8, RADAR AXIS ADJUSTMENT, ADJUSTMENT, Radar Sensor.>

C: ADJUSTMENT

1. RADAR AXIS ADJUSTMENT



CAUTION:
- **After removal/installation or replacement of the radar sensor, perform the radar axis adjustment.**
- **The procedure for the master is only shown here. However the procedure for the slave can also be done in the same way as the master.**

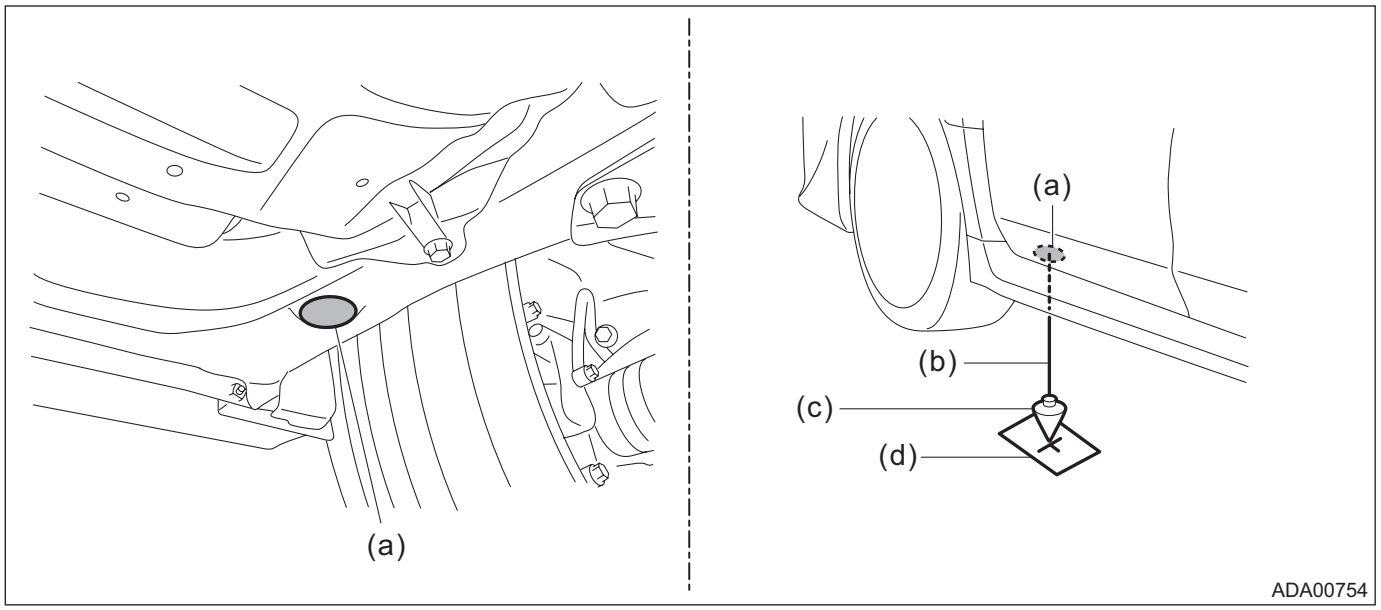
1) Before performing the inspection, check the following items.
- The inflation pressure of tires is correct.
- The vehicle does not have load.
- Vehicle's fuel tank is fully filled.

2) Place the vehicle on a level surface, where approximately 5 square meters (16.41 square ft) area can be secured behind the vehicle.

CAUTION:
- **No metallic objects around the vehicle and on the floor in the area.**
- **Do not let in objects other than the RADAR REFLECTOR (ST), persons and metallic objects inside the area.**

NOTE:
The illustration shows the secured area for adjusting the radar axis on the master side.

(a) Approx. 4 m (13.12 ft)
(b) Approx. 5 m (16.41 ft)

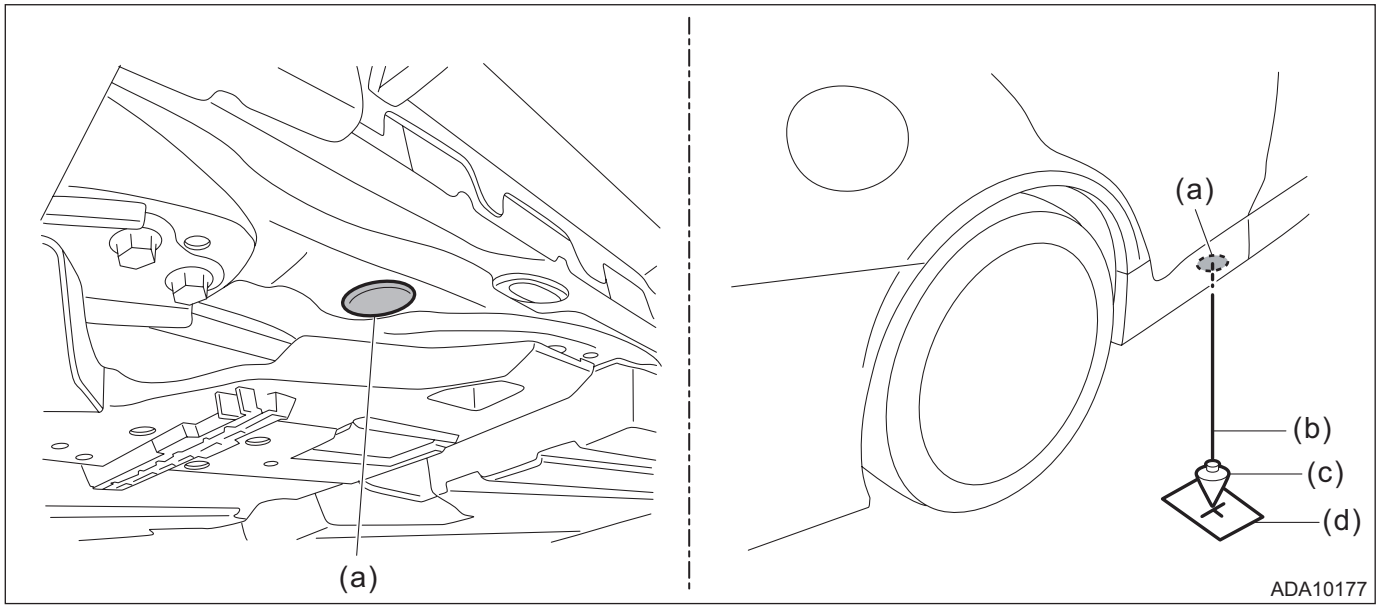


3) Prepare the Subaru Select Monitor, measure, leveling line, plumb bob, packing tape, RADAR REFLECTOR (ST), and stand or tripod for fixing the RADAR REFLECTOR.

Preparation tool:
ST: RADAR REFLECTOR (87699AL00A)

4) Set up the radar reflector.

NOTE:
The following procedure explains the method of setting the radar reflector so that the distance between radar reflector and radar sensor is 1,500 mm (4.92 ft) and the radar is positioned at an angle of 50 degree.

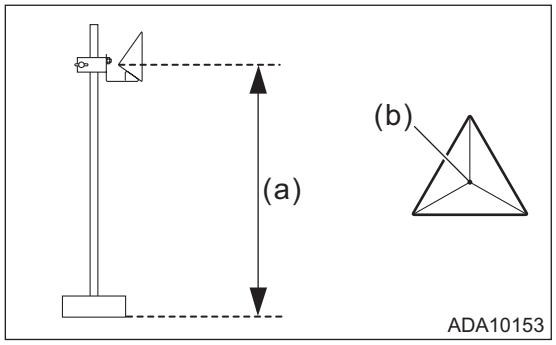


(1) Suspend the plumb bob from the center of the front hole cap, and mark the position where the plumb bob touches the ground. (Point A)

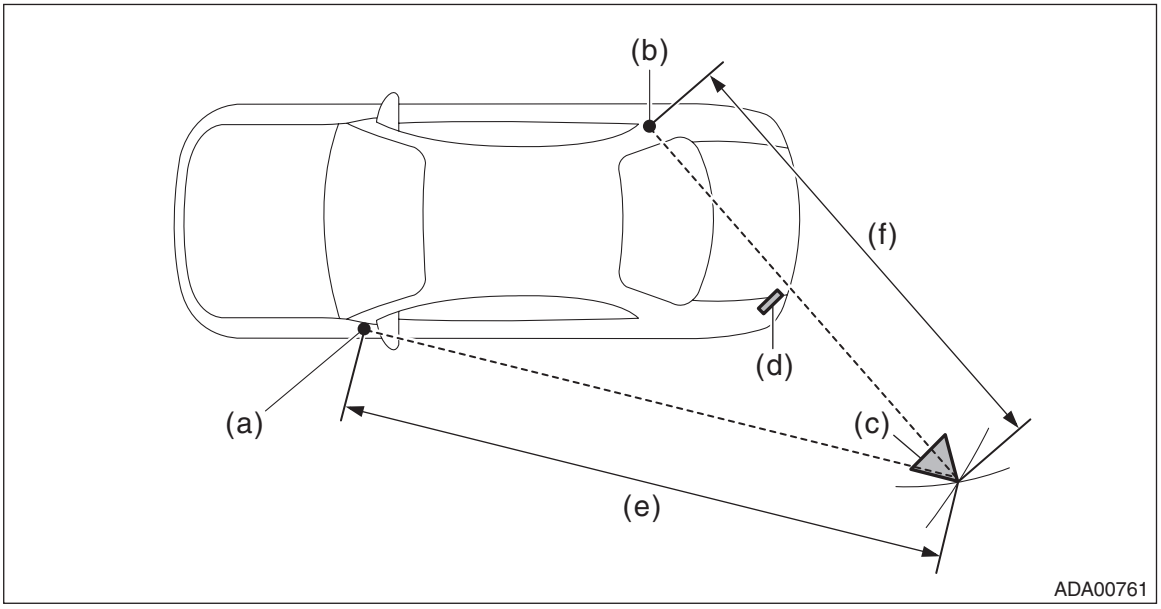
(a) Front hole cap
(b) Leveling line
(c) Plumb bob
(d) Point A

NOTE:
Stick the packing tape etc. on the floor, then make a marking on the tape.

(2) Suspend the plumb bob from the center of the rear hole cap, and mark the position where the plumb bob touches the ground. (Point B)



(a) Rear hole cap
(b) Leveling line
(c) Plumb bob
(d) Point B

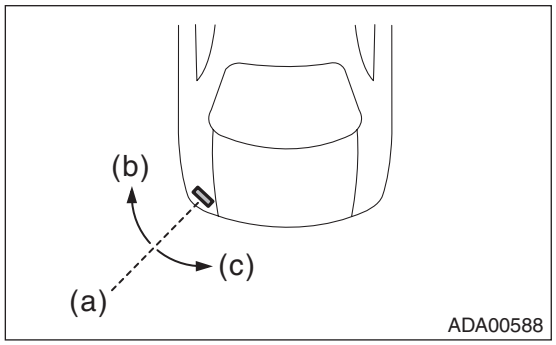


NOTE:
Stick the packing tape etc. on the floor, then make a marking on the tape.

(3) Stretch a leveling line to draw an arc with the marked point A as a pivot.
(4) Stretch a leveling line to draw an arc with the marked point B as a pivot.
(5) Set up the radar reflector at the cross point.

CAUTION:
When setting up the radar reflector, adjust the height so that the center of the pyramid points at the radar sensor as shown in the figure.

(a) 575±10 mm (22.64±0.39 in)
(b) Center of pyramid



(a) Point A
(b) Point B
(c) Radar reflector
(d) Radar sensor
(e) 4,290 mm (14.08 ft)
(f) 3,430 mm (11.25 ft)

5) Connect the Subaru Select Monitor.

NOTE:
- Use the Subaru Select Monitor equipped with the latest version of the software.
- For detailed operation procedures, refer to “Application help”.

6) Turn the ignition switch to ON and wait for 10 seconds.
7) Perform radar axis adjustment.
   (1) On «Start» display, select «Diagnosis».
   (2) On «Vehicle selection» display, enter vehicle information and select «Confirmed».
   (3) On «Main Menu» display, select «Each System».
   (4) On «Select System» display, select «Subaru Rear Vehicle Detection(RH)» or «Subaru Rear Vehicle Detection(LH)» and then select «Enter».
   (5) On «Select Function» display, select «Work Support».
   (6) From the work support item list, select «RADAR Alignment».
   (7) Follow the messages displayed on the Subaru Select Monitor screen when working.

NOTE:
Deviation of radar axis direction is indicated by + (plus) or – (minus).

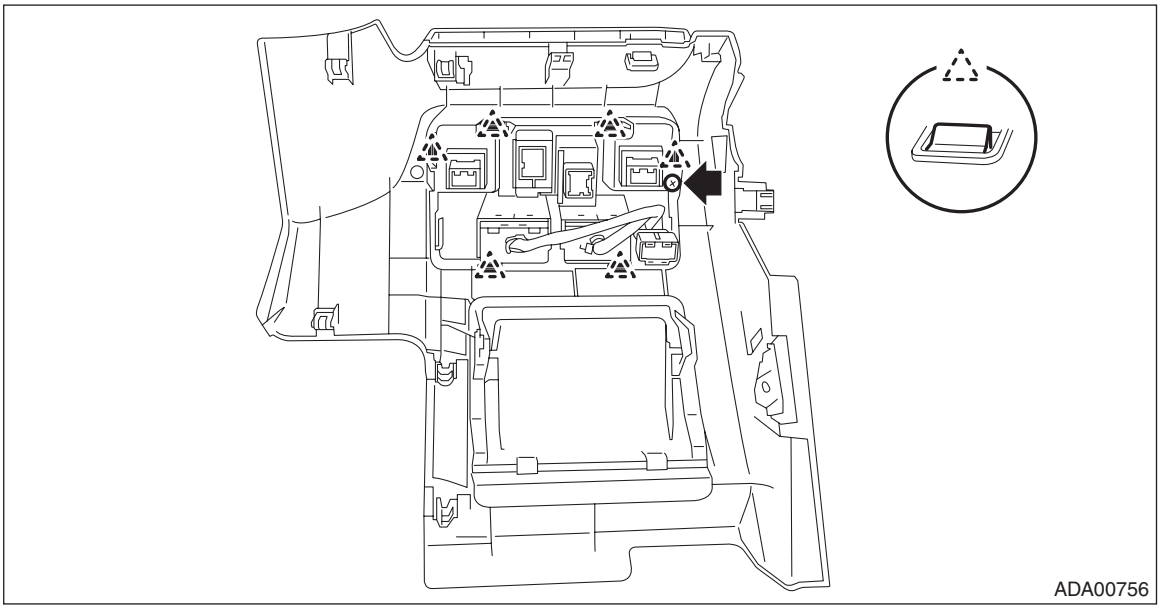
(a) Center of radar
(b) + (plus)
(c) – (minus)

(8) If the result is out of permissive range, it is assumed that the radar reflector position may be incorrect or the radar bracket or its installation location on the vehicle may be deformed. Check the set position of the radar reflector, radar bracket and other attachment, and perform the radar axis adjustment again.

5. Switches and Harness

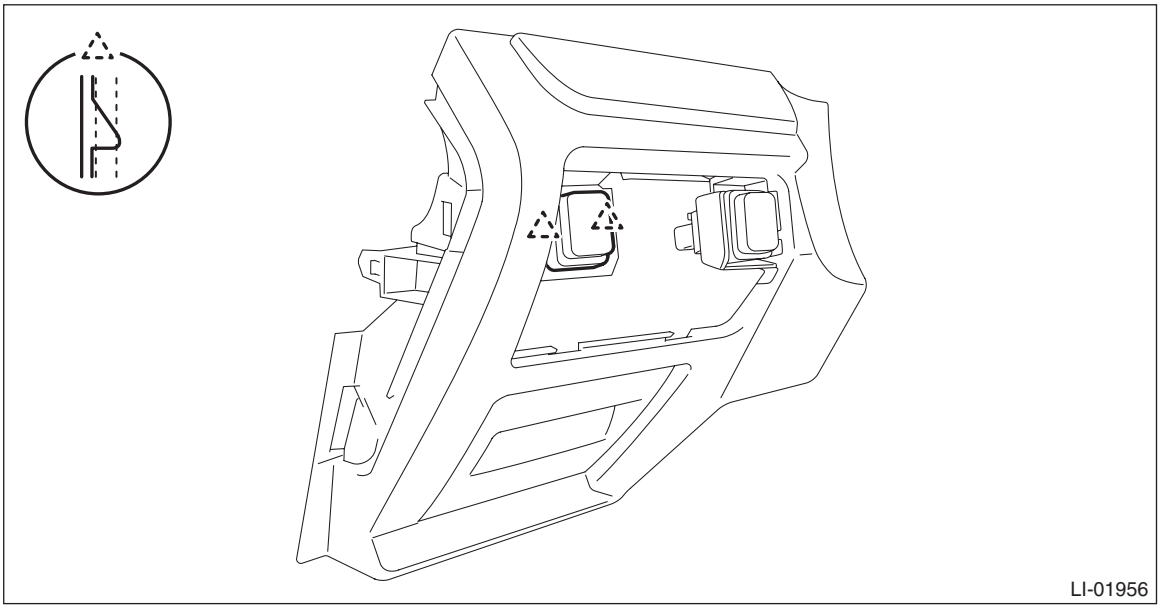
A: REMOVAL

BSD/RCTA OFF switch



1) Disconnect the ground cable from battery and wait for at least 60 seconds before starting work. <Ref. to NT-6, BATTERY, NOTE, Note.>

NOTE:
For model with battery sensor, disconnect the ground terminal from battery sensor.



2) Remove the cover assembly - instrument panel LWR driver OUT. <Ref. to EI-62, REMOVAL, Instrument Panel Lower Cover.>

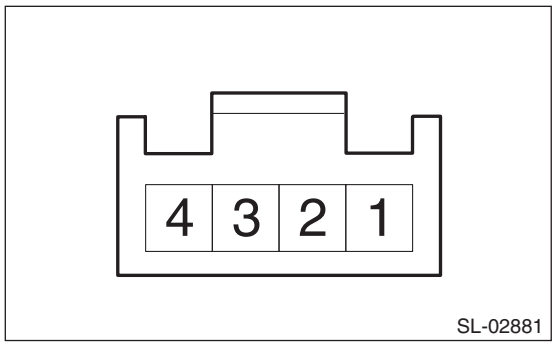
3) Remove the BSD/RCTA OFF switch.

(1) Remove the screw, release the claws, and then remove the panel - switch.

(2) Release the claws and remove the BSD/RCTA OFF switch.

B: INSTALLATION

BSD/RCTA OFF switch



1) Install the BSD/RCTA OFF switch.
2) Install the panel - switch.
3) Install the cover assembly - instrument panel LWR driver OUT.
4) Connect the battery ground terminal. <Ref. to NT-6, BATTERY, NOTE, Note.>

C: INSPECTION

BSD/RCTA OFF switch

1) Measure the resistance between connector terminals.

Preparation tool:
Circuit tester

Terminal No.	Inspection conditions	Standard
2 — 3	Switch OFF	1 MΩ or more
	Switch ON	Less than 1 Ω

2) Apply battery voltage between the connector terminals to check lighting condition of illumination inside the switch.

Terminal No.	Inspection conditions	Specification
1 (+) — 4 (–)	Apply battery voltage.	Light ON

3) Replace the BSD/RCTA OFF switch if it is found defective.

6. Combination Meter

A: NOTE

For the operation procedures for combination meter, refer to “INSTRUMENTATION/DRIVER INFO” section. <Ref. to IDI-13, Combination Meter.>

7. Outer Mirror Assembly

A: NOTE

For the operation procedures for the outer mirror assembly, refer to “GLASS/WINDOWS/MIRRORS” section. <Ref. to GW-27, Outer Mirror Assembly.>

8. Diagnostics with Phenomenon

A: INSPECTION

Refer to “Diagnostics with Phenomenon” of “Blind Spot Detection/Rear Cross Traffic Alert (DIAGNOSTICS)” section. <Ref. to RVD(diag)-40, Diagnostics with Phenomenon.>

Blind Spot Detection/Rear Cross Traffic Alert (DIAGNOSTICS)

RVD(diag)

		Page
1.	Basic Diagnostic Procedure	2
2.	Check List for Interview	3
3.	General Description	4
4.	Electrical Component Location	7
5.	Control Module I/O Signal	8
6.	Subaru Select Monitor	10
7.	Read Diagnostic Trouble Code (DTC)	12
8.	Clear Memory Mode	13
9.	Read Cancel Code	14
10.	Inspection Mode	15
11.	Read Current Data	17
12.	System Operation Check Mode	19
13.	List of Diagnostic Trouble Code (DTC)	20
14.	List of Cancel Code	21
15.	Diagnostic Procedure with Diagnostic Trouble Code (DTC)	22
16.	Diagnostic Procedure with Cancel Code	39
17.	Diagnostics with Phenomenon	40

1. Basic Diagnostic Procedure

A: PROCEDURE

	Step	Check	Yes	No
1	**PERFORM CUSTOMER INTERVIEW.** Using the Check List for Interview, ask the customer the condition of how trouble occurs.	Did you interview the customer?	Go to step **2**.	Interview the customer. <Ref. to RVD(diag)-3, Check List for Interview.>
2	**CHECK SUBARU SELECT MONITOR COMMUNICATION.** Check for communication with the radar sensor. NOTE: If the communication function of the Subaru Select Monitor cannot be executed properly, check the communication circuit. <Ref. to RVD(diag)-10, INSPECTION, Subaru Select Monitor.>	Is communication possible?	Go to step **3**.	Check the communication circuit.
3	**CHECK RADAR SENSOR.** Read the DTC and cancel code of the radar sensors LH and RH using the Subaru Select Monitor. <Ref. to RVD(diag)-12, Read Diagnostic Trouble Code (DTC).> <Ref. to RVD(diag)-14, Read Cancel Code.>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs and cancel code. (Perform the diagnosis to the side that displayed the DTC.) <Ref. to RVD(diag)-20, List of Diagnostic Trouble Code (DTC).> <Ref. to RVD(diag)-14, Read Cancel Code.> After diagnosis, Go to step **6**.	Go to step **4**.
4	**PERFORM DIAGNOSTICS WITH PHENOMENON.** Check the list of Diagnostics with Phenomenon. <Ref. to RVD(diag)-40, Diagnostics with Phenomenon.>	Does the symptom apply?	Perform diagnosis according to the procedures in the diagnostics with phenomenon.	Go to step **5**.
5	**CHECK TROUBLE PHENOMENON.** 1) Perform the basic inspection. <Ref. to RVD(diag)-6, INSPECTION, General Description.> 2) Check the radar sensor. <Ref. to RVD(diag)-8, Control Module I/O Signal.> 3) Perform check of current data. <Ref. to RVD(diag)-17, Read Current Data.>	Was the trouble cause found?	Perform the Clear Memory after repairing or replacing the cause of trouble.	System is normal.
6	**PERFORM DIAGNOSIS.** 1) Perform the Clear Memory Mode. <Ref. to RVD(diag)-13, Clear Memory Mode.> 2) Perform the Inspection Mode. <Ref. to RVD(diag)-15, Inspection Mode.>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs. <Ref. to RVD(diag)-20, List of Diagnostic Trouble Code (DTC).>	Finish the diagnosis.

2. Check List for Interview

A: CHECK

- Inspect the following items regarding the vehicle's state.
- Print out this page for interviewing customers.

<table>
<tr><td colspan="2">Blind Spot Detection/Rear Cross Traffic Alert Check List for Interview</td><td colspan="2">Received Year Month Date</td></tr>
<tr><td colspan="2" rowspan="2">Customer's name</td><td>Registration No.</td><td>Initial year of registration

<tr><td>Date when problem occurred</td><td>Year Month Date</td><td>Frequency of trouble occurrence</td><td>Always occurs
Sometimes occurs
(times per day, times per month)</td></tr>
<tr><td rowspan="2">Condition of trouble occurrence
(How the trouble occurs)</td><td rowspan="2"></td><td>Weather</td><td>Fine • Cloudy • Rainy •
Snowy • Others ( )</td></tr>
<tr><td>Temperature</td><td>°C (°F) — °C (°F)</td></tr>
<tr><td>Road conditions</td><td></td><td>Occurrence location</td><td></td></tr>
<tr><td>Accessory installation condition</td><td colspan="3"></td></tr>
<tr><td>Confirmation of trouble condition</td><td colspan="3"></td></tr>
<tr><td>Diagnostic Trouble Code</td><td colspan="3"></td></tr>
</table>

3. General Description

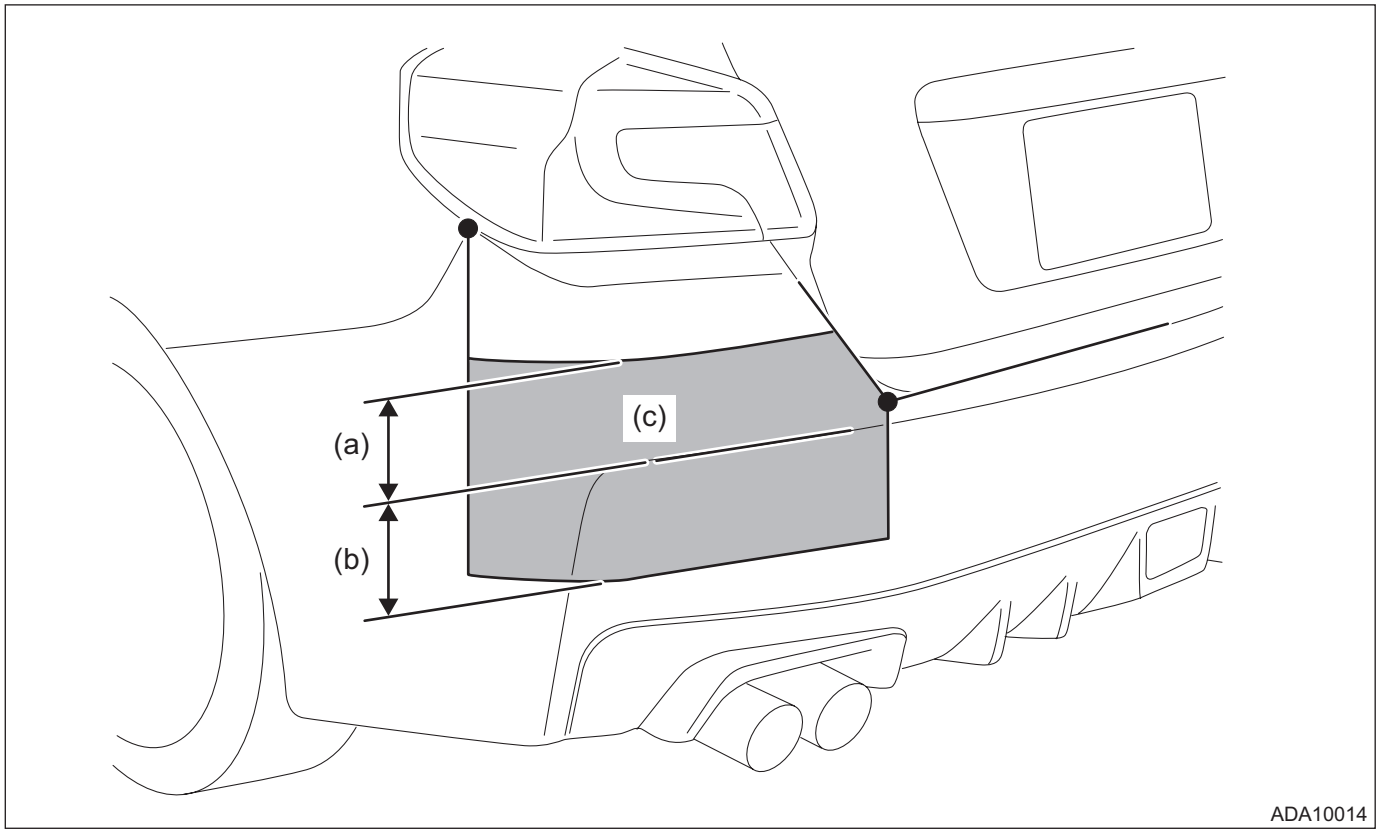
A: CAUTION

1. BSD/RCTA

1. In some cases, BSD/RCTA may not work correctly under the following conditions.
   - In bad weather such as heavy rain, fog, snow, sand storm, etc.
   - When ice, snow, dirt, etc. cover the rear bumper.
   - When the rear bumper has scratches or deformation in the area of the radar sensor.
   - When a difference of vehicle speeds between your own vehicle and another vehicle within the detection range is too large.
   - When there is another vehicle remaining within the detection range while your own vehicle starts from stationary state.
   - While driving on a steep slope with a series of uphills and downhills.
   - While driving on a wet road with such as puddles.
   - When more than one vehicle is approaching one after another with a short distance.
   - When vehicle speed of your own vehicle is almost the same as that of the vehicle within the detection range.
   - When a difference of the vehicle heights between your own vehicle and another vehicle in the next lane is too large.
   - Immediately after operating the BSD/RCTA OFF switch.
   - On wide lanes, when another vehicle of the next lane drives along the opposite edge so the distance is too large for the detection.
2. BSD/RCTA does not detect the following type of vehicles as well as objects other than vehicles.
   - Oncoming vehicle
   - Small motorcycle, bike, pedestrian, etc. *
   - Vehicle following behind on the same lane *
   - Stationary objects such as guardrail, wall, sign and parked vehicle*
   - Another vehicle driving on two lanes away*

NOTE:
*: Detection may be successful depending on circumstances.

3. BSD/RCTA may perform unnecessary detection in the following conditions.
   - When guardrails or walls are close enough to be within the detection range.
   - When distance from the vehicle behind is short.
   - On narrow lanes, when another vehicle driving on two lanes away enters the detection range.



4. Radar sensors of BSD/RCTA are each located on LH and RH sides. Always observe the followings for proper operation of the system.

- Always clean the vicinity of radar sensors.
- Do not give a strong impact to the radar sensor areas. Displacement of the radar sensors may result in improper operation of the system such that it may not detect the vehicle entering the detection range.
- Do not disassemble the radar sensors.
- Do not scratch or deform the bumper areas with the radar sensors.

NOTE:
Replace the rear bumper in the following cases.

– When there is any collision trace or dent inside the radar projection area.
– When there is any scuffed (chipped off) section inside the radar projection area on the resin bumper.
– When there is any crack inside the radar projection area.

NOTE:
Radar projection area

(a) 100 mm (3.9 in) (b) 100 mm (3.9 in) (c) Radar projection area

For other flaws, perform the sensor readjustment. If no problem is found, replacement is unnecessary.

- Do not put a sticker, etc. on/around the radar sensors.
- Do not retrofit the radar sensors or the bumper close to the radar sensors.
- Do not repaint the radar sensors or the bumper close to the radar sensors.

NOTE:
If there is any painting defect inside the radar projection area, replace the rear bumper without trying to repair it.

- Do not give a strong impact, force or drop-off to the radar sensors because they are precision devices.
- Do not reuse the radar sensors that were affected by strong impact, force, or fell off.

B: INSPECTION

1. BASIC INSPECTION

Before performing diagnosis, check the following items that might provoke the problems related to BSD/RCTA.
1) Check the battery. <Ref. to SC(w/o STI)-51, INSPECTION, Battery.> <Ref. to SC(STI)-24, INSPECTION, Battery.>
2) Check the relay and fuse condition. <Ref. to RVD-4, Relay and Fuse.>
3) Check the connecting condition of harness and connector.

C: PREPARATION TOOL

1. SPECIAL TOOL

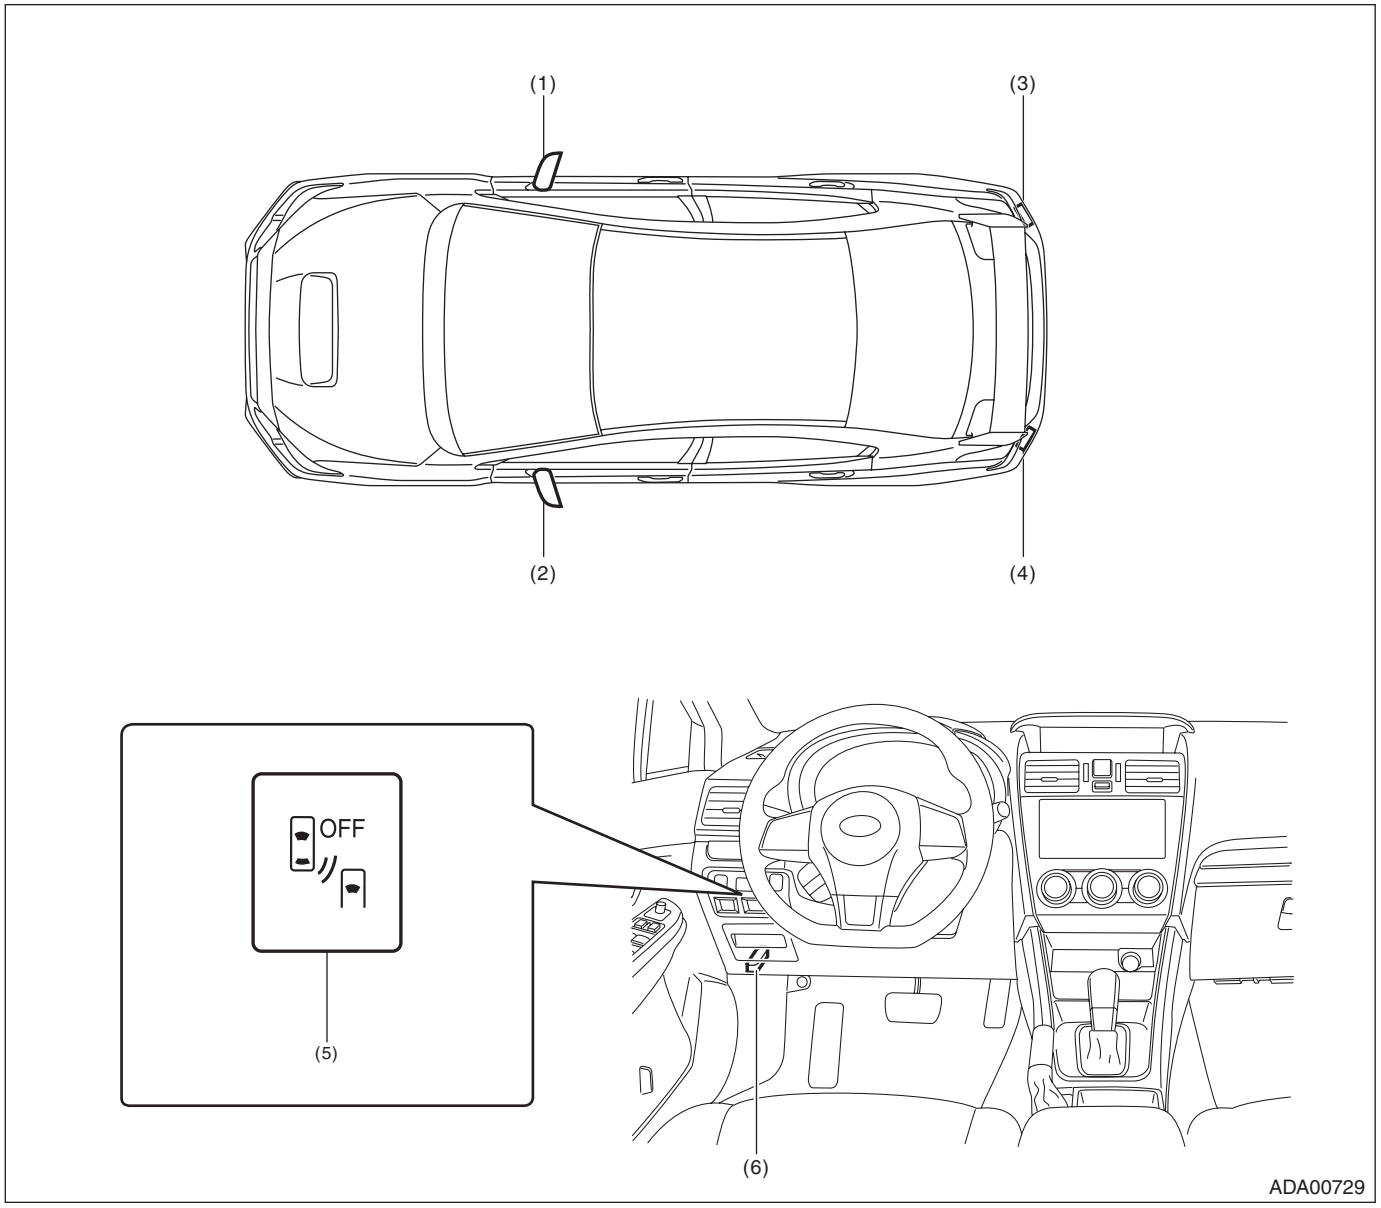


ILLUSTRATION	TOOL NUMBER	DESCRIPTION	REMARKS
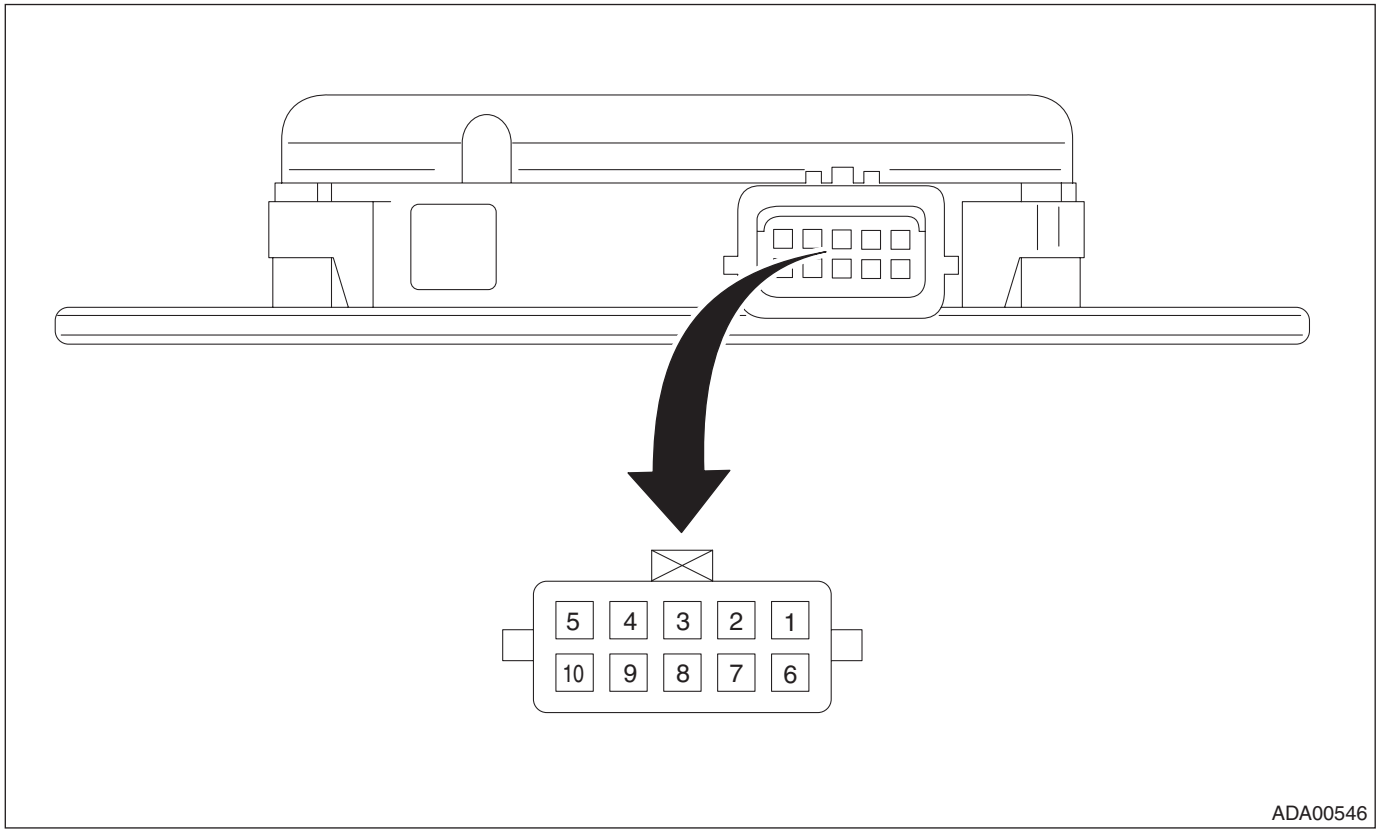
 STSSM4	—	SUBARU SELECT MONITOR 4	Used for setting of each function and trouble-shooting for electrical system. NOTE: For detailed operation procedures of Subaru Select Monitor 4, refer to “Application help”.

2. GENERAL TOOL

TOOL NAME	REMARKS
Circuit tester	Used for measuring resistance, voltage and current.
DST-i	Used together with Subaru Select Monitor 4.

4. Electrical Component Location

A: LOCATION

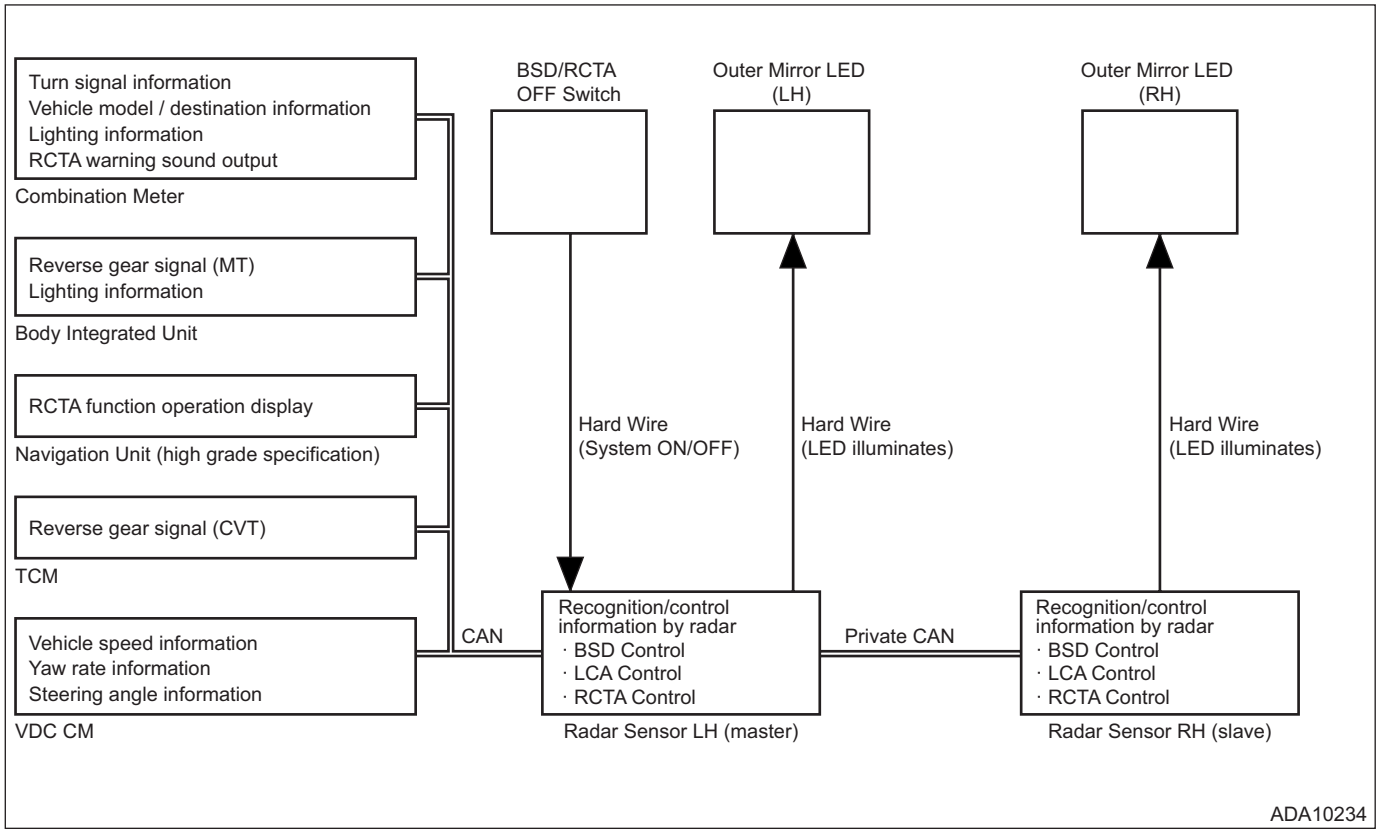


(1) Outer mirror assembly RH
(2) Outer mirror assembly LH
(3) Radar sensor RH (slave)
(4) Radar sensor LH (master)
(5) BSD/RCTA OFF switch
(6) Data link connector

5. Control Module I/O Signal

A: ELECTRICAL SPECIFICATION

1. RADAR SENSOR



Terminal No.	Contents		Measuring condition	Standard
	Radar sensor LH (master)	Radar sensor RH (slave)		
1 ←→ Chassis ground	Private CAN H	Private CAN H	Always	1 MΩ or more
2 ←→ Chassis ground	Master CAN H	—	Always	1 MΩ or more
3 ←→ Chassis ground	—	—	—	—
4 ←→ Chassis ground	Left mirror LED output	Right mirror LED output	• Ignition switch OFF → ON • BSD/RCTA OFF switch OFF → ON	• When indicator is ON: 2.5 — 10.5 V • When indicator is blinking: 0 ←→ 2.5 — 10.5 V • When indicator is OFF: Less than 1 V
5 ←→ Chassis ground	Ignition power supply	Ignition power supply	Ignition switch OFF → ON	Less than 1 V → 9 — 16 V
6 ←→ Chassis ground	Private CAN L	Private CAN L	Always	1 MΩ or more
7 ←→ Chassis ground	Master CAN L	—	Always	1 MΩ or more
8 ←→ Chassis ground	BSD/RCTA OFF switch	—	• Ignition switch ON • BSD/RCTA OFF switch OFF → ON (while pressing and holding the switch)	Less than 1 V → 9 — 16 V
9 ←→ Chassis ground	—	—	—	—
10 ←→ Chassis ground	GND	GND	Always	Less than 1 Ω

B: WIRING DIAGRAM

Refer to “SRVD System” in the wiring diagram. <Ref. to WI-110, WIRING DIAGRAM, Blind Spot Detection/Rear Cross Traffic Alert.>

C: SYSTEM BLOCK DIAGRAM

- Blind Spot Detection/Rear Cross Traffic Alert system consists of the following.
- There is a control ECM in the radar sensor main body, which performs the vehicle identification and the alert judgment control.
- The LH/RH radar sensors are identified as Master/Slave for control purposes. They are connected by the private CAN to execute the controls through mutual communication. The radar on the Master side receives the input from the vehicle CAN and the SRVD OFF switch, and information necessary for control can be obtained from other modules via the vehicle CAN.
- The outer mirror LED is directly driven by the signal from the radar sensor.

6. Subaru Select Monitor

A: OPERATION

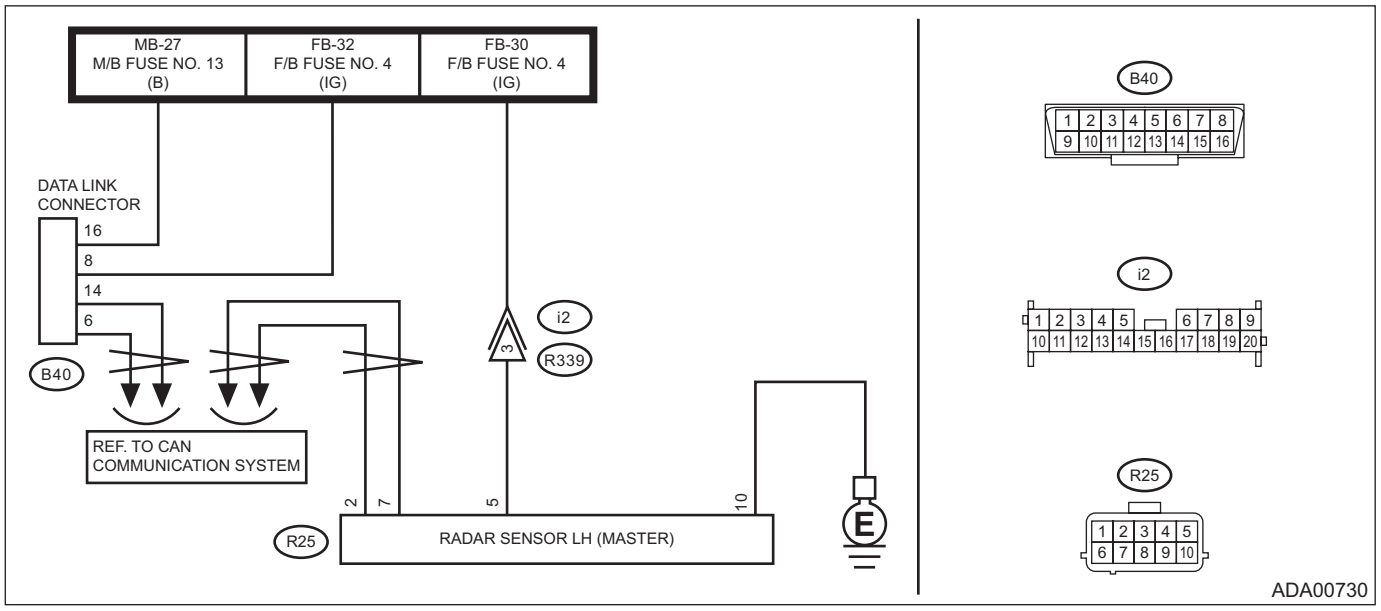
- For operation procedures, refer to “Application help”.
- When the radar sensor cannot communicate with Subaru Select Monitor, perform “COMMUNICATION FOR INITIALIZING IMPOSSIBLE”. <Ref. to RVD(diag)-10, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, INSPECTION, Subaru Select Monitor.>

B: INSPECTION

1. COMMUNICATION FOR INITIALIZING IMPOSSIBLE

When communication with the radar sensor is impossible

DETECTING CONDITION:



- Defective harness connector
- Power supply circuit malfunction
- Defective radar sensor
- Defective CAN communication circuit
- Defective Subaru Select Monitor

TROUBLE SYMPTOM:

Communication is impossible between radar sensor and Subaru Select Monitor.

WIRING DIAGRAM:

SRVD system <Ref. to WI-110, WIRING DIAGRAM, Blind Spot Detection/Rear Cross Traffic Alert.>

Step		Check	Yes	No
1	**CHECK FUSE.** 1) Turn the ignition switch to OFF. 2) Check the fuse for radar sensor LH. <Ref. to RVD-4, Relay and Fuse.>	Is the check result OK?	Go to step **2**.	Replace the fuse. If the replaced fuse has blown out immediately, repair the short circuit to ground in harness between fuse and radar sensor LH.

	Step	Check	Yes	No
2	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the radar sensor LH connector. 2) Turn the ignition switch to ON. 3) Using a tester, measure the voltage between radar sensor LH connector (harness side) and chassis ground. ***Connector & terminal*** ***(R25) No. 5 (+) — Chassis ground (–):***	Is the voltage 10 V or more?	Go to step **3**.	Repair the open circuit of harness between fuse and radar sensor LH connector.
3	**CHECK HARNESS (OPEN CIRCUIT).** 1) Turn the ignition switch to OFF. 2) Using a tester, measure the resistance between radar sensor LH connector (harness side) and chassis ground. ***Connector & terminal*** ***(R25) No. 10 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **4**.	Repair the open circuit in harness between radar sensor and chassis ground.
4	**CHECK LAN SYSTEM.** 1) Connect the radar sensor LH connector. 2) Inspect LAN system. <Ref. to RVD(diag)-2, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **5**.	Perform the inspection according to the diagnosis for LAN system.
5	**CHECK RADAR SENSOR.** Communicate with the radar sensor.	Is communication possible?	The circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.	Replace the radar sensor LH. <Ref. to RVD-6, Radar Sensor.>

7. Read Diagnostic Trouble Code (DTC)

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Subaru Rear Vehicle Detection(RH)» or «Subaru Rear Vehicle Detection(LH)» and then select «Enter».
5) On «Select Function» display, select «DTC».

NOTE:
- For detailed operation procedures, refer to “Application help”.
- For details concerning DTC, refer to the List of Diagnostic Trouble Codes (DTC). <Ref. to RVD(diag)-20, List of Diagnostic Trouble Code (DTC).>
- Check and replace the side that displayed the DTC.

8. Clear Memory Mode

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Subaru Rear Vehicle Detection(RH)» or «Subaru Rear Vehicle Detection(LH)» and then select «Enter».
5) On «Select Function» display, select «DTC».
6) On «DTC» display, select «Clear Memory».

NOTE:
For detailed operation procedures, refer to “Application help”.

9. Read Cancel Code

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Subaru Rear Vehicle Detection(RH)» or «Subaru Rear Vehicle Detection(LH)» and then select «Enter».
5) On «Select Function» display, select «Cancel Code».

NOTE:
- For operation procedures, refer to “Application help”.
- For details concerning cancel codes, refer to the List of Cancel Codes. <Ref. to RVD(diag)-21, List of Cancel Code.>

10.Inspection Mode

A: OPERATION

It is possible to diagnose the DTC by performing the indicated inspection mode. After correcting the DTC, perform a necessary inspection mode and make sure that the function is resumed correctly and the DTC is recorded.

1. INSPECTION MODE 1

DTC	Item	Note
U0073	CONTROL MODULE COMMUNICATION BUS OFF	—
U0074	CONTROL MODULE COMMUNICATION BUS "BODY-CAN" OFF	—
U0100	LOST COMMUNICATION WITH ECM/PCM “A”	—
U0101	LOST COMMUNICATION WITH TCM	—
U0122	LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE	—
U0140	LOST COMMUNICATION WITH BODY CONTROL MODULE	—
U0155	LOST COMMUNICATION WITH INSTRUMENT PANEL CLUSTER (IPC) CONTROL MODULE	—
U0401	INVALID DATA RECEIVED FROM ECM/PCM “A”	—
U0402	INVALID DATA RECEIVED FROM TCM	—
U0416	INVALID DATA RECEIVED FROM VEHICLE DYNAMICS CONTROL MODULE	—
U0422	INVALID DATA RECEIVED FROM BODY CONTROL MODULE	—
U0423	INVALID DATA RECEIVED FROM INSTRUMENT PANEL CLUSTER CONTROL MODULE	—
B2304	REAR RADAR ON-OFF SWITCH STUCK	—
B2311	REAR RADAR DETECT TCM	—
B2313	REAR RADAR DETECT VDC	—
B2327	REAR RADAR INTERNAL FAILURE (INTERNAL ELECTRIC CIRCUIT)	—
B2350	REAR RADAR COMMUNICATION ERROR BETWEEN MASTER AND SLAVE	—

1) Perform the Clear Memory Mode. <Ref. to RVD(diag)-13, Clear Memory Mode.>
2) Read the DTC and check that the DTC is not displayed. <Ref. to RVD(diag)-12, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs. After solving the DTC, repeat from step 1).
3) Start the engine and wait for 30 seconds or more.
4) Read the DTC and check that the DTC is not displayed.

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs. <Ref. to RVD(diag)-20, List of Diagnostic Trouble Code (DTC).>

2. INSPECTION MODE 2

DTC	Item	Note
B2300	REAR RADAR CIRCUIT LOW	—
B2301	REAR RADAR CIRCUIT HIGH	—

1) Perform the Clear Memory Mode. <Ref. to RVD(diag)-13, Clear Memory Mode.>
2) Read the DTC and check that the DTC is not displayed. <Ref. to RVD(diag)-12, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs. After solving the DTC, repeat from step 1).
3) Start the engine.
4) Perform the System Operation Check Mode «Door mirror indicator active test». <Ref. to RVD(diag)-19, System Operation Check Mode.>
5) Read the DTC and check that the DTC is not displayed.

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs. <Ref. to RVD(diag)-20, List of Diagnostic Trouble Code (DTC).>

3. INSPECTION MODE 3

DTC	Item	Note
B2329	REAR RADAR AXIS ALIGNMENT INCOMPLETE	—

1) Perform the Clear Memory Mode. <Ref. to RVD(diag)-13, Clear Memory Mode.>
2) Read the DTC and check that the DTC is not displayed. <Ref. to RVD(diag)-12, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs. After solving the DTC, repeat from step 1).
3) Perform the adjustment of radar axis.
4) Read the DTC and check that the DTC is not displayed.

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs. <Ref. to RVD(diag)-20, List of Diagnostic Trouble Code (DTC).>

11.Read Current Data

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Subaru Rear Vehicle Detection(RH)» or «Subaru Rear Vehicle Detection(LH)» and then select «Enter».
5) On «Select Function» display, select «Data Monitor».

NOTE:
For detailed operation procedures, refer to “Application help”.

B: LIST

- «Subaru Rear Vehicle Detection(LH)»

Display	Content	Reference value	Note
SRVD System fail flag	Current failure status of BSD/RCTA system is displayed.	• Normal • Fail	—
SRVD System HALT flag	Current temporary stop status of BSD/RCTA system is displayed. Temporary stop: Temporarily stops when reception of radar sensor waves failed due to some obstacles or when the temperature is not within the range of –40°C (–40°F) — 85°C (185°F).	• Normal • Halt	—
SRVD System ON-OFF flag	ON/OFF status of BSD/RCTA system is displayed. If this flag is set to «OFF» while the values of «SRVD System fail flag» and «SRVD System HALT flag» are «Normal», the BSD/RCTA system is set to OFF by the BSD/RCTA OFF switch.	• OFF • ON	—
LH-Side Target detection flag	Detection status of the control target vehicle on the rear left side is displayed. Detection is possible if the target vehicle is moving when the own vehicle drives forward at 12 km/h (8 MPH) or more or backward at 0 km/h (0 MPH) or more.	• Un-detect • Detect	—
LH-Side BSD caution 1st flag	ON is displayed when the 1st stage BSD warning on the left side is activated (when the outer mirror assembly illuminates).	• OFF • ON	—
LH-Side LCA caution 1st flag	ON is displayed when the 1st stage LCA warning on the left side is activated (when the outer mirror assembly illuminates).	• OFF • ON	—
LH-Side RCTA caution flag	ON is displayed when the RCTA warning on the left side is activated (when the outer mirror assembly illuminates and buzzer sounds).	• OFF • ON	—
LH-Side Radar Voltage value	Power supply voltage of the radar sensor LH is displayed.	0 — 25.5 V	—
LH-Side Temperature value	Ambient temperature of the radar sensor LH is displayed.	–128 — 127°C	—
Trip Count	Time stamp information <Ref. to LAN(diag)-6, TIME STAMP, CAUTION, General Description.>	—	—
Count		—	—
Time Count		—	—

- «Subaru Rear Vehicle Detection(RH)»

Display	Content	Reference value	Note
SRVD System fail flag	Current failure status of BSD/RCTA system is displayed.	• Normal • Fail	—
SRVD System HALT flag	Current temporary stop status of BSD/RCTA system is displayed. Temporary stop: Temporarily stops when reception of radar sensor waves failed due to some obstacles or when the temperature is not within the range of –40°C (–40°F) — 85°C (185°F).	• Normal • Halt	—
SRVD System ON-OFF flag	ON/OFF status of BSD/RCTA system is displayed. If this flag is set to «OFF» while the values of «SRVD System fail flag» and «SRVD System HALT flag» are «Normal», the BSD/RCTA system is set to OFF by the BSD/RCTA OFF switch.	• OFF • ON	—
RH-Side Target detection flag	Detection status of the control target vehicle on the rear right side is displayed. Detection is possible if the target vehicle is moving when the own vehicle drives forward at 12 km/h (8 MPH) or more or backward at 0 km/h (0 MPH) or more.	• Un-detect • Detect	—
RH-Side BSD caution 1st flag	ON is displayed when the 1st stage BSD warning on the right side is activated (outer mirror assembly illuminates).	• OFF • ON	—
RH-Side LCA caution 1st flag	ON is displayed when the 1st stage LCA warning on the right side is activated (outer mirror assembly illuminates).	• OFF • ON	—
RH-Side RCTA caution flag	ON is displayed when the RCTA warning on the right side is activated (when the outer mirror assembly illuminates and buzzer sounds).	• OFF • ON	—
RH-Side Radar Voltage value	Power supply voltage of the radar sensor RH is displayed.	0 — 25.5 V	—
RH-Side Temperature value	Ambient temperature of the radar sensor RH is displayed.	–128 — 127°C	—
Trip Count	Time stamp information <Ref. to LAN(diag)-6, TIME STAMP, CAUTION, General Description.>	—	—
Count		—	—
Time Count		—	—

12.System Operation Check Mode

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Subaru Rear Vehicle Detection(RH)» or «Subaru Rear Vehicle Detection(LH)» and then select «Enter».
5) On «Select Function» display, select «Active Test».

NOTE:
For detailed operation procedures, refer to “Application help”.

B: LIST

Data	Note
Door mirror indicator active test	Outer mirror assembly indicator is illuminated.

13.List of Diagnostic Trouble Code (DTC)

A: LIST

DTC	Item	Reference
B2300	Rear Radar Circuit Low	<Ref. to RVD(diag)-22, DTC B2300 REAR RADAR CIRCUIT LOW, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2301	Rear Radar Circuit High	<Ref. to RVD(diag)-25, DTC B2301 REAR RADAR CIRCUIT HIGH, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2304	Rear Radar On-Off Switch Stuck	<Ref. to RVD(diag)-28, DTC B2304 REAR RADAR ON-OFF SWITCH STUCK, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> NOTE: Only radar sensor LH (master) is detected.
B2311	Rear Radar Detect TCM	<Ref. to RVD(diag)-31, DTC B2311 REAR RADAR DETECT TCM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2313	Rear Radar Detect VDC	<Ref. to RVD(diag)-32, DTC B2313 REAR RADAR DETECT VDC, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2327	Rear Radar Internal Failure (Internal Electric Circuit)	<Ref. to RVD(diag)-33, DTC B2327 REAR RADAR INTERNAL FAILURE (INTERNAL ELECTRIC CIRCUIT), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2329	Rear Radar Axis Alignment Incomplete	<Ref. to RVD(diag)-34, DTC B2329 REAR RADAR AXIS ALIGNMENT INCOMPLETE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2350	Rear Radar Communication Error Between Master And Slave	<Ref. to RVD(diag)-35, DTC B2350 REAR RADAR COMMUNICATION ERROR BETWEEN MASTER AND SLAVE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0073	Control Module Communication Bus Off	<Ref. to RVD(diag)-37, DTC U0073 CONTROL MODULE COMMUNICATION BUS OFF, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0074	Control Module Communication Bus "BODY-CAN" Off	<Ref. to RVD(diag)-37, DTC U0074 CONTROL MODULE COMMUNICATION BUS "BODY-CAN" OFF, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0100	Lost Communication With ECM/PCM “A”	<Ref. to RVD(diag)-37, DTC U0100 LOST COMMUNICATION WITH ECM/PCM “A”, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0101	Lost Communication With TCM	<Ref. to RVD(diag)-37, DTC U0101 LOST COMMUNICATION WITH TCM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0122	Lost Communication With Vehicle Dynamics Control Module	<Ref. to RVD(diag)-37, DTC U0122 LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0140	Lost Communication With Body Control Module	<Ref. to RVD(diag)-37, DTC U0140 LOST COMMUNICATION WITH BODY CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0155	Lost Communication With Instrument Panel Cluster (IPC) Control Module	<Ref. to RVD(diag)-37, DTC U0155 LOST COMMUNICATION WITH INSTRUMENT PANEL CLUSTER (IPC) CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0401	Invalid Data Received From ECM/PCM “A”	<Ref. to RVD(diag)-37, DTC U0401 INVALID DATA RECEIVED FROM ECM/PCM “A”, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0402	Invalid Data Received From TCM	<Ref. to RVD(diag)-37, DTC U0402 INVALID DATA RECEIVED FROM TCM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0416	Invalid Data Received From Vehicle Dynamics Control Module	<Ref. to RVD(diag)-37, DTC U0416 INVALID DATA RECEIVED FROM VEHICLE DYNAMICS CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0422	Invalid Data Received From Body Control Module	<Ref. to RVD(diag)-38, DTC U0422 INVALID DATA RECEIVED FROM BODY CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0423	Invalid Data Received From Instrument Panel Cluster Control Module	<Ref. to RVD(diag)-38, DTC U0423 INVALID DATA RECEIVED FROM INSTRUMENT PANEL CLUSTER CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

14.List of Cancel Code

A: LIST

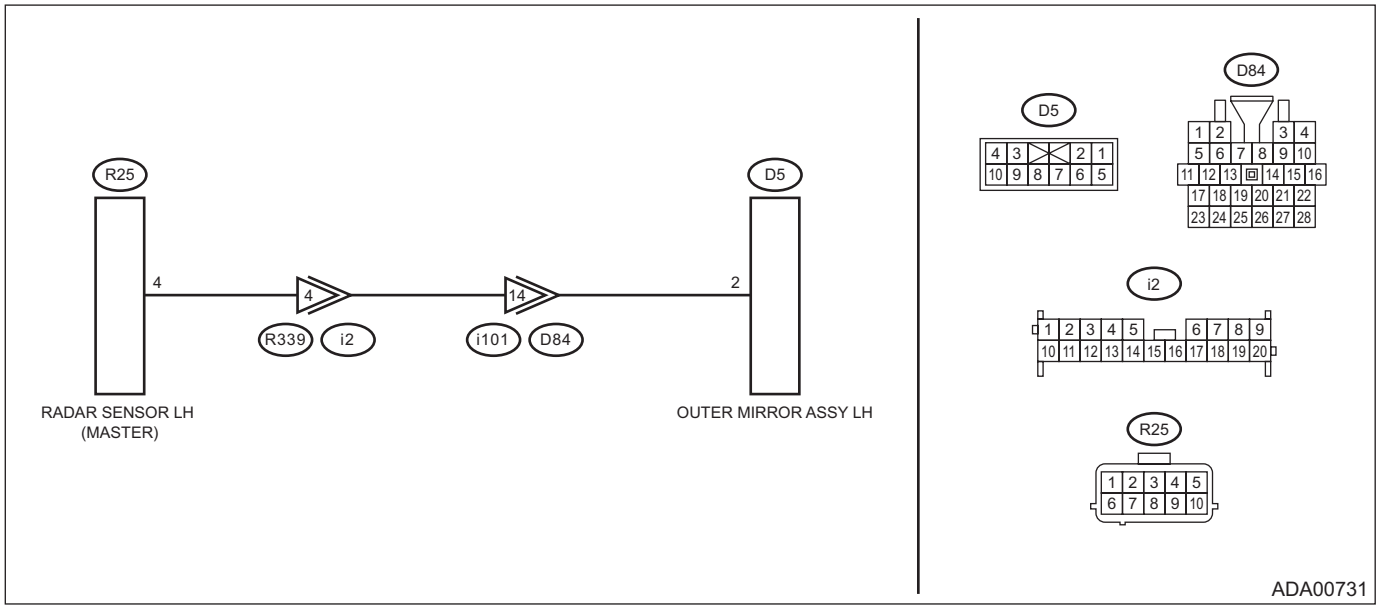
Code	Item	Contents of diagnosis
B2320	Rear Radar Low Voltage (Less Than 9V)	Temporarily stops because the voltage supplied to radar drops to or below 9 V. Returns to normal when the voltage becomes normal.
B2321	Rear Radar High Voltage (More Than 16V)	Temporarily stops because the voltage supplied to radar rises to or above 16 V. Returns to normal when the voltage becomes normal.
B2328	Rear Radar Internal Failure (Radar Misalignment)	Deviation of the radar axis prevents normal detection. Returns to normal when the radar axis becomes normal. When B2328 is frequently detected, perform “Diagnostic Procedure with Cancel Code”. <Ref. to RVD(diag)-39, DTC B2328 REAR RADAR INTERNAL FAILURE (RADAR MISALIGNMENT), Diagnostic Procedure with Cancel Code.>
B2340	Radar ASSY B&S Out Of Operation Temperature Range	Temporarily stops because the temperature is outside the operative range (–40°C (–40°F) — 85°C (185°F)). Returns to normal when the ambient temperature falls within the operative range.
B2341	Radar ASSY B&S Degradation Of Detecting Performance	Temporarily stops because some obstacles blocked radar waves of the back and side radar. Returns to normal when the transmission and reception of radar signals becomes normal.

15.Diagnostic Procedure with Diagnostic Trouble Code (DTC)

A: DTC B2300 REAR RADAR CIRCUIT LOW

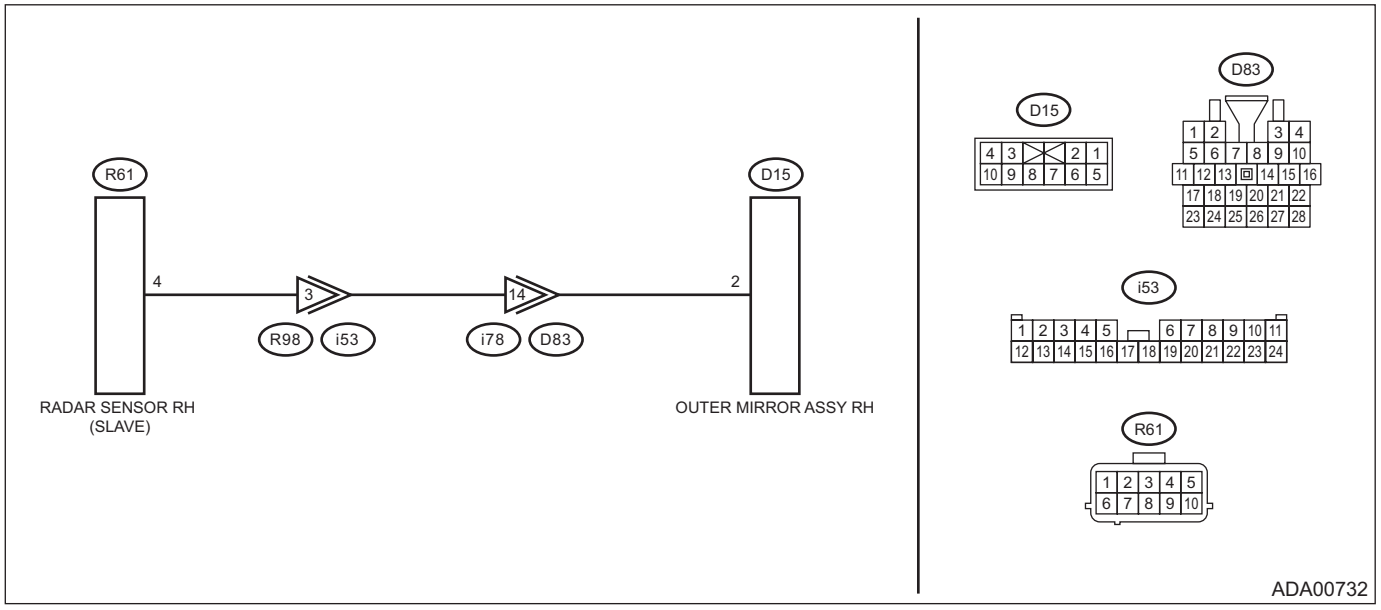
DTC DETECTING CONDITION:

- Short circuit to ground in the harness between radar sensor and outer mirror assembly
- Ground short circuit of the harness in outer mirror assembly module (Malfunction of the outer mirror assembly)
- Defective radar sensor



TROUBLE SYMPTOM:

- All functions of BSD/RCTA stop.
- Fail icon is displayed in the combination meter LCD display.
- Failure-related notification is displayed for approx. two seconds on LCD display in the combination meter.



WIRING DIAGRAM:

SRVD system <Ref. to WI-110, WIRING DIAGRAM, Blind Spot Detection/Rear Cross Traffic Alert.>

- Radar sensor LH

- Radar sensor RH

NOTE:
Check and replace the side that displayed the DTC.

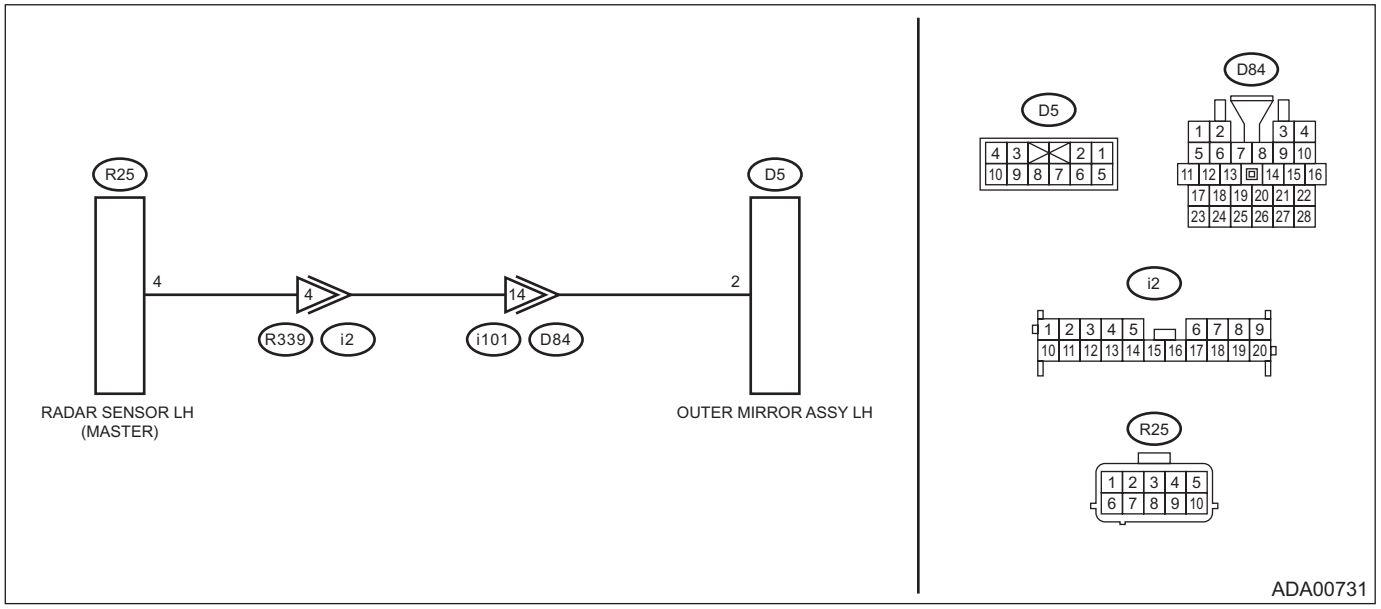
	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC. <Ref. to RVD(diag)-12, OPERATION, Read Diagnostic Trouble Code (DTC).>	Is DTC B2327 displayed? (Current malfunction)	Perform the diagnosis of DTC B2327. <Ref. to RVD(diag)-33, DTC B2327 REAR RADAR INTERNAL FAILURE (INTERNAL ELECTRIC CIRCUIT), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>	Go to step **2**.
2	**CHECK DTC.** Read the DTC. <Ref. to RVD(diag)-12, OPERATION, Read Diagnostic Trouble Code (DTC).>	Is DTC B2300 displayed? (Current malfunction)	Go to step **3**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
3	**CHECK OPERATION CHECK MODE.** Perform the system operation check mode «Door mirror indicator active test» from «Subaru Rear Vehicle Detection(RH)» or «Subaru Rear Vehicle Detection(LH)». <Ref. to RVD(diag)-19, System Operation Check Mode.>	Does the indicator illuminate?	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.	Go to step **4**.
4	**CHECK HARNESS (GROUND SHORT CIRCUIT).** 1) Disconnect the radar sensor connector. 2) Disconnect the outer mirror assembly connector. 3) Using a tester, measure the resistance between radar sensor connector (harness side) and the chassis ground. ***Connector & terminal*** ***Radar sensor LH*** ***(R25) No. 4 — Chassis ground:*** ***Radar sensor RH*** ***(R61) No. 4 — Chassis ground:***	Is the resistance 1 MΩ or more?	Go to step **5**.	Repair the short to ground in harness between radar sensor connector and outer mirror assembly connector.

	Step	Check	Yes	No
5	**CHECK CONNECTOR.** Check the radar sensor connector and the outer mirror assembly connector. (Insecure connection, poor contact, etc.)	Is the check result OK?	Go to step **6**.	Repair the connector.
6	**CHECK OUTER MIRROR ASSEMBLY.** Perform unit-check for the outer mirror assembly. <Ref. to GW-27, Outer Mirror Assembly.>	Is the check result OK?	Go to step **7**.	Replace the outer mirror assembly.
7	**CHECK BSD/RCTA.** 1) Restore the vehicle to its original state. 2) Perform the Inspection Mode. <Ref. to RVD(diag)-15, Inspection Mode.>	Is DTC B2300 displayed? (Current malfunction)	Replace the radar sensor. <Ref. to RVD-6, Radar Sensor.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

B: DTC B2301 REAR RADAR CIRCUIT HIGH

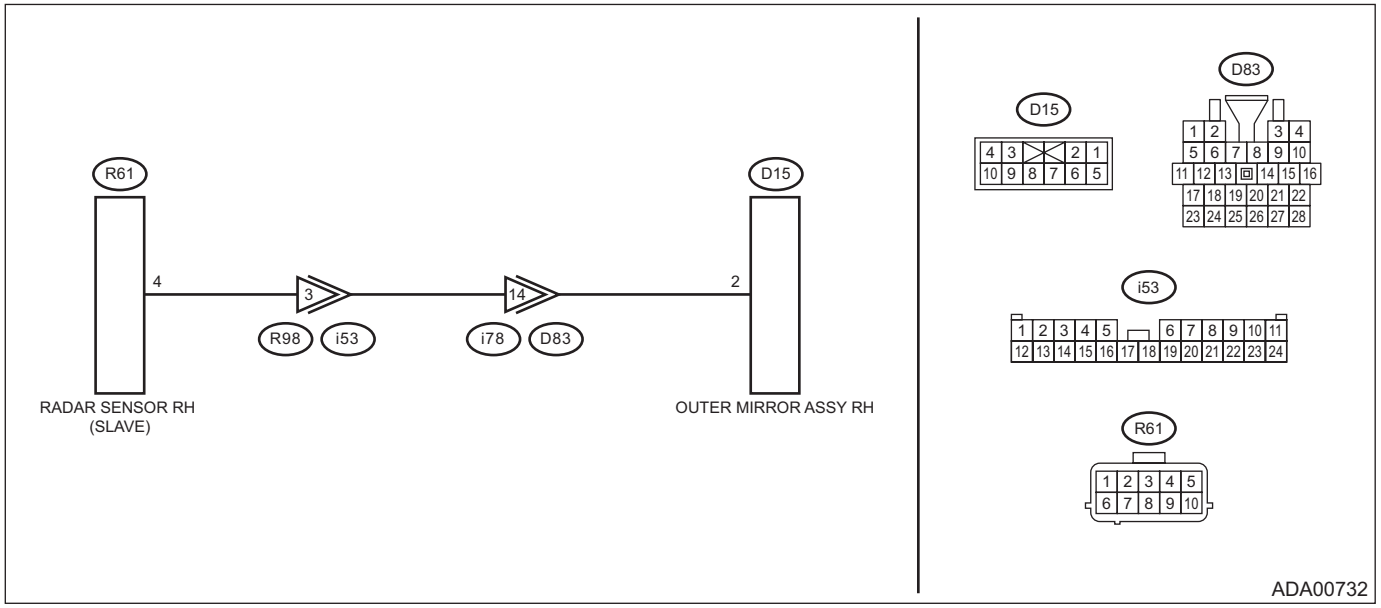
DTC DETECTING CONDITION:

- Open circuit or short circuit to power supply in harness between radar sensor and outer mirror assembly.
- Open circuit or short circuit to power supply of harness in the outer mirror assembly module. (Malfunction of the outer mirror assembly)
- Open circuit or short circuit to power supply of harness between outer mirror assembly and ground.
- Defective radar sensor



TROUBLE SYMPTOM:

- All functions of BSD/RCTA stop.
- Fail icon is displayed in the combination meter LCD display.
- Failure-related notification is displayed for approx. two seconds on LCD display in the combination meter.



WIRING DIAGRAM:

SRVD system <Ref. to WI-110, WIRING DIAGRAM, Blind Spot Detection/Rear Cross Traffic Alert.>

- Radar sensor LH

- Radar sensor RH

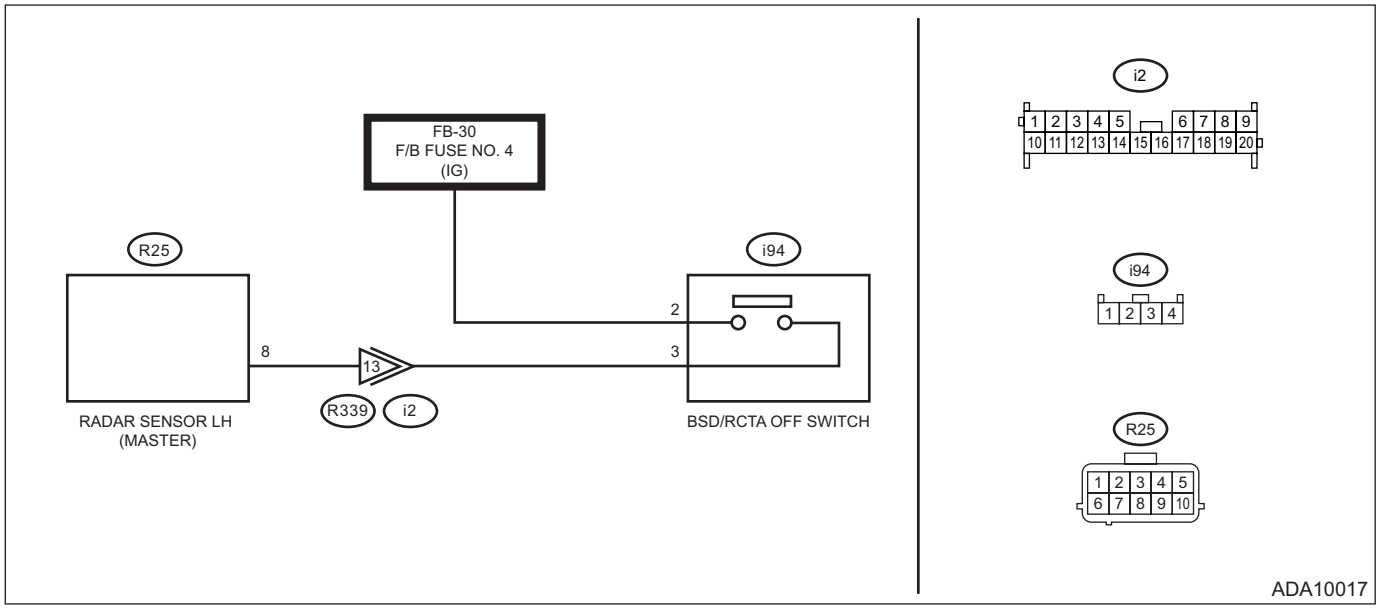
NOTE:
Check and replace the side that displayed the DTC.

	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC. <Ref. to RVD(diag)-12, OPERATION, Read Diagnostic Trouble Code (DTC).>	Is DTC B2327 displayed? (Current malfunction)	Perform the diagnosis of DTC B2327. <Ref. to RVD(diag)-33, DTC B2327 REAR RADAR INTERNAL FAILURE (INTERNAL ELECTRIC CIRCUIT), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>	Go to step **2**.
2	**CHECK DTC.** Read the DTC. <Ref. to RVD(diag)-12, OPERATION, Read Diagnostic Trouble Code (DTC).>	Is DTC B2301 displayed? (Current malfunction)	Go to step **3**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
3	**CHECK OPERATION CHECK MODE.** Perform the system operation check mode «Door mirror indicator active test» from «Subaru Rear Vehicle Detection(RH)» or «Subaru Rear Vehicle Detection(LH)». <Ref. to RVD(diag)-19, System Operation Check Mode.>	Does the indicator illuminate?	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.	Go to step **4**.
4	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the radar sensor connector. 2) Disconnect the outer mirror assembly connector. 3) Using a tester, measure the resistance between radar sensor connector (harness side) and outer mirror assembly connector (harness side). ***Connector & terminal*** ***Radar sensor LH*** ***(R25) No. 4 — (D5) No. 2:*** ***Radar sensor RH*** ***(R61) No. 4 — (D15) No. 2:***	Is the resistance less than 1 Ω?	Go to step **5**.	Repair the open circuit of harness between radar sensor connector and outer mirror assembly connector.

	Step	Check	Yes	No
5	**CHECK HARNESS (SHORT CIRCUIT TO POWER SUPPLY).** 1) Turn the ignition switch to ON. 2) Using a tester, measure the voltage between radar sensor connector (harness side) and the chassis ground. ***Connector & terminal*** ***Radar sensor LH*** ***(R25) No. 4 (+) — Chassis ground (–):*** ***Radar sensor RH*** ***(R61) No. 4 (+) — Chassis ground (–):***	Is the voltage less than 1 V?	Go to step **6**.	Repair the short circuit to power supply in harness between radar sensor connector and outer mirror assembly connector.
6	**CHECK CONNECTOR.** Check the radar sensor connector and the outer mirror assembly connector. (Insecure connection, poor contact, etc.)	Is the check result OK?	Go to step **7**.	Repair the connector.
7	**CHECK OUTER MIRROR ASSEMBLY.** Perform unit-check for the outer mirror assembly. <Ref. to GW-27, Outer Mirror Assembly.>	Is the check result OK?	Go to step **8**.	Replace the outer mirror assembly.
8	**CHECK BSD/RCTA.** 1) Restore the vehicle to its original state. 2) Perform the Inspection Mode. <Ref. to RVD(diag)-15, Inspection Mode.>	Is DTC B2301 displayed? (Current malfunction)	Replace the radar sensor. <Ref. to RVD-6, Radar Sensor.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

C: DTC B2304 REAR RADAR ON-OFF SWITCH STUCK

DTC DETECTING CONDITION:



- BSD/RCTA OFF switch is stuck to ON. (Switch malfunction)
- Switch was left pressed for a prolonged time.
- Defective radar sensor

TROUBLE SYMPTOM:

- All functions of BSD/RCTA stop.
- Fail icon is displayed in the combination meter LCD display.
- Failure-related notification is displayed for approx. two seconds on LCD display in the combination meter.

WIRING DIAGRAM:

SRVD system <Ref. to WI-110, WIRING DIAGRAM, Blind Spot Detection/Rear Cross Traffic Alert.>

Step		Check	Yes	No
1	**CHECK METER DISPLAY.** 1) Turn the ignition switch to ON. 2) Check the display of OFF indicator in the combination meter LCD display.	Does the display change according to operation of BSD/RCTA OFF switch?	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: • Temporary poor contact of connector, temporary open or short circuit of harness may be the cause. • User may have kept pressing the switch for 30 seconds or more.	Go to step **2**.
2	**CHECK CURRENT DATA.** Check the current data «SRVD System ON-OFF flag» of «Subaru Rear Vehicle Detection(RH)» or «Subaru Rear Vehicle Detection(LH)». <Ref. to RVD(diag)-17, Read Current Data.>	Does the display change according to operation of BSD/RCTA OFF switch?	Check the combination meter. <Ref. to IDI(diag)-2, Basic Diagnostic Procedure.>	Go to step **3**.

	Step	Check	Yes	No
3	**INSPECTION OF SWITCH UNIT.** Perform unit inspection of the BSD/RCTA OFF switch. <Ref. to RVD-12, Switches and Harness.>	Is the check result OK?	Go to step **4**.	Replace the BSD/RCTA OFF switch.
4	**CHECK BATTERY.** Check the battery. <Ref. to SC(w/o STI)-50, Battery.> <Ref. to SC(STI)-24, Battery.>	Is the check result OK?	Go to step **5**.	Charge or replace the battery.
5	**CHECK FUSE.** Check the fuse of BSD/RCTA OFF switch. <Ref. to RVD-4, Relay and Fuse.>	Is the check result OK?	Go to step **6**.	Replace the fuse. If the replaced fuse blows out easily, repair the ground short circuit in harness between the fuse and the BSD/RCTA OFF switch.
6	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the BSD/RCTA OFF switch connector. 2) Turn the ignition switch to ON. 3) Using a tester, measure the voltage between BSD/RCTA OFF switch connector and chassis ground. ***Connector & terminal*** ***(i94) No. 2 (+) — Chassis ground (–):***	Is the voltage 10 V or more?	Go to step **7**.	Repair the open circuit of harness between the fuse and the BSD/RCTA OFF switch.
7	**CHECK HARNESS (OPEN CIRCUIT).** 1) Turn the ignition switch to OFF. 2) Disconnect the radar sensor LH connector. 3) Using a tester, measure the resistance between BSD/RCTA OFF switch connector and radar sensor LH connector (harness side). ***Connector & terminal*** ***(i94) No. 3 — (R25) No. 8:***	Is the resistance less than 1 Ω?	Go to step **8**.	Repair the open circuit of harness between BSD/RCTA OFF switch and radar sensor LH.
8	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the BSD/RCTA OFF switch connector (harness side) and the chassis ground. ***Connector & terminal*** ***(i94) No. 2 — Chassis ground:***	Is the resistance 1 MΩ or more?	Go to step **9**.	Repair the short circuit to ground in harness between BSD/RCTA OFF switch and radar sensor LH.
9	**CHECK HARNESS (SHORT CIRCUIT TO POWER SUPPLY).** 1) Turn the ignition switch to ON. 2) Using a tester, measure the voltage between the BSD/RCTA OFF switch connector (harness side) and the chassis ground. ***Connector & terminal*** ***(i94) No. 3 (+) — Chassis ground (–):***	Is the voltage less than 1 V?	Go to step **10**.	Repair the short circuit to power supply in harness between BSD/RCTA OFF switch and radar sensor LH.
10	**CHECK CONNECTOR.** Check the radar sensor LH connector. (Insecure connection, poor contact, etc.)	Is the check result OK?	Go to step **11**.	Repair the connector.

Step		Check	Yes	No
11	**CHECK BSD/RCTA.** 1) Restore the vehicle to its original state. 2) Perform the Inspection Mode. <Ref. to RVD(diag)-15, Inspection Mode.>	Is DTC B2304 displayed? (Current malfunction)	Replace the radar sensor LH. <Ref. to RVD-6, Radar Sensor.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

D: DTC B2311 REAR RADAR DETECT TCM

DTC DETECTING CONDITION:
Automatic transmission fails.
TROUBLE SYMPTOM:

- All functions of BSD/RCTA stop.
- Fail icon is displayed in the combination meter LCD display.
- Failure-related notification is displayed for approx. two seconds on LCD display in the combination meter.
- AT OIL TEMP light blinks in the combination meter.

NOTE:
Check and replace the side that displayed the DTC.

	Step	Check	Yes	No
1	**CHECK TRANSMISSION.** Check the transmission. <Ref. to CVT(diag)-2, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **2**.	Perform the inspection according to the diagnosis of the transmission.
2	**CHECK BSD/RCTA.** 1) Restore the vehicle to its original state. 2) Perform the Inspection Mode. <Ref. to RVD(diag)-15, Inspection Mode.>	Is DTC B2311 displayed? (Current malfunction)	Replace the radar sensor. <Ref. to RVD-6, Radar Sensor.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

E: DTC B2313 REAR RADAR DETECT VDC

DTC DETECTING CONDITION:
Vehicle dynamics control (VDC) fails.
TROUBLE SYMPTOM:

- All functions of BSD/RCTA stop.
- Fail icon is displayed in the combination meter LCD display.
- Failure-related notification is displayed for approx. two seconds on LCD display in the combination meter.
- VDC warning light illuminates in the combination meter.

NOTE:
Check and replace the side that displayed the DTC.

	Step	Check	Yes	No
1	**CHECK VDC.** Check the VDC. <Ref. to VDC(diag)-2, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **2**.	Perform the inspection according to the VDC diagnosis.
2	**CHECK BSD/RCTA.** 1) Restore the vehicle to its original state. 2) Perform the Inspection Mode. <Ref. to RVD(diag)-15, Inspection Mode.>	Is DTC B2313 displayed? (Current malfunction)	Replace the radar sensor. <Ref. to RVD-6, Radar Sensor.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

F: DTC B2327 REAR RADAR INTERNAL FAILURE (INTERNAL ELECTRIC CIRCUIT)

DTC DETECTING CONDITION:
Defective radar sensor
TROUBLE SYMPTOM:
- All functions of BSD/RCTA stop.
- Fail icon is displayed in the combination meter LCD display.
- Failure-related notification is displayed for approx. two seconds on LCD display in the combination meter.

NOTE:
Check and replace the side that displayed the DTC.

	Step	Check	Yes	No
1	**CHECK BSD/RCTA.** 1) Perform the Clear Memory Mode. <Ref. to RVD(diag)-13, OPERATION, Clear Memory Mode.> 2) Read the DTC again. <Ref. to RVD(diag)-12, OPERATION, Read Diagnostic Trouble Code (DTC).>	Is DTC B2327 displayed? (Current malfunction)	Replace the radar sensor. <Ref. to RVD-6, Radar Sensor.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

G: DTC B2329 REAR RADAR AXIS ALIGNMENT INCOMPLETE

DTC DETECTING CONDITION:

Axis adjustment of the radar sensor has failed.
(Forced termination of the Subaru Select Monitor, improper location of the target reflector, or deviation of the radar sensor due to impact.)

TROUBLE SYMPTOM:

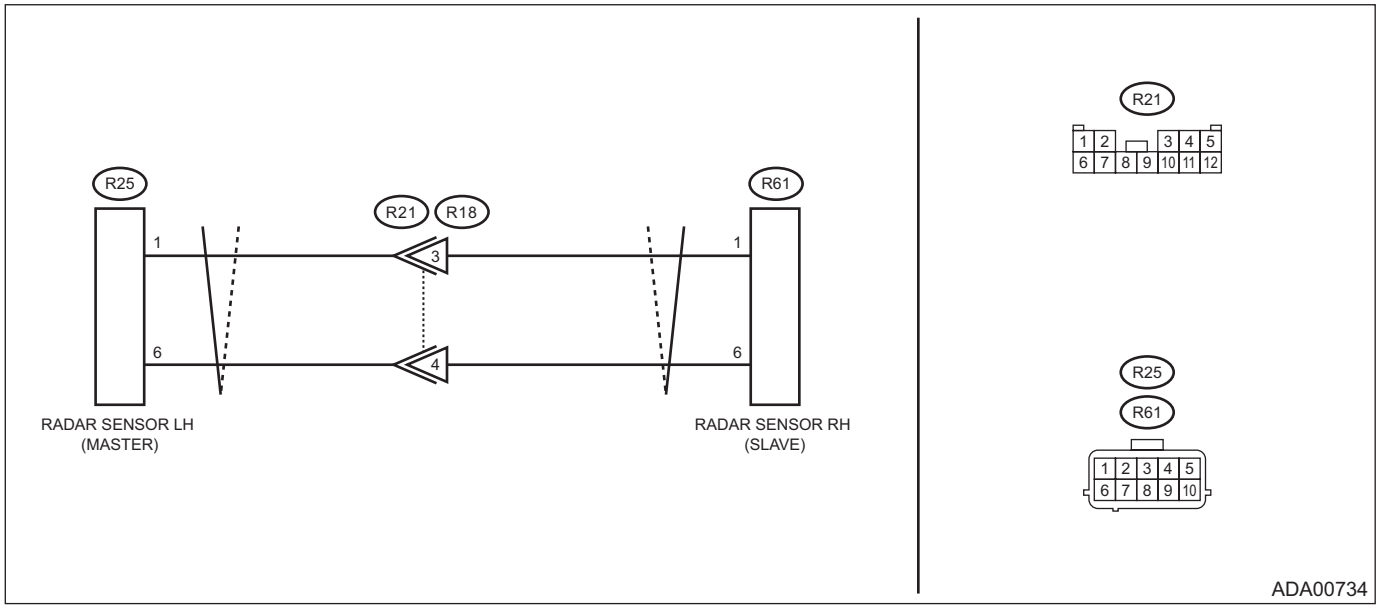
- All functions of BSD/RCTA stop.
- Fail icon is displayed in the combination meter LCD display.
- Failure-related notification is displayed for approx. two seconds on LCD display in the combination meter.

NOTE:
Check and replace the side that displayed the DTC.

	Step	Check	Yes	No
1	**CHECK REAR BUMPER.** Check the rear bumper. (Stickered, trace of repainting, etc.)	Is the check result OK?	Go to step **2**.	Replace or repair the bumper. <Ref. to EI-41, Rear Bumper.> Go to step **2**.
2	**CHECK RADAR SENSOR BRACKET.** 1) Remove the rear bumper. <Ref. to EI-41, Rear Bumper.> 2) Check the mounting bracket of the radar sensor as well as its installation position. (Visible damage, deformation, etc.)	Is the check result OK?	Go to step **3**.	Replace the mounting bracket of the radar sensor, or repair the installation position. Go to step **3**.
3	**ADJUSTMENT OF RADAR SENSOR AXIS.** 1) Install the rear bumper. 2) Perform the adjustment of radar axis. <Ref. to RVD-8, ADJUSTMENT, Radar Sensor.> 3) Perform the Inspection Mode. <Ref. to RVD(diag)-15, Inspection Mode.>	Is DTC B2329 displayed? (Current malfunction)	Replace the radar sensor. <Ref. to RVD-6, Radar Sensor.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

H: DTC B2350 REAR RADAR COMMUNICATION ERROR BETWEEN MASTER AND SLAVE

DTC DETECTING CONDITION:



- Defective harness for CAN communication between radar sensor LH and radar sensor RH
- Defective radar sensor

TROUBLE SYMPTOM:

- All functions of BSD/RCTA stop.
- Fail icon is displayed in the combination meter LCD display.
- Failure-related notification is displayed for approx. two seconds on LCD display in the combination meter.

WIRING DIAGRAM:

SRVD system <Ref. to WI-110, WIRING DIAGRAM, Blind Spot Detection/Rear Cross Traffic Alert.>

Step		Check	Yes	No
1	**CHECK DTC.** Read the DTC. <Ref. to RVD(diag)-12, OPERATION, Read Diagnostic Trouble Code (DTC).>	Is DTC B2350 displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

	Step	Check	Yes	No
2	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the radar sensor connectors LH and RH. 2) Using a tester, measure the resistance between radar sensor RH connector (harness side) and radar sensor LH connector (harness side). ***Connector & terminal*** ***(R25) No. 1 — (R61) No. 1:*** ***(R25) No. 6 — (R61) No. 6:***	Is the resistance less than 1 Ω?	Go to step **3**.	Repair the open circuit of harness between radar sensor RH connector and radar sensor LH connector.
3	**CHECK HARNESS (SHORT BETWEEN LINES, GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between radar sensor LH connectors (harness side) and the resistance between radar sensor LH connector (harness side) and chassis ground. ***Connector & terminal*** ***(R25) No. 1 — (R25) No. 6:*** ***(R25) No. 1 — Chassis ground:*** ***(R25) No. 6 — Chassis ground:***	Is the resistance 1 MΩ or more?	Go to step **4**.	Repair the short circuit of harness between radar sensor RH connector and radar sensor LH connector.
4	**CHECK HARNESS (SHORT CIRCUIT TO POWER SUPPLY).** Using a tester, measure the voltage between radar sensor LH connector (harness side) and chassis ground. ***Connector & terminal*** ***(R25) No. 1 (+) — Chassis ground (–):*** ***(R25) No. 6 (+) — Chassis ground (–):***	Is the voltage less than 1 V?	Go to step **5**.	Repair the short to power supply in harness between radar sensor RH connector and radar sensor LH connector.
5	**CHECK RADAR SENSOR. (INTERNAL IMPEDANCE).** Using a tester, measure the resistance between radar sensor LH connectors (module side) and the resistance between radar sensor RH connectors (module side). ***Connector & terminal*** ***(R25) No. 1 — (R25) No. 6:*** ***(R61) No. 1 — (R61) No. 6:***	Is the resistance approximately 120 Ω?	Go to step **6**.	Replace the radar sensor RH or radar sensor LH. <Ref. to RVD-6, Radar Sensor.>
6	**CHECK BSD/RCTA.** 1) Restore the vehicle to its original state. 2) Perform the Clear Memory Mode. <Ref. to RVD(diag)-12, OPERATION, Read Diagnostic Trouble Code (DTC).> 3) Perform the Inspection Mode. <Ref. to RVD(diag)-15, Inspection Mode.>	Is DTC B2350 displayed? (Current malfunction)	Replace the radar sensor on the side that displayed the DTC. <Ref. to RVD-6, Radar Sensor.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

I: DTC U0073 CONTROL MODULE COMMUNICATION BUS OFF

Detected when CAN line abnormality is detected.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

J: DTC U0074 CONTROL MODULE COMMUNICATION BUS "BODY-CAN" OFF

Detected when CAN line abnormality is detected.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

K: DTC U0100 LOST COMMUNICATION WITH ECM/PCM “A”

Detected when CAN data from ECM does not arrive.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

L: DTC U0101 LOST COMMUNICATION WITH TCM

Detected when CAN data from TCM does not arrive.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

M: DTC U0122 LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE

Detected when CAN data from VDC CM does not arrive.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

N: DTC U0140 LOST COMMUNICATION WITH BODY CONTROL MODULE

Detected when CAN data from BIU does not arrive.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

O: DTC U0155 LOST COMMUNICATION WITH INSTRUMENT PANEL CLUSTER (IPC) CONTROL MODULE

Detected when CAN data from combination meter does not arrive.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

P: DTC U0401 INVALID DATA RECEIVED FROM ECM/PCM “A”

Detected when CAN data from ECM does not arrive.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

Q: DTC U0402 INVALID DATA RECEIVED FROM TCM

Received error data from TCM.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

R: DTC U0416 INVALID DATA RECEIVED FROM VEHICLE DYNAMICS CONTROL MODULE

Received error data from VDC CM.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

S: DTC U0422 INVALID DATA RECEIVED FROM BODY CONTROL MODULE

Received error data from BIU.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

T: DTC U0423 INVALID DATA RECEIVED FROM INSTRUMENT PANEL CLUSTER CONTROL MODULE

Received error data from combination meter.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

16.Diagnostic Procedure with Cancel Code

A: DTC B2328 REAR RADAR INTERNAL FAILURE (RADAR MISALIGNMENT)

DETECTING CONDITION:

- Excessive impact was given to the installation area of the radar sensor, which resulted in deviation of the radar sensor axis.
- Mounting bracket for the radar sensor is deformed.
- Defective radar sensor

TROUBLE SYMPTOMS:

- All functions of BSD/RCTA are temporarily suspended.
- The icon indicating function suspended will be displayed in the combination meter LCD display.
- Function-suspended confirmation will be displayed for approx. two seconds on LCD display in the combination meter.

NOTE:
If DTC B2328 is detected repeatedly, check or replace the part corresponding to the cancel code.

	Step	Check	Yes	No
1	**CHECK REAR BUMPER.** Check the rear bumper. (Stickered, trace of repainting, etc.)	Is the check result OK?	Go to step **2**.	Replace or repair the bumper. <Ref. to EI-41, Rear Bumper.> Go to step **2**.
2	**CHECK RADAR SENSOR BRACKET.** 1) Remove the rear bumper. <Ref. to EI-41, Rear Bumper.> 2) Check the mounting bracket of the radar sensor as well as its installation position. (Visible damage, deformation, etc.)	Is the check result OK?	Go to step **3**.	Replace the mounting bracket of the radar sensor, or repair the installation position. Go to step **3**.
3	**ADJUSTMENT OF RADAR SENSOR AXIS.** 1) Install the rear bumper. 2) Perform the adjustment of radar axis. <Ref. to RVD-8, ADJUSTMENT, Radar Sensor.> 3) Read the cancel code. <Ref. to RVD(diag)-14, Read Cancel Code.>	Is B2328 displayed?	Replace the radar sensor. <Ref. to RVD-6, Radar Sensor.>	The circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

17.Diagnostics with Phenomenon

A: INSPECTION

Symptoms	Maintenance parts
BSD/RCTA does not operate.	Fuse
	LAN system <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
	Body control system <Ref. to BC(diag)-2, Basic Diagnostic Procedure.>
	Radar sensor LH
	Radar sensor RH
BSD/RCTA cannot be turned OFF.	BSD/RCTA OFF switch
	LAN system <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>
	Body control system <Ref. to BC(diag)-2, Basic Diagnostic Procedure.>
	Radar sensor LH
Error message appears in the combination meter.	CHECK CANCEL CODE. <Ref. to RVD(diag)-14, Read Cancel Code.>
	Radar sensor LH
	Radar sensor RH
	Combination meter <Ref. to IDI(diag)-2, Basic Diagnostic Procedure.>

	Radar sensor LH
Outer mirror assembly (RH) indicator does not illuminate.	Outer mirror assembly <Ref. to GW-27, Outer Mirror Assembly.>
	Radar sensor RH
Outer mirror assembly (LH) indicator remains on.	Radar sensor LH
Outer mirror assembly (RH) indicator remains on.	Radar sensor RH
Outer mirror assembly (LH) indicator does not blink.	Radar sensor LH
Outer mirror assembly (RH) indicator does not blink.	Radar sensor RH
Outer mirror assembly (LH) indicator keeps blinking.	Radar sensor LH
Outer mirror assembly (RH) indicator keeps blinking.	Radar sensor RH

Reverse Automatic Braking

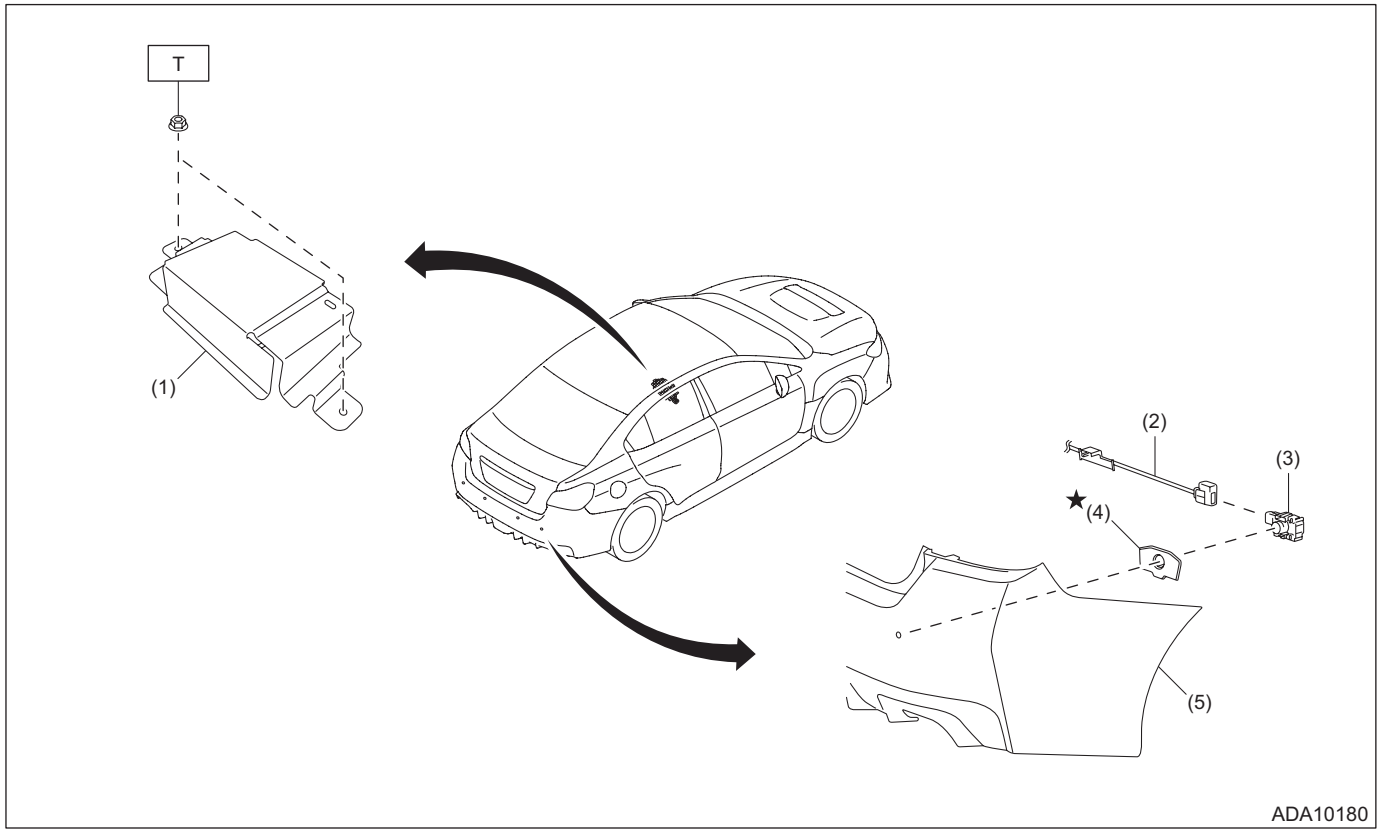
RAB

Page

1. General Description 2
2. Relay and Fuse 4
3. Reverse Automatic Braking 5
4. Reverse Automatic Braking CM 6
5. Sensor and Harness 7
6. Control Unit 12
7. Stereo Camera 13
8. Combination Meter 14
9. Multi-function Display (MFD) 15

1. General Description

A: NOTE



Using the EyeSight brake control, the Reverse Automatic Braking detects obstacles with the Reverse Automatic Braking CM and sonar sensor to operate the system.

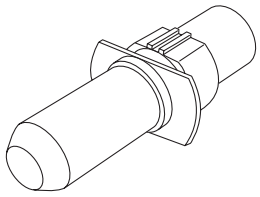
B: LOCATION

Refer to “LOCATION” in the “Reverse Automatic Braking (DIAGNOSTICS)” section. <Ref. to RAB(diag)-6, LOCATION, Electrical Component Location.>

C: COMPONENT

1. Reverse Automatic Braking CM AND SONAR SENSOR

(1) Reverse Automatic Braking CM
(2) Cord ASSY - sonar
(3) Sonar sensor
(4) Holder - sonar
(5) Bumper face - rear



Tightening torque: N·m (kgf-m, ft-lb)
T: 7.5 (0.8, 5.5)

D: CAUTION

• Before disconnecting connectors of sensors or units, be sure to disconnect the ground cable from battery. When replacing the electrical parts provided with memory functions that store contents specified by a customer, record the memory contents before disconnecting the battery ground cable.
• For precautions for Reverse Automatic Braking, refer to “CAUTION” in “Reverse Automatic Braking (DIAGNOSTICS)” section. <Ref. to RAB(diag)-4, CAUTION, General Description.>

E: PREPARATION TOOL

1. SPECIAL TOOL

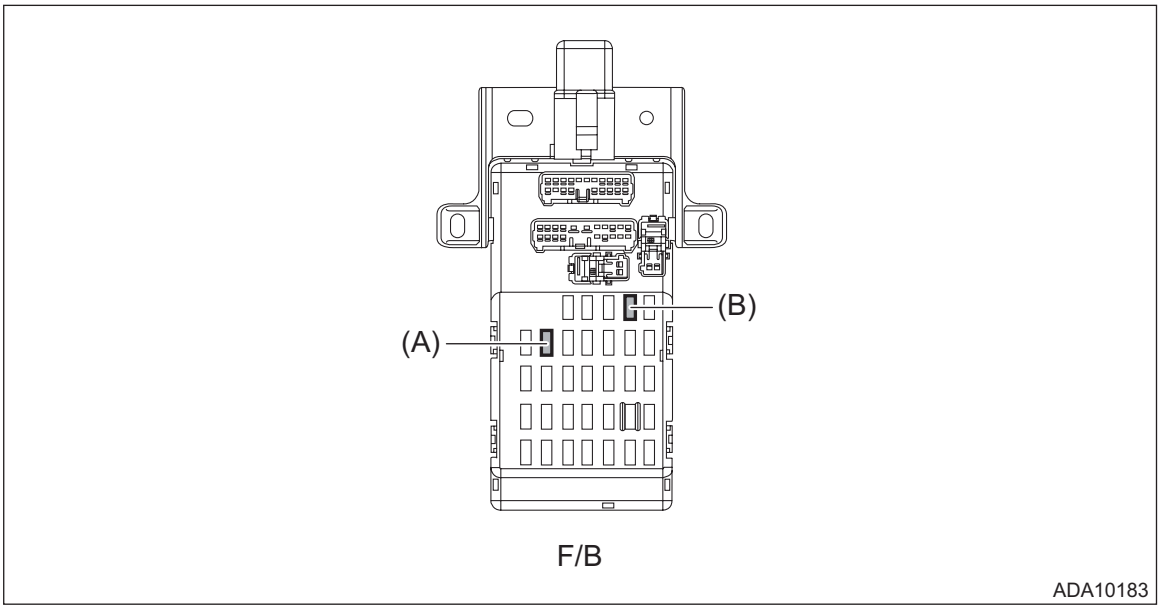


ILLUSTRATION	TOOL NUMBER	DESCRIPTION	REMARKS
 ST87692VA000	87692VA000 (Newly adopted tool)	SONAR TOOL	Used for installing the holder - sonar.

2. GENERAL TOOL

TOOL NAME	REMARKS
Angle gauge	Used for inspecting height and angle of the sonar sensor.
Try square	
Measure	
Leveling line	
Plumb bob	
Packing tape	

2. Relay and Fuse

A: LOCATION

Fuse & Relay Box	Fuse 10 A (RAB CM)	(A)
	Fuse 10 A (RAB CM)	(B)

NOTE:
- Refer to “LOCATION” of the “EyeSight” section because the EyeSight system control is used. <Ref. to ES-5, LOCATION, Relay and Fuse.>
- For other related fuses, refer to the wiring diagram. <Ref. to WI-31, Power Supply Circuit.>

B: INSPECTION

1. CHECK FUSE

1) Remove the fuse and inspect visually.
2) If the fuse is blown out, replace the fuse.

NOTE:
If the fuse is blown again, check the system wiring harness.

3. Reverse Automatic Braking

A: WIRING DIAGRAM

Refer to “Reverse Automatic Braking” in the wiring diagram. <Ref. to WI-329, WIRING DIAGRAM, Reverse Automatic Braking.>

B: INSPECTION

Refer to “Basic Diagnostic Procedure” of “Reverse Automatic Braking (DIAGNOSTICS)” section. <Ref. to RAB(diag)-2, Basic Diagnostic Procedure.>

C: NOTE

For procedure of each component in the Reverse Automatic Braking, refer to the respective section.

- Reverse Automatic Braking CM: <Ref. to RAB-6, Reverse Automatic Braking CM.>
- Sensor and harness: <Ref. to RAB-7, Sensor and Harness.>
- Control module: <Ref. to RAB-12, Control Unit.>

NOTE:
System control of the Reverse Automatic Braking is performed by each module. For procedure, refer to the following sections.

  - Engine control module (ECM): <Ref. to FU(w/o STI)-124, Engine Control Module (ECM).>
  - Transmission control module (TCM): <Ref. to CVT(TR690)-126, Transmission Control Module (TCM).>
  - VDC control module (VDC CM): <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDCCM&H/U).>
  - Body integrated unit: <Ref. to SL-81, Body Integrated Unit.>
  - Parking brake actuator: <Ref. to PB-23, Parking Brake Actuator.>
  - Reverse Automatic Braking CM: <Ref. to RAB-6, Reverse Automatic Braking CM.>
- Stereo camera: <Ref. to ES-8, Stereo Camera.>
- Combination meter: <Ref. to IDI-13, Combination Meter.>
- Multi-function display (MFD): <Ref. to IDI-20, Multi-function Display (MFD).>

4. Reverse Automatic Braking CM

A: REMOVAL

NOTE:
Remove the Reverse Automatic Braking CM after sliding the front seat LH back and forth as necessary.
1) Disconnect the ground cable from battery. <Ref. to NT-6, BATTERY, NOTE, Note.>

NOTE:
For model with battery sensor, disconnect the ground terminal from battery sensor.
2) Remove the Reverse Automatic Braking CM.
   (1) Remove the connector and harness clip.
   (2) Remove the nut and remove the Reverse Automatic Braking CM.

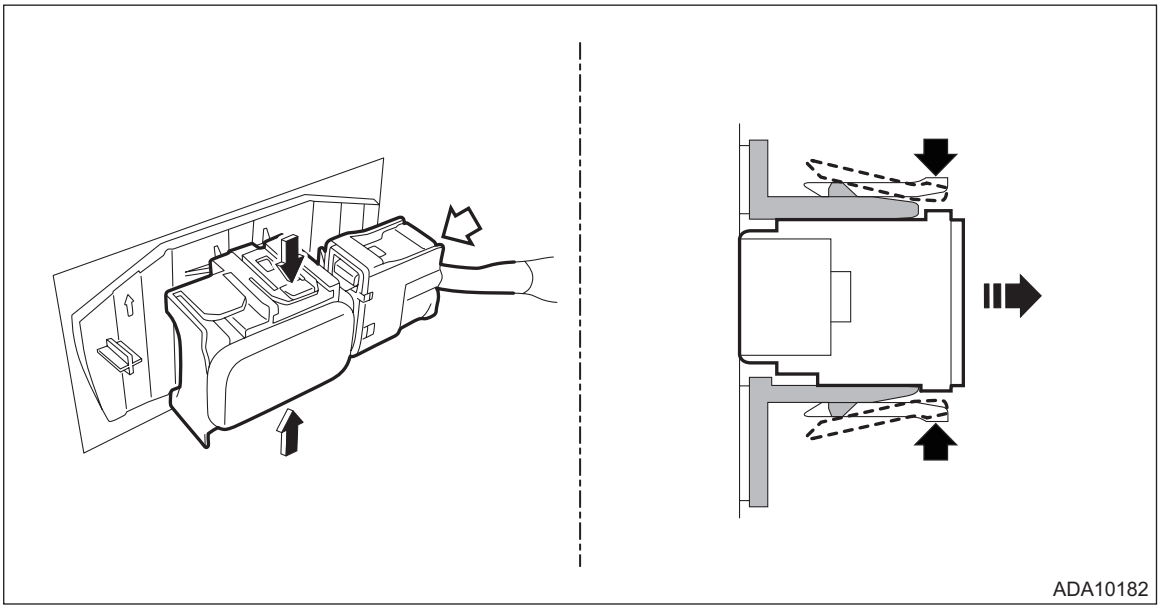
B: INSTALLATION

1) Install the Reverse Automatic Braking CM.

Tightening torque:
7.5 N·m (0.8 kgf-m, 5.5 ft-lb)
2) Connect the battery ground terminal. <Ref. to NT-6, BATTERY, NOTE, Note.>

5. Sensor and Harness

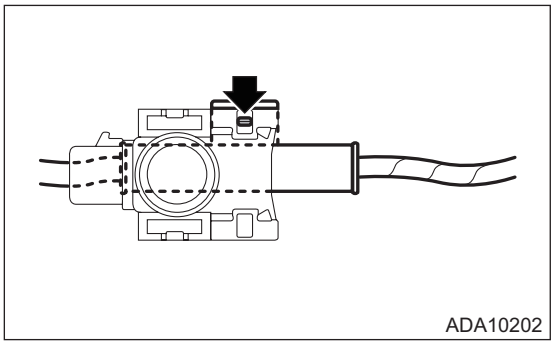
A: REMOVAL



1. SONAR SENSOR

1) Disconnect the ground cable from battery. <Ref. to NT-6, BATTERY, NOTE, Note.>

NOTE:
For model with battery sensor, disconnect the ground terminal from battery sensor.
2) Remove the bumper face - rear. <Ref. to EI-41, REMOVAL, Rear Bumper.>
3) Remove the sonar sensor.



CAUTION:
• When reusing the sensor, make sure to place a mark on the sensor and the bumper face - rear or others, and surely return each sensor to the original position before removed.
• The holder - sonar is fixed to the bumper face - rear with the double-sided tape and therefore cannot be removed.

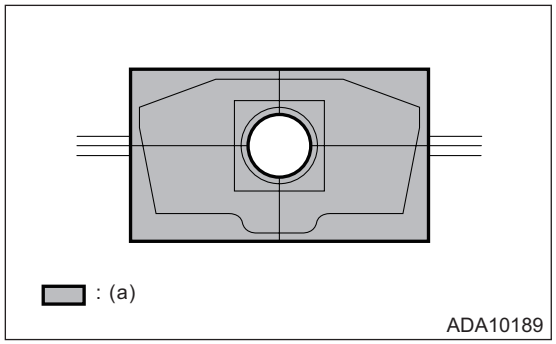
(1) Disconnect the connector.
(2) Release the claws and then remove the sonar sensor.

NOTE:
- The sonar sensors are equipped at four portions on the bumper face - rear.
- The figure indicates the sonar sensor (right corner). Remove the rest of the sensors in the same manner.

(3) Using a flat tip screwdriver wrapped with a protection tape or cloth, release the lock from the front side of the sonar sensor to remove the cord assembly - sonar.

NOTE:
Use a flat tip screwdriver with an appropriate size for the insertion opening.

B: INSTALLATION

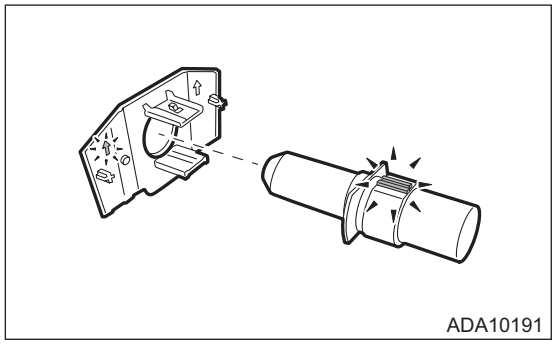


1. SONAR SENSOR

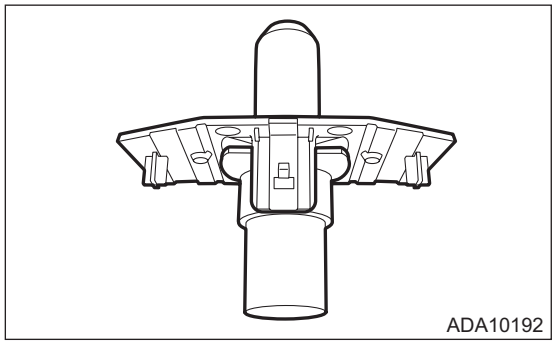
CAUTION:
• When reusing the sensor, make sure to align the mark on the sensor and the bumper face - rear or others, and surely return each sensor to the original position before removed.
• If either the bumper face - rear or the holder - sonar is damaged, replace both to new parts.

1) When installing the holder - sonar, perform work according to the following procedures.
(1) Clean the holder - sonar installation area of the bumper face - rear.
(2) Apply the primer to the primer application range frame (a) using sponge.

CAUTION:
• The primer has high volatility and can damage the coating surface. Therefore, be careful not to apply the primer on the surface of the bumper face - rear.
• Do not reapply the primer over the dried surface.

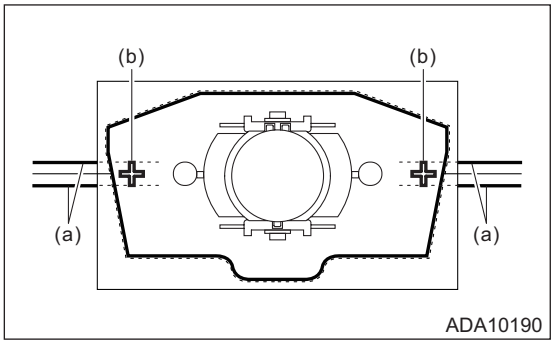


Preparation items:
Primer: 3M K-540NT or equivalent



(3) Install SONAR TOOL (ST) to the holder - sonar.

Preparation tool:
ST: SONAR TOOL (87692VA000)



1. Confirm that the arrows of the holder - sonar are facing up, and then set SONAR TOOL (ST) with the two slit portions facing up.

2. Install the holder - sonar and SONAR TOOL (ST) so that there is no gap in between.

(4) Install the holder - sonar.
1. Check if the primer is dry.
2. Detach the double-sided tape of the holder - sonar.
3. Insert the centering pin ends of SONAR TOOL (ST) into the sensor holes of the bumper face - rear, and install while aligning with the mark-off line (shape of the holder - sonar) within the primer application range frame of the bumper face - rear.

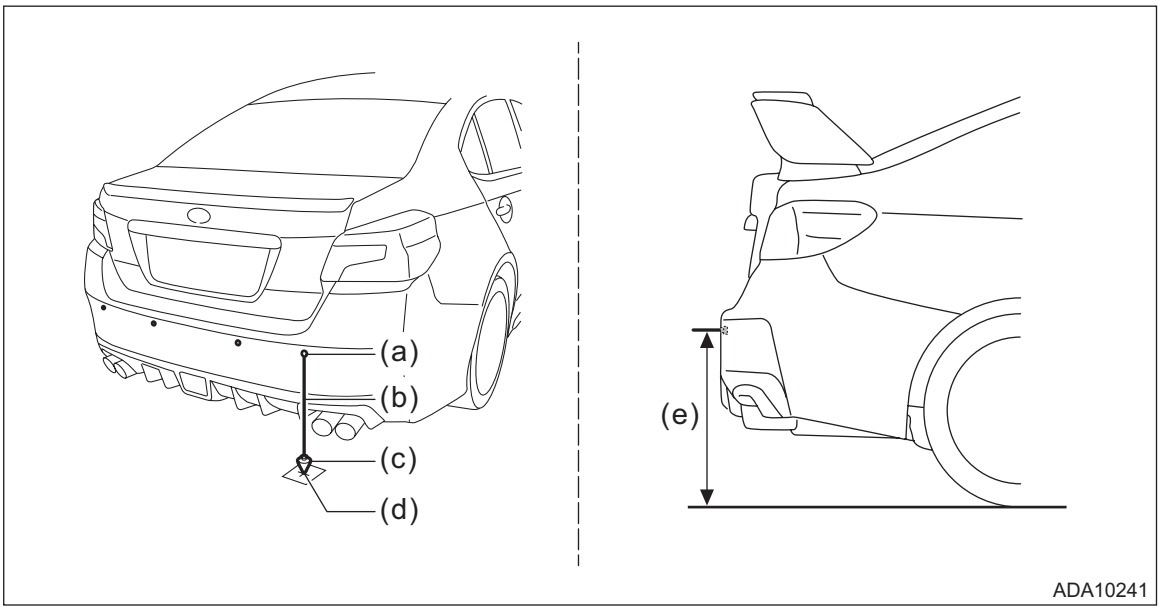
NOTE:
The mark-off (a) and pins (b) of the holder - sonar come to the same position.

4. To prevent play or looseness between the installation surface of the bumper face - rear and the holder - sonar, press down SONAR TOOL (ST) with approximately 49 — 59 N (5 — 6 kgf, 11 — 13 lb) for one second.
(5) Remove SONAR TOOL (ST), and check if the holder - sonar is fixed securely.

2) Install the sonar sensor.
3) Install the bumper face - rear.
4) Connect the battery ground terminal. <Ref. to NT-6, BATTERY, NOTE, Note.>
5) When the bumper face - rear, holder - sonar and sonar sensor are replaced, check the installation height and angle. <Ref. to RAB-10, SONAR SENSOR, INSPECTION, Sensor and Harness.>

C: INSPECTION

1. SONAR SENSOR



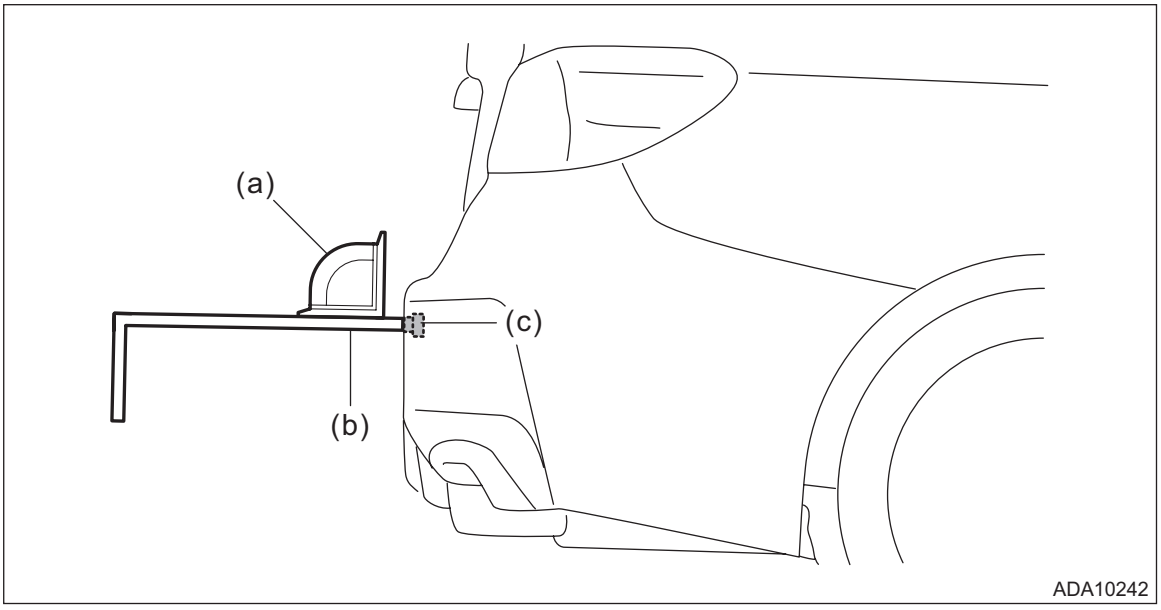
• Height and angle inspection

CAUTION:
Perform the inspection for each sonar sensor at curb weight.

1) Before performing measurement, check the following items.
   (1) The vehicle is parked on a level surface.
   (2) The inflation pressure of tires is correct.
   (3) The vehicle does not have load.
   (4) Check the area around the sensor and rear bumper for any scratches or other type of deformation.
2) Prepare the measure, plumb bob, leveling line, angle gauge and try square.
3) Measure installation height of the sonar sensor.
   (1) Suspend the plumb bob with leveling line from the sensor, and mark the position where the plumb bob touches the ground. (Point A)

NOTE:
Stick the packing tape etc. on the floor, then make a marking on the tape.

   (2) Measure the height from the sensor to the marked Point A.



(a) Sonar sensor
(b) Leveling line
(c) Plumb bob
(d) Point A
(e) Height

   (3) Confirm that sensor installation height is within the acceptable limit.

Specification:
560 — 600 mm (22.05 — 23.62 in)

4) Measure the installation angle of the sonar sensor.
(1) Using an angle gauge and try square, measure the installation angle as shown in the figure.

(a) Angle gauge (b) Try square (c) Sonar sensor

NOTE:
Use the measurement tools while placing them perpendicularly to the sonar sensor.
(2) Confirm that sensor installation angle is within the acceptable limit.

Specification:
2° — 5°

5) If the inspection result is not within the standard value, the rear bumper, holder - sonar or sonar sensor may be improperly installed or deformed. Check the installation status of each part, and perform inspection again.

6. Control Unit

A: NOTE

System control of the Reverse Automatic Braking is performed by each module. For procedure, refer to the following sections.

- Engine control module (ECM): <Ref. to FU(w/o STI)-124, Engine Control Module (ECM).>
- Transmission control module (TCM): <Ref. to CVT(TR690)-126, Transmission Control Module (TCM).>
- VDC control module (VDC CM): <Ref. to VDC-9, VDC Control Module and Hydraulic Control Unit (VDC-CM&H/U).>
- Body integrated unit: <Ref. to SL-81, Body Integrated Unit.>
- Parking brake actuator: <Ref. to PB-23, Parking Brake Actuator.>
- Reverse Automatic Braking CM: <Ref. to RAB-6, Reverse Automatic Braking CM.>

7. Stereo Camera

A: NOTE

For the operation procedures for the stereo camera, refer to “EyeSight” section. <Ref. to ES-8, Stereo Camera.>

8. Combination Meter

A: NOTE

For the operation procedures for combination meter, refer to “INSTRUMENTATION/DRIVER INFO” section. <Ref. to IDI-13, Combination Meter.>

9. Multi-function Display (MFD)

A: NOTE

For the operation procedures for Multi-Function Display (MFD), refer to “INSTRUMENTATION/DRIVER INFO” section. <Ref. to IDI-10, Multi-function Display (MFD) System.>

1. Basic Diagnostic Procedure

A: PROCEDURE

Step		Check	Yes	No
1	**PERFORM CUSTOMER INTERVIEW.** Ask the customer when and how the trouble occurred using the interview check list.	Did you interview the customer?	Go to step **2**.	Perform the interview.
2	**CHECK SUBARU SELECT MONITOR COMMUNICATION.** 1) Turn the ignition switch to OFF. 2) Connect the Subaru Select Monitor to data link connector. 3) Turn the ignition switch to ON and run the Subaru Select Monitor. 4) Select «Reverse Automatic Braking». NOTE: For detailed operation procedures, refer to “Application help”.	Is communication possible?	Go to step **3**.	Check the communication circuit.
3	**CHECK DTC.** Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC displayed?	Record the DTC, time stamp and freeze frame data, and go to next.	Perform diagnosis according to the procedures in the diagnostics with phenomenon.
4	**PERFORM DIAGNOSIS.** 1) Perform the diagnosis for the displayed DTCs. 2) Repair or replace the cause of trouble. 3) Perform the clear memory for «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-13, Clear Memory Mode.> 4) Execute the inspection mode. 5) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC displayed?	Repeat step 4 until DTC is not shown.	Finish the diagnosis.

2. Check List for Interview

A: CHECK

- Inspect the following items regarding the vehicle's state.
- Print out this page for interviewing customers.

<table>
<tr><td colspan="2">Reverse Automatic Braking Check List for Interview</td><td>Received Year Month Date</td><td></td></tr>
<tr><td colspan="2" rowspan="2">Customer's name</td><td>Registration No.</td><td>Initial year of registration
Year Month Date</td></tr>

</table>

3. General Description

A: CAUTION

1. AIRBAG SYSTEM

Airbag system harness is routed near the RAB CM.

CAUTION:
- **Do not use the electrical test equipment on the airbag system harnesses and connector circuits.**
- **Be careful not to damage the airbag system harness.**

B: INSPECTION

Before performing diagnostics, check the following item which might affect the Reverse Automatic Braking problems.

1. BASIC INSPECTION

1) Check the battery.
2) Check the main and other fuses, harnesses and connectors. Also check for proper grounding.

C: PREPARATION TOOL

1. SPECIAL TOOL

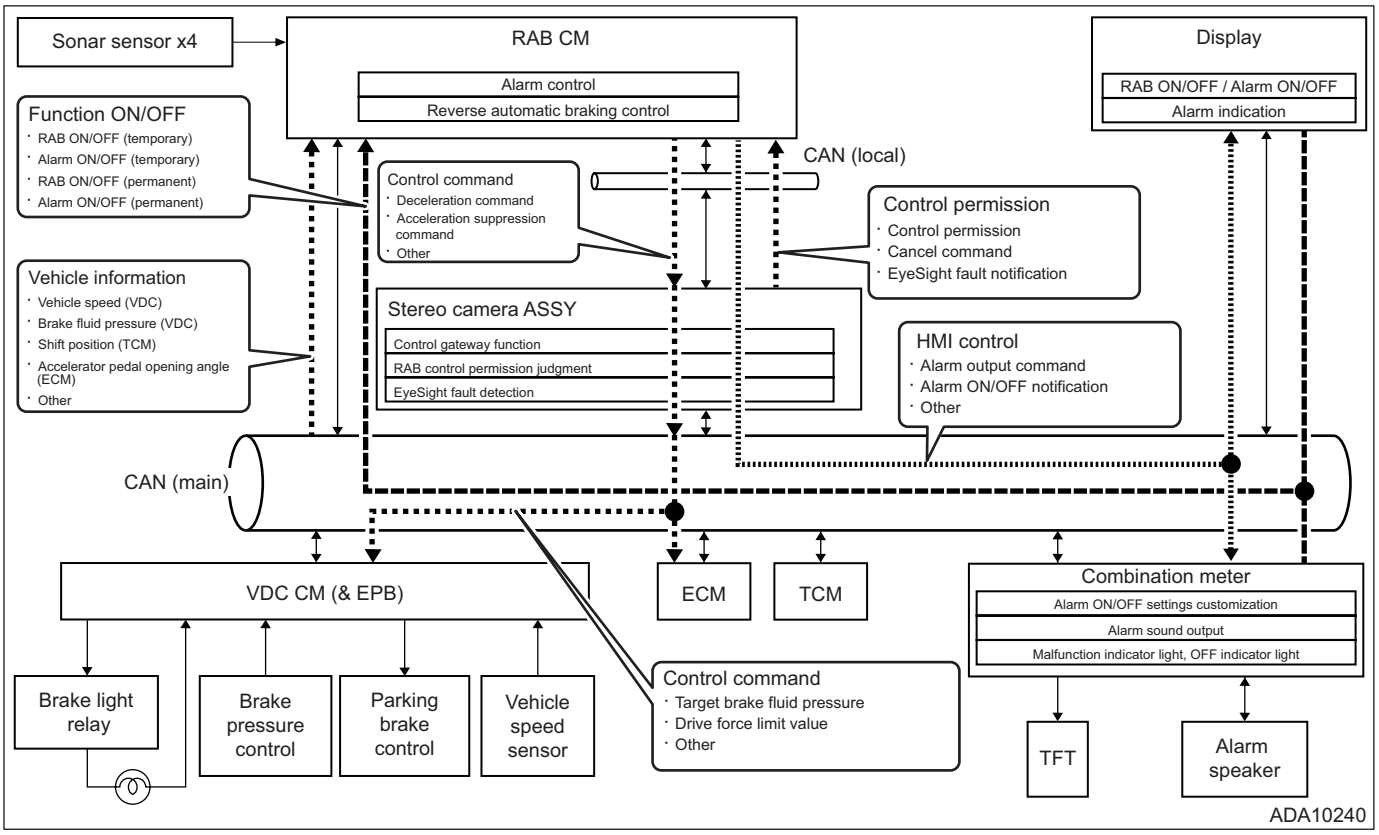

ILLUSTRATION	TOOL NUMBER	DESCRIPTION	REMARKS
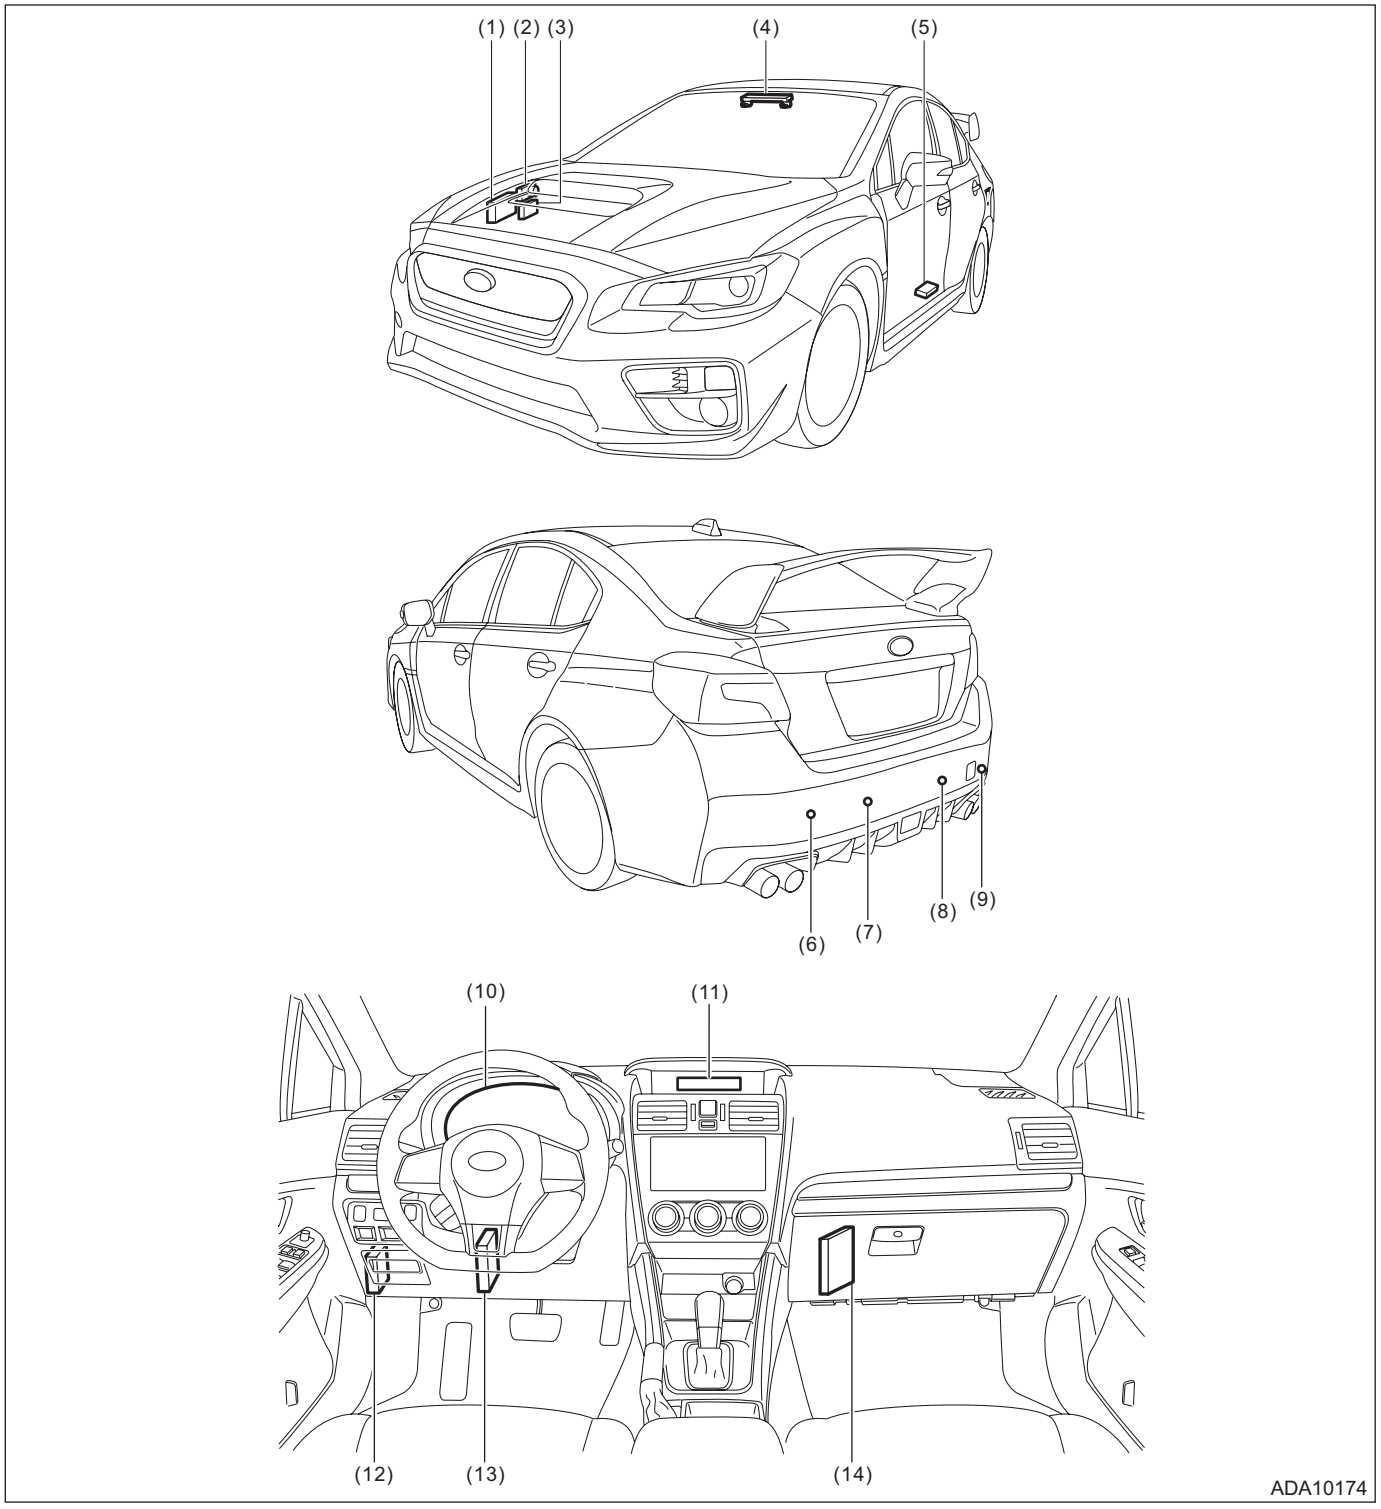
 STSSM4	—	SUBARU SELECT MONITOR 4	Used for setting of each function and trouble-shooting for electrical system. NOTE: For detailed operation procedures of Subaru Select Monitor 4, refer to “Application help”.

2. GENERAL TOOL

TOOL NAME	REMARKS
Circuit tester	Used for measuring resistance, voltage and current.
DST-i	Used together with Subaru Select Monitor 4.

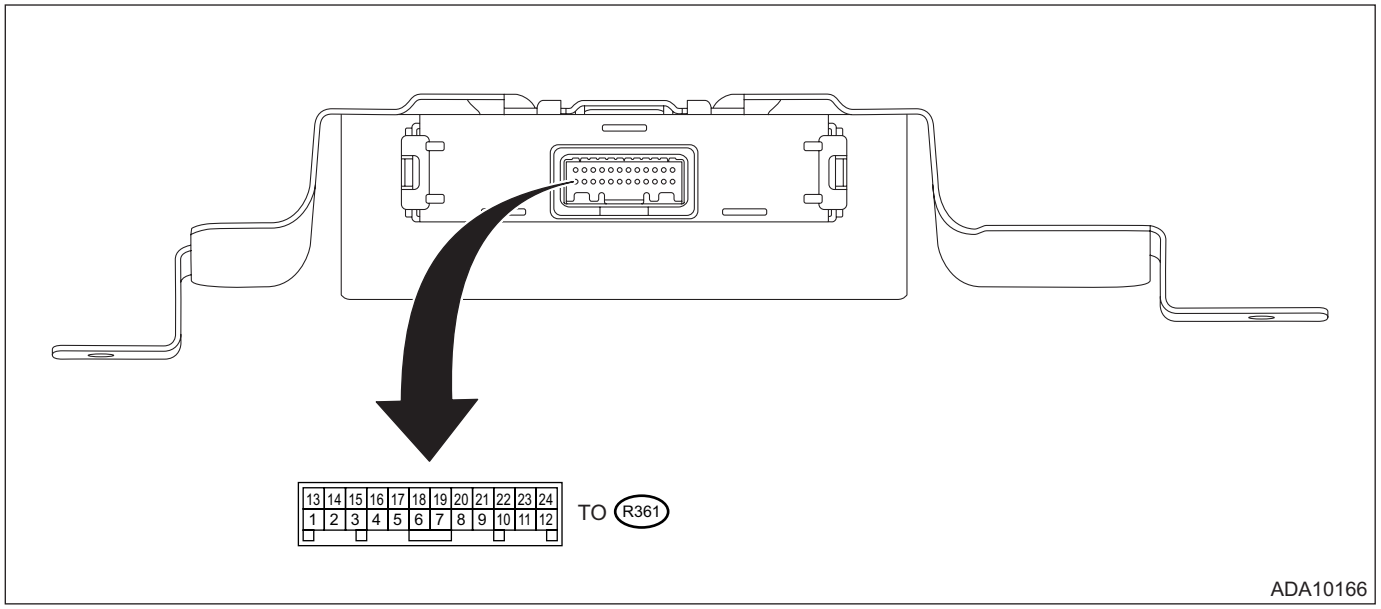


D: SYSTEM BLOCK DIAGRAM

The Reverse Automatic Braking is a system to avoid collision or reduce collision damage by informing with sound and operating the brake automatically, when the vehicle may collide with walls or obstacles on the rear during reversing.

4. Electrical Component Location

A: LOCATION



(1) Engine CM (engine type FA)
(2) VDC CM
(3) Power steering CM
(4) Stereo camera
(5) RAB CM
(6) Sonar sensor (left corner)
(7) Sonar sensor (left inner)
(8) Sonar sensor (right inner)
(9) Sonar sensor (right corner)
(10) Combination meter
(11) MFD
(12) Body integrated unit
(13) Transmission CM
(14) Engine CM

5. Control Module I/O Signal

A: ELECTRICAL SPECIFICATION

1. RAB CM

Terminal No.	Content	Measuring condition	Standard
(R361) No. 1 ←→ Chassis ground	Ignition power supply	Ignition switch ON	Battery voltage
(R361) No. 2 ←→ Chassis ground	Ground	Always	1 Ω or less
(R361) No. 3	Not used	—	—
(R361) No. 4	Main CAN-L	—	—
(R361) No. 5	Local CAN-H (stereo camera communication line)	—	—
(R361) No. 6	Not used	—	—
(R361) No. 7	Not used	—	—
(R361) No. 8	Sonar sensor communication line (left corner -)	—	—
(R361) No. 9	Sonar sensor communication line (right inner -)	—	—
(R361) No. 10	Not used	—	—

(R361) No. 19	Not used	—	—
(R361) No. 20	Not used	—	—
(R361) No. 21	Sonar sensor communication line (left inner -)	—	—
(R361) No. 22	Sonar sensor communication line (right corner -)	—	—
(R361) No. 23	Sonar sensor communication line (left corner +)	—	—
(R361) No. 24	Sonar sensor communication line (right inner +)	—	—

6. Inspection Mode

A: PROCEDURE

It is possible to diagnose the DTC by performing the indicated inspection mode. After correcting the DTC, perform the inspection mode and make sure that the function is resumed correctly and the DTC is recorded.
1) Turn the ignition switch to ON, and wait for 6 seconds or more. (*1)
2) Confirm that the RAB warning light (RAB malfunction indicator light) of MID in the combination meter is off.
3) Read the DTC and check that the DTC is not displayed. (*2)
*1: Even with normal condition, “RAB warning light (RAB OFF indicator light)” illuminates for 6 seconds after turning the ignition switch to ON, and then goes off after 6 seconds.
*2: Perform all DTC diagnosis within 3 seconds after the ignition switch is turned to ON. It is not necessary to shift the gear in the R range to operate the function.

7. Warning Light Illumination Pattern

A: NOTE

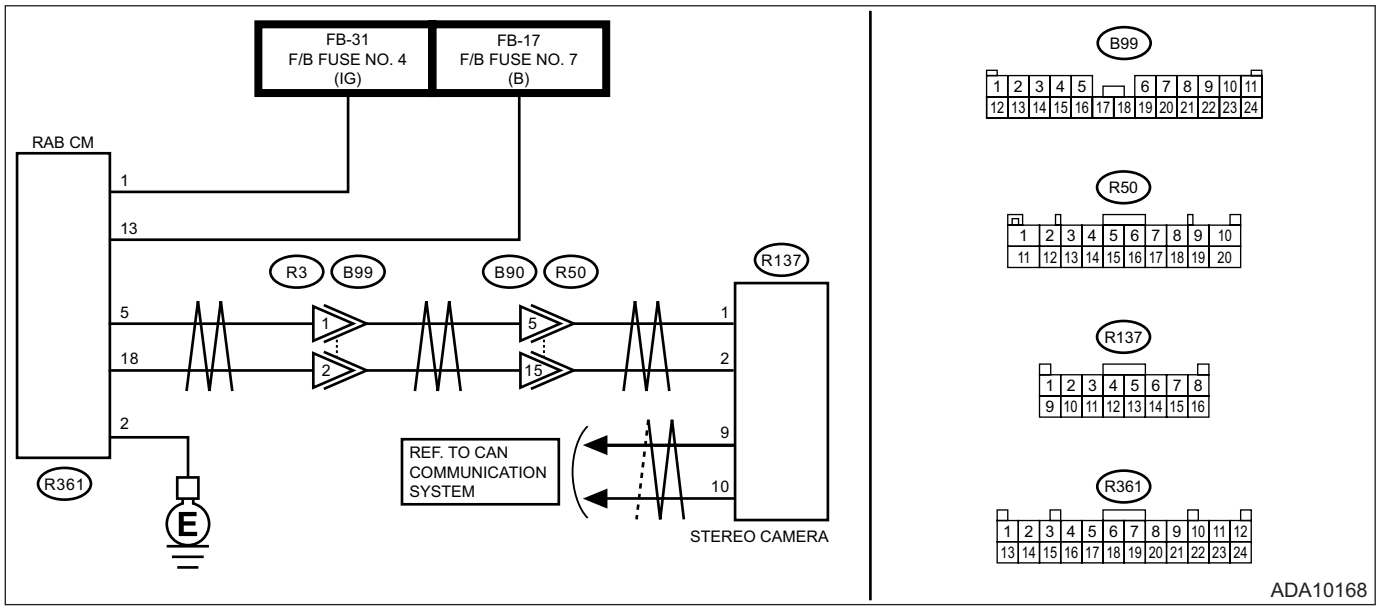
- When the Reverse Automatic Braking is error

“RAB” illuminates in MID in the combination meter.

- When the Reverse Automatic Braking is stopped temporarily

“RAB OFF” illuminates in MID in the combination meter.

NOTE:
Even with normal condition, “RAB warning light (RAB OFF indicator light)” illuminates for 6 seconds after turning the ignition switch to ON, and then goes off after 6 seconds.



8. Diagnostic Procedure for Subaru Select Monitor Communication

A: INSPECTION

1. COMMUNICATION FOR INITIALIZING IMPOSSIBLE

Trouble symptom:
Communication is not possible with «Reverse Automatic Braking».
Detecting condition:
- Defective harness connector
- Power supply circuit malfunction
- Defective RAB CM
- Defective CAN communication circuit
- Defective Subaru Select Monitor

Wiring diagram:
Reverse Automatic Braking <Ref. to WI-329, Reverse Automatic Braking.>

Step		Check	Yes	No
1	**CHECK OUTPUT SIGNAL OF ECM.** 1) Turn the ignition switch to OFF. 2) Check the fuse.	Is the check result OK?	Go to step **2**.	Replace the fuse. If the replaced fuse has blown out immediately, repair the short circuit to ground in harness between fuse and RAB CM.
2	**CHECK POWER SUPPLY CIRCUIT.** 1) Disconnect the RAB CM connector. 2) Turn the ignition switch to ON. 3) Using a tester, measure the voltage between the RAB CM connector and chassis ground. ***Connector & terminal*** ***(R361) No. 1 (+) — Chassis ground (–):*** ***(R361) No. 13 (+) — Chassis ground (–):***	Is the voltage 10 V or more?	Go to step **3**.	Repair the open circuit in the harness between fuse and RAB CM connector.

	Step	Check	Yes	No
3	**CHECK GROUND CIRCUIT.** 1) Turn the ignition switch to OFF. 2) Using a tester, measure the resistance between the RAB CM connector and chassis ground. ***Connector & terminal*** ***(R361) No. 2 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **4**.	Repair the open circuit of harness between RAB CM connector and chassis ground.
4	**CHECK LAN SYSTEM.** 1) Connect the RAB CM connector. 2) Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **5**.	Perform the inspection according to the diagnosis for LAN system.
5	**CHECK SUBARU SELECT MONITOR.** Connect the Subaru Select Monitor to another vehicle.	Is the communication possible with the vehicle?	Go to step **6**.	Replace or repair the Subaru Select Monitor.
6	**CHECK RAB CM.** Communicate with «Reverse Automatic Braking».	Is communication possible?	The circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>

9. Read Diagnostic Trouble Code (DTC)

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Reverse Automatic Braking» and then select «Enter».
5) On «Select Function» display, select «DTC».

NOTE:
- For detailed operation procedures, refer to “Application help”.
- •For details concerning DTC, refer to “List of Diagnostic Trouble Code (DTC)”. <Ref. to RAB(diag)-23, List of Diagnostic Trouble Code (DTC).>

10.Clear Memory Mode

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Reverse Automatic Braking» and then select «Enter».
5) On «Select Function» display, select «DTC».
6) On «DTC» display, select «Clear Memory».

NOTE:
For detailed operation procedures, refer to “Application help”.

11.Read Current Data

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Reverse Automatic Braking» and then select «Enter».
5) On «Select Function» display, select «Data Monitor».

NOTE:
For detailed operation procedures, refer to “Application help”.

B: LIST

Items to be displayed	Content	Standard	Note (unit)
Battery Voltage	System information.	0 — 24.5	V
Ignition Voltage	System information.	0 — 17.85	V
Sonar	System information.	0 — 24.5	V

13.Customize

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Reverse Automatic Braking» and then select «Enter».
5) On «Select Function» display, select «Customize» and then select «Enter».

NOTE:
For detailed operation procedures, refer to “Application help”.

B: LIST

Customize item	Initial setting value	Setting value	Content
RAB Function ON/OFF Information(SSM)	ON	ON OFF	ON/OFF of the RAB function can be selected.
RAB Alarm ON/OFF Information(SSM)	ON	ON OFF	ON/OFF of the alarm sound can be selected.

14.Work Support

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Reverse Automatic Braking» and then select «Enter».
5) On «Select Function» display, select «Work Support» and then select «Enter».

NOTE:
For detailed operation procedures, refer to “Application help”.

B: LIST

Work support item	Content
RAB Operation Record Data Save	When ignition switch ON counts of “Latest”, “1 block before”, “2 blocks before”... “4 blocks before” all shows “0”, it can be judges that there is no data. The display shows the latest data and the data in the previous 4 times in the order of their occurrence. Blue letter means that the data exists, and black letter means that there is no data. Select the blue letters and read out the details.
ECU Initialize	RAB CM is reset to the factory settings.
ECU Parts Number Display	RAB CM part number is displayed.
Software Information Display	Software information is displayed

Sensitivity of each sonar sensor can NOT be adjusted.

15.List of Diagnostic Trouble Code (DTC)

A: LIST

16.Diagnostic Procedure with Diagnostic Trouble Code (DTC)

A: DTC B2C00 SONAR CONTROL MODULE CIRCUIT

Outline of diagnosis:
Detect the malfunction of the RAB CM.
Time needed for diagnosis:
10 ms
Recovery conditions:
Ignition switch OFF → ON

Step		Check	Yes	No
1	**CHECK DTC.** Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is a DTC other than DTC B2C00 displayed? (Current malfunction)	Perform the diagnosis for DTC other than DTC B2C00.	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>

B: DTC B2C01 RR SONAR CONTROL MODULE CIRCUIT

Outline of diagnosis:
Detect the malfunction of the RAB CM.
Time needed for diagnosis:
1200 ms
Recovery conditions:
Ignition switch OFF → ON

Step		Check	Yes	No
1	**CHECK DTC.** Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is a DTC other than DTC B2C01 displayed? (Current malfunction)	Perform the diagnosis for DTC other than DTC B2C01.	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>

C: DTC B2C02 RRC SONAR CONTROL MODULE CIRCUIT

Outline of diagnosis:
Detect the malfunction of the RAB CM.
Time needed for diagnosis:
- 600 ms (when two waves transmitted)
- 1200 ms (when four waves transmitted)

Recovery conditions:
Ignition switch OFF → ON

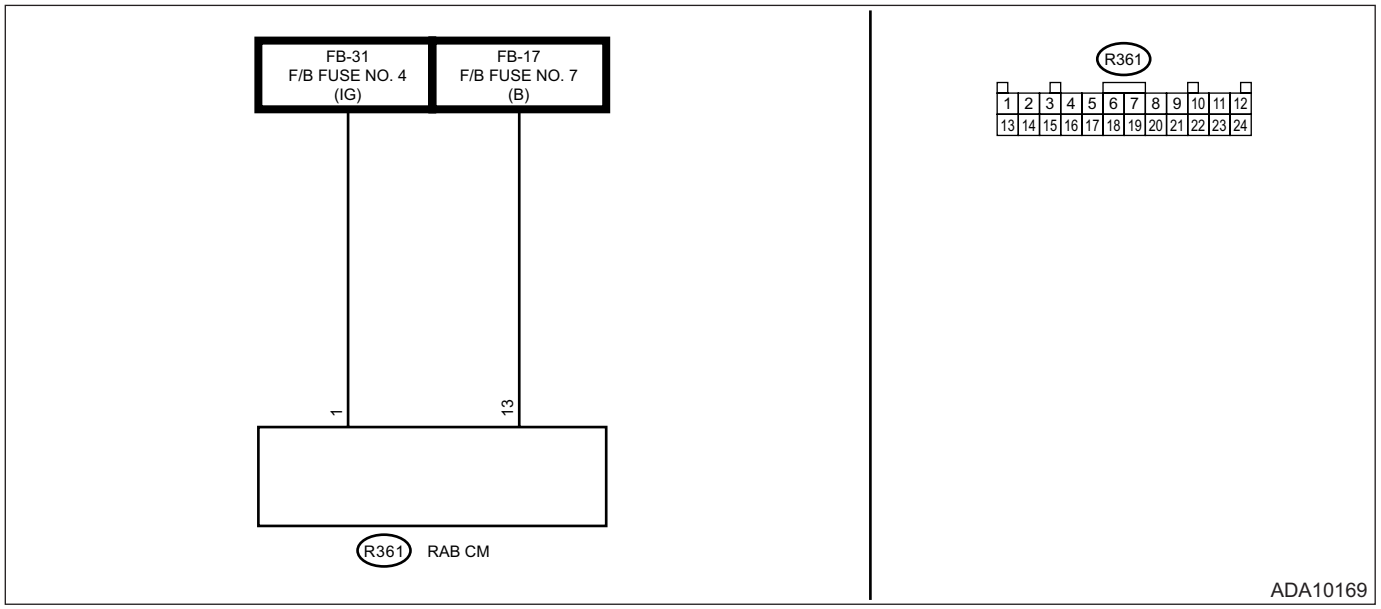
Step		Check	Yes	No
1	**CHECK DTC.** Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is a DTC other than DTC B2C02 displayed? (Current malfunction)	Perform the diagnosis for DTC other than DTC B2C02.	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>

D: DTC B2C03 RL SONAR CONTROL MODULE CIRCUIT

Outline of diagnosis:
Detect the malfunction of the RAB CM.
Time needed for diagnosis:
1200 ms
Recovery conditions:
Ignition switch OFF → ON

	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is a DTC other than DTC B2C03 displayed? (Current malfunction)	Perform the diagnosis for DTC other than DTC B2C03.	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>

E: DTC B2C04 RLC SONAR CONTROL MODULE CIRCUIT

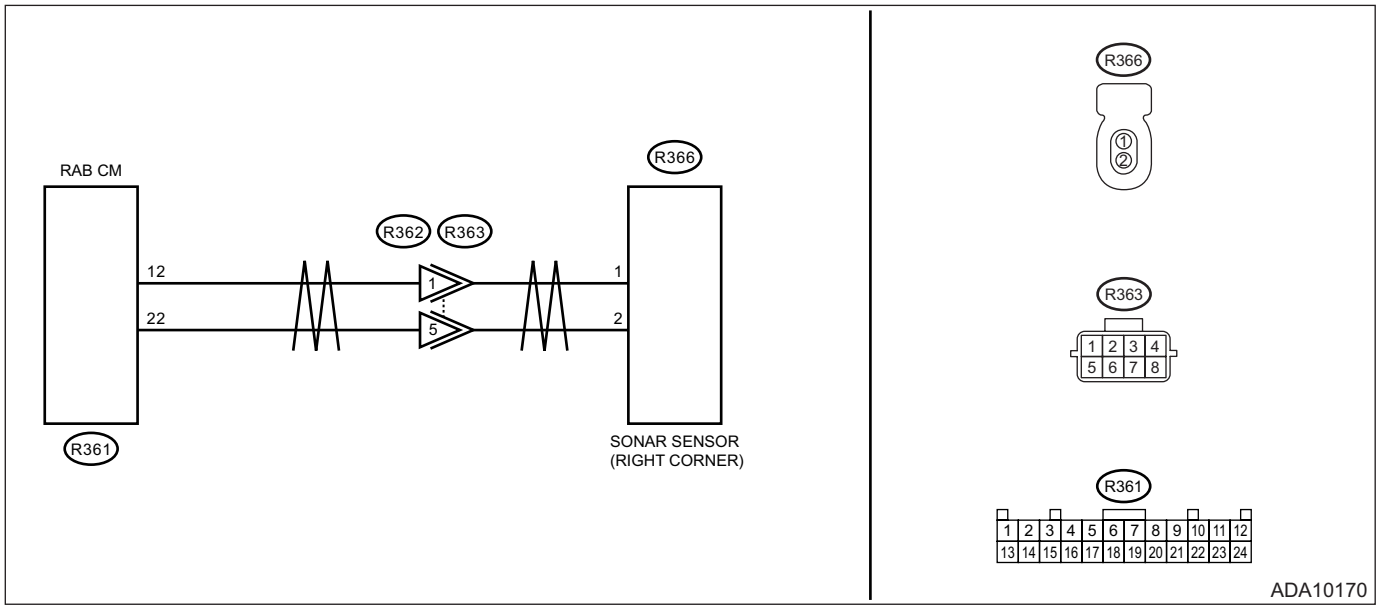


Outline of diagnosis:
Detect the malfunction of the RAB CM.
Time needed for diagnosis:
- 600 ms (when two waves transmitted)
- 1200 ms (when four waves transmitted)

Recovery conditions:
Ignition switch OFF → ON

	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is a DTC other than DTC B2C04 displayed? (Current malfunction)	Perform the diagnosis for DTC other than DTC B2C04.	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>

F: DTC B2C05 SONAR CONTROL MODULE POWER SUPPLY



Outline of diagnosis:
Voltage supply to the ignition power supply terminal and the battery power supply terminal was 16 V or more.
Time needed for diagnosis:
200 ms
Recovery conditions:
Ignition switch OFF → ON
Wiring diagram:
Reverse Automatic Braking <Ref. to WI-329, Reverse Automatic Braking.>

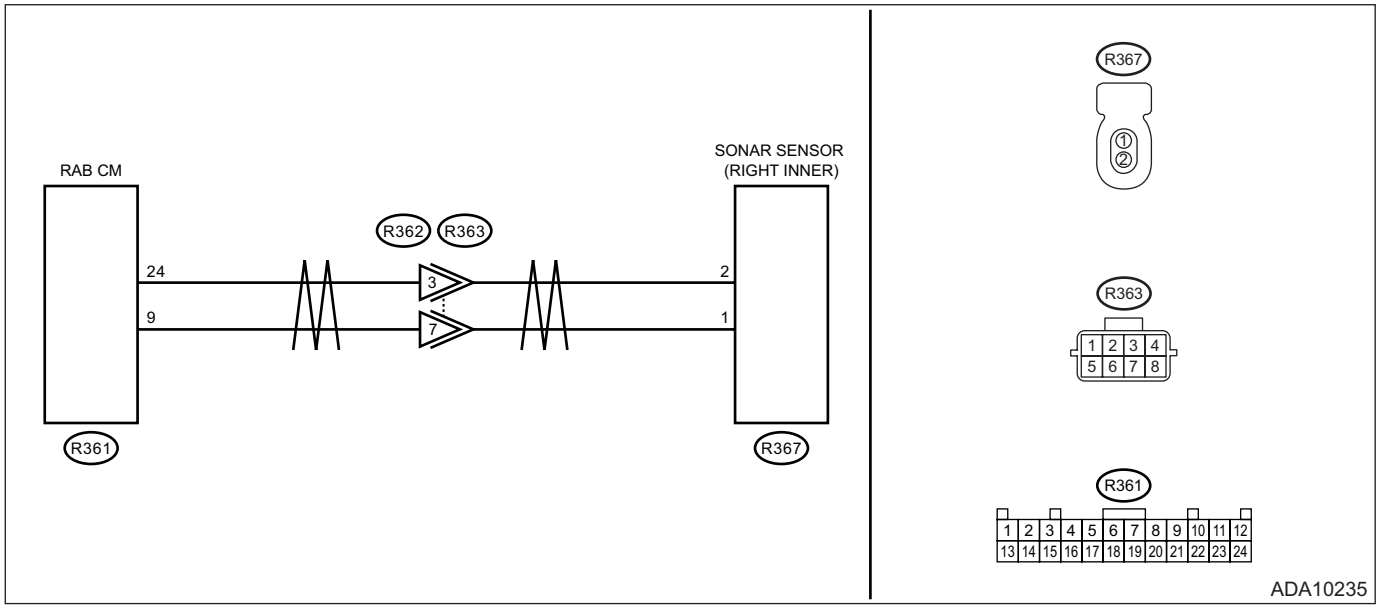
	Step	Check	Yes	No
1	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the RAB CM connector. 3) Connect the disconnected connectors. 4) Turn the ignition switch to ON. 5) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C05 displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**CHECK RAB CM POWER SUPPLY CIRCUIT.** 1) Turn the ignition switch to OFF. 2) Disconnect the RAB CM connector. 3) Turn the ignition switch to ON. 4) Using a tester, measure the voltage between the RAB CM connector and chassis ground. ***Connector & terminal*** ***(R361) No. 1 (+) — Chassis ground (–):*** ***(R361) No. 13 (+) — Chassis ground (–):***	Is the voltage 16 V or less?	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>	Check the harness between the RAB CM connector and power supply.

G: DTC B2C06 RR SONAR SENSOR CIRCUIT / NO SIGNAL

Outline of diagnosis:
Sonar sensor (right corner) harness is open.
Time needed for diagnosis:
1200 ms
Recovery conditions:
Ignition switch OFF → ON
Wiring diagram:
Reverse Automatic Braking <Ref. to WI-329, Reverse Automatic Braking.>

Step		Check	Yes	No
1	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (right corner) connector. 3) Connect the disconnected connectors. 4) Turn the ignition switch to ON. 5) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C06 displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**CHECK HARNESS BETWEEN SONAR SENSOR CONNECTOR AND RAB CM CONNECTOR. (OPEN CIRCUIT).** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (right corner) connector and the RAB CM connector. 3) Using a tester, measure resistance value of the harness between the sonar sensor (right corner) connector and RAB CM connector. ***Connector & terminal*** ***(R361) No. 12 — (R366) No. 1:*** ***(R361) No. 22 — (R366) No. 2:***	Is the resistance less than 10 Ω?	Go to step **3**.	Repair or replace the open circuit in the harness between sonar sensor connector and RAB CM connector.

	Step	Check	Yes	No
3	**CHECK SONAR SENSOR.** 1) Switch the sonar sensor (right corner) and sonar sensor (right inner). 2) Connect the disconnected connectors. 3) Turn the ignition switch to ON. 4) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C06 displayed? (Current malfunction)	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>	Replace the sensor installed as a sonar sensor (right corner). <Ref. to RAB-7, Sensor and Harness.>



H: DTC B2C07 RR SONAR SENSOR / SONAR CONTROL MODULE CIRCUIT

NOTE:
For the diagnostic procedure, refer to DTC B2C06. <Ref. to RAB(diag)-29, DTC B2C06 RR SONAR SENSOR CIRCUIT / NO SIGNAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

I: DTC B2C08 RRC SONAR SENSOR CIRCUIT / NO SIGNAL

Outline of diagnosis:
Sonar sensor (right inner) harness is open.
Time needed for diagnosis:
- 600 ms (when two waves transmitted)
- 1200 ms (when four waves transmitted)

Recovery conditions:
Ignition switch OFF → ON
Wiring diagram:
Reverse Automatic Braking <Ref. to WI-329, Reverse Automatic Braking.>

Step		Check	Yes	No
1	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (right inner) connector. 3) Connect the disconnected connectors. 4) Turn the ignition switch to ON. 5) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C08 displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

	Step	Check	Yes	No
2	**CHECK HARNESS BETWEEN SONAR SENSOR CONNECTOR AND RAB CM CONNECTOR. (OPEN CIRCUIT).** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (right inner) connector and the RAB CM connector. 3) Using a tester, measure resistance value of the harness between the sonar sensor (right inner) connector and RAB CM connector. ***Connector & terminal*** ***(R361) No. 24 — (R367) No. 2:*** ***(R361) No. 9 — (R367) No. 1:***	Is the resistance less than 10 Ω?	Go to step **3**.	Repair or replace the open circuit in the harness between sonar sensor connector and RAB CM connector.
3	**CHECK SONAR SENSOR.** 1) Switch the sonar sensor (right inner) and sonar sensor (right corner). 2) Connect the disconnected connectors. 3) Turn the ignition switch to ON. 4) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C08 displayed? (Current malfunction)	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>	Replace the sensor installed as a sonar sensor (right inner). <Ref. to RAB-7, Sensor and Harness.>

J: DTC B2C09 RRC SONAR SENSOR / SONAR CONTROL MODULE CIRCUIT

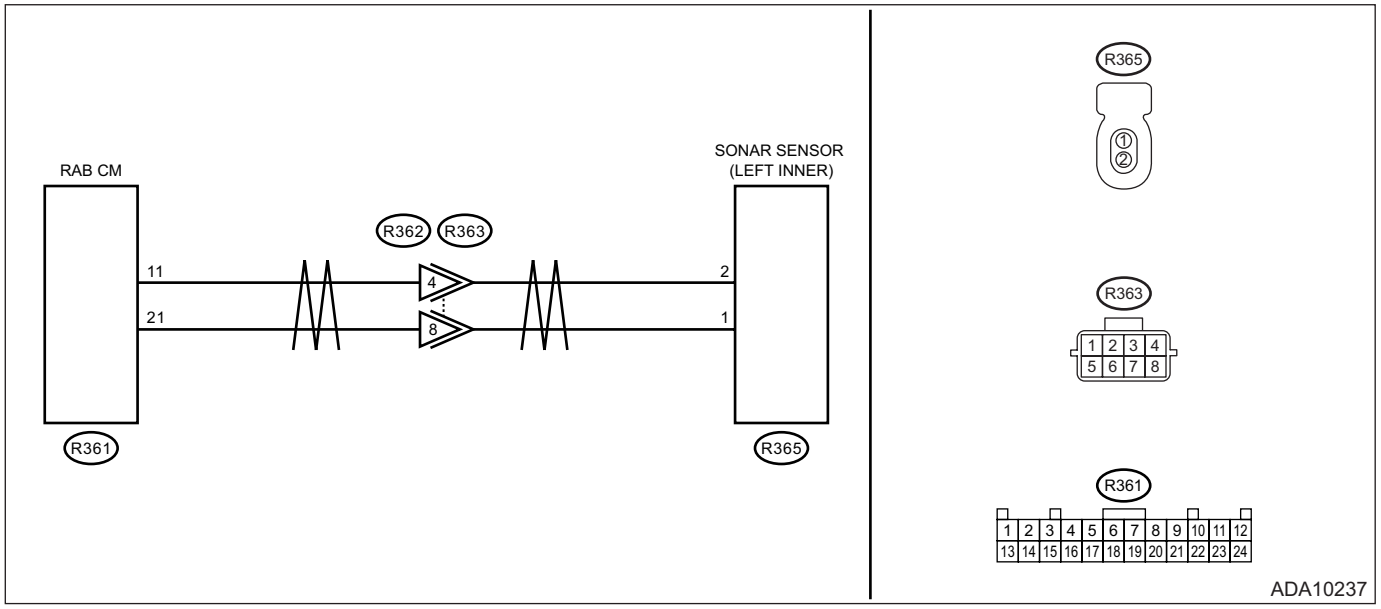
NOTE:
For the diagnostic procedure, refer to DTC B2C07. <Ref. to RAB(diag)-30, DTC B2C07 RR SONAR SENSOR / SONAR CONTROL MODULE CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

K: DTC B2C0A RL SONAR SENSOR CIRCUIT / NO SIGNAL

Outline of diagnosis:
Sonar sensor (left corner) harness is open.
Time needed for diagnosis:
1200 ms
Recovery conditions:
Ignition switch OFF → ON
Wiring diagram:
Reverse Automatic Braking <Ref. to WI-329, Reverse Automatic Braking.>

Step		Check	Yes	No
1	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (left corner) connector. 3) Connect the disconnected connectors. 4) Turn the ignition switch to ON. 5) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C0A displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**CHECK HARNESS BETWEEN SONAR SENSOR CONNECTOR AND RAB CM CONNECTOR. (OPEN CIRCUIT).** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (left corner) connector and the RAB CM connector. 3) Using a tester, measure resistance value of the harness between the sonar sensor (left corner) connector and RAB CM connector. ***Connector & terminal*** ***(R361) No. 8 — (R364) No. 2:*** ***(R361) No. 23 — (R364) No. 1:***	Is the resistance less than 10 Ω?	Go to step **3**.	Repair or replace the open circuit in the harness between sonar sensor connector and RAB CM connector.

	Step	Check	Yes	No
3	**CHECK SONAR SENSOR.** 1) Switch the sonar sensor (left corner) and sonar sensor (left inner). 2) Connect the disconnected connectors. 3) Turn the ignition switch to ON. 4) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C0A displayed? (Current malfunction)	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>	Replace the sensor installed as a sonar sensor (left corner). <Ref. to RAB-7, Sensor and Harness.>



L: DTC B2C0B RL SONAR SENSOR / SONAR CONTROL MODULE CIRCUIT

NOTE:
For the diagnostic procedure, refer to DTC B2C0A. <Ref. to RAB(diag)-33, DTC B2C0A RL SONAR SENSOR CIRCUIT / NO SIGNAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

M: DTC B2C0C RLC SONAR SENSOR CIRCUIT / NO SIGNAL

Outline of diagnosis:
Sonar sensor (left inner) harness is open.
Time needed for diagnosis:
- 600 ms (when two waves transmitted)
- 1200 ms (when four waves transmitted)

Recovery conditions:
Ignition switch OFF → ON
Wiring diagram:
Reverse Automatic Braking <Ref. to WI-329, Reverse Automatic Braking.>

Step		Check	Yes	No
1	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (left inner) connector. 3) Connect the disconnected connectors. 4) Turn the ignition switch to ON. 5) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C0C displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

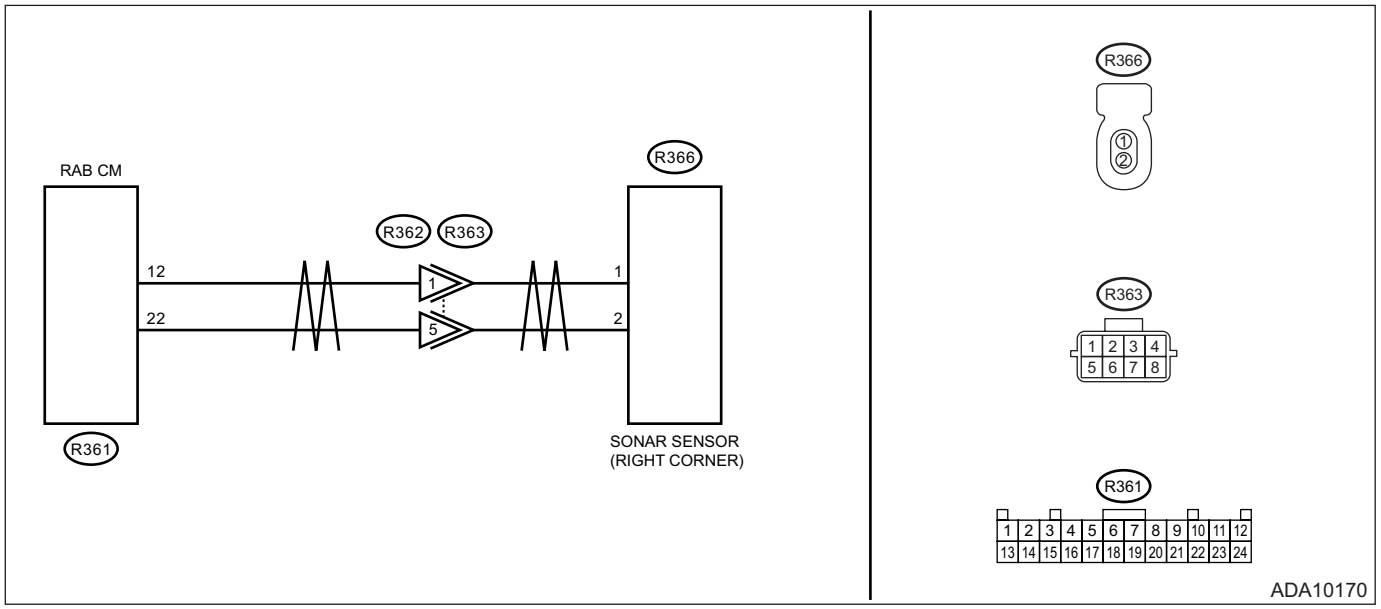
	Step	Check	Yes	No
2	**CHECK HARNESS BETWEEN SONAR SENSOR CONNECTOR AND RAB CM CONNECTOR. (OPEN CIRCUIT).** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (left inner) connector and the RAB CM connector. 3) Using a tester, measure resistance value of the harness between the sonar sensor (left inner) connector and RAB CM connector. ***Connector & terminal*** ***(R361) No. 11 — (R365) No. 2:*** ***(R361) No. 21 — (R365) No. 1:***	Is the resistance less than 10 Ω?	Go to step **3**.	Repair or replace the open circuit in the harness between sonar sensor connector and RAB CM connector.
3	**CHECK SONAR SENSOR.** 1) Switch the sonar sensor (left inner) and sonar sensor (left corner). 2) Connect the disconnected connectors. 3) Turn the ignition switch to ON. 4) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C0C displayed? (Current malfunction)	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>	Replace the sensor installed as a sonar sensor (left inner). <Ref. to RAB-7, Sensor and Harness.>

N: DTC B2C0D RLC SONAR SENSOR / SONAR CONTROL MODULE CIRCUIT

NOTE:
For the diagnostic procedure, refer to DTC B2C0C. <Ref. to RAB(diag)-35, DTC B2C0C RLC SONAR SENSOR CIRCUIT / NO SIGNAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

O: DTC B2C0E RR SONAR HARNESS HIGH

Outline of diagnosis:
Sonar sensor (right corner) harness is shorted to power supply.
Time needed for diagnosis:
1200 ms
Recovery conditions:
Ignition switch OFF → ON
Wiring diagram:
Reverse Automatic Braking <Ref. to WI-329, Reverse Automatic Braking.>

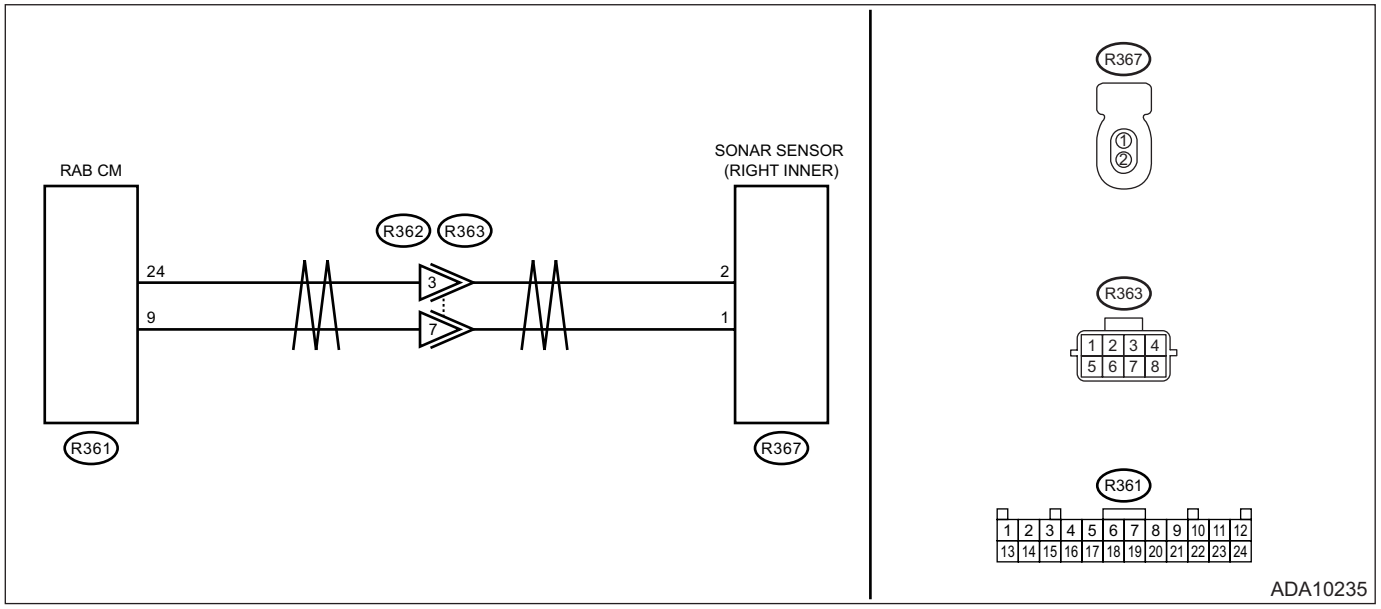


Step		Check	Yes	No
1	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (right corner) connector. 3) Connect the disconnected connectors. 4) Turn the ignition switch to ON. 5) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C0E displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

	Step	Check	Yes	No
2	**CHECK HARNESS BETWEEN SONAR SENSOR CONNECTOR AND RAB CM CONNECTOR. (SHORT CIRCUIT TO POWER SUPPLY).** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (right corner) connector and the RAB CM connector. 3) Turn the ignition switch to ON. 4) Using a tester, measure the voltage between sonar sensor (right corner) connector and chassis ground. ***Connector & terminal (R366) No. 1 (+) — Chassis ground (–):***	Is the voltage less than 1 V?	Go to step **3**.	Repair or replace the short circuit in the harness between sonar sensor connector and RAB CM connector.
3	**CHECK SONAR SENSOR.** 1) Turn the ignition switch to OFF. 2) Switch the sonar sensor (right corner) and sonar sensor (right inner). 3) Connect the disconnected connectors. 4) Turn the ignition switch to ON. 5) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C0E displayed? (Current malfunction)	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>	Replace the sensor installed as a sonar sensor (right corner).

P: DTC B2C0F RR SONAR HARNESS LOW

Outline of diagnosis:
Sonar sensor (right corner) harness is shorted to ground.
Time needed for diagnosis:
1200 ms
Recovery conditions:
Ignition switch OFF → ON
Wiring diagram:
Reverse Automatic Braking <Ref. to WI-329, Reverse Automatic Braking.>



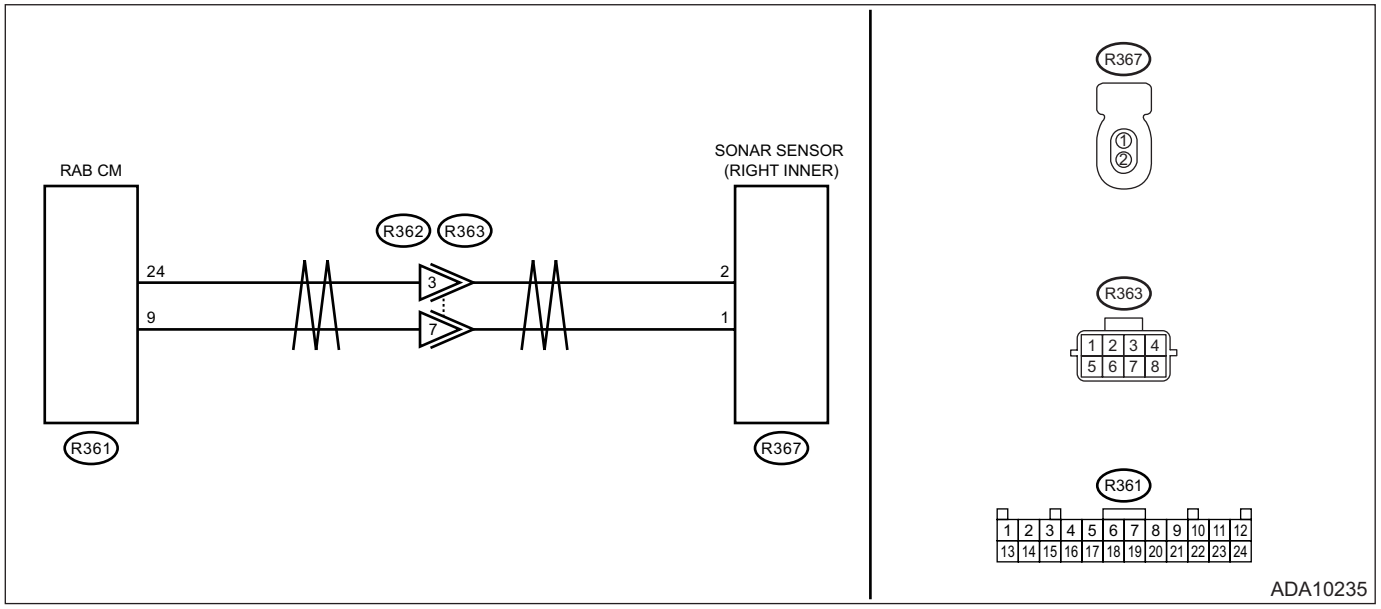
Step		Check	Yes	No
1	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (right corner) connector. 3) Connect the disconnected connectors. 4) Turn the ignition switch to ON. 5) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C0F displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**CHECK HARNESS BETWEEN SONAR SENSOR CONNECTOR AND RAB CM CONNECTOR. (SHORTED TO GROUND).** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (right corner) connector and the RAB CM connector. 3) Using a tester, measure the resistance between sonar sensor (right corner) connector and chassis ground. ***Connector & terminal*** ***(R366) No. 1 — Chassis ground:***	Is the resistance 1 MΩ or more?	Go to step **3**.	Repair or replace the short circuit in the harness between sonar sensor connector and RAB CM connector.

	Step	Check	Yes	No
3	**CHECK SONAR SENSOR.** 1) Switch the sonar sensor (right corner) and sonar sensor (right inner). 2) Connect the disconnected connectors. 3) Turn the ignition switch to ON. 4) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C0F displayed? (Current malfunction)	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>	Replace the sensor installed as a sonar sensor (right corner).

Q: DTC B2C10 RRC SONAR HARNESS HIGH

Outline of diagnosis:
Sonar sensor (right inner) harness is shorted to power supply.
Time needed for diagnosis:
- 600 ms (when two waves transmitted)
- 1200 ms (when four waves transmitted)

Recovery conditions:
Ignition switch OFF → ON
Wiring diagram:
Reverse Automatic Braking <Ref. to WI-329, Reverse Automatic Braking.>



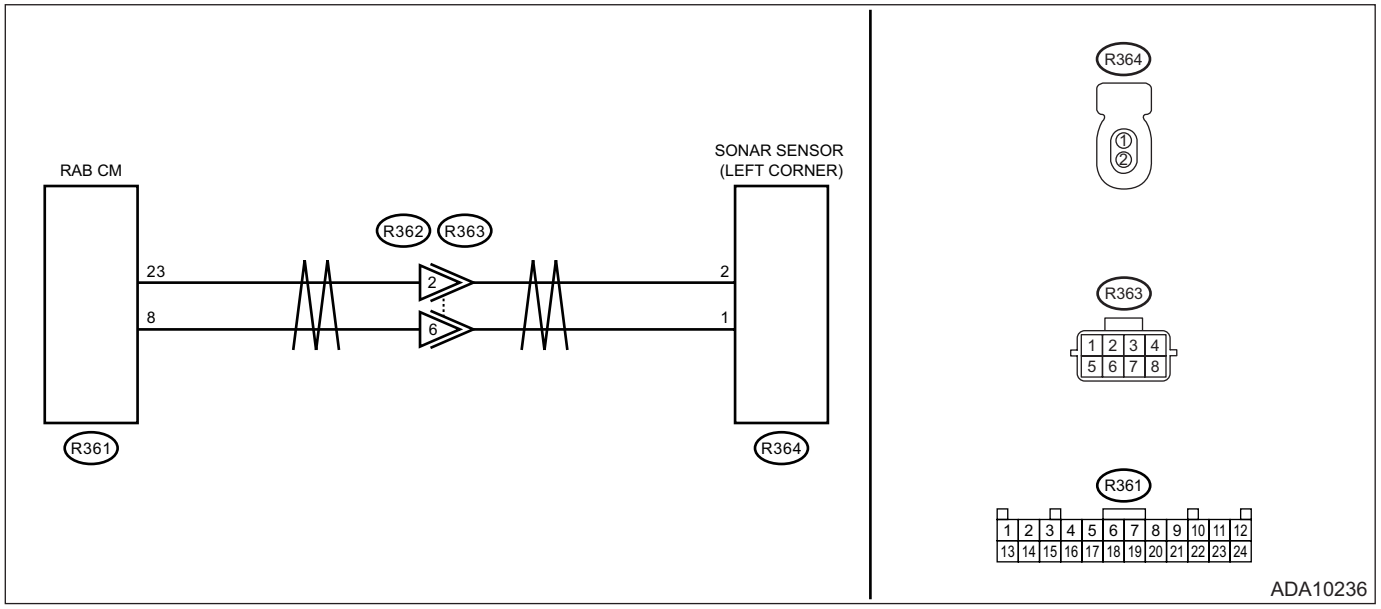
Step		Check	Yes	No
1	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (right inner) connector. 3) Connect the disconnected connectors. 4) Turn the ignition switch to ON. 5) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C10 displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

	Step	Check	Yes	No
2	**CHECK HARNESS BETWEEN SONAR SENSOR CONNECTOR AND RAB CM CONNECTOR. (SHORTED TO GROUND).** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (right inner) connector and the RAB CM connector. 3) Using a tester, measure the voltage between sonar sensor (right inner) connector and chassis ground. ***Connector & terminal*** ***(R367) No. 2 (+) — Chassis ground (–):***	Is the voltage less than 1 V?	Go to step **3**.	Repair or replace the short circuit in the harness between sonar sensor connector and RAB CM connector.
3	**CHECK SONAR SENSOR.** 1) Switch the sonar sensor (right inner) and sonar sensor (right corner). 2) Connect the disconnected connectors. 3) Turn the ignition switch to ON. 4) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C10 displayed? (Current malfunction)	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>	Replace the sensor installed as a sonar sensor (right inner).

R: DTC B2C11 RRC SONAR HARNESS LOW

Outline of diagnosis:
Sonar sensor (right inner) harness is shorted to ground.
Time needed for diagnosis:
- 600 ms (when two waves transmitted)
- 1200 ms (when four waves transmitted)

Recovery conditions:
Ignition switch OFF → ON
Wiring diagram:
Reverse Automatic Braking <Ref. to WI-329, Reverse Automatic Braking.>



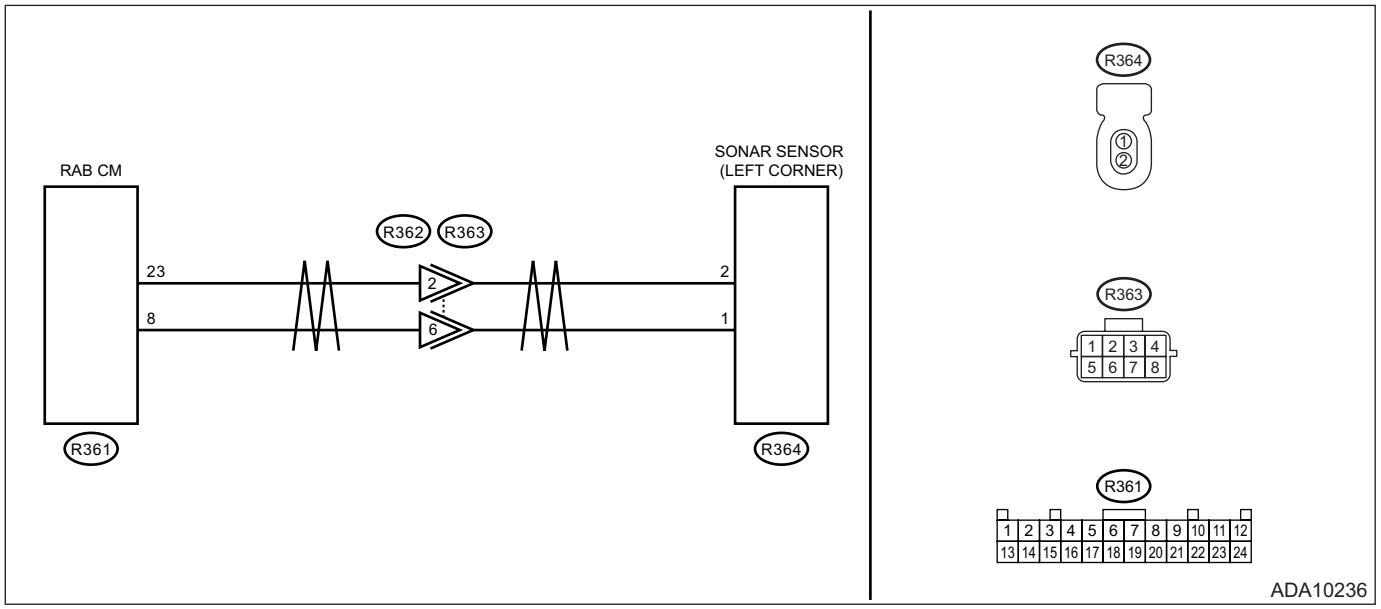
Step		Check	Yes	No
1	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (right inner) connector. 3) Connect the disconnected connectors. 4) Turn the ignition switch to ON. 5) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C11 displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

	Step	Check	Yes	No
2	**CHECK HARNESS BETWEEN SONAR SENSOR CONNECTOR AND RAB CM CONNECTOR. (SHORTED TO GROUND).** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (right inner) connector and the RAB CM connector. 3) Using a tester, measure the resistance between sonar sensor (right inner) connector and chassis ground. ***Connector & terminal*** ***(R367) No. 2 — Chassis ground:***	Is the resistance less than 1 MΩ?	Go to step **3**.	Repair or replace the short circuit in the harness between sonar sensor connector and RAB CM connector.
3	**CHECK SONAR SENSOR.** 1) Switch the sonar sensor (right inner) and sonar sensor (right corner). 2) Connect the disconnected connectors. 3) Turn the ignition switch to ON. 4) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C11 displayed? (Current malfunction)	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>	Replace the sensor installed as a sonar sensor (right inner).

S: DTC B2C12 RL SONAR HARNESS HIGH

Outline of diagnosis:
Sonar sensor (left corner) harness is shorted to power supply.
Time needed for diagnosis:
- 600 ms (when two waves transmitted)
- 1200 ms (when four waves transmitted)

Recovery conditions:
Ignition switch OFF → ON
Wiring diagram:
Reverse Automatic Braking <Ref. to WI-329, Reverse Automatic Braking.>

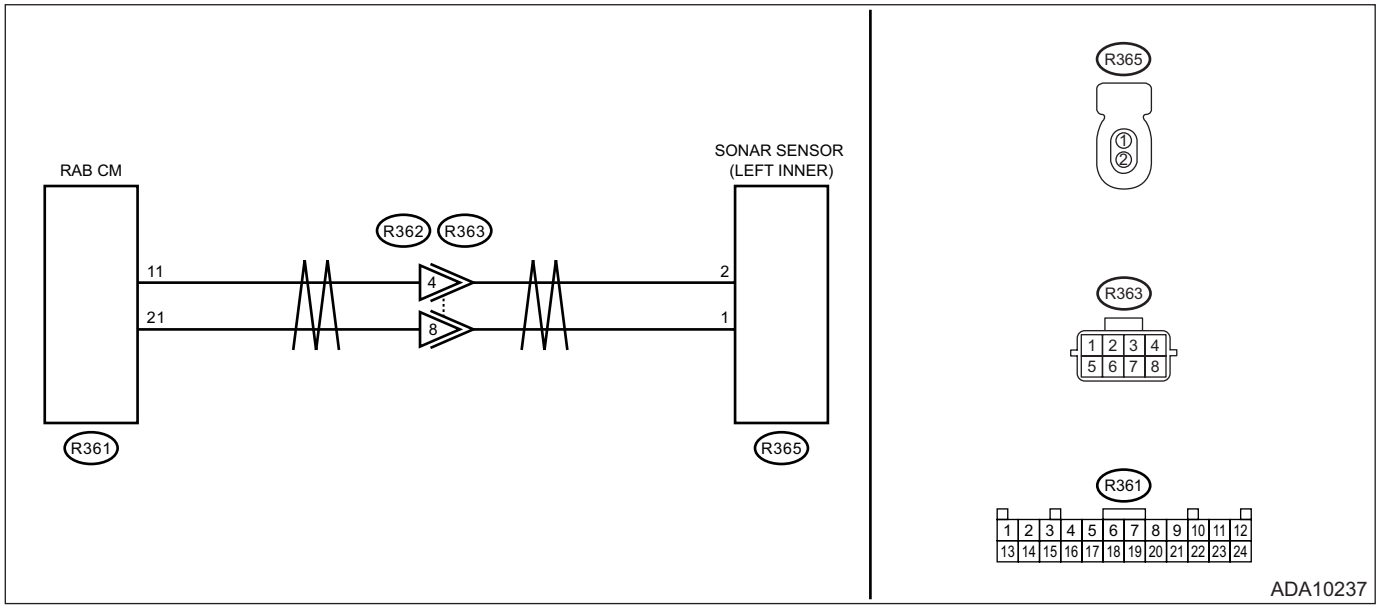


Step		Check	Yes	No
1	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (left corner) connector. 3) Connect the disconnected connectors. 4) Turn the ignition switch to ON. 5) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C12 displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

	Step	Check	Yes	No
2	**CHECK HARNESS BETWEEN SONAR SENSOR CONNECTOR AND RAB CM CONNECTOR. (SHORT CIRCUIT TO POWER SUPPLY).** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (left corner) connector and the RAB CM connector. 3) Turn the ignition switch to ON. 4) Using a tester, measure the voltage between sonar sensor (left corner) connector and chassis ground. ***Connector & terminal (R364) No. 2 (+) — Chassis ground (–):***	Is the voltage less than 1 V?	Go to step **3**.	Repair or replace the short circuit in the harness between sonar sensor connector and RAB CM connector.
3	**CHECK SONAR SENSOR.** 1) Switch the sonar sensor (left corner) and sonar sensor (left inner). 2) Connect the disconnected connectors. 3) Turn the ignition switch to ON. 4) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C12 displayed? (Current malfunction)	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>	Replace the sensor installed as a sonar sensor (left corner).

T: DTC B2C13 RL SONAR HARNESS LOW

Outline of diagnosis:
Sonar sensor (left corner) harness is shorted to ground.
Time needed for diagnosis:
1200 ms
Recovery conditions:
Ignition switch OFF → ON
Wiring diagram:
Reverse Automatic Braking <Ref. to WI-329, Reverse Automatic Braking.>



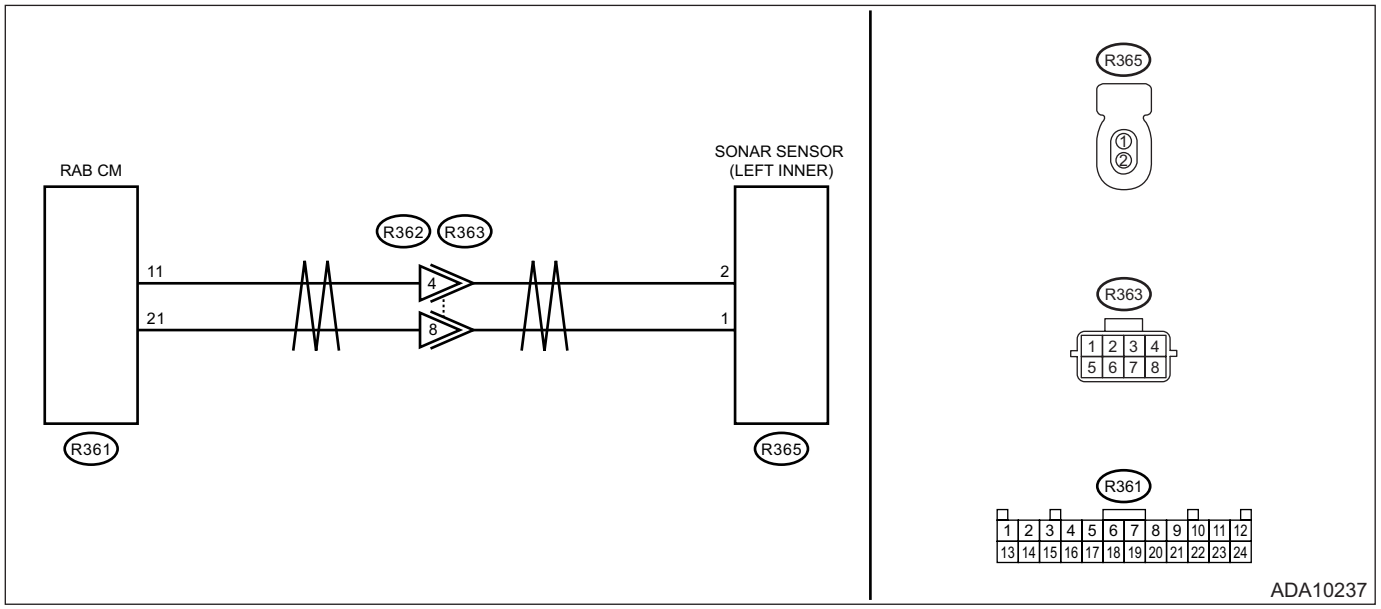
Step		Check	Yes	No
1	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (left corner) connector. 3) Connect the disconnected connectors. 4) Turn the ignition switch to ON. 5) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C13 displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**CHECK HARNESS BETWEEN SONAR SENSOR CONNECTOR AND RAB CM CONNECTOR. (SHORTED TO GROUND).** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (left corner) connector and the RAB CM connector. 3) Using a tester, measure the resistance between sonar sensor (left corner) connector and chassis ground. ***Connector & terminal*** ***(R364) No. 2 — Chassis ground:***	Is the resistance 1 MΩ or more?	Go to step **3**.	Repair or replace the short circuit in the harness between sonar sensor connector and RAB CM connector.

	Step	Check	Yes	No
3	**CHECK SONAR SENSOR.** 1) Switch the sonar sensor (left corner) and sonar sensor (left inner). 2) Connect the disconnected connectors. 3) Turn the ignition switch to ON. 4) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C13 displayed? (Current malfunction)	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>	Replace the sensor installed as a sonar sensor (left corner).

U: DTC B2C14 RLC SONAR HARNESS HIGH

Outline of diagnosis:
Sonar sensor (left inner) harness is shorted to power supply.
Time needed for diagnosis:
- 600 ms (when two waves transmitted)
- 1200 ms (when four waves transmitted)

Recovery conditions:
Ignition switch OFF → ON
Wiring diagram:
Reverse Automatic Braking <Ref. to WI-329, Reverse Automatic Braking.>



Step		Check	Yes	No
1	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (left inner) connector. 3) Connect the disconnected connectors. 4) Turn the ignition switch to ON. 5) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C14 displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

	Step	Check	Yes	No
2	**CHECK HARNESS BETWEEN SONAR SENSOR CONNECTOR AND RAB CM CONNECTOR. (SHORT CIRCUIT TO POWER SUPPLY).** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (left inner) connector and the RAB CM connector. 3) Turn the ignition switch to ON. 4) Using a tester, measure the voltage between sonar sensor (left inner) connector and chassis ground. ***Connector & terminal (R365) No. 2 (+) — Chassis ground (–):***	Is the voltage less than 1 V?	Go to step **3**.	Repair or replace the short circuit in the harness between sonar sensor connector and RAB CM connector.
3	**CHECK SONAR SENSOR.** 1) Switch the sonar sensor (left inner) and sonar sensor (left corner). 2) Connect the disconnected connectors. 3) Turn the ignition switch to ON. 4) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C14 displayed? (Current malfunction)	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>	Replace the sensor installed as a sonar sensor (left inner).

V: DTC B2C15 RLC SONAR HARNESS LOW

Outline of diagnosis:
Sonar sensor (left inner) harness is shorted to ground.
Time needed for diagnosis:
1200 ms
Recovery conditions:
Ignition switch OFF → ON
Wiring diagram:
Reverse Automatic Braking <Ref. to WI-329, Reverse Automatic Braking.>

Step		Check	Yes	No
1	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (left inner) connector. 3) Connect the disconnected connectors. 4) Turn the ignition switch to ON. 5) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C15 displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**CHECK HARNESS BETWEEN SONAR SENSOR CONNECTOR AND RAB CM CONNECTOR. (SHORTED TO GROUND).** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (left inner) connector and the RAB CM connector. 3) Using a tester, measure the resistance between sonar sensor (left inner) connector and chassis ground. ***Connector & terminal*** ***(R365) No. 2 — Chassis ground:***	Is the resistance 1 MΩ or more?	Go to step **3**.	Repair or replace the short circuit in the harness between sonar sensor connector and RAB CM connector.

	Step	Check	Yes	No
3	**CHECK SONAR SENSOR.** 1) Switch the sonar sensor (left inner) and sonar sensor (left corner). 2) Connect the disconnected connectors. 3) Turn the ignition switch to ON. 4) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C15 displayed? (Current malfunction)	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>	Replace the sensor installed as a sonar sensor (left inner).

W: DTC B2C16 RRC SONAR HARNESS HIGH / RRC SONAR CONTROL MODULE CIRCUIT

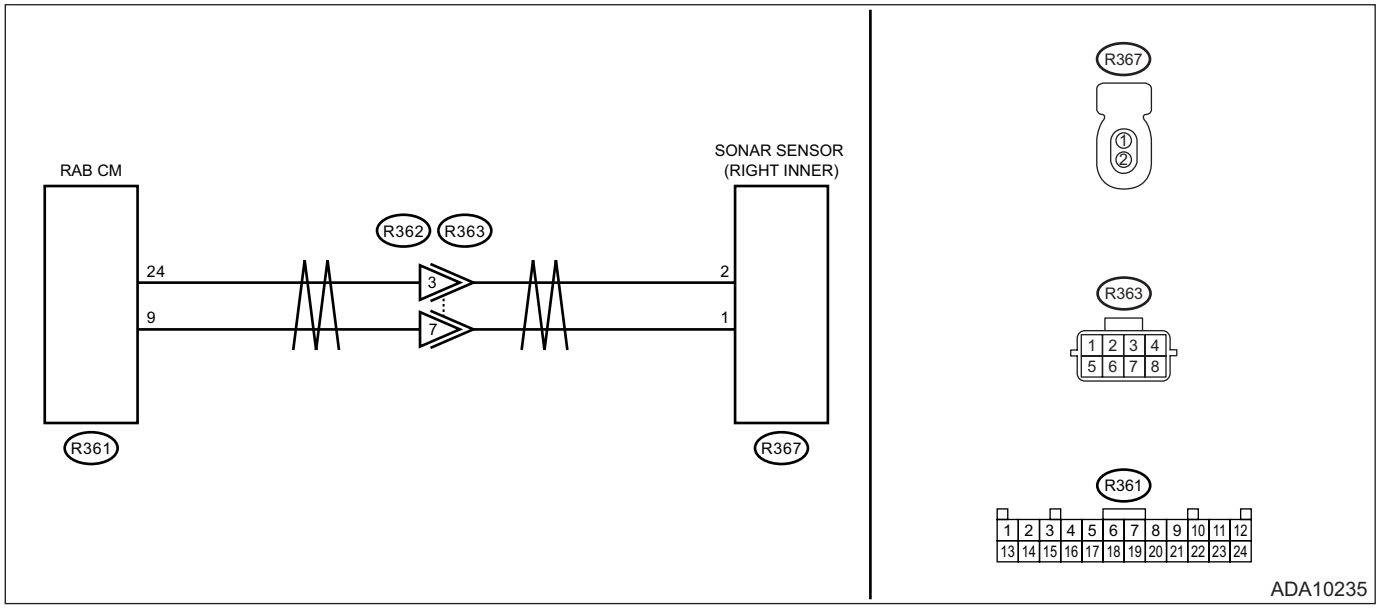
NOTE:
For the diagnostic procedure, refer to DTC B2C10. <Ref. to RAB(diag)-41, DTC B2C10 RRC SONAR HARNESS HIGH, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

X: DTC B2C17 RLC SONAR HARNESS HIGH / RLC SONAR CONTROL MODULE CIRCUIT

NOTE:
For the diagnostic procedure, refer to DTC B2C14. <Ref. to RAB(diag)-49, DTC B2C14 RLC SONAR HARNESS HIGH, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

Y: DTC B2C18 RR SONAR HARNESS HIGH / RR SONAR CONTROL MODULE CIRCUIT

NOTE:
For the diagnostic procedure, refer to DTC B2C0E. <Ref. to RAB(diag)-37, DTC B2C0E RR SONAR HARNESS HIGH, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>



Z: DTC B2C19 RL SONAR HARNESS HIGH / RL SONAR CONTROL MODULE CIRCUIT

NOTE:
For the diagnostic procedure, refer to DTC B2C12. <Ref. to RAB(diag)-45, DTC B2C12 RL SONAR HARNESS HIGH, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

AA:DTC B2C1A RRC SONAR SENSOR

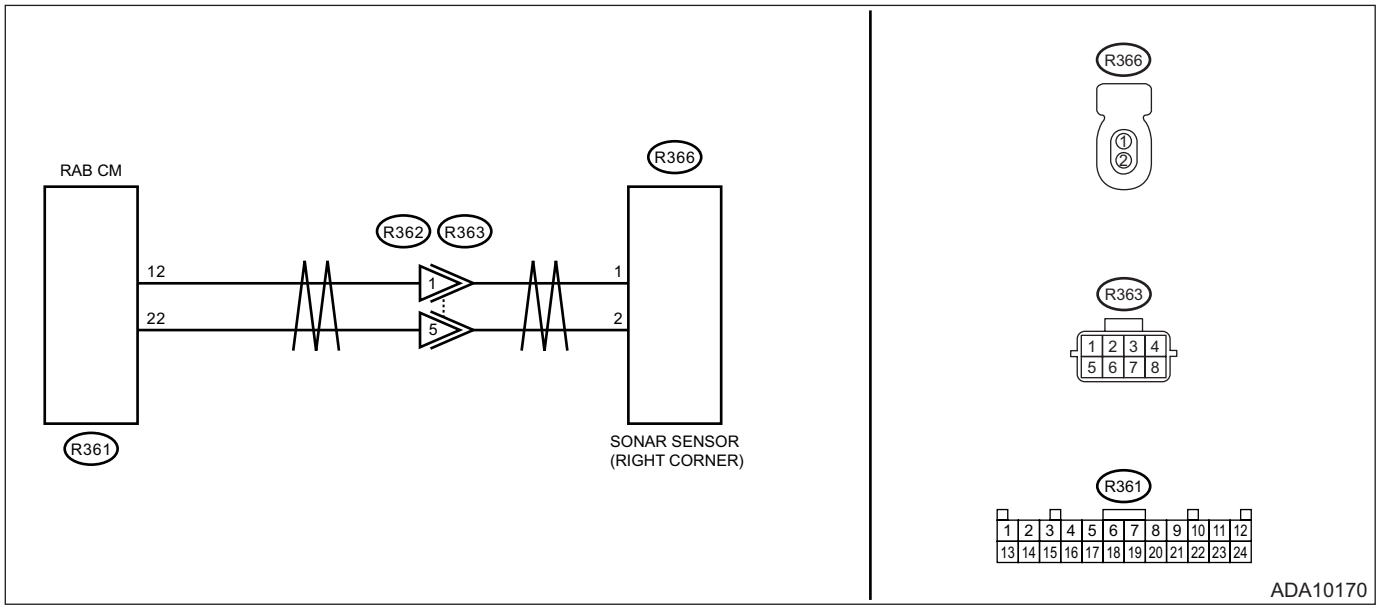
Outline of diagnosis:
Sonar sensor (right inner) is faulty.
Time needed for diagnosis:
- 600 ms (when two waves transmitted)
- 1200 ms (when four waves transmitted)

Recovery conditions:
Ignition switch OFF → ON
Wiring diagram:
Reverse Automatic Braking <Ref. to WI-329, Reverse Automatic Braking.>

	Step	Check	Yes	No
1	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (right inner) connector. 3) Connect the disconnected connectors. 4) Turn the ignition switch to ON. 5) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C1A displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**CHECK SONAR SENSOR.** 1) Switch the sonar sensor (right inner) and sonar sensor (right corner). 2) Connect the disconnected connectors. 3) Turn the ignition switch to ON. 4) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C1A displayed? (Current malfunction)	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>	Replace the sensor installed as a sonar sensor (right inner). <Ref. to RAB-7, Sensor and Harness.>

AB:DTC B2C1B RLC SONAR SENSOR

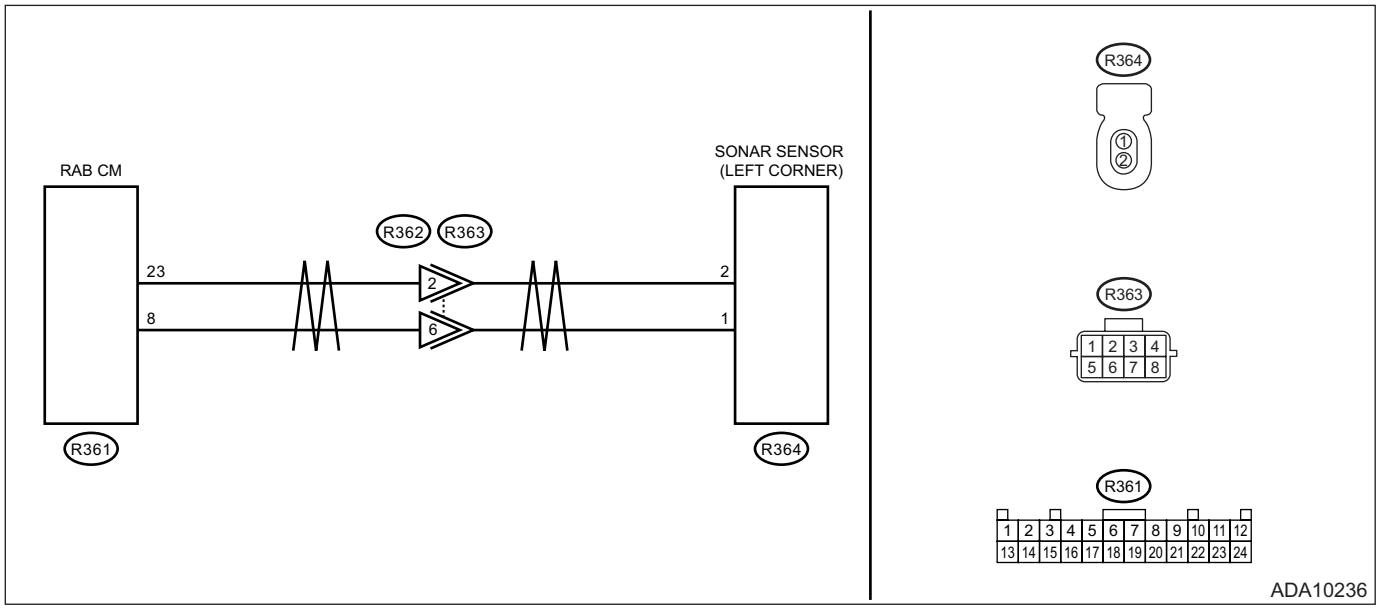
Outline of diagnosis:
Sonar sensor (left inner) is faulty.
Time needed for diagnosis:
- 600 ms (when two waves transmitted)
- 1200 ms (when four waves transmitted)



Recovery conditions:
Ignition switch OFF → ON
Wiring diagram:
Reverse Automatic Braking <Ref. to WI-329, Reverse Automatic Braking.>

Step		Check	Yes	No
1	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (left inner) connector. 3) Connect the disconnected connectors. 4) Turn the ignition switch to ON. 5) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C1B displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**CHECK SONAR SENSOR.** 1) Switch the sonar sensor (left inner) and sonar sensor (left corner). 2) Connect the disconnected connectors. 3) Turn the ignition switch to ON. 4) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C1B displayed? (Current malfunction)	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>	Replace the sensor installed as a sonar sensor (left inner). <Ref. to RAB-7, Sensor and Harness.>

AC:DTC B2C1C RR SONAR SENSOR



Outline of diagnosis:
Sonar sensor (right corner) harness is shorted to power supply.
Time needed for diagnosis:
1200 ms
Recovery conditions:
Ignition switch OFF → ON
Wiring diagram:
Reverse Automatic Braking <Ref. to WI-329, Reverse Automatic Braking.>

	Step	Check	Yes	No
1	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (right corner) connector. 3) Connect the disconnected connectors. 4) Turn the ignition switch to ON. 5) Using the Subaru Select Monitor, read DTC of «Reverse Automatic Braking». <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C1C displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**CHECK SONAR SENSOR.** 1) Switch the sonar sensor (right corner) and sonar sensor (right inner). 2) Connect the disconnected connectors. 3) Turn the ignition switch to ON. 4) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C1C displayed? (Current malfunction)	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>	Replace the sensor installed as a sonar sensor (right corner). <Ref. to RAB-7, Sensor and Harness.>

AD:DTC B2C1D RL SONAR SENSOR

Outline of diagnosis:
Sonar sensor (left corner) harness is shorted to ground.
Time needed for diagnosis:
1200 ms
Recovery conditions:
Ignition switch OFF → ON
Wiring diagram:
Reverse Automatic Braking <Ref. to WI-329, Reverse Automatic Braking.>

Step		Check	Yes	No
1	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the sonar sensor (left corner) connector. 3) Connect the disconnected connectors. 4) Turn the ignition switch to ON. 5) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C1D displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**CHECK SONAR SENSOR.** 1) Switch the sonar sensor (left corner) and sonar sensor (left inner). 2) Connect the disconnected connectors. 3) Turn the ignition switch to ON. 4) Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is DTC B2C1D displayed? (Current malfunction)	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>	Replace the sensor installed as a sonar sensor (left corner). <Ref. to RAB-7, Sensor and Harness.>

AE:DTC B2C1E RRC SONAR HARNESS LOW / RRC SONAR CONTROL MODULE CIRCUIT

NOTE:
For the diagnostic procedure, refer to DTC B2C11. <Ref. to RAB(diag)-43, DTC B2C11 RRC SONAR HARNESS LOW, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

AF:DTC B2C1F RLC SONAR HARNESS LOW / RLC SONAR CONTROL MODULE CIRCUIT

NOTE:
For the diagnostic procedure, refer to DTC B2C15. <Ref. to RAB(diag)-51, DTC B2C15 RLC SONAR HARNESS LOW, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

AG:DTC B2C20 RR SONAR HARNESS LOW / RR SONAR CONTROL MODULE CIRCUIT

NOTE:
For the diagnostic procedure, refer to DTC B2C0F. <Ref. to RAB(diag)-39, DTC B2C0F RR SONAR HARNESS LOW, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

AH:DTC B2C21 RL SONAR HARNESS LOW / RL SONAR CONTROL MODULE CIRCUIT

NOTE:
For the diagnostic procedure, refer to DTC B2C13. <Ref. to RAB(diag)-47, DTC B2C13 RL SONAR HARNESS LOW, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

AI: DTC B2C22 EyeSight SYSTEM

Outline of diagnosis:
EyeSight is faulty.
Time needed for diagnosis:
800 ms
Recovery conditions:
Ignition switch OFF → ON

NOTE:
Perform the diagnosis for EyeSight. <Ref. to ES(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AJ:DTC U0077 LIN COMMUNICATION BUS "ECM/PCM" OFF

Outline of diagnosis:
Local communication is faulty.
Time needed for diagnosis:
500 ms
Recovery conditions:
Ignition switch OFF → ON

	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC relating «Reverse Automatic Braking» using the Subaru Select Monitor. <Ref. to RAB(diag)-12, Read Diagnostic Trouble Code (DTC).>	Is a DTC other than DTC U0077 displayed? (Current malfunction)	Perform the diagnosis for DTC other than DTC U0077.	Replace the RAB CM. <Ref. to RAB-6, Reverse Automatic Braking CM.>

AK:DTC U0100 LOST COMMUNICATION WITH ECM/PCM “A”

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AL:DTC U0101 LOST COMMUNICATION WITH TCM

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AM:DTC U0122 LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AN:DTC U0128 LOST COMMUNICATION WITH PARK BRAKE CONTROL MODULE

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AO:DTC U0140 LOST COMMUNICATION WITH BODY CONTROL MODULE

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AP:DTC U0155 LOST COMMUNICATION WITH INSTRUMENT PANEL CLUSTER (IPC) CONTROL MODULE

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AQ:DTC U0156 LOST COMMUNICATION WITH INFORMATION CENTER "A"

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AR:DTC U0181 LOST COMMUNICATION WITH HEADLAMP LEVELING CONTROL MODULE

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AS:DTC U0401 INVALID DATA RECEIVED FROM ECM/PCM “A”

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AT:DTC U0402 INVALID DATA RECEIVED FROM TCM

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AU:DTC U0416 INVALID DATA RECEIVED FROM VEHICLE DYNAMICS CONTROL MODULE

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AV:DTC U0417 INVALID DATA RECEIVED FROM PARK BRAKE CONTROL MODULE

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AW:DTC U0423 INVALID DATA RECEIVED FROM INSTRUMENT PANEL CLUSTER CONTROL MODULE

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AX:DTC U0457 INVALID DATA RECEIVED FROM INFORMATION CENTER "A"

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AY:DTC U0482 INVALID DATA RECEIVED FROM HEADLAMP LEVELING CONTROL MODULE

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AZ:DTC U1235 LOST COMMUNICATION WITH EyeSight

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

BA:DTC U1433 INVALID DATA RECEIVED FROM EyeSight

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

17.Cancel Code

A: NOTE

When the cancel codes are detected from the RAB CM, the Reverse Automatic Braking will be cancelled.

B: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Reverse Automatic Braking» and then select «Enter».
5) On «Select Function» display, select «Cancel Code».

NOTE:
- For detailed operation procedures, refer to “Application help”.
- Up to three codes can be stored. When there are four or more codes, the oldest code is deleted and the newest code is stored.
- Stored codes will be cleared by Clear Memory.

C: LIST

Code	Description & trouble position	Content
0X01	+B Low Voltage	The battery power supply of RAB CM is reduced.
0X02	IGN Low Voltage	The ignition power supply of RAB CM is reduced.
0X03	RRC Sonar Noise	Sonar sensor (right inner) signal is interfered due to noise.
0X04	RLC Sonar Noise	Sonar sensor (left inner) signal is interfered due to noise.
0X05	RR Sonar Noise	Sonar sensor (right corner) signal is interfered due to noise.
0X06	RL Sonar Noise	Sonar sensor (left corner) signal is interfered due to noise.
0X07	RRC Sonar Dirty HALT I	Substance adhered to the sonar sensor (right inner).
0X08	RLC Sonar Dirty HALT I	Substance adhered to the sonar sensor (left inner).
0X09	RR Sonar Dirty HALT I	Substance adhered to the sonar sensor (right corner).
0X0A	RL Sonar Dirty HALT I	Substance adhered to the sonar sensor (left corner).
0X0B	RRC Sonar Dirty HALT II	Substance adhered to the sonar sensor (right inner).
0X0C	RLC Sonar Dirty HALT II	Substance adhered to the sonar sensor (left inner).
0X0D	RR Sonar Dirty HALT II	Substance adhered to the sonar sensor (right corner).
0X0E	RL Sonar Dirty HALT II	Substance adhered to the sonar sensor (left corner).
0X0F	RRC Sonar Mount Error	Substance adhered to the sonar sensor (right inner).
0X10	RLC Sonar Mount Error	Substance adhered to the sonar sensor (left inner).
0X11	Detect Low Level of Vehicle Height	The vehicle was tilted (ex. the rear of the vehicle was lowered) due to overload.

1. Basic Diagnostic Procedure

A: PROCEDURE

CAUTION:
• Subaru Select Monitor kit is required for reading DTC, performing diagnosis and reading current data.
• Before removal or installation, be sure to remove any foreign matter (dust, moisture, oil, etc.).
• Registration of immobilizer may be needed after the replacement of control modules, etc. For detailed procedure, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

NOTE:
• Using the Function Setting (Customize), check that the keyless access system is not in a cancelled state. <Ref. to SL-120, OPERATION, Function Setting (Customize).>
• Check List for Interview <Ref. to KPS(diag)-4, Check List for Interview.>

	Step	Check	Yes	No
1	**CHECK BATTERY.** Use a tester to measure the voltage of the battery.	Is the voltage 11 V or more?	Go to step **2**.	Charge or replace the battery and perform check pre-inspection. Go to step **2**.
2	**CHECK PRE-INSPECTION.** Use the interview check list to interview the user. <Ref. to KPS(diag)-4, Check List for Interview.>	Was the symptoms of the trouble recorded in the interview?	Go to step **3**.	Interview the user again.
3	**BASIC INSPECTION.** Perform the inspection for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **4**.	Check it according to DTC of LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>
4	**CHECK TROUBLE SYMPTOM.** 1) Read DTCs for the keyless access system. <Ref. to KPS(diag)-26, OPERATION, Read Diagnostic Trouble Code (DTC).> NOTE: If the communication function of the Subaru Select Monitor cannot be executed properly, check the communication circuit. <Ref. to KPS(diag)-22, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, Subaru Select Monitor.> 2) Record all DTCs, time stamp and freeze frame data. NOTE: For time stamp, refer to "LAN SYSTEM". <Ref. to LAN(diag)-6, TIME STAMP, CAUTION, General Description.>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs. After diagnosis, Go to step **7**.	Go to step **5**.
5	**CHECK PHENOMENON LIST.** Check the "Phenomenon List". <Ref. to KPS(diag)-112, General Diagnostic Table.>	Is there a symptom that corresponds in the phenomenon list?	Perform diagnosis according to the procedures in the phenomenon list.	Go to step **6**.

	Step	Check	Yes	No
6	**CHECK TROUBLE PHENOMENON.** 1) Perform check of current data. <Ref. to KPS(diag)-27, Read Current Data.> 2) Perform a function check. <Ref. to KPS(diag)-5, KEYLESS ACCESS WITH PUSH BUTTON START SYSTEM, CAUTION, General Description.> 3) Perform a unit check.	Was the trouble cause found?	Repair the cause of trouble.	Repeat a basic check again.
7	**PERFORM DIAGNOSIS.** 1) Perform the Clear Memory Mode. <Ref. to KPS(diag)-33, Clear Memory Mode.> 2) Perform the Inspection Mode. <Ref. to KPS(diag)-34, Inspection Mode.>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs.	Finish the diagnosis.

2. Check List for Interview

A: CHECK

Inspect the following items regarding the vehicle's state.

<table>
<tr><td colspan="4">Keyless Access with Push Button Start System Trouble Check List for Interview
Received Year Month Date</td></tr>
<tr><td colspan="2" rowspan="2">Customer's name</td><td>Registration No.</td><td>Initial year of registration
Year Month Date</td></tr>

( )</td></tr>
</table>

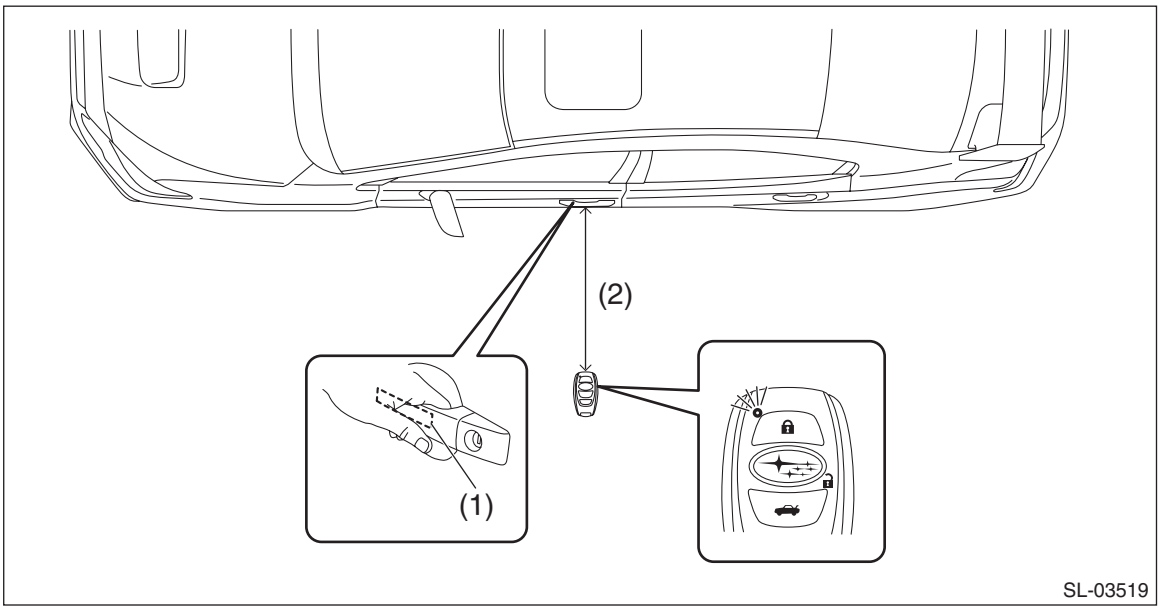
NOTE:
- Perform the diagnostics according to the basic diagnostic procedure.
- If the room light or map light does not illuminate and the keyless access does not function at the same time, the back-up fuse may be loose or blown.

3. General Description

A: CAUTION

1. SRS AIRBAG SYSTEM

The airbag system wiring harness is routed near the keyless access with push button start system.



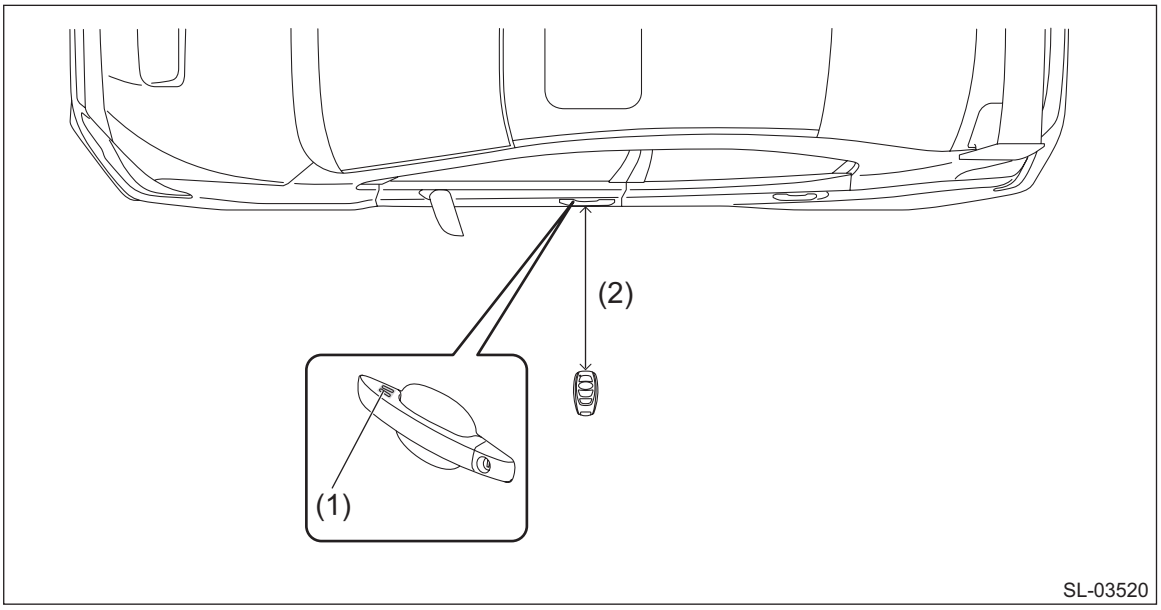
CAUTION:
- **Do not use electrical test equipment on any wiring harnesses and connectors in the airbag system.**
- **Be careful not to damage the wiring harness of the airbag system when servicing the keyless access with push button start system.**

2. KEYLESS ACCESS WITH PUSH BUTTON START SYSTEM

NOTE:
- Using the function setting (ECM customizing), check that the keyless access system is not OFF. <Ref. to SL-120, OPERATION, Function Setting (Customize).>
- The dark current is approx. 400 mA if there is communication between the vehicle and access key.
- The dark current is approx. 40 mA if there is no communication between the vehicle and access key.*

* No communication with the vehicle means that the keyless access function has been cancelled or that the access key has not been near the vehicle for 15 minutes or more after door locking.

1) Keyless access door unlock function check



(1) Touch sensor (unlock) (2) 40 — 80 cm

(1) When carrying the access key with all doors locked by keyless lock operation, check that when the touch sensor (unlock) built in to the back side surface of door outer handle of front door is touched, the driver's door will unlock (when touched on the driver's side) or all doors will unlock (when touched on the passenger's side) and the answer-back function operates (hazard light blinks twice, access buzzer sounds twice).

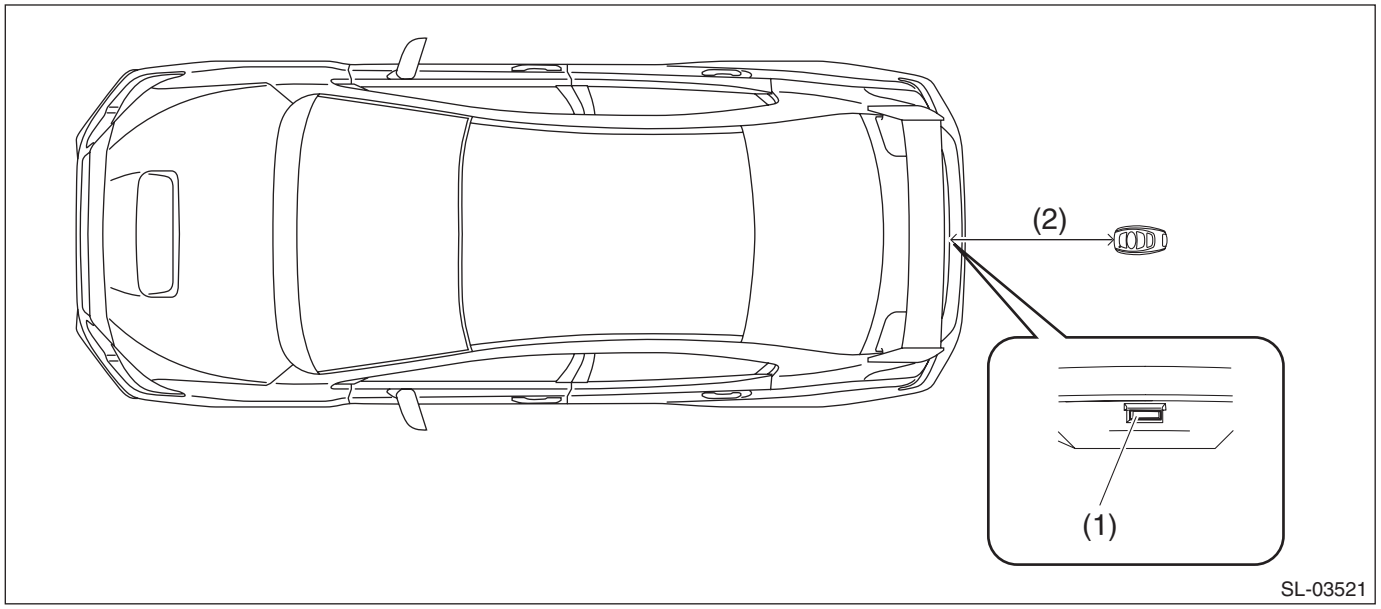
(2) In the keyless access door unlock detection area, hold the access key at the same height as the outer handle (approx. 80 cm from the ground) and in the direction shown in the figure, and check that the vehicle becomes unlock mode [access key LED (red) blinks] at 40 to 80 cm from the vehicle.

NOTE:
Check the access key battery if the LED (red) does not illuminates when the access key button is pressed. <Ref. to SL-87, INSPECTION, Access Key.>

2) Check keyless access door lock function

(1) Touch sensor (lock) (2) Approx. 30 cm

(1) When carrying the access key outside of the vehicle with all doors closed and unlocked, check that when the touch sensor (lock) on the surface of door outer handle of front door is touched, all doors will lock and the answer-back function operates (hazard light blinks once, access buzzer sounds once).

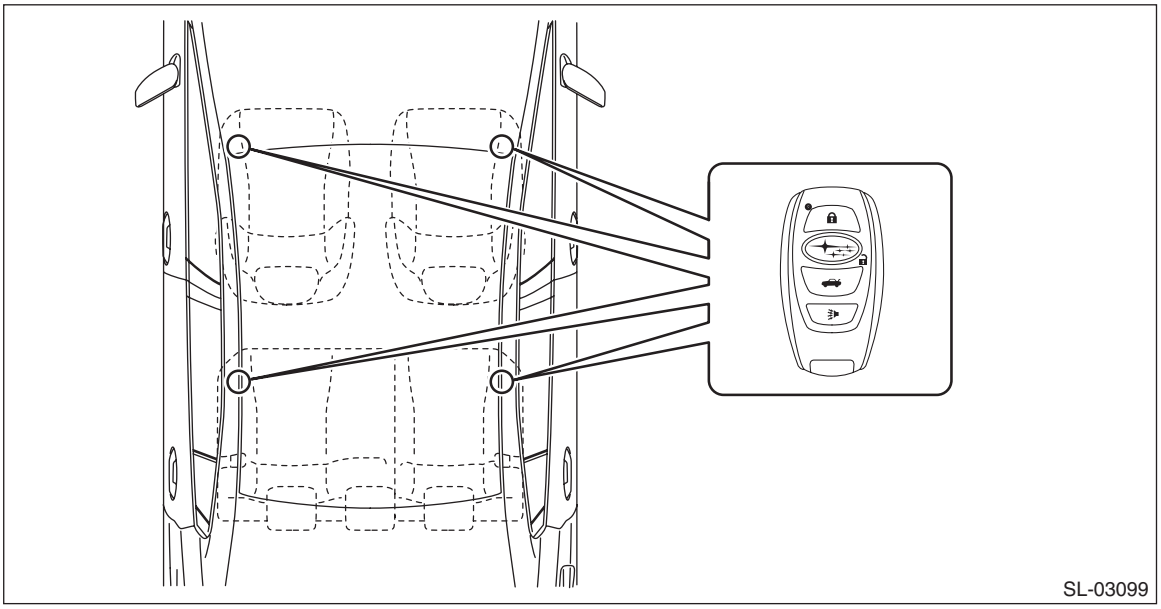


CAUTION:
If the access key is within the vehicle but not within the detection area (in the instrument panel, on the rear tray, in the glove box, on the floor, or in the door trim pocket), then lockout protection will not function when the doors are locked and the access key will be locked into the vehicle.

(2) To check the keyless access door lock operation range, hold the access key at a height of 10 cm under the bottom edge of the door glass (approx. 80 cm from the ground), point it in the direction shown in the figure at a distance of approx. 30 cm from the vehicle, and check that all doors lock and the answer-back function operates (hazard light blinks once, access buzzer sounds once) when you touch the touch sensor (lock).

(3) Check the passenger's side door in the same manner.

NOTE:
- When the door cannot lock if the touch sensor (lock) is touched, touch the touch sensor (lock) with palm.
- Since communication is not possible within close range (20 cm or less) of the door outer handle, the access key may not operate if you touch the touch sensor (lock) with the same hand you are holding the access key.
- If the lockout prevention buzzer sounds, it is possible that the interior transmitter has radio wave leakage.



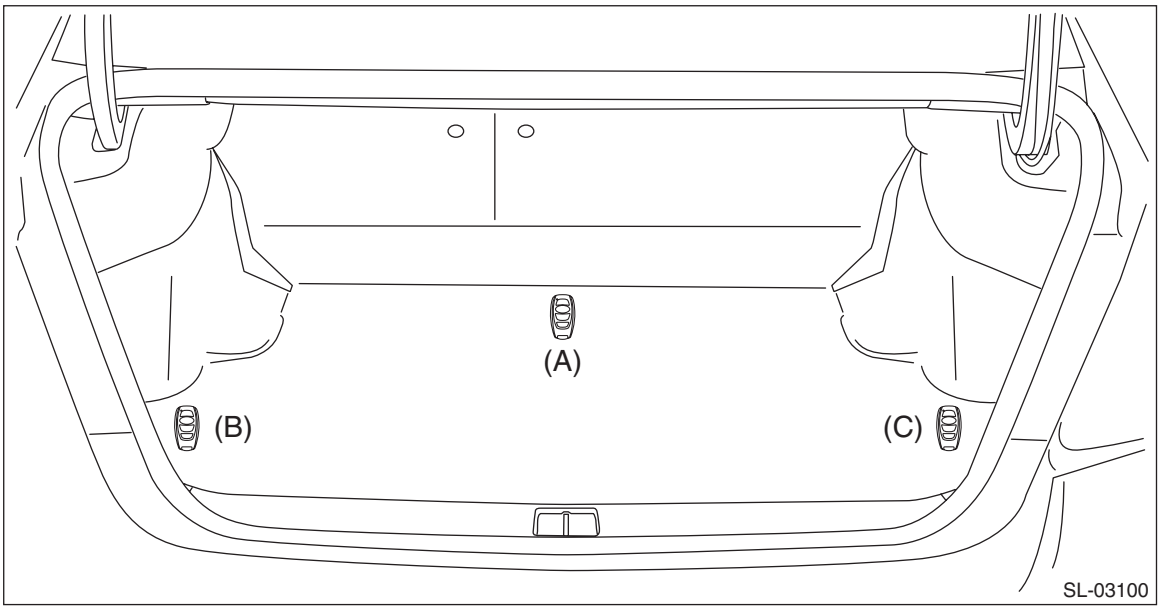
3) Check of the keyless access trunk open function

(1) Trunk opener button (2) 40 — 80 cm

(1) With the trunk closed, check that the trunk opens and the answer-back function operates (hazard light blinks twice, access buzzer sounds twice) when you press the trunk opener button while carrying the access key.
(2) To check the keyless access trunk open operation range, hold the access key behind and in the center of the vehicle at the same height as the trunk opener button (90 cm from the ground), point it in the direction shown in the figure at a distance of 40 to 80 cm from the vehicle, and check that the trunk opens and the answer-back function operates (hazard light blinks twice, access buzzer sounds twice) when the trunk opener button is pressed.

4) Check of the keyless access ignition switching function
(1) With the ignition OFF, enter the vehicle while carrying the access key. Depress the brake pedal with the shift lever in the “P” range (CVT model) or depress the clutch pedal (MT model), check that the push button ignition switch indicator is illuminated in green, and check that the engine starts when you press the push button ignition switch.
(2) While carrying the access key, check that the status changes as follows each time you press the push button ignition switch without depressing the brake pedal (CVT model) or clutch pedal (MT model): ‘Ignition OFF’ → ‘ACC ON’ → ‘Ignition ON’ → ‘Ignition OFF’. However on the CVT model, if the shift lever is in other than the “P” range and the push button ignition switch is pressed from ignition ON, then the status will not change to ignition OFF and instead will change to ACC ON.
(3) After the vehicle has stopped, press the push button ignition switch and ignition is turned OFF (engine stopped · all power supplies OFF). However on the CVT model, if the shift lever is in other than the “P” range and the push button ignition switch is pressed with the vehicle stopped, then the power supply will not change to ignition OFF and instead will change to ACC ON. Check that the steering lock operates if the door is opened in the ignition OFF state. (For CVT model, the shift must be in the “P” range).
(4) To check the range of the keyless access ignition operation, check that the engine can start when you set the access key at the check position on the seat in the direction indicated in the figure.

CAUTION:
The access key may not be correctly detected even though it is within the detection area within the passenger room, if it is on the instrument panel, on the rear tray, in the glove box, on the floor, or in the door trim pocket.



NOTE:
Perform the check multiple times, once each with the access key positioned on the driver’s seat, on the passenger’s seat, and on the rear seat in 2 locations.

5) Lockout protection function check with the access key in the trunk

CAUTION:
Open one of the windows before performing this check in order to prevent the key from being locked inside the vehicle.

(1) With all doors closed and locked, and with the access key in the trunk room and the trunk closed, check that the access buzzer sounds (approx. 2 seconds). Also check that the trunk opens when you press the trunk opener button.

(2) To check the detection range of the lockout protection function with the access key in the trunk, position the access key in the direction shown in the figure, and check that the lockout protection function operates normally when you check the lockout protection function for the access key locked in the trunk.

CAUTION:
The lockout protection function will not operate if the access key is any of the locations described below.

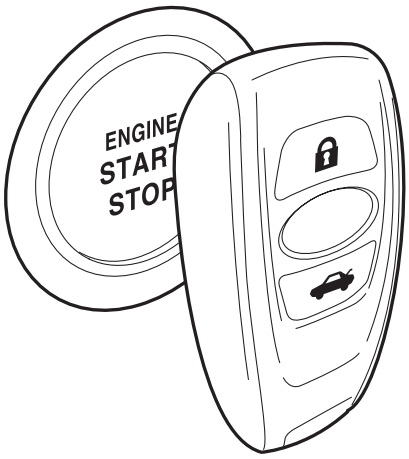
- Near the spare tire or on the edge of the trunk room.
- Inside a bag made of metallic material or near metal objects.

NOTE:
Check the trunk in two locations or more.

6) Lockout protection function check (in the passenger room)

CAUTION:
Open one of the windows before performing this check in order to prevent the key from being locked inside the vehicle.

(1) Position the access key on the driver's or passenger's seat.



(2) Close all doors. (with all doors unlocked)

(3) Check that the doors do not lock and the lockout protection buzzer (exterior) sounds for 2 seconds when you touch the touch sensor (lock) of either the driver's or passenger's door.

7) Check of the keyless access cancel function

(1) After setting the keyless access cancel function, check that all keyless access and start system (keyless access) functions are inoperable. (For cancel setting, refer to <Ref. to SL-120, OPERATION, Function Setting (Customize).>)

NOTE:
When keyless access is cancelled, door lock and unlock can be operated by access key button operation and the starter system can be operated by passing the access key over the push button ignition switch with the access key button toward you.

SL-03328

8) Access key diagnostic mode
(1) Connect to the Subaru Select Monitor, and select «Diagnosis» on the «Start» display.
(2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
(3) On «Main Menu» display, select «Each System».
(4) On «Select System» display, select «Keyless Access with Push Button Start» and then select «Enter».
(5) On «Select Function» display, select «Work Support».
(6) On «Work Support» display, select «Keyless access system check».
(7) Select the transmitter to check from the items.
(8) Check that the door lock buzzer sounds (short blips, a continuous beeping sound for the center room antenna) when the access key is near the selected transmitter or antenna.

B: PREPARATION TOOL

1. SPECIAL TOOL

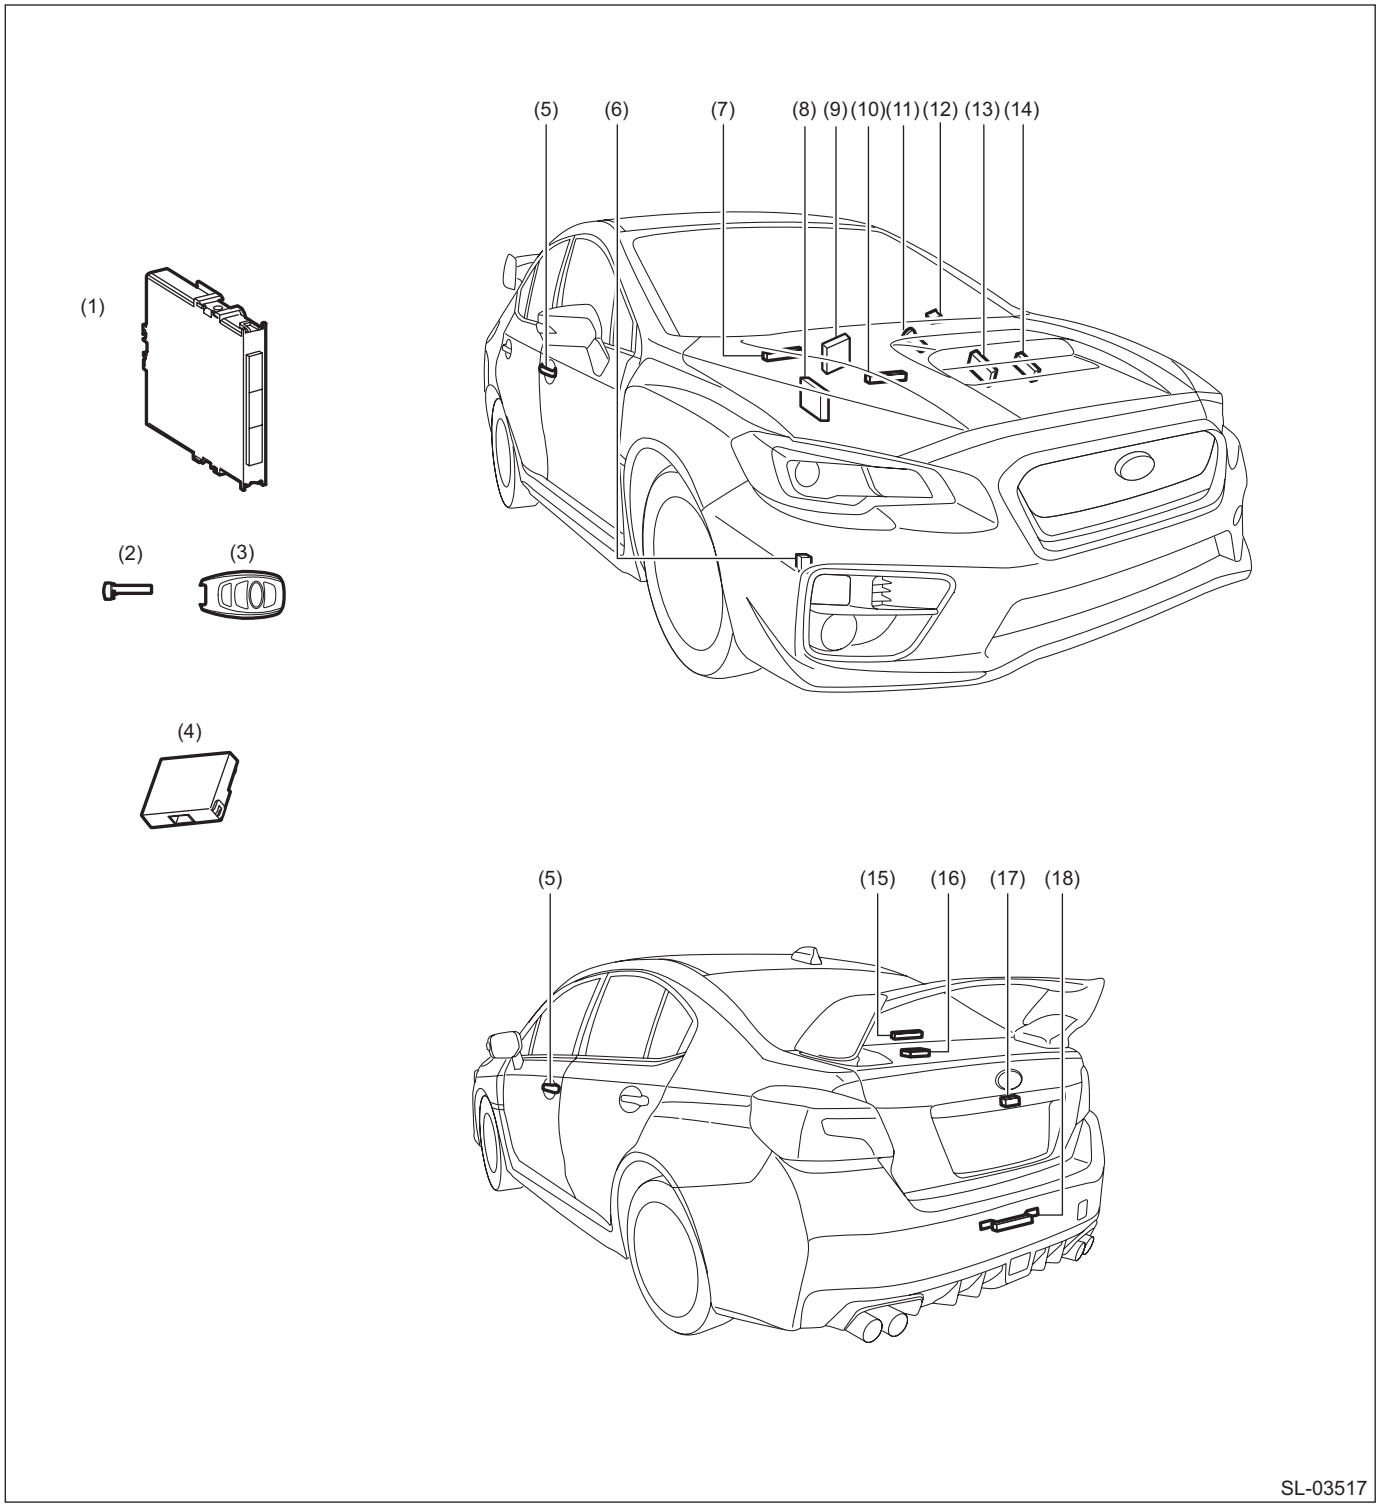


ILLUSTRATION	TOOL NUMBER	DESCRIPTION	REMARKS
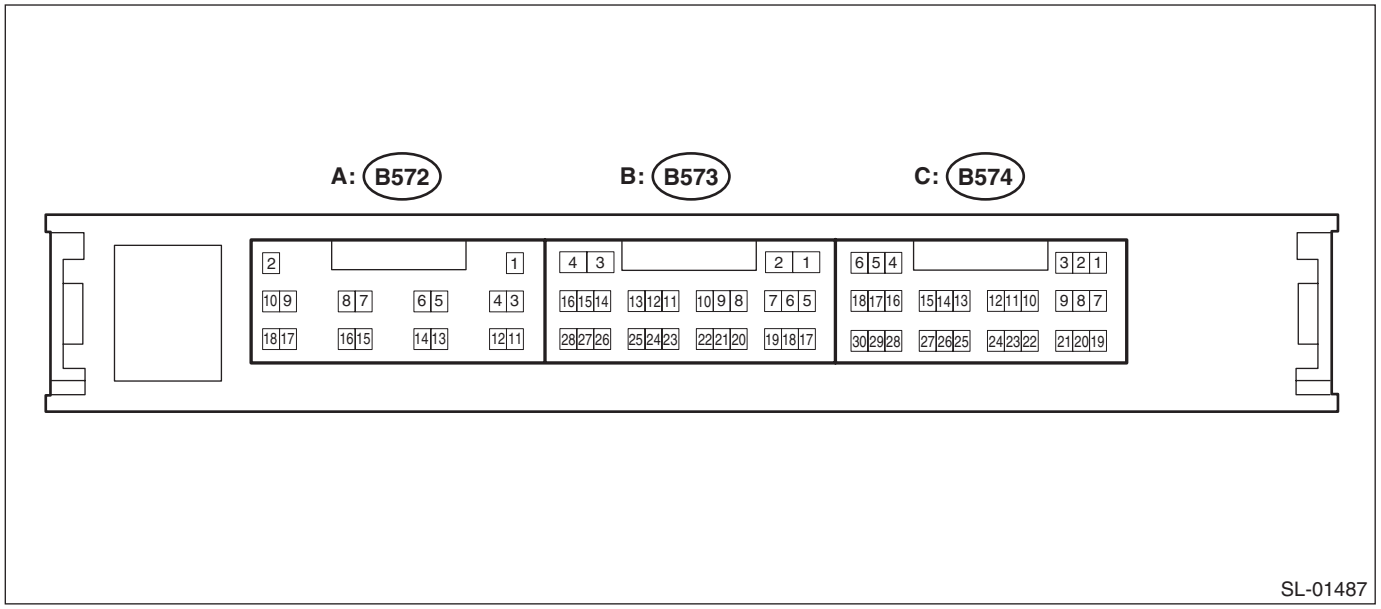
 STSSM4	—	SUBARU SELECT MONITOR 4	Used for setting of each function and trouble-shooting for electrical system. NOTE: For detailed operation procedures of Subaru Select Monitor 4, refer to “Application help”.

2. GENERAL TOOL

TOOL NAME	REMARKS
Circuit tester	Used for measuring resistance, voltage and current.
DST-i	Used together with Subaru Select Monitor 4.
Oscilloscope	Used for measuring the waveform.

4. Electrical Component Location

A: LOCATION



(1) Keyless access CM
(2) Mechanical key
(3) Access key
(4) ID code box
(For C0 model only)
(5) Front outer handle (front exterior antenna)
– Touch sensor (lock)
– Touch sensor (unlock)
(6) Access buzzer
(7) Center interior antenna
(8) ECM
(Engine type FA)
(9) ECM
(Engine type EJ)
(10) Front interior antenna
(11) Push button ignition switch
(12) Steering lock CM
(13) TCM
(14) Body integrated unit
(15) Rear interior antenna
(16) Receiver
(17) Trunk opener button
(18) Rear exterior antenna

5. Control Module I/O Signal

A: ELECTRICAL SPECIFICATION

1. KEYLESS ACCESS CM

Terminal No.	Terminal symbol	Contents
(B572) No. 2	+B	+B
(B572) No. 3	INDS	Start switch indicator (green) output

Disconnect the control module connector (B572) before checking the following items.

NOTE:
If the measured value is out of standard, it is possible that the vehicle has a fault.

Terminal No.	Item	Measuring condition	Standard
(B572) No. 2 (+B) ←→ (B572) No. 11 (GND)	Voltage	Always	9.5 — 16 V
(B572) No. 11 (GND) ←→ Chassis ground	Resistance	Always	Less than 1 Ω
(B574) No. 5 (IG) ←→ Chassis ground	Voltage	ACC ON → IG ON	1 V or less → 9 — 14 V

Disconnect the control module connector (B573) before checking the following items.

NOTE:
If the measured value is out of standard, it is possible that the vehicle has a fault.

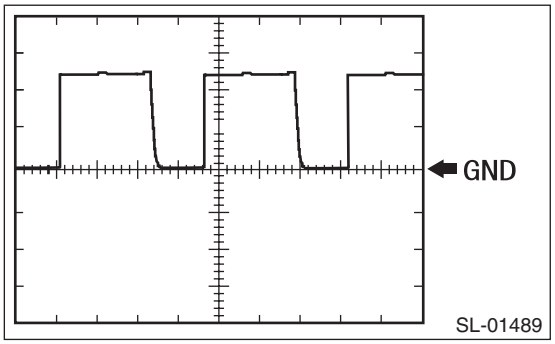
Terminal No.	Item	Measuring condition	Standard
(B573) No. 15 (IDW) ←→ Chassis ground (For C0 model only)	Continuity	Always	Continuity exists

Disconnect the control module connectors (B574) and (B572) before checking the following items.

NOTE:
If the measured value is out of standard, it is possible that the vehicle has a fault.

Terminal No.	Item	Measuring condition	Standard
(B574) No. 4 (ACCD) ←→ Chassis ground	Resistance	Always (20°C)	152.61 — 216.5 Ω
(B572) No. 9 (IG2D) ←→ Chassis ground	Resistance	Always (20°C)	74.15 — 460.88 Ω
(B574) No. 6 (IG1D) ←→ Chassis ground	Resistance	Always (20°C)	50.87 — 72.17 Ω
(B572) No. 18 (STP1) ←→ Chassis ground (CVT model)	Voltage	Brake pedal depressed → released	11 — 14 V → 1 V or less
(B574) No. 25 (P) ←→ Chassis ground (CVT model)	Resistance	Except for shift positions P → Shift position P	40 kΩ or more → 200 Ω or less
(B574) No. 27 (SPD) ←→ Chassis ground	Resistance	Always	30 kΩ or more
(B574) No. 28 (SSW1) ←→ Chassis ground	Resistance	Push button ignition switch pressed → released	Less than 1 Ω → 10 kΩ or more
(B574) No. 29 (SLR+) ←→ Chassis ground	Resistance	Always	10 kΩ or more
(B574) No. 30 (SSW2) ←→ Chassis ground	Resistance	Push button ignition switch pressed → released	Less than 1 Ω → 10 kΩ or more
(B574) No. 17 (LIN) ←→ Chassis ground	Continuity	Always	Continuity does not exist
(B574) No. 14 (CANH) ←→ Chassis ground	Pulse	ACC ON or IGN ON	Pulse generation
(B574) No. 15 (CANL) ←→ Chassis ground	Pulse	ACC ON or IGN ON	Pulse generation

Connect the control module connector before checking the following items.



NOTE:
If the measured value is out of standard, it is possible that the keyless access CM has a fault.

Terminal No.	Item	Measuring condition	Standard
(B574) No. 1 (VC5) ←→ (B574) No. 24 (AGND)	Voltage	30 seconds or more have passed after the door was opened or closed with IG OFF and without depressing the brake pedal (CVT model) or clutch pedal (MT model).	1 V or less
	Waveform	Within 30 seconds after the push button ignition switch is pressed with IG OFF and access key not in the passenger room	Waveform 1
(B574) No. 2 (CG5B) ←→ (B572) No. 11 (GND)	Pulse	All doors closed, ACC and IG OFF, access key not in passenger room, touch sensor (lock) OFF → ON	No pulse output → Pulse output detected
(B574) No. 3 (CLG5) ←→ (B572) No. 11 (GND)	Pulse	All doors closed, ACC and IG OFF, access key not in passenger room, touch sensor (lock) OFF → ON	No pulse output → Pulse output detected
(B574) No. 4 (ACCD) ←→ (B572) No. 11 (GND)	Voltage	IG OFF → ACC ON	1 V or less → 9 — 14 V
(B574) No. 6 (IG1D) ←→ (B572) No. 11 (GND)	Voltage	ACC ON → IG ON	1 V or less → 9 — 14 V
(B574) No. 7 (CODE) ←→ (B574) No. 24 (AGND)	Voltage	30 seconds or more have passed after the door was opened or closed with IG OFF and without depressing the brake pedal (CVT model) or clutch pedal (MT model).	1 V or less
	Waveform	Turn the ignition switch to OFF and with the access key near the push button ignition switch, press the push button ignition switch*1	Waveform 2
(B574) No. 9 (TXCT) ←→ (B574) No. 24 (AGND)	Voltage	30 seconds or more have passed after the door was opened or closed with IG OFF and without depressing the brake pedal (CVT model) or clutch pedal (MT model).	1 V or less
	Waveform	Turn the ignition switch to OFF and with the access key near the push button ignition switch, press the push button ignition switch*1	Waveform 3
(B574) No. 10 (CG2B) ←→ (B572) No. 11 (GND)	Pulse	ACC and IG OFF, all doors closed, all doors locked by lock operation with wireless remote control, access key not in passenger room	No pulse output → Pulse output detected

Terminal No.	Item	Measuring condition	Standard
(B574) No. 11 (CLG2) ←→ (B572) No. 11 (GND)	Pulse	ACC and IG OFF, all doors closed, all doors locked by lock operation with wireless remote control, access key not in passenger room	No pulse output → Pulse output detected
(B574) No. 12 (CLG1) ←→ (B572) No. 11 (GND)	Pulse	ACC and IG OFF, all doors closed, all doors locked by lock operation with wireless remote control, access key not in passenger room	No pulse output → Pulse output detected
(B573) No. 10 (CG6B) ←→ (B572) No. 11 (GND)	Pulse	ACC and IG OFF, all doors closed, all doors locked by lock operation with wireless remote control, access key not in passenger room	No pulse output → Pulse output detected
(B573) No. 11 (CLG6) ←→ (B572) No. 11 (GND)	Pulse	ACC and IG OFF, all doors closed, all doors locked by lock operation with wireless remote control, access key not in passenger room	No pulse output → Pulse output detected
(B574) No. 13 (CG1B) ←→ (B572) No. 11 (GND)	Pulse	ACC and IG OFF, all doors closed, all doors locked by lock operation with wireless remote control, access key not in passenger room	No pulse output → Pulse output detected
(B574) No. 19 (POS1) ←→ (B572) No. 11 (GND)	Voltage	ACC and IG OFF, access key carried, driver's seat touch sensor OFF → ON	9 — 14 V → less than 2 V
(B574) No. 21 (POS2) ←→ (B572) No. 11 (GND)	Voltage	ACC and IG OFF, access key carried, passenger's seat touch sensor OFF → ON	9 — 14 V → less than 2 V
(B574) No. 24 (AGND) ←→ Chassis ground	Resistance	Always	Less than 1 Ω
(B574) No. 25 (P) ←→ (B572) No. 11 (GND) (CVT model)	Voltage	Except for shift positions P → Shift position P	9 — 14 V or more → 1.5 V or less
(B574) No. 26 (SLP) ←→ (B572) No. 11 (GND)	Voltage	With ignition switch OFF and shift position P, Steering lock → Steering unlock	11 — 14 V → 1.2 V or less
(B574) No. 27 (SPD) ←→ Chassis ground	Pulse	Driving at approx. 5 km/h (3 MPH)	Pulse generation according to vehicle speed (approx. 5 km/h (3 MPH): 3.54 Hz)
(B574) No. 28 (SSW1) ←→ (B572) No. 11 (GND)	Voltage	Push button ignition switch released → pressed	11 — 14 V → 1 V or less
(B574) No. 29 (SLR+) ←→ (B572) No. 11 (GND)	Voltage	When the following conditions are met, the doors are closed → opened, and steering lock motor is driven • Steering lock is unlocked • IG OFF • Shift position P	11 — 14 V (Steering lock motor is stopped) → 1 V or less (Steering lock motor is driven)
(B574) No. 30 (SSW2) ←→ (B572) No. 11 (GND)	Voltage	Push button ignition switch released → pressed	11 — 14 V → 1 V or less
(B573) No. 1 (CG8B) ←→ (B572) No. 11 (GND)	Pulse	ACC and IG OFF, all doors closed, all doors locked, trunk opener button OFF → ON	No pulse output → Pulse output detected

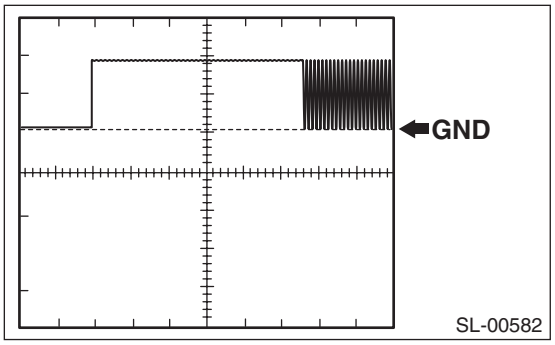
(B573) No. 17 (RDA) ←→ (B572) No. 11 (GND)	Pulse	All doors closed, all doors locked, access key is locked or unlock switch OFF → ON	2 V or less → 11 — 14 V → 2 V or less
(B572) No. 7 (STSW) ←→ (B572) No. 11 (GND)	Voltage	While depressing the brake pedal with the shift lever in position P or N and with the access key inside the vehicle (AT model), or while depressing the clutch pedal (MT model), press the push button ignition switch. (Engine start)	Less than 2 V → 9 V or more
(B572) No. 3 (INDS) ←→ (B572) No. 11 (GND)	Voltage	Depress the brake pedal (CVT model) or clutch pedal (MT model).	9 V or more
(B574) No. 18 (INDW) ←→ (B572) No. 11 (GND)	Voltage	ACC ON or IG ON, and brake pedal (CVT model) or clutch pedal (MT model) is not depressed.	9 V or more

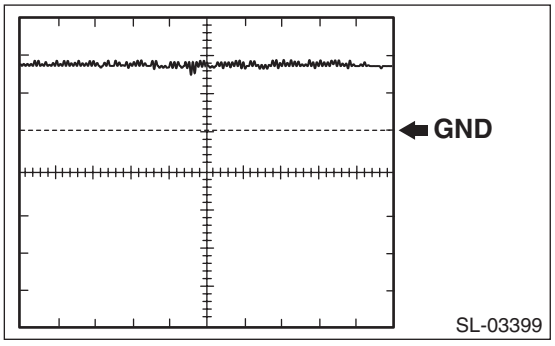
NOTE:
*1: Remove the access key battery before checking.
1. Waveform 1

Item	Contents
Measured terminal	(B574) No. 1 (VC5) ←→ (B574) No. 24 (AGND)
Equipment setting	2 V/DIV, 200 ms/DIV
Measuring condition	Within 30 seconds after the push button ignition switch is pressed with IG OFF and access key not in the passenger room



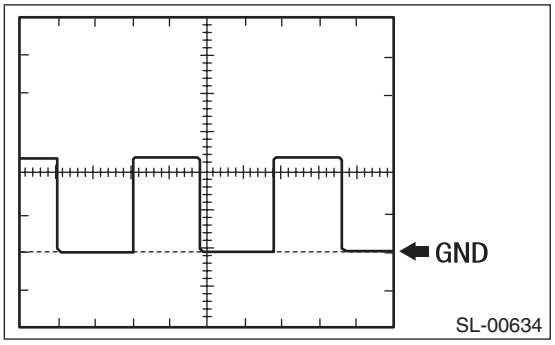
2. Waveform 2

Item	Contents
Measured terminal	(B574) No. 7 (CODE) ←→ (B574) No. 24 (AGND)
Equipment setting	2 V/DIV, 20 ms/DIV
Measuring condition	Turn the ignition switch to OFF and with the access key near the push button ignition switch, press the push button ignition switch. *1



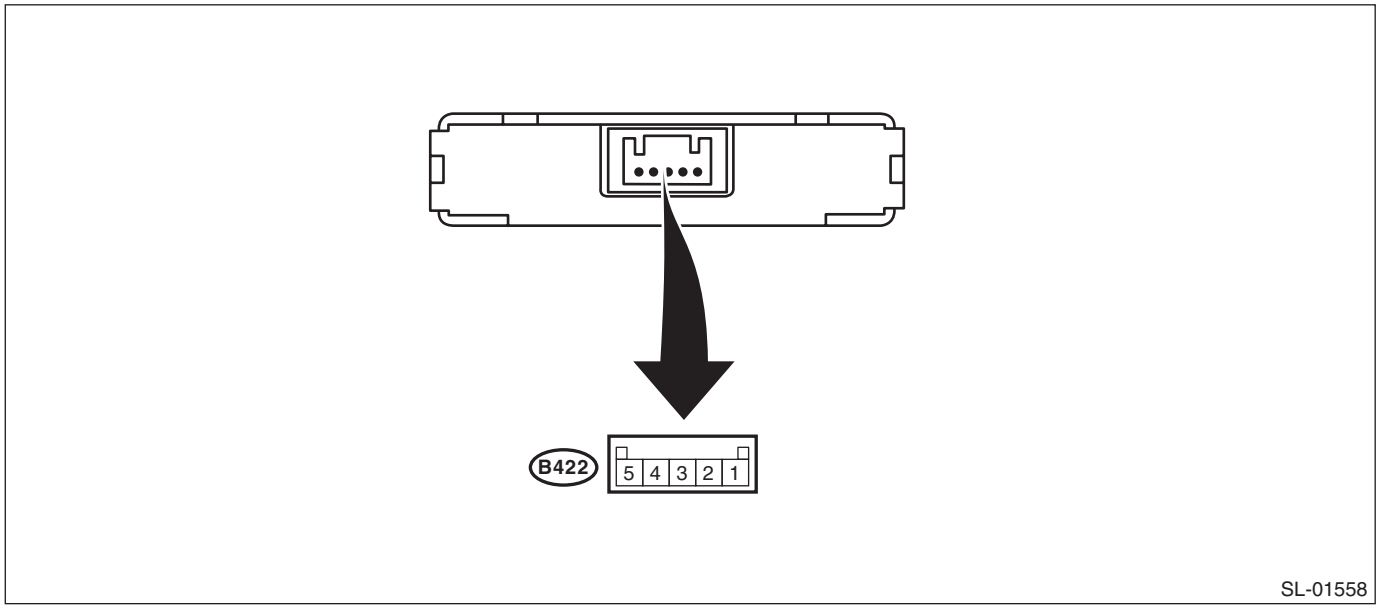
NOTE:
*1: Remove the access key battery before checking.

3. Waveform 3



Item	Contents
Measured terminal	(B574) No. 9 (TXCT) ←→ (B574) No. 24 (AGND)
Equipment setting	2 V/DIV, 20 ms/DIV
Measuring condition	Within 30 seconds after the push button ignition switch is pressed with IG OFF and access key not in the passenger room

4. Waveform 4



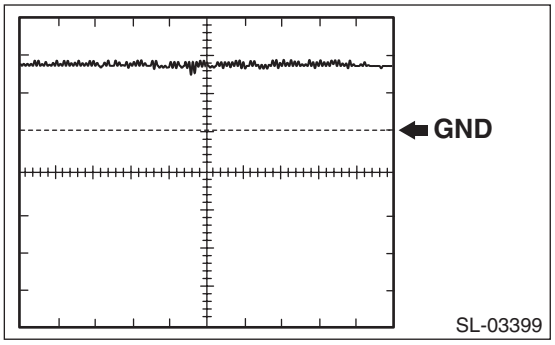
Item	Contents
Measured terminal	(B572) No. 13 (EGIO) ←→ (B572) No. 11 (GND)
Equipment setting	5 V/DIV, 100 ms/DIV
Measuring condition	Ignition ON

5. Waveform 5

Item	Contents
Measured terminal	(B572) No. 17 (TACH) ←→ Chassis ground
Equipment setting	5 V/DIV, 100 ms/DIV
Measuring condition	While engine idling

2. ID CODE BOX

Terminal No.	Terminal symbol	Contents
(B422) No. 1	+B	+B
(B422) No. 2	LIN	LIN communication
(B422) No. 4	IMO1	Immobilizer communication 1
(B422) No. 5	GND	GND



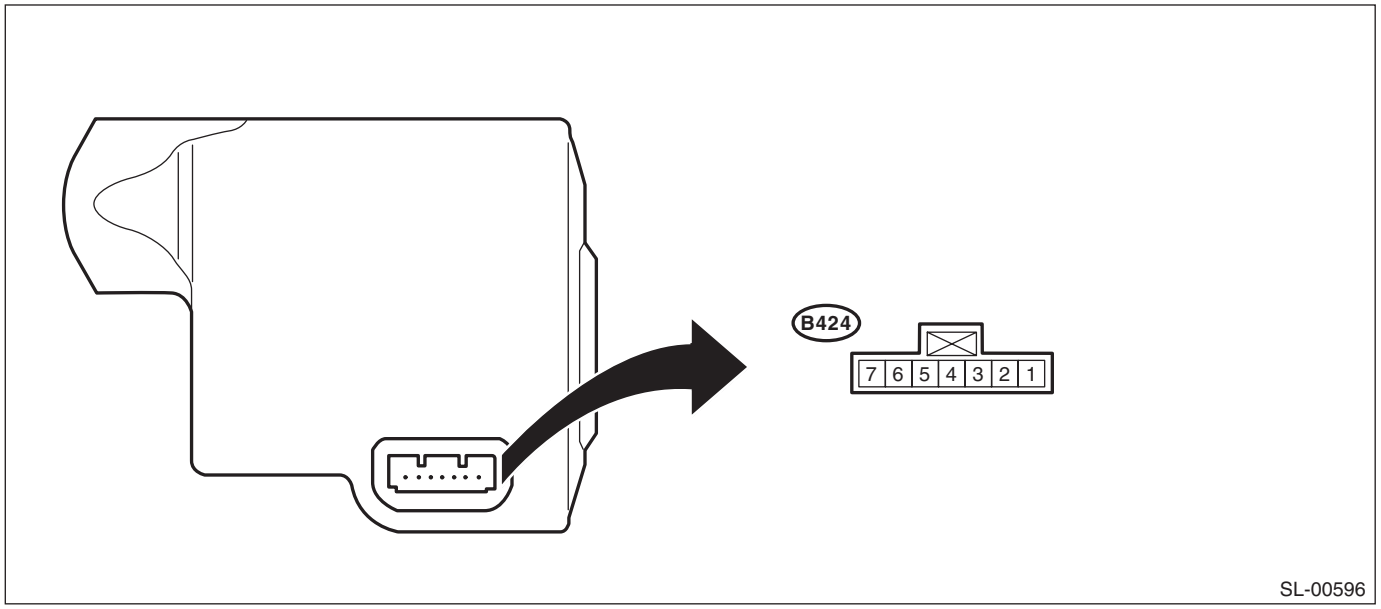
NOTE:
Disconnect the control module connector before checking the following items.

Terminal No.	Standard	Measuring condition	Item
1 (+B) ←→ 5 (GND)	10 — 14 V	Always	Voltage
4 (IMO1) ←→ 5 (GND)	0 V	Ignition OFF	Voltage
5 (GND) ←→ Chassis ground	Continuity exists	Always	Continuity

NOTE:
Connect the control module connector before checking the following items.

Terminal No.	Standard	Measuring condition	Item
4 (IMO1) ←→ 5 (GND)	0 V	Ignition OFF	Voltage
4 (IMO1) ←→ 5 (GND)	Waveform 1	Ignition ON	Voltage

Waveform 1



Item	Contents
Measured terminal	4 (IMO1) ←→ 5 (GND)
Equipment setting	5 V/DIV, 100 ms/DIV
Measuring condition	Ignition ON

3. BODY INTEGRATED UNIT

Refer to the BODY CONTROL SYSTEM (DIAGNOSTICS) for the I/O Signal of the body integrated unit. <Ref. to BC(diag)-6, ELECTRICAL SPECIFICATION, Control Module I/O Signal.>

4. STEERING LOCK CM

Terminal No.	Terminal symbol	Contents
(B424) No. 1	GND	GND
(B424) No. 3	SLR+	Steering lock motor drive power supply
(B424) No. 4	SLP	Unlock position output
(B424) No. 5	LIN	LIN communication
(B424) No. 6	IG2	IGN power supply
(B424) No. 7	B	+B

NOTE:
Perform the following check from the back side of the connector, with the connector of the control module connected.
If the measured value is out of standard, it is possible that the vehicle has a fault.

Terminal No.	Standard	Measuring condition	Item
1 (GND) ←→ Chassis ground	Continuity exists	Always	Continuity
—	—	—	—
3 (SLR+) ←→ Chassis ground	10 — 14 V → 1 V or less	Motor not operating → Motor operating	Voltage
4 (SLP) ←→ Chassis ground	10 — 14 V → 1 V or less	Lock → Unlock	Voltage
5 (LIN)	Input/output signal	—	—
6 (IG2) ←→ Chassis ground	10 — 14 V	Ignition ON	Voltage
7 (B) ←→ Chassis ground	10 — 14 V	Always	Voltage

B: WIRING DIAGRAM

Refer to “Keyless Access System” in the wiring diagram. <Ref. to WI-255, WIRING DIAGRAM, Keyless Access System.>

6. Subaru Select Monitor

A: OPERATION

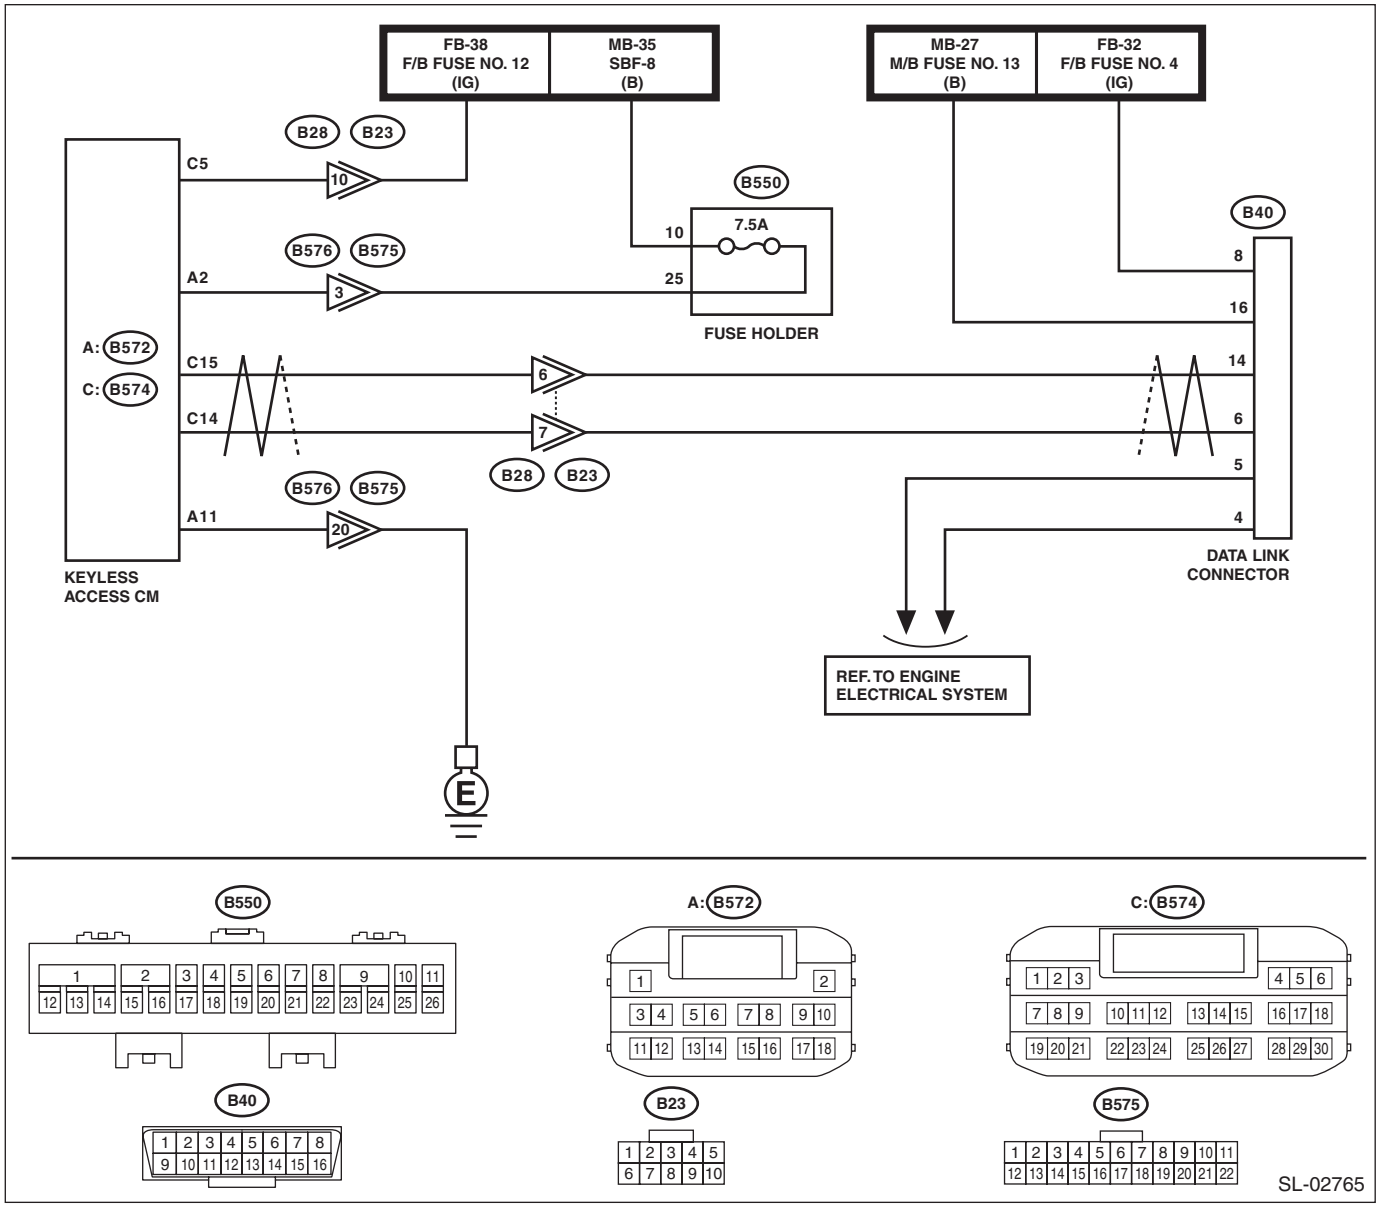
For detailed operation procedures, refer to “Application help”.

B: COMMUNICATION FOR INITIALIZING IMPOSSIBLE

NOTE:
Confirm that the LAN system is working properly before the diagnosis.
Subaru Select Monitor communication line is open or shorted.

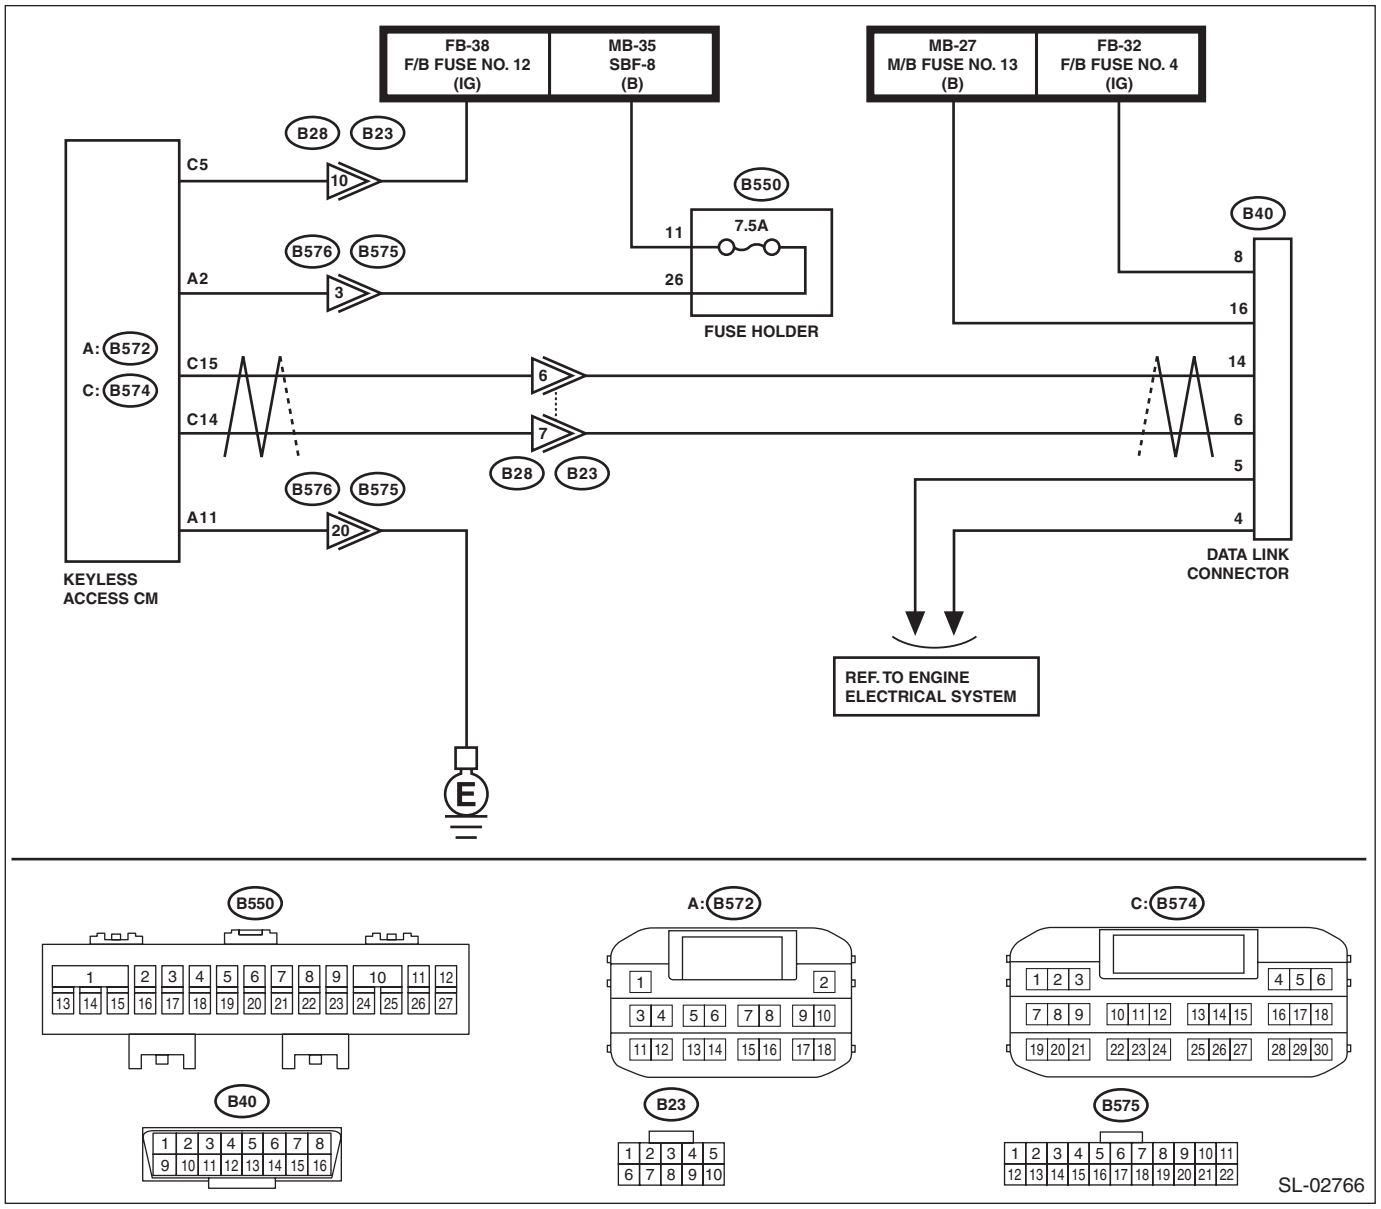
DETECTING CONDITION:

- Defective harness
- Power supply circuit malfunction
- Defective keyless access CM
- Defective CAN communication circuit
- Defective Subaru Select Monitor



TROUBLE SYMPTOM:

Not communicable with Subaru Select Monitor.



WIRING DIAGRAM:

– Push button start system <Ref. to WI-303, WIRING DIAGRAM, Push Button Start System.>
– CAN communication system <Ref. to WI-113, WIRING DIAGRAM, CAN Communication System.>

• Engine type: FA

- Engine type: EJ

Step		Check	Yes	No
1	**CHECK OTHER COMMUNICATION.** Communicate with the system other than the keyless access system using the Subaru Select Monitor.	Is the communication to other control module possible?	Go to step **2**.	Perform the "Communication for Initializing Impossible" of LAN system. <Ref. to LAN(diag)-12, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, Subaru Select Monitor.>
2	**CHECK DTC.** Read the DTC of the LAN system using the Subaru Select Monitor. <Ref. to LAN(diag)-36, OPERATION, Read Diagnostic Trouble Code (DTC).>	Is DTC displayed?	Perform the diagnosis of the displayed DTCs for LAN system.	Go to step **3**.

Step		Check	Yes	No
3	**CHECK KEYLESS ACCESS CM.** 1) Turn the ignition switch to OFF. 2) Disconnect the keyless access CM connector. 3) Connect the disconnected connectors. 4) Perform communication with the keyless access system using the Subaru Select Monitor.	Is communication possible?	It is possible that temporary poor communication occurs.	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>

CAUTION:
For replacement procedure of keyless access CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

7. Read Diagnostic Trouble Code (DTC)

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Keyless Access with Push Button Start» and then select «Enter».
5) On «Select Function» display, select «DTC».

NOTE:
- For detailed operation procedures, refer to “Application help”.
- For details concerning DTC, refer to “List of Diagnostic Trouble Code (DTC)”. <Ref. to KPS(diag)-39, List of Diagnostic Trouble Code (DTC).>

8. Read Current Data

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Keyless Access with Push Button Start» and then select «Enter».
5) On «Select Function» display, select «Data Monitor».

NOTE:
For detailed operation procedures, refer to “Application help”.

B: LIST

1. Keyless access system

Items to be displayed	Unit of measure	Contents	Note
Driver’s unlock touch sensor switch	ON/OFF	Keyless access CM input value	ON when the touch sensor (unlock) built on the back surface of the driver’s door outer handle is touched
Passenger’s unlock touch sensor switch	ON/OFF	Keyless access CM input value	ON when the touch sensor (unlock) built on the back surface of the passenger’s door outer handle is touched
Driver’s lock touch sensor SW	ON/OFF	Keyless access CM input value	ON when the touch sensor (lock) built on the surface of the driver’s door outer handle is touched
Passenger’s lock touch sensor SW	ON/OFF	Keyless access CM input value	ON when the touch sensor (lock) built on the surface of the passenger’s door outer handle is touched
Trunk Request SW	ON/OFF	Keyless access CM input value	ON when the trunk opener button is pressed
Secret code Keyless registration	unregistered/registered	Keyless access CM input value	Registered when secret code keyless registration
IGN SW	ON/OFF	Keyless access CM input value	ON when ignition is ON
B/up fuse	Connecting/Not connected	Keyless access CM internal value	When backup fuse is connected/connecting
ACC SW	ON/OFF	Keyless access CM input value	ON when accessory or ignition is ON
Incorrect vehicle ID	Yes/No	Keyless access CM internal value	Yes when the access key is different when keyless access is performed
No response	Yes/No	Keyless access CM internal value	Yes when there is no response from the access key when keyless access is performed
Incorrect response code, format	Yes/No	Keyless access CM internal value	Yes if the response from the access key differs when keyless access is performed
Battery consumption	Yes/No	Keyless access CM internal value	Yes if the access key battery is depleted
Incorrect response code, ID code	Yes/No	Keyless access CM internal value	Yes if the response from the access key differs when keyless access is performed
Incorrect response code, collation result	Yes/No	Keyless access CM internal value	Yes if the response from the access key differs when keyless access is performed
Incorrect ID code	Yes/No	Keyless access CM internal value	Yes if the response from the access key differs when keyless access is performed
Incorrect rolling code	Yes/No	Keyless access CM internal value	Yes if the response from the access key differs when keyless access is performed
Smart Cancel	Cancel/Normal	Keyless access CM internal value	Cancel in the keyless access function stopped condition

Items to be displayed	Unit of measure	Contents	Note
Simple Smart system cancel	Cancel/Normal	Keyless access CM internal value	Cancel in the simple cancel function set condition
ID Code Box W/H Connection State	Connecting/Not connected	Keyless access CM internal value	Connecting status of the terminal (B573) No. 15
ID Code Box Existence Judging	ON/OFF/Existence Judging	Keyless access CM internal value	Normal «Existence Judging»
Immobilizer	Set/Unset	Keyless access CM internal value	Set when the immobilizer is set
Remote engine starter communication ID confirmation	NG/OK	Keyless access CM internal value	Collation OK when using a registered remote control engine starter
Remote engine starter code registration confirmation	unregistered/registered	Keyless access CM internal value	Registered when the code is registered
STLC sleep possible status	Possible/Impossible	Steering lock CM internal value	Possible when sleep is possible
STLC wake-up transmission status	Transmission/No transmission	Steering lock CM internal value	Transmission when the wake-up signal is transmitted
Lock side sensor status	ON/OFF	Steering lock CM internal value	ON when steering lock is locked
Unlock side sensor status	ON/OFF	Steering lock CM internal value	ON when steering lock is unlocked
Lock confirmation	Confirmed/Unconfirmed	Steering lock CM internal value	Confirmed when steering lock is locked
Unlock confirmation	Confirmed/Unconfirmed	Steering lock CM internal value	Confirmed when steering lock is unlocked
Sensor initialization	Complete/incomplete	Steering lock CM internal value	Completed when sensor initial operation is completed
Motor protection control status	Rejected range/Permitted range	Steering lock CM internal value	Rejected range when motor protection control is not activated
Motor operation prohibition voltage evaluation	ON/OFF	Steering lock CM internal value	Prohibition when motor operation is prohibited
Diagnosis response	Normal/response	Steering lock CM internal value	Response when diagnostic communication is in progress
Sensor abnormal	Normal/Abnormal	Steering lock CM internal value	Abnormal when a trouble occurs in steering lock CM
Motor power supply short-circuit abnormal	Normal/Abnormal	Steering lock CM internal value	Abnormal when a trouble occurs in steering lock CM
Motor driver short-circuit abnormal	Normal/Abnormal	Steering lock CM internal value	Abnormal when a trouble occurs in steering lock CM
Lock bar engagement abnormal	Normal/Abnormal	Steering lock CM internal value	ON when the steering lock bar has experienced interference
Push start abnormal	Normal/Abnormal	Steering lock CM internal value	Abnormal when a trouble occurs in steering lock CM
Lock side relay operation	Stopped/Operating	Steering lock CM internal value	Operating in an unlock → lock status
Unlock side relay operation	Stopped/Operating	Steering lock CM internal value	Operating in an lock → unlock status
Motor drive FET drive	Stopped/Operating	Steering lock CM internal value	Operating when motor drive FET is operating
Motor reversal protection control	Stopped/Operating	Steering lock CM internal value	Operating when motor drive FET is operating
Engine start	Engine start permission/Engine start prohibition	Steering lock CM internal value	Permission when ignition ON
Sensor abnormal (past)	Normal/Abnormal	Steering lock CM internal value	Abnormal when a trouble occurs in steering lock CM

Items to be displayed	Unit of measure	Contents	Note
Motor power supply short-circuit abnormal (past)	Normal/Abnormal	Steering lock CM internal value	Abnormal when a trouble occurs in steering lock CM
Motor driver short-circuit abnormal (past)	Normal/Abnormal	Steering lock CM internal value	Abnormal when a trouble occurs in steering lock CM
Steering lock lock/unlock command reception history	ON (keep 10 sec)/OFF	Steering lock CM internal value	ON when steering lock is locked → unlocked, unlocked → locked
Lock bar engagement abnormal (past)	ON/OFF	Steering lock CM internal value	ON when the steering lock bar has experienced interference in the past
Push start abnormal (past)	Normal/Abnormal	Steering lock CM internal value	Abnormal when a trouble occurs in steering lock CM
STLC Abnormal EEPROM access	Normal/Abnormal	Steering lock CM internal value	Abnormal when a trouble occurs in steering lock CM
ID code BOX sleep possible status	Impossible/Possible	Keyless access CM internal value (models without ID code box) or ID code box internal value (models with ID code box)	Possible when sleep is possible
ID code BOX wake-up transmission status	No transmission/ Transmission	Keyless access CM internal value (models without ID code box) or ID code box internal value (models with ID code box)	Transmission when the wake-up signal is transmitted
ID code BOX Abnormal EEPROM access (now)	Normal/Abnormal	Keyless access CM internal value (models without ID code box) or ID code box internal value (models with ID code box)	Abnormal when the ID code box is malfunctioning
EGI code reception status	Receive/Not yet received	Keyless access CM internal value (models without ID code box) or ID code box internal value (models with ID code box)	Reception at engine start operation
Engine start permission request reception status	Receive/Not yet received	Keyless access CM internal value (models without ID code box) or ID code box internal value (models with ID code box)	Reception at ignition ON
Provisional injection request reception status	Receive/Not yet received	Keyless access CM internal value (models without ID code box) or ID code box internal value (models with ID code box)	Reception at ignition ON
Code collation result between smart ECM and ID code box	Normal/Abnormal	Keyless access CM internal value (models without ID code box) or ID code box internal value (models with ID code box)	Normal when engine start is allowed
Code collation result between steering locked ECM and ID code box	Normal/Abnormal	Keyless access CM internal value (models without ID code box) or ID code box internal value (models with ID code box)	Normal when steering lock operation allowed
Steering lock unlock request reception status	Reception (keep 10 sec)/Not yet received	Keyless access CM internal value (models without ID code box) or ID code box internal value (models with ID code box)	Reception when steering lock is performing unlock

Items to be displayed	Unit of measure	Contents	Note
Steering lock lock request reception status	Reception (keep 10 sec)/Not yet received	Keyless access CM internal value (models without ID code box) or ID code box internal value (models with ID code box)	Reception when steering lock is performing lock
Driver's external transmitter output circuit abnormal	Normal/Abnormal	Keyless access CM internal value	Abnormal when a trouble occurs in transmitter output circuit
Passenger's external transmitter output circuit abnormal	Normal/Abnormal	Keyless access CM internal value	Abnormal when a trouble occurs in transmitter output circuit
Driver's external transmitter output circuit abnormal (past)	Normal/Abnormal	Keyless access CM internal value	Abnormal when a trouble occurs in transmitter output circuit in the past
Passenger's external transmitter output circuit abnormal (past)	Normal/Abnormal	Keyless access CM internal value	Abnormal when a trouble occurs in transmitter output circuit in the past
ID code registration mode status	Normal/Register/Deletion	—	For immobilizer registration
Smart related ECM code registration mode status	On mode/Normal		
ID code collation completion confirmation	Complete/Normal		
ID code registration completion confirmation	Complete/Normal		
Smart related ECM code registration completion confirmation	Complete/Normal		
Registered smart key confirmation status	Confirming/Normal		
Smart related ECM code confirmation status	Confirming/Normal		
ID code registration status	Registering/Normal		
ID code collation status	Normal/Collating the immobilizer/Collating the smart		
All registered keys confirmation status	Confirming/Normal		
Confirmed number of all registered keys	0 — 7		
Number of required registrations (smart)	0 — 7		
Number of collation completed (smart)	0 — 7		
Number of registration completed (smart)	0 — 7	Keyless access CM internal value	Number of recognized keyless access CM
ID Code Box	Connecting/Not connected	Keyless access CM internal value	Connecting with ID code box normal connection
Steer Lock ECM	Connecting/Not connected	Keyless access CM internal value	Connecting with steering lock CM normal connection

Items to be displayed	Unit of measure	Contents	Note
Driver's lock request SW/ touch sensor switch ON edge record	ON/OFF	Keyless access CM internal value	The display is continued when the collation is once established by the combination indicated on the left. NOTE: When confirming the data on the left, confirm after performing Keyless access system check. <Ref. to KPS(diag)-37, Keyless Access System Check.>
Passenger's lock request SW/ touch sensor switch ON edge record	ON/OFF	Keyless access CM internal value	
Driver's unlock touch sensor switch ON edge record	ON/OFF	Keyless access CM internal value	
Passenger's unlock touch sensor switch ON edge record	ON/OFF	Keyless access CM internal value	
Trunk unlock request SW ON edge history	ON/OFF	Keyless access CM internal value	
Collation OK result history (driver's external transmitter + interior tuner)	ON/OFF	Keyless access CM internal value	
Collation OK result history (passenger's external transmitter + interior tuner)	ON/OFF	Keyless access CM internal value	
Collation OK result history (front interior transmitter + interior tuner)	ON/OFF	Keyless access CM internal value	
Collation OK result history (rear interior transmitter + interior tuner)	ON/OFF	Keyless access CM internal value	
Collation OK result history (trunk internal transmitter + interior tuner)	ON/OFF	Keyless access CM internal value	
Collation OK result history (trunk external transmitter + interior tuner)	ON/OFF	Keyless access CM internal value	
Collation OK result history (immobilizer amplifier + immobilizer amplifier)	ON/OFF	Keyless access CM internal value	
Push start SW 1	ON/OFF	Keyless access CM input value	ON when push button start is pressed
Push start SW 2	ON/OFF	Keyless access CM input value	ON when push button start is pressed
Stop Light Switch	ON/OFF	Keyless access CM input value	ON when brake pedal is depressed
Steering unlock SW	ON/OFF	Keyless access CM input value	OFF when steering locked
Shift P signal(AT only)	ON/OFF	Keyless access CM input value	ON when the shift position is "P"
Neutral SW/Clutch SW	ON/OFF	Keyless access CM output value	ON when the shift position is at "P" or "N"
Shift N signal(AT only)	ON/OFF	Keyless access CM input value	ON when the shift position is "N"
Delivery mode signal(AT only)	ON/OFF	Keyless access CM input value	OFF when in other than the delivery mode
IGN2 relay monitor (drive output)	ON/OFF	Keyless access CM output value	ON during IG relay 2 (push button start) drive output
IGN1 relay monitor (drive output)	ON/OFF	Keyless access CM output value	ON during IG relay 1 (push button start) drive output
ACC relay monitor	ON/OFF	Keyless access CM output value	ON during accessory relay (push button start) drive output

Items to be displayed	Unit of measure	Contents	Note
IGN2 relay monitor (coil voltage)	ON/OFF	Keyless access CM output value	ON during IG relay 2 (push button start) drive output
IGN1 relay monitor (coil voltage)	ON/OFF	Keyless access CM output value	ON during IG relay 1 (push button start) drive output
IGN latch monitor	ON/OFF	Keyless access CM output value	ON during IG relay 2 (push button start) drive output
STSW signal monitor	ON/OFF	Keyless access CM output value	ON when brake pedal (CVT model) or clutch pedal (MT model) is depressed and push button ignition switch is pressed
ACCR signal	ON/OFF	Keyless access CM input value	ON during starter relay drive output
Vehicle Speed Signal	Drive status/Stop status	Keyless access CM input value	Driving status when vehicle speed is input
Engine Speed	Rotating/Stopped	Keyless access CM input value	Rotating while the engine is running
Power Supply Condition	All OFF status	Keyless access CM output value	Displayed when IG relay 1 (push button start), IG relay 2 (push button start), and accessory relay (push button start) are all OFF
	ACC relay ON status	Keyless access CM output value	Displayed when accessory ON
	IGN1 relay ON status	Keyless access CM output value	Displayed when ignition ON
	IGN2 relay ON status	Keyless access CM output value	Displayed when ignition ON
	STSW Condition	Keyless access CM output value	Displayed when brake pedal (CVT model) or clutch pedal (MT model) is depressed and push button ignition switch is pressed
Vehicle identification	GAS MT/GAS AT/HEV AT/Auto Start Stop MT/Auto Start Stop AT	Keyless access CM output value	Equipped vehicle is displayed.
IGN1 external circuit abnormal	Not Detect/Detect	Keyless access CM output value	Detect when IGN1 external circuit is faulty
IGN2 external circuit abnormal	Not Detect/Detect	Keyless access CM output value	Detect when IGN2 external circuit is faulty
Start SW trouble	Not Detect/Detect	Keyless access CM output value	Detect when start SW is faulty
P signal mismatch	Not Detect/Detect	Keyless access CM output value	Detect when shift P signal is abnormal
Steering lock unlock waiting time out	Not Detect/Detect	Keyless access CM output value	Detect when the steering lock release time out occurred
Key collation waiting time out	Not Detect/Detect	Keyless access CM output value	Detect when the key collation time out occurred

2. Body integrated unit

Refer to the BODY CONTROL SYSTEM (DIAGNOSTICS) for the current data of the body integrated unit. <Ref. to BC(diag)-17, LIST, Read Current Data.>

9. Clear Memory Mode

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Keyless Access with Push Button Start» and then select «Enter».
5) On «Select Function» display, select «DTC».
6) On «DTC» display, select «Clear Memory».

NOTE:
- For detailed operation procedures, refer to “Application help”.
- Initial diagnosis of electronic throttle control is performed after memory clearance. Wait for 10 seconds or more after turning the ignition switch to ON, and then start the engine.

10.Inspection Mode

A: PROCEDURE

It is possible to diagnose the DTC by performing the indicated inspection mode. After correcting the DTC, perform a necessary inspection mode and make sure that the function is resumed correctly and the DTC is recorded.

1. PREPARATION FOR THE INSPECTION MODE

1) Check that the battery voltage is 12 V or more and fuel remains approx. half [20 — 40 L (5.3 — 10.6 US gal, 4.4 — 8.8 Imp gal)].
2) Perform the Clear Memory Mode. <Ref. to KPS(diag)-33, Clear Memory Mode.>
3) Read the DTC and check that the DTC is not displayed. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs. After solving the DTC, repeat from step 2).

2. INSPECTION MODE 1

DTC	Item	Note
U0073	CONTROL MODULE COMMUNICATION BUS OFF	—
U0100	LOST COMMUNICATION WITH ECM/PCM “A”	—
U0101	LOST COMMUNICATION WITH TCM	—
U0122	LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE	—
U0140	LOST COMMUNICATION WITH BODY CONTROL MODULE	—
U0155	LOST COMMUNICATION WITH INSTRUMENT PANEL CLUSTER (IPC) CONTROL MODULE	—
U0401	INVALID DATA RECEIVED FROM ECM/PCM “A”	—
U0422	INVALID DATA RECEIVED FROM BODY CONTROL MODULE	—
B2271	IGN RELAY CONTROL CIRCUIT	—
B2274	ACC RELAY CONTROL CIRCUIT	—
B2275	ENGINE START REQUEST CONTROL CIRCUIT	—
B2276	ACC RELAY OFF SIGNAL	—
B2277	SUBMERGING CIRCUIT	—
B2285	STEERING LOCK POSITION SIGNAL CORRELATION	—
B2286	ENGINE SPEED SIGNAL(WITHOUT Auto Start Stop)	—
B2781	STEERING LOCK CM CONTROL CIRCUIT	—
B2782	STEERING LOCK DRIVE REQUEST SIGNAL CORRELATION	—
B2785	LIN COMMUNICATION	—
B2786	STEERING LOCK CM COMMUNICATION	—
B2788	IGN SIGNAL CORRELATION (STEERING LOCK CM)	—
B2789	ID CODE BOX COMMUNICATION	—
B278D	ID CODE BOX JUDGMENT CIRCUIT	—

Diagnostic procedure:
1) Prepare for the inspection mode. <Ref. to KPS(diag)-34, PREPARATION FOR THE INSPECTION MODE, PROCEDURE, Inspection Mode.>
2) Start the engine, and let it idle for 40 seconds or more.
3) Read the DTC and check that the DTC is not displayed. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs.

3. INSPECTION MODE 2

DTC	Item	Note
B1242	WIRELESS TUNER	—

Diagnostic procedure:
1) Prepare for the inspection mode. <Ref. to KPS(diag)-34, PREPARATION FOR THE INSPECTION MODE, PROCEDURE, Inspection Mode.>
2) Turn the ignition switch to OFF and then leave it for 10 seconds or more.
3) Read the DTC and check that the DTC is not displayed. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs.

4. INSPECTION MODE 3

DTC	Item	Note
B2779	REMOTE CONTROL ENGINE STARTER COLLATION	—

Diagnostic procedure:
1) Prepare for the inspection mode. <Ref. to KPS(diag)-34, PREPARATION FOR THE INSPECTION MODE, PROCEDURE, Inspection Mode.>
2) Register the remote engine starter, and operate it.
3) Read the DTC and check that the DTC is not displayed. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs.

5. INSPECTION MODE 4

DTC	Item	Note
B2784	ANTENNA CIRCUIT (PUSH ENGINE SWITCH)	—
B2790	ID CODE BOX CIRCUIT	—
B27A1	DRIVER SIDE EXTERNAL ANTENNA OPEN	—
B27A2	PASSENGER SIDE EXTERNAL ANTENNA OPEN	—

B27A6	REAR INTERNAL ANTENNA OPEN	—
B27A7	TRUNK/REAR GATE INTERNAL ANTENNA OPEN	—
B27A8	TRUNK/REAR GATE EXTERNAL ANTENNA OPEN	—

Diagnostic procedure:
1) Prepare for the inspection mode. <Ref. to KPS(diag)-34, PREPARATION FOR THE INSPECTION MODE, PROCEDURE, Inspection Mode.>
2) Read the DTC and check that the DTC is not displayed. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs.

6. INSPECTION MODE 5

DTC	Item	Note
B2282	VEHICLE SPEED SIGNAL CORRELATION	—
B2283	VEHICLE SPEED SENSOR	—

Diagnostic procedure:
1) Prepare for the inspection mode. <Ref. to KPS(diag)-34, PREPARATION FOR THE INSPECTION MODE, PROCEDURE, Inspection Mode.>
2) Drive for 20 seconds or more at a vehicle speed of 25 km/h (15.5 MPH) or more.
3) Read the DTC and check that the DTC is not displayed. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs.

7. INSPECTION MODE 6

DTC	Item	Note
B2784	ANTENNA CIRCUIT (PUSH ENGINE SWITCH)	—
B278A	PUSH ENGINE SWITCH POWER SUPPLY CIRCUIT	—

Diagnostic procedure:
1) Prepare for the inspection mode. <Ref. to KPS(diag)-34, PREPARATION FOR THE INSPECTION MODE, PROCEDURE, Inspection Mode.>
2) Hold the access key that doesn't have a battery over the push button start SW for collation.
3) Read the DTC and check that the DTC is not displayed. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs.

8. INSPECTION MODE 7

DTC	Item	Note
B2284	BRAKE SIGNAL CORRELATION	—

Diagnostic procedure:
1) Prepare for the inspection mode. <Ref. to KPS(diag)-34, PREPARATION FOR THE INSPECTION MODE, PROCEDURE, Inspection Mode.>
2) Turn the ignition switch to ON, depress and hold the brake pedal for 20 seconds of more, then release the brake pedal and wait for 20 seconds and more.
3) Read the DTC and check that the DTC is not displayed. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs.

11.Keyless Access System Check

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Keyless Access with Push Button Start» and then select «Enter».
5) On «Select Function» display, select «Work Support».
6) On «Work Support» display, select «Keyless access system check».
7) Select a transmitter to be checked.
8) Select [Exit] to exit the system check. The screen will return to the «Keyless access system check» screen.

Data	Customize setting	Remarks
Keyless access system check	Driver side external transmitter - internal tuner	When the setting content on the left is selected, the access key is neared to the selected transmitter (access antenna) and collation matches, the buzzer will sound.
	Passenger side external transmitter - internal tuner	
	Fr internal transmitter - internal tuner	
	Rr internal transmitter - internal tuner	
	Trunk internal transmitter, interior tuner	
	Trunk-external transmitter - trunk-internal tuner	
	Immobilizer amplifier transmission	
Collation result history Clear	Operate	
	—	

NOTE:
For detailed operation procedures, refer to “Application help”.

12.System Operation Check Mode

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Keyless Access with Push Button Start» and then select «Enter».
5) On «Select Function» display, select «Active Test».
6) Select a location to be inspected.

NOTE:
Each output check continues to run for five seconds before stopping automatically.

Data	Keyless access CM output check	Remarks
Tuner power supply ON (indoor tuner)	Output	Perform the power supply check for the receiver.
	Stop	
Driver's external transmitter	Output	Perform the output check for the driver's side door outside antenna.
	Stop	
Passenger's external transmitter	Output	Perform the output check for the passenger's side door outside antenna.
	Stop	
STSW	Output	Turn on the STSW. *2
	Stop	
IGN2	Output	Turn on the IGN2.
	Stop	
IGN1	Output	Turn on the IGN1.
	Stop	
ACC	Output	Turn on the ACC.
	Stop	
Start SW character illumination lighted	Output	Perform ON output of the push button ignition switch back-up light. *1
	Stop	
Start SW indicator lighted (green)	Output	Perform ON output of the push button ignition switch back-up light. *1
	Stop	
Start SW indicator lighted (orange)	Output	Perform ON output of the push button ignition switch back-up light. *1
	Stop	
Steering lock power supply	Output	Output power supply signal from power supply CM to steering lock CM.
	Stop	

*1: When lit by a condition other than for a system operation check mode, it will not become unlit even when set to OFF or no output.
*2: When performed with ignition switch ON, engine will start. Therefore, great care must be exercised.

NOTE:
For detailed operation procedures, refer to “Application help”.

13.List of Diagnostic Trouble Code (DTC)

A: LIST

1. Keyless access system

DTC	Item	Content of diagnosis	Note
U0073	CONTROL MODULE COMMUNICATION BUS OFF	Detected when CAN line abnormality is detected.	<Ref. to KPS(diag)-43, DTC U0073 CONTROL MODULE COMMUNICATION BUS OFF, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0100	LOST COMMUNICATION WITH ECM/PCM “A”	Detected when CAN data from the engine control module (ECM) does not arrive.	<Ref. to KPS(diag)-43, DTC U0100 LOST COMMUNICATION WITH ECM/PCM “A”, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0101	LOST COMMUNICATION WITH TCM	Detected when CAN data from TCM does not arrive.	<Ref. to KPS(diag)-43, DTC U0101 LOST COMMUNICATION WITH TCM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0122	LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE	Detected when CAN data from VDC does not arrive.	<Ref. to KPS(diag)-43, DTC U0122 LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0140	LOST COMMUNICATION WITH BODY CONTROL MODULE	Detected when CAN data from BIU does not arrive.	<Ref. to KPS(diag)-43, DTC U0140 LOST COMMUNICATION WITH BODY CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0155	LOST COMMUNICATION WITH INSTRUMENT PANEL CLUSTER (IPC) CONTROL MODULE	Detected when CAN data from meter does not arrive.	<Ref. to KPS(diag)-43, DTC U0155 LOST COMMUNICATION WITH INSTRUMENT PANEL CLUSTER (IPC) CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0401	INVALID DATA RECEIVED FROM ECM/PCM “A”	Detected when there is malfunction in CAN data from the engine control module (ECM).	<Ref. to KPS(diag)-43, DTC U0401 INVALID DATA RECEIVED FROM ECM/PCM “A”, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0422	INVALID DATA RECEIVED FROM BODY CONTROL MODULE	Detected when CAN data from BIU is abnormal.	<Ref. to KPS(diag)-43, DTC U0422 INVALID DATA RECEIVED FROM BODY CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B1242	WIRELESS TUNER	When short circuit occurs in harness between keyless access CM and receiver.	<Ref. to KPS(diag)-44, DTC B1242 WIRELESS TUNER, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2271	IGN RELAY CONTROL CIRCUIT	• When malfunction is detected in IG1 and IG2 drive circuits in the keyless access CM. • When malfunction is detected in IG hold circuit in the keyless access CM.	<Ref. to KPS(diag)-46, DTC B2271 IGN RELAY CONTROL CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2274	ACC RELAY CONTROL CIRCUIT	When malfunction is detected in ACC relay drive circuit in the keyless access CM or external circuit.	<Ref. to KPS(diag)-49, DTC B2274 ACC RELAY CONTROL CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2275	ENGINE START REQUEST CONTROL CIRCUIT	• When malfunction is detected in engine start permission signal output circuit in the keyless access CM. • When malfunction is detected in external engine start permission signal circuit.	<Ref. to KPS(diag)-52, DTC B2275 ENGINE START REQUEST CONTROL CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

DTC	Item	Content of diagnosis	Note
B2276	ACC RELAY OFF SIGNAL	When input error occurs in accessory relay cut input signal of keyless access CM.	<Ref. to KPS(diag)-54, DTC B2276 ACC RELAY OFF SIGNAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2277	SUBMERGING CIRCUIT	When the water-submersion detection circuit integrated into the keyless access CM detects the water submersion.	<Ref. to KPS(diag)-56, DTC B2277 SUBMERGING CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2282	VEHICLE SPEED SIGNAL CORRELATION	When the vehicle speed signal transmitted from VDC via solid line and the vehicle speed signal transmitted from VDC via CAN communication line do not match.	<Ref. to KPS(diag)-57, DTC B2282 VEHICLE SPEED SIGNAL CORRELATION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2283	VEHICLE SPEED SENSOR	Either of the following malfunctions is detected. (Vehicle speed sensor failure is detected.) • Vehicle speed signal failure detection 1: Excessive deceleration detection • Vehicle speed signal failure detection 2: Engine speed interlock detection	<Ref. to KPS(diag)-60, DTC B2283 VEHICLE SPEED SENSOR, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2284	BRAKE SIGNAL CORRELATION	When the brake signal transmitted via solid line and the brake signal transmitted via CAN communication line do not match.	<Ref. to KPS(diag)-63, DTC B2284 BRAKE SIGNAL CORRELATION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2285	STEERING LOCK POSITION SIGNAL CORRELATION	When the steering lock position signal transmitted from the steering lock CM via solid line and the steering lock position signal transmitted via LIN communication system do not match.	<Ref. to KPS(diag)-65, DTC B2285 STEERING LOCK POSITION SIGNAL CORRELATION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2286	ENGINE SPEED SIGNAL(WITHOUT Auto Start Stop)	When the engine speed signal transmitted from ECM via solid line and the engine speed signal transmitted from ECM via CAN communication line do not match.	<Ref. to KPS(diag)-69, DTC B2286 ENGINE SPEED SIGNAL(WITHOUT Auto Start Stop), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2779	REMOTE CONTROL ENGINE STARTER COLLATION	When the keyless access CM does not respond to engine start even when the remote control engine starter is ON, or when there is a code mismatch.	<Ref. to KPS(diag)-72, DTC B2779 REMOTE CONTROL ENGINE STARTER COLLATION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2781	STEERING LOCK CM CONTROL CIRCUIT	• When malfunction is detected in lock/unlock position detection sensor. • When the open or short circuit in the steering lock motor drive circuit is detected.	<Ref. to KPS(diag)-72, DTC B2781 STEERING LOCK CM CONTROL CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2782	STEERING LOCK DRIVE REQUEST SIGNAL CORRELATION	When the open or short circuit in the steering lock motor power supply circuit is detected.	<Ref. to KPS(diag)-73, DTC B2782 STEERING LOCK DRIVE REQUEST SIGNAL CORRELATION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2784	ANTENNA CIRCUIT (PUSH ENGINE SWITCH)	When open or short circuit occurs in the antenna coil.	<Ref. to KPS(diag)-75, DTC B2784 ANTENNA CIRCUIT (PUSH ENGINE SWITCH), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2785	LIN COMMUNICATION	When the keyless access CM detects the collation system LIN bus communication error three times in a row.	<Ref. to KPS(diag)-77, DTC B2785 LIN COMMUNICATION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2786	STEERING LOCK CM COMMUNICATION	When communication between keyless access CM and steering lock CM is interrupted for a set amount of time.	<Ref. to KPS(diag)-79, DTC B2786 STEERING LOCK CM COMMUNICATION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

DTC	Item	Content of diagnosis	Note
B2788	IGN SIGNAL CORRELATION (STEERING LOCK CM)	When mismatch occurs in the IG1 input of the steering lock CM between LIN communication line input and solid line input.	<Ref. to KPS(diag)-82, DTC B2788 IGN SIGNAL CORRELATION (STEERING LOCK CM), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2789	ID CODE BOX COMMUNICATION	• When communication between keyless access CM and ID code box is interrupted for a set amount of time. • Open or short circuit in the wiring harness between keyless access CM and ID code box.	<Ref. to KPS(diag)-85, DTC B2789 ID CODE BOX COMMUNICATION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B278A	PUSH ENGINE SWITCH POWER SUPPLY CIRCUIT	When the power supply circuit of the push button ignition switch is shorted to ground.	<Ref. to KPS(diag)-88, DTC B278A PUSH ENGINE SWITCH POWER SUPPLY CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B278D	ID CODE BOX JUDGMENT CIRCUIT	Either of the following malfunctions is detected. • ID code box existence judgment status says NO, but the ID code box existence judging circuit in the solid line detects the connection. • ID code box existence judgment status says NO, but the communication signal from ID code box is received. • ID code box existence judging circuit in the solid line detects no connection, but the communication signal from ID code box is received. (During a new registration)	<Ref. to KPS(diag)-90, DTC B278D ID CODE BOX JUDGMENT CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2790	ID CODE BOX CIRCUIT	An error has occurred inside the ID code box.	<Ref. to KPS(diag)-91, DTC B2790 ID CODE BOX CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B27A1	DRIVER SIDE EXTERNAL ANTENNA OPEN	When open circuit occurs in the harness between keyless access CM and driver's side front door outer handle.	<Ref. to KPS(diag)-92, DTC B27A1 DRIVER SIDE EXTERNAL ANTENNA OPEN, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B27A2	PASSENGER SIDE EXTERNAL ANTENNA OPEN	When open circuit occurs in the harness between keyless access CM and passenger's side front door outer handle.	<Ref. to KPS(diag)-94, DTC B27A2 PASSENGER SIDE EXTERNAL ANTENNA OPEN, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B27A5	FRONT INTERNAL ANTENNA OPEN	When open circuit occurs in the harness between keyless access CM and front interior antenna.	<Ref. to KPS(diag)-96, DTC B27A5 FRONT INTERNAL ANTENNA OPEN, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B27A6	REAR INTERNAL ANTENNA OPEN	When open circuit occurs in the harness between keyless access CM and rear interior antenna.	<Ref. to KPS(diag)-98, DTC B27A6 REAR INTERNAL ANTENNA OPEN, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B27A7	TRUNK/REAR GATE INTERNAL ANTENNA OPEN	When open circuit occurs in the harness between keyless access CM and rear interior antenna.	<Ref. to KPS(diag)-100, DTC B27A7 TRUNK/REAR GATE INTERNAL ANTENNA OPEN, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B27A8	TRUNK/REAR GATE EXTERNAL ANTENNA OPEN	When open circuit occurs in the harness between keyless access CM and rear exterior antenna.	<Ref. to KPS(diag)-102, DTC B27A8 TRUNK/REAR GATE EXTERNAL ANTENNA OPEN, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

2. Immobilizer (ECM)

DTC	Item	Content of diagnosis	Note
B1571	REFERENCE CODE INCOMPATIBILITY	Reference code mismatch occurs between keyless access CM (model without ID code box) or ID code box (model with ID code box) and ECM.	<Ref. to KPS(diag)-104, DTC B1571 REFERENCE CODE INCOMPATIBILITY, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B1572	IMM CIRCUIT EXCEPT ANTENNA CIRCUIT	Communication error occurs between keyless access CM (model without ID code box) or ID code box (model with ID code box) and ECM.	<Ref. to KPS(diag)-105, DTC B1572 IMM CIRCUIT EXCEPT ANTENNA CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B1576	EGI CONTROL MODULE EEPROM	ECM malfunctioning	<Ref. to KPS(diag)-110, DTC B1576 EGI CONTROL MODULE EEPROM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B1577	IMM CONTROL MODULE EEPROM	Malfunction occurs in keyless access CM (model without ID code box) or ID code box (model with ID code box).	<Ref. to KPS(diag)-111, DTC B1577 IMM CONTROL MODULE EEPROM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

14.Diagnostic Procedure with Diagnostic Trouble Code (DTC)

A: DTC U0073 CONTROL MODULE COMMUNICATION BUS OFF

Detected when CAN line abnormality is detected.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

B: DTC U0100 LOST COMMUNICATION WITH ECM/PCM “A”

Detected when CAN data from the engine control module (ECM) does not arrive.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

C: DTC U0101 LOST COMMUNICATION WITH TCM

Detected when CAN data from TCM does not arrive.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

D: DTC U0122 LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE

Detected when CAN data from VDC does not arrive.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

E: DTC U0140 LOST COMMUNICATION WITH BODY CONTROL MODULE

Detected when CAN data from BIU does not arrive.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

F: DTC U0155 LOST COMMUNICATION WITH INSTRUMENT PANEL CLUSTER (IPC) CONTROL MODULE

Detected when CAN data from meter does not arrive.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

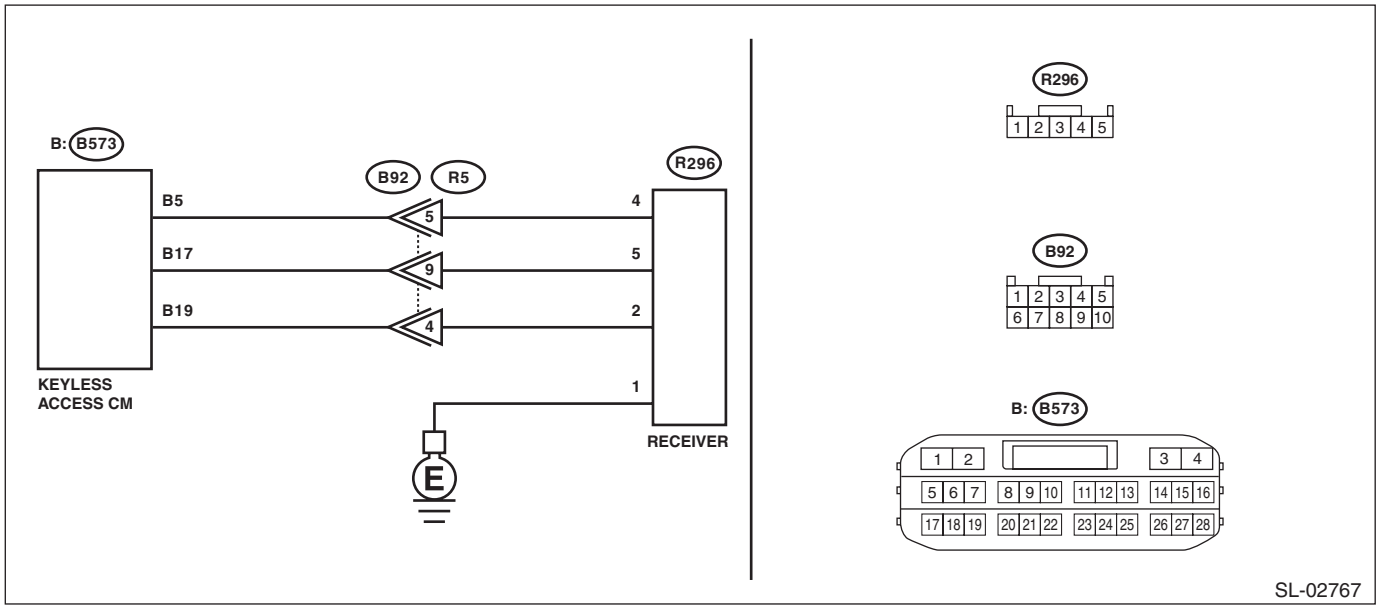
G: DTC U0401 INVALID DATA RECEIVED FROM ECM/PCM “A”

Detected when there is malfunction in CAN data from the engine control module (ECM).

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

H: DTC U0422 INVALID DATA RECEIVED FROM BODY CONTROL MODULE

Detected when CAN data from BIU is abnormal.



NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

I: DTC B1242 WIRELESS TUNER

DTC DETECTING CONDITION:
When short circuit occurs in harness between keyless access CM and receiver.
TROUBLE SYMPTOM:
- The keyless access with push button start function (except for emergency function) does not operate properly.
- Operation by the access key button does not function.

CAUTION:
- **For replacement procedure of keyless access CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.**
- **When the harness comes close to the receiver, the performance of keyless access system operation and wireless operation may reduce. So, when replacing or inspecting the receiver and harness, do not change the route and length of the surrounding harnesses.**

WIRING DIAGRAM:
Push button start system <Ref. to WI-303, WIRING DIAGRAM, Push Button Start System.>

	Step	Check	Yes	No
1	**CHECK LAN SYSTEM.** Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **2**.	Perform the inspection according to the diagnosis for LAN system.
2	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the keyless access CM connector. 2) Disconnect the receiver connector. 3) Using the tester, measure the resistance between terminals of keyless access CM connector and receiver connector, and between receiver connector and chassis ground. ***Connector & terminal*** ***(B573) No. 19 — (R296) No. 2:*** ***(B573) No. 17 — (R296) No. 5:*** ***(B573) No. 5 — (R296) No. 4:*** ***(R296) No. 1 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **3**.	Repair or replace the open circuit of harness.

	Step	Check	Yes	No
3	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B573) No. 19 — Chassis ground:*** ***(B573) No. 17 — Chassis ground:*** ***(B573) No. 5 — Chassis ground:***	Is the resistance 10 kΩ or more?	Go to step **4**.	Repair or replace the short circuit of the harness.
4	**CHECK RECEIVER.** 1) Replace the receiver, and then connect it. <Ref. to SL-98, Receiver.> 2) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 3) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B1242 displayed?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Receiver has a malfunction.

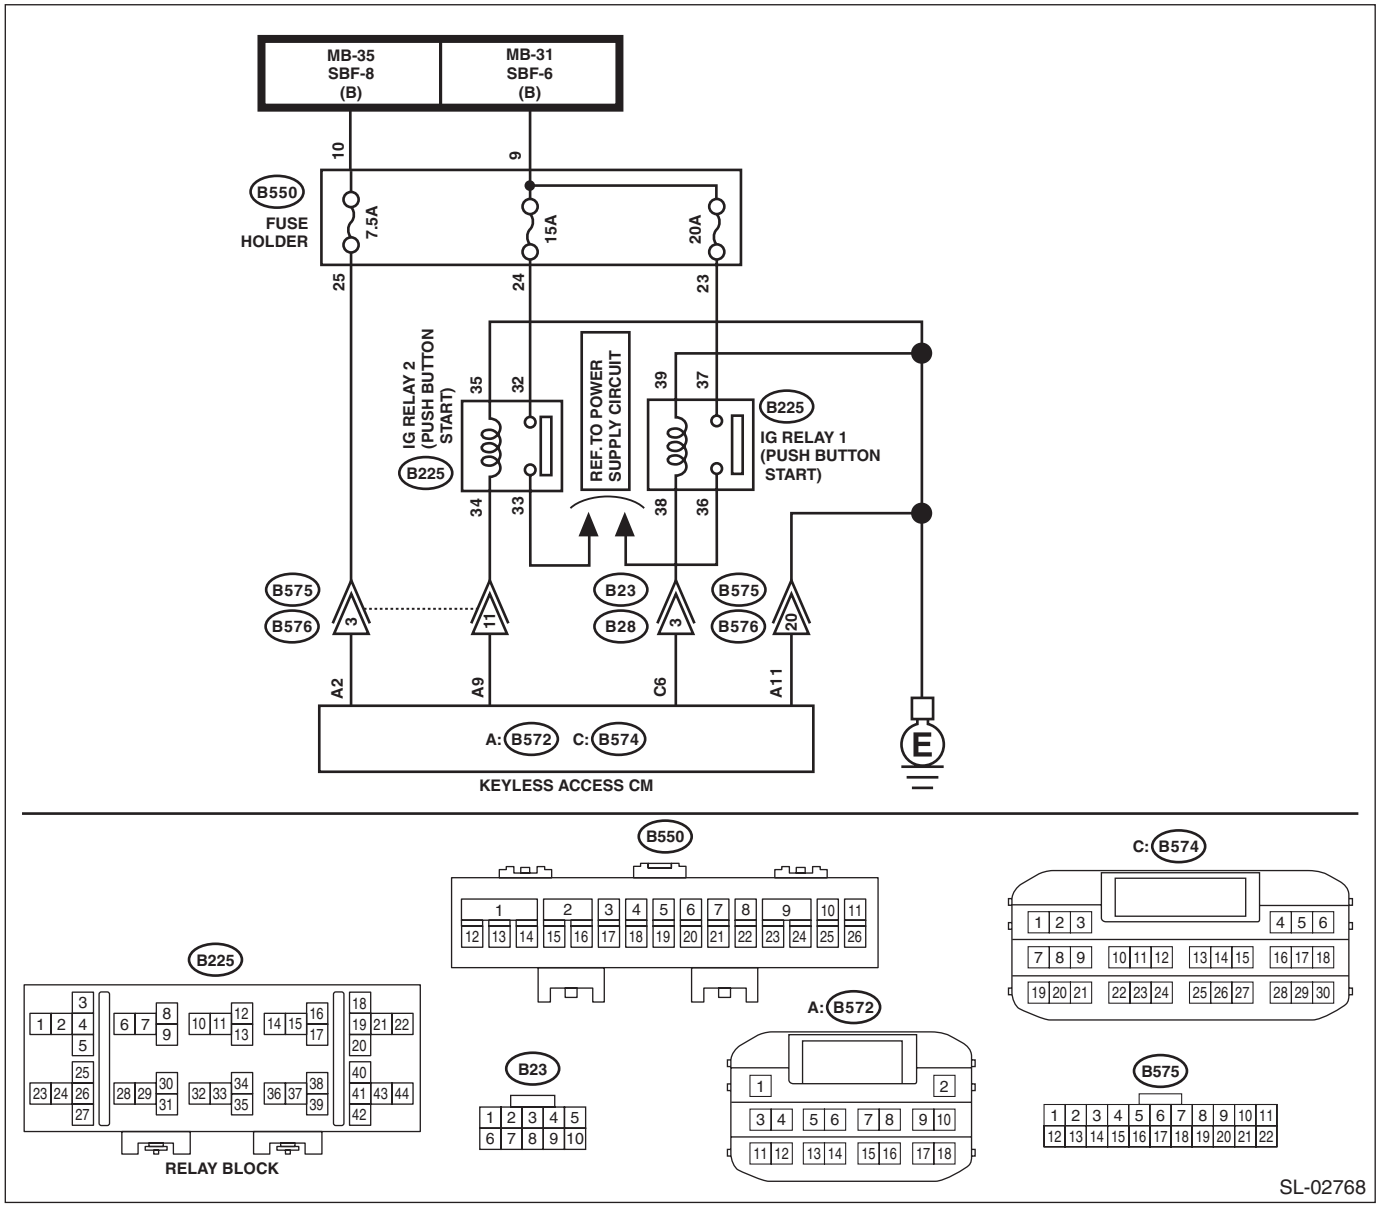
J: DTC B2271 IGN RELAY CONTROL CIRCUIT

DTC DETECTING CONDITION:

- When malfunction is detected in IG1 and IG2 drive circuits in the keyless access CM.
- When malfunction is detected in IG hold circuit in the keyless access CM.

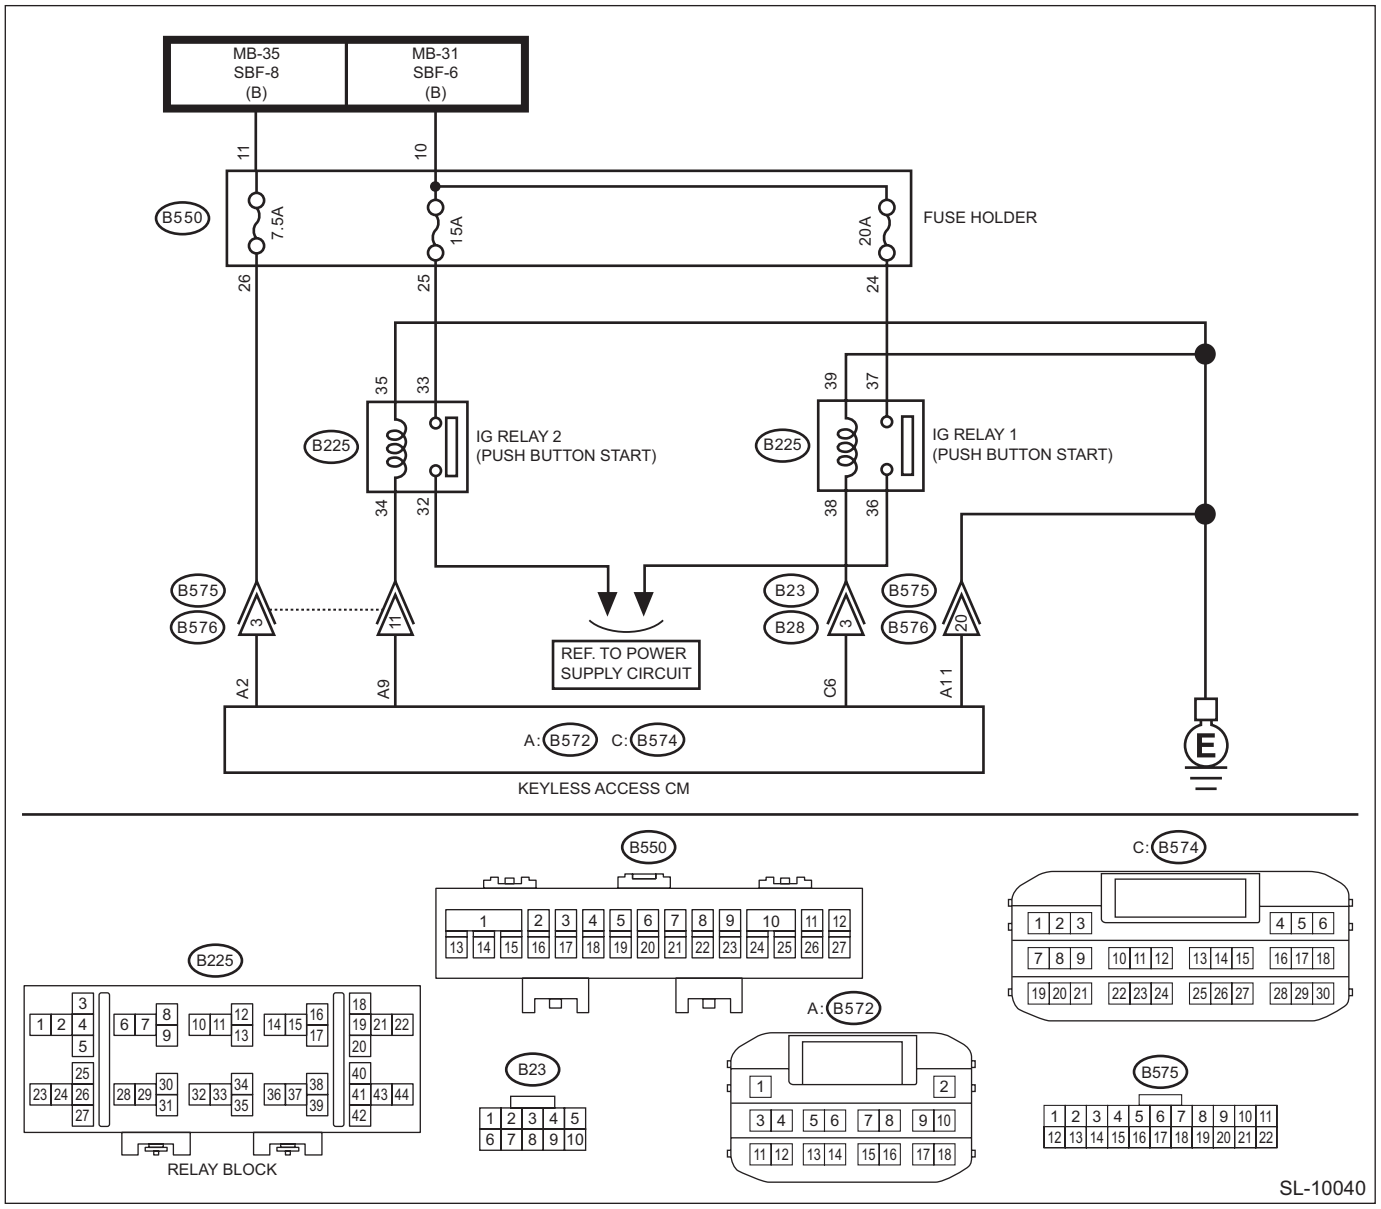
TROUBLE SYMPTOM:

Not all functions operate at IGN ON.



CAUTION:

For replacement procedure of keyless access CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

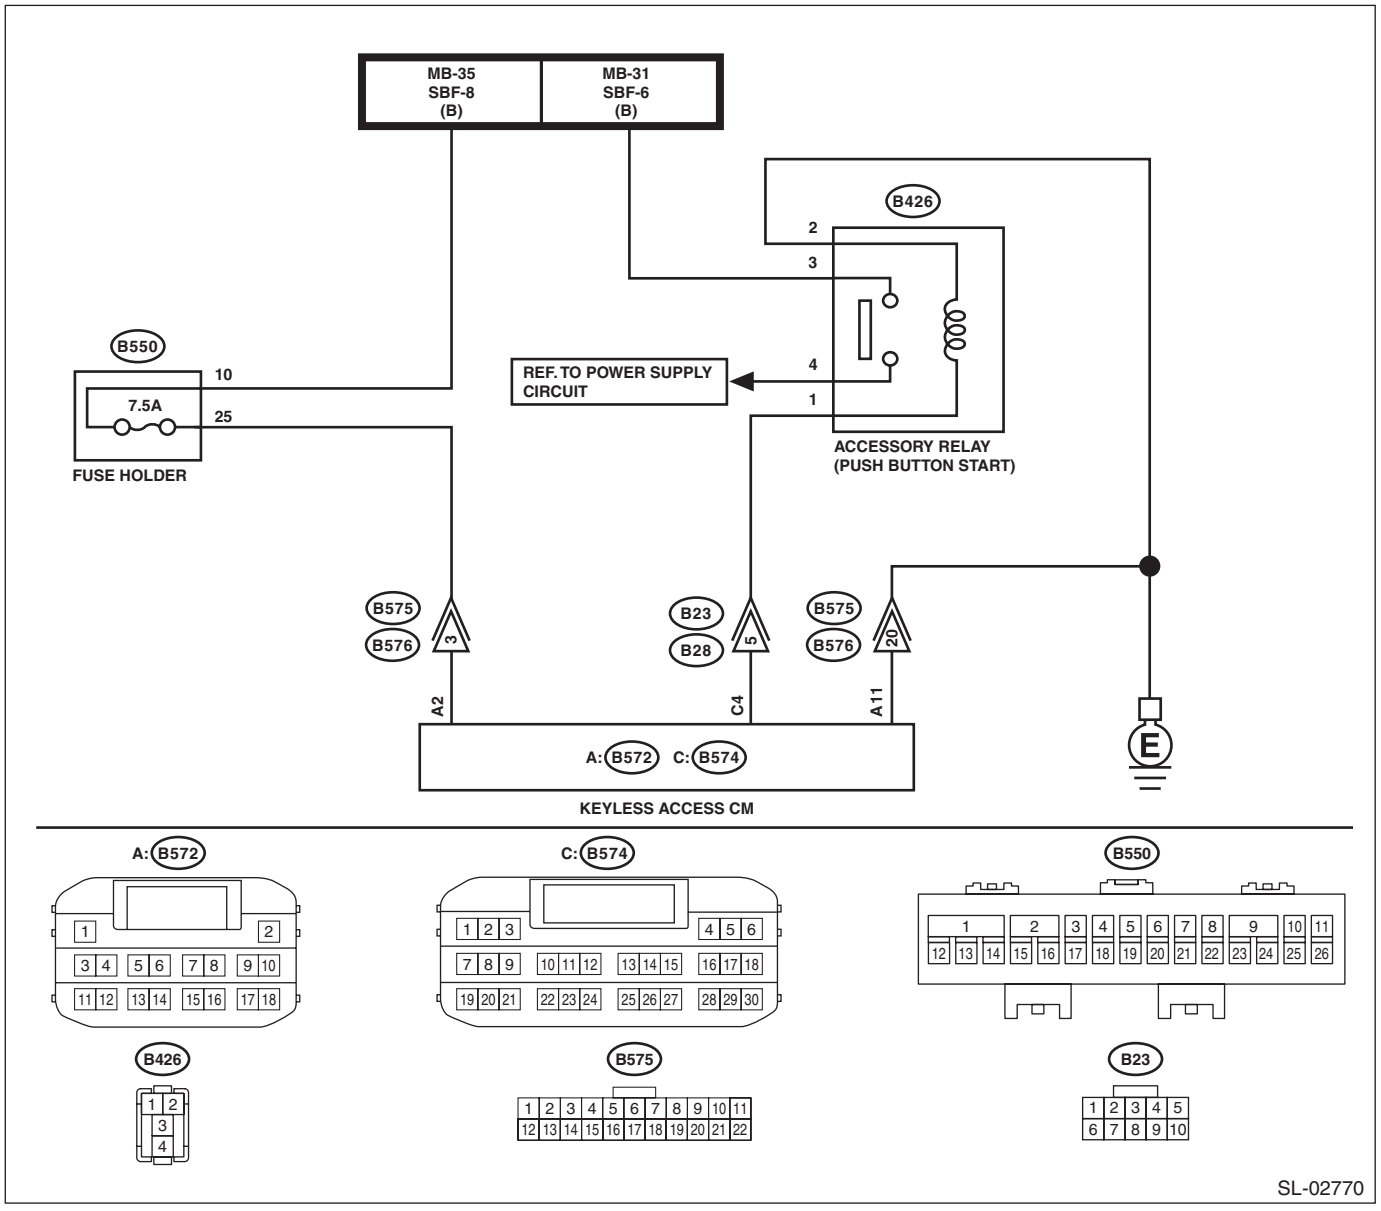


WIRING DIAGRAM:

Push button start system <Ref. to WI-303, WIRING DIAGRAM, Push Button Start System.>

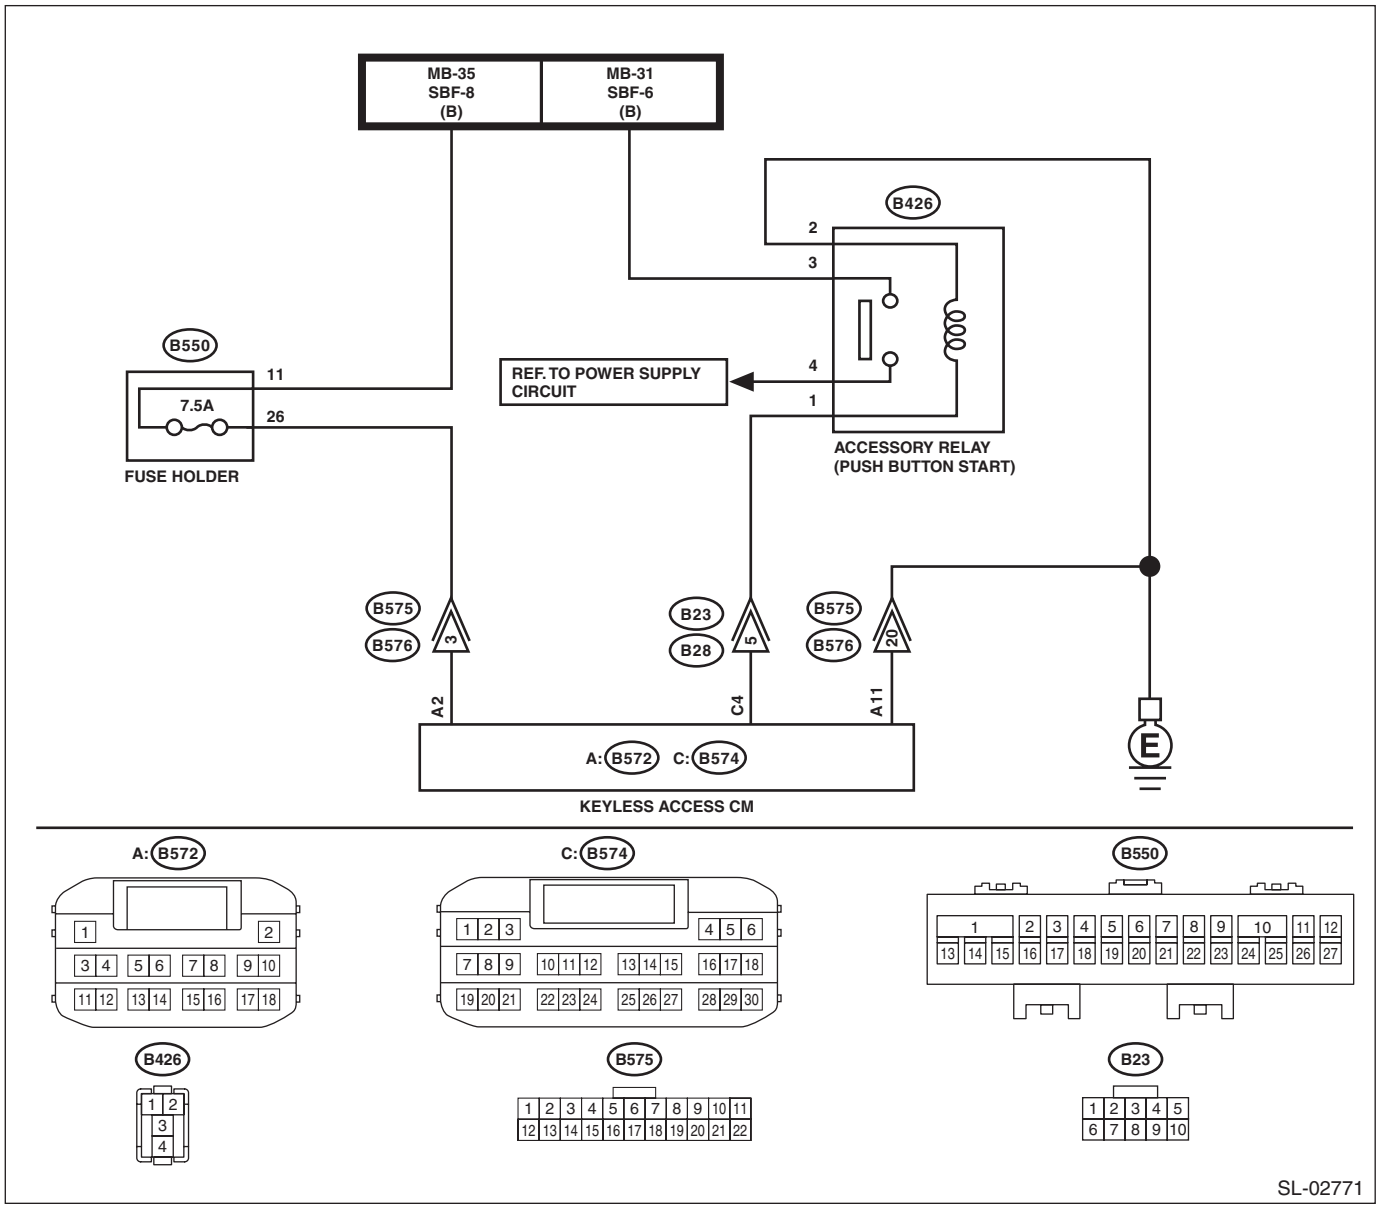
- Engine type: FA

- Engine type: EJ



Step		Check	Yes	No
1	**CHECK LAN SYSTEM.** Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **2**.	Perform the inspection according to the diagnosis for LAN system.
2	**CHECK FUSE.** Check the fuse. <Ref. to SL-8, Relay and Fuse.>	Is the check result OK?	Go to step **3**.	Replace the fuse. When the replaced fuse is blown immediately, check the power supply circuit for short-circuited.

	Step	Check	Yes	No
3	**CHECK HARNESS.** 1) Disconnect the keyless access CM connector. 2) Using a tester, measure the voltage between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 2 (+) — Chassis ground (–):***	Is the voltage 9.5 — 16 V?	Go to step **4**.	Check the power supply circuit.
4	**CHECK HARNESS (OPEN CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 11 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **5**.	Repair or replace the open circuit of harness.
5	**CHECK HARNESS.** 1) Disconnect the keyless access CM connector. 2) Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 9 — Chassis ground:***	Is resistance 74.15 — 460.88 Ω? (20°C)	Go to step **6**.	Check IG relay 2. Go to step **7**.
6	**CHECK HARNESS.** 1) Disconnect the keyless access CM connector. 2) Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 6 — Chassis ground:***	Is resistance 50.87 — 72.17 Ω? (20°C)	Go to step **8**.	Check IG relay 1. Go to step **7**.
7	**CHECK RELAY.** Perform unit inspection of IG relay 1 and IG relay 2. <Ref. to SL-9, CHECK RELAY, INSPECTION, Relay and Fuse.>	Is the check result OK?	Go to step **8**.	Replace the relay. <Ref. to SL-110, REMOVAL, IG Relay1 (Push Button Start).> <Ref. to SL-112, REMOVAL, IG Relay2 (Push Button Start).>
8	**CHECK KEYLESS ACCESS CM.** 1) Connect the keyless access CM connector. 2) Using a tester, measure the voltage between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 6 (+) — Chassis ground (–):*** ***(B572) No. 9 (+) — Chassis ground (–):***	Is the voltage 1 V or less → 9.5 — 16 V when ACC → IGN ON?	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.	Replace the keyless access CM. <Ref. to SL-100, REMOVAL, Keyless Access CM.>



K: DTC B2274 ACC RELAY CONTROL CIRCUIT

DTC DETECTING CONDITION:
When malfunction is detected in ACC relay drive circuit in the keyless access CM or external circuit.
TROUBLE SYMPTOM:
Each function does not operate at the ACC position.

CAUTION:
For replacement procedure of keyless access CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.
WIRING DIAGRAM:
Push button start system <Ref. to WI-303, WIRING DIAGRAM, Push Button Start System.>
- Engine type: FA

- Engine type: EJ

Step		Check	Yes	No
1	**CHECK LAN SYSTEM.** Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **2**.	Perform the inspection according to the diagnosis for LAN system.
2	**CHECK FUSE.** Check the fuse. <Ref. to SL-8, Relay and Fuse.>	Is the check result OK?	Go to step **3**.	Replace the fuse. When the replaced fuse is blown immediately, check the power supply circuit for short-circuited.

	Step	Check	Yes	No
3	**CHECK HARNESS.** 1) Disconnect the keyless access CM connector. 2) Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 2 (+) — Chassis ground (–):***	Is the voltage 9.5 — 16 V?	Go to step **4**.	Check the power supply circuit.
4	**CHECK HARNESS (OPEN CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 11 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **5**.	Repair or replace the open circuit of harness.
5	**CHECK HARNESS.** 1) Disconnect the keyless access CM connector. 2) Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 4 — Chassis ground:***	Is resistance 152.61 — 216.5 Ω? (20°C)	Go to step **7**.	Go to step **6**.
6	**CHECK RELAY.** Perform inspection of ACC relay unit. <Ref. to SL-114, Accessory Relay (Push Button Start).>	Is the check result OK?	Go to step **7**.	Replace the relay.
7	**CHECK HARNESS (OPEN CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and the accessory relay (push button start), and between the accessory relay (push button start) and chassis ground. ***Connector & terminal*** ***(B574) No. 4 — (B426) No. 1:*** ***(B426) No. 2 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **8**.	Repair or replace the open circuit of harness.
8	**CHECK KEYLESS ACCESS CM.** 1) Connect the keyless access CM connector. 2) Using a tester, measure the voltage between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 4 (+) — Chassis ground (–):***	Is the voltage 1 V or less → 9.5 — 16 V when OFF → ACC ON?	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>

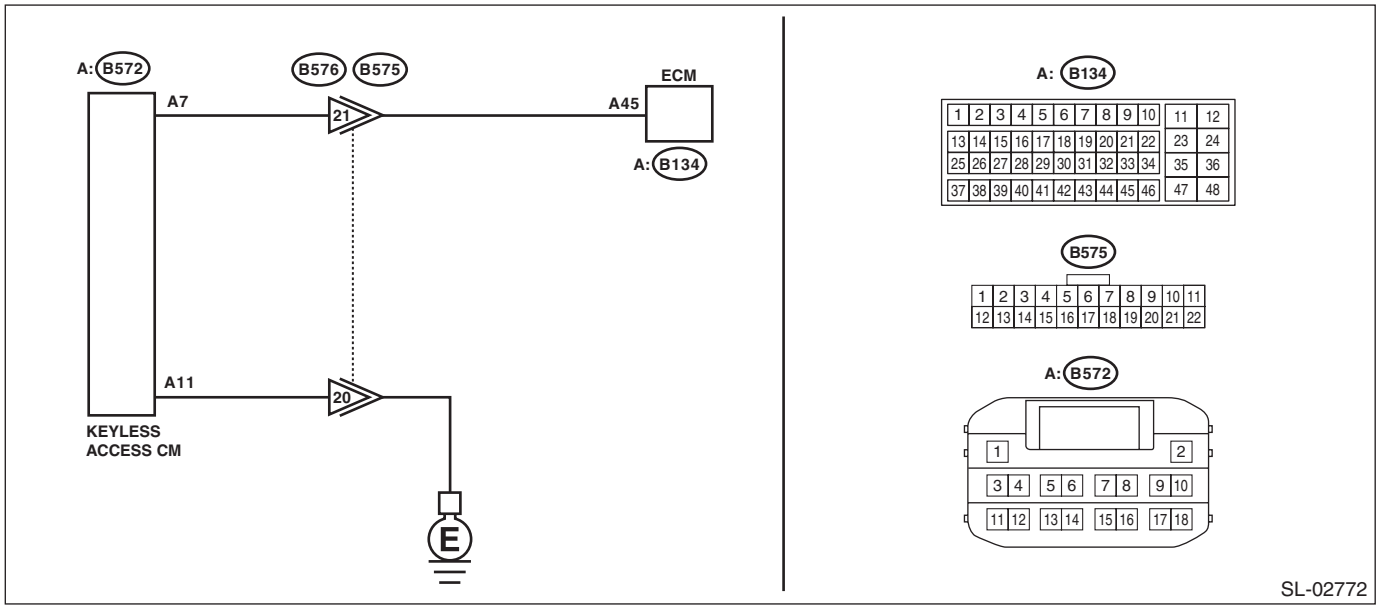
L: DTC B2275 ENGINE START REQUEST CONTROL CIRCUIT

DTC DETECTING CONDITION:

- When malfunction is detected in engine start permission signal output circuit in the keyless access CM.
- When malfunction is detected in external engine start permission signal circuit.

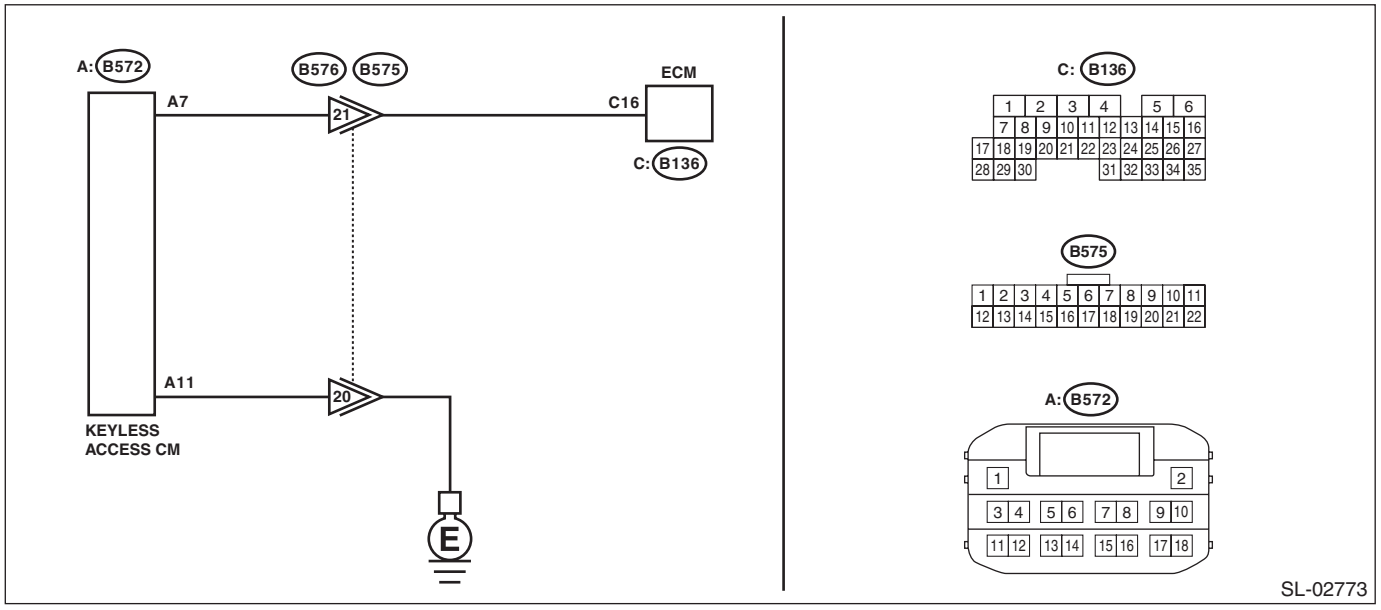
TROUBLE SYMPTOM:

Engine will not start.



CAUTION:

For replacement procedure of keyless access CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.



WIRING DIAGRAM:

Push button start system <Ref. to WI-303, WIRING DIAGRAM, Push Button Start System.>

- Engine type: FA

- Engine type: EJ

	Step	Check	Yes	No
1	**CHECK LAN SYSTEM.** Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **2**.	Perform the inspection according to the diagnosis for LAN system.
2	**CHECK FUSE.** Check the fuse. <Ref. to SL-8, Relay and Fuse.>	Is the check result OK?	Go to step **3**.	Replace the fuse. When the replaced fuse is blown immediately, check the power supply circuit for short-circuited.
3	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the keyless access CM connector and ECM connector. 2) Using a tester, measure the resistance between the keyless access CM connector and ECM. ***Connector & terminal*** ***Engine type: FA*** ***(B572) No. 7 — (B134) No. 45:*** ***Engine type: EJ*** ***(B572) No. 7 — (B136) No. 16:***	Is the resistance less than 1 Ω?	Go to step **4**.	Repair or replace the open circuit of harness.
4	**CHECK HARNESS (OPEN CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 11 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **5**.	Repair or replace the open circuit of harness.
5	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 7 — Chassis ground:***	Is the resistance 10 kΩ or more?	Go to step **6**.	Repair or replace the short circuit of the harness.
6	**CHECK KEYLESS ACCESS CM.** 1) Connect the keyless access CM connector and ECM connector. 2) Using a tester, measure the voltage between the terminals of keyless access CM connector. ***Connector & terminal*** ***(B572) No. 7 (+) — (B572) No. 11 (–):***	Does the voltage change as 2 V or less → 9 V or more when the push button ignition switch is turned on while depressing the brake pedal with the shift position in P or N (AT model) or while depressing clutch pedal (MT model)?	Perform inspection according to the diagnosis of engine. <Ref. to EN(w/o STI)(diag)-87, Diagnostics for Engine Starting Failure.> <Ref. to EN(STI)(diag)-77, PROCEDURE, Diagnostics for Engine Starting Failure.>	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>

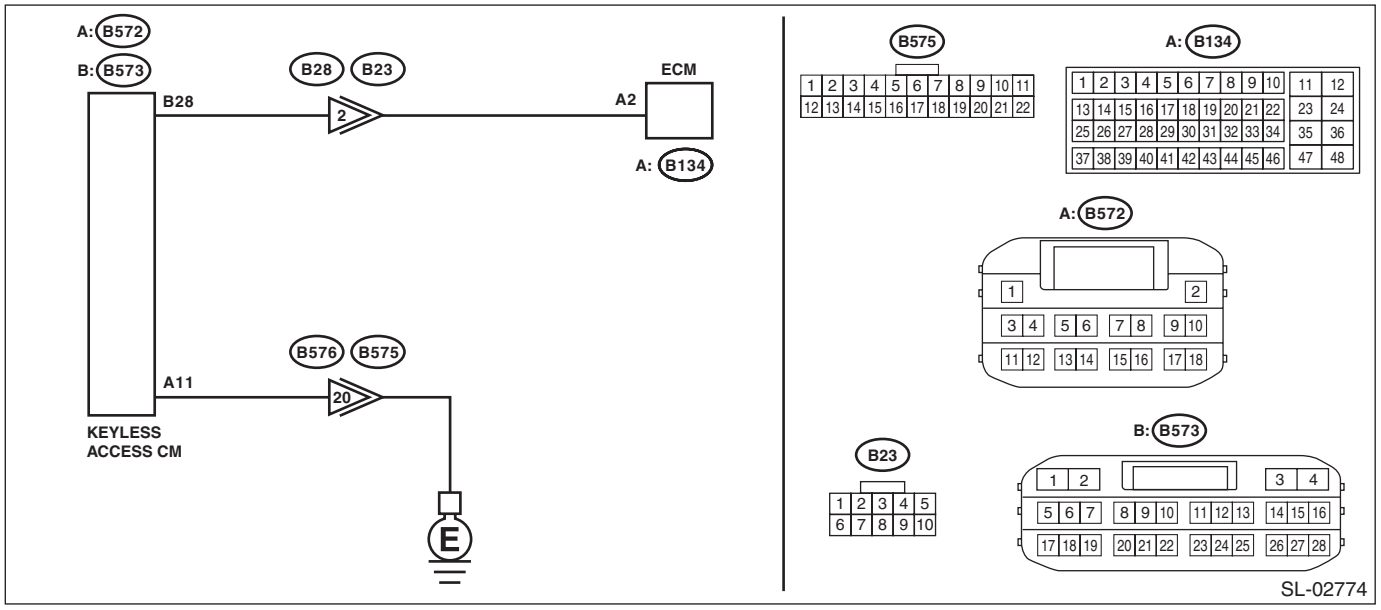
M: DTC B2276 ACC RELAY OFF SIGNAL

DTC DETECTING CONDITION:

When input error occurs in accessory relay cut input signal of keyless access CM.

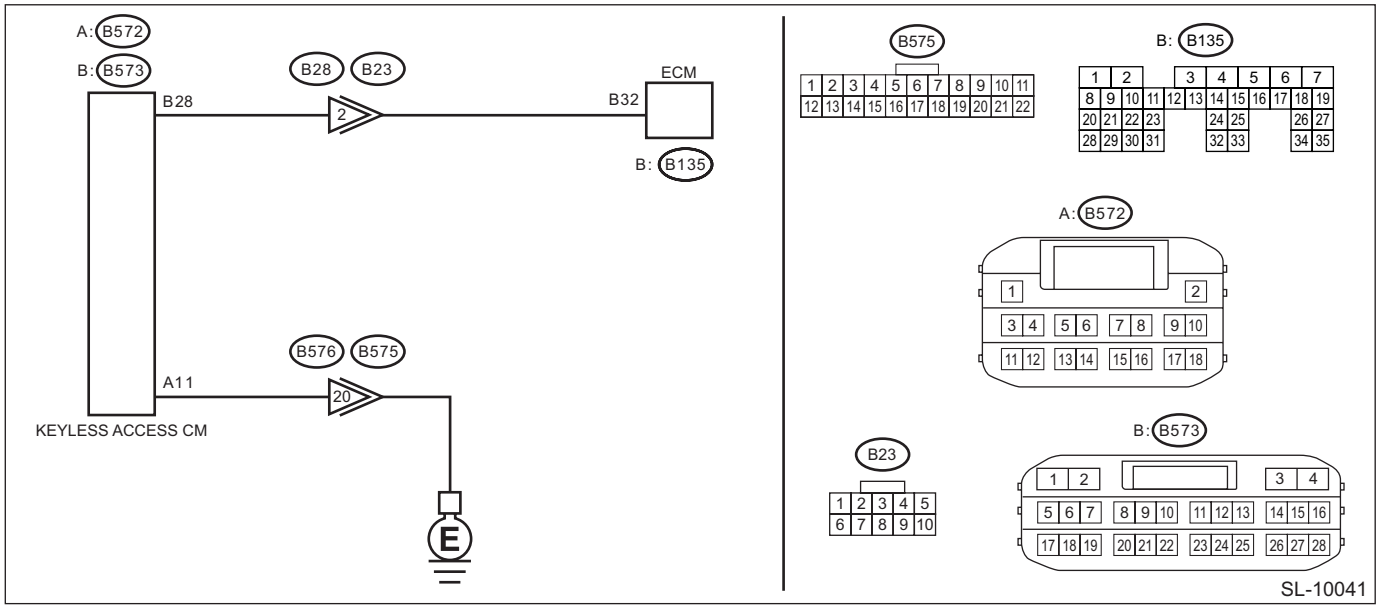
TROUBLE SYMPTOM:

- The accessory power supply is not cut during engine start.
- Starter rotation is slow.



CAUTION:

For replacement procedure of keyless access CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.



WIRING DIAGRAM:

Push button start system <Ref. to WI-303, WIRING DIAGRAM, Push Button Start System.>

- Engine type: FA

- Engine type: EJ

	Step	Check	Yes	No
1	**CHECK LAN SYSTEM.** Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **2**.	Perform the inspection according to the diagnosis for LAN system.
2	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the keyless access CM connector and ECM connector. 2) Using a tester, measure the resistance between the keyless access CM connector and ECM. ***Connector & terminal*** ***Engine type: FA*** ***(B573) No. 28 — (B134) No. 2:*** ***Engine type: EJ*** ***(B573) No. 28 — (B135) No. 32:***	Is the resistance less than 1 Ω?	Go to step **3**.	Repair or replace the open circuit of harness.
3	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B573) No. 28 — Chassis ground:***	Is the resistance 10 kΩ or more?	Go to step **4**.	Repair or replace the short circuit of the harness.
4	**CHECK HARNESS (OPEN CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 11 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **5**.	Repair or replace the open circuit of harness.
5	**CHECK KEYLESS ACCESS CM.** 1) Connect the keyless access CM connector and ECM connector. 2) Using a tester, measure the voltage between terminals of the keyless access CM connector when the push button ignition switch is pressed, while depressing the brake pedal with the shift lever in the “P” range (for CVT model) or while depressing the clutch pedal (for MT model). ***Connector & terminal*** ***(B573) No. 28 (+) — (B572) No. 11 (–):***	Is the voltage 9.5 — 16 V → 1 V or less?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Replace the ECM. <Ref. to FU(w/o STI)-124, REMOVAL, Engine Control Module (ECM).> <Ref. to FU(STI)-56, REMOVAL, Engine Control Module (ECM).>

N: DTC B2277 SUBMERGING CIRCUIT

DTC DETECTING CONDITION:

When the water-submersion detection circuit integrated into the keyless access CM detects the water submersion.

TROUBLE SYMPTOM:

- The ignition can be turned ON, but cannot be turned OFF.
- Engine will not start.

CAUTION:

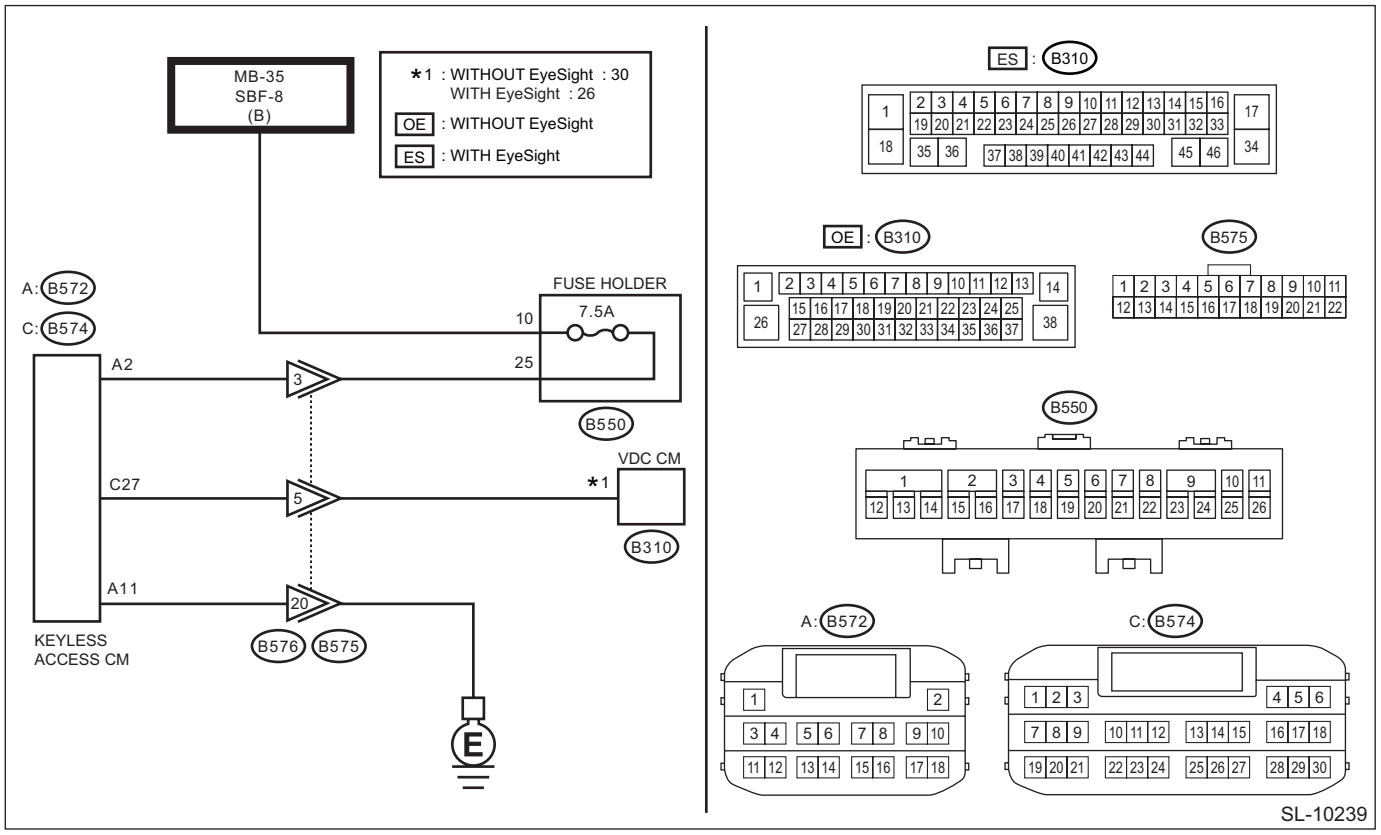
For replacement procedure of keyless access CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

	Step	Check	Yes	No
1	**CHECK LAN SYSTEM.** Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **2**.	Perform the inspection according to the diagnosis for LAN system.
2	**CHECK SUBMERSION CONDITION.** Check the keyless access CM and environment of equipment, and check the harness for any trace of water submersion.	Is there any trace of water submersion?	Take necessary measures against water submersion and replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>

O: DTC B2282 VEHICLE SPEED SIGNAL CORRELATION

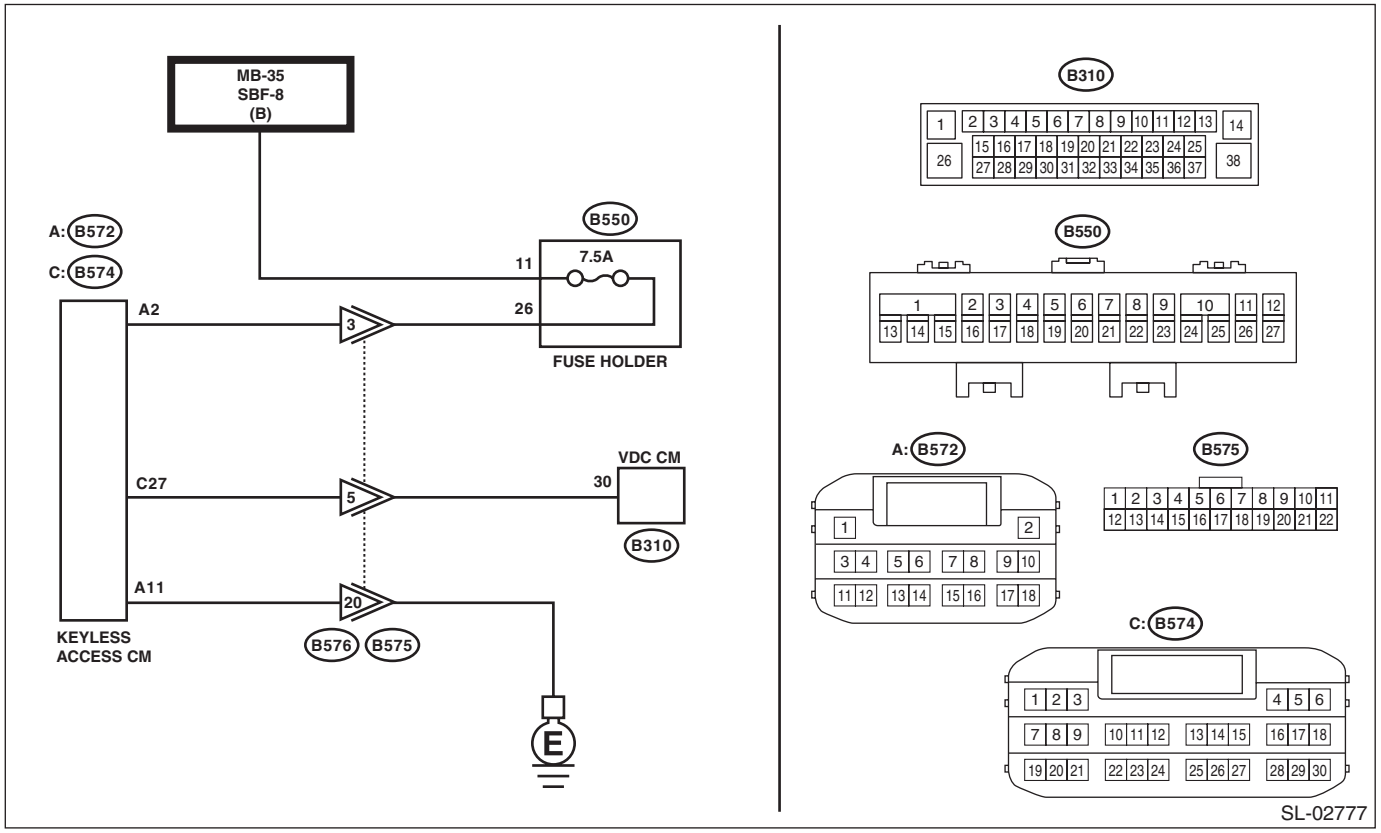
DTC DETECTING CONDITION:

When the vehicle speed signal transmitted from VDC via solid line and the vehicle speed signal transmitted from VDC via CAN communication line do not match.



CAUTION:

For replacement procedure of keyless access CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.



WIRING DIAGRAM:

Push button start system <Ref. to WI-303, WIRING DIAGRAM, Push Button Start System.>

- Engine type: FA

- Engine type: EJ

Step		Check	Yes	No
1	**CHECK LAN SYSTEM.** Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **2**.	Perform the inspection according to the diagnosis for LAN system.
2	**CHECK COMBINATION METER.** Check that the speedometer is displayed normally.	Is the check result OK?	Go to step **3**.	Check the VDC. <Ref. to VDC(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>
3	**CHECK CURRENT DATA.** Check the current data display of «Keyless Access with Push Button Start» using Subaru Select Monitor. <Ref. to KPS(diag)-27, Read Current Data.> • «Vehicle speed signal»	Is the display normal according to the parked state or driving state?	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.	Go to step **4**.

	Step	Check	Yes	No
4	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the keyless access CM connector. 2) Disconnect the combination meter connector. 3) Using a tester, measure the resistance between the keyless access CM connector and VDC CM connector. ***Connector & terminal*** ***Engine type FA with EyeSight*** ***(B574) No. 27 — (B310) No. 26:*** ***Engine type FA without EyeSight*** ***(B574) No. 27 — (B310) No. 30:***	Is the resistance less than 1 Ω?	Go to step **5**.	Repair or replace the open circuit of harness.
5	**CHECK HARNESS (OPEN CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 27 — Chassis ground:***	Is the resistance 30 kΩ or more?	Go to step **6**.	Repair or replace the short circuit of the harness.
6	**CHECK KEYLESS ACCESS CM.** 1) Connect each connector. 2) Using the Subaru Select Monitor, measure the waveform between the terminals of keyless access CM connectors. ***Connector & terminal*** ***(B574) No. 27 — Chassis ground:***	Is 3.54 Hz displayed when the vehicle is driven approx. at 5 km/h (3 MPH)?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Check the VDC. <Ref. to VDC(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

P: DTC B2283 VEHICLE SPEED SENSOR

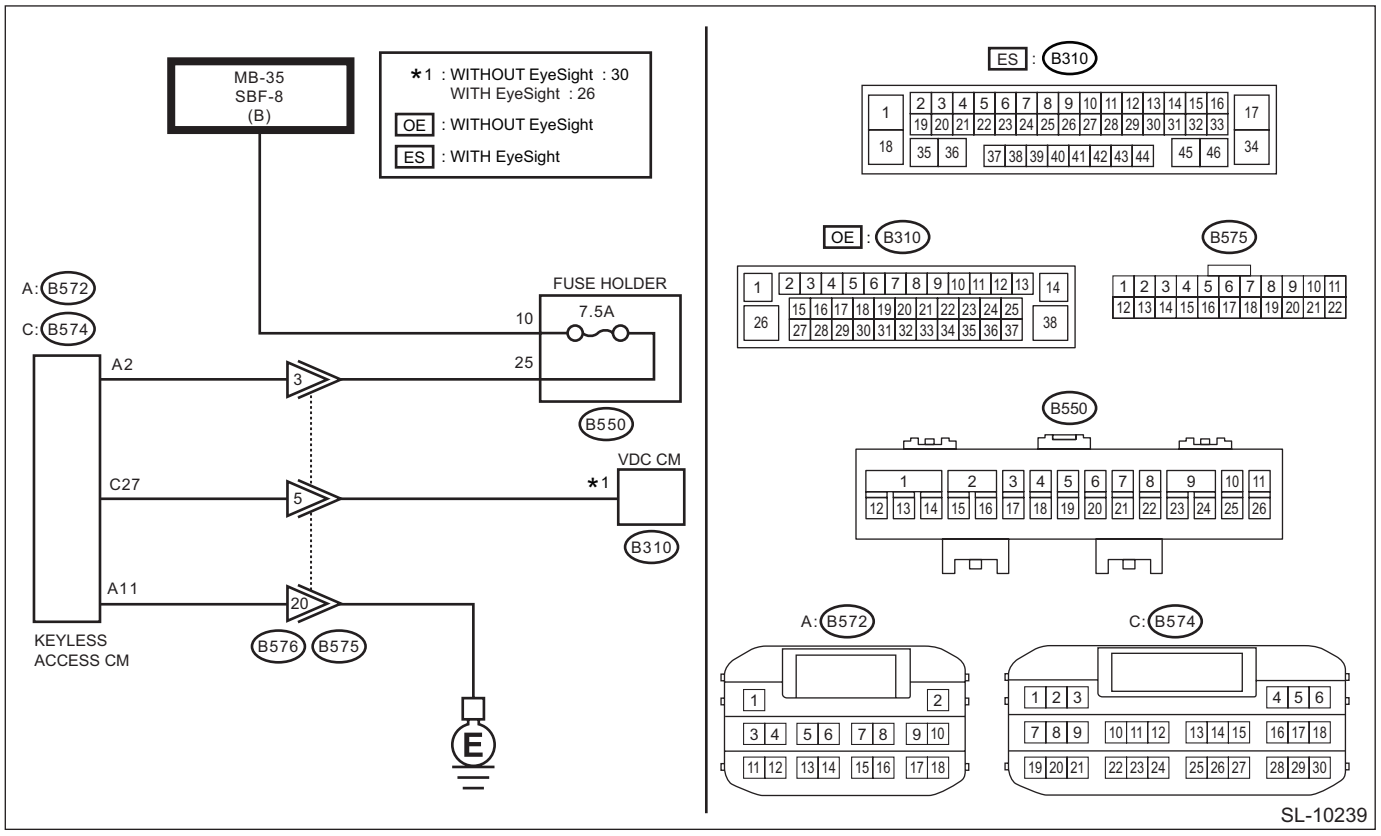
DTC DETECTING CONDITION:

Either of the following malfunctions is detected. (Vehicle speed sensor failure is detected.)

- Vehicle speed signal failure detection 1: Excessive deceleration detection
- Vehicle speed signal failure detection 2: Engine speed interlock detection

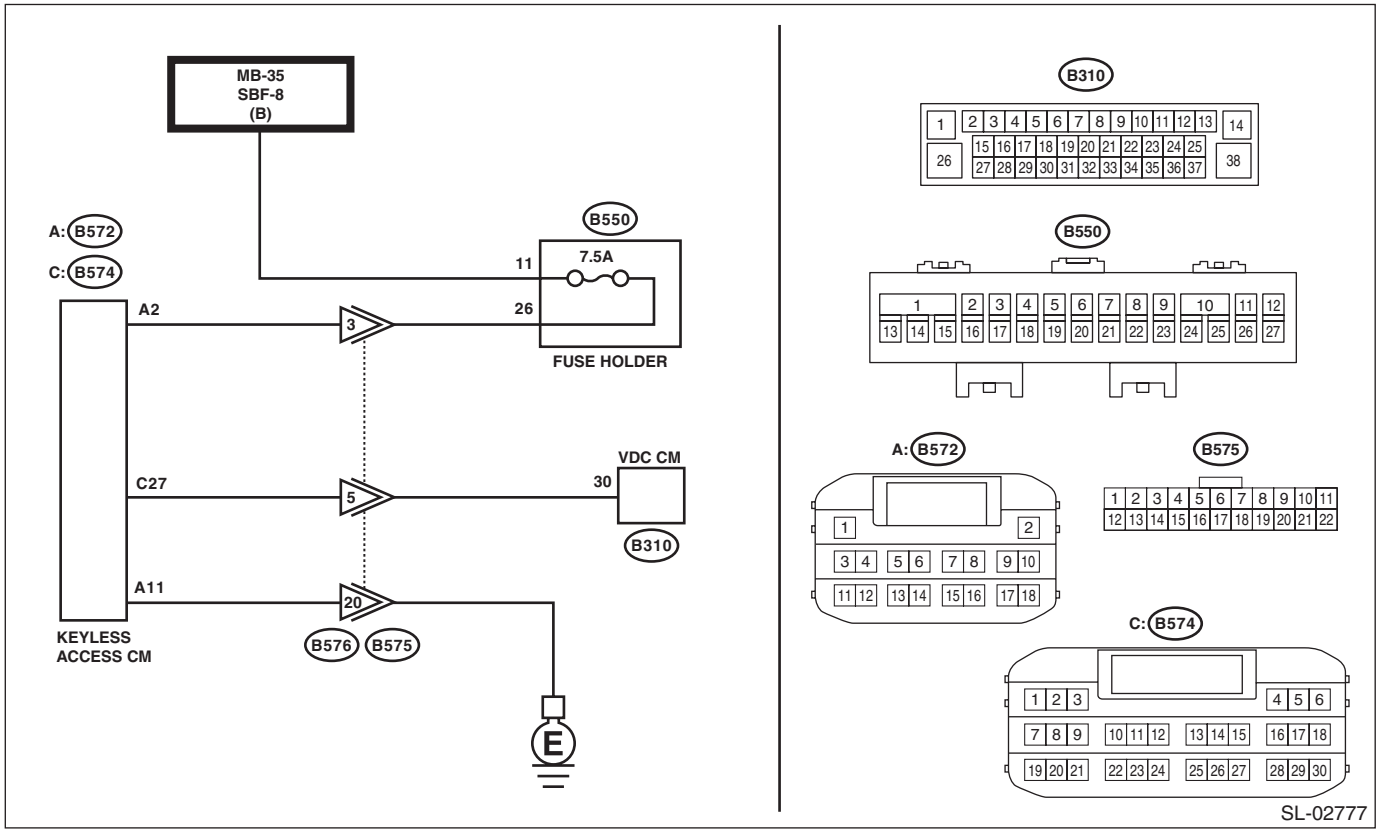
TROUBLE SYMPTOM:

The steering lock cannot be released.



CAUTION:

For replacement procedure of keyless access CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.



WIRING DIAGRAM:

Push button start system <Ref. to WI-303, WIRING DIAGRAM, Push Button Start System.>

- Engine type: FA

- Engine type: EJ

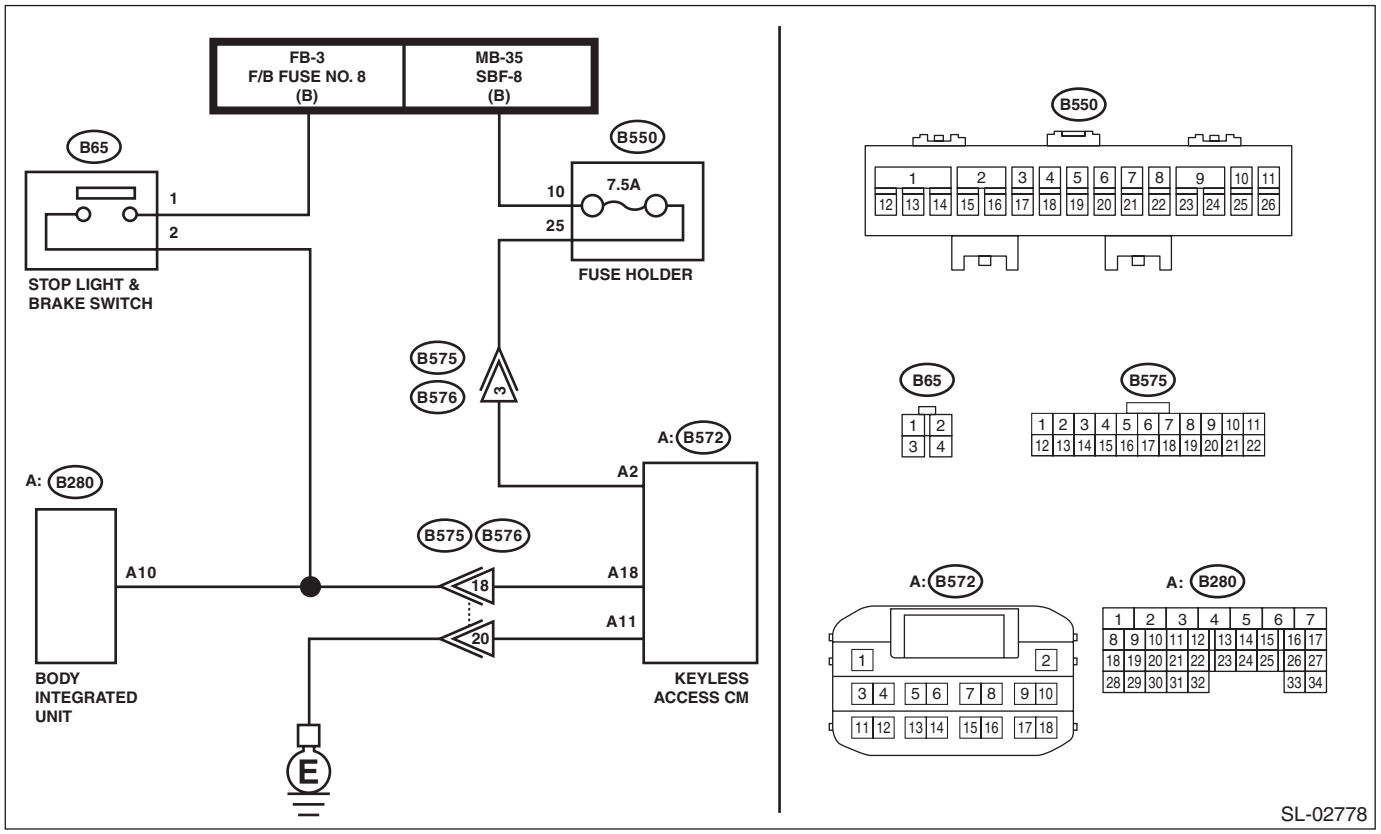
Step		Check	Yes	No
1	**CHECK LAN SYSTEM.** Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **2**.	Perform the inspection according to the diagnosis for LAN system.
2	**CHECK COMBINATION METER.** Check that the speedometer is displayed normally.	Is the check result OK?	Go to step **3**.	Check the VDC. <Ref. to VDC(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>
3	**CHECK CURRENT DATA.** Check the current data display of «Keyless Access with Push Button Start» using Subaru Select Monitor. <Ref. to KPS(diag)-27, Read Current Data.> • «Vehicle speed signal»	Is the display normal according to the parked state or driving state?	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.	Go to step **4**.

	Step	Check	Yes	No
4	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the keyless access CM connector. 2) Disconnect the combination meter connector. 3) Using a tester, measure the resistance between the keyless access CM connector and VDC CM connector. ***Connector & terminal*** ***Engine type FA with EyeSight*** ***(B574) No. 27 — (B310) No. 26:*** ***Engine type FA without EyeSight*** ***(B574) No. 27 — (B310) No. 30:***	Is the resistance less than 1 Ω?	Go to step **5**.	Repair or replace the open circuit of harness.
5	**CHECK HARNESS (OPEN CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 27 — Chassis ground:***	Is the resistance 30 kΩ or more?	Go to step **6**.	Repair or replace the short circuit of the harness.
6	**CHECK KEYLESS ACCESS CM.** 1) Connect each connector. 2) Using the Subaru Select Monitor, measure the waveform between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 27 — Chassis ground:***	Is 3.54 Hz displayed when the vehicle is driven approx. at 5 km/h (3 MPH)?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Check the VDC. <Ref. to VDC(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

Q: DTC B2284 BRAKE SIGNAL CORRELATION

DTC DETECTING CONDITION:

When the brake signal transmitted via solid line and the brake signal transmitted via CAN communication line do not match.



TROUBLE SYMPTOM:

CAUTION:

For replacement procedure of keyless access CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

WIRING DIAGRAM:

Stop light system <Ref. to WI-351, WIRING DIAGRAM, Stop Light System.>

Step		Check	Yes	No
1	**CHECK LAN SYSTEM.** Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **2**.	Perform the inspection according to the diagnosis for LAN system.
2	**CHECK CURRENT DATA.** Check the current data display of «Keyless Access with Push Button Start» using Subaru Select Monitor. <Ref. to KPS(diag)-27, Read Current Data.> • «Stop light SW»	Is DTC displayed normally according to the brake pedal operation?	Go to step **3**.	Check the stop light system.
3	**CHECK CURRENT DATA.** Confirm the current data display of «Body Control» using Subaru Select Monitor. <Ref. to KPS(diag)-27, Read Current Data.> • «Stop light SW»	Is DTC displayed normally according to the brake pedal operation?	Go to step **4**.	Check body integrated unit <Ref. to BC(diag)-2, PROCEDURE, Basic Diagnostic Procedure.> and the stop light switch circuit.

	Step	Check	Yes	No
4	**CHECK FUSE.** Check the fuse. <Ref. to SL-8, Relay and Fuse.>	Is the check result OK?	Go to step **5**.	Replace the fuse. When the replaced fuse is blown immediately, check the power supply circuit for short-circuited.
5	**CHECK HARNESS.** 1) Disconnect the keyless access CM connector. 2) Using a tester, measure the voltage between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 2 (+) — Chassis ground (–):***	Is the voltage 9.5 — 16 V?	Go to step **6**.	Check the power supply circuit.
6	**CHECK HARNESS (OPEN CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 11 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **7**.	Repair or replace the open circuit of harness.
7	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the stop light switch connector. 2) Using a tester, measure the resistance between the keyless access CM connector and stop light switch connector. ***Connector & terminal*** ***(B572) No. 18 — (B65) No. 2:***	Is the resistance less than 1 Ω?	Go to step **8**.	Repair or replace the open circuit of harness.
8	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 18 — Chassis ground:***	Is the resistance 10 kΩ or more?	Go to step **9**.	Repair or replace the short circuit of the harness.
9	**CHECK HARNESS.** Using a tester, measure the voltage between the keyless access CM connector and chassis ground when the brake pedal is depressed. ***Connector & terminal*** ***(B572) No. 18 (+) — Chassis ground (–):***	Does the voltage change as follows? 1 V or less (brake pedal not depressed) → 11 — 14 V (brake pedal depressed)	Replace the keyless access CM. <Ref. to SL-100, REMOVAL, Keyless Access CM.>	Check the power supply circuit of stop light switch.

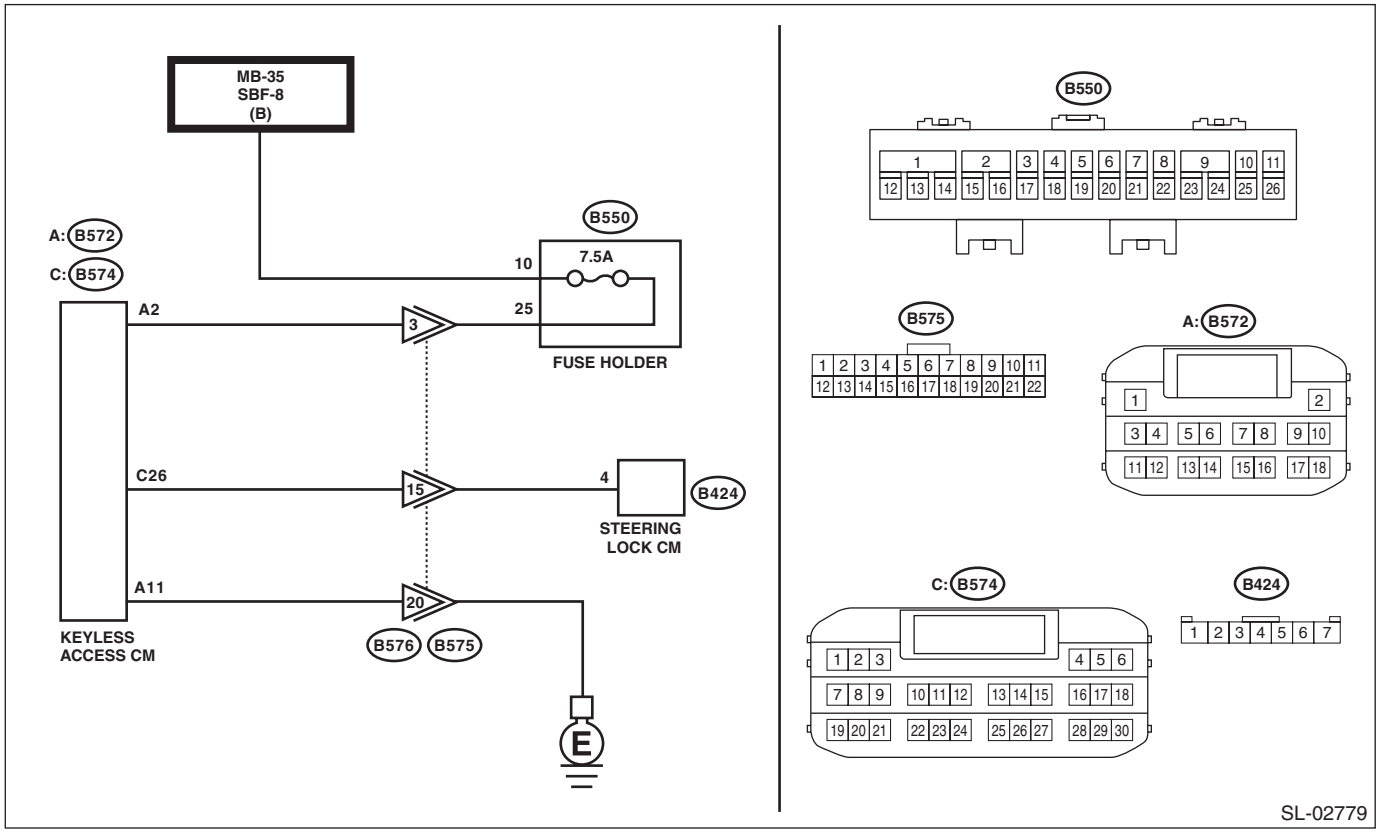
R: DTC B2285 STEERING LOCK POSITION SIGNAL CORRELATION

DTC DETECTING CONDITION:

When the steering lock position signal transmitted from the steering lock CM via solid line and the steering lock position signal transmitted via LIN communication system do not match.

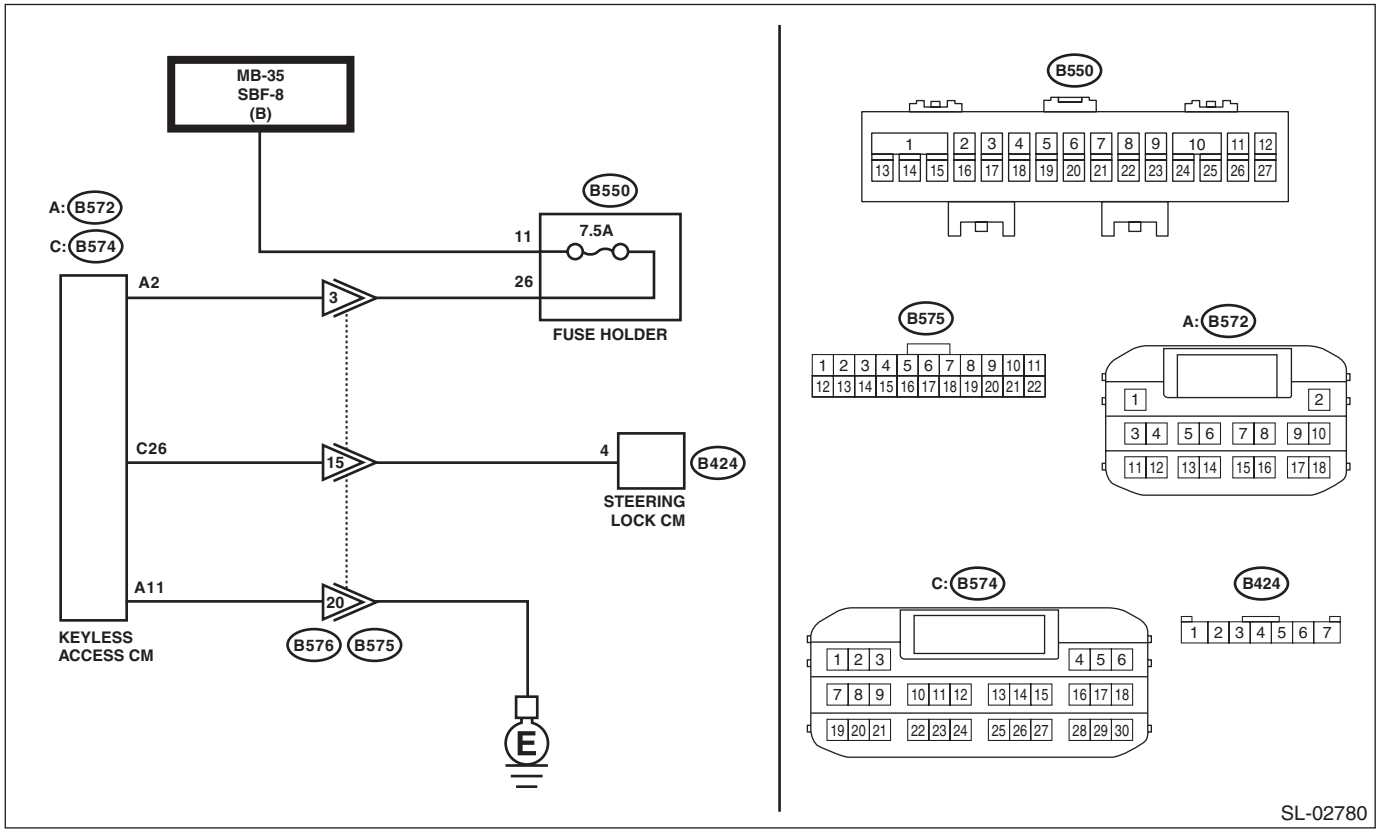
TROUBLE SYMPTOM:

- There are conditions when the steering lock is not released.
- Engine will not start.



CAUTION:

For replacement procedure of keyless access CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.



WIRING DIAGRAM:

Push button start system <Ref. to WI-303, WIRING DIAGRAM, Push Button Start System.>

- Engine type: FA

- Engine type: EJ

Step		Check	Yes	No
1	**CHECK LAN SYSTEM.** Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **2**.	Perform the inspection according to the diagnosis for LAN system.
2	**CHECK DTC.** Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B2785 displayed?	Perform the diagnosis of DTC B2785. <Ref. to KPS(diag)-77, DTC B2785 LIN COMMUNICATION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>	Go to step **3**.

	Step	Check	Yes	No
3	**CHECK CURRENT DATA.** Check the current data display of «Keyless Access with Push Button Start» using Subaru Select Monitor. <Ref. to KPS(diag)-27, Read Current Data.> When locked: • Lock side sensor status: ON • Unlock side sensor status: OFF • Lock confirmation: Confirmed • Unlock confirmation: Not confirmed When unlocked: • Lock side sensor status: OFF • Unlock side sensor status: ON • Lock confirmation: Not confirmed • Unlock confirmation: Confirmed NOTE: To lock the steering lock, turn off the power, and open → close, or close → open the driver's door. To unlock the steering lock, turn the ignition switch to ACC ON or IGN ON.	Are the readings as shown on the left according to the steering lock status?	Go to step **4**.	Replace the steering lock CM. <Ref. to SL-104, REMOVAL, Steering Lock CM.>
4	**CHECK CURRENT DATA.** Check the current data display of «Keyless Access with Push Button Start» using Subaru Select Monitor. <Ref. to KPS(diag)-27, Read Current Data.> When locked: • Steering unlock switch: OFF When unlocked: • Steering unlock switch: ON NOTE: To lock the steering lock, turn off the power, and open → close, or close → open the driver's door. To unlock the steering lock, turn the ignition switch to ACC ON or IGN ON.	Are the readings as shown on the left according to the steering lock status?	Replace the keyless access CM. <Ref. to SL-100, REMOVAL, Keyless Access CM.>	Go to step **5**.
5	**CHECK FUSE.** Check the fuse. <Ref. to SL-8, Relay and Fuse.>	Is the check result OK?	Go to step **6**.	Replace the fuse. When the replaced fuse is blown immediately, check the power supply circuit for short-circuited.
6	**CHECK HARNESS.** 1) Disconnect the keyless access CM connector. 2) Using a tester, measure the voltage between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 2 (+) — Chassis ground (–):***	Is the voltage 9.5 — 16 V?	Go to step **7**.	Check the power supply circuit.
7	**CHECK HARNESS (OPEN CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 11 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **8**.	Repair or replace the open circuit of harness.

	Step	Check	Yes	No
8	**CHECK HARNESS.** Using a tester, measure the resistance between the steering lock CM connector and chassis ground. ***Connector & terminal*** ***(B424) No. 4 — Chassis ground:***	Does the following occur? Steering lock: 10 kΩ or more → Steering unlock: less than 1 Ω	Go to step **9**.	Replace the steering lock CM. <Ref. to SL-104, REMOVAL, Steering Lock CM.>
9	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the keyless access CM connector. 2) Disconnect the steering lock CM connector. 3) Using a tester, measure the resistance between the keyless access CM connector and steering lock CM connector. ***Connector & terminal*** ***(B574) No. 26 — (B424) No. 4:***	Is the resistance less than 1 Ω?	Go to step **10**.	Repair or replace the open circuit of harness.
10	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 26 — Chassis ground:***	Is the resistance 10 kΩ or more?	Replace the keyless access CM. <Ref. to SL-100, REMOVAL, Keyless Access CM.>	Repair or replace the short circuit of the harness.

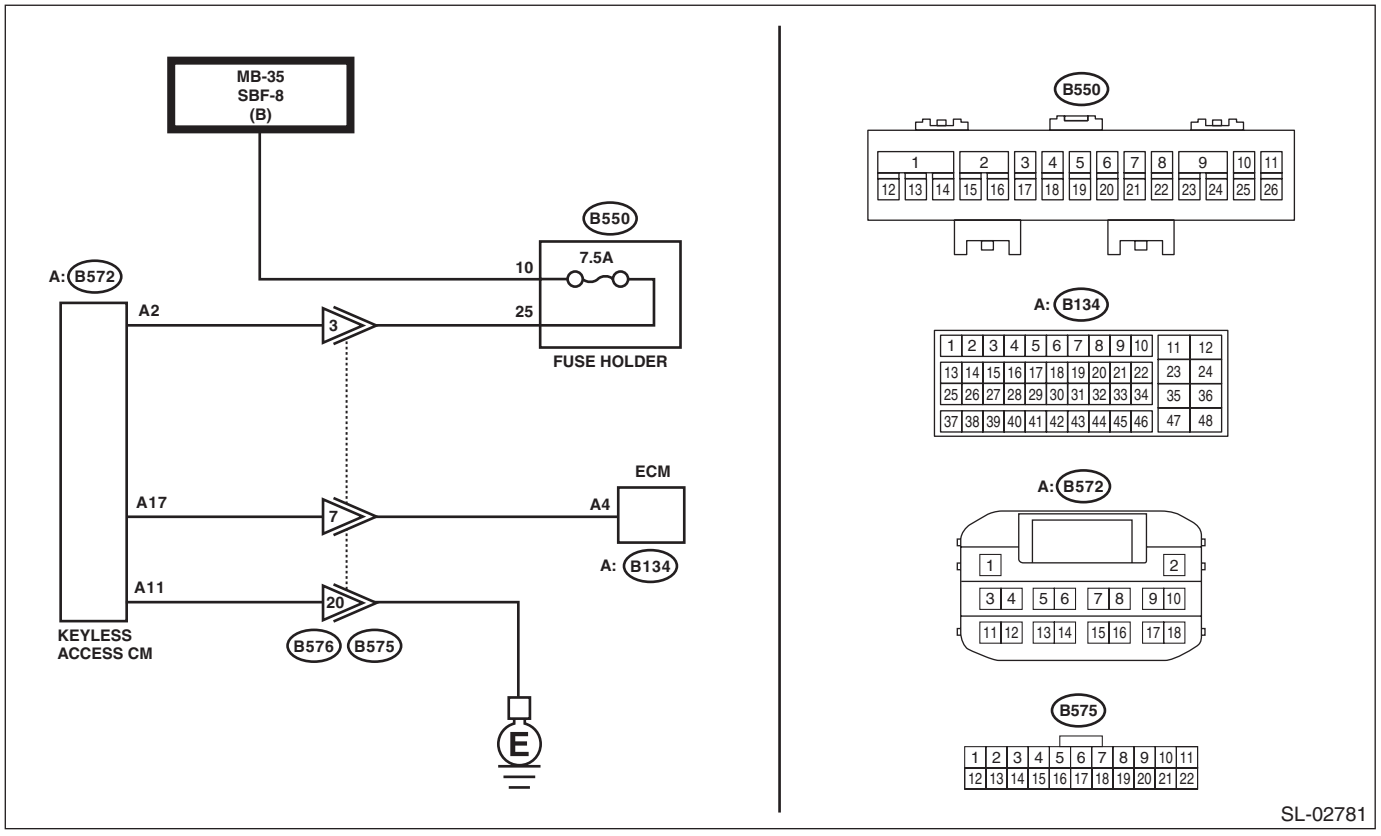
S: DTC B2286 ENGINE SPEED SIGNAL(WITHOUT Auto Start Stop)

DTC DETECTING CONDITION:

When the engine speed signal transmitted from the ECM via solid line and the engine speed signal transmitted from the ECM via CAN communication line do not match.

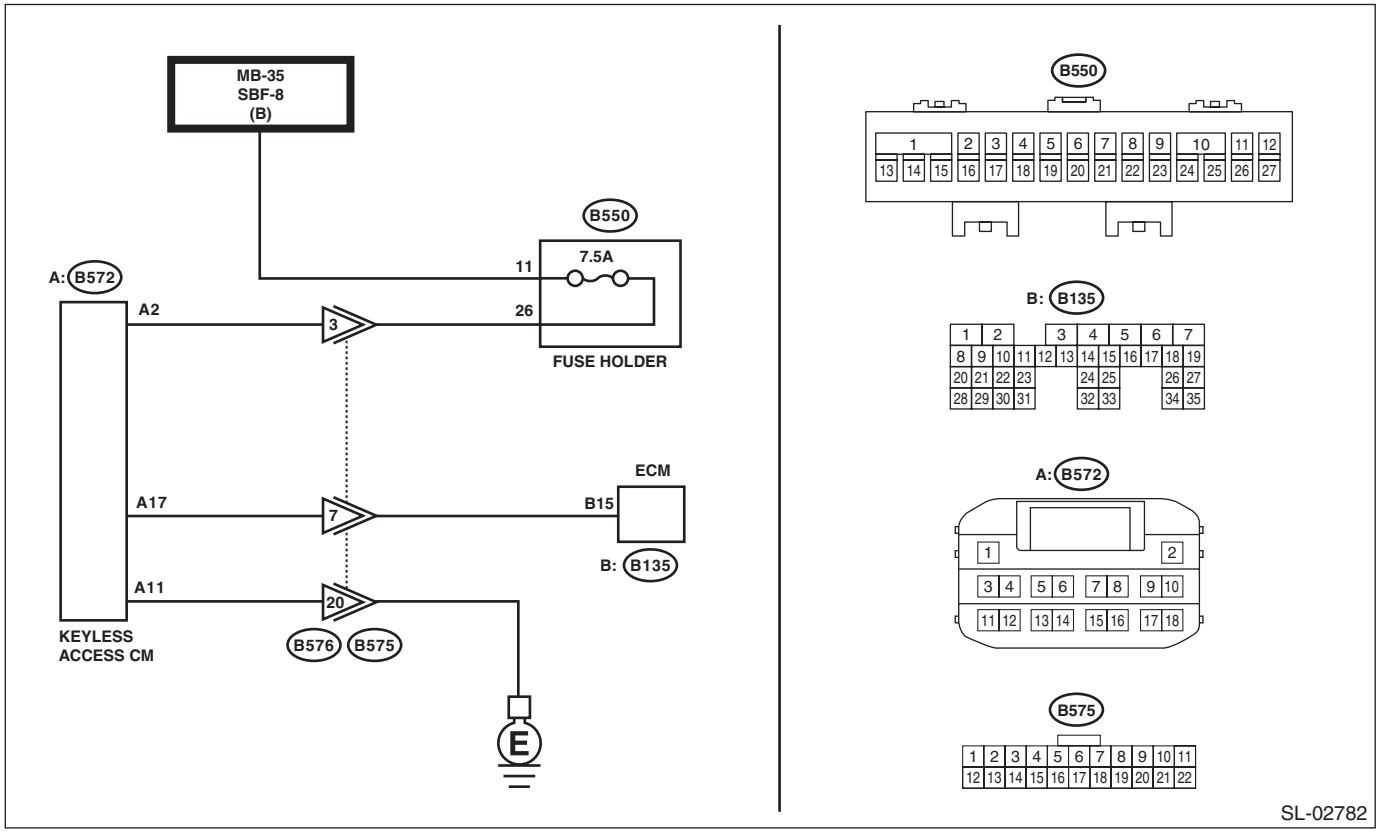
TROUBLE SYMPTOM:

Cannot start the engine, or the engine stops after starting.



CAUTION:

For replacement procedure of keyless access CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.



WIRING DIAGRAM:

Push button start system <Ref. to WI-303, WIRING DIAGRAM, Push Button Start System.>

- Engine type: FA

- Engine type: EJ

Step		Check	Yes	No
1	**CHECK LAN SYSTEM.** Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **2**.	Perform the inspection according to the diagnosis for LAN system.
2	**CHECK COMBINATION METER.** Confirm that the speedometer is displayed normally.	Is the check result OK?	Go to step **3**.	Perform the diagnosis for the engine. <Ref. to EN(w/o STI)(diag)-2, PROCEDURE, Basic Diagnostic Procedure.> <Ref. to EN(STI)(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

	Step	Check	Yes	No
3	**CHECK CURRENT DATA.** Check the current data display of «Keyless Access with Push Button Start» using Subaru Select Monitor. <Ref. to KPS(diag)-27, Read Current Data.> • Engine speed	Can the data be read normally?	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.	Go to step **4**.
4	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the keyless access CM connector. 2) Disconnect the ECM connector. 3) Using a tester, measure the resistance between the keyless access CM connector and ECM connector. ***Connector & terminal*** ***Engine type: FA*** ***(B572) No. 17 — (B134) No. 4:*** ***Engine type: EJ*** ***(B572) No. 17 — (B135) No. 15:***	Is the resistance less than 1 Ω?	Go to step **5**.	Repair or replace the open circuit of harness.
5	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 17 — Chassis ground:***	Is the resistance 10 kΩ or more?	Go to step **6**.	Repair or replace the short circuit of the harness.
6	**CHECK HARNESS.** 1) Connect the keyless access CM connector and ECM connector. 2) Using the Subaru Select Monitor, measure the waveform between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 17 — Chassis ground:***	Does the pulse stop when the engine is stopped, and does the pulse generate when the engine is started?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Perform the diagnosis for the engine. <Ref. to EN(w/o STI)(diag)-87, PROCEDURE, Diagnostics for Engine Starting Failure.> <Ref. to EN(STI)(diag)-77, PROCEDURE, Diagnostics for Engine Starting Failure.>

T: DTC B2779 REMOTE CONTROL ENGINE STARTER COLLATION

DTC DETECTING CONDITION:
When the keyless access CM does not respond to engine start even when the remote control engine starter is ON, or when there is a code mismatch.
TROUBLE SYMPTOM:
Remote engine starter does not function.

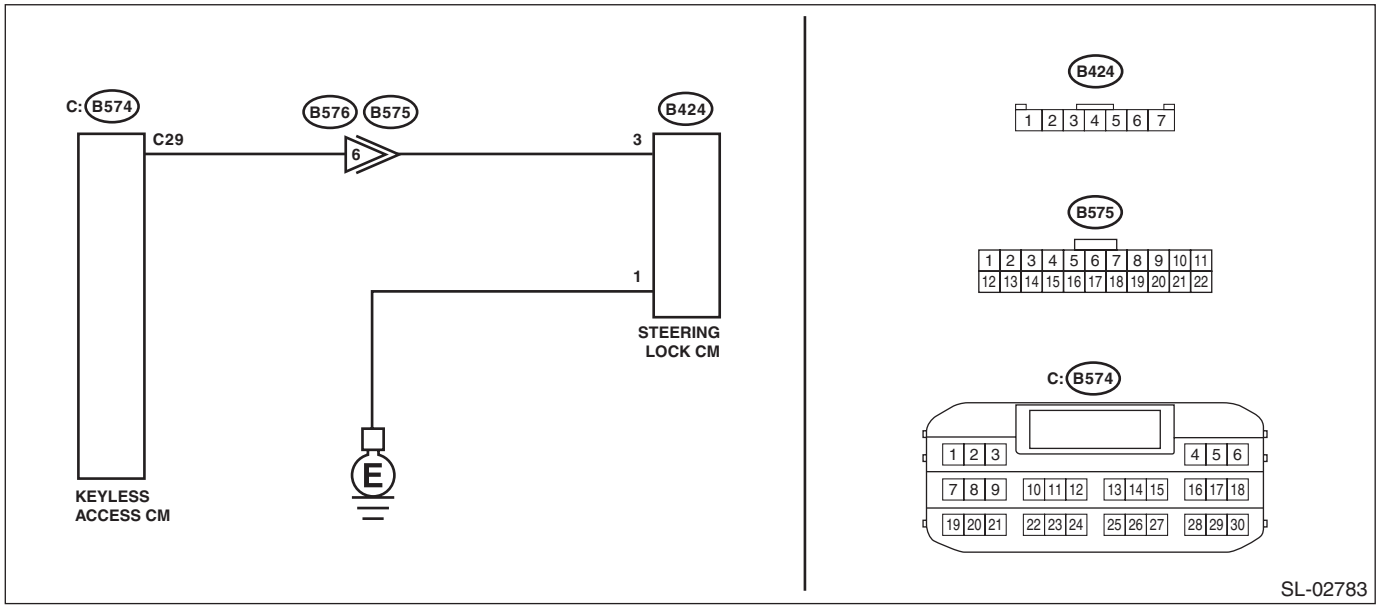
Step		Check	Yes	No
1	**REGISTER THE REMOTE ENGINE STARTER.** 1) Clear the DTC. <Ref. to KPS(diag)-33, Clear Memory Mode.> 2) Register the remote engine starter using the Subaru Select Monitor. (Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.) 3) Read the DTC again. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B2779 displayed?	Replace the remote engine starter.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

U: DTC B2781 STEERING LOCK CM CONTROL CIRCUIT

DTC DETECTING CONDITION:
- When malfunction is detected in lock/unlock position detection sensor.
- When the open or short circuit in the steering lock motor drive circuit is detected.

TROUBLE SYMPTOM:
- The steering lock cannot be released.
- Engine will not start.

CAUTION:
For replacement procedure of steering lock CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.



NOTE:
When all ECMs connected to collation system LIN bus cannot communicate with the keyless access CM, DTC B2785 is output.

Step		Check	Yes	No
1	**CHECK DTC.** Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B2785 displayed?	Perform the diagnosis of DTC B2785. <Ref. to KPS(diag)-77, DTC B2785 LIN COMMUNICATION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>	Replace the steering lock CM. <Ref. to SL-104, Steering Lock CM.>

V: DTC B2782 STEERING LOCK DRIVE REQUEST SIGNAL CORRELATION

DTC DETECTING CONDITION:
When the open or short circuit in the steering lock motor power supply circuit is detected.
TROUBLE SYMPTOM:
- The steering lock cannot be released.
- Engine will not start.

CAUTION:
For replacement procedure of keyless access CM and steering lock CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.
WIRING DIAGRAM:
Push button start system <Ref. to WI-303, WIRING DIAGRAM, Push Button Start System.>

	Step	Check	Yes	No
1	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the steering lock CM connector. 2) Using a tester, measure the resistance between the steering lock CM connector and chassis ground. ***Connector & terminal*** ***(B424) No. 1 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **2**.	Repair or replace the open circuit of harness.
2	**CHECK STEERING LOCK CM.** 1) Connect the steering lock CM connector. 2) Set to ACC OFF, IGN OFF, and shift position P. 3) Using a tester, open the door, and measure the voltage between terminals of steering lock CM connector when the steering lock motor is driven. ***Connector & terminal*** ***(B424) No. 3 (+) — (B424) No. 1 (–):***	Does the voltage change as follows? 1 V or less (steering lock motor in operation) → 11 — 14 V (steering lock motor not in operation)	Go to step **3**.	Go to step **4**.

	Step	Check	Yes	No
3	**CHECK DTC.** 1) Turn the ignition switch to ON. 2) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 3) Turn the ignition switch to OFF. 4) Disconnect the battery ground cable and reconnect it, and then clear the abnormal information displayed on the data monitor. 5) Turn the ignition switch to ON. 6) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B2782 displayed?	Replace the steering lock CM. <Ref. to SL-104, Steering Lock CM.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
4	**CHECK CONNECTOR.** 1) Disconnect the steering lock CM connector. 2) Disconnect the keyless access CM connector. 3) Check each connector.	Is the check result OK?	Go to step **5**.	Repair or replace the connector.
5	**CHECK HARNESS (OPEN CIRCUIT).** Using a tester, measure the resistance between steering lock CM connector and keyless access CM connector. ***Connector & terminal*** ***(B574) No. 29 — (B424) No. 3:***	Is the resistance less than 1 Ω?	Go to step **6**.	Repair or replace the open circuit of harness.
6	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between steering lock CM connector and chassis ground, and between keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B424) No. 3 — Chassis ground:*** ***(B574) No. 29 — Chassis ground:***	Is the resistance 10 kΩ or more?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Repair or replace the short circuit of the harness.

W: DTC B2784 ANTENNA CIRCUIT (PUSH ENGINE SWITCH)

DTC DETECTING CONDITION:
When open or short circuit occurs in the antenna coil.
TROUBLE SYMPTOM:
The keyless access function may not be operable.

CAUTION:
For replacement procedure of keyless access CM and steering lock CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.
WIRING DIAGRAM:
Immobilizer system <Ref. to WI-244, WIRING DIAGRAM, Immobilizer System.>

Step		Check	Yes	No
1	**CHECK STEERING LOCK CM.** 1) Disconnect the push button ignition switch connector. 2) Disconnect the keyless access CM connector. 3) Using a tester, measure the resistance between the push button ignition switch connector and the keyless access CM connector terminals. ***Connector & terminal*** ***(i150) No. 14 — (B574) No. 1:*** ***(i150) No. 9 — (B574) No. 9:*** ***(i150) No. 10 — (B574) No. 7:*** ***(i150) No. 8 — (B574) No. 24:***	Is the resistance less than 1 Ω?	Go to step **2**.	Repair or replace the open circuit of harness.
2	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the push button ignition switch connector and chassis ground terminals. ***Connector & terminal*** ***(i150) No. 14 — Chassis ground:*** ***(i150) No. 9 — Chassis ground:*** ***(i150) No. 10 — Chassis ground:***	Is the resistance 10 kΩ or more?	Go to step **3**.	Repair or replace the short circuit of the harness.

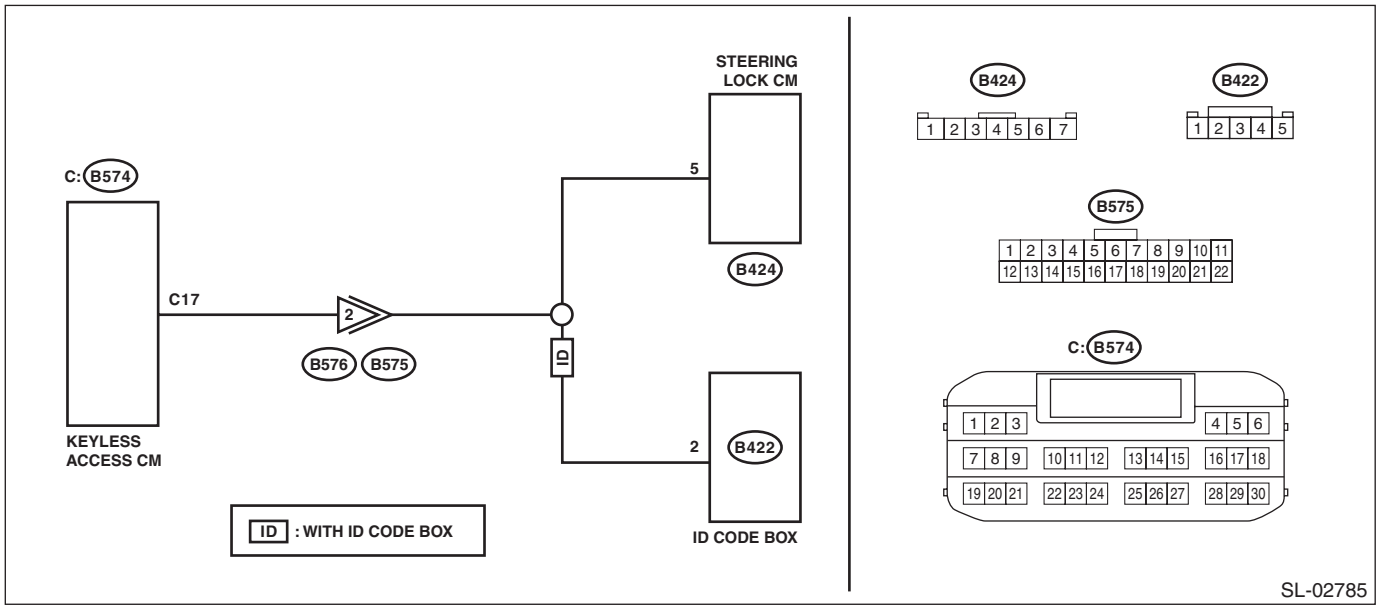
	Step	Check	Yes	No
3	**CHECK PUSH BUTTON IGNITION SWITCH.** 1) Replace the push button ignition switch. <Ref. to SL-106, Push Button Ignition Switch.> 2) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 3) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B2784 displayed?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Malfunction occurred in the push button ignition switch.

X: DTC B2785 LIN COMMUNICATION

DTC DETECTING CONDITION:

When the keyless access CM detected the collation system LIN bus communication error three times in a row.

TROUBLE SYMPTOM:



The keyless access function may not be operable.

CAUTION:

For replacement procedure of keyless access CM and steering lock CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

WIRING DIAGRAM:

Push button start system <Ref. to WI-303, WIRING DIAGRAM, Push Button Start System.>

Step		Check	Yes	No
1	**CHECK DTC.** 1) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 2) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B2785 displayed?	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

	Step	Check	Yes	No
2	**CHECK HARNESS.** 1) Disconnect the keyless access CM connector. 2) Disconnect the steering lock CM connector. 3) Disconnect the ID code box connector. (With ID code box) 4) Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(B574) No. 17 — (B424) No. 5:*** ***(B574) No. 17 — (B422) No. 2: (with ID code box)***	Is the resistance less than 1 Ω?	Go to step **3**.	Repair or replace the open circuit of harness.
3	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(B424) No. 5 — Chassis ground:*** ***(B574) No. 17 — Chassis ground:*** ***(B422) No. 2 — Chassis ground: (with ID code box)***	Is the resistance 10 kΩ or more?	Go to step **4**.	Repair or replace the short circuit of the harness.
4	**CHECK HARNESS.** 1) Connect the keyless access CM connector only. 2) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B2785 displayed?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Go to step **5**.
5	**CHECK ID CODE BOX.** NOTE: For model without ID code box, go to the next step. 1) Connect only the ID code box. 2) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B2785 displayed?	Replace the ID code box. <Ref. to SL-103, ID Code Box.>	Go to step **6**.
6	**CHECK STEERING LOCK CM.** 1) Replace the steering lock CM, and then connect it. <Ref. to SL-104, Steering Lock CM.> 2) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 3) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B2785 displayed?	Replace the steering lock CM. <Ref. to SL-104, Steering Lock CM.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

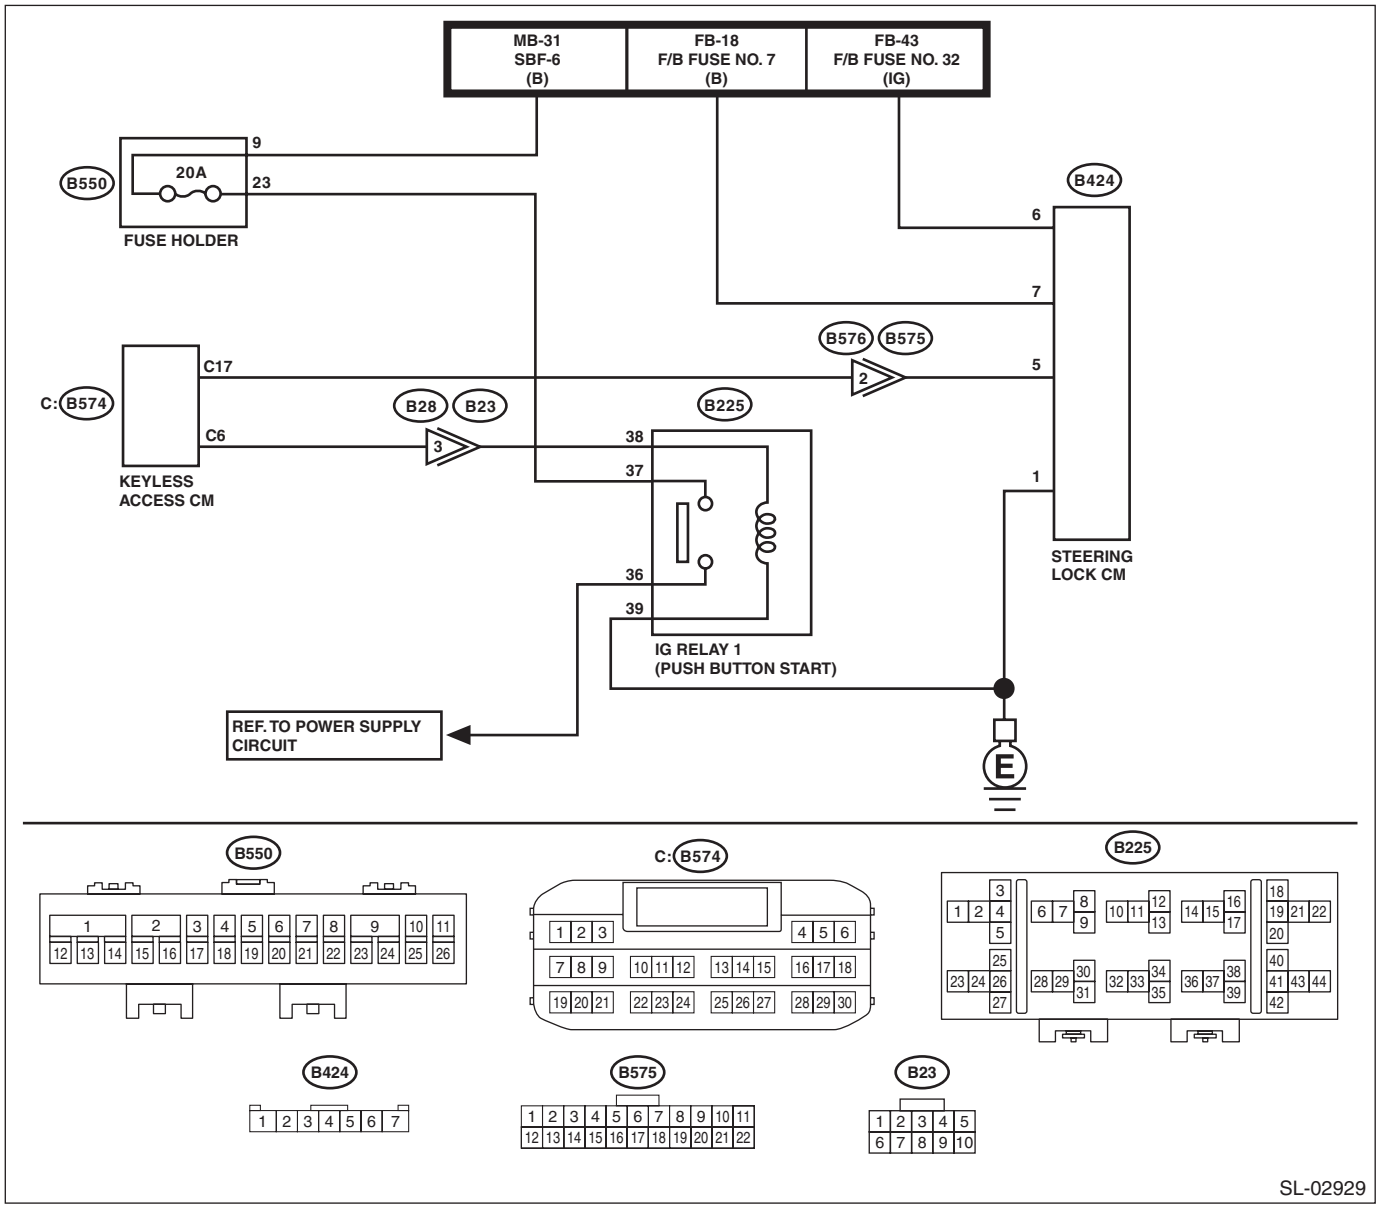
Y: DTC B2786 STEERING LOCK CM COMMUNICATION

DTC DETECTING CONDITION:

When communication between keyless access CM and steering lock CM is interrupted for a set amount of time.

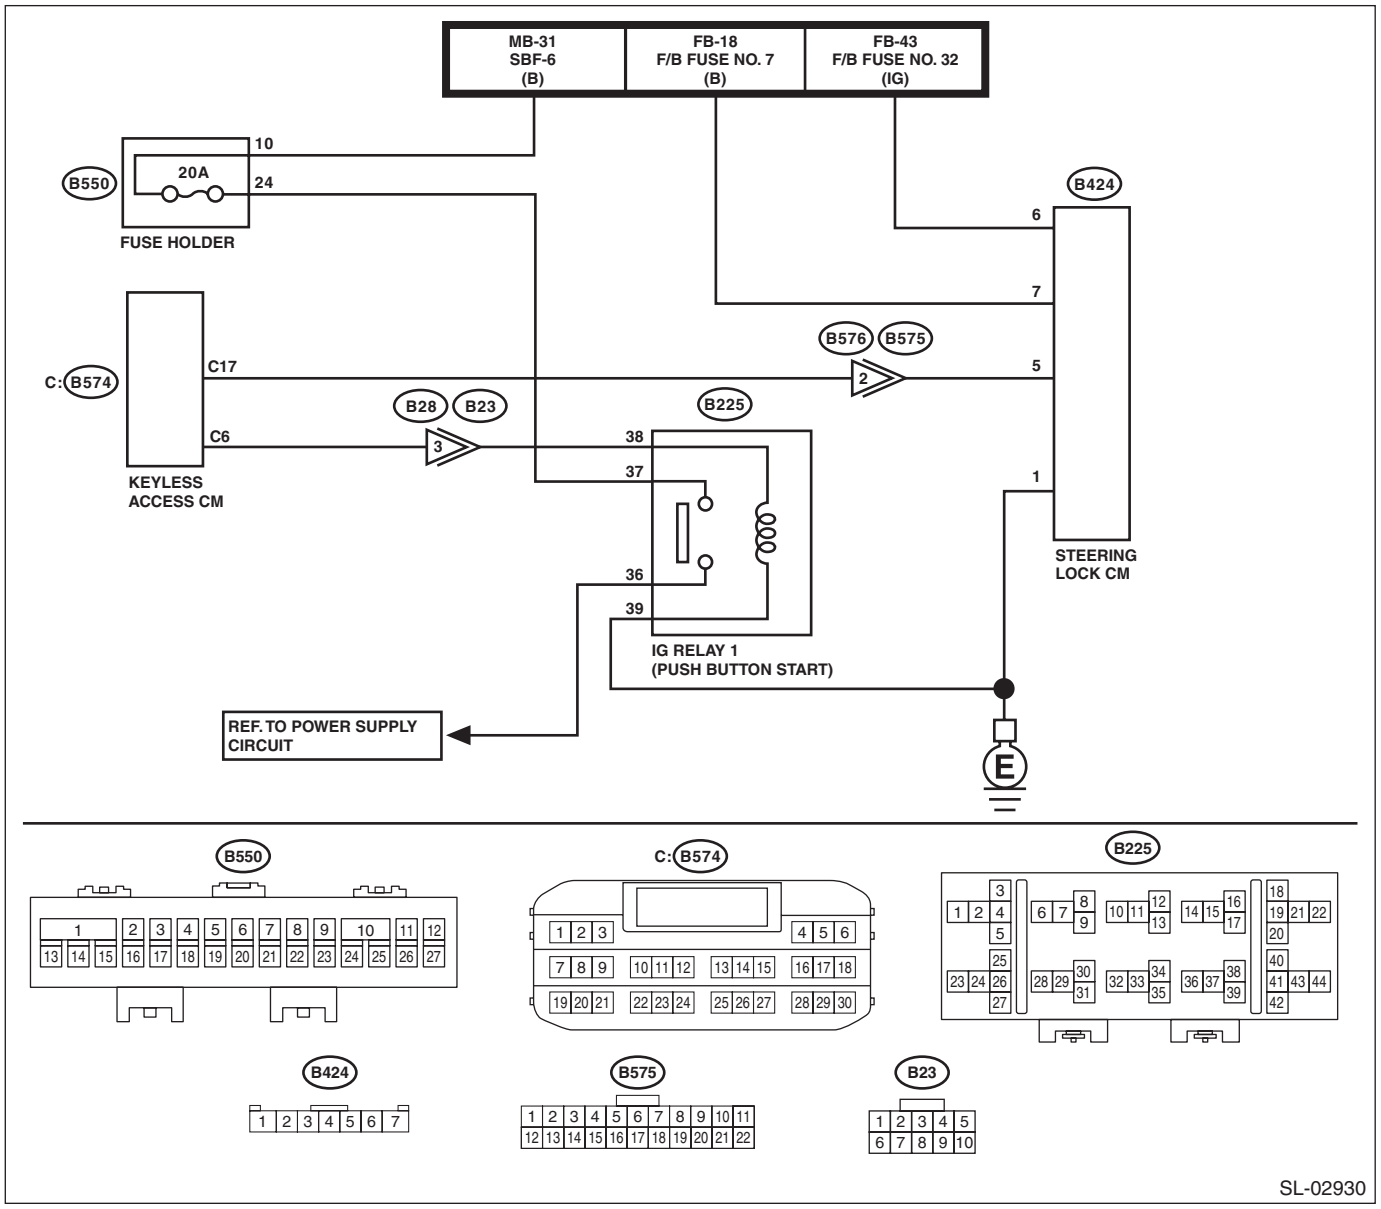
TROUBLE SYMPTOM:

The steering lock cannot be released.



CAUTION:

For replacement procedure of keyless access CM and steering lock CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.



WIRING DIAGRAM:

Push button start system <Ref. to WI-303, WIRING DIAGRAM, Push Button Start System.>

- Engine type: FA

- Engine type: EJ

Step		Check	Yes	No
1	**CHECK DTC.** Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Are DTCs other than DTC B2786 displayed?	Perform the diagnosis of DTCs other than B2786.	Go to step **2**.
2	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the keyless access CM connector. 2) Disconnect the steering lock CM connector. 3) Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(B574) No. 17 — (B424) No. 5:***	Is the resistance less than 1 Ω?	Go to step **3**.	Repair or replace the open circuit of harness.

	Step	Check	Yes	No
3	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the keyless access CM and chassis ground. ***Connector & terminal*** ***(B574) No. 17 — Chassis ground:***	Is the resistance 10 kΩ or more?	Go to step **4**.	Repair or replace the short circuit of the harness.
4	**CHECK HARNESS (OPEN CIRCUIT).** Using a tester, measure the resistance between the steering lock CM connector and chassis ground. ***Connector & terminal*** ***(B424) No. 1 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **5**.	Repair or replace the open circuit of harness.
5	**CHECK HARNESS.** 1) Turn the ignition switch to ON. 2) Using a tester, measure the voltage between the steering lock CM connector and chassis ground. ***Connector & terminal*** ***(B424) No. 6 (+) — Chassis ground (–):*** ***(B424) No. 7 (+) — Chassis ground (–):***	Is the voltage 11 — 14 V?	Go to step **6**.	Repair or replace the faulty portion of the power supply circuit.
6	**CHECK STEERING LOCK CM.** 1) Turn the ignition switch to ON. 2) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 3) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B2785 displayed?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Go to step **7**.
7	**CHECK STEERING LOCK CM.** 1) Turn the ignition switch to ON. 2) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 3) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B2786 displayed?	Replace the steering lock CM. <Ref. to SL-104, Steering Lock CM.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

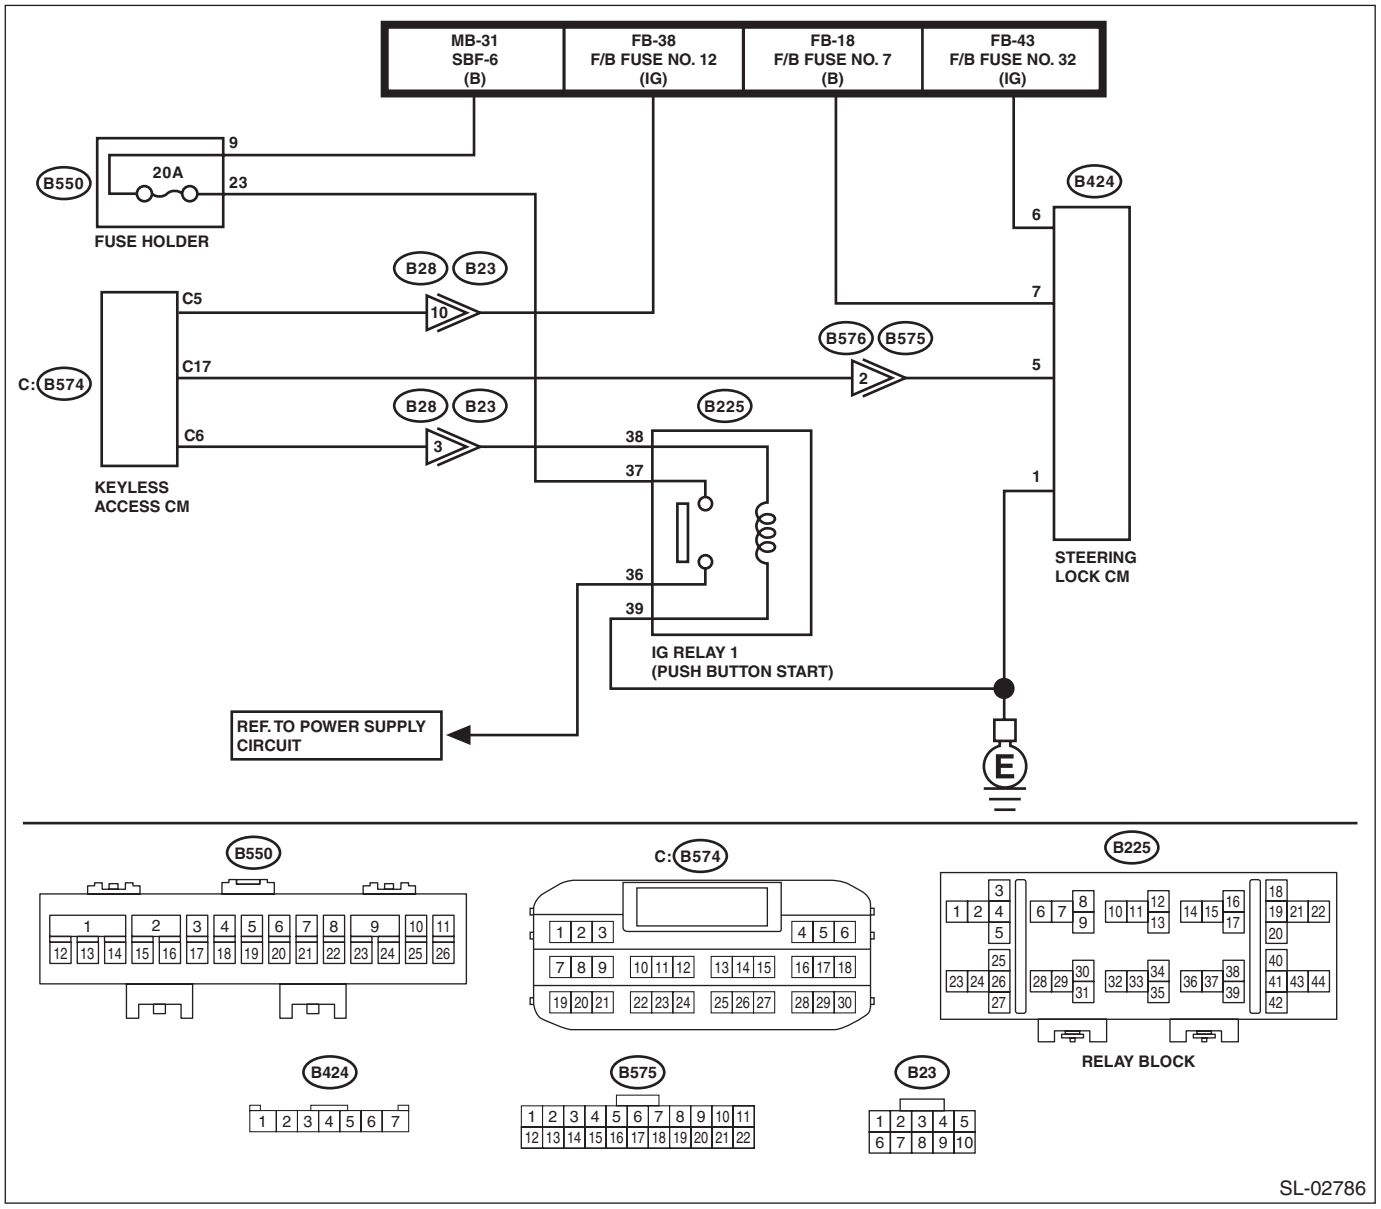
Z: DTC B2788 IGN SIGNAL CORRELATION (STEERING LOCK CM)

DTC DETECTING CONDITION:

When mismatch occurs in the IG1 input of the steering lock CM for both LIN communication line input (IG1 input value of keyless access CM) and solid line input.

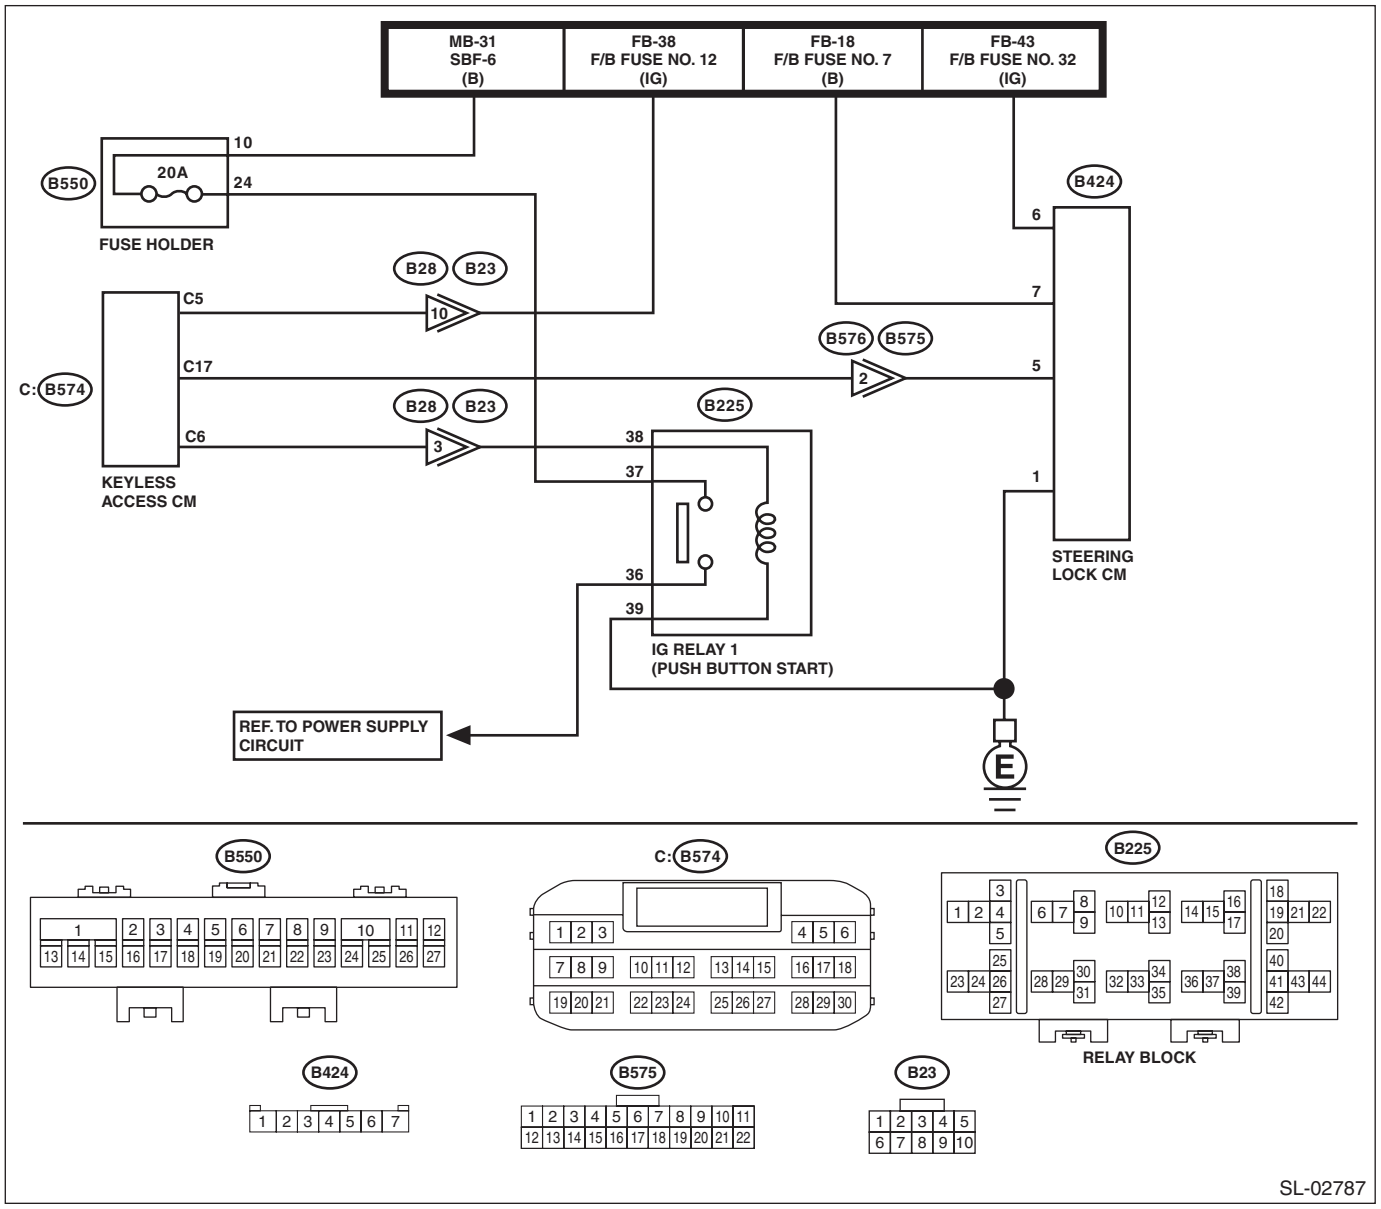
TROUBLE SYMPTOM:

The steering lock cannot be released.



CAUTION:

For replacement procedure of steering lock CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.



WIRING DIAGRAM:

Push button start system <Ref. to WI-303, WIRING DIAGRAM, Push Button Start System.>

- Engine type: FA

- Engine type: EJ

Step		Check	Yes	No
1	**CHECK FUSE.** Check the fuse. <Ref. to SL-8, Relay and Fuse.>	Is the check result OK?	Go to step **2**.	Replace the fuse. When the replaced fuse is blown immediately, check the power supply circuit for short-circuited.
2	**CHECK CURRENT DATA.** Check the current data display of «Keyless Access with Push Button Start» using Subaru Select Monitor. <Ref. to KPS(diag)-27, Read Current Data.> • IGN SW	Is the display normal according to the ignition switch operation?	Go to step **3**.	Go to step **5**.

	Step	Check	Yes	No
3	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the steering lock CM connector. 2) Using a tester, measure the resistance between the steering lock CM connector and chassis ground. ***Connector & terminal*** ***(B424) No. 1 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **4**.	Repair or replace the open circuit of harness.
4	**CHECK HARNESS.** 1) Connect the steering lock CM connector. 2) Using a tester, measure the voltage between the steering lock CM connector terminals. ***Connector & terminal*** ***(B424) No. 6 (+) — (B424) No. 1 (–):***	Is the voltage 11 — 14 V with IG ON? Is the voltage less than 1 V with IG OFF?	Replace the steering lock CM. <Ref. to SL-104, REMOVAL, Steering Lock CM.>	Check the DC power supply circuit.
5	**CHECK DTC.** Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B2271 displayed?	Perform the diagnosis of DTC B2271. <Ref. to KPS(diag)-46, DTC B2271 IGN RELAY CONTROL CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>	Replace the keyless access CM. <Ref. to SL-100, REMOVAL, Keyless Access CM.>

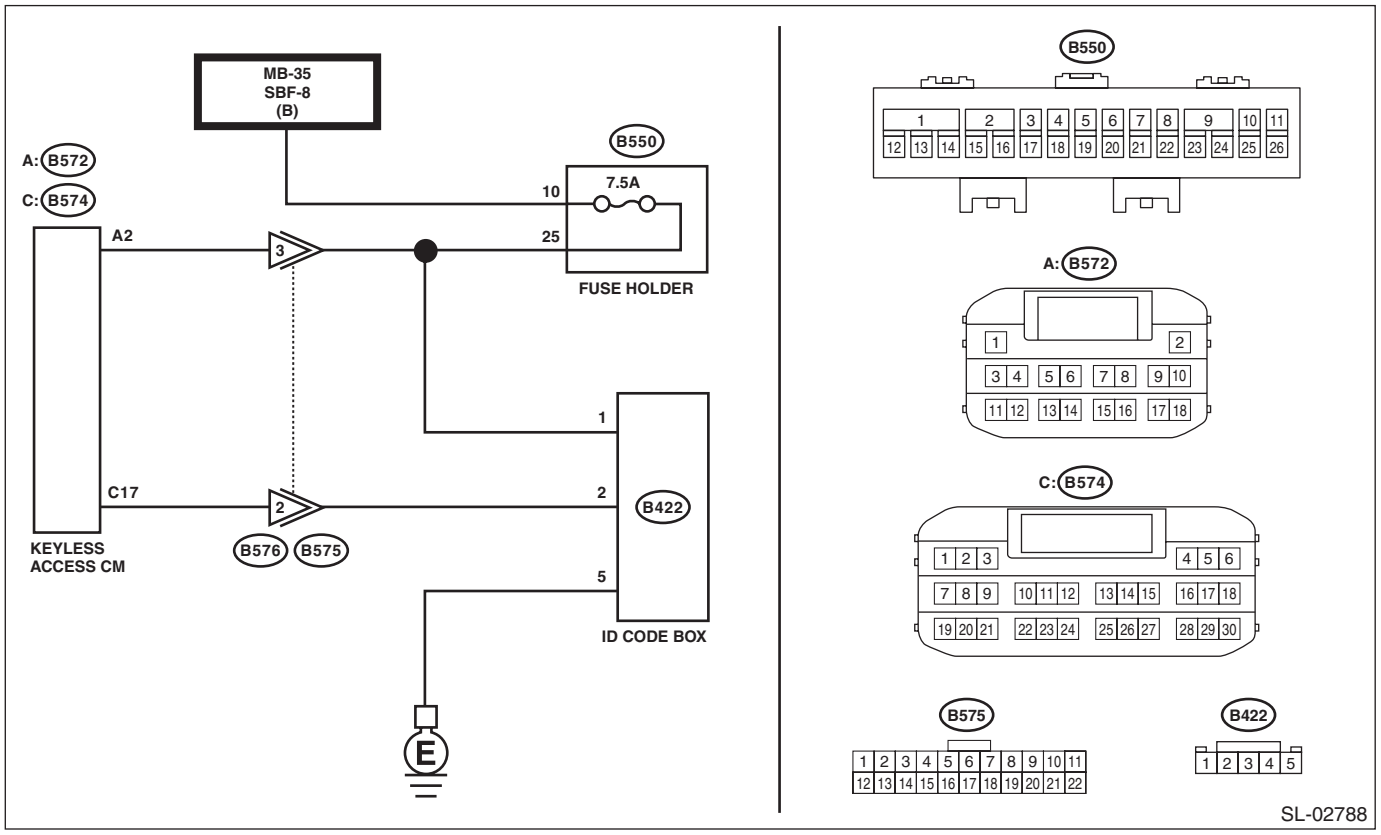
AA:DTC B2789 ID CODE BOX COMMUNICATION

DTC DETECTING CONDITION:

- When communication between keyless access CM and ID code box is interrupted for a set amount of time.
- Open or short circuit in the wiring harness between keyless access CM and ID code box

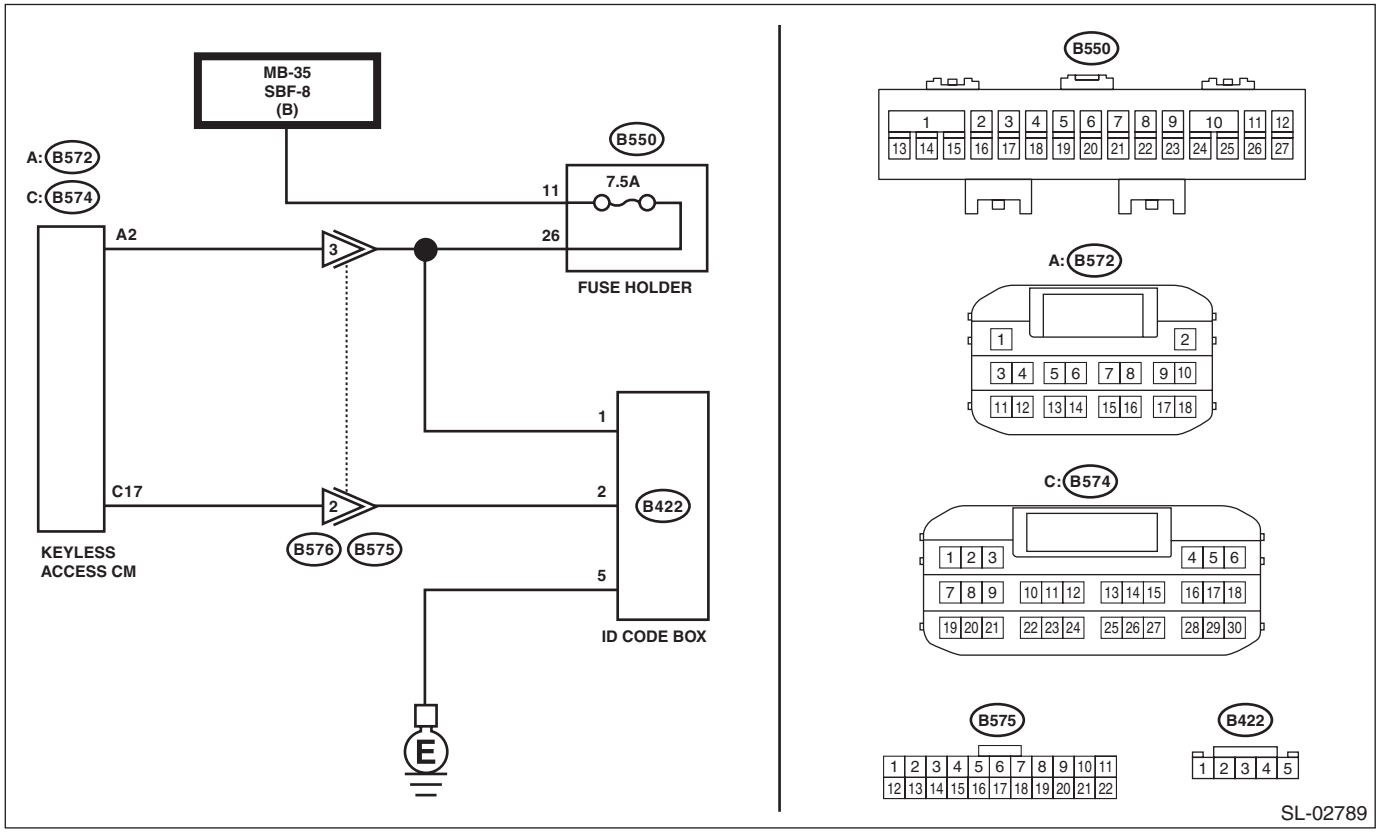
TROUBLE SYMPTOM:

Engine will not start.



CAUTION:

For replacement procedure of keyless access CM and ID code box, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.



WIRING DIAGRAM:

Push button start system <Ref. to WI-303, WIRING DIAGRAM, Push Button Start System.>

- Engine type: FA

- Engine type: EJ

Step		Check	Yes	No
1	**CHECK DTC.** 1) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 2) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B2789 displayed?	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the keyless access CM connector. 2) Disconnect the steering lock CM connector. 3) Disconnect the ID code box connector. 4) Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(B574) No. 17 — (B422) No. 2:***	Is the resistance less than 1 Ω?	Go to step **3**.	Repair or replace the open circuit of harness.

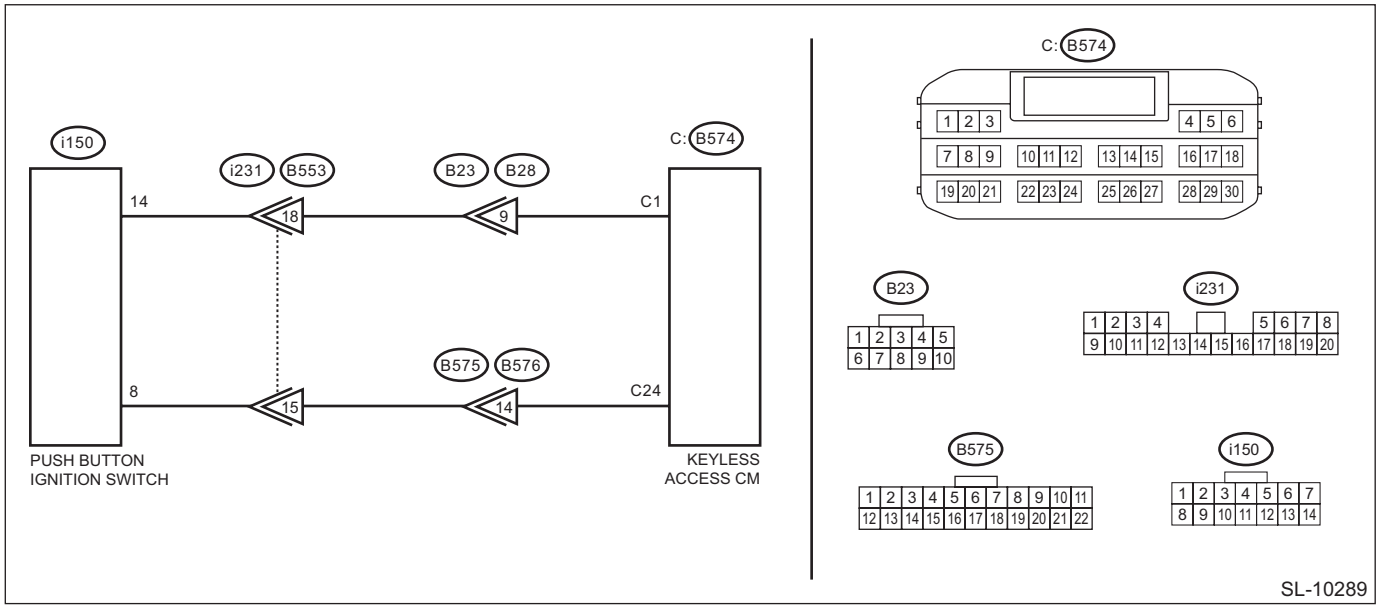
	Step	Check	Yes	No
3	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 17 — Chassis ground:***	Is the resistance 10 kΩ or more?	Go to step **4**.	Repair or replace the short circuit of the harness.
4	**CHECK HARNESS (OPEN CIRCUIT).** Using a tester, measure the resistance between ID code box connector and chassis ground. ***Connector & terminal*** ***(B422) No. 5 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **5**.	Repair or replace the open circuit of harness.
5	**CHECK HARNESS.** Using a tester, measure the voltage between ID code box connector and chassis ground. ***Connector & terminal*** ***(B422) No. 1 (+) — Chassis ground (–):***	Is the voltage 11 — 14 V?	Go to step **6**.	Repair or replace the faulty portion of the power supply circuit.
6	**CHECK ID CODE BOX.** 1) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 2) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B2785 displayed?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Go to step **7**.
7	**CHECK STEERING LOCK CM.** 1) Turn the ignition switch to ON. 2) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 3) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B2789 displayed?	Replace the ID code box. <Ref. to SL-103, ID Code Box.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

AB:DTC B278A PUSH ENGINE SWITCH POWER SUPPLY CIRCUIT

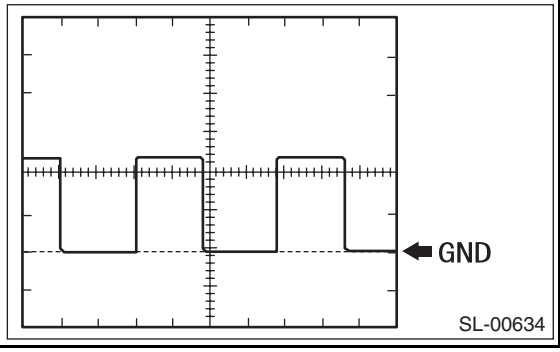
DTC DETECTING CONDITION:

When the power supply circuit of the push button ignition switch is shorted to ground.

TROUBLE SYMPTOM:



- Engine will not start.
- The keyless access system function does not operate.



CAUTION:

For replacement procedure of keyless access CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

WIRING DIAGRAM:

Immobilizer system <Ref. to WI-244, WIRING DIAGRAM, Immobilizer System.>

Step		Check	Yes	No
1	**CHECK KEYLESS ACCESS CM.** 1) Turn the ignition switch to OFF. 2) Take the access key out of the passenger room. 3) Push the push button ignition switch. Within 30 seconds, use oscilloscope to measure the waveform between connectors. ***Connector & terminal*** ***(i150) No. 14 — (i150) No. 8:*** 	Is a waveform displayed as indicated on the left?	Go to step **2**.	Replace the push button ignition switch. <Ref. to SL-106, Push Button Ignition Switch.>

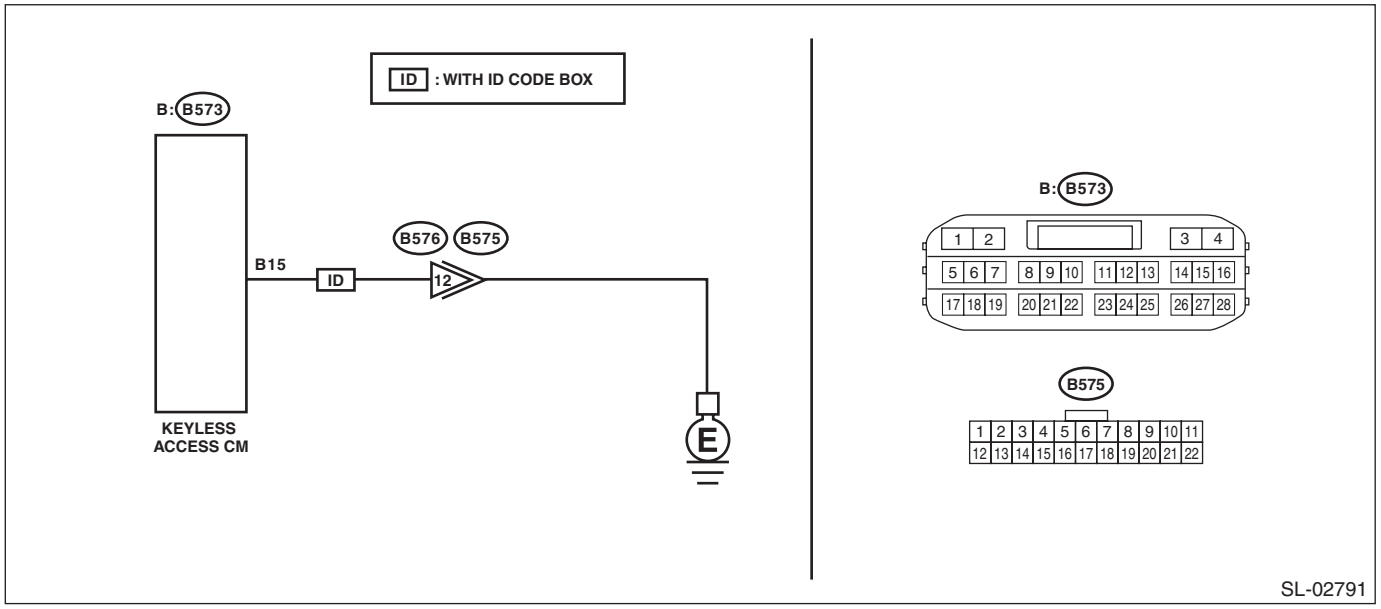
	Step	Check	Yes	No
2	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the keyless access CM connector. 2) Disconnect the push button ignition switch connector. 3) Using a tester, measure the resistance between the push button ignition switch connector and the keyless access CM connector. ***Connector & terminal*** ***(i150) No. 14 — (B574) No. 1:*** ***(i150) No. 8 — (B574) No. 24:***	Is the resistance less than 1 Ω?	Go to step **3**.	Repair or replace the open circuit of harness.
3	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 1 — Chassis ground:*** ***(B574) No. 24 — Chassis ground:***	Is the resistance 10 kΩ or more?	Go to step **4**.	Repair or replace the short circuit of the harness.
4	**CHECK DTC.** 1) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 2) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B278A displayed?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

AC:DTC B278D ID CODE BOX JUDGMENT CIRCUIT

DTC DETECTING CONDITION:

- When ID code box setting is set to OFF, ID code box ON input is detected.
- When ID code box setting is set to OFF, ID code box LIN signal is received.

TROUBLE SYMPTOM:



Engine will not start.

CAUTION:

For replacement procedure of keyless access CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

WIRING DIAGRAM:

Push button start system <Ref. to WI-303, WIRING DIAGRAM, Push Button Start System.>

	Step	Check	Yes	No
1	**CHECK DTC.** 1) Turn the ignition switch to OFF. 2) Using the Subaru Select Monitor, clear the keyless access system memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 3) Turn the ignition switch to OFF → ON. 4) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B278D displayed?	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**CHECK HARNESS (GROUND SHORT CIRCUIT).** 1) Disconnect the keyless access CM connector. 2) Measure the resistance between keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B573) No. 15 — Chassis ground:***	Is the resistance 10 kΩ or more?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Repair or replace the short circuit of the harness.

AD:DTC B2790 ID CODE BOX CIRCUIT

DTC DETECTING CONDITION:
An error has occurred inside the ID code box.
TROUBLE SYMPTOM:
Engine will not start.

CAUTION:
For replacement procedure of ID code box, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

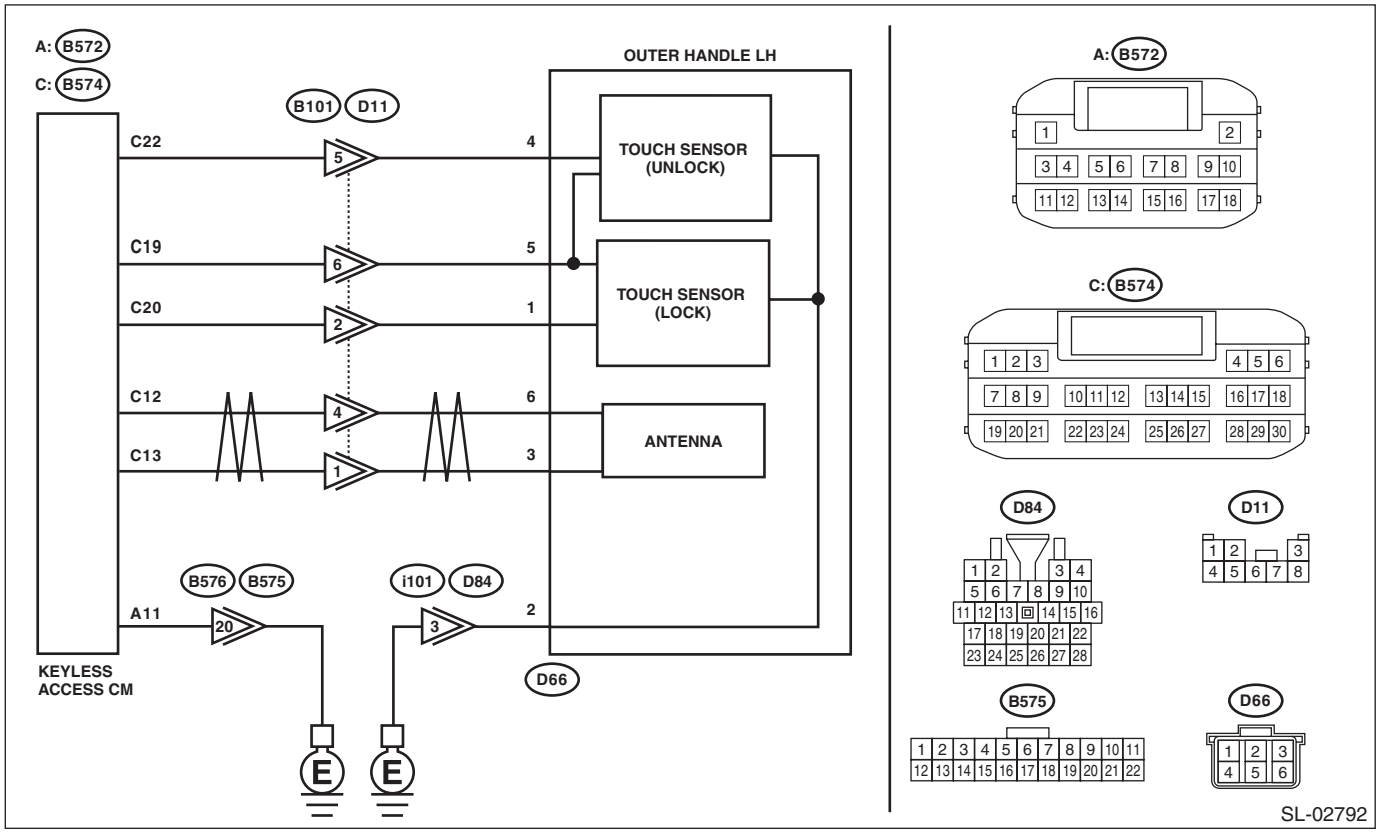
	Step	Check	Yes	No
1	**CHECK DTC.** 1) Turn the ignition switch to OFF. 2) Using the Subaru Select Monitor, clear the keyless access system memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 3) Turn the ignition switch to OFF → ON. 4) Register the ID code box. Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume. 5) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B2790 displayed?	Replace the ID code box. <Ref. to SL-103, ID Code Box.>	ID code box registration was not performed properly.

AE:DTC B27A1 DRIVER SIDE EXTERNAL ANTENNA OPEN

DTC DETECTING CONDITION:

When open circuit occurs in the harness between keyless access CM and driver's side front door outer handle.

TROUBLE SYMPTOM:



Keyless access system does not function.

CAUTION:

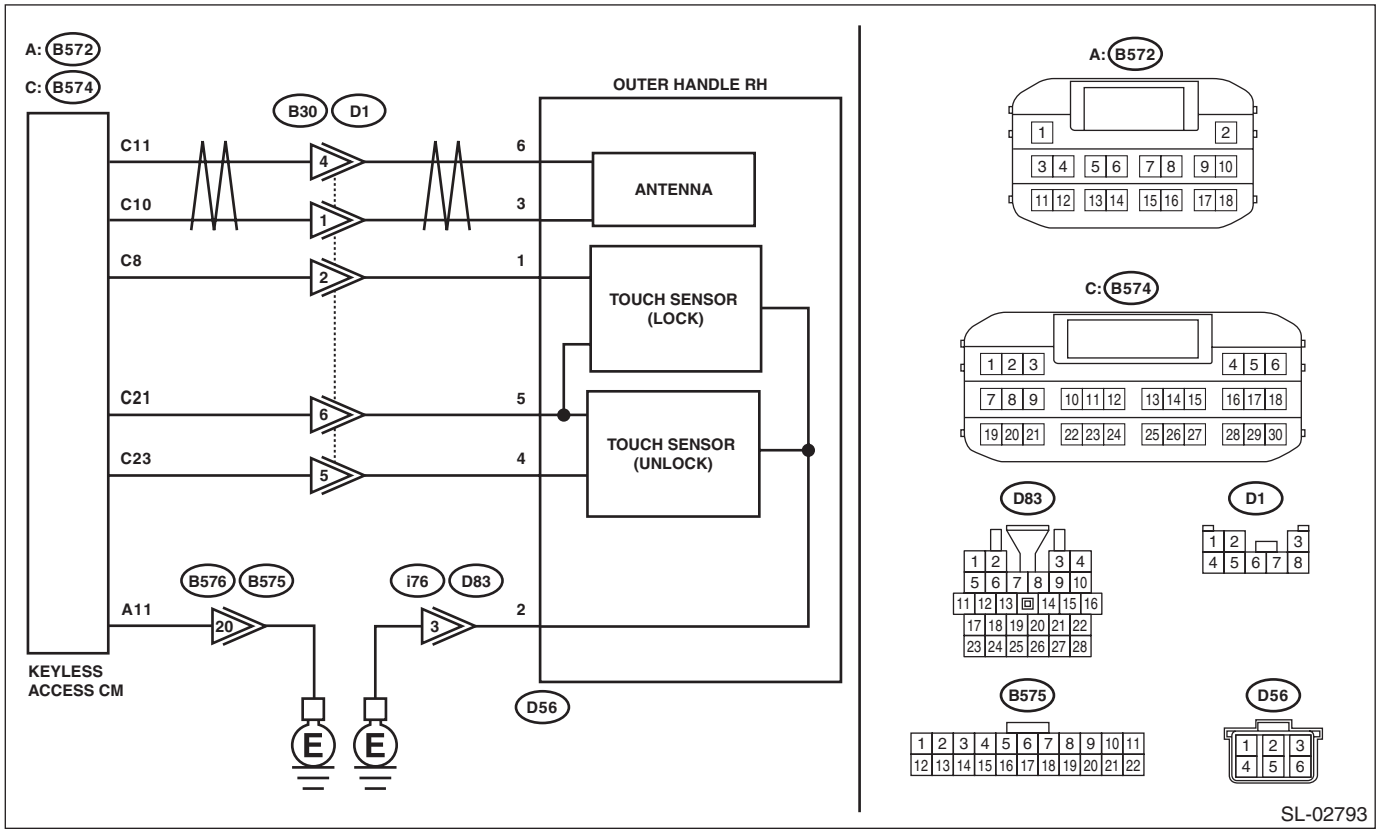
For replacement procedure of keyless access CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

WIRING DIAGRAM:

Keyless access system <Ref. to WI-255, WIRING DIAGRAM, Keyless Access System.>

Step		Check	Yes	No
1	**CHECK LAN SYSTEM.** Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **2**.	Perform the inspection according to the diagnosis for LAN system.
2	**CHECK CONNECTOR.** 1) Disconnect the keyless access CM connector. 2) Disconnect the front door outer handle connector. 3) Check the connector.	Is the check result OK?	Go to step **3**.	Repair or replace the connector.

	Step	Check	Yes	No
3	**CHECK HARNESS (OPEN CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and front door outer handle connector, and between front door outer handle connector, keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 12 — (D66) No. 6:*** ***(B574) No. 13 — (D66) No. 3:*** ***(D66) No. 2 — Chassis ground:*** ***(B572) No. 11 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **4**.	Repair or replace the open circuit of harness.
4	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 12 — Chassis ground:*** ***(B574) No. 13 — Chassis ground:***	Is the resistance 10 kΩ or more?	Go to step **5**.	Repair or replace the short circuit of the harness.
5	**CHECK DTC.** 1) Connect the keyless access CM connector. 2) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 3) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B27A1 displayed?	Go to step **6**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
6	**CHECK FRONT DOOR OUTER HANDLE.** 1) Replace the driver's front door outer handle with the passenger's front door outer handle. <Ref. to SL-33, Front Outer Handle.> 2) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 3) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B27A1 displayed?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Replace the driver's front door outer handle. <Ref. to SL-33, Front Outer Handle.>



AF:DTC B27A2 PASSENGER SIDE EXTERNAL ANTENNA OPEN

DTC DETECTING CONDITION:
When open circuit occurs in the harness between keyless access CM and passenger's side front door outer handle.

TROUBLE SYMPTOM:
Keyless access system does not function.

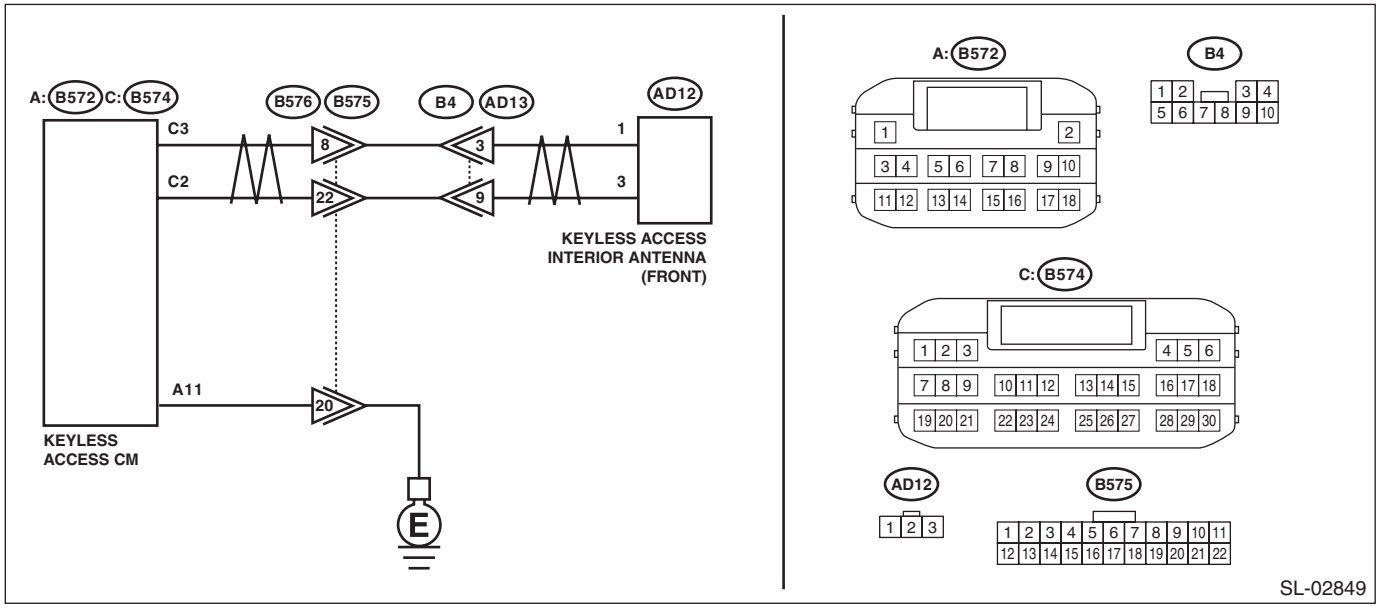
CAUTION:
For replacement procedure of keyless access CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

WIRING DIAGRAM:
Keyless access system <Ref. to WI-255, WIRING DIAGRAM, Keyless Access System.>

	Step	Check	Yes	No
1	**CHECK LAN SYSTEM.** Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **2**.	Perform the inspection according to the diagnosis for LAN system.
2	**CHECK CONNECTOR.** 1) Disconnect the keyless access CM connector. 2) Disconnect the front door outer handle connector. 3) Check the connector.	Is the check result OK?	Go to step **3**.	Repair or replace the connector.

	Step	Check	Yes	No
3	**CHECK HARNESS (OPEN CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and front door outer handle connector, and between front door outer handle connector, keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 11 — (D56) No. 6:*** ***(B574) No. 10 — (D56) No. 3:*** ***(D56) No. 2 — Chassis ground:*** ***(B572) No. 11 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **4**.	Repair or replace the open circuit of harness.
4	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 11 — Chassis ground:*** ***(B574) No. 10 — Chassis ground:***	Is the resistance 10 kΩ or more?	Go to step **5**.	Repair or replace the short circuit of the harness.
5	**CHECK DTC.** 1) Connect the keyless access CM connector. 2) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 3) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B27A2 displayed?	Go to step **6**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
6	**CHECK FRONT DOOR OUTER HANDLE.** 1) Replace the passenger's front door outer handle with the driver's front door outer handle. <Ref. to SL-33, Front Outer Handle.> 2) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 3) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B27A2 displayed?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Replace the passenger's front door outer handle. <Ref. to SL-33, Front Outer Handle.>

AG:DTC B27A5 FRONT INTERNAL ANTENNA OPEN

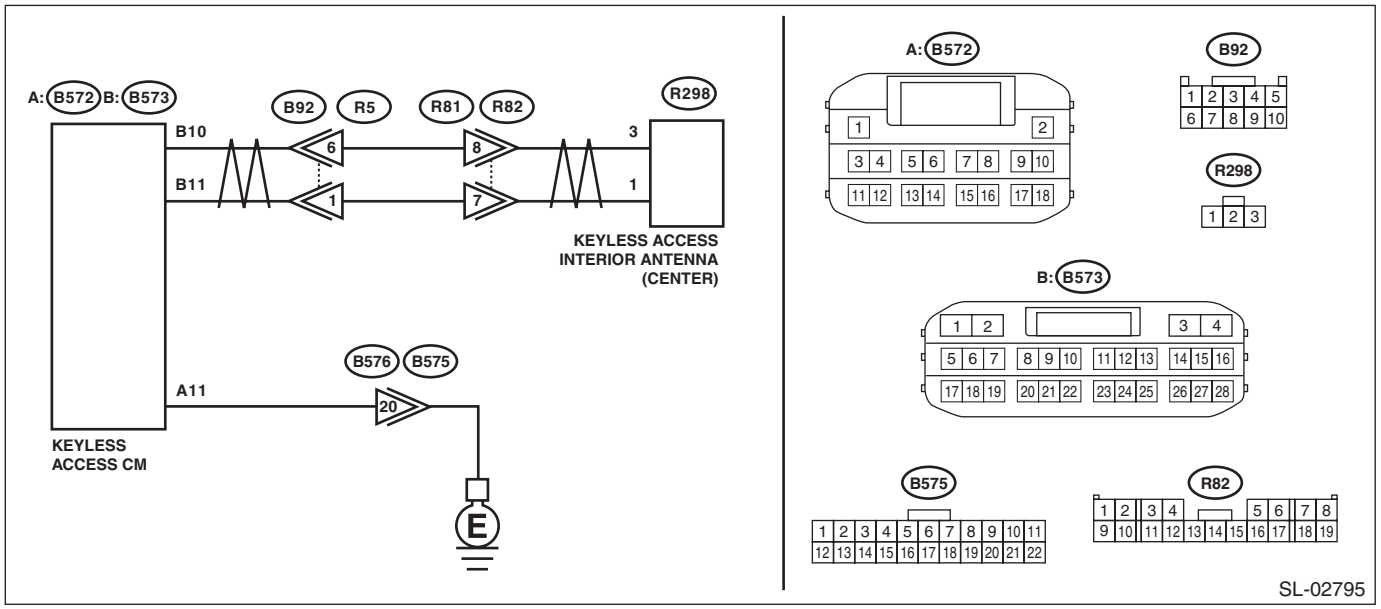


DTC DETECTING CONDITION:
When open circuit occurs in the harness between keyless access CM and front interior antenna.
TROUBLE SYMPTOM:
Keyless access system does not function. (When the access key is in the front area of the passenger room)

CAUTION:
For replacement procedure of keyless access CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.
WIRING DIAGRAM:
Keyless access system <Ref. to WI-255, WIRING DIAGRAM, Keyless Access System.>

- Engine type: FA

- Engine type: EJ



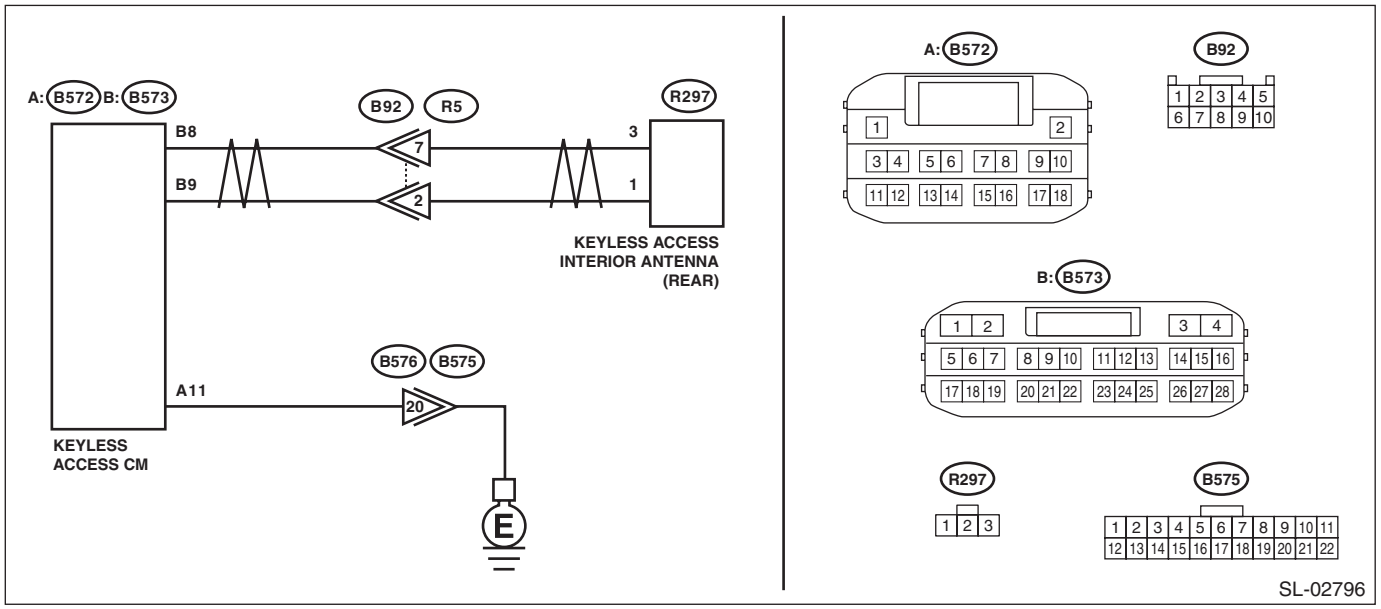
Step		Check	Yes	No
1	**CHECK LAN SYSTEM.** Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **2**.	Perform the inspection according to the diagnosis for LAN system.

	Step	Check	Yes	No
2	**CHECK CONNECTOR.** 1) Disconnect the keyless access CM connector. 2) Disconnect the front interior antenna connector. 3) Check the connector.	Is the check result OK?	Go to step **3**.	Repair or replace the connector.
3	**CHECK HARNESS (OPEN CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and front interior antenna connector, and between keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 3 — (AD12) No. 1:*** ***(B574) No. 2 — (AD12) No. 3:*** ***(B572) No. 11 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **4**.	Repair or replace the open circuit of harness.
4	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 3 — Chassis ground:*** ***(B574) No. 2 — Chassis ground:***	Is the resistance 10 kΩ or more?	Go to step **5**.	Repair or replace the short circuit of the harness.
5	**CHECK DTC.** 1) Connect the keyless access CM connector. 2) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 3) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B27A5 displayed?	Go to step **6**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
6	**CHECK FRONT INTERIOR ANTENNA.** 1) Replace the rear interior antenna with the front interior antenna. <Ref. to SL-92, Keyless Access Indoor Antenna.> 2) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 3) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B27A5 displayed?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Malfunction occurred in the front interior antenna.

AH:DTC B27A6 REAR INTERNAL ANTENNA OPEN

DTC DETECTING CONDITION:
When open circuit occurs in the harness between keyless access CM and center interior antenna.
TROUBLE SYMPTOM:
Keyless access system does not function. (When the access key is in the rear area of the passenger room (near the seat))

CAUTION:
For replacement procedure of keyless access CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.
WIRING DIAGRAM:
Keyless access system <Ref. to WI-255, WIRING DIAGRAM, Keyless Access System.>



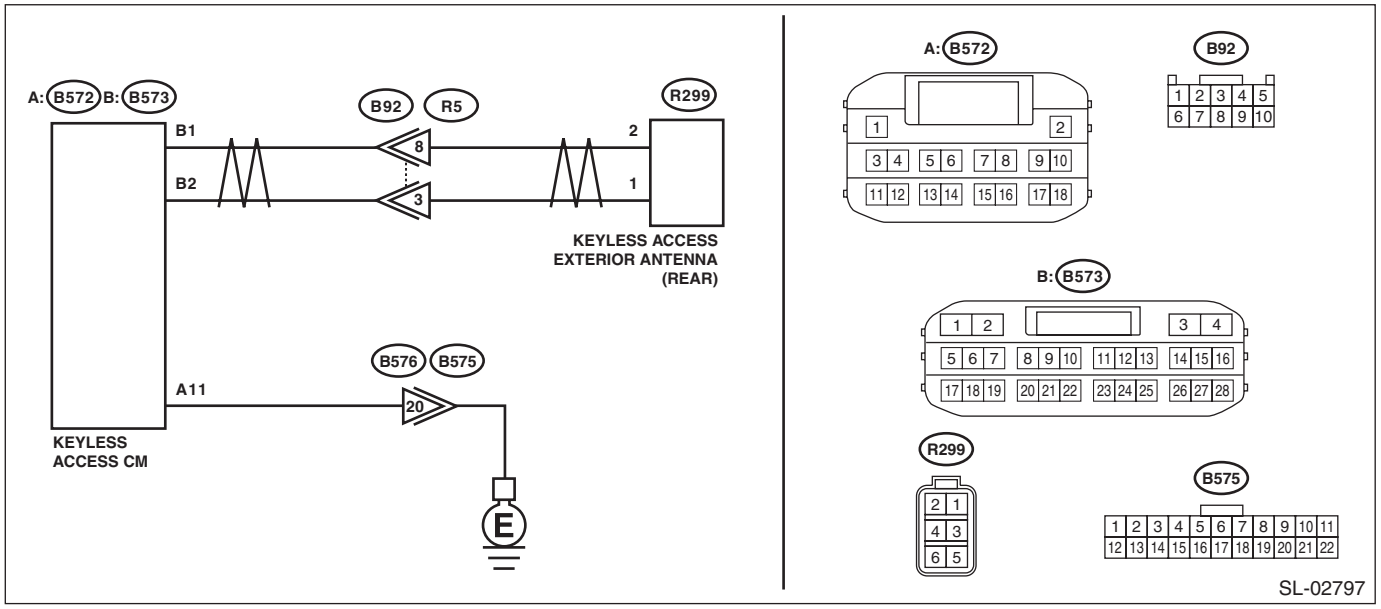
Step		Check	Yes	No
1	**CHECK LAN SYSTEM.** Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **2**.	Perform the inspection according to the diagnosis for LAN system.
2	**CHECK CONNECTOR.** 1) Disconnect the keyless access CM connector. 2) Disconnect the center interior antenna connector. 3) Check the connector.	Is the check result OK?	Go to step **3**.	Repair or replace the connector.
3	**CHECK HARNESS (OPEN CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and center interior antenna connector, and between keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B573) No. 10 — (R298) No. 3:*** ***(B573) No. 11 — (R298) No. 1:*** ***(B572) No. 11 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **4**.	Repair or replace the open circuit of harness.

	Step	Check	Yes	No
4	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B573) No. 10 — Chassis ground:*** ***(B573) No. 11 — Chassis ground:***	Is the resistance 10 kΩ or more?	Go to step **5**.	Repair or replace the short circuit of the harness.
5	**CHECK DTC.** 1) Connect the keyless access CM connector. 2) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 3) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B27A6 displayed?	Go to step **6**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
6	**CHECK CENTER INTERIOR ANTENNA.** 1) Replace the center interior antenna with the front interior antenna. <Ref. to SL-92, Keyless Access Indoor Antenna.> 2) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 3) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B27A6 displayed?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Malfunction occurred in the center interior antenna.

AI: DTC B27A7 TRUNK/REAR GATE INTERNAL ANTENNA OPEN

DTC DETECTING CONDITION:
When open circuit occurs in the harness between keyless access CM and rear interior antenna.
TROUBLE SYMPTOM:
Keyless access system does not function. (When the access key is in the rear area of the passenger room (in the luggage room or trunk))

CAUTION:
For replacement procedure of keyless access CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.
WIRING DIAGRAM:
Keyless access system <Ref. to WI-255, WIRING DIAGRAM, Keyless Access System.>



Step		Check	Yes	No
1	**CHECK LAN SYSTEM.** Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **2**.	Perform the inspection according to the diagnosis for LAN system.
2	**CHECK CONNECTOR.** 1) Disconnect the keyless access CM connector. 2) Disconnect the rear interior antenna connector. 3) Check the connector.	Is the check result OK?	Go to step **3**.	Repair or replace the connector.
3	**CHECK HARNESS (OPEN CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and rear interior antenna connector, and between keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B573) No. 8 — (R297) No. 3:*** ***(B573) No. 9 — (R297) No. 1:*** ***(B572) No. 11 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **4**.	Repair or replace the open circuit of harness.

	Step	Check	Yes	No
4	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B573) No. 8 — Chassis ground:*** ***(B573) No. 9 — Chassis ground:***	Is the resistance 10 kΩ or more?	Go to step **5**.	Repair or replace the short circuit of the harness.
5	**CHECK DTC.** 1) Connect the keyless access CM connector. 2) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 3) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B27A7 displayed?	Go to step **6**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
6	**CHECK REAR INTERIOR ANTENNA.** 1) Replace the rear interior antenna with the front interior antenna. <Ref. to SL-92, Keyless Access Indoor Antenna.> 2) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 3) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B27A7 displayed?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Malfunction occurred in the rear interior antenna.

AJ:DTC B27A8 TRUNK/REAR GATE EXTERNAL ANTENNA OPEN

DTC DETECTING CONDITION:
When open circuit occurs in the harness between keyless access CM and rear exterior antenna.
TROUBLE SYMPTOM:
Keyless access system does not function.
(Cannot unlock using rear gate opener button.)

CAUTION:
For replacement procedure of keyless access CM, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.
WIRING DIAGRAM:
Keyless access system <Ref. to WI-255, WIRING DIAGRAM, Keyless Access System.>

	Step	Check	Yes	No
1	**CHECK LAN SYSTEM.** Inspect LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **2**.	Perform the inspection according to the diagnosis for LAN system.
2	**CHECK CONNECTOR.** 1) Disconnect the keyless access CM connector. 2) Disconnect the rear exterior antenna connector. 3) Check the connector.	Is the check result OK?	Go to step **3**.	Repair or replace the connector.
3	**CHECK HARNESS (OPEN CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and rear external antenna connector. ***Connector & terminal*** ***(B573) No. 2 — (AD23) No. 1:*** ***(B573) No. 1 — (AD23) No. 2:***	Is the resistance less than 1 Ω?	Go to step **4**.	Repair or replace the open circuit of harness.
4	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B573) No. 2 — Chassis ground:*** ***(B573) No. 1 — Chassis ground:***	Is the resistance 10 kΩ or more?	Go to step **5**.	Repair or replace the short circuit of the harness.

	Step	Check	Yes	No
5	**CHECK DTC.** 1) Connect the keyless access CM connector. 2) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 3) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B27A8 displayed?	Go to step **6**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
6	**CHECK REAR EXTERIOR ANTENNA.** 1) Replace the rear exterior antenna with the rear interior antenna. <Ref. to SL-92, Keyless Access Indoor Antenna.> <Ref. to SL-95, Keyless Access Outdoor Antenna.> 2) Using the Subaru Select Monitor, clear the memory. <Ref. to KPS(diag)-33, Clear Memory Mode.> 3) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B27A8 displayed?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Malfunction occurred in the rear external antenna.

AK:DTC B1571 REFERENCE CODE INCOMPATIBILITY

DTC DETECTING CONDITION:

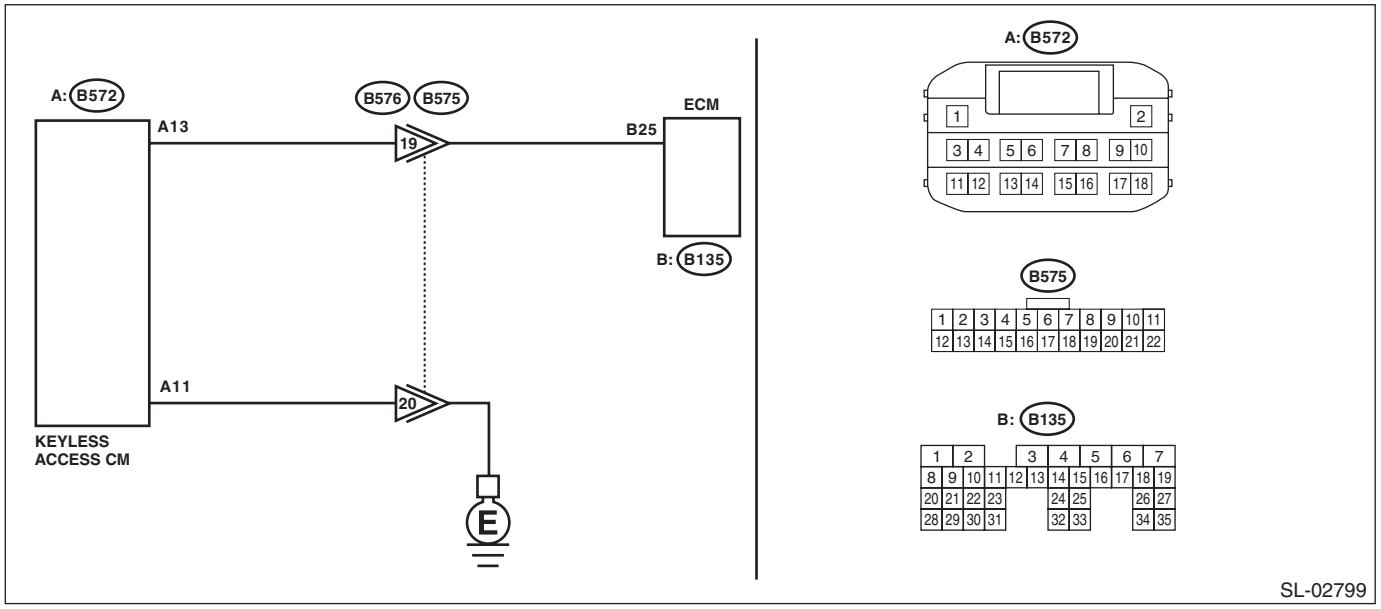
Incompatibility of reference code between keyless access CM (model without ID code box) or ID code box (model with ID code box) and ECM occurs.

TROUBLE SYMPTOM:

Engine will not start.

	Step	Check	Yes	No
1	**CHECK ECM.** Perform ECM registration. Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.	Is ECM registration finished? And does the engine start?	ECM registration was not performed properly.	Go to step **2**.
2	**REPLACE ECM.** 1) Install the ECM from other normal operating vehicle (with push button start) which use same ECM to the vehicle to be diagnosed. 2) Perform ECM registration. Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.	Is ECM registration finished? And does the engine start?	Replace the ECM. <Ref. to FU(w/o STI)-124, REMOVAL, Engine Control Module (ECM).> <Ref. to FU(STI)-56, REMOVAL, Engine Control Module (ECM).> Install the ECM from other vehicle to the original vehicle.	Replace Keyless access CM (model without ID code box), <Ref. to SL-100, Keyless Access CM.> or replace ID code box (model with ID code box). <Ref. to SL-103, NOTE, ID Code Box.>

AL:DTC B1572 IMM CIRCUIT EXCEPT ANTENNA CIRCUIT



1. EXCEPT FOR C0 MODEL

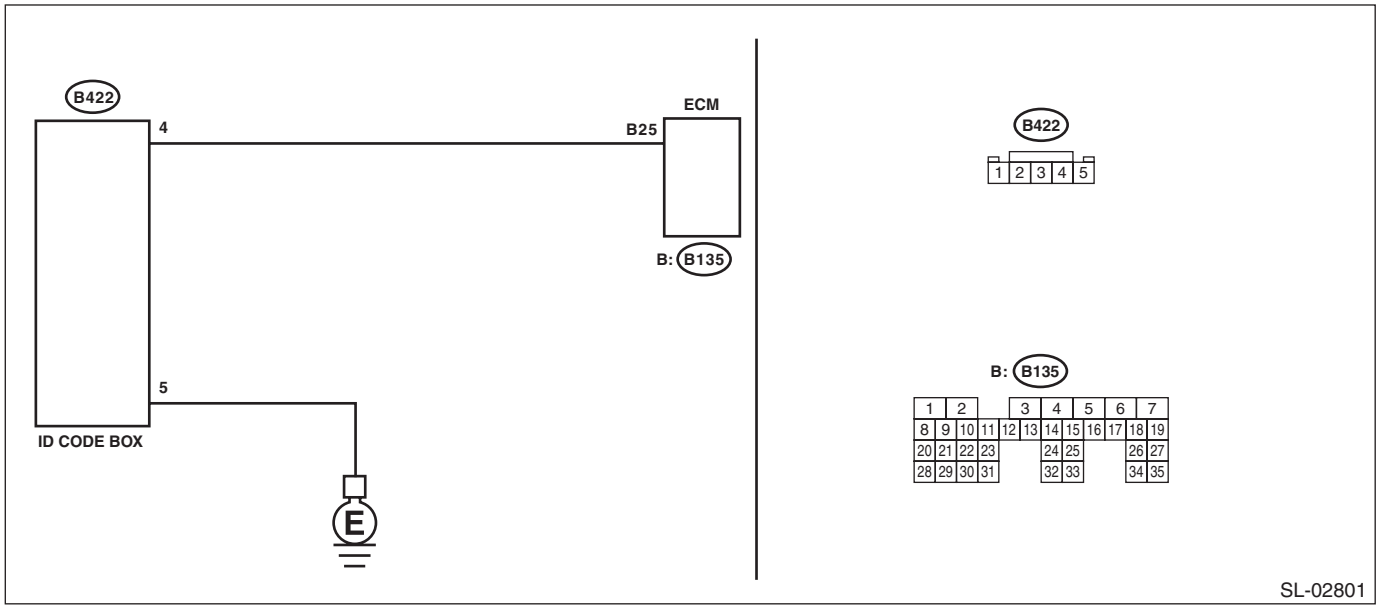
DTC DETECTING CONDITION:
Communication error between keyless access CM and ECM
TROUBLE SYMPTOM:
Engine will not start.
WIRING DIAGRAM:
Push button start system <Ref. to WI-303, WIRING DIAGRAM, Push Button Start System.>

- Engine type: FA

- Engine type: EJ

	Step	Check	Yes	No
1	**CHECK GROUNDING POINT.** Check the grounding point of the engine ground and chassis ground.	Are there any loose connections, any foreign objects caught in the ground lines or contact surface, or any fluid stains?	Remove the foreign matters, and tighten to the specified torque. Then start the engine, and check that the fault was removed. Check DTC <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>, and when DTC B1572 is still displayed, Go to step **2**.	Go to step **2**.
2	**CHECK CURRENT DATA.** 1) Turn the ignition switch to ON. 2) Using the Subaru Select Monitor, check the data of «Keyless Access with Push Button Start». <Ref. to KPS(diag)-27, Read Current Data.> 3) Display the next data. “Immobilizer” “Engine start” “Unlock confirmation” ***Data*** ***Immobilizer = Unset:*** ***Engine start = Engine start permission:*** ***Unlock confirmation = Confirmed:***	Is the data displayed as indicated on the left?	Go to step **3**.	Perform diagnostics with phenomenon. <Ref. to KPS(diag)-141, ENGINE DOES NOT START, INSPECTION, Diagnostics with Phenomenon.>
3	**CHECK CURRENT DATA.** Use the Subaru Select Monitor to check the data of «Keyless Access with Push Button Start» when holding down the push button ignition switch while depressing the brake pedal (CVT model) or the clutch pedal (MT model). <Ref. to KPS(diag)-27, Read Current Data.> ***Data*** ***EGI code reception status = Reception:*** NOTE: If “Reception” is displayed, the status changes to “Not yet received” in 10 seconds. When performing the check again, perform the check after turning the ignition to OFF.	Is the data displayed as indicated on the left?	Go to step **4**.	Repair or replace the harness between keyless access CM and ECM.
4	**CHECK WIRING HARNESS.** 1) Turn the ignition switch to OFF. 2) Disconnect the keyless access CM connector and ECM connector. 3) Using a tester, measure the resistance between the keyless access CM connector and ECM connector. ***Connector & terminal*** ***Engine type: FA*** ***(B572) No. 13 — (E158) No. 43:*** ***Engine type: EJ*** ***(B572) No. 13 — (B135) No. 25:***	Is the resistance less than 10 Ω?	Go to step **5**.	Repair or replace the open circuit of harness.
5	**CHECK WIRING HARNESS.** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 11 — Chassis ground:***	Is the resistance less than 10 Ω?	Go to step **6**.	Repair or replace the open circuit of harness.

Step		Check	Yes	No
6	**CHECK ECM.** 1) Install the ECM from other normal operating vehicle (with push button start) which use same ECM to the vehicle to be diagnosed. 2) Perform ECM registration. Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.	Is ECM registration finished? And does the engine start?	Replace the ECM. <Ref. to FU(w/o STI)-124, REMOVAL, Engine Control Module (ECM).> <Ref. to FU(STI)-56, REMOVAL, Engine Control Module (ECM).> Install the ECM from other vehicle to the original vehicle.	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>



2. C0 MODEL

DTC DETECTING CONDITION:
Communication error between ID code box and ECM
TROUBLE SYMPTOM:
Engine will not start.
WIRING DIAGRAM:
Push button start system <Ref. to WI-303, WIRING DIAGRAM, Push Button Start System.>

- Engine type: FA

- Engine type: EJ

	Step	Check	Yes	No
1	**CHECK GROUNDING POINT.** Check the grounding point of the engine ground and chassis ground.	Are there any loose connections, any foreign objects caught in the ground lines or contact surface, or any fluid stains?	Remove the foreign matters, and tighten to the specified torque. Then start the engine, and check that the fault was removed. Check DTC <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>, and when DTC B1572 is still displayed, Go to step **2**.	Go to step **2**.
2	**CHECK CURRENT DATA.** 1) Turn the ignition switch to ON. 2) Using the Subaru Select Monitor, check the data of «Keyless Access with Push Button Start». <Ref. to KPS(diag)-27, Read Current Data.> 3) Display the next data. “Immobilizer” “Engine start” “Unlock confirmation” ***Data*** ***Immobilizer = Unset:*** ***Engine start = Engine start permission:*** ***Unlock confirmation = Confirmed:***	Is the data displayed as indicated on the left? 	Step	Check	Yes	No
3	**CHECK CURRENT DATA.** Use the Subaru Select Monitor to check the data of «Keyless Access with Push Button Start» when holding down the push button ignition switch while depressing the brake pedal (CVT model) or the clutch pedal (MT model). <Ref. to KPS(diag)-27, Read Current Data.> ***Data*** ***EGI code reception status = Reception:*** NOTE: If “Reception” is displayed, the status changes to “Not yet received” in 10 seconds. When performing the check again, perform the check after turning the ignition to OFF.	Is the data displayed as indicated on the left?	Go to step **4**.	Repair or replace the harness between ID code box and ECM.
4	**CHECK WIRING HARNESS.** 1) Turn the ignition switch to OFF. 2) Disconnect the ID code box connector and the ECM connector. 3) Using a tester, measure the resistance between ID code box connector and ECM connector. ***Connector & terminal*** ***Engine type: FA*** ***(B422) No. 4 — (E158) No. 43:*** ***Engine type: EJ*** ***(B422) No. 4 — (B135) No. 25:***	Is the resistance less than 10 Ω?	Go to step **5**.	Repair or replace the open circuit of harness.
5	**CHECK WIRING HARNESS.** Using a tester, measure the resistance between ID code box connector and chassis ground. ***Connector & terminal*** ***(B422) No. 5 — Chassis ground:***	Is the resistance less than 10 Ω?	Go to step **6**.	Repair or replace the open circuit of harness.
6	**CHECK ECM.** 1) Install the ECM from other normal operating vehicle (with push button start) which use same ECM to the vehicle to be diagnosed. 2) Perform ECM registration. Refer to the “REGISTRATION MANUAL FOR IMMOBILIZER” provided as a separate volume.	Is ECM registration finished? And does the engine start?	Replace the ECM. <Ref. to FU(w/o STI)-124, REMOVAL, Engine Control Module (ECM).> <Ref. to FU(STI)-56, REMOVAL, Engine Control Module (ECM).> Install the ECM from other vehicle to the original vehicle.	Replace the ID code box. <Ref. to SL-103, NOTE, ID Code Box.>

AM:DTC B1576 EGI CONTROL MODULE EEPROM

DTC DETECTING CONDITION:

- ECM malfunctioning
- When the ROM in ECM was inaccessible during registration.

Step		Check	Yes	No
1	**PERFORM ECM REGISTRATION.** Perform ECM registration. Refer to the “REGISTRATION MANUAL FOR IMMOBILIZER” provided as a separate volume.	Is ECM registration complete?	Make sure that the engine can start. This completes the work.	Go to step **2**.
2	**PERFORM ECM REGISTRATION.** Perform ECM registration. Refer to the “REGISTRATION MANUAL FOR IMMOBILIZER” provided as a separate volume.	Is ECM registration complete?	Make sure that the engine can start. This completes the work.	Go to step **3**.
3	**PERFORM ECM REGISTRATION.** Perform ECM registration. Refer to the “REGISTRATION MANUAL FOR IMMOBILIZER” provided as a separate volume.	Is ECM registration complete?	Make sure that the engine can start. This completes the work.	Replace the ECM. <Ref. to FU(w/o STI)-124, REMOVAL, Engine Control Module (ECM).> <Ref. to FU(STI)-56, REMOVAL, Engine Control Module (ECM).>

AN:DTC B1577 IMM CONTROL MODULE EEPROM

1. EXCEPT FOR C0 MODEL

DTC DETECTING CONDITION:

- Defective keyless access CM
- When inaccessible to ROM in keyless access CM.

	Step	Check	Yes	No
1	**CHECK DTC.** 1) Turn the ignition switch to ON. 2) Perform the clear memory operation of ECM. <Ref. to EN(STI)(diag)-68, Clear Memory Mode.> <Ref. to EN(w/o STI)(diag)-82, Clear Memory Mode.> 3) Turn the ignition switch to OFF. 4) Remove and install the battery. 5) Turn the ignition switch to ON. 6) After 5 seconds or more, read DTC. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B1577 displayed?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

2. C0 MODEL

DTC DETECTING CONDITION:

- ID code box malfunction
- When inaccessible to ROM in ID code box.

	Step	Check	Yes	No
1	**CHECK DTC.** 1) Turn the ignition switch to ON. 2) Perform the clear memory operation of ECM. <Ref. to EN(STI)(diag)-68, Clear Memory Mode.> <Ref. to EN(w/o STI)(diag)-82, Clear Memory Mode.> 3) Turn the ignition switch to OFF. 4) Register the ID code box. 5) Read the DTC again. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC B1577 displayed?	Replace the ID code box. <Ref. to SL-103, ID Code Box.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

15.General Diagnostic Table

A: INSPECTION

1. IMMOBILIZER SYSTEM

Symptoms	Note
Engine does not start	<Ref. to KPS(diag)-141, ENGINE DOES NOT START, INSPECTION, Diagnostics with Phenomenon.>
	<Ref. to KPS(diag)-75, DTC B2784 ANTENNA CIRCUIT (PUSH ENGINE SWITCH), Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
	<Ref. to KPS(diag)-88, DTC B278A PUSH ENGINE SWITCH POWER SUPPLY CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
	<Ref. to KPS(diag)-77, DTC B2785 LIN COMMUNICATION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
	<Ref. to KPS(diag)-85, DTC B2789 ID CODE BOX COMMUNICATION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
	<Ref. to KPS(diag)-91, DTC B2790 ID CODE BOX CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
	Check the brake switch for CVT model. <Ref. to BR-101, INSPECTION, Stop Light Switch.> Check the clutch switch for MT model. <Ref. to CL-36, INSPECTION, Clutch Switch.>
	Check the parking switch signal. <Ref. to CS-53, INSPECTION, AT Shift Lock Solenoid and “P” Range Switch.>
	Check DTC of ECM.
Cannot register the immobilizer.	Refer to the “REGISTRATION MANUAL FOR IMMOBILIZER”.
Engine does not start with the remote engine starter.	<Ref. to KPS(diag)-72, DTC B2779 REMOTE CONTROL ENGINE STARTER COLLATION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

2. KEYLESS ACCESS SYSTEM

Symptoms	Reference
All doors cannot be locked/unlocked with keyless access.	<Ref. to KPS(diag)-114, KEYLESS ACCESS LOCK/UNLOCK CANNOT BE PERFORMED FROM ANY OF THE DOORS, INSPECTION, Diagnostics with Phenomenon.>
Cannot lock with keyless access from the driver’s door.	<Ref. to KPS(diag)-115, CANNOT LOCK WITH KEYLESS ACCESS FROM THE DRIVER’S DOOR, INSPECTION, Diagnostics with Phenomenon.>
Cannot lock/unlock from the driver’s door with keyless access.	<Ref. to KPS(diag)-116, CANNOT LOCK/UNLOCK WITH KEYLESS ACCESS FROM THE DRIVER’S DOOR, INSPECTION, Diagnostics with Phenomenon.>
Cannot unlock from the driver’s door with keyless access.	<Ref. to KPS(diag)-117, CANNOT UNLOCK WITH KEYLESS ACCESS FROM THE DRIVER’S DOOR, INSPECTION, Diagnostics with Phenomenon.>
Cannot unlock from the passenger’s door with keyless access.	<Ref. to KPS(diag)-120, CANNOT UNLOCK WITH KEYLESS ACCESS FROM THE PASSENGER’S DOOR, INSPECTION, Diagnostics with Phenomenon.>
Cannot lock/unlock from the passenger’s door with keyless access.	<Ref. to KPS(diag)-119, CANNOT LOCK/UNLOCK WITH KEYLESS ACCESS FROM THE PASSENGER’S DOOR, INSPECTION, Diagnostics with Phenomenon.>
Cannot lock from the passenger’s door with keyless access.	<Ref. to KPS(diag)-118, CANNOT LOCK WITH KEYLESS ACCESS FROM THE PASSENGER’S DOOR, INSPECTION, Diagnostics with Phenomenon.>
Keyless access passenger room buzzer does not sound.	<Ref. to KPS(diag)-121, THE KEYLESS ACCESS PASSENGER ROOM BUZZER DOES NOT SOUND, INSPECTION, Diagnostics with Phenomenon.>
Keyless access external buzzer does not beep.	<Ref. to KPS(diag)-121, THE KEYLESS ACCESS EXTERNAL BUZZER DOES NOT BEEP, INSPECTION, Diagnostics with Phenomenon.>
Interior collation does not function.	<Ref. to KPS(diag)-123, INTERNAL COLLATION DOES NOT FUNCTION, INSPECTION, Diagnostics with Phenomenon.>
Trunk does not open with the trunk opener button.	<Ref. to KPS(diag)-125, TRUNK WILL NOT OPEN WITH KEYLESS ACCESS, INSPECTION, Diagnostics with Phenomenon.>
Access key lockout protection function in the trunk does not operate.	<Ref. to KPS(diag)-127, ACCESS KEY LOCKOUT PROTECTION FUNCTION IN THE TRUNK DOES NOT OPERATE, INSPECTION, Diagnostics with Phenomenon.>

3. STEERING LOCK SYSTEM

Symptoms	Index
The steering lock cannot be released (cannot start the engine)	<Ref. to KPS(diag)-129, THE STEERING LOCK IS NOT RELEASED, INSPECTION, Diagnostics with Phenomenon.>
The steering lock does not operate	<Ref. to KPS(diag)-131, THE STEERING LOCK DOES NOT OPERATE, INSPECTION, Diagnostics with Phenomenon.>

4. POWER SUPPLY SWITCHING SYSTEM

Symptoms	Index
Power will not turn ON (both accessory and ignition)	<Ref. to KPS(diag)-132, POWER WILL NOT TURN ON (BOTH ACCESSORY AND IGNITION), INSPECTION, Diagnostics with Phenomenon.>
Power will not turn ON (accessory only)	<Ref. to KPS(diag)-135, POWER WILL NOT TURN ON (ACCESSORY DOES NOT TURN ON, BUT IGNITION TURNS ON), INSPECTION, Diagnostics with Phenomenon.>
Power will not turn ON (ignition only)	<Ref. to KPS(diag)-138, POWER WILL NOT TURN ON (ACCESSORY TURNS ON, BUT IGNITION DOES NOT TURN ON), INSPECTION, Diagnostics with Phenomenon.>

16.Diagnostics with Phenomenon

A: INSPECTION

1. KEYLESS ACCESS LOCK/UNLOCK CANNOT BE PERFORMED FROM ANY OF THE DOORS

CAUTION:
• Check that there are no other registered access keys inside the vehicle.
• Inspect LAN system according to the basic diagnostic procedure, and make sure that there is no fault.
• Check that the keyless access function is not stopped.
• When the access key or keyless access CM is replaced, registration of the immobilizer is required. For the relevant procedures, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

	Step	Check	Yes	No
1	**CHECK OPERATION OF KEYLESS DOOR LOCK.** Using the keyless function of the access key, check the operation of the door lock.	Does it lock/unlock normally?	Check the exterior antenna, oscillator, touch sensor, lock/unlock buttons.	Go to step **2**.
2	**CHECK ACCESS KEY.** Check for whether lock and unlock is possible with the registered access key.	Is there any access key which can lock/unlock when the touch sensor is operated?	Check the access key that does not operate. Go to step **3**.	Go to step **4**.
3	**CHECK ACCESS KEY.** Measure the battery voltage of the access key that does not operate.	Is the voltage 2.5 — 3.2 V?	Replace the access key.	Replace the battery.
4	**CHECK DOOR LOCK.** Operate the driver's center door lock switch.	Does the door lock operate?	Go to step **5**.	Check the door lock control system. <Ref. to SL-10, INSPECTION, Door Lock Control System.>
5	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the receiver connector (R296). 2) Using a tester, measure the resistance between receiver and chassis ground. ***Connector & terminal*** ***(R296) No. 1 — Chassis ground:***	Is the resistance less than 10 Ω?	Go to step **6**.	Repair or replace the open circuit of harness.
6	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the keyless access CM connector. 2) Using a tester, measure the resistance between receiver and keyless access CM. ***Connector & terminal*** ***(R296) No. 4 — (B573) No. 5:*** ***(R296) No. 5 — (B573) No. 17:*** ***(R296) No. 2 — (B573) No. 19:***	Is the resistance less than 10 Ω?	Go to step **7**.	Repair or replace the open circuit of harness.
7	**CHECK RECEIVER.** Replace with a receiver that is operating normally. <Ref. to SL-98, REMOVAL, Receiver.>	When the front unlock sensor and the rear gate opener button / trunk opener button are operated, does it lock/unlock?	Malfunction occurred in receiver.	Go to step **8**.
8	**CHECK HARNESS.** Using a tester, measure the voltage between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 2 (+) — Chassis ground (–):***	Is the voltage 10 V or more when the ignition switch is turned to ON?	Go to step **9**.	Check the keyless access CM power supply circuit.

	Step	Check	Yes	No
9	**CHECK HARNESS (OPEN CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 11 — Chassis ground:***	Is the resistance less than 10 Ω?	Replace the keyless access CM. <Ref. to SL-100, REMOVAL, Keyless Access CM.>	Repair or replace the open circuit of harness.

2. CANNOT LOCK WITH KEYLESS ACCESS FROM THE DRIVER'S DOOR

CAUTION:
• Check that there are no other registered access keys inside the vehicle.
• Inspect LAN system according to the basic diagnostic procedure, and make sure that there is no fault.
• Check that the keyless access function is not stopped.
• When the access key or keyless access CM is replaced, registration of the immobilizer is required. For the relevant procedures, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

	Step	Check	Yes	No
1	**CHECK DOOR LOCK SWITCH.** Check that the lock/unlock operates with the driver's door lock switch.	Does it lock/unlock normally?	Go to step **2**.	Check the door lock circuit. <Ref. to SL-10, SYMPTOM CHART, INSPECTION, Door Lock Control System.>
2	**CHECK CURRENT DATA.** 1) Display the current data «Driver's seat lock status SW input» of «Body Control» using Subaru Select Monitor. <Ref. to BC(diag)-17, Read Current Data.> 2) Read the data when locking/unlocking the driver's side lock actuator.	Does the data change from ON/OFF?	Go to step **3**.	Check the door lock switch circuit.
3	**CHECK CURRENT DATA.** 1) Display the current data «Driver's lock touch sensor SW» of «Keyless Access with Push Button Start» using Subaru Select Monitor. <Ref. to KPS(diag)-27, Read Current Data.> 2) Read the data when operating the touch sensor (lock) of the door outer handle.	Does the data change from ON/OFF according to the sensor operation?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Go to step **4**.
4	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the keyless access CM connector. 2) Disconnect the front outer handle connector. 3) Using a tester, measure the resistance between the keyless access CM connector and front outer handle connector. ***Connector & terminal*** ***(B574) No. 20 — (D66) No. 1:***	Is the resistance less than 1 Ω?	Go to step **5**.	Repair or replace the open circuit of harness.
5	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 20 — Chassis ground:***	Is the resistance 10 kΩ or more?	Go to step **6**.	Repair or replace the short circuit of the harness.

	Step	Check	Yes	No
6	**REPLACE FRONT DOOR OUTER HANDLE.** Replace the driver's side front outer handle with the passenger's side front outer handle.	Does it operate properly?	Replace the driver's front outer handle. <Ref. to SL-33, REMOVAL, Front Outer Handle.>	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>

3. CANNOT LOCK/UNLOCK WITH KEYLESS ACCESS FROM THE DRIVER'S DOOR

CAUTION:
• Check that there are no other registered access keys inside the vehicle.
• Inspect LAN system according to the basic diagnostic procedure, and make sure that there is no fault.
• Check that the keyless access function is not stopped.
• When the access key or keyless access CM is replaced, registration of the immobilizer is required. For the relevant procedures, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

	Step	Check	Yes	No
1	**CHECK DOOR LOCK SWITCH.** Check that the lock/unlock operates with the driver's door lock switch.	Does it lock/unlock normally?	Go to step **2**.	Check the door lock circuit. <Ref. to SL-10, SYMPTOM CHART, INSPECTION, Door Lock Control System.>
2	**CHECK FUSE.** Check the fuse. <Ref. to SL-8, Relay and Fuse.>	Is the check result OK?	Go to step **3**.	Replace the fuse.
3	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the keyless access CM connector. 2) Disconnect the front outer handle connector. 3) Using a tester, measure the resistance between the keyless access CM connector and front outer handle connector, and between front outer handle connector and chassis ground. ***Connector & terminal*** ***(B574) No. 12 — (D66) No. 6:*** ***(B574) No. 13 — (D66) No. 3:*** ***(B574) No. 19 — (D66) No. 5:*** ***(D66) No. 2 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **4**.	Repair or replace the open circuit of harness.
4	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 12 — Chassis ground:*** ***(B574) No. 13 — Chassis ground:***	Is the resistance 10 kΩ or more?	Go to step **5**.	Repair or replace the short circuit of the harness.

	Step	Check	Yes	No
5	**CHECK KEYLESS ACCESS CM.** 1) Connect the keyless access CM connector. 2) Turn the ignition switch to OFF, close all doors and take the access key out of passenger room. 3) Using the Subaru Select Monitor, measure the waveform between the front outer handle connector. ***Connector & terminal*** ***(D66) No. 6 — (D66) No. 3:***	Does pulse output change from pulse output OFF → pulse output ON by the lock operation using access key?	Go to step **6**.	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>
6	**REPLACE FRONT DOOR OUTER HANDLE.** Replace the driver's side front outer handle with the passenger's side front outer handle.	Does it operate properly?	Replace the driver's front outer handle. <Ref. to SL-33, Front Outer Handle.>	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>

4. CANNOT UNLOCK WITH KEYLESS ACCESS FROM THE DRIVER'S DOOR

CAUTION:
- **Check that there are no other registered access keys inside the vehicle.**
- **Inspect LAN system according to the basic diagnostic procedure, and make sure that there is no fault.**
- **Check that the keyless access function is not stopped.**
- **When the access key or keyless access CM is replaced, registration of the immobilizer is required. For the relevant procedures, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.**

	Step	Check	Yes	No
1	**CHECK DOOR LOCK SWITCH.** Check that the lock/unlock operates with the driver's door lock switch.	Does it lock/unlock normally?	Go to step **2**.	Check the door lock circuit. <Ref. to SL-10, SYMPTOM CHART, INSPECTION, Door Lock Control System.>
2	**CHECK CURRENT DATA.** 1) Display the current data «Driver's seat lock status SW input» of «Body Control» using Subaru Select Monitor. <Ref. to BC(diag)-17, Read Current Data.> 2) Read the data when locking/unlocking the driver's side lock actuator.	Does the data change from ON/OFF?	Go to step **3**.	Check the door lock switch circuit.
3	**CHECK CURRENT DATA.** 1) Display the current data «Driver's unlock touch sensor switch» of «Keyless Access with Push Button Start» using Subaru Select Monitor. <Ref. to KPS(diag)-27, Read Current Data.> 2) Read the data when operating the touch sensor (unlock) of the door outer handle.	Does the data change from ON/OFF according to the sensor operation?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Go to step **4**.
4	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the keyless access CM connector. 2) Disconnect the front outer handle connector. 3) Using a tester, measure the resistance between the keyless access CM connector and front outer handle connector. ***Connector & terminal*** ***(B574) No. 22 — (D66) No. 4:***	Is the resistance less than 1 Ω?	Go to step **5**.	Repair or replace the open circuit of harness.

	Step	Check	Yes	No
5	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 22 — Chassis ground:***	Is the resistance 10 kΩ or more?	Go to step **6**.	Repair or replace the short circuit of the harness.
6	**REPLACE FRONT DOOR OUTER HANDLE.** Replace the driver's side front outer handle with the passenger's side front outer handle.	Does it operate properly?	Replace the driver's front outer handle. <Ref. to SL-33, REMOVAL, Front Outer Handle.>	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>

5. CANNOT LOCK WITH KEYLESS ACCESS FROM THE PASSENGER'S DOOR

CAUTION:
• Check that there are no other registered access keys inside the vehicle.
• Inspect LAN system according to the basic diagnostic procedure, and make sure that there is no fault.
• Check that the keyless access function is not stopped.
• When the access key or keyless access CM is replaced, registration of the immobilizer is required. For the relevant procedures, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

	Step	Check	Yes	No
1	**CHECK DOOR LOCK SWITCH.** Check that the lock/unlock operates with the driver's door lock switch.	Does it lock/unlock normally?	Go to step **2**.	Check the door lock circuit. <Ref. to SL-10, SYMPTOM CHART, INSPECTION, Door Lock Control System.>
2	**CHECK CURRENT DATA.** 1) Display the current data «Passenger's seat lock status SW input» of «Body Control» using Subaru Select Monitor. <Ref. to BC(diag)-17, Read Current Data.> 2) Read the data when locking/unlocking the passenger's side lock actuator.	Does the data change from ON/OFF?	Go to step **3**.	Check the door lock switch circuit.
3	**CHECK CURRENT DATA.** 1) Display the current data «Passenger's lock touch sensor SW» of «Keyless Access with Push Button Start» using Subaru Select Monitor. <Ref. to KPS(diag)-27, Read Current Data.> 2) Read the data when operating the touch sensor (lock) of the door outer handle.	Does the data change from ON/OFF according to the sensor operation?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Go to step **4**.
4	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the keyless access CM connector. 2) Disconnect the front outer handle connector. 3) Using a tester, measure the resistance between the keyless access CM connector and front outer handle connector. ***Connector & terminal*** ***(B574) No. 8 — (D56) No. 1:***	Is the resistance less than 1 Ω?	Go to step **5**.	Repair or replace the open circuit of harness.

	Step	Check	Yes	No
5	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 8 — Chassis ground:***	Is the resistance 10 kΩ or more?	Go to step **6**.	Repair or replace the short circuit of the harness.
6	**REPLACE FRONT DOOR OUTER HANDLE.** Replace the passenger's side front outer handle with the driver's side front outer handle.	Does it operate properly?	Replace the passenger's front outer handle. <Ref. to SL-33, REMOVAL, Front Outer Handle.>	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>

6. CANNOT LOCK/UNLOCK WITH KEYLESS ACCESS FROM THE PASSENGER'S DOOR

CAUTION:
• Check that there are no other registered access keys inside the vehicle.
• Inspect LAN system according to the basic diagnostic procedure, and make sure that there is no fault.
• Check that the keyless access function is not stopped.
• When the access key or keyless access CM is replaced, registration of the immobilizer is required. For the relevant procedures, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

	Step	Check	Yes	No
1	**CHECK DOOR LOCK SWITCH.** Check that the lock/unlock operates with the driver's door lock switch.	Does it lock/unlock normally?	Go to step **2**.	Check the door lock circuit. <Ref. to SL-10, SYMPTOM CHART, INSPECTION, Door Lock Control System.>
2	**CHECK FUSE.** Check the fuse. <Ref. to SL-8, Relay and Fuse.>	Is the check result OK?	Go to step **3**.	Replace the fuse.
3	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the keyless access CM connector. 2) Disconnect the front outer handle connector. 3) Using a tester, measure the resistance between the keyless access CM connector and front outer handle connector, and between front outer handle connector and chassis ground. ***Connector & terminal*** ***(B574) No. 11 — (D56) No. 6:*** ***(B574) No. 10 — (D56) No. 3:*** ***(B574) No. 21 — (D56) No. 5:*** ***(D56) No. 2 — Chassis ground:***	Is the resistance less than 1 Ω?	Go to step **4**.	Repair or replace the open circuit of harness.
4	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 11 — Chassis ground:*** ***(B574) No. 10 — Chassis ground:***	Is the resistance 10 kΩ or more?	Go to step **5**.	Repair or replace the short circuit of the harness.

	Step	Check	Yes	No
5	**CHECK KEYLESS ACCESS CM.** 1) Connect the keyless access CM connector. 2) Turn the ignition switch to OFF, close all doors and take the access key out of passenger room. 3) Using the Subaru Select Monitor, measure the waveform between the front outer handle connector. ***Connector & terminal*** ***(D56) No. 6 — (D56) No. 3:***	Does pulse output change from pulse output OFF → pulse output ON by the lock operation using access key?	Go to step **6**.	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>
6	**REPLACE FRONT DOOR OUTER HANDLE.** Replace the passenger's side front outer handle with the driver's side front outer handle.	Does it operate properly?	Replace the passenger's front outer handle. <Ref. to SL-33, Front Outer Handle.>	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>

7. CANNOT UNLOCK WITH KEYLESS ACCESS FROM THE PASSENGER'S DOOR

CAUTION:
- **Check that there are no other registered access keys inside the vehicle.**
- **Inspect LAN system according to the basic diagnostic procedure, and make sure that there is no fault.**
- **Check that the keyless access function is not stopped.**
- **When the access key or keyless access CM is replaced, registration of the immobilizer is required. For the relevant procedures, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.**

	Step	Check	Yes	No
1	**CHECK DOOR LOCK SWITCH.** Check that the lock/unlock operates with the driver's door lock switch.	Does it lock/unlock normally?	Go to step **2**.	Check the door lock circuit. <Ref. to SL-10, SYMPTOM CHART, INSPECTION, Door Lock Control System.>
2	**CHECK CURRENT DATA.** 1) Display the current data «Passenger's seat lock status SW input» of «Body Control» using Subaru Select Monitor. <Ref. to BC(diag)-17, Read Current Data.> 2) Read the data when locking/unlocking the passenger's side lock actuator.	Does the data change from ON/OFF?	Go to step **3**.	Check the door lock switch circuit.
3	**CHECK CURRENT DATA.** 1) Display the current data «Passenger's unlock touch sensor switch» of «Keyless Access with Push Button Start» using Subaru Select Monitor. <Ref. to KPS(diag)-27, Read Current Data.> 2) Read the data when operating the touch sensor (unlock) of the door outer handle.	Does the data change from ON/OFF according to the sensor operation?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Go to step **4**.
4	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the keyless access CM connector. 2) Disconnect the front outer handle connector. 3) Using a tester, measure the resistance between the keyless access CM connector and front outer handle connector. ***Connector & terminal*** ***(B574) No. 23 — (D56) No. 4:***	Is the resistance less than 1 Ω?	Go to step **5**.	Repair or replace the open circuit of harness.

	Step	Check	Yes	No
5	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Using a tester, measure the resistance between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 23 — Chassis ground:***	Is the resistance 10 kΩ or more?	Go to step **6**.	Repair or replace the short circuit of the harness.
6	**REPLACE FRONT DOOR OUTER HANDLE.** Replace the passenger's side front outer handle with the driver's side front outer handle.	Does it operate properly?	Replace the passenger's front outer handle. <Ref. to SL-33, REMOVAL, Front Outer Handle.>	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>

8. THE KEYLESS ACCESS PASSENGER ROOM BUZZER DOES NOT SOUND

CAUTION:
• Inspect LAN system according to the basic diagnostic procedure, and make sure that there is no fault.
• Check that the keyless access function is not stopped.
• When the access key or keyless access CM is replaced, registration of the immobilizer is required. For the relevant procedures, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

	Step	Check	Yes	No
1	**CHECK COMBINATION METER.** Check the combination meter.	Is the check result OK?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Replace the combination meter. <Ref. to IDI-13, REMOVAL, Combination Meter.>

9. THE KEYLESS ACCESS EXTERNAL BUZZER DOES NOT BEEP

	Step	Check	Yes	No
1	**CHECK BODY INTEGRATED UNIT SETTING.** Using the Subaru Select Monitor, check the current data «Answer-back Buzzer» of «Body Control».	Is the setting «ON»?	Go to step **2**.	Change the setting to «ON».
2	**CHECK BUZZER OPERATION.** Use the Subaru Select Monitor to perform the function check «Keyless Buzzer Output» under «Body Control». <Ref. to BC(diag)-30, OPERATION, Function Check.>	Does the buzzer sound?	Go to step **3**.	Go to step **5**.
3	**CHECK KEYLESS ACCESS SYSTEM.** 1) Turn to IGN ON. 2) With all doors closed and the access key carried, touch the touch sensor (lock) on the driver's door handle.	Does the door lock?	Go to step **4**.	Refer to "CANNOT LOCK WITH KEYLESS ACCESS FROM THE DRIVER'S DOOR" and perform inspection. <Ref. to KPS(diag)-115, CANNOT LOCK WITH KEYLESS ACCESS FROM THE DRIVER'S DOOR, INSPECTION, Diagnostics with Phenomenon.>

	Step	Check	Yes	No
4	**CHECK KEYLESS ACCESS SYSTEM.** 1) Open the door glass. 2) Place the access key on the driver's seat, and close the door. 3) Touch the touch sensor (lock) on the driver's door handle.	Does the buzzer sound? (Lock-out protection warning)	System is normal.	Replace the keyless access CM. <Ref. to SL-100, REMOVAL, Keyless Access CM.>
5	**CHECK HARNESS (OPEN CIRCUIT).** 1) Turn to IGN OFF. 2) Disconnect the connectors of the body integrated unit and keyless buzzer. 3) Measure the resistance between body integrated unit connector and keyless buzzer connector. ***Connector & terminal*** ***(B280) No. 20 — (B164) No. 1:***	Is the resistance less than 10 Ω?	Go to step **6**.	Repair or replace the open circuit of harness.
6	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Measure the resistance between keyless buzzer connector and chassis ground. ***Connector & terminal*** ***(B164) No. 1 — Chassis ground:***	Is the resistance 10 kΩ or more?	Go to step **7**.	Repair or replace the short circuit of the harness.
7	**CHECK HARNESS (OPEN CIRCUIT).** Measure the resistance between keyless buzzer connector and chassis ground. ***Connector & terminal*** ***(B164) No. 2 — Chassis ground:***	Is the resistance less than 10 Ω?	Go to step **8**.	Repair or replace the open circuit of harness.
8	**CHECK BODY INTEGRATED UNIT.** 1) Connect the connector of body integrated unit. 2) Use the Subaru Select Monitor to perform the function check «Keyless Buzzer Output» under «Body Control». <Ref. to BC(diag)-30, OPERATION, Function Check.> 3) Measure the voltage between body integrated unit connector and chassis ground using an oscilloscope. ***Connector & terminal*** ***(B280) No. 20 (+) — Chassis ground (–):***	Is the frequency 2kHz, voltage 9 V or more?	Replace the keyless buzzer. <Ref. to SL-79, REMOVAL, Keyless Buzzer.>	Replace the body integrated unit. <Ref. to SL-81, Body Integrated Unit.>

10.INTERNAL COLLATION DOES NOT FUNCTION

CAUTION:
When the access key or keyless access CM is replaced, registration of the immobilizer is required. For the relevant procedures, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

	Step	Check	Yes	No
1	**CHECK ACCESS KEY.** Check the battery of the access key. <Ref. to SL-87, INSPECTION, Access Key.>	Is the check result OK?	Go to step **2**.	Replace the battery.
2	**CHECK INTERIOR ANTENNA.** 1) Using the Subaru Select Monitor, select the system check «Front interior transmitter + interior tuner» under «Keyless Access with Push Button Start». <Ref. to KPS(diag)-37, Keyless Access System Check.> 2) Using a tester, check the output between keyless access CM connector terminals while performing the Keyless access system check. ***Connector & terminal*** ***(B574) No. 2 — (B574) No. 3:***	Is a pulse output?	Go to step **3**.	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>
3	**CHECK INTERIOR ANTENNA.** 1) Using the Subaru Select Monitor, select the system check «Rear interior transmitter + interior tuner» under «Keyless Access with Push Button Start». <Ref. to KPS(diag)-37, Keyless Access System Check.> 2) Using a tester, check the output between keyless access CM connector terminals while performing the Keyless access system check. ***Connector & terminal*** ***(B573) No. 10 — (B573) No. 11:***	Is a pulse output?	Go to step **4**.	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>
4	**CHECK INTERIOR ANTENNA.** 1) Using the Subaru Select Monitor, select the system check «Trunk internal transmitter + interior tuner» or «Rear gate internal transmitter + interior tuner» under «Keyless Access with Push Button Start». <Ref. to KPS(diag)-37, Keyless Access System Check.> 2) Using a tester, check the output between keyless access CM connector terminals while performing the Keyless access system check. ***Connector & terminal*** ***(B573) No. 8 — (B573) No. 9:***	Is a pulse output?	Go to step **5**.	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>
5	**CHECK WIRING HARNESS (OPEN).** 1) Disconnect the front interior antenna connector and the keyless access CM connector. 2) Using a tester, check continuity between the front interior antenna connector and the keyless access CM connector. ***Connector & terminal*** ***(AD12) No. 1 — (B574) No. 3:*** ***(AD12) No. 3 — (B574) No. 2:***	Is there continuity?	Go to step **6**.	Repair or replace the open circuit of harness.

	Step	Check	Yes	No
6	**CHECK WIRING HARNESS (OPEN).** 1) Disconnect the center interior antenna connector and the keyless access CM connector. 2) Using a tester, check continuity between the center interior antenna connector and the keyless access CM connector. ***Connector & terminal*** ***(R298) No. 1 — (B573) No. 11:*** ***(R298) No. 3 — (B573) No. 10:***	Is there continuity?	Go to step **7**.	Repair or replace the open circuit of harness.
7	**CHECK WIRING HARNESS (OPEN).** 1) Disconnect the rear interior antenna connector and the keyless access CM connector. 2) Using a tester, check continuity between the rear interior antenna connector and the keyless access CM connector. ***Connector & terminal*** ***(R297) No. 1 — (B573) No. 9:*** ***(R297) No. 3 — (B573) No. 8:***	Is there continuity?	Go to step **8**.	Repair or replace the open circuit of harness.
8	**CHECK ANTENNA.** Replace the front interior antenna with a new or properly functioning part.	Does it operate properly?	Replace the front interior antenna. <Ref. to SL-92, REMOVAL, Keyless Access Indoor Antenna.>	Go to step **9**.
9	**CHECK ANTENNA.** Replace the center interior antenna with a new or properly functioning part.	Does it operate properly?	Replace the center interior antenna. <Ref. to SL-92, REMOVAL, Keyless Access Indoor Antenna.>	Go to step **10**.
10	**CHECK ANTENNA.** Replace the rear interior antenna with a new or properly functioning part.	Does it operate properly?	Replace the rear interior antenna. <Ref. to SL-92, REMOVAL, Keyless Access Indoor Antenna.>	Go to step **11**.
11	**CHECK WIRING HARNESS (OPEN).** 1) Disconnect the receiver connector and the keyless access CM connector. 2) Using a tester, check continuity between the receiver connector and keyless access CM connector. ***Connector & terminal*** ***(R296) No. 4 — (B573) No. 5:*** ***(R296) No. 5 — (B573) No. 17:*** ***(R296) No. 2 — (B573) No. 19:***	Is there continuity?	Go to step **12**.	Repair or replace the open circuit of harness.
12	**CHECK RECEIVER.** Replace the receiver with a new or properly functioning part.	Does it operate properly?	Replace the receiver. <Ref. to SL-98, REMOVAL, Receiver.>	Go to step **13**.
13	**CHECK KEYLESS ACCESS SYSTEM CHECK.** 1) Using the Subaru Select Monitor, select the system check «Front interior transmitter + interior tuner» under «Keyless Access with Push Button Start». <Ref. to KPS(diag)-37, Keyless Access System Check.> 2) Hold the access key 1 m or more away from the audio panel, then come closer to within 0.8 m.	Does the buzzer sound?	Go to step **14**.	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>

	Step	Check	Yes	No
14	**CHECK KEYLESS ACCESS SYSTEM CHECK.** 1) Using the Subaru Select Monitor, select the system check «Rear interior transmitter + interior tuner» under «Keyless Access with Push Button Start». <Ref. to KPS(diag)-37, Keyless Access System Check.> 2) Hold the access key 1 m or more away from the center of the second row seats, then come closer to within 0.8 m.	Does the buzzer sound?	Go to step **15**.	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>
15	**CHECK KEYLESS ACCESS SYSTEM CHECK.** 1) Using the Subaru Select Monitor, select the system check «Trunk internal transmitter + interior tuner» under «Keyless Access with Push Button Start». <Ref. to KPS(diag)-37, Keyless Access System Check.> 2) Hold the access key 1 m or more away from the back of the rear seat, then come closer to within 0.8 m.	Does the buzzer sound?	System is normal.	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>

11.TRUNK WILL NOT OPEN WITH KEYLESS ACCESS

CAUTION:
• Check that there are no other registered access keys inside the trunk.
• Inspect LAN system according to the basic diagnostic procedure, and make sure that there is no fault.
• Check that the keyless access function is not stopped.
• When the access key or keyless access CM is replaced, registration of the immobilizer is required. For the relevant procedures, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

	Step	Check	Yes	No
1	**CHECK TRUNK OPENER BUTTON.** Check that the trunk opens with the driver's seat trunk opener button.	Does it open normally?	Go to step **2**.	Check the door lock circuit. <Ref. to SL-10, SYMPTOM CHART, INSPECTION, Door Lock Control System.>
2	**CHECK KEYLESS OPERATION.** Check that the trunk opens when the trunk opener button of the access key is operated.	Does it open normally?	Go to step **7**.	Go to step **3**.
3	**CHECK TRUNK UNLOCK OPERATION.** 1) Using the Subaru Select Monitor, select the function check «R gate/trunk UNLK output» under «Body Control». <Ref. to BC(diag)-30, Function Check.> 2) Check that the trunk opens when the R gate/trunk UNLK signal is output.	Does it open normally?	Go to step **7**.	Go to step **4**.
4	**CHECK WIRING HARNESS (OPEN).** 1) Disconnect the body integrated unit connector and trunk lid lock actuator connector. 2) Check the continuity between body integrated unit connector and trunk lid lock actuator connector. ***Connector & terminal*** ***(i171) No. 7 — (R186) No. 1:***	Is there continuity?	Go to step **5**.	Repair or replace the open circuit of harness.

Step		Check	Yes	No
5	**CHECK WIRING HARNESS (OPEN).** Check the continuity between the trunk lid lock actuator connector and chassis ground. ***Connector & terminal*** ***(R186) No. 2 — Chassis ground:***	Is there continuity?	Go to step **6**.	Repair or replace the open circuit of harness.
6	**CHECK TRUNK LID LOCK ACTUATOR.** Check the trunk lid lock actuator. <Ref. to SL-49, Trunk Lid Latch and Actuator Assembly.>	Is the check result OK?	Replace the body integrated unit. <Ref. to SL-81, Body Integrated Unit.>	Replace the trunk lid latch & actuator assembly. <Ref. to SL-49, Trunk Lid Latch and Actuator Assembly.>
7	**CHECK ACCESS KEY.** Check the access key LED when the trunk opener button of the access key is operated.	Does the access key LED illuminate?	Go to step **8**.	Replace the access key. <Ref. to SL-87, REPLACEMENT, Access Key.>
8	**CHECK ACCESS KEY.** 1) Prepare all access keys registered to the vehicle. 2) Check that the trunk opens with each access key.	Does it open normally?	Go to step **9**.	Replace the access key. <Ref. to SL-87, REPLACEMENT, Access Key.>
9	**CHECK CURRENT DATA.** 1) Display the current data «Trunk Request SW» of «Keyless Access with Push Button Start» using Subaru Select Monitor. <Ref. to KPS(diag)-27, Read Current Data.> 2) Read the data when pressing the trunk opener button.	Does the data display ON?	Go to step **13**.	Go to step **10**.
10	**CHECK WIRING HARNESS (OPEN).** 1) Disconnect the trunk opener button connector and the keyless access CM connector. 2) Using a tester, check continuity between the trunk opener button connector and keyless access CM connector. ***Connector & terminal*** ***(R294) No. 1 — (B573) No. 27:***	Is there continuity?	Go to step **11**.	Repair or replace the open circuit of harness.
11	**CHECK WIRING HARNESS (OPEN).** 1) Using a tester, check the continuity between the trunk opener button connector and chassis ground. ***Connector & terminal*** ***(R294) No. 2 — Chassis ground:***	Is there continuity?	Go to step **12**.	Repair or replace the open circuit of harness.
12	**CHECK TRUNK OPENER BUTTON.** Using a tester, check the continuity between trunk opener button connector terminals. ***Connector & terminal*** ***(R294) No. 1 — No. 2:***	Is there continuity when pressing the switch?	Go to step **13**.	Replace the trunk opener button. <Ref. to SL-97, REMOVAL, Trunk Opener Button.>
13	**CHECK WIRING HARNESS (OPEN).** 1) Disconnect the exterior rear antenna connector and the keyless access CM connector. 2) Using a tester, check continuity between the exterior rear antenna connector and keyless access CM connector. ***Connector & terminal*** ***(R299) No. 1 — (B573) No. 2:*** ***(R299) No. 2 — (B573) No. 1:***	Is there continuity?	Go to step **14**.	Repair or replace the open circuit of harness.

	Step	Check	Yes	No
14	**CHECK OUTSIDE REAR ANTENNA.** Replace the outside rear antenna with new or properly working parts.	Does it operate properly?	Replace the outside rear antenna. <Ref. to SL-95, REMOVAL, Keyless Access Outdoor Antenna.>	Go to step **15**.
15	**CHECK KEYLESS ACCESS SYSTEM CHECK.** 1) Using the Subaru Select Monitor, select the system check «Out of trunk transmitter + room tuner» under «Keyless Access with Push Button Start». <Ref. to KPS(diag)-37, Keyless Access System Check.> 2) Hold the access key 1 m or more away from the trunk, then come closer to within 0.8 m.	Does the outside buzzer sound?	The circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.	Replace the keyless access CM. <Ref. to SL-100, REMOVAL, Keyless Access CM.>

12.ACCESS KEY LOCKOUT PROTECTION FUNCTION IN THE TRUNK DOES NOT OPERATE

CAUTION:
• Inspect LAN system according to the basic diagnostic procedure, and make sure that there is no fault.
• Check that the keyless access function is not stopped.
• When the access key or keyless access CM is replaced, registration of the immobilizer is required. For the relevant procedures, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

	Step	Check	Yes	No
1	**CHECK TRUNK OPENER BUTTON.** Check that the trunk opens with the driver's seat trunk opener button.	Does it open normally?	Go to step **2**.	Check the door lock circuit. <Ref. to SL-10, INSPECTION, Door Lock Control System.>
2	**CHECK KEYLESS OPERATION.** Check that the trunk opens when the trunk opener button of the access key is operated.	Does it open normally?	Go to step **7**.	Go to step **3**.
3	**CHECK TRUNK UNLOCK OPERATION.** 1) Using the Subaru Select Monitor, select the function check «R gate/trunk UNLK output» under «Body Control». <Ref. to BC(diag)-30, Function Check.> 2) Check that the trunk opens when the R gate/trunk UNLK signal is output.	Does it open normally?	Go to step **7**.	Go to step **4**.
4	**CHECK WIRING HARNESS (OPEN).** 1) Disconnect the body integrated unit connector and trunk lid lock actuator connector. 2) Check the continuity between body integrated unit connector and trunk lid lock actuator connector. ***Connector & terminal*** ***(i171) No. 7 — (R186) No. 1:***	Is there continuity?	Go to step **5**.	Repair or replace the open circuit of harness.

	Step	Check	Yes	No
5	**CHECK WIRING HARNESS (OPEN).** Check the continuity between the trunk lid lock actuator connector and chassis ground. ***Connector & terminal*** ***(R186) No. 2 — Chassis ground:***	Is there continuity?	Go to step **6**.	Repair or replace the open circuit of harness.
6	**CHECK TRUNK LID LOCK ACTUATOR.** Check the trunk lid lock actuator. <Ref. to SL-49, Trunk Lid Latch and Actuator Assembly.>	Is the check result OK?	Replace the body integrated unit. <Ref. to SL-81, Body Integrated Unit.>	Replace the trunk lid latch & actuator assembly. <Ref. to SL-49, Trunk Lid Latch and Actuator Assembly.>
7	**CHECK ACCESS KEY.** 1) Prepare all access keys registered to the vehicle. 2) Check that the trunk opens with each access key.	Does it open normally?	Go to step **8**.	Replace the access key. <Ref. to SL-87, REPLACEMENT, Access Key.>
8	**CHECK WIRING HARNESS (OPEN).** 1) Disconnect the interior rear antenna connector and the keyless access CM connector. 2) Using a tester, check continuity between the interior rear antenna connector and keyless access CM connector. ***Connector & terminal*** ***(R297) No. 1 — (B573) No. 9:*** ***(R297) No. 3 — (B573) No. 8:***	Is there continuity?	Go to step **9**.	Repair or replace the open circuit of harness.
9	**CHECK PASSENGER ROOM REAR ANTENNA.** Replace the passenger room rear antenna with a new or properly functioning part. <Ref. to SL-92, REMOVAL, Keyless Access Indoor Antenna.>	Does it operate properly?	Replace the passenger room rear antenna. <Ref. to SL-92, REMOVAL, Keyless Access Indoor Antenna.>	Go to step **10**.
10	**CHECK RECEIVER.** Replace the receiver with a new or properly functioning part. <Ref. to SL-98, REMOVAL, Receiver.>	Does it operate properly?	Replace the receiver. <Ref. to SL-98, REMOVAL, Receiver.>	Go to step **11**.
11	**CHECK WIRING HARNESS (OPEN).** 1) Disconnect the receiver connector and the keyless access CM connector. 2) Using a tester, check continuity between the receiver connector and keyless access CM connector. ***Connector & terminal*** ***(R296) No. 4 — (B573) No. 5:*** ***(R296) No. 5 — (B573) No. 17:*** ***(R296) No. 2 — (B573) No. 19:***	Is there continuity?	Go to step **12**.	Repair or replace the open circuit of harness.

	Step	Check	Yes	No
12	**CHECK KEYLESS ACCESS SYSTEM CHECK.** 1) Using the Subaru Select Monitor, select the system check «Trunk internal transmitter + interior tuner» under «Keyless Access with Push Button Start». <Ref. to KPS(diag)-37, Keyless Access System Check.> 2) Hold the access key 1 m or more away from the center of inside the trunk, then come closer to within 0.8 m.	Does the outside buzzer sound?	The circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.	Replace the keyless access CM. <Ref. to SL-100, REMOVAL, Keyless Access CM.>

13.THE STEERING LOCK IS NOT RELEASED

CAUTION:
When the steering lock CM is replaced, registration of the immobilizer is required. For the relevant procedures, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

	Step	Check	Yes	No
1	**CHECK OPERATION.** 1) Depress the brake pedal (CVT model) or clutch pedal (MT model). 2) While turning the steering wheel lightly to the left and right, press the push button ignition switch. 3) Confirm that the steering lock is released and the engine start.	Does the engine fail to start with the steering lock released?	Perform the diagnosis for engine system. <Ref. to EN(w/o STI)(diag)-87, Diagnostics for Engine Starting Failure.> <Ref. to EN(STI)(diag)-77, Diagnostics for Engine Starting Failure.>	Go to step **2**.
2	**CHECK DTC.** Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs.	Go to step **3**.
3	**CHECK CURRENT DATA.** 1) Using the Subaru Select Monitor, display the current data «Steering lock unlock request reception status» and «Steering lock lock/unlock command reception history» under «Keyless Access with Push Button Start». <Ref. to KPS(diag)-27, Read Current Data.> 2) Read the data when the push button ignition switch is pressed while in possession of the access key. (Maintain for 10 seconds after switch operation)	Does the data change from "Not yet received" to "Reception", and from "OFF" to "ON"?	Go to step **4**.	Go to step **7**.
4	**CHECK STEERING LOCK CM.** 1) Disconnect the steering lock CM connector. 2) Using a tester, measure the voltage between the steering lock CM connector and chassis ground. ***Connector & terminal*** ***(B424) No. 7 (+) — Chassis ground (–):***	Is the voltage 10 V or more?	Go to step **5**.	Repair or replace the open circuit of harness.

	Step	Check	Yes	No
5	**CHECK STEERING LOCK CM.** Using a tester, check continuity between the steering lock CM connector and chassis ground. ***Connector & terminal*** ***(B424) No. 1 — Chassis ground:***	Is there continuity?	Go to step **6**.	Repair or replace the open circuit of harness.
6	**CHECK STEERING LOCK CM.** 1) Connect the disconnected connectors. 2) Using a tester, measure the voltage between steering lock CM terminals right after the ignition switch is turned to ON. ***Connector & terminal*** ***(B424) No. 3 (+) — (B424) No. 1 (–):***	Does the voltage remain 1 V or less immediately after the ignition ON?	Replace the steering lock CM. <Ref. to SL-104, REMOVAL, Steering Lock CM.>	Repair or replace the open circuit of harness.
7	**CHECK CURRENT DATA.** Using the Subaru Select Monitor, display the current data «Code collation result between smart ECM and ID code box» under «Keyless Access with Push Button Start». <Ref. to KPS(diag)-27, Read Current Data.>	Is data displayed as being normal?	Go to step **9**.	Go to step **8**.
8	**CHECK CURRENT DATA.** 1) Replace with a properly functioning or new ID code box. <Ref. to SL-103, NOTE, ID Code Box.> 2) Using the Subaru Select Monitor, display the current data «Code collation result between smart ECM and ID code box» under «Keyless Access with Push Button Start». <Ref. to KPS(diag)-27, Read Current Data.>	Is data displayed as being normal?	System is normal.	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>
9	**CHECK CURRENT DATA.** Using the Subaru Select Monitor, display the current data «Code collation result between steering locked ECM and ID code box» under «Keyless Access with Push Button Start». <Ref. to KPS(diag)-27, Read Current Data.>	Is data displayed as being normal?	System is normal.	Go to step **10**.
10	**CHECK ID CODE BOX.** 1) Replace with a properly functioning or new ID code box. <Ref. to SL-103, NOTE, ID Code Box.> 2) Using the Subaru Select Monitor, display the current data «Code collation result between steering locked ECM and ID code box» under «Keyless Access with Push Button Start». <Ref. to KPS(diag)-27, Read Current Data.>	Is data displayed as being normal?	System is normal.	Go to step **11**.
11	**CHECK STEERING LOCK CM.** 1) Replace with a properly functioning or new steering lock CM. <Ref. to SL-104, REMOVAL, Steering Lock CM.> 2) After registering, the steering lock operates when the ignition is turned to OFF and the driver's door is opened and closed. 3) Turn the ignition to ON. 4) Operate the steering and check for whether the steering lock is released.	Is the steering lock released, and does the engine start?	Replace the steering lock CM. <Ref. to SL-104, REMOVAL, Steering Lock CM.>	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>

14.THE STEERING LOCK DOES NOT OPERATE

CAUTION:
When the keyless access CM or steering lock CM is replaced, registration of the immobilizer is required. For the relevant procedures, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs.	Go to step **2**.
2	**CHECK CURRENT DATA.** 1) Display the current data «Driver's door SW input» of «Body Control» using Subaru Select Monitor. <Ref. to BC(diag)-17, Read Current Data.> 2) Read the data when opening and closing the driver's door.	Does the data change from ON to OFF according to the opening and closing?	Go to step **3**.	Inspect door switch circuit.
3	**CHECK CURRENT DATA.** Display the current data «Shift P Signal» of «Keyless Access with Push Button Start» using Subaru Select Monitor. <Ref. to KPS(diag)-27, Read Current Data.>	Is the status displayed correctly when the shift lever is shifted from P to other than P?	Go to step **4**.	Check the P range switch and harness.
4	**CHECK CURRENT DATA.** Using the Subaru Select Monitor, display the current data of «Keyless Access with Push Button Start»: «Code collation result between smart ECM and ID code box». <Ref. to KPS(diag)-27, Read Current Data.>	Is the status normal?	Go to step **5**.	Replace the keyless access CM. <Ref. to SL-100, REMOVAL, Keyless Access CM.>
5	**CHECK CURRENT DATA.** Using the Subaru Select Monitor, display the current data of «Keyless Access with Push Button Start»: «Code collation result between steering locked ECM and ID code box». <Ref. to KPS(diag)-27, Read Current Data.>	Is the status normal?	Go to step **6**.	Replace the steering lock CM. <Ref. to SL-104, REMOVAL, Steering Lock CM.>
6	**CHECK CURRENT DATA.** 1) Display the current data «Steering lock lock/unlock command reception history» of «Keyless Access with Push Button Start» using Subaru Select Monitor. <Ref. to KPS(diag)-27, Read Current Data.> 2) While in possession of the access key, perform engine start operations, and read data within 10 seconds after starting.	Is data displayed as ON?	Go to step **7**.	Replace the keyless access CM. <Ref. to SL-100, REMOVAL, Keyless Access CM.>
7	**CHECK STEERING LOCK CM.** Using a tester, measure the waveform between steering lock CM terminals immediately after the following operations. Perform ignition ON, driver's side door close → shift lever "P" range, ignition OFF, and close → open the driver's side door. ***Connector & terminal*** ***(B424) No. 3 — (B424) No. 1:***	Is the waveform immediately after opening the driver's side door abnormal?	Replace the steering lock CM. <Ref. to SL-104, REMOVAL, Steering Lock CM.>	Go to step **8**.

	Step	Check	Yes	No
8	**CHECK WIRING HARNESS (OPEN).** 1) Disconnect the keyless access CM connector and the steering lock CM connector. 2) Using a tester, check continuity between the keyless access CM connector and steering lock CM connector. ***Connector & terminal*** ***(B424) No. 3 — (B574) No. 29:***	Is there continuity?	Go to step **9**.	Repair or replace the open circuit of harness.
9	**CHECK WIRING HARNESS (OPEN).** Using a tester, check continuity between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 11 — Chassis ground:***	Is there continuity?	Replace the keyless access CM. <Ref. to SL-100, REMOVAL, Keyless Access CM.>	Repair or replace the open circuit of harness.

15.POWER WILL NOT TURN ON (BOTH ACCESSORY AND IGNITION)

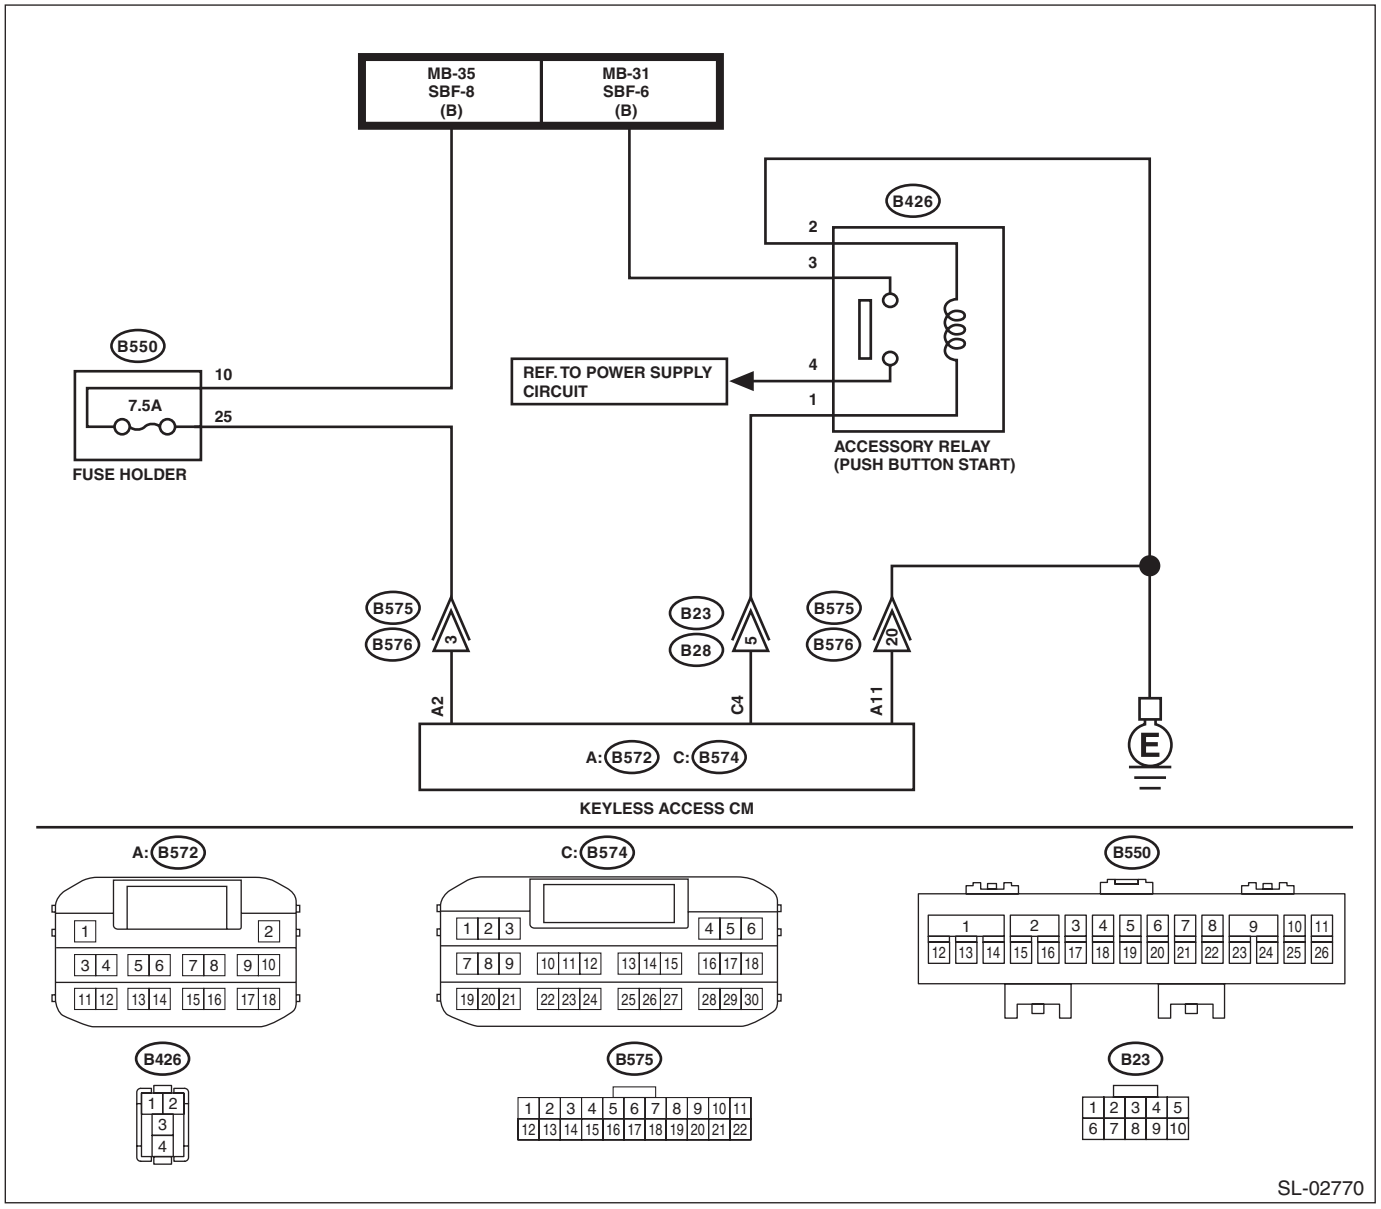
CAUTION:
• When the keyless access CM is replaced with a new unit, and the battery ground terminal is connected, it will become ignition ON. Also, if the battery is disconnected, it will resume to a condition with the battery cut off.
• When the keyless access CM is replaced, registration of the immobilizer is required. For the relevant procedures, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

	Step	Check	Yes	No
1	**CHECK FUSE.** Check the fuse. <Ref. to SL-8, Relay and Fuse.>	Is the check result OK?	Go to step **2**.	Replace the fuse.
2	**CHECK POWER SUPPLY.** 1) Remove IG relay 1 (push button start), IG relay 2 (push button start) and accessory relay (push button start). 2) Using a tester, measure the voltage between the relay block connector and chassis ground.	Is the voltage 10 V or more?	Go to step **3**.	Check the DC power supply circuit.
3	**CHECK CONNECTOR.** Check the engagement of each connector and for any deformation or looseness.	Is the check result OK?	Go to step **4**.	Repair the connector, or replace harness.
4	**CHECK WIRING HARNESS.** 1) Disconnect the keyless access CM connector. 2) Using a tester, measure the voltage between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 2 (+) — Chassis ground (–):***	Is the voltage between 8 V and 16 V?	Go to step **5**.	Repair or replace the open circuit of harness.
5	**CHECK WIRING HARNESS (OPEN).** Using a tester, check continuity between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 11 — Chassis ground:***	Is there continuity?	Go to step **6**.	Repair or replace the open circuit of harness.

	Step	Check	Yes	No
6	**CHECK DTC.** 1) Connect the keyless access CM connector. 2) Carrying the access key, depress the brake pedal (CVT model) or clutch pedal (MT model), and push the push button ignition switch. 3) Read the DTC using Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Are any DTCs displayed?	Perform the diagnosis for the displayed DTCs.	Go to step **7**.
7	**CHECK CURRENT DATA.** 1) Display the current data «Push start SW 1» and «Push start SW 2» of «Keyless Access with Push Button Start» using Subaru Select Monitor. <Ref. to KPS(diag)-27, Read Current Data.> 2) Read the data when pressing the push button ignition switch.	Does it change from OFF to ON along with the operation?	Go to step **8**.	Go to step **15**.
8	**CHECK RELAY (PUSH BUTTON START).** Check IG relay 1 and 2 (push button start), and accessory relay (push button start). <Ref. to SL-111, INSPECTION, IG Relay1 (Push Button Start).>	Is the check result OK?	Go to step **9**.	Replace the faulty relay.
9	**CHECK WIRING HARNESS (OPEN).** 1) Disconnect the keyless access CM connector, IG relay 1 (push button start), IG relay 2 (push button start) and accessory relay (push button start). 2) Using a tester, check continuity between terminals of keyless access CM connector, IG relay 1 (push button start), IG relay 2 (push button start) and accessory relay (push button start). ***Connector & terminal*** ***(B574) No. 6 — (B225) No. 38:*** ***(B572) No. 9 — (B225) No. 34:*** ***(B574) No. 4 — (B426) No. 1:***	Is there continuity?	Go to step **10**.	Repair or replace the open circuit of harness.
10	**CHECK WIRING HARNESS (GROUND SHORT CIRCUIT).** Using a tester, check continuity between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 9 — Chassis ground:*** ***(B574) No. 4 — Chassis ground:*** ***(B574) No. 6 — Chassis ground:***	Is there continuity?	Repair or replace the short circuit of the harness.	Go to step **11**.
11	**CHECK WIRING HARNESS (OPEN).** Using a tester, check the continuity between the IG relay 2 (push button start) connector and chassis ground. ***Connector & terminal*** ***(B225) No. 39 — Chassis ground:***	Is there continuity?	Go to step **12**.	Repair or replace the open circuit of harness.
12	**CHECK WIRING HARNESS (OPEN).** Using a tester, check the continuity between the IG relay 1 (push button start) connector and chassis ground. ***Connector & terminal*** ***(B225) No. 35 — Chassis ground:***	Is there continuity?	Go to step **13**.	Repair or replace the open circuit of harness.

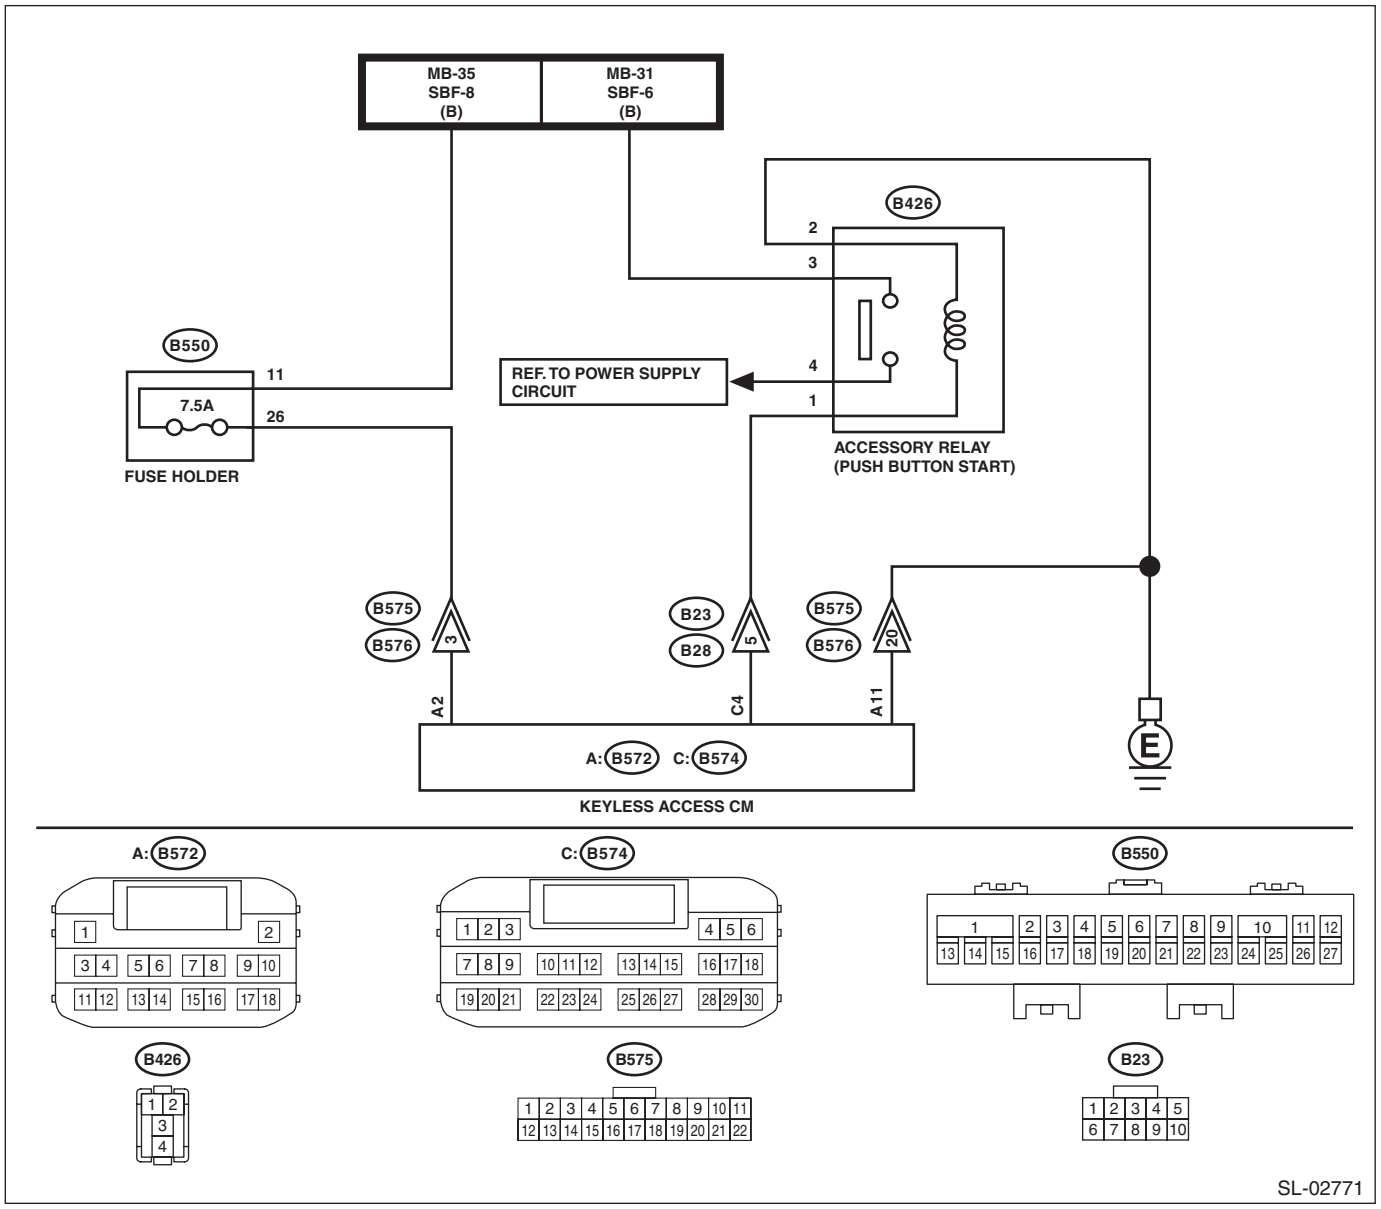
	Step	Check	Yes	No
13	**CHECK WIRING HARNESS (OPEN).** Using a tester, check continuity between the accessory relay (push button start) connector and chassis ground. ***Connector & terminal*** ***(B426) No. 2 — Chassis ground:***	Is there continuity?	Go to step **14**.	Repair or replace the open circuit of harness.
14	**CHECK KEYLESS ACCESS CM.** 1) Connect all the disconnected connectors. 2) Using a tester, measure the voltage between the keyless access CM connector and chassis ground when the ignition is turned from OFF to ON. ***Connector & terminal*** ***(B572) No. 9 (+) — Chassis ground (–):*** ***(B574) No. 4 (+) — Chassis ground (–):*** ***(B574) No. 6 (+) — Chassis ground (–):***	Did the voltage change from 1 V or less to +B-2 V or more?	Go to step **15**.	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>
15	**CHECK PUSH BUTTON IGNITION SWITCH.** 1) Disconnect the push button ignition switch connector. 2) Using a tester, check the continuity between the push button ignition switch connector terminals. ***Terminals*** ***No. 7 — No. 5:*** ***No. 2 — No. 5:***	When the button was pressed, did it change to continuity exists? (No continuity when button is released)	Go to step **16**.	Replace the push button ignition switch. <Ref. to SL-106, REMOVAL, Push Button Ignition Switch.>
16	**CHECK WIRING HARNESS (OPEN).** Using a tester, check the continuity between the push button ignition switch connector and chassis ground. ***Connector & terminal*** ***(i150) No. 4 — Chassis ground:*** ***(i150) No. 5 — Chassis ground:***	Is there continuity?	Go to step **17**.	Repair or replace the open circuit of harness.
17	**CHECK WIRING HARNESS (OPEN).** 1) Disconnect the keyless access CM connector. 2) Using a tester, check continuity between the keyless access CM connector and the push button ignition switch connector. ***Connector & terminal*** ***(i150) No. 7 — (B574) No. 28:*** ***(i150) No. 2 — (B574) No. 30:***	Is there continuity?	System is normal.	Repair or replace the open circuit of harness.

16.POWER WILL NOT TURN ON (ACCESSORY DOES NOT TURN ON, BUT IGNITION TURNS ON)



CAUTION:

- **When the keyless access CM is replaced with a new unit, and the battery ground terminal is connected, it will become ignition ON. Also, if the battery is disconnected, it will resume to a condition with the battery cut off.**
- **When the keyless access CM is replaced, registration of the immobilizer is required. For the relevant procedures, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.**



WIRING DIAGRAM:

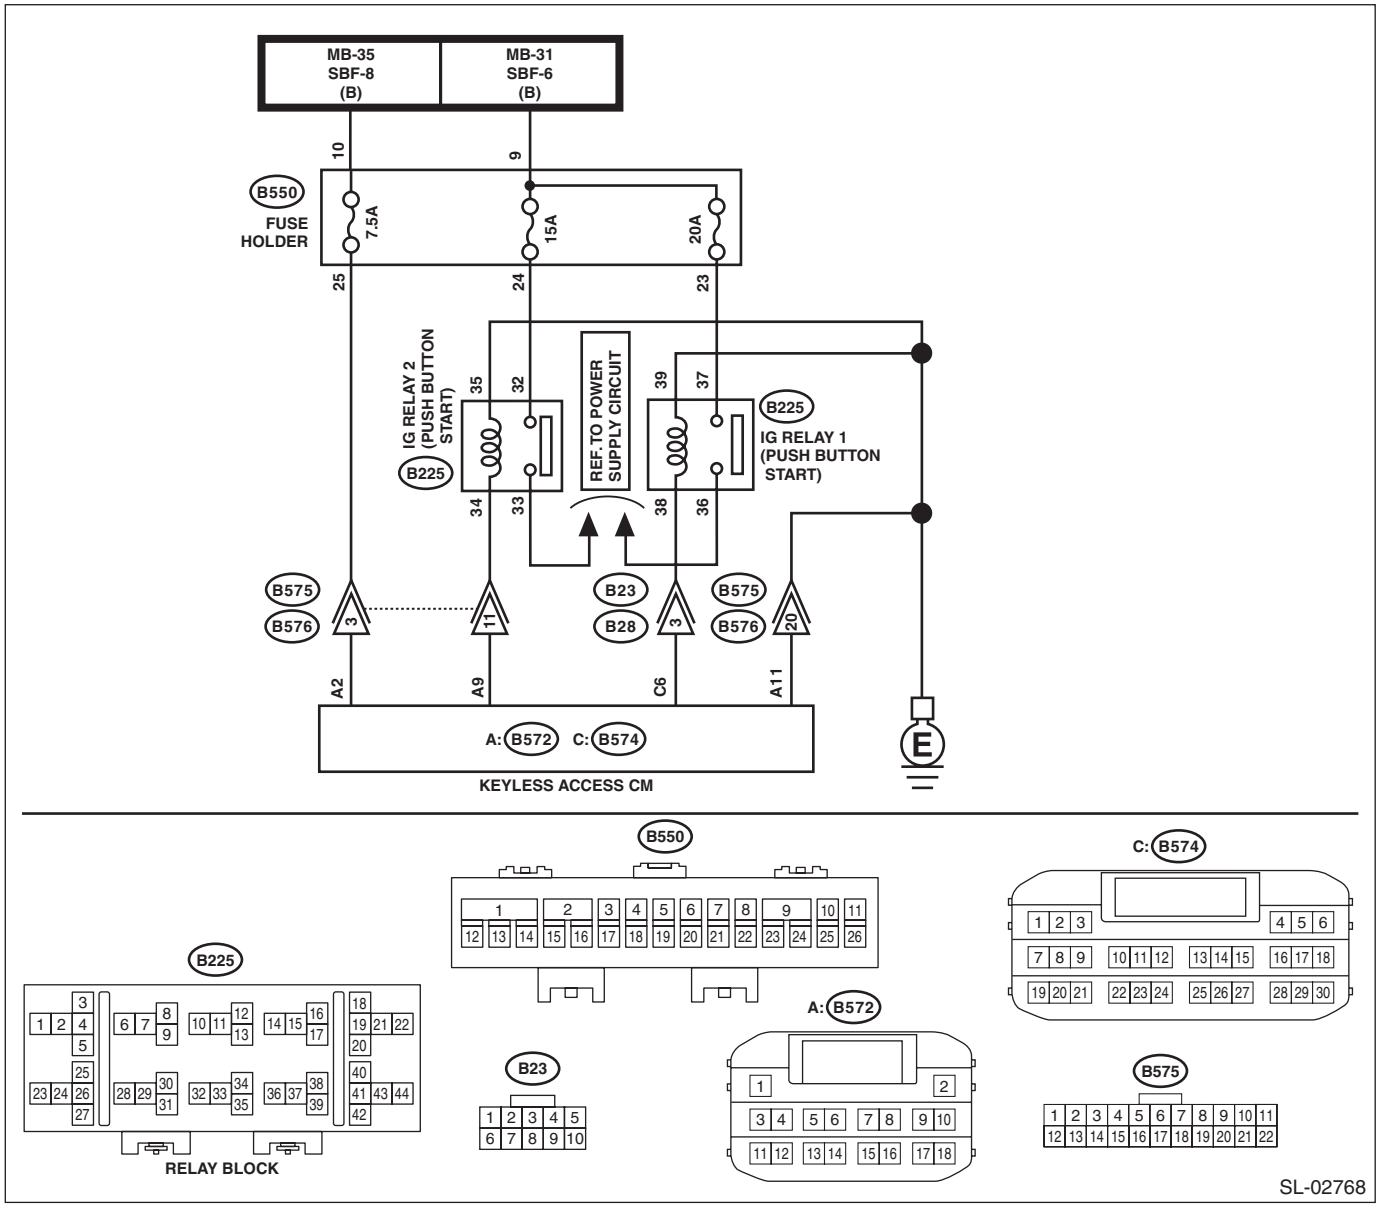
Push button start system <Ref. to WI-303, WIRING DIAGRAM, Push Button Start System.>

- Engine type: FA

- Engine type: EJ

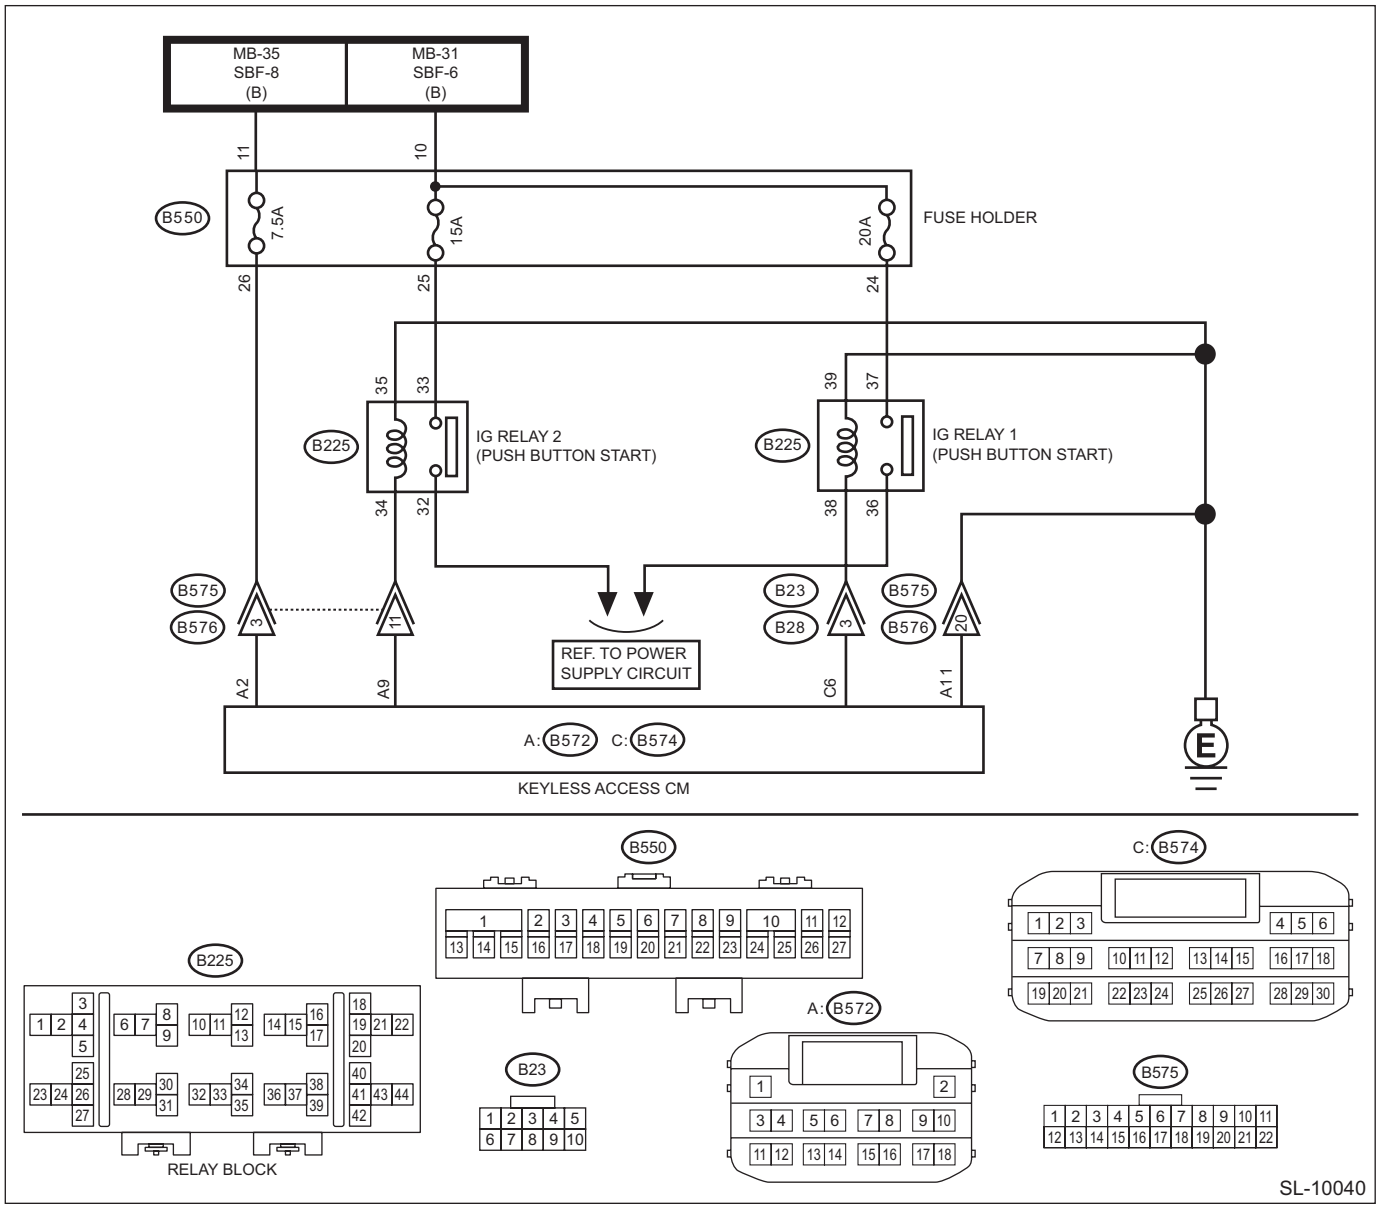
Step		Check	Yes	No
1	**CHECK FUSE.** Check the fuse. <Ref. to SL-8, Relay and Fuse.>	Is the check result OK?	Go to step **2**.	Replace the fuse.
2	**CHECK CONNECTOR.** Check the engagement of each connector and for any deformation or looseness.	Is the check result OK?	Go to step **3**.	Repair the connector, or replace harness.
3	**CHECK WIRING HARNESS.** 1) Disconnect the keyless access CM connector. 2) Using a tester, measure the voltage between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 2 (+) — Chassis ground (–):***	Is the voltage between 8 V and 16 V?	Go to step **4**.	Repair or replace the open circuit of harness.

Step		Check	Yes	No
4	**CHECK WIRING HARNESS (OPEN).** Using a tester, check continuity between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 11 — Chassis ground:***	Is there continuity?	Go to step **5**.	Repair or replace the open circuit of harness.
5	**CHECK ACCESSORY RELAY (PUSH BUTTON START).** Check the accessory relay (push button start). <Ref. to SL-115, INSPECTION, Accessory Relay (Push Button Start).>	Is the check result OK?	Go to step **6**.	Replace the relay.
6	**CHECK WIRING HARNESS (OPEN).** 1) Disconnect the keyless access CM connector and the accessory relay (push button start). 2) Using a tester, check continuity between the keyless access CM connector and the accessory relay (push button start) connector. ***Connector & terminal*** ***(B574) No. 4 — (B426) No. 1:***	Is there continuity?	Go to step **7**.	Repair or replace the open circuit of harness.
7	**CHECK WIRING HARNESS (OPEN).** Using a tester, check continuity between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B574) No. 4 — Chassis ground:***	Is there continuity?	Repair or replace the short circuit of the harness.	Go to step **8**.
8	**CHECK KEYLESS ACCESS CM.** 1) Connect the keyless access CM connector. 2) Using a tester, measure the voltage between the keyless access CM connector and chassis ground when the ignition is turned from OFF to ON. ***Connector & terminal*** ***(B574) No. 4 (+) — Chassis ground (–):***	Did the voltage change from 1 V or less → +B-2 V or more?	System is normal.	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>



17.POWER WILL NOT TURN ON (ACCESSORY TURNS ON, BUT IGNITION DOES NOT TURN ON)

CAUTION:
When the keyless access CM is replaced with a new unit, and the battery ground terminal is connected, it will become ignition ON. Also, if the battery is disconnected, it will resume to a condition with the battery cut off.



WIRING DIAGRAM:

Push button start system <Ref. to WI-303, WIRING DIAGRAM, Push Button Start System.>

- Engine type: FA

- Engine type: EJ

Step		Check	Yes	No
1	**CHECK FUSE.** Check the fuse. <Ref. to SL-8, Relay and Fuse.>	Is the check result OK?	Go to step **2**.	Replace the fuse.
2	**CHECK CONNECTOR.** Check the engagement of each connector and for any deformation or looseness.	Is the check result OK?	Go to step **3**.	Repair the connector, or replace harness.
3	**CHECK WIRING HARNESS.** 1) Disconnect the keyless access CM connector. 2) Using a tester, measure the voltage between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 2 (+) — Chassis ground (–):***	Is the voltage between 8 V and 16 V?	Go to step **4**.	Repair or replace the open circuit of harness.

	Step	Check	Yes	No
4	**CHECK WIRING HARNESS (OPEN).** Using a tester, check continuity between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 11 — Chassis ground:***	Is there continuity?	Go to step **5**.	Repair or replace the open circuit of harness.
5	**CHECK IG RELAY 1 AND 2 (PUSH BUTTON START).** Check IG relay 1 (push button start) and IG relay 2 (push button start). <Ref. to SL-111, INSPECTION, IG Relay1 (Push Button Start).>	Is the check result OK?	Go to step **6**.	Replace the relay.
6	**CHECK WIRING HARNESS (OPEN).** 1) Disconnect the keyless access CM connector and the IG relay 1 and 2 (push button start). 2) Using a tester, check continuity between the keyless access CM connector and the IG relay 1 (push button start) connector or IG relay 2 (push button start) connector. ***Connector & terminal*** ***(B572) No. 9 — (B225) No. 34:*** ***(B574) No. 6 — (B225) No. 38:***	Is there continuity?	Go to step **7**.	Repair or replace the open circuit of harness.
7	**CHECK WIRING HARNESS (GROUND SHORT CIRCUIT).** Using a tester, check continuity between the keyless access CM connector and chassis ground. ***Connector & terminal*** ***(B572) No. 9 — Chassis ground:*** ***(B574) No. 6 — Chassis ground:***	Is there continuity?	Repair or replace the short circuit of the harness.	Go to step **8**.
8	**CHECK KEYLESS ACCESS CM.** 1) Connect the keyless access CM connector. 2) Using a tester, measure the voltage between the keyless access CM connector and chassis ground when the ignition is turned from OFF to ON. ***Connector & terminal*** ***(B572) No. 9 (+) — Chassis ground (–):*** ***(B574) No. 6 (+) — Chassis ground (–):***	Did the voltage change from 1 V or less → +B-2 V or more?	System is normal.	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>

18.ENGINE DOES NOT START

CAUTION:
• When the keyless access CM is replaced with a new unit, and the battery ground terminal is connected, it will become ignition ON. Also, if the battery is disconnected, it will resume to a condition with the battery cut off.
• When the keyless access CM or ID code box is replaced, registration of the immobilizer is required. For the relevant procedures, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

	Step	Check	Yes	No
1	**INITIALIZE STEERING LOCK.** 1) Shift the shift lever to parking for CVT model, or to neutral for MT model. 2) Operate the driver's door switch ON/OFF with the ignition switch OFF. 3) Wait for 10 seconds. 4) Place the access key on the driver's seat. 5) With depressing the brake pedal (CVT model) or clutch pedal (MT model), push the push button ignition switch.	Can the engine start?	System is normal.	Go to step **2**.
2	**CHECK DTC.** Read DTCs of the keyless access system using the Subaru Select Monitor. <Ref. to KPS(diag)-26, Read Diagnostic Trouble Code (DTC).>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs. <Ref. to KPS(diag)-39, LIST, List of Diagnostic Trouble Code (DTC).>	Go to step **3**.
3	**CHECK POWER SUPPLY SWITCHING.** 1) Place the access key on the driver's seat. 2) Without depressing the brake pedal (CVT model) or clutch pedal (MT model), push the push button ignition switch.	When the switch is operated, does the <IG-OFF> → <ACC-ON> → <IG-ON> → <IG-OFF> change occur?	Go to step **4**.	Perform the diagnostics according to the symptom for power supply switching system in General Diagnostic Table. <Ref. to KPS(diag)-113, POWER SUPPLY SWITCHING SYSTEM, INSPECTION, General Diagnostic Table.>
4	**CHECK CURRENT DATA.** 1) Place the access key on the driver's seat. 2) With depressing the brake pedal (CVT model) or clutch pedal (MT model), push the push button ignition switch. 3) Using the Subaru Select Monitor, confirm the current data «STSW signal monitor» of «Keyless Access with Push Button Start», when pressing the push button ignition switch. <Ref. to KPS(diag)-27, Read Current Data.> NOTE: If it is difficult to confirm, press the push button ignition switch for approximately five seconds longer.	Does the data change from OFF → ON?	Go to step **10**.	CVT model: Go to step **5**. MT model: Go to step **7**.
5	**CHECK CURRENT DATA.** Check the current data «Shift P Signal» of «Keyless Access with Push Button Start» using Subaru Select Monitor. <Ref. to KPS(diag)-27, Read Current Data.>	Is ON displayed in parking position, and OFF displayed in other positions?	Go to step **6**.	Go to step **11**.

	Step	Check	Yes	No
6	**CHECK CURRENT DATA.** Display the current data «Stop Light Switch» of «Keyless Access with Push Button Start» using Subaru Select Monitor. <Ref. to KPS(diag)-27, Read Current Data.>	Is ON displayed when brake pedal depressed, and OFF displayed when brake pedal not depressed?	Go to step **7**.	Go to step **13**.
7	**CHECK CURRENT DATA.** Display the current data «Neutral SW/Clutch SW» of «Keyless Access with Push Button Start» using Subaru Select Monitor. <Ref. to KPS(diag)-27, Read Current Data.>	For CVT model, is ON displayed in parking and neutral position and OFF displayed in other positions? For MT model, is ON displayed when clutch pedal is depressed and OFF displayed when the pedal not depressed?	Go to step **8**.	CVT model: Go to step **15**. MT model: Go to step **16**.
8	**CHECK STEERING LOCK.** Operate the push button ignition switch to perform the power supply switching and check steering lock condition during ACC-ON condition.	Is the steering lock in unlocked condition?	Go to step **9**.	Perform the diagnostics according to the symptom for steering lock system in General Diagnostic Table. <Ref. to KPS(diag)-113, STEERING LOCK SYSTEM, INSPECTION, General Diagnostic Table.>
9	**CHECK KEYLESS ACCESS CM.** 1) Turn the ignition switch to OFF. 2) Disconnect the ECM connector. 3) Using a tester, measure the voltage between the ECM connector and chassis ground in the following procedures. 1. Press the push button ignition switch with the brake pedal depressed (MT model: clutch pedal depressed). (Measure within 10 seconds.) 2. Release the push button ignition switch from the condition of step 1. above. ***Connector & terminal*** ***(B572) No. 13 (+) — Chassis ground (–):***	Does the value change from 1 V or less to +B-2 V or more in the step 1, and return to 1 V or less in the step 2?	Perform the diagnosis for engine system. <Ref. to EN(w/o STI)(diag)-87, Diagnostics for Engine Starting Failure.> <Ref. to EN(STI)(diag)-77, PROCEDURE, Diagnostics for Engine Starting Failure.>	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>
10	**CHECK CURRENT DATA.** 1) Connect the disconnected connectors. 2) Display the current data «Engine start permission request reception status» of «Keyless Access with Push Button Start» using Subaru Select Monitor. <Ref. to KPS(diag)-27, Read Current Data.>	Is “Reception” displayed with ignition switch ON, and “Not yet received” displayed in other positions?	Perform the diagnosis for engine system. <Ref. to EN(w/o STI)(diag)-87, Diagnostics for Engine Starting Failure.> <Ref. to EN(STI)(diag)-77, PROCEDURE, Diagnostics for Engine Starting Failure.>	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>
11	**CHECK “P” RANGE SWITCH.** 1) Turn the ignition switch to OFF. 2) Disconnect the AT shift lever connector. 3) Using a tester, check the continuity of “P” range switch. ***Terminals*** ***No. 1 — 2:***	Does it change from Continuity ←→ No continuity according to shift lever operation?	Go to step **12**.	Replace the “P” range switch. <Ref. to CS-51, REMOVAL, AT Shift Lock Solenoid and “P” Range Switch.>

	Step	Check	Yes	No
12	**CHECK HARNESS.** 1) Turn the ignition switch to OFF. 2) Disconnect the keyless access CM connector. 3) Using a tester, check continuity between the keyless access CM connector and the AT select lever connector, and between the AT select lever connector and chassis ground. ***Connector & terminal*** ***(B116) No. 1 — (B574) No. 25:*** ***(B116) No. 2 — Chassis ground:***	Is there continuity?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Repair or replace the harness.
13	**CHECK STOP LIGHT SWITCH.** 1) Turn the ignition switch to OFF. 2) Disconnect the stop light switch connector. 3) Using a tester, check continuity of the stop light switch connector. ***Terminals*** ***No. 1 — No. 2:***	Does it change from Continuity ←→ No continuity according to brake pedal operation?	Go to step **14**.	Replace the stop light switch. <Ref. to BR-100, REMOVAL, Stop Light Switch.>
14	**CHECK HARNESS.** 1) Turn the ignition switch to OFF. 2) Using a tester, check continuity between the keyless access CM connector and the stop light switch connector, and between the stop light switch connector and fuse. ***Connector & terminal*** ***(B572) No. 18 — (B65) No. 2:*** ***(B65) No. 1 — F/B fuse No. 8:***	Is there continuity?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Repair or replace the harness.
15	**CHECK INHIBITOR SWITCH.** Check the inhibitor switch. <Ref. to CVT(TR690)-93, INSPECTION, Inhibitor Switch.>	Is the check result OK?	Go to step **17**.	Replace the inhibitor switch. <Ref. to CVT(TR690)-96, REMOVAL, Inhibitor Switch.>
16	**CHECK CLUTCH SWITCH.** Check the clutch switch. <Ref. to CL-36, INSPECTION, Clutch Switch.>	Is the check result OK?	Go to step **18**.	Replace the clutch switch. <Ref. to CL-35, REMOVAL, Clutch Switch.>
17	**CHECK HARNESS.** 1) Turn the ignition switch to OFF. 2) Disconnect the inhibitor switch connector. 3) Using a tester, check continuity between the keyless access CM connector and inhibitor switch connector. ***Connector & terminal*** ***(B572) No. 5 — (B12) No. 12:*** ***(B12) No. 11 — Starter motor:***	Is there continuity?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Repair or replace the harness.
18	**CHECK HARNESS.** 1) Turn the ignition switch to OFF. 2) Disconnect the clutch switch connector. 3) Using a tester, check continuity between the keyless access CM connector and clutch switch connector. ***Connector & terminal*** ***(B572) No. 10 — (B106) No. 2:*** ***(B106) No. 1 — F/B fuse No. 21:***	Is there continuity?	Replace the keyless access CM. <Ref. to SL-100, Keyless Access CM.>	Repair or replace the harness.

12.	Function Check	30
13.	List of Diagnostic Trouble Code (DTC)	31
14.	Diagnostic Procedure with Diagnostic Trouble Code (DTC)	33
15.	General Diagnostic Table	54

1. Basic Diagnostic Procedure

A: PROCEDURE

CAUTION:
• Subaru Select Monitor is required for reading DTC, performing diagnosis and reading current data.
• Remove foreign matter (dust, water, oil, etc.) from the body integrated unit connector during removal and installation.
• Registration of immobilizer may be needed after the replacement of control modules, etc. For detailed procedure, refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.

NOTE:
• To check harness for open or short circuits, shake the suspected trouble spot or connector.
• Check List for Interview <Ref. to BC(diag)-3, Check List for Interview.>

Step		Check	Yes	No
1	**CHECK PRE-INSPECTION.** Ask the customer when and how the trouble occurred using the interview check list. <Ref. to BC(diag)-3, Check List for Interview.>	Did you interview the customer?	Go to step **2**.	Interview the customer.
2	**BASIC INSPECTION.** Check components which might affect body control. <Ref. to BC(diag)-4, INSPECTION, General Description.>	Is the check result of the component that might influence the body control problem OK?	Go to step **3**.	Repair or replace each component.
3	**CHECK DTC.** 1) Read the DTC. <Ref. to BC(diag)-11, OPERATION, Read Diagnostic Trouble Code (DTC).> NOTE: If the communication function of the Subaru Select Monitor cannot be executed properly, check the communication circuit. <Ref. to LAN(diag)-12, COMMUNICATION FOR INITIALIZING IMPOSSIBLE, Subaru Select Monitor.> 2) Record all DTCs, time stamp and freeze frame data. NOTE: For time stamp, refer to "LAN SYSTEM". <Ref. to LAN(diag)-6, TIME STAMP, CAUTION, General Description.>	Is DTC displayed on Subaru Select Monitor?	Perform the diagnosis for the displayed DTCs. <Ref. to BC(diag)-31, List of Diagnostic Trouble Code (DTC).> Go to step **5**.	Go to step **4**.
4	**PERFORM GENERAL DIAGNOSTICS.** Inspect using the "General Diagnostic Table". <Ref. to BC(diag)-54, General Diagnostic Table.>	Is the check result OK?	The body control system is normal.	Go to step **5**.
5	**PERFORM DIAGNOSIS.** 1) Perform the Clear Memory Mode. <Ref. to BC(diag)-12, OPERATION, Clear Memory Mode.> 2) Perform the Inspection Mode. <Ref. to BC(diag)-13, Inspection Mode.>	Is DTC displayed on Subaru Select Monitor?	Perform the diagnosis for the displayed DTCs. <Ref. to BC(diag)-31, List of Diagnostic Trouble Code (DTC).>	Finish the diagnosis.

2. Check List for Interview

A: CHECK

Inspect the following items regarding the vehicle's state.

Body Control System Check List for Interview		Date of Vehicle Bring-in Year Month Day	
Customer's name		Registration No.	Initial year of registration Year Month Date
		Vehicle model	Frame number
Interviewer	Inspector	Engine type	Odometer reading
Customer specified content			
Date and time when the trouble occurred		Frequency of trouble occurrence	
Condition of trouble occurrence		Weather	
Road conditions		Occurrence location	
Accessory installation condition			
Trouble condition			
❑ Diagnostic code		❑ ( )	

3. General Description

A: CAUTION

1. SRS AIRBAG SYSTEM

Airbag system wiring harness is routed near the body integrated unit and body control circuits.

CAUTION:
- **Do not use the electrical test equipment on all airbag system wiring harnesses and connectors.**
- **Be careful not to damage the airbag system wiring harness, when servicing the body control system.**

B: INSPECTION

Before performing diagnosis, check the following items which might affect body control system problems.
1) Check the battery. <Ref. to SC(w/o STI)-51, INSPECTION, Battery.> <Ref. to SC(STI)-24, INSPECTION, Battery.>
2) Check the fuse condition.
Make sure that ampere of the fuse is setting value, and it is not blown out.
3) Check the connecting condition of harness and harness connector.
4) Confirm settings of body integrated unit are corresponded to vehicle equipment. <Ref. to BC(diag)-26, OPERATION, Registration Body Integrated Unit.>
5) Make sure that the User Customizing of the body integrated unit matches the vehicle equipment. <Ref. to BC(diag)-24, OPERATION, User Customizing.>
6) Confirm “Factory initial setting” of body integrated unit registrations is “Market”.

C: PREPARATION TOOL

1. SPECIAL TOOL

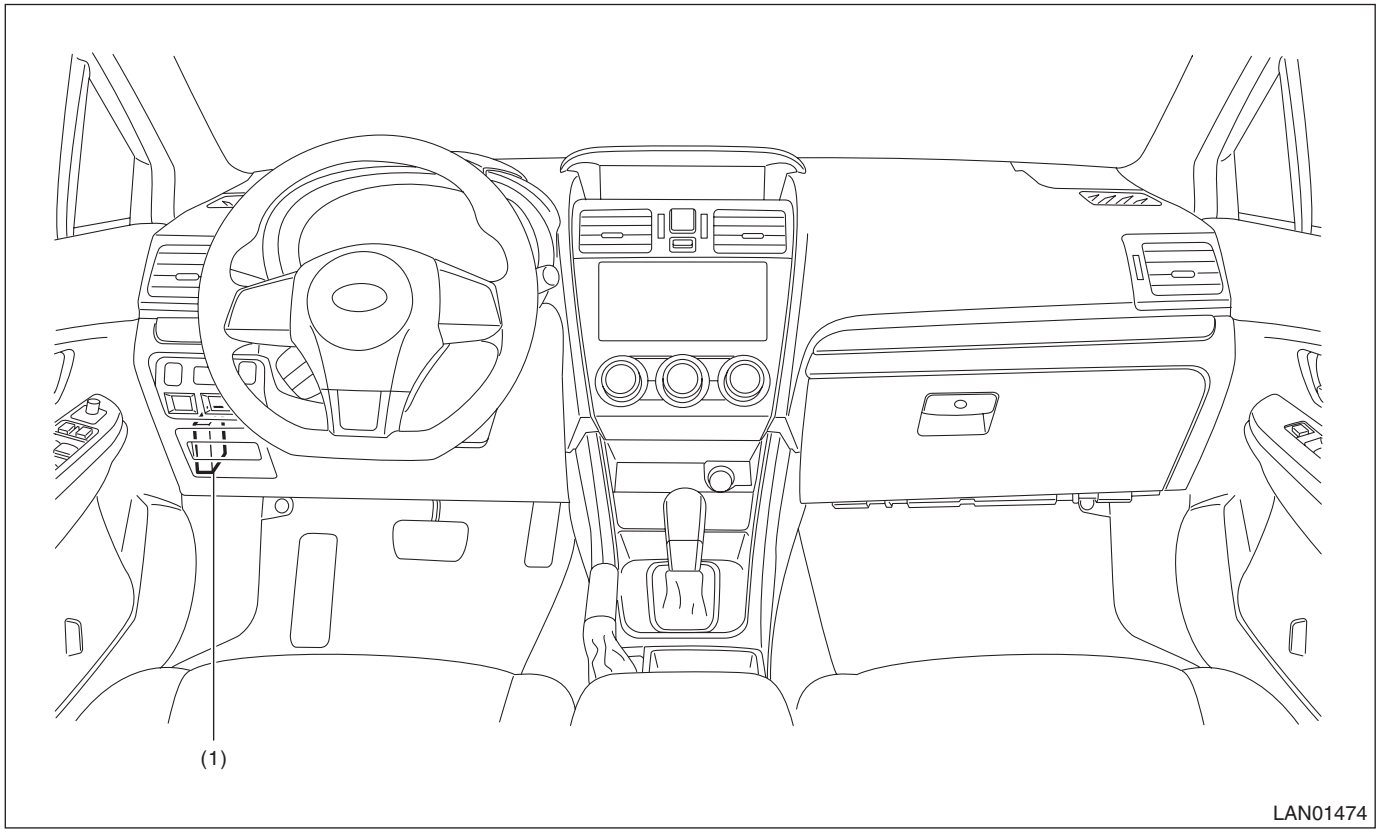

ILLUSTRATION	TOOL NUMBER	DESCRIPTION	REMARKS
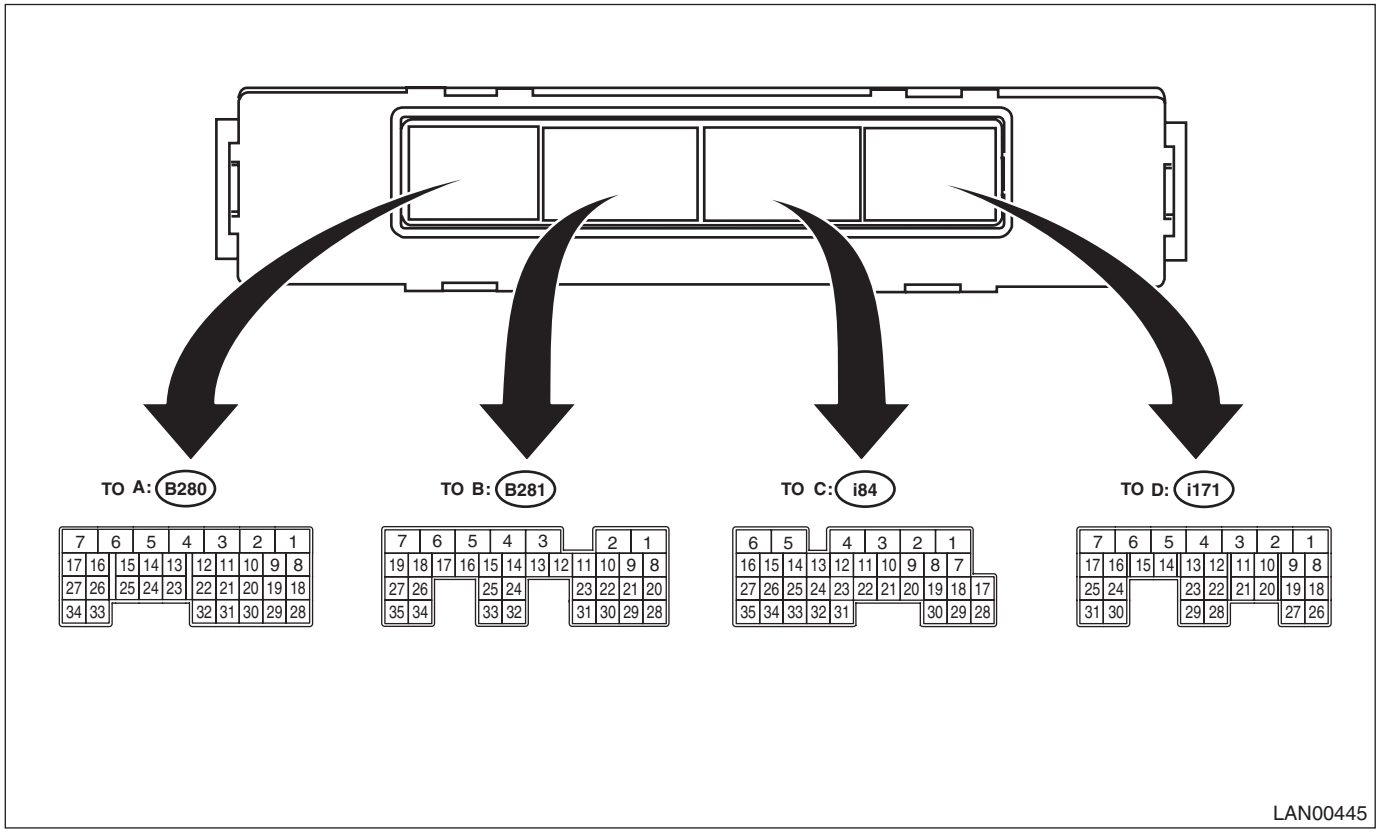
 STSSM4	—	SUBARU SELECT MONITOR 4	Used for setting of each function and trouble-shooting for electrical system. NOTE: For detailed operation procedures of Subaru Select Monitor 4, refer to “Application help”.

2. GENERAL TOOL

TOOL NAME	REMARKS
Circuit tester	Used for measuring resistance, voltage and current.
DST-i	Used together with Subaru Select Monitor 4.

4. Electrical Component Location



A: LOCATION

(1) Body integrated unit

5. Control Module I/O Signal

A: ELECTRICAL SPECIFICATION

Terminal No.	Content	Measuring condition	Standard
(B280) No. 1 ←→ Chassis ground	GND	Always	Less than 1.5 V
(B280) No. 2 ←→ Chassis ground	Front wiper return	When front wiper is reversed	Less than 1 V → 9 V or more
(B280) No. 3 ←→ Chassis ground	Lighting relay power supply (redundant circuit)	ACC or key-in switch ON	10 — 13 V
(B280) No. 4 ←→ Chassis ground	ACC input	ACC ON (model with the keyless access with push button start system)	Less than 1.5 V → 10 — 13 V
(B280) No. 4 ←→ Chassis ground	Key-in switch	When key is inserted (model without the keyless access with push button start system)	Less than 1.5 V → 10 — 13 V
(B280) No. 5	—	—	—
(B280) No. 6	—	—	—
(B280) No. 7	—	—	—
(B280) No. 8	—	—	—
(B280) No. 9	—	—	—
(B280) No. 10 ←→ Chassis ground	Stop light SW	Stop light switch OFF → ON	Less than 1.5 V → 8 V or more
(B280) No. 11 ←→ Chassis ground	Impact sensor	Apply an impact	8 V or more
(B280) No. 12	—	—	—
(B280) No. 13	—	—	—
(B280) No. 14	—	—	—

Terminal No.	Content	Measuring condition	Standard
(B280) No. 15 ←→ Chassis ground	Front fog light output	Front fog light switch at ON position	9 V or more → less than 1.0 V
(B280) No. 16 ←→ Chassis ground	Lighting relay I output	Lighting I switch at ON position	9 V or more → less than 1.0 V
(B280) No. 17 ←→ Chassis ground	Lighting Hi relay output	Dimmer switch at Hi position	9 V or more → less than 1.0 V
(B280) No. 18	—	—	—
(B280) No. 19 ←→ Chassis ground	Illumination sensor signal	Ignition switch OFF → ON	0.2 — 4.5 V
(B280) No. 20 ←→ Chassis ground	Answer-back buzzer output	When answer-back operates	Less than 1.0 V → 9 V or more
(B280) No. 21	Security UART	(Models without the keyless access with push button start system)	Serial communication
(B280) No. 22	—	—	—
(B280) No. 23	—	—	—
(B280) No. 24 ←→ Chassis ground	Security horn output	When security is operating	8 V or more → less than 1.0 V
(B280) No. 25 ←→ Chassis ground	Key ring illumination	Illumination ON (models without the keyless access with push button start system)	Pulse output
(B280) No. 26 ←→ Chassis ground	Rear defogger relay output	Rear defogger switch ON	9 V or more → less than 1.0 V
(B280) No. 27 ←→ Chassis ground	Lighting Lo relay output (redundant circuit)	Lighting II switch at ON position	9 V or more → less than 1.0 V
(B280) No. 28	—	—	—
(B280) No. 29	Illumination sensor GND	—	—
(B280) No. 30	—	—	—
(B280) No. 31 ←→ Chassis ground	ECM immobilizer communication	Communicating with ECM (model without keyless access with push button start system)	Serial communication
(B280) No. 32 ←→ Chassis ground	ACC power supply	ACC ON	Less than 1.5 V → 10 — 13 V
(B280) No. 33	—	—	—
(B280) No. 34 ←→ Chassis ground	Lighting II switch (redundant circuit)	Switch at II position	8 V or more → less than 1.5 V
(B281) No. 1 ←→ (B280) No. 29	Illumination sensor power supply	Ignition switch OFF → ON	Less than 1.5 V → 4.5 V or more
(B281) No. 2 ←→ (B281) No. 30	Immobilizer antenna amplifier power supply	Communicating with ignition key (model without keyless access with push button start system)	4.5 V — 5.5 V
(B281) No. 3 ←→ Chassis ground	Ignition power supply	Ignition switch ON	Less than 1.5 V → 10 — 13 V
(B281) No. 4 ←→ Chassis ground	Key lock solenoid output	LOCK status is ON (CVT model without the keyless access with push button start system)*2	Less than 1.0 V → 9 V or more
(B281) No. 5 ←→ Chassis ground	Shift lock solenoid output	When shift lock is operating (CVT models)	Less than 1.0 V → 9 V or more
(B281) No. 6 ←→ Chassis ground	Battery power supply (shift lock/key lock)	Always (CVT model)	10 — 13 V
(B281) No. 7 ←→ Chassis ground	Battery power supply (back-up)	Always	10 — 13 V
(B281) No. 8	Illumination output	Illumination ON	Pulse output

Terminal No.	Content	Measuring condition	Standard
(B281) No. 9 ←→ Chassis ground	Turn signal RH input/output	When turn signal switch (RH) is operating	9 V or more → less than 1.5 V
(B281) No. 10 ←→ Chassis ground	Immobilizer antenna (A)	Communicating with ignition key (model without keyless access with push button start system)	Serial communication
(B281) No. 11	—	—	—
(B281) No. 12 ←→ Chassis ground	MT reverse switch	Reverse switch ON (MT model)	Less than 1.5 V → 8 V or more
(B281) No. 13	—	—	—
(B281) No. 14	—	—	—
(B281) No. 15 ←→ Chassis ground	Dimmer Hi beam switch	Switch at Hi beam position	8 V or more → less than 1.5 V
(B281) No. 16 ←→ Chassis ground	Lighting AUTO switch	Switch at AUTO position	8 V or more → less than 1.5 V
(B281) No. 17 ←→ Chassis ground	Lighting I switch	Switch at I position	8 V or more → less than 1.5 V
(B281) No. 18 ←→ Chassis ground	P range switch	Shift lever shifted from P range to other than P range	8 V or more → less than 1.5 V
(B281) No. 19 ←→ Chassis ground	Lighting relay power supply (control)	ACC or key-in switch ON	10 — 13 V
(B281) No. 20	Driving system CAN communication circuit 1 (Hi)	Except for sleep status*1	Serial communication
(B281) No. 21 ←→ Chassis ground	Turn signal LH input/output	When turn signal switch (LH) is operating	9 V or more → less than 1.5 V
(B281) No. 22	Immobilizer antenna (B)	Communicating with ignition key (model without keyless access with push button start system)	Serial communication
(B281) No. 23	—	—	—
(B281) No. 24	—	—	—
(B281) No. 25 ←→ Chassis ground	Dimmer passing switch	Switch at passing position	8 V or more → less than 1.5 V
(B281) No. 26 ←→ Chassis ground	Front fog light switch	Front fog light switch ON	8 V or more → less than 1.5 V
(B281) No. 27	—	—	—
(B281) No. 28	Driving system CAN communication circuit 1 (Lo)	Except for sleep status*1	Serial communication
(B281) No. 29	Accessory connector	—	—
(B281) No. 30 ←→ Chassis ground	Immobilizer antenna amplifier GND	Always (models without the keyless access with push button start system)	Less than 1.5 V
(B281) No. 31 ←→ Chassis ground	GND	Always	Less than 1.5 V
(B281) No. 32	—	—	—
(B281) No. 33	—	—	—
(B281) No. 34 ←→ Chassis ground	Lighting II switch (control)	Switch at II position	8 V or more → less than 1.5 V
(B281) No. 35 ←→ Chassis ground	Lighting Lo relay output (control)	Lighting II switch at ON position	9 V or more → less than 1.0 V
(i84) No. 1 ←→ Chassis ground	GND	Always	Less than 1.5 V
(i84) No. 2	—	—	—
(i84) No. 3 ←→ Chassis ground	Luggage/trunk light output	Luggage/trunk in open state	Pulse output

Terminal No.	Content	Measuring condition	Standard
(i84) No. 4 ←→ Chassis ground	Room light output	Room light ON (doors interlocked)	Pulse output
(i84) No. 5	—	—	—
(i84) No. 6 ←→ Chassis ground	Battery power supply (control)	Always	10 — 13 V
(i84) No. 7	—	—	—
(i84) No. 8	—	—	—
(i84) No. 9 ←→ Chassis ground	Manual switch (LOCK)	Driver's door lock switch ON	8 V or more → less than 1.5 V
(i84) No. 10 ←→ Chassis ground	Opener switch (trunk/rear gate)	Rear gate/trunk opener switch ON	8 V or more → less than 1.5 V
(i84) No. 11	—	—	—
(i84) No. 12 ←→ Chassis ground	Door lock status switch (driver's)	Door in UNLOCK state (models with the keyless access with push button start system)	8 V or more → less than 1.5 V
(i84) No. 13 ←→ Chassis ground	Door switch (passenger's seat)	With passenger's door closed → opened	8 V or more → less than 1.5 V
(i84) No. 14 ←→ Chassis ground	Door switch (driver's seat)	With driver's door closed → opened	8 V or more → less than 1.5 V
(i84) No. 15	—	—	—
(i84) No. 16 ←→ Chassis ground	Illumination output 2	Illumination ON	Pulse output
(i84) No. 17	—	—	—
(i84) No. 18	—	—	—
(i84) No. 19	—	—	—
(i84) No. 20 ←→ Chassis ground	Manual switch (UNLOCK)	Door unlock switch ON	8 V or more → less than 1.5 V
(i84) No. 21 ←→ Chassis ground	Bright switch	When bright (dimmer cancel) function is ON	8 V or more → less than 1.5 V
(i84) No. 22	—	—	—
(i84) No. 23 ←→ Chassis ground	Door lock status switch (passenger's)	Door in UNLOCK state (models with the keyless access with push button start system)	8 V or more → less than 1.5 V
(i84) No. 24 ←→ Chassis ground	Door switch (rear seat LH)	Rear left door closed → open	8 V or more → less than 1.5 V
(i84) No. 25 ←→ Chassis ground	Door switch (rear seat RH)	Rear right door closed → open	8 V or more → less than 1.5 V
(i84) No. 26	—	—	—
(i84) No. 27	Driving system CAN communication circuit 2 (Hi)	Except for sleep status*1	Serial communication
(i84) No. 28	—	—	—
(i84) No. 29	—	—	—
(i84) No. 30	—	—	—
(i84) No. 31	—	—	—
(i84) No. 32 ←→ Chassis ground	Parking brake switch	When parking brake is OFF	Less than 1.5 V → 8 V or more
(i84) No. 33 ←→ Chassis ground	Rear gate/trunk switch	Rear gate/trunk closed → open	8 V or more → less than 1.5 V
(i84) No. 34	—	—	—
(i84) No. 35	Driving system CAN communication circuit 2 (Lo)	Except for sleep status*1	Serial communication
(i171) No. 1 ←→ Chassis ground	Battery power supply (door lock)	Always	10 — 13 V

Terminal No.	Content	Measuring condition	Standard
(i171) No. 2 ←→ Chassis ground	Door lock (all seats LOCK)	When LOCK signal is output	Less than 1.0 V → 9 V or more
(i171) No. 3 ←→ Chassis ground	Door lock (all seats UNLOCK)	When UNLOCK signal is output	Less than 1.0 V → 9 V or more
(i171) No. 4 ←→ Chassis ground	Door lock (driver's seat UNLOCK)	When driver's side door lock is output	Less than 0.5 V → 8 V or more
(i171) No. 5	—	—	—
(i171) No. 6	—	—	—
(i171) No. 7 ←→ Chassis ground	Door lock (rear gate/trunk UNLOCK)	When UNLOCK signal is output	Less than 1.0 V → 9 V or more
(i171) No. 8 ←→ Chassis ground	Map light output	Map light ON (keyless answer-back, etc.)	Pulse output
(i171) No. 9 ←→ Chassis ground	Wiper deicer relay output	Wiper deicer switch ON	9 V or more → less than 1.0 V
(i171) No. 10 ←→ Chassis ground	DRL cancel output	Headlight switch ON or Hi beam ON, passing switch ON	9 V or more → less than 1.0 V
(i171) No. 11 ←→ Chassis ground	Keyless entry / TPMS communication circuit	When door lock/unlock is operated with the keyless transmitter, or when TPMS is operated	Serial communication
(i171) No. 12 ←→ Chassis ground	Illumination switch (Vi1)	While clearance light illuminates	Approx. 5 V
(i171) No. 13	—	—	—
(i171) No. 14 ←→ Chassis ground	SRF OFF SW input	When SRF OFF SW is pressed	8 V or more → less than 1.5 V
(i171) No. 15	—	—	—
(i171) No. 16	—	—	—
(i171) No. 17	—	—	—
(i171) No. 18 ←→ Chassis ground	Turn/hazard output	When answer-back is output	9 V or more → less than 1.0 V
(i171) No. 19	—	—	—
(i171) No. 20 ←→ Chassis ground	SRF relay output (R)	When SRF RH FOG is operating	9 V or more → less than 1.0 V
(i171) No. 21 ←→ Chassis ground	SRF relay output (L)	When SRF LH FOG is operating	9 V or more → less than 1.0 V
(i171) No. 22 ←→ Chassis ground	Illumination switch (Vi2)	While clearance light illuminates	0.5 — 4.8 V
(i171) No. 23	—	—	—
(i171) No. 24	—	—	—
(i171) No. 25	—	—	—
(i171) No. 26 ←→ Chassis ground	Security light	When security light is illuminating	9 V or more → less than 1.0 V
(i171) No. 27	—	—	—
(i171) No. 28 ←→ Chassis ground	Illumination switch (Vi3)	Always	Less than 1.5 V
(i171) No. 29 ←→ Chassis ground	GND	Always	Less than 1.5 V
(i171) No. 30	—	—	—
(i171) No. 31	—	—	—

*1: For CAN sleep state, hold on for approx. one minute with ignition OFF and the doors, trunk, and rear gate all closed.
*2: Use an oscilloscope for measurement due to short output time.

6. Read Diagnostic Trouble Code (DTC)

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Body Control» and then select «Enter».
5) On «Select Function» display, select «DTC».

NOTE:
- For detailed operation procedures, refer to “Application help”.
- For details concerning DTC, refer to List of Diagnostic Trouble Code (DTC). <Ref. to BC(diag)-31, List of Diagnostic Trouble Code (DTC).>

7. Clear Memory Mode

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Body Control» and then select «Enter».
5) On «Select Function» display, select «DTC».
6) On «DTC» display, select «Clear Memory».

NOTE:
For detailed operation procedures, refer to “Application help”.

8. Inspection Mode

A: PROCEDURE

It is possible to diagnose the DTC by performing the indicated inspection mode. After correcting the DTC, perform a necessary inspection mode and make sure that the function is resumed correctly and the DTC is recorded.

1. INSPECTION MODE 1

DTC	Item	Note
B1010	BODY CONTROL SYSTEM (BIU) MALFUNCTION	—
B1011	BATTERY CONTROL POWER SUPPLY	—

Diagnostic procedure:
1) Perform the Clear Memory Mode. <Ref. to BC(diag)-12, Clear Memory Mode.>
2) Read the DTC and check that the DTC is not displayed. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs. After solving the DTC, repeat from step 1).
3) Disconnect and reconnect the battery, and then wait for one minute or more.
4) Read the DTC and check that the DTC is not displayed. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs.

2. INSPECTION MODE 2

DTC	Item	Note
B1012	BATTERY BACKUP POWER SUPPLY	—

Diagnostic procedure:
1) Perform the Clear Memory Mode. <Ref. to BC(diag)-12, Clear Memory Mode.>
2) Read the DTC and check that the DTC is not displayed. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs. After solving the DTC, repeat from step 1).
3) Disconnect and reconnect the back-up fuse, and then wait for one minute or more.
4) Read the DTC and check that the DTC is not displayed. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs.

3. INSPECTION MODE 3

DTC	Item	Note
B1013	IGNITION POWER	—

Diagnostic procedure:
1) Perform the Clear Memory Mode. <Ref. to BC(diag)-12, Clear Memory Mode.>
2) Read the DTC and check that the DTC is not displayed. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs. After solving the DTC, repeat from step 1).
3) After the ignition switch is ON, wait for one minute or more.
4) Read the DTC and check that the DTC is not displayed. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs.

4. INSPECTION MODE 4

DTC	Item	Note
B1014	ACC POWER	—

Diagnostic procedure:
1) Perform the Clear Memory Mode. <Ref. to BC(diag)-12, Clear Memory Mode.>
2) Read the DTC and check that the DTC is not displayed. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs. After solving the DTC, repeat from step 1).
3) After ACC is ON, wait for one minute or more.
4) Read the DTC and check that the DTC is not displayed. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs.

5. INSPECTION MODE 5

DTC	Item	Note
B1015	KEY INTERLOCK CIRCUIT	—

Diagnostic procedure:
1) Perform the Clear Memory Mode. <Ref. to BC(diag)-12, Clear Memory Mode.>
2) Read the DTC and check that the DTC is not displayed. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs. After solving the DTC, repeat from step 1).
3) After the ignition switch is ON, press the shift knob switch and wait for 10 seconds or more.
4) Read the DTC and check that the DTC is not displayed. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs.

6. INSPECTION MODE 6

DTC	Item	Note
B1016	SHIFT LOCK CIRCUIT	—

Diagnostic procedure:
1) Perform the Clear Memory Mode. <Ref. to BC(diag)-12, Clear Memory Mode.>
2) Read the DTC and check that the DTC is not displayed. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs. After solving the DTC, repeat from step 1).
3) After the ignition switch is ON, wait for 10 seconds or more without depressing the brake pedal. Or, after the ignition switch is ON, press the shift knob switch with the brake pedal depressed and wait for 10 seconds or more.
4) Read the DTC and check that the DTC is not displayed. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs.

7. INSPECTION MODE 7

DTC	Item	Note
B1401	METER COLLATION	—
B1402	IMMOBILIZER KEY COLLATION	—
B1407	MET COMMUNICATION	—
B1408	METER NON-VOLATILE MEMORY	—
B1410	TRANSPONDER COMMUNICATION	—
B1411	IMMOBILIZER ANTENNA	—
U1201	CAN-HS COUNTER ABNORMAL	—
U0073	CONTROL MODULE COMMUNICATION BUS OFF	—
U0100	LOST COMMUNICATION WITH ECM/PCM “A”	—
U0122	LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE	—
U0155	LOST COMMUNICATION WITH INSTRUMENT PANEL CLUSTER (IPC) CONTROL MODULE	—
U0327	SOFTWARE INCOMPATIBILITY WITH VEHICLE SECURITY CONTROL MODULE	—
U0401	INVALID DATA RECEIVED FROM ECM/PCM “A”	—
U0416	INVALID DATA RECEIVED FROM VEHICLE DYNAMICS CONTROL MODULE	—
U0423	INVALID DATA RECEIVED FROM INSTRUMENT PANEL CLUSTER CONTROL MODULE	—
U0427	INVALID DATA RECEIVED FROM VEHICLE SECURITY CONTROL MODULE	—

Diagnostic procedure:
1) Perform the Clear Memory Mode. <Ref. to BC(diag)-12, Clear Memory Mode.>
2) Read the DTC and check that the DTC is not displayed. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs. After solving the DTC, repeat from step 1).
3) Turn the ignition switch OFF → ON, and wait for 10 seconds or more.
4) Read the DTC and check that the DTC is not displayed. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs.

8. INSPECTION MODE 8

DTC	Item	Note
U1500	KEYLESS UART COM. MALFUNCTION	—

Diagnostic procedure:
1) Perform the Clear Memory Mode. <Ref. to BC(diag)-12, Clear Memory Mode.>
2) Read the DTC and check that the DTC is not displayed. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs. After solving the DTC, repeat from step 1).
3) Disconnect and reconnect the battery and wait for one minute or more. Then turn the ignition switch OFF → ON and wait for 10 seconds or more.
4) Read the DTC and check that the DTC is not displayed. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs.

9. INSPECTION MODE 9

DTC	Item	Note
B1405	SCU COLLATION	—
B1406	SCU_EEPROM	—
B1409	SCU COMMUNICATION	—
U0101	LOST COMMUNICATION WITH TCM	—
U0164	LOST COMMUNICATION WITH HVAC CONTROL MODULE	—
U0402	INVALID DATA RECEIVED FROM TCM	—
U0424	INVALID DATA RECEIVED FROM HVAC CONTROL MODULE	—
U123C	LOST COMMUNICATION WITH HIGH BEAM ASSIST CONTROL MODULE	—
U153D	INVALID DATA RECEIVED FROM HIGH BEAM ASSIST CONTROL MODULE	—

Diagnostic procedure:
1) Perform the Clear Memory Mode. <Ref. to BC(diag)-12, Clear Memory Mode.>
2) Read the DTC and check that the DTC is not displayed. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs. After solving the DTC, repeat from step 1).
3) Make sure that the reading of {Customized Setting} in body integrated unit corresponds to the vehicle. <Ref. to BC(diag)-24, User Customizing.>
4) Turn the ignition switch OFF → ON, and wait for 10 seconds or more.
5) Read the DTC and check that the DTC is not displayed. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs.

9. Read Current Data

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Body Control» and then select «Enter».
5) On «Select Function» display, select «Data Monitor».

NOTE:
For detailed operation procedures, refer to “Application help”.

B: LIST

Items to be displayed	Unit of measure	Content	Note
BATT voltage (control)	10 — 15 V	Body integrated unit input value	Always
BATT voltage (BACKUP)	10 — 15 V	Body integrated unit input value	Always
IGN Voltage	10 — 15 V	Body integrated unit input value	Ignition switch ON
ACC voltage	10 — 15 V	Body integrated unit input value	Ignition switch ACC
Illumination VR Voltage	0 — 5 V	Body integrated unit input value	Input value from illumination volume
Illumination output d-ratio	0 — 100%	Body integrated unit output value	Small light ON Illumination volume is other than bright.
number of regist.	0 — 4	Number of keyless key registered	
Front Wheel Speed	km/h	CAN data input value	Reception from VDC module
Fuel consumption	cc/s	CAN data input value	Reception from ECM
Engine Coolant Temperature	–40 — 215°C	CAN data input value	Reception from ECM
Shift Position	1 — 3, D-S, D, N, R, P	CAN data input value	Reception from TCM
Buzzer beeping request	Status for ’beeping deactivated’ Reverse warning Key warning buzzer Light Remained Buzzer Customize 1 Customize 2 Registration completed 1 Registration completed 2 Registered Registration NG	CAN data output value	Reception from body integrated unit
Destination Code	JPN U4, U5, U6 C0 EC, EA, E2, EL K4, C4, C6 KS EK ER, EN KA, KC EH C6	CAN data input value	—
Illumination Sensor Output	0 — 5 V	CAN data input value	—

Items to be displayed	Unit of measure	Content	Note
Off delay time	OFF 10 Sec 20 Sec 30 Sec	Body integrated unit setting value	Customize setting
Auto Light Sensitivity Adjustment	Dull Normal Sensitive Very sensitive	Body integrated unit setting value	Customize setting
key-lock warning SW Input	ON/OFF	Body integrated unit input value	ON when ignition key inserted (Model without keyless access with push button start system)
ACC Input	ON/OFF	Body integrated unit input value	ON when ACC switch is ON (model with keyless access with push button start system)
Stop Light Switch	ON/OFF	Body integrated unit input value	ON when brake pedal is depressed
Front Fog Light SW input	ON/OFF	Body integrated unit input value	When front fog light switch is ON
Driver's door SW input	ON/OFF	Body integrated unit input value	ON when driver's door is open
P-door SW input	ON/OFF	Body integrated unit input value	ON when passenger's door is open
Rear right door SW input	ON/OFF	Body integrated unit input value	ON when rear right door is open
Rear left door SW input	ON/OFF	Body integrated unit input value	ON when rear left door is open
R Gate SW input	ON/OFF	Body integrated unit input value	ON when rear gate/trunk open
Manual lock SW input	ON/OFF	Body integrated unit input value	Manual lock switch ON
Manual unlock SW input	ON/OFF	Body integrated unit input value	Manual unlock switch ON
Bright SW input	ON/OFF	Body integrated unit input value	Bright switch ON
P SW	ON/OFF	Body integrated unit input value	ON when shift range is in parking Shift lever P switch signal
MT Reverse Switch	ON/OFF	Body integrated unit input value	Reverse switch ON (for MT vehicle only)
R wiper ON SW input	ON/OFF	Body integrated unit input value	Rear wiper switch ON
R wiper INT SW input	ON/OFF	Body integrated unit input value	Rear wiper switch (INT ON)
R washer SW input	ON/OFF	Body integrated unit input value	Rear washer switch ON
Rr Defogger SW	ON/OFF	Body integrated unit input value	Rear defogger switch ON
Fr wiper input	ON/OFF	Body integrated unit input value	ON when front wiper is operating
Parking Brake SW	ON/OFF	Body integrated unit input value	Parking brake ON
Driver's seat lock status SW input	ON/OFF	Body integrated unit input value	Displays latch state, ON when locked (Model with keyless access with push button start system)
Passenger's seat lock status SW input	ON/OFF	Body integrated unit input value	Displays latch state, ON when locked (Model with keyless access with push button start system)

Items to be displayed	Unit of measure	Content	Note
R gate lock status SW input	ON/OFF	Body integrated unit input value	Displays latch state, ON when locked
R Gate Release SW input	ON/OFF	Body integrated unit input value	Rear gate release switch ON
Rr Defogger output	ON/OFF	Body integrated unit output value	ON when rear defogger relay is operating
lock actuator LOCK output	ON/OFF	Body integrated unit output value	ON when LOCK signal is output
All seat UNLOCK output	ON/OFF	Body integrated unit output value	ON when unlock signal is output
D-seat UNLOCK output	ON/OFF	Body integrated unit output value	ON when unlock signal is output
R gate/trunk UNLOCK output	ON/OFF	Body integrated unit output value	ON when rear gate/trunk unlock signal is output
Rear Wiper Output	ON/OFF	Body integrated unit output value	ON when rear wiper motor is operating
Shift lock solenoid output	ON/OFF	Body integrated unit output value	ON when shift lock solenoid is operating (only AT)
Key lock solenoid output	Lock/Unlock	Body integrated unit output value	LOCK when the key is locked (Model without keyless access with push button start system)
wiper deicer output	ON/OFF	Body integrated unit output value	ON when wiper deicer relay is operating
Hazard Output	ON/OFF	Body integrated unit output value	ON when answer-back signal is received or when hazard is operating
Keyless Buzzer Output	ON/OFF	Body integrated unit output value	ON when lock/unlock signal is received
Horn Output	ON/OFF	Body integrated unit output value	ON when security warning is operating
Illumination lamp O/P	ON/OFF	Body integrated unit output value	ON when illumination is illuminated
Room lamp output	ON/OFF	Body integrated unit output value	ON when keyless lock/unlock signal is received, or when opening or closing the door
key illumination lamp o/p	ON/OFF	Body integrated unit output value	ON when key illumination light is illuminated
Immobilizer lamp output	ON/OFF	Body integrated unit output value	ON when immobilizer pilot light blinks
Keyless operation 1	Register/Normal	Body integrated unit input value	When keyless registration connector connected
Keyless operation 2	Deletion/Normal	Body integrated unit input value	When keyless registration is deleted
Small Light SW	ON/OFF	Body integrated unit input value	ON when small light is illuminated
Headlamp	ON/OFF	Body integrated unit input value	ON when headlight Lo is illuminated

10.User Customizing

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Body Control» and then select «Enter».
5) On «Select Function» display, select «Customize».

NOTE:
For detailed operation procedures, refer to “Application help”.
List of User Customizing item

Data	Initial setting value	Customize setting	Remarks
Off delay time	30 Sec	OFF	Room light off delay time can be selected.
		10 Sec	
		20 Sec	
		30 Sec	
Auto Light Sensitivity Adjustment	Normal	Dull	Slow response
		Normal	Standard
		Sensitive	Quick response
		Very sensitive	Fairly quick response
Lane change signal setting	OFF	ON	One-touch blinker control is performed.
		OFF	One-touch blinker control is not performed.
Rear wiper auto setting	OFF	ON	Existence of rear wiper linked with reverse operation can be set.
		OFF	
TPMS Setting	— (*1)	TPMS	Set to “ON” for model with TPMS.
		No TPMS	
Driver’s Door Unlock Setting	Selection	Selection	When the touch sensor (unlock) on the driver’s side is touched, only the driver’s door is unlocked. When the touch sensor (unlock) on the passenger’s side is touched, all doors are unlocked.
		ALL	When the touch sensor (unlock) on the driver’s side is touched, all doors are unlocked. When the touch sensor (unlock) on the passenger’s side is touched, all doors are unlocked.
Rear Gate Unlock Setting	Selection	Selection	When the rear gate opener button is pressed, only the rear gate is unlocked.
		ALL	When the rear gate opener button is pressed, all doors are unlocked.
Steering Responsive Fog Lamp Setting	— (*1)	ON	SRF control is performed.
		OFF	SRF control is not performed.
High Beam Assist Function	— (*1)	ON	Set to “ON” for model with HBA.
		OFF	
Head Lamp Low Beam Specification	— (*1)	Halogen	Set according to the headlight type.
		HID	
		LED	
Head Lamp High Beam Specification	— (*1)	Halogen	
		HID	
		LED	
High Beam Assist Current Setting	— (*1)	ON	Fixed to ON. (However, HBA will not function.)
		OFF	
Rear defogger operation mode	Normal	Normal	Automatically stops in 15 minutes after the switch is turned to ON.
		Continuous	Repeats activated for 15 minutes and deactivated for 2 minutes until the switch is turned to OFF.

Data	Initial setting value	Customize setting	Remarks
Security Alarm Setup	OFF	ON	Security alarm (hazard, horn or siren) becomes activated.
		OFF	Security alarm becomes deactivated.
Impact Sensor Setup	OFF	ON	Workable when the Impact Sensor Setup is set to “ON”. Impact sensor function becomes activated.
		OFF	Impact sensor function becomes deactivated. (Be sure to set to “OFF” for models without sensors.)
Alarm delay setup	ON		After the keyless lock operation, the alarm monitor starts after the following delay time has passed.
		ON	Delay time is 30 seconds.
		OFF	Delay time is 0 seconds.
Lockout prevention	ON	ON	key lockout prevention function is activated. (The function does not operate if safety knob is locked by hand.)
		OFF	Key lockout prevention function is deactivated.
Impact sensor	OFF	ON	Vehicle is controlled in impact sensor equipped mode. (Make sure to set to “OFF” for models without the impact sensor. When “ON”, hazard, horn or siren become activated by keyless lock (alarm monitor start).)
		OFF	Vehicle is controlled in impact sensor non-equipped mode.
Buzzer sounding setting	ON	ON	Buzzer operates when lock/unlock is selected by keyless entry system operation.
		OFF	Buzzer does not operate when lock/unlock is selected by keyless entry system operation.
Abnormal warning lamp flashing setting	ON	ON	Hazard blinks when lock/unlock is selected by keyless entry system operation.
		OFF	Hazard is not interlocked when lock/unlock is selected by keyless entry system operation.
Initial keyless setting	—	—	—
		Operate	—
Initial button setting	—	—	—
		Operate	—
Passive Alarm	OFF	ON	
		OFF	
Door open warning	ON	ON	If a door stays half shut for 20 minutes, room light, map light, and key ring illumination related to doors are turned off to prevent battery run-out.
		OFF	Room light, map light, key illumination and door warning light are not turned off.
Dome Light Alarm Setting	OFF	ON	Room light illuminates interlocking with alarm.
		OFF	Room light does not illuminate interlocking with alarm.
Welcome Light (Exit)	30 Sec	OFF/30 Sec/ 60 Sec/90 Sec	Length of the lighting time can be set.
Welcome Light Off Delay Time(Approaching)	30 Sec	OFF/30 Sec/ 60 Sec/90 Sec	Length of the lighting time can be set.
Keyless Buzzer Volume	5	1 — 7	Buzzer volume can be set.

*1: Customization item according to the actual vehicle equipment

6) When the setting is complete, see «Data monitor» to make sure that the alterations are consistent with the actual equipment on the vehicle.

CAUTION:
- **the above settings must match the actual vehicle equipment.**
- **Do not change settings except for setting above while setting the functions.**
- **Be sure not to change Factory initial setting except when installing a new body integrated unit.**

NOTE:
For detailed operation procedures, refer to “Application help”.

11.Registration Body Integrated Unit

A: OPERATION

1. CONFIRM CURRENT SETTING

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Body Control» and then select «Enter».
5) On «Select Function» display, select «Customize».
6) Save the setting.

Required items for new registration. (Except for system not equipped)

Item	Item to confirm				Remarks
number of regist.	1	2	3	4	Number of registered ID
Off delay time	OFF	10 Sec	20 Sec	30 Sec	Setting for lighting off time
Auto Light Sensitivity Adjustment	Dull	Normal	Sensitive	Very sensitive	1st (slow) — 4th (fairly quick)
Lane change signal setting	ON		OFF		—
Rear wiper auto setting	ON		OFF		—
TPMS Setting	TPMS		No TPMS		—
Driver's Door Unlock Setting	ALL		Selection		—
Rear Gate Unlock Setting	ALL		Selection		—
Steering Responsive Fog Lamp Setting	ON		OFF		—
High Beam Assist Function	ON		OFF		—
Head Lamp Low Beam Specification	Halogen/HID/LED				—
Head Lamp High Beam Specification	Halogen/HID/LED				—
High Beam Assist Current Setting	ON		OFF		—
Rear defogger operation mode	Normal		Continuous		—
Security Alarm Setup	ON		OFF		—
Impact Sensor Setup	ON		OFF		Option setting
Alarm delay setup	ON		OFF		—
Lockout prevention	ON		OFF		—
Impact sensor	ON		OFF		Option setting
Buzzer sounding setting	ON		OFF		—
Abnormal warning lamp flashing setting	ON		OFF		—
Passive Alarm	ON		OFF		—
Door open warning	ON		OFF		—
Dome Light Alarm Setting	ON		OFF		—
Auto A/C ECU Setting	ON		OFF		—
Wiper Deicer setting	ON		OFF		Option setting
Illumination Control On/Off	ON		OFF		—
Sedan/Wagon Setting	WAGON		SEDAN		—
MT/AT Setting	MT		AT		—
Seat Memory Setting	ON		OFF		N/A
Illumination Sensor Setting	ON		OFF		Option setting
Factory initial setting	Factory		Market		Do not change to factory mode.
Welcome Light (Exit)	OFF/30 Sec/60 Sec/90 Sec				Option setting
Welcome Light Off Delay Time(Approaching)	OFF/30 Sec/60 Sec/90 Sec				Option setting
Keyless Buzzer Volume	1 2 3 4 5 6 7				—

2. REGISTRATION BODY INTEGRATED UNIT (FUNCTION SETTING)

CAUTION:
For the body integrated unit, function selection is available to control the entire vehicle systems. It is possible to control the original functions of vehicle when registrations of body integrated unit and function setting are corresponded to vehicle equipment.
If registrations and function setting are different from vehicle equipment, vehicle system does not operate normally and diagnosis cannot be performed correctly. Pay attention to following item.
- **Be sure to correspond registrations, or User Customizing settings to vehicle equipment.**
- **Do not change the settings of vehicle improperly.**
- **Make sure that the key illumination does not blink with ignition switch ON, or that the body integrated unit registration item "Factory initial setting" is set to "Market". If "Factory initial setting" is set to "Factory", key illumination blinks when the ignition switch is turned ON, to notify that the settings are not confirmed. (If the vehicle is a model with the keyless access with push button start system, check by the current data display function of Subaru Select Monitor because no key illumination is available.)**
- **Key illumination does not blink with ignition switch turned to ON and go off with door closed. (Except for model with the keyless access with push button start system)**
- **Be sure to register immobilizer if body integrated unit is replaced with a new part. (Except for model with the keyless access with push button start system)**
- **Make a registration of immobilizer when the parts related to immobilizer have been replaced. Refer to the "REGISTRATION MANUAL FOR IMMOBILIZER" provided as a separate volume.**

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Body Control» and then select «Enter».
5) On «Select Function» display, select «Customize».

NOTE:
For the vehicle requiring the destination setting, if the destination setting is not finished, display can not be shifted into customizing screen. <Ref. to BC(diag)-28, DESTINATION SETTING, OPERATION, Registration Body Integrated Unit.>
6) Change the setting to the contents saved at confirmation of current setting.

CAUTION:
- **To perform normal operation of vehicle and diagnosis, the above settings must match the actual vehicle equipment.**
- **When the body integrated unit is new or in Factory mode, the key illumination blinks, and user customizing is incomplete. Check the user customizing settings. (For models with keyless access with push button start system, the room light illuminates.)**
- **Be sure not to change Factory initial setting except when installing a new body integrated unit.**

NOTE:
"Factory" mode:
- Body integrated unit has not been set yet. It can be recognized by key illumination blinking with ignition switch turned to ON. (Except for model with the keyless access with push button start system)
- All replacement body integrated units are set to "Factory" mode. When replacing a body integrated unit, be sure to perform the registration operation.

"Market" mode:
- Each settings have been set. It can be recognized by key ring illumination coming on in concocting with room light and going off with ignition switch turned to ON. (Except for model with the keyless access with push button start system)

7) Perform the factory initial setting. Select «Factory initial setting» in the «Customize» screen of the Subaru Select Monitor.
8) Change the mode from Factory to Market.
9) Turn the ignition switch to OFF to settle the setting.
10) Perform the User Customizing. <Ref. to BC(diag)-24, OPERATION, User Customizing.>

11) Change the system selection to «Immobilizer» on Subaru Select Monitor, and perform registration of immobilizer. (Models without the keyless access with push button start system)
12) Follow the procedure of the “REGISTRATION MANUAL FOR IMMOBILIZER” provided as a separate volume.
13) When key registration is completed, “Do you want to register remote engine start?” is displayed. Perform registration only for equipped models. (Displayed only on models without the keyless access with push button start system)

NOTE:
For detailed operation procedures, refer to “Application help”.

3. DESTINATION SETTING

NOTE:
For the vehicle requiring the destination setting, if the destination setting is not finished, display can not be shifted into customizing screen.

Step		Check	Yes	No
1	**CONFIRM CURRENT SETTING.** Always perform confirmation of current setting before replacing the module. Record the contents of the “Destination Setting”. NOTE: Refer to the “Read Current Data” and “CONFIRMATION OF CURRENT SETTING” to confirm the current setting. <Ref. to BC(diag)-26, CONFIRM CURRENT SETTING, OPERATION, Registration Body Integrated Unit.> <Ref. to BC(diag)-17, OPERATION, Read Current Data.>	Is the current setting recorded?	Go to step **2**.	Confirm the current setting. Go to step **1**.
2	**CONFIRM DESTINATION SETTING.** 1) Connect the Subaru Select Monitor, and run the application. 2) On «Start» display, select «Diagnosis». 3) On «Vehicle selection» display, input the target vehicle information and select «Confirmed». 4) On «Main Menu» display, select «Each System». 5) On «Select System» display, select «Body Control» and then select «Enter». 6) On «Select Function» display, select «Customize». 7) The vehicle destination screen is displayed.	Is the vehicle destination setting screen displayed?	Go to step **3**.	Go to step **4**.
3	**CONFIRM DESTINATION SETTING.** Confirm the screen displayed on Subaru Select Monitor and the actual vehicle destination.	Is it necessary to change the destination setting?	Select [Yes], Go to step **4**.	Select [No], Go to step **5**.
4	**ENTER DESTINATION CODE.** Enter the appropriate code in the screen. JPN: JP00 KA, KC: KA00 KS: KS00 U4, U5, U6, C6 and C0, C5 (with the keyless access with push button start system): U400 C0, C5 (without the keyless access with push button start system): C000 EK, ER: EK00 Except above: EC00	Is the appropriate code entered?	Select [OK]. Go to step **5**.	Enter the destination code. Go to step **5**.

	Step	Check	Yes	No
5	**REGISTER VEHICLE EQUIPMENT.** Customizing screen is displayed. NOTE: Match the each item setting of body integrated unit registration item list with the vehicle equipment.	Do all setting contents match with the vehicle equipment specification?	Go to step **6**.	Change the items until each content setting match with the vehicle equipment specification. Go to step **6**.
6	**CONFIRM MARKET MODE.** 1) Customizing screen, select the {Factory initial setting} to change the setting from "Factory" mode to "Market" mode. 2) Turn the ignition switch to OFF. NOTE: When the setting is changed from "Factory" mode to "Market" mode, turning the ignition switch from ON → OFF confirms the setting. 3) Turn the ignition switch to ON, and check the contents of settings.	Is the mode changed to "Market" mode?	Go to step **7**.	Perform the destination setting from the first step. Go to step **1**.
7	**CONFIRM MARKET MODE.** Check the following. Make sure that the "Destination Setting" in the current data display is the same as the one you confirmed in step 1.	Is the display the same as indicated?	Registration of body integrated unit is finished.	It is possible that harness malfunction may occur. Perform the diagnosis.

12.Function Check

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Body Control» and then select «Enter».
5) On «Select Function» display, select «Active Test».

NOTE:
- In order to check the body integrated unit function, inspect the body integrated unit and actuator using Subaru Select Monitor without operating switches.
- For detailed operation procedures, refer to “Application help”.

B: LIST

Item	Display	Note
lock actuator LOCK output	ON/OFF	—
All seat UNLOCK output	ON/OFF	—
R gate/trunk UNLOCK output	ON/OFF	—
Shift lock solenoid output	ON/OFF	—
Key lock solenoid output	ON/OFF	—
Keyless Buzzer Output	ON/OFF	—
Horn Output	ON/OFF	—

NOTE:
If not equipped (depending on destination area or vehicle equipment condition), process will not go on.

13.List of Diagnostic Trouble Code (DTC)

U123C	LOST COMMUNICATION WITH HIGH BEAM ASSIST CONTROL MODULE	<Ref. to BC(diag)-49, DTC U123C LOST COMMUNICATION WITH HIGH BEAM ASSIST CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U1500	KEYLESS UART COM. MALFUNCTION	<Ref. to BC(diag)-50, DTC U1500 KEYLESS UART COM. MALFUNCTION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U153D	INVALID DATA RECEIVED FROM HIGH BEAM ASSIST CONTROL MODULE	<Ref. to BC(diag)-53, DTC U153D INVALID DATA RECEIVED FROM HIGH BEAM ASSIST CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

14.Diagnostic Procedure with Diagnostic Trouble Code (DTC)

A: DTC B1010 BODY CONTROL SYSTEM (BIU) MALFUNCTION

DTC DETECTING CONDITION:
System error in body integrated unit
TROUBLE SYMPTOM:
LAN communication immobilizer function may not be executed normally.

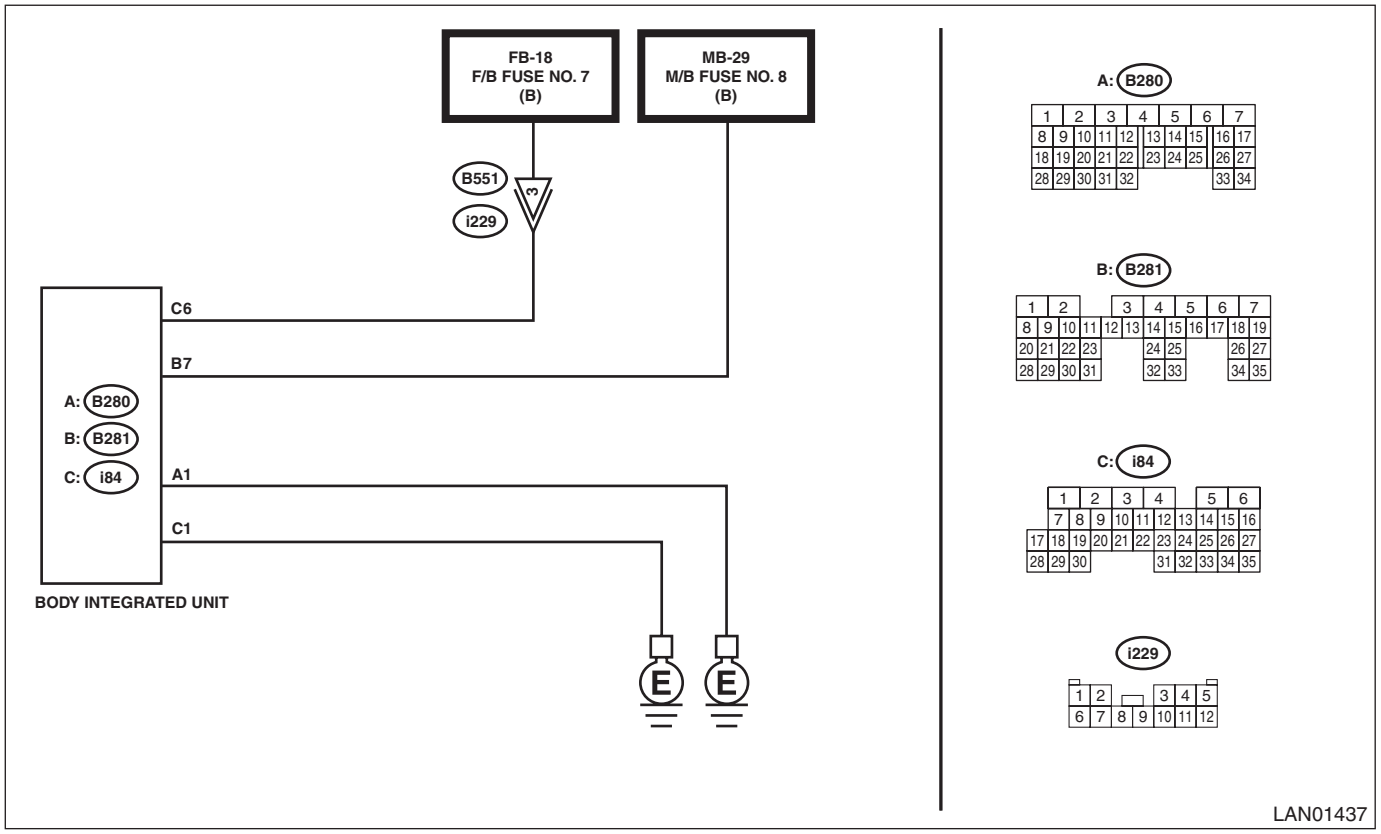
	Step	Check	Yes	No
1	**CHECK DTC.** Check DTC indicated by body integrated unit. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC B1010 a current malfunction?	Go to step **2**.	Temporary EEPROM access error occurred.
2	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the body integrated unit connector. 3) Connect the disconnected connectors. 4) Read the DTC of body integrated unit using Subaru Select Monitor. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC B1010 displayed? (Current malfunction)	Replace the body integrated unit. <Ref. to SL-81, Body Integrated Unit.>	Temporary EEPROM access error occurred.

B: DTC B1011 BATTERY CONTROL POWER SUPPLY

DTC DETECTING CONDITION:

- Voltage failure caused by poor contact of battery power supply control circuit
- Battery voltage of body integrated unit is not within the range of 8.5 — 16.5 V.

TROUBLE SYMPTOM:



Functions of body integrated unit stop.

NOTE:

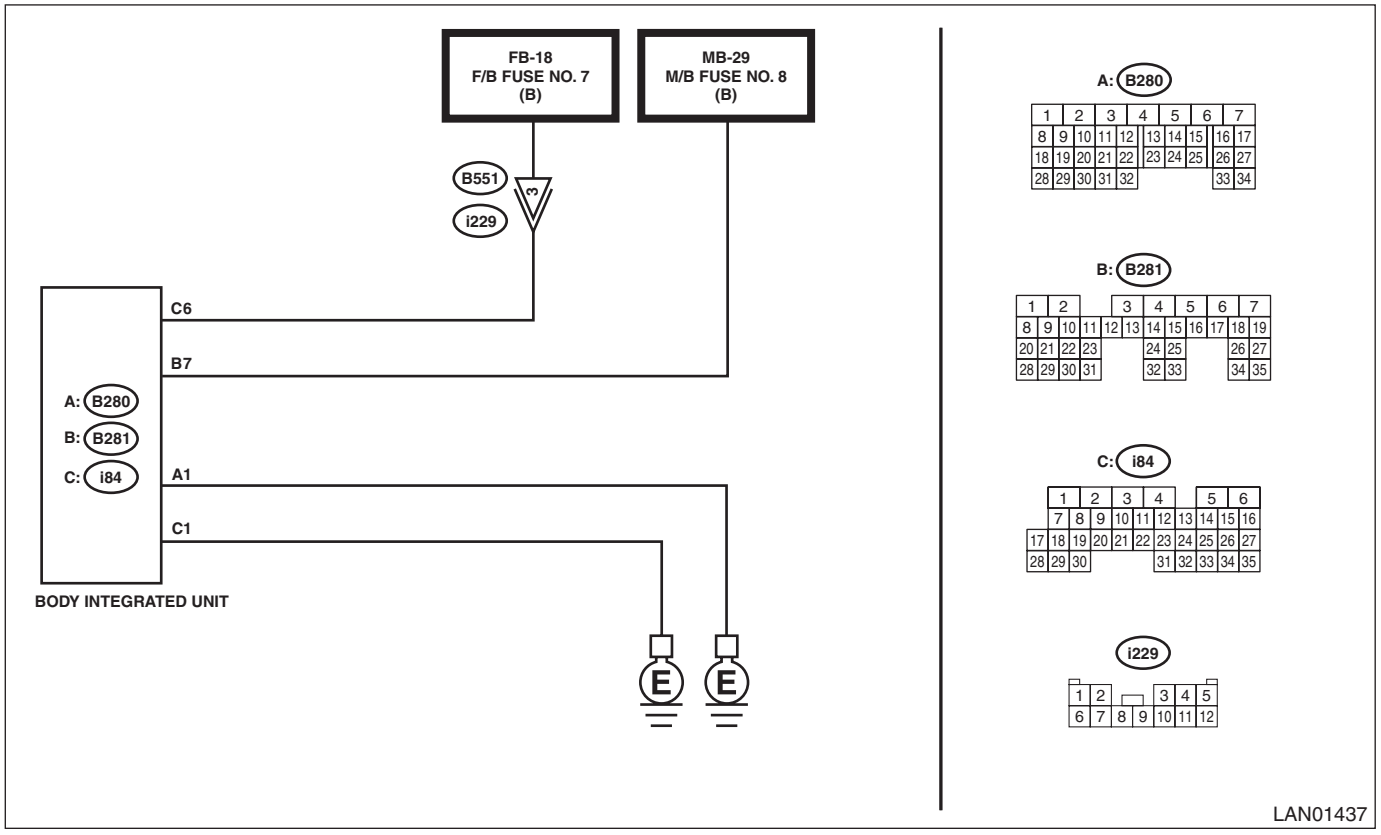
When B1012 «BATTERY BACKUP POWER SUPPLY» is output at the same time, all the function of body integrated unit may not operate.

WIRING DIAGRAM:

Immobilizer system <Ref. to WI-244, WIRING DIAGRAM, Immobilizer System.>

Step		Check	Yes	No
1	**CHECK DTC.** Read the DTC of body integrated unit using Subaru Select Monitor. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC B1011 displayed? (Current malfunction)	Go to step **2**.	Go to step **5**.
2	**CHECK DTC.** 1) Turn the ignition switch to OFF. 2) Disconnect and then connect the body integrated unit connector. 3) Wait approx. 2 minutes. 4) Turn the ignition switch to ON. 5) Read the DTC of body integrated unit using Subaru Select Monitor. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC B1011 displayed? (Current malfunction)	Go to step **3**.	Go to step **5**.
3	**CHECK FUSE.** 1) Turn the ignition switch to OFF. 2) Check the fuse.	Is the check result OK?	Go to step **4**.	Replace the defective fuse.

	Step	Check	Yes	No
4	**CHECK HARNESS.** 1) Disconnect the body integrated unit connector. 2) Using the tester, measure the voltage between terminals. ***Connector & terminal*** ***(i84) No. 6 (+) — Chassis ground (–):***	Is the voltage 8.5 — 16.5 V?	Replace the body integrated unit. <Ref. to SL-81, Body Integrated Unit.>	Repair the harness between body integrated unit and fuse.
5	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the body integrated unit connector.	Is there poor contact of connector?	Repair or replace the poor contact of connector.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.



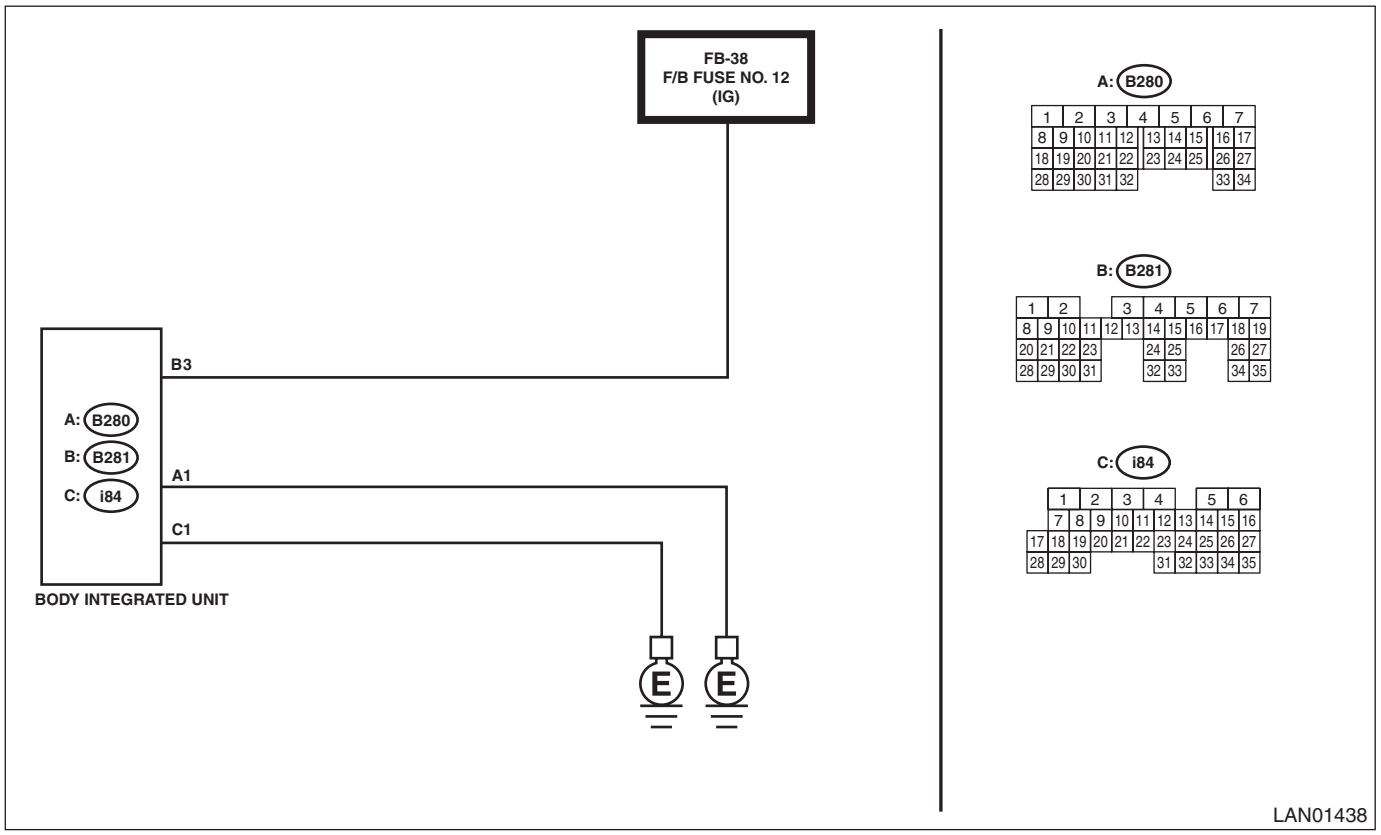
C: DTC B1012 BATTERY BACKUP POWER SUPPLY

DTC DETECTING CONDITION:
Voltage failure caused by poor contact of battery power supply backup circuits

TROUBLE SYMPTOM:
Illuminations for the keyless entry, map light, luggage light, trunk light, room light, and ignition switch do not turn on.

NOTE:
When B1011 «BATTERY P/SUPPLY MALFUNCTION CONT» is output at the same time, all the function of body integrated unit may not operate.

WIRING DIAGRAM:
Immobilizer system <Ref. to WI-244, WIRING DIAGRAM, Immobilizer System.>

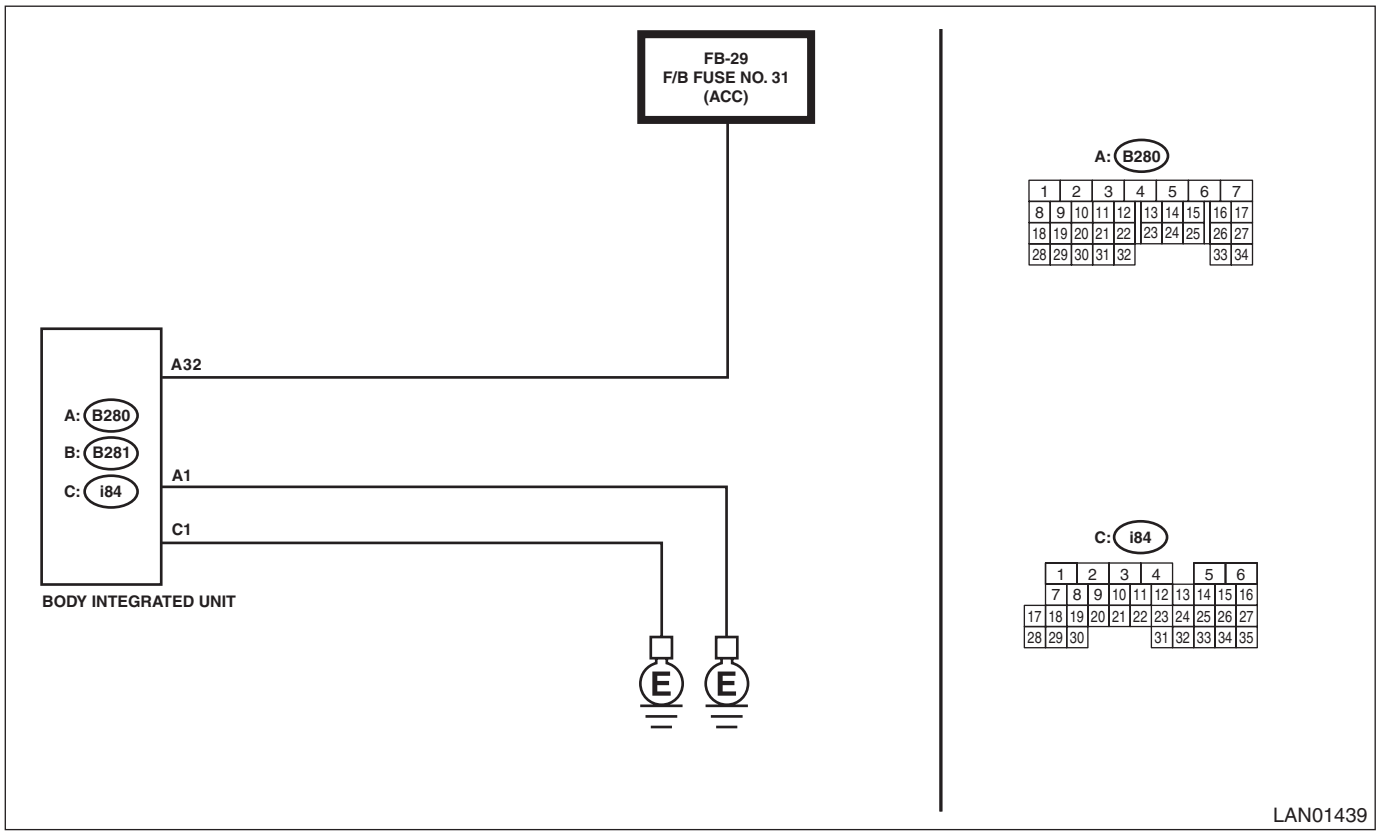


Step		Check	Yes	No
1	**CHECK DTC.** Read the DTC of body integrated unit using Subaru Select Monitor. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC B1012 displayed? (Current malfunction)	Go to step **2**.	Go to step **5**.
2	**CHECK DTC.** 1) Turn the ignition switch to OFF. 2) Disconnect and then connect the body integrated unit connector. 3) Wait approx. 2 minutes. 4) Turn the ignition switch to ON. 5) Read the DTC of body integrated unit using Subaru Select Monitor. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC B1012 displayed? (Current malfunction)	Go to step **3**.	Go to step **5**.
3	**CHECK FUSE.** 1) Turn the ignition switch to OFF. 2) Check the fuse.	Is the check result OK?	Go to step **4**.	Replace the defective fuse.

	Step	Check	Yes	No
4	**CHECK HARNESS.** 1) Disconnect the body integrated unit connector. 2) Using the tester, measure the voltage between terminals. ***Connector & terminal*** ***(B281) No. 7 (+) — Chassis ground (–):***	Is the voltage 8.5 — 16.5 V?	Replace the body integrated unit. <Ref. to SL-81, Body Integrated Unit.>	Repair the harness between body integrated unit and fuse.
5	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the body integrated unit connector.	Is there poor contact of connector?	Repair or replace the poor contact of connector.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

D: DTC B1013 IGNITION POWER

DTC DETECTING CONDITION:
Voltage failure caused by poor contact of IGN power supply circuits
TROUBLE SYMPTOM:
Symptoms such as shift lock or wiper not operating may occur.
WIRING DIAGRAM:
Shift lock control system <Ref. to WI-344, WIRING DIAGRAM, Shift Lock Control System.>

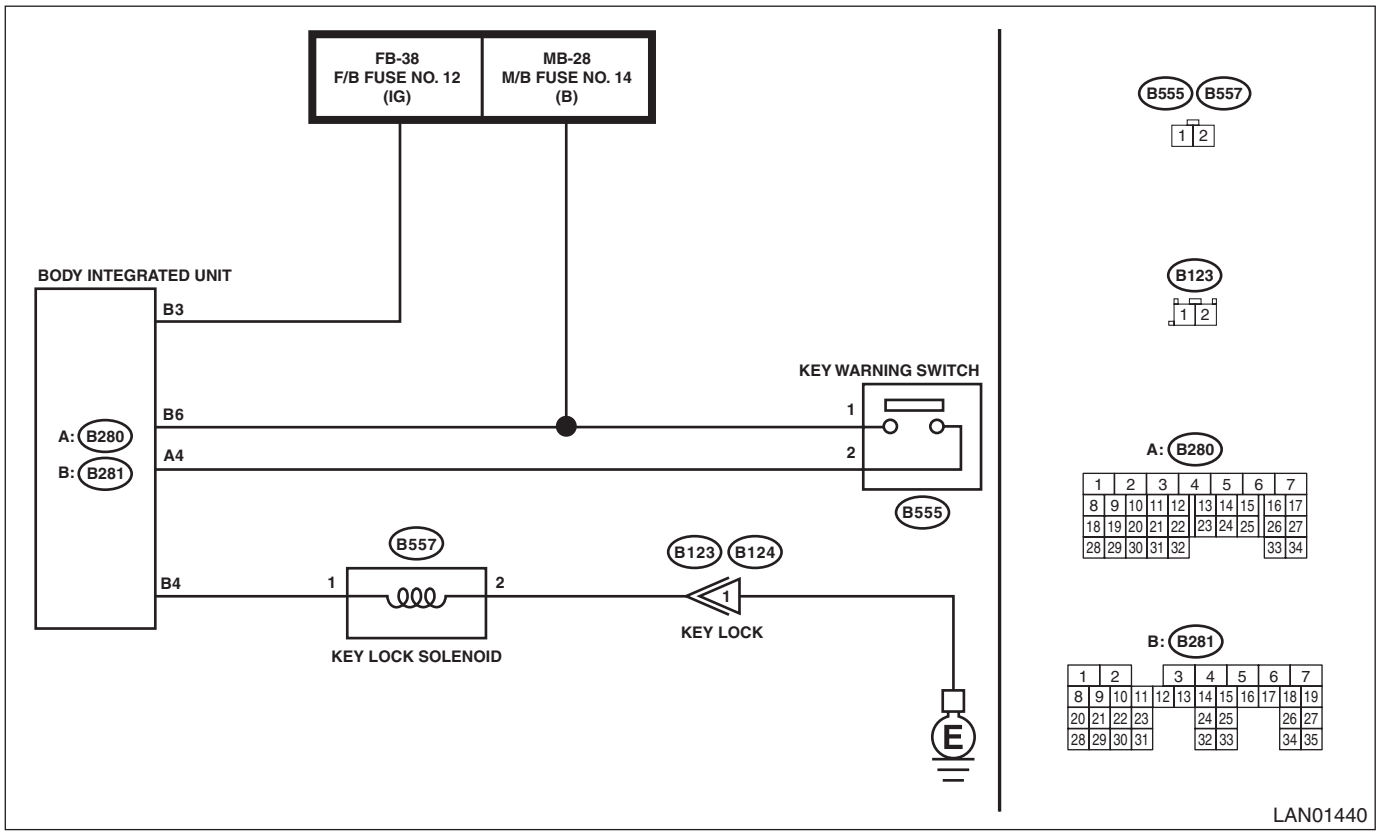


Step		Check	Yes	No
1	**CHECK DTC.** Read the DTC of body integrated unit using Subaru Select Monitor. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC B1013 displayed? (Current malfunction)	Go to step **2**.	Go to step **5**.
2	**CHECK DTC.** 1) Turn the ignition switch to OFF. 2) Disconnect and then connect the body integrated unit connector. 3) Wait approx. 2 minutes. 4) Turn the ignition switch to ON. 5) Read the DTC of body integrated unit using Subaru Select Monitor. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC B1013 displayed? (Current malfunction)	Go to step **3**.	Go to step **5**.
3	**CHECK FUSE.** 1) Turn the ignition switch to OFF. 2) Check the fuse.	Is the check result OK?	Go to step **4**.	Replace the defective fuse.
4	**CHECK HARNESS.** 1) Disconnect the body integrated unit connector. 2) Using the tester, measure the voltage between terminals. ***Connector & terminal*** ***(B281) No. 3 (+) — Chassis ground (–):***	Is the voltage 8.5 — 16.5 V?	Replace the body integrated unit. <Ref. to SL-81, Body Integrated Unit.>	Repair the harness between body integrated unit and fuse.

	Step	Check	Yes	No
5	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the body integrated unit connector.	Is there poor contact of connector?	Repair or replace the poor contact of connector.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

E: DTC B1014 ACC POWER

DTC DETECTING CONDITION:
Voltage failure caused by poor contact of ACC power supply circuit
TROUBLE SYMPTOM:
DRL may not illuminate.
WIRING DIAGRAM:
Shift lock control system <Ref. to WI-344, WIRING DIAGRAM, Shift Lock Control System.>

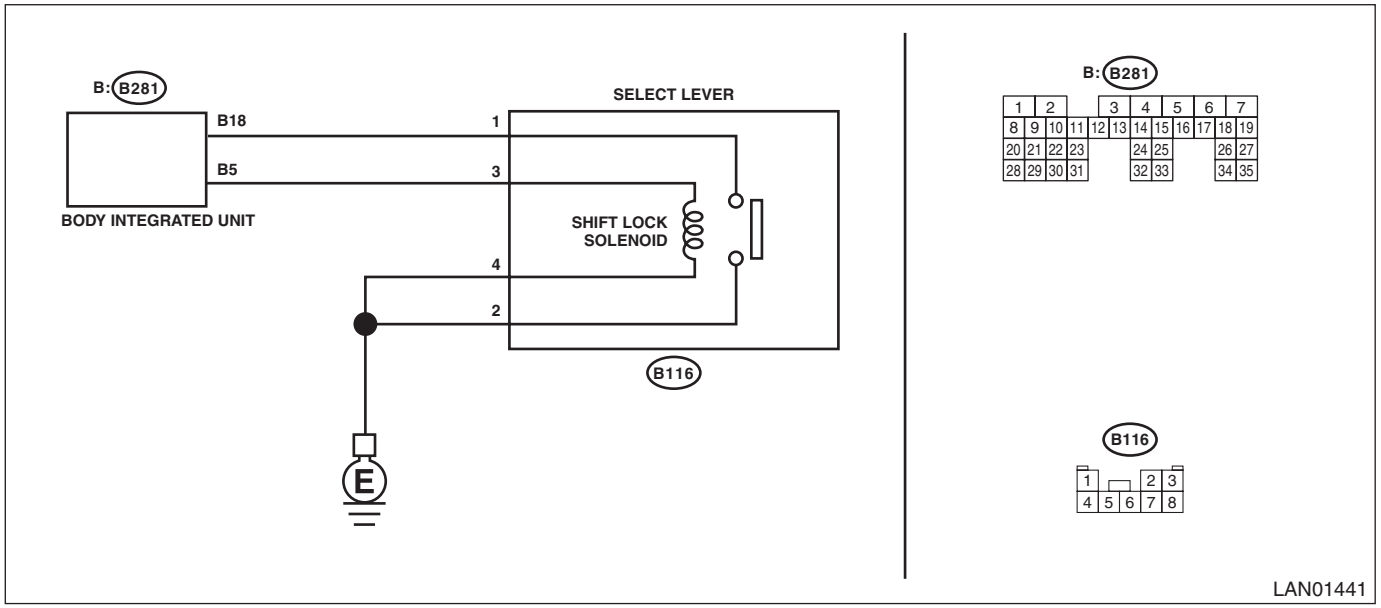


Step		Check	Yes	No
1	**CHECK DTC.** Read the DTC of body integrated unit using Subaru Select Monitor. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC B1014 displayed? (Current malfunction)	Go to step **2**.	Go to step **5**.
2	**CHECK DTC.** 1) Turn the ignition switch to OFF. 2) Disconnect and then connect the body integrated unit connector. 3) Wait approx. 2 minutes. 4) Turn the ignition switch to ON. 5) Read the DTC of body integrated unit using Subaru Select Monitor. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC B1014 displayed? (Current malfunction)	Go to step **3**.	Go to step **5**.
3	**CHECK FUSE.** 1) Turn the ignition switch to OFF. 2) Check the fuse.	Is the check result OK?	Go to step **4**.	Replace the defective fuse.
4	**CHECK HARNESS.** 1) Disconnect the body integrated unit connector. 2) Using the tester, measure the voltage between terminals. ***Connector & terminal*** ***(B280) No. 32 (+) — Chassis ground (–):***	Is the voltage 8.5 — 16.5 V?	Replace the body integrated unit. <Ref. to SL-81, Body Integrated Unit.>	Repair the harness between body integrated unit and fuse.

	Step	Check	Yes	No
5	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the body integrated unit connector.	Is there poor contact of connector?	Repair or replace the poor contact of connector.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

F: DTC B1015 KEY INTERLOCK CIRCUIT

DTC DETECTING CONDITION:
Short to ground in key interlock circuit
TROUBLE SYMPTOM:
Key interlock does not keep lock condition.
WIRING DIAGRAM:
Shift lock control system <Ref. to WI-344, WIRING DIAGRAM, Shift Lock Control System.>



Step		Check	Yes	No
1	**CHECK DTC.** 1) Insert the ignition key. 2) Turn the ignition switch to ON. 3) Shift to the Neutral range. 4) Shift into P range. 5) Shift to the Neutral range. 6) Shift into P range. 7) Shift to the Neutral range. 8) Read the DTC of body integrated unit using Subaru Select Monitor. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC B1015 displayed? (Current malfunction)	Go to step **2**.	Go to step **8**.

	Step	Check	Yes	No
2	**CHECK DTC.** 1) Shift the select lever to P range. 2) Remove the ignition key. 3) Disconnect the key actuator connector (B557) and body integrated unit connector (B281). 4) Connect the disconnected connectors. 5) Insert the ignition key. 6) Turn the ignition switch to ON and shift into Neutral. 7) Read the DTC of body integrated unit using Subaru Select Monitor. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC B1015 displayed? (Current malfunction)	Go to step **3**.	Go to step **8**.
3	**CHECK KEY ACTUATOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the key actuator connector (B557). 3) Measure the resistance between key actuator connectors. ***Terminals*** ***Key actuator*** ***No. 1 — No. 2:***	Is the resistance 103 — 115 Ω?	Go to step **4**.	Replace the key actuator. <Ref. to SL-69, Key Lock Cylinders.>
4	**CHECK KEY ACTUATOR.** Connect the battery terminals to the key actuator. ***Terminals*** ***Key actuator*** ***No. 1 — Positive terminal:*** ***No. 2 — Ground terminal:***	Is the actuator activated and then key locked?	Go to step **5**.	Replace the key actuator. <Ref. to SL-69, Key Lock Cylinders.>
5	**CHECK HARNESS.** 1) Disconnect the body integrated unit connector (B281). 2) Measure the resistance between body integrated unit and key actuator using tester. ***Connector & terminal*** ***(B557) No. 1 — (B281) No. 4:***	Is the resistance less than 10 Ω?	Go to step **6**.	Repair or replace the open circuit of harness.
6	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Measure the resistance between body integrated unit and chassis ground using tester. ***Connector & terminal*** ***(B281) No. 4 — Chassis ground:***	Is the resistance 1 MΩ or more?	Go to step **7**.	Repair or replace the short circuit of the harness.
7	**CHECK HARNESS.** 1) Connect the body integrated unit. 2) Turn the ignition switch to ON. 3) Measure the voltage between body integrated unit and chassis ground using tester. ***Connector & terminal*** ***(B281) No. 4 (+) — Chassis ground (–):***	Is the voltage 6 V or more?	Go to step **8**.	Replace the body integrated unit. <Ref. to SL-81, Body Integrated Unit.>

	Step	Check	Yes	No
8	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the body integrated unit connector (B281) and key actuator connector (B557).	Is there poor contact at disconnected connector terminal?	Repair the terminal where poor contact exists, or replace harness.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

G: DTC B1016 SHIFT LOCK CIRCUIT

DTC DETECTING CONDITION:
Shift lock circuit is open, or shorted to power or ground.
TROUBLE SYMPTOM:
Shift lock does not be released or remain locked.
WIRING DIAGRAM:
Shift lock control system <Ref. to WI-344, WIRING DIAGRAM, Shift Lock Control System.>

Step		Check	Yes	No
1	**CHECK DTC.** 1) Turn the ignition switch to ON. 2) Keep the Parking range for approx. 5 seconds. 3) Read the DTC of body integrated unit using Subaru Select Monitor. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC B1016 displayed? (Current malfunction)	Go to step **6**.	Go to step **2**.
2	**CHECK DTC.** 1) Turn the ignition switch to OFF. 2) Disconnect the shift lock solenoid connector. 3) Connect the disconnected connectors. 4) Turn the ignition switch to ON, then keep the Parking range for approx. 5 seconds. 5) Read the DTC of body integrated unit using Subaru Select Monitor. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC B1016 displayed? (Current malfunction)	Go to step **3**.	Go to step **7**.
3	**CHECK HARNESS (OPEN CIRCUIT).** 1) Turn the ignition switch to OFF. 2) Disconnect the shift lock solenoid connector. 3) Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(B116) No. 4 — Chassis ground:***	Is the resistance less than 10 Ω?	Go to step **4**.	Repair or replace the open circuit of harness.

	Step	Check	Yes	No
4	**CHECK SHIFT LOCK SOLENOID.** Using a tester, measure the resistance between shift lock solenoid terminals. ***Terminals*** ***Shift lock solenoid*** ***No. 4 — No. 3:***	Is the resistance between 27 — 31 Ω?	Go to step **5**.	Replace the shift lock solenoid. <Ref. to CS-51, REMOVAL, AT Shift Lock Solenoid and "P" Range Switch.>
5	**CHECK SHIFT LOCK SOLENOID.** Connect the battery terminal to shift lock solenoid. ***Terminals*** ***Shift lock solenoid*** ***No. 3 — Positive terminal:*** ***No. 4 — Ground terminal:***	Does the shift lock solenoid operate and then release the lock?	Go to step **6**.	Replace the shift lock solenoid. <Ref. to CS-51, REMOVAL, AT Shift Lock Solenoid and "P" Range Switch.>
6	**CHECK HARNESS (OPEN CIRCUIT).** Use a tester to measure the resistance between harness terminals. ***Connector & terminal*** ***(B116) No. 3 — (B281) No. 5:*** NOTE: If body integrated unit and shift lock connector are not disconnected, disconnect them first and then perform measurement.	Is the resistance less than 10 Ω?	Replace the body integrated unit. <Ref. to SL-81, Body Integrated Unit.>	Repair or replace the open circuit of harness.
7	**CHECK DTC.** 1) Depress the brake pedal at the parking range. 2) Read the DTC of body integrated unit using Subaru Select Monitor. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC B1016 displayed? (Current malfunction)	Go to step **8**.	Go to step **9**.
8	**CHECK DTC.** 1) Turn the ignition switch to OFF. 2) Disconnect the body integrated unit connector and shift lock connector. 3) Connect the disconnected connectors. 4) Turn the ignition switch to ON. 5) Depress the brake pedal at the parking range. 6) Read the DTC of body integrated unit using Subaru Select Monitor. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC B1016 displayed? (Current malfunction)	Go to step **4**.	Go to step **9**.
9	**CHECK CONNECTOR.** 1) Turn the ignition switch to OFF. 2) Disconnect the body integrated unit connector and shift lock connector.	Is there poor contact of connector terminal?	Repair or replace the poor contact of terminal.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

H: DTC B1401 METER COLLATION

For detailed diagnosis procedure, refer to IMMOBILIZER (DIAG). <Ref. to IM(diag)-27, DTC B1401 METER COLLATION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

I: DTC B1402 IMMOBILIZER KEY COLLATION

For detailed diagnosis procedure, refer to IMMOBILIZER (DIAG). <Ref. to IM(diag)-27, DTC B1402 IMMOBILIZER KEY COLLATION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

J: DTC B1405 SCU COLLATION

For detailed diagnosis procedure, refer to IMMOBILIZER (DIAG). <Ref. to IM(diag)-28, DTC B1405 SCU COLLATION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

K: DTC B1406 SCU_EEPROM

For detailed diagnosis procedure, refer to IMMOBILIZER (DIAG). <Ref. to IM(diag)-28, DTC B1406 SCU_EEPROM, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

L: DTC B1407 MET COMMUNICATION

For detailed diagnosis procedure, refer to IMMOBILIZER (DIAG). <Ref. to IM(diag)-29, DTC B1407 MET COMMUNICATION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

M: DTC B1408 METER NON-VOLATILE MEMORY

For detailed diagnosis procedure, refer to IMMOBILIZER (DIAG). <Ref. to IM(diag)-29, DTC B1408 METER NON-VOLATILE MEMORY, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

N: DTC B1409 SCU COMMUNICATION

For detailed diagnosis procedure, refer to IMMOBILIZER (DIAG). <Ref. to IM(diag)-30, DTC B1409 SCU COMMUNICATION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

O: DTC B1410 TRANSPONDER COMMUNICATION

For detailed diagnosis procedure, refer to IMMOBILIZER (DIAG). <Ref. to IM(diag)-32, DTC B1410 TRANSPONDER COMMUNICATION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

P: DTC B1411 IMMOBILIZER ANTENNA

For detailed diagnosis procedure, refer to IMMOBILIZER (DIAG). <Ref. to IM(diag)-32, DTC B1411 IMMOBILIZER ANTENNA, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

Q: DTC U1201 CAN-HS COUNTER ABNORMAL

Malfunction of high-speed CAN communication.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

R: DTC U0073 CONTROL MODULE COMMUNICATION BUS OFF

Detected when malfunction occurs in CAN line. (Bus off)

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

S: DTC U0100 LOST COMMUNICATION WITH ECM/PCM “A”

No data is received from ECM.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

T: DTC U0101 LOST COMMUNICATION WITH TCM

No data is received from TCM.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

U: DTC U0122 LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE

No data is received from VDC.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

V: DTC U0128 LOST COMMUNICATION WITH PARK BRAKE CONTROL MODULE

No data is received from VDC.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

W: DTC U0155 LOST COMMUNICATION WITH INSTRUMENT PANEL CLUSTER (IPC) CONTROL MODULE

Not received data from meter.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

X: DTC U0164 LOST COMMUNICATION WITH HVAC CONTROL MODULE

No data is received from A/C control panel.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

Y: DTC U0327 SOFTWARE INCOMPATIBILITY WITH VEHICLE SECURITY CONTROL MODULE

No data is received from keyless access CM.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

Z: DTC U0401 INVALID DATA RECEIVED FROM ECM/PCM “A”

Received error data from ECM.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AA:DTC U0402 INVALID DATA RECEIVED FROM TCM

Received error data from TCM.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AB:DTC U0416 INVALID DATA RECEIVED FROM VEHICLE DYNAMICS CONTROL MODULE

Received error data from VDC.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AC:DTC U0417 INVALID DATA RECEIVED FROM PARK BRAKE CONTROL MODULE

Received error data from VDC.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AD:DTC U0423 INVALID DATA RECEIVED FROM INSTRUMENT PANEL CLUSTER CONTROL MODULE

Received error data from meter.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AE:DTC U0424 INVALID DATA RECEIVED FROM HVAC CONTROL MODULE

Received error data from A/C control panel.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

AF:DTC U0427 INVALID DATA RECEIVED FROM VEHICLE SECURITY CONTROL MODULE

Received error data from keyless access CM.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

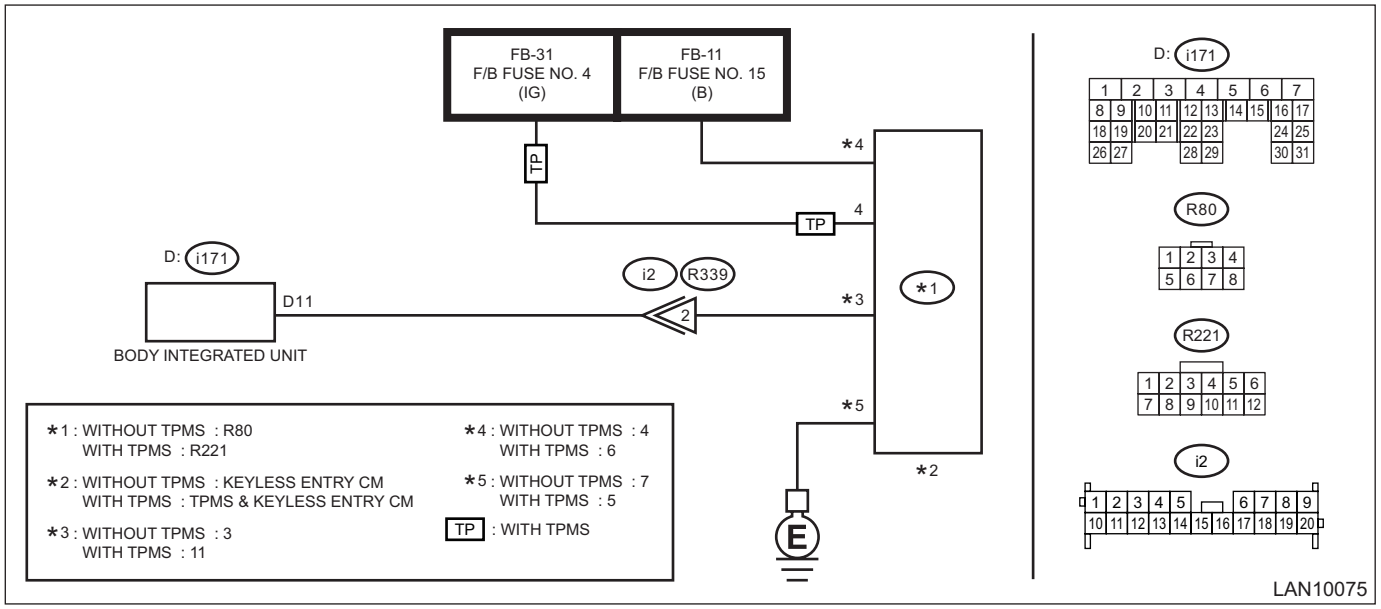
AG:DTC U123C LOST COMMUNICATION WITH HIGH BEAM ASSIST CONTROL MODULE

NOTE:
When the customize setting for the high beam assist is not the same as the actual setting on the vehicle, DTC is detected. <Ref. to BC(diag)-24, User Customizing.>

AH:DTC U1500 KEYLESS UART COM. MALFUNCTION

1. MODEL WITHOUT KEYLESS ACCESS WITH PUSH BUTTON START SYSTEM

DTC DETECTING CONDITION:



UART between the TPMS & keyless entry CM or keyless entry CM and the body integrated unit is open or shorted, or has communication failure.

TROUBLE SYMPTOM:

- Door lock does not operate with keyless.
- TPMS does not operate. (With the indicator blinking)

WIRING DIAGRAM:

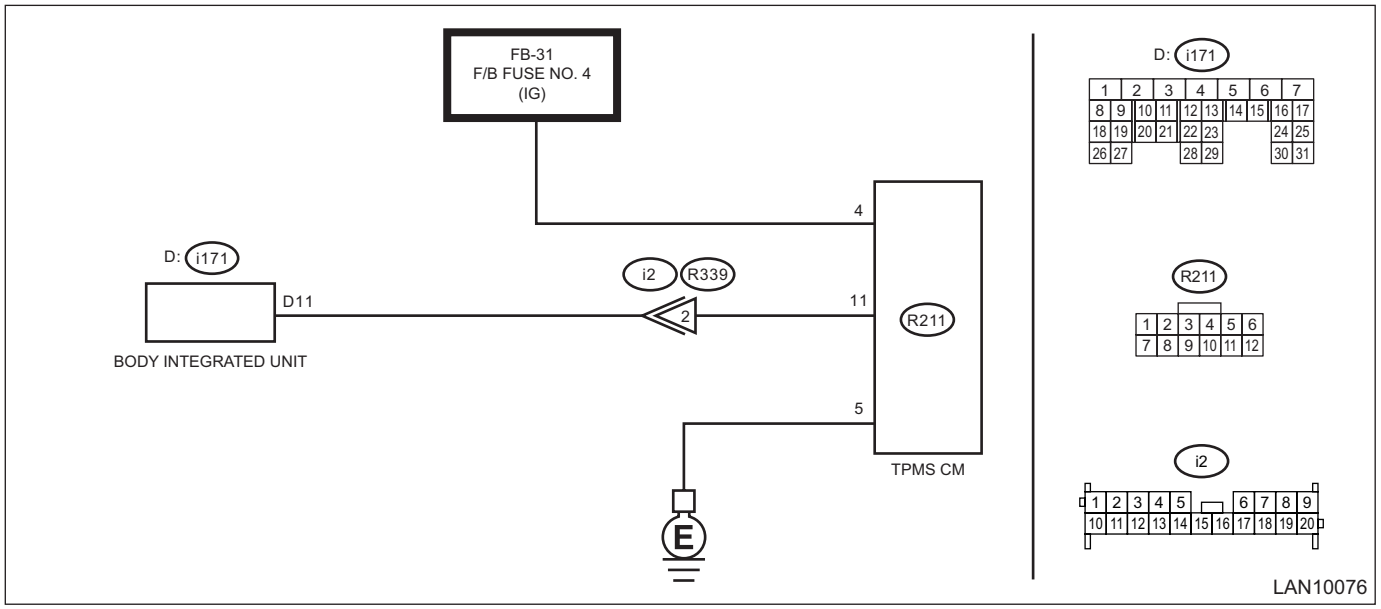
Keyless entry system <Ref. to WI-271, WIRING DIAGRAM, Keyless Entry System.>

Step		Check	Yes	No
1	**CHECK DTC.** 1) Insert the ignition key to the ignition key cylinder and remove. 2) Read the DTC of body integrated unit using Subaru Select Monitor. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC U1500 displayed? (Current malfunction)	Go to step **2**.	Go to step **7**.
2	**CHECK DTC.** 1) Turn the ignition switch to OFF. 2) Disconnect the body integrated unit and the TPMS & keyless entry CM or keyless entry CM connector. 3) Connect the disconnected connectors. 4) Insert the ignition key to the ignition key cylinder and remove. 5) Read the DTC of body integrated unit using Subaru Select Monitor. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC U1500 displayed? (Current malfunction)	Go to step **3**.	Go to step **7**.

	Step	Check	Yes	No
3	**CHECK HARNESS (OPEN CIRCUIT).** 1) Turn the ignition switch to OFF. 2) Disconnect the body integrated unit and the TPMS & keyless entry CM or keyless entry CM connector. 3) Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***With TPMS*** ***(i171) No. 11 — (R221) No. 11:*** ***Without TPMS*** ***(i171) No. 11 — (R80) No. 3:***	Is the resistance 10 Ω or less?	Go to step **4**.	Repair the open circuit of harness or replace harness.
4	**CHECK POWER SUPPLY CIRCUIT.** 1) Turn the ignition switch to ON. 2) Use a tester to measure the voltage between the terminals. ***Connector & terminal*** ***With TPMS*** ***(R221) No. 6 (+) — Chassis ground (–):*** ***(R221) No. 4 (+) — Chassis ground (–):*** ***Without TPMS*** ***(R80) No. 4 (+) — Chassis ground (–):***	Is the voltage 10 V or more?	Go to step **5**.	Repair the power supply circuit.
5	**CHECK HARNESS (OPEN CIRCUIT).** Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***With TPMS*** ***(R221) No. 5 — Chassis ground:*** ***Without TPMS*** ***(R80) No. 7 — Chassis ground:***	Is the resistance 10 Ω or less?	Go to step **6**.	Repair the ground circuit.
6	**CHECK CONTROL MODULE.** 1) Turn the ignition switch to OFF. 2) Remove the TPMS & keyless entry CM or the keyless entry CM. 3) Install a TPMS & keyless entry CM or keyless entry CM that was operating normally on another vehicle.	Does it operate with the remote control key of another vehicle?	Replace the TPMS & keyless entry CM or keyless entry CM. <Ref. to SL-78, REMOVAL, Keyless Entry Control Module.> <Ref. to WT-8, REMOVAL, Tire Pressure Monitoring System.>	Replace the body integrated unit. <Ref. to SL-81, Body Integrated Unit.>
7	**CHECK CONNECTOR.** Check the connector used for keyless communication for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC. <Ref. to BC(diag)-12, Clear Memory Mode.>

2. MODEL WITH KEYLESS ACCESS WITH PUSH BUTTON START SYSTEM

DTC DETECTING CONDITION:



UART between the TPMS CM and the body integrated unit is open or shorted, or has communication failure.

TROUBLE SYMPTOM:

TPMS does not operate. (With the indicator blinking)

WIRING DIAGRAM:

Tire Pressure Monitoring System <Ref. to WI-362, WIRING DIAGRAM, Tire Pressure Monitoring System.>

Step		Check	Yes	No
1	**CHECK DTC.** 1) With the access key in the vehicle, press the push button ignition switch twice without depressing the brake to turn the ignition switch to ON. 2) Read the DTC of body integrated unit using Subaru Select Monitor. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC U1500 displayed? (Current malfunction)	Go to step **2**.	Go to step **7**.
2	**CHECK DTC.** 1) Turn the ignition switch to OFF. 2) Disconnect the body integrated unit and the TPMS CM connector. 3) Connect the disconnected connectors. 4) With the access key in the vehicle, press the push button ignition switch twice without depressing the brake to turn the ignition switch to ON. 5) Read the DTC of body integrated unit using Subaru Select Monitor. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).>	Is DTC U1500 displayed? (Current malfunction)	Go to step **3**.	Go to step **7**.
3	**CHECK HARNESS (OPEN CIRCUIT).** 1) Turn the ignition switch to OFF. 2) Disconnect the body integrated unit and the TPMS CM connector. 3) Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(i171) No. 11 — (R211) No. 11:***	Is the resistance 10 Ω or less?	Go to step **4**.	Repair the open circuit of harness or replace harness.

	Step	Check	Yes	No
4	**CHECK POWER SUPPLY CIRCUIT.** 1) Turn the ignition switch to ON. 2) Use a tester to measure the voltage between the terminals. ***Connector & terminal*** ***(R211) No. 4 (+) — Chassis ground (–):***	Is the voltage 10 V or more?	Go to step **5**.	Repair the power supply circuit.
5	**CHECK HARNESS (OPEN CIRCUIT).** Using the tester, measure the resistance between terminals. ***Connector & terminal*** ***(R211) No. 5 — Chassis ground:***	Is the resistance 10 Ω or less?	Go to step **6**.	Repair the ground circuit.
6	**CHECK CURRENT DATA.** 1) Turn the ignition switch to OFF. 2) Remove the TPMS CM. 3) Install a TPMS CM that was operating normally on another vehicle. 4) Display the current data of TPMS using Subaru Select Monitor.	Is the current data of TPMS displayed?	Replace the TPMS CM. <Ref. to WT-9, TPMS CM, REMOVAL, Tire Pressure Monitoring System.>	Replace the body integrated unit. <Ref. to SL-81, Body Integrated Unit.>
7	**CHECK CONNECTOR.** Check the connector used for keyless communication for poor contact.	Is there poor contact of connector?	Repair the connector that has poor contact, or replace harness.	It is possible that temporary poor communication occurs. Delete the DTC. <Ref. to BC(diag)-12, Clear Memory Mode.>

AI: DTC U153D INVALID DATA RECEIVED FROM HIGH BEAM ASSIST CONTROL MODULE

NOTE:
When the customize setting for the high beam assist is not the same as the actual setting on the vehicle, DTC is detected. <Ref. to BC(diag)-24, User Customizing.>

15.General Diagnostic Table

A: INSPECTION

Read the DTC using Subaru Select Monitor. <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).> Or check the following data under the current data display screen. <Ref. to BC(diag)-17, Read Current Data.>

Item	Operation	Specifications		Note
		YES	NO	
Diagnostic Trouble Code	DTC is not displayed when inspecting all DTCs.	DTC is not displayed.	Perform the diagnosis for the displayed DTCs.	—
Clearance light (Low beam) (High beam)	Clearance light and low/high beams illuminate normally when the switch is operated. Indicator in the meter illuminates at the same time.	System is normal.	Check the lighting system, combination meter system and LAN system.	—
Auto light	When the area around the light control sensor is darkened after the ignition switch and the lighting switch (AUTO) are turned to ON, the clearance light and the low beam illuminate after 15 seconds. Indicator in the combination meter illuminates at the same time.	System is normal.	Check the lighting system, combination meter system and LAN system.	—
	When the ignition switch and the lighting switch (AUTO) are turned to ON after the area around the light control sensor is darkened, the clearance light and the low beam illuminate immediately. Indicator in the combination meter illuminates at the same time.			—
Fog light	Front and rear fog lights illuminate when the switch is operated. Indicator in the meter illuminates at the same time.	System is normal.	Check the lighting system, combination meter system and LAN system.	Rear fog light operates when “Rear fog light setting” of the body integrated unit is set to on.
Rear defogger	Rear defogger operates when the switch is operated. The indicator illuminates at the same time.	System is normal.	Check the rear window defogger system and A/C system.	—
Wiper deicer	Wiper deicer operates by operating the switch. The indicator illuminates at the same time. When the ambient temperature is 5°C (41°F) or higher, press the switch 3 seconds or more to forcibly activate the system.	System is normal.	Check the wiper deicer system and A/C system.	Wiper deicer operates when “Wiper deicer setting” of the body integrated unit is set to on.
DRL	After starting the engine and releasing the parking brake, the DRL illuminates.	System is normal.	Check the lighting system and LAN system.	—
Rear wiper	Rear wiper operates when the switch is operated.	System is normal.	Check wiper or washer system.	Depending on user customizing “Sedan/Wagon Setting” of the body integrated unit, vehicle sensory time varies.
Key interlock	• Key cannot be removed in other than P range. • Key can be removed in other than P range.	System is normal.	Check the body control system.	—

Item	Operation	Specifications		Note
		YES	NO	
Shift lock	The select lever can be moved from the P range to other ranges only when the brake pedal is depressed with IG ON.	System is normal.	Check the body control system.	—
Key warning switch alarm	When the driver's door is open without the key removed, the buzzer sounds.	System is normal.	Check the combination meter and body control system.	—
Door lock	The doors lock/unlock when the door switch is operated. Rear gate/ trunk opens when the rear gate/ trunk release switch is operated.	System is normal.	Check the security & lock and body control system.	If user customizing "Sedan/Wagon Setting" is different, trunk and rear gate do not open.
Keyless entry	The lock locks/unlocks when the keyless transmitter is operated. Trunk/rear gate unlocks when trunk/ rear gate unlock button is operated.	System is normal.	Check the keyless entry and body control system.	—
Keyless access with push button start system	The lock locks/unlocks when the access key is operated. With the access key held, the touch sensor (lock) operation locks/touch sensor (unlock) operation unlocks. Rear gate unlocks by operating the rear gate unlock button.	System is normal.	Check the keyless access with push button start system and the body control system.	—
Answer back	Answer-back operates when the keyless entry / keyless access with push button start system locks/ unlocks.	System is normal.	Check the security & lock, keyless access with push button start system, and LAN system.	—
Room light	Turns ON/OFF according to the door open/close operation, the lock/ unlock operation with the keyless entry/keyless access with push button start system, and the ignition operation.	System is normal.	Check the room light system, security & lock, keyless access with push button start system, and LAN system.	For vehicle with the keyless access with push button start system, the room light blinks when "Factory mode" is selected. For vehicles with the keyless entry, the room light blinks when the keyless registration mode connector is connected.
Map light	Turns ON/OFF according to the door open/close operation, the lock/ unlock operation with the keyless entry/keyless access with push button start system, and the ignition operation. (Except for rear gate)	System is normal.	Check the spot map light, security & lock, keyless access with push button start system, and LAN system.	For vehicle with the keyless access with push button start system, the map light blinks when "Factory mode" is selected. For vehicles with the keyless entry, the map light blinks when the keyless registration mode connector is connected.
Key illumination	The light illuminates/goes off according to the driver's door open/ close. The light goes off, when the doors are locked with the keyless entry/ keyless access with push button start system and the ignition is turned ON while illuminating.	System is normal.	Check the ignition switch illumination, security & lock, and LAN system.	For vehicles with keyless entry, the key illumination blinks when "Factory" mode is selected.

Item	Operation	Specifications		Note
		YES	NO	
Illumination control	Illumination volume control is available.	System is normal.	Check the illumination control switch, combination meter, and body control system.	Illumination volume control is not available when user customizing “Illumination Control On/Off” of the body integrated unit is set to off.
Engine start	Engine starts.	System is normal.	Check the engine system, immobilizer, and LAN system.	—
Vehicle security	Security monitoring/security canceling can be performed by operating the keyless entry/keyless access with push button start system.	System is normal.	Check the security & lock, keyless access with push button start system, and LAN system.	Security monitoring starts and at the same time the warning buzzer sounds, when impact sensor is not connected and user customizing “Impact Sensor” of the body integrated unit is set to on.
Welcome lighting (enter)	When dimming out around the light control sensor after turning the lighting switch (AUTO) to ON, use keyless transmitter or access key to unlock. At this time, the clearance light and headlight low beam illuminates for the preset time. And, use keyless transmitter or access key to lock. At this time, the clearance light and headlight low beam go off.	System is normal.	Check the lighting system (auto light), security & lock (keyless entry) or keyless access with push button start system.	Operates when user customization item “Illumination Sensor Setting” in body integrated unit is set to ON and “Welcome Light Off Delay Time(Approaching)” is set to other than OFF.
Welcome lighting (exit)	The clearance light and headlight low beam continues to illuminate, when the ignition switch is OFF (or when the key is removed for vehicles without keyless access with push button start system) while the auto light function is operating. Use keyless transmitter or access key to lock two consecutive times. At this time, the clearance light and headlight low beam go off.	System is normal.	Check the lighting system (auto light), security & lock (keyless entry) or keyless access with push button start system.	Operates when user customization item “Illumination Sensor Setting” in body integrated unit is set to ON and “Welcome Light Off Delay Time(Exiting)” is set to other than OFF.

TELEMATICS SYSTEM (DIAGNOSTICS)

TEL(diag)

1.	Basic Diagnostic Procedure	2
2.	Check List for Interview	3
3.	General Description	5
4.	Electrical Component Location	6
5.	Control Module I/O Signal	8
6.	Subaru Select Monitor	10
7.	Read Current Data	13
8.	Diagnostic Code(s) Display	16
9.	Clear Memory Mode	18
10.	Inspection Mode	19
11.	System Operation Check Mode	22
12.	Diagnostic Procedure with Diagnostic Trouble Code (DTC)	23
13.	Diagnostics with Phenomenon	53

1. Basic Diagnostic Procedure

A: PROCEDURE

	Step	Check	Yes	No
1	**PERFORM CUSTOMER INTERVIEW.** Using the Check List for Interview, ask the customer the condition of how the trouble occurred. <Ref. to TEL(diag)-3, CHECK, Check List for Interview.>	Did you interview the customer?	Go to step **2**.	Interview the customer. <Ref. to TEL(diag)-3, CHECK, Check List for Interview.>
2	**CHECK SUBARU SELECT MONITOR COMMUNICATION.** Using the Subaru Select Monitor, check whether communication to the telematics system can be executed. NOTE: If the communication function of the Subaru Select Monitor cannot be executed properly, check the communication circuit. (Refer to "Communication for initializing impossible".) <Ref. to TEL(diag)-11, INSPECTION, Subaru Select Monitor.>	Is communication possible?	Go to step **3**.	Check the communication circuit.
3	**CHECK TELEMATICS.** Using the Subaru Select Monitor, read DTC of the telematics system. <Ref. to TEL(diag)-16, OPERATION, Diagnostic Code(s) Display.> NOTE: If DTC is detected, only RED LED will illuminate. For details, refer to "LED operation status list". <Ref. to TEL(diag)-4, LED ILLUMINATION STATUS LIST, CHECK, Check List for Interview.>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs. <Ref. to TEL(diag)-16, LIST, Diagnostic Code(s) Display.>	Go to step **4**.
4	**CHECK DIAGNOSTICS WITH PHENOMENON.** Check the list of Diagnostics with Phenomenon. <Ref. to TEL(diag)-53, Diagnostics with Phenomenon.>	Does the symptom apply?	Perform diagnosis according to the procedures in the diagnostics with phenomenon.	Go to step **5**.
5	**CHECK TROUBLE PHENOMENON.** 1) Perform the basic inspection and function check. <Ref. to TEL(diag)-5, INSPECTION, General Description.> 2) Check the data communication module. <Ref. to TEL(diag)-8, Control Module I/O Signal.> 3) Perform check of current data. <Ref. to TEL(diag)-13, Read Current Data.> 4) Perform a unit check.	Was the trouble cause found?	Perform the Clear Memory after repairing or replacing the cause of trouble. <Ref. to TEL(diag)-18, Clear Memory Mode.>	System is normal.

2. Check List for Interview

A: CHECK

1. CHECK LIST FOR INTERVIEW

- Inspect the following items regarding the vehicle's state.
- Print out this page for interviewing customers.

<table>
<tr><td colspan="2">Telematics Check List for Interview</td><td colspan="3">Received Year Month Date</td></tr>
<tr><td colspan="2" rowspan="2">Customer's name</td><td colspan="3">Registration No. Initial year of registration
Year Month Date</td></tr>
<tr><td colspan="3">Vehicle model Frame number</td></tr>
<tr><td colspan="2">Interviewer
( )</td><td>Inspector
( )</td><td>Engine type
( )</td><td>Odometer reading
( )</td></tr>
<tr><td colspan="5">Customer specified content
•

Diagnostic code	

2. LED ILLUMINATION STATUS LIST

LED	Light OFF	Blink	Light ON
RED	Communication with the server and DCM are operating normally (communication failure with the STAR-LINK server. DTCs are not found within the vehicle unit.)	It is possible that communication with the server/DCM are malfunctioning.	It is possible that communication with the server/DCM are malfunctioning.
GREEN	—	Connection to the server is being attempted and in progress.	Communication status with the server is READY.
RED and GREEN	Telematics function is not activated.	Collation with the server is in progress.	Collation with the server failed. It is possible that the server/DCM are malfunctioning.

3. General Description

A: CAUTION

1. AIRBAG SYSTEM

CAUTION:
- **Do not use the electrical test equipment on all airbag harnesses and connector circuits.**
- **Be careful not to damage the airbag harness.**

B: INSPECTION

1. BASIC INSPECTION

Before performing the diagnosis, check the following items which may affect the problems relating to the telematics system.
1) Check the battery. <Ref. to SC(w/o STI)-51, INSPECTION, Battery.> <Ref. to SC(STI)-24, INSPECTION, Battery.>
2) Check the relay and fuse condition. <Ref. to ET-10, Relay and Fuse.>
3) Check the connecting condition of harness and harness connector.

C: PREPARATION TOOL

1. SPECIAL TOOL

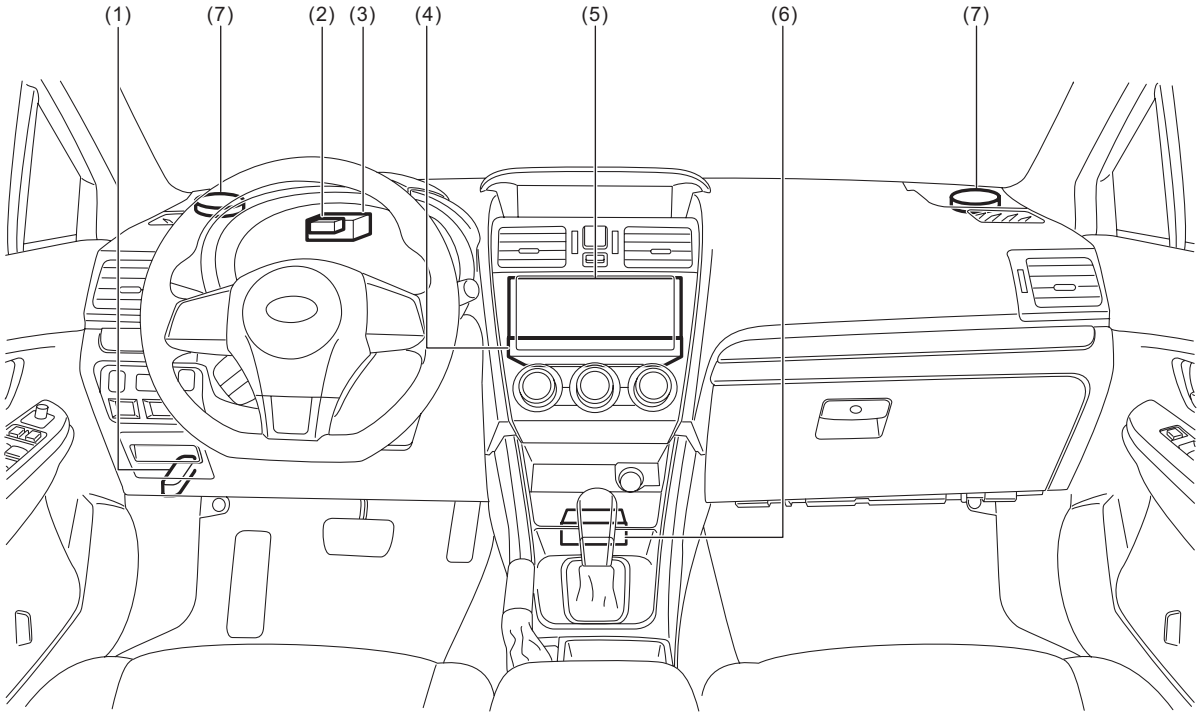

ILLUSTRATION	TOOL NUMBER	DESCRIPTION	REMARKS
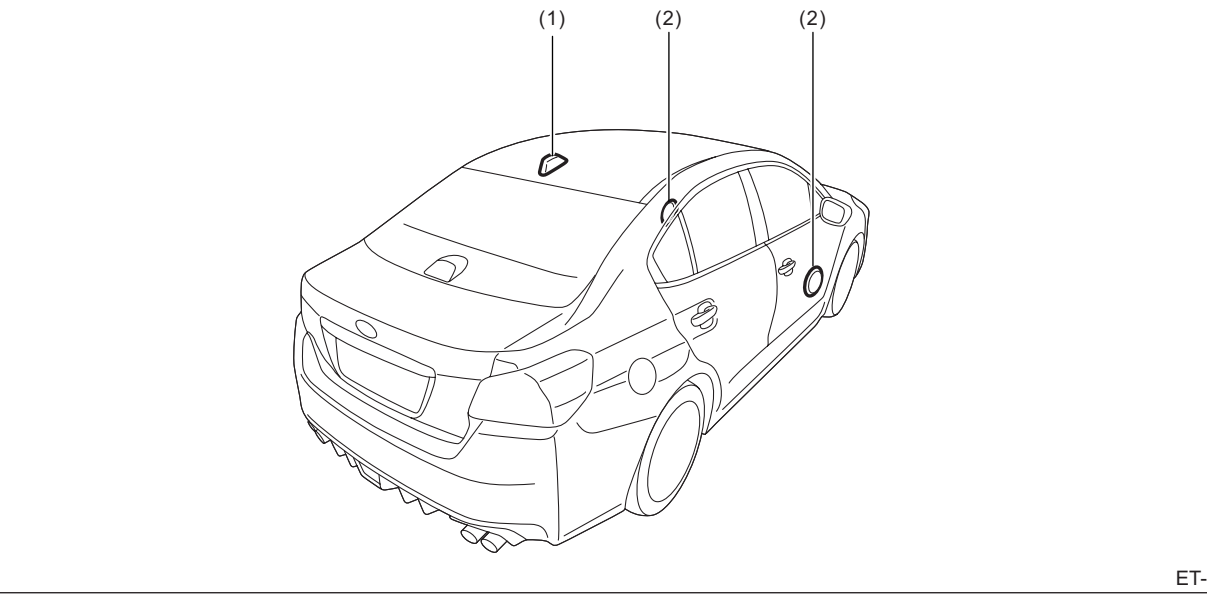
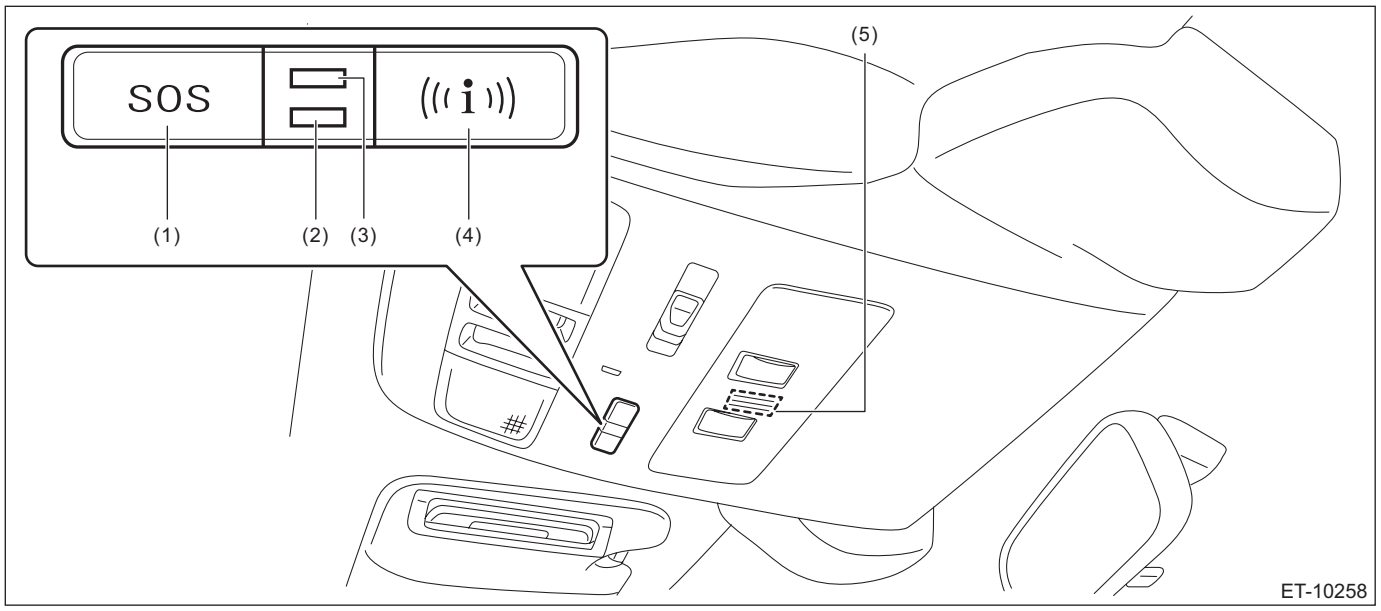
 STSSM4	—	SUBARU SELECT MONITOR 4	Used for setting of each function and trouble-shooting for electrical system. NOTE: For detailed operation procedures of Subaru Select Monitor 4, refer to “Application help”.

2. GENERAL TOOL



TOOL NAME	REMARKS
Circuit tester	Used for measuring resistance, voltage and current.
DST-i	Used together with Subaru Select Monitor 4.

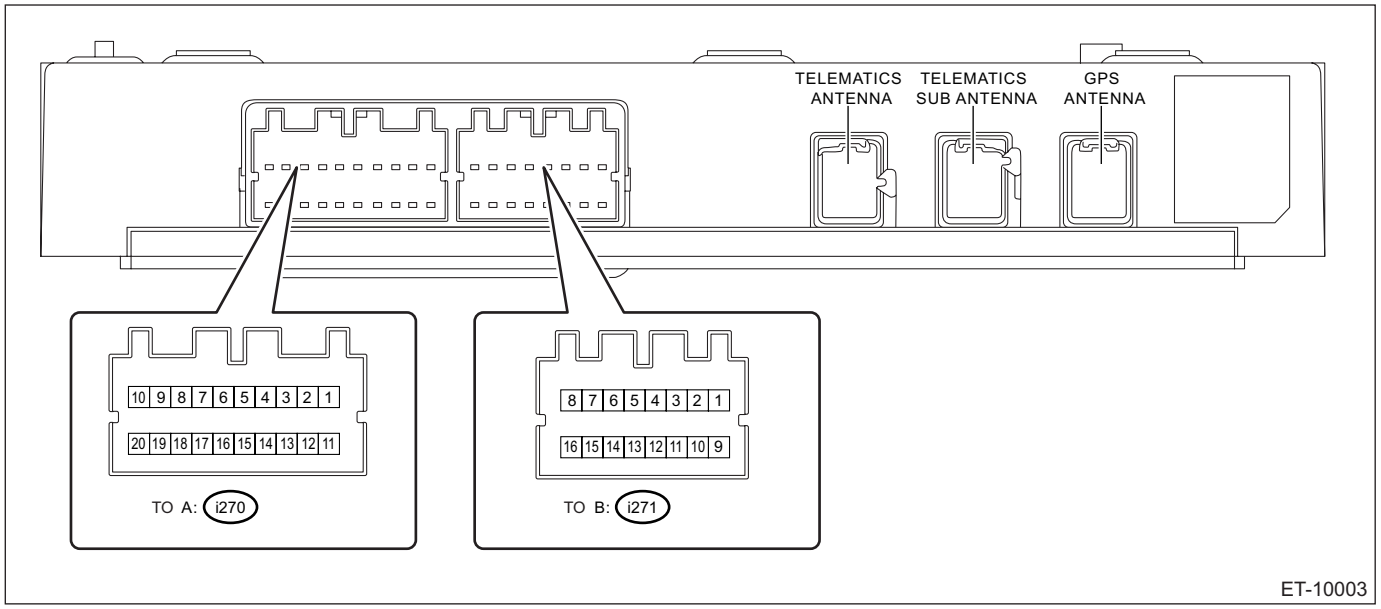
4. Electrical Component Location



A: LOCATION

(1) Data link connector
(2) GPS antenna
(3) Telematics sub antenna
(4) Data communication module (DCM)
(5) Audio or navigation
(6) Airbag CM
(7) Instrument panel speaker (standard and H/K specifications)

(1) Telematics antenna
(2) Door speaker (standard specification)



(1) SOS button
(2) RED LED
(3) GREEN LED
(4) i-button
(5) Microphone

NOTE:
For the LED operation condition, refer to "LED operation condition" in "Check List for Interview". <Ref. to TEL(diag)-4, LED ILLUMINATION STATUS LIST, CHECK, Check List for Interview.>

5. Control Module I/O Signal

B: WIRING DIAGRAM

Refer to “TELEMATICS SYSTEM” in the wiring diagram. <Ref. to WI-356, WIRING DIAGRAM, Telematics System.>

C: SYSTEM BLOCK DIAGRAM

Main signals used between DCM and relevant CM

6. Subaru Select Monitor

A: OPERATION

- For detailed operation procedures, refer to “Application help”.
- When DCM cannot establish communication with Subaru Select Monitor, perform “COMMUNICATION FOR INITIALIZING IMPOSSIBLE”. <Ref. to TEL(diag)-11, INSPECTION, Subaru Select Monitor.>

B: INSPECTION

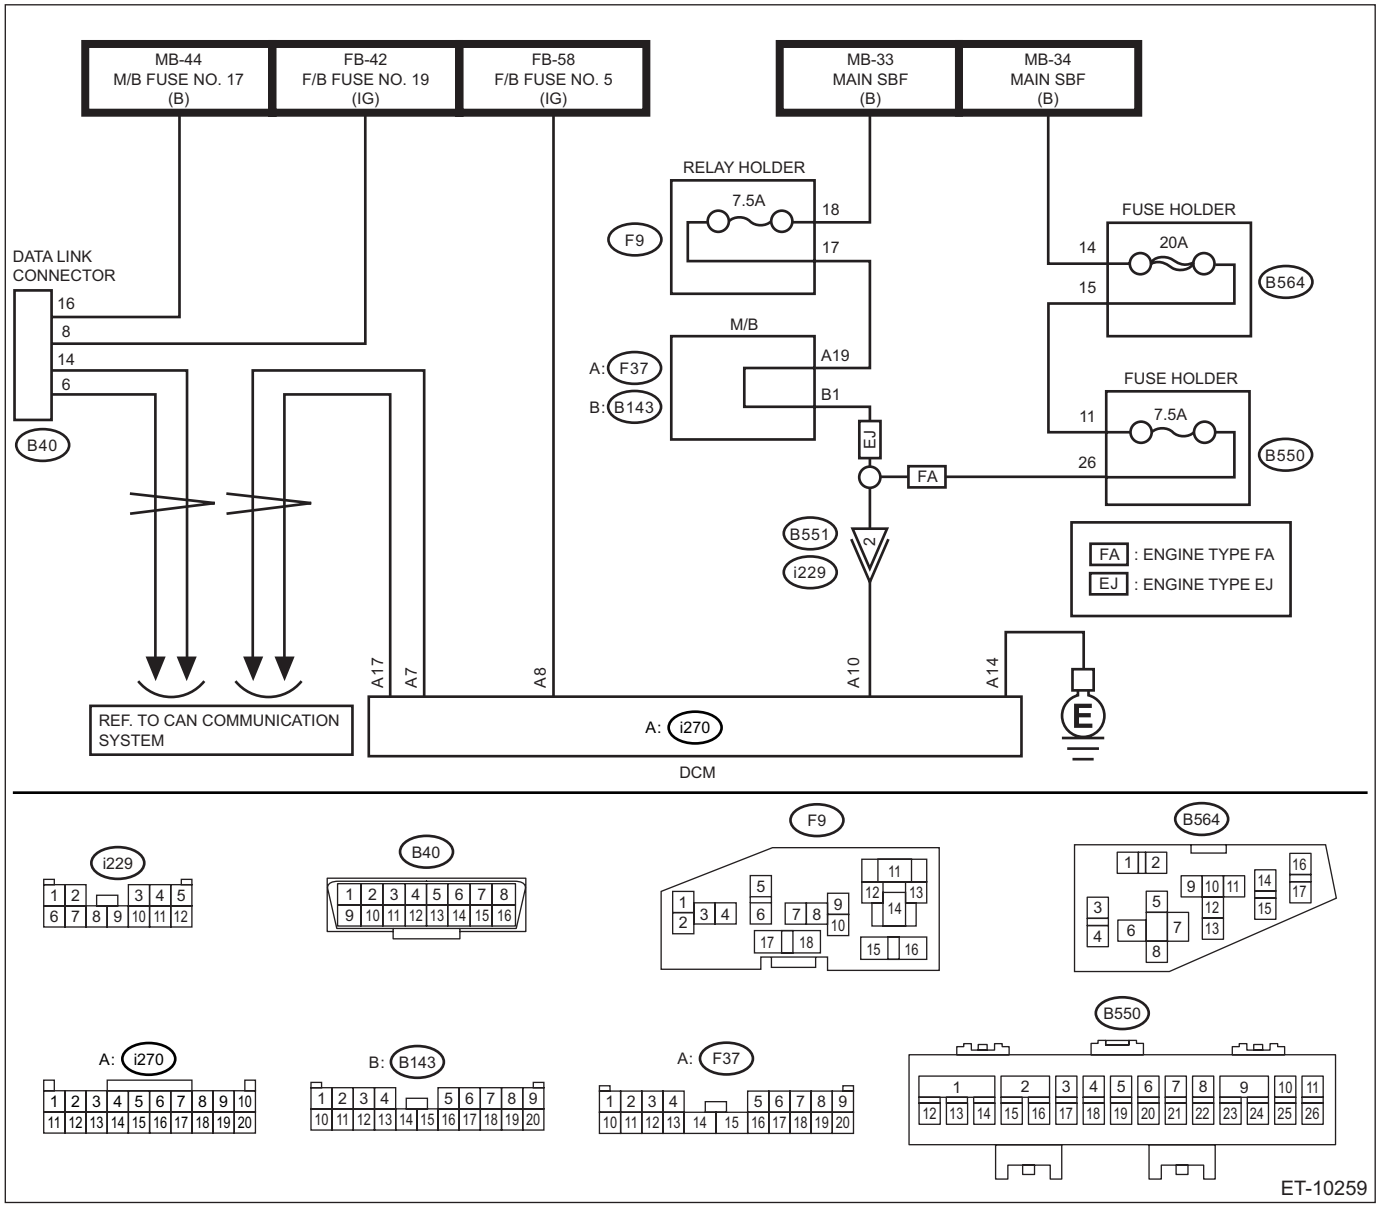
1. COMMUNICATION FOR INITIALIZING IMPOSSIBLE

When communication with DCM is impossible

DETECTING CONDITION:

- Defective harness connector
- Power supply circuit malfunction
- Defective DCM
- Defective CAN communication circuit
- Defective Subaru Select Monitor

TROUBLE SYMPTOM:



Communication is impossible between DCM and Subaru Select Monitor.

CAUTION:

CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

WIRING DIAGRAM:

Telematics <Ref. to WI-356, WIRING DIAGRAM, Telematics System.>

	Step	Check	Yes	No
1	**CHECK FUSE.** 1) Turn the ignition switch to OFF. 2) Check the fuse of the DCM.	Is the check result OK?	Go to step **2**.	Replace the fuse. If the replaced fuse blows out easily, repair the ground short circuit in harness between the fuse — DCM connector.
2	**CHECK HARNESS (OPEN CIRCUIT).** 1) Disconnect the DCM connector. 2) Turn the ignition switch to ON. 3) Using a tester, measure the voltage between DCM connector (harness side) and the chassis ground. ***Connector & terminal*** ***(i270) No. 8 (+) — Chassis ground (–):*** ***(i270) No. 10 (+) — Chassis ground (–):***	Is the voltage 10 V or more?	Go to step **3**.	Repair the open circuit in the wiring harness between fuse and DCM connector.
3	**CHECK HARNESS (OPEN CIRCUIT).** 1) Turn the ignition switch to OFF. 2) Using a tester, measure the resistance between DCM connector (harness side) and the chassis ground. ***Connector & terminal*** ***(i270) No. 14 — Chassis ground:***	Is the resistance 1 Ω or less?	Go to step **4**.	Repair the open circuit in the wiring harness between fuse and DCM connector.
4	**CHECK LAN SYSTEM.** Inspect LAN system. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Is the check result OK?	Go to step **5**.	Perform the inspection according to the diagnosis for LAN system.
5	**CHECK TELEMATICS.** Using the Subaru Select Monitor, communicate with the telematics system.	Is communication possible?	The circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>

7. Read Current Data

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Telematics» and then select «Enter».
5) On «Select Function» display, select «Data Monitor».

NOTE:
For detailed operation procedures, refer to “Application help”.

B: LIST

Display	Contents	Reference value	Unit

8. Diagnostic Code(s) Display

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Telematics» and then select «Enter».
5) On «Select Function» display, select «DTC».

NOTE:
- For detailed operation procedures, refer to “Application help”.
- For details concerning DTC, refer to the List of Diagnostic Trouble Codes (DTC). <Ref. to TEL(diag)-16, LIST, Diagnostic Code(s) Display.>

B: LIST

DTC	Item	Note
U0073	CONTROL MODULE COMMUNICATION BUS OFF	<Ref. to TEL(diag)-23, DTC U0073 CONTROL MODULE COMMUNICATION BUS OFF, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0100	LOST COMMUNICATION WITH ECM/PCM “A”	<Ref. to TEL(diag)-23, DTC U0100 LOST COMMUNICATION WITH ECM/PCM “A”, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

B2A0E	MUTE LINE CIRCUIT	<Ref. to TEL(diag)-49, DTC B2A0E MUTE LINE CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2A0F	BACKUP BATTERY DEGRADATION	<Ref. to TEL(diag)-51, DTC B2A0F BACKUP BATTERY DEGRADATION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2A10	BATTERY VOLTAGE HIGH	<Ref. to TEL(diag)-52, DTC B2A10 BATTERY VOLTAGE HIGH, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

9. Clear Memory Mode

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Telematics» and then select «Enter».
5) On «Select Function» display, select «DTC».
6) On «DTC» display, select «Clear Memory».

NOTE:
For detailed operation procedures, refer to “Application help”.

10.Inspection Mode

A: PROCEDURE

It is possible to diagnose the DTC by performing the indicated inspection mode.
After correcting the DTC, perform a necessary inspection mode and make sure that the function is resumed correctly and the DTC is recorded.

1. INSPECTION MODE 1

DTC	Item	Note
U0073	CONTROL MODULE COMMUNICATION BUS OFF	<Ref. to TEL(diag)-23, DTC U0073 CONTROL MODULE COMMUNICATION BUS OFF, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0100	LOST COMMUNICATION WITH ECM/PCM “A”	<Ref. to TEL(diag)-23, DTC U0100 LOST COMMUNICATION WITH ECM/PCM “A”, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0122	LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE	<Ref. to TEL(diag)-23, DTC U0122 LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0140	LOST COMMUNICATION WITH BODY CONTROL MODULE	<Ref. to TEL(diag)-23, DTC U0140 LOST COMMUNICATION WITH BODY CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0151	LOST COMMUNICATION WITH RESTRAINTS CONTROL MODULE	<Ref. to TEL(diag)-23, DTC U0151 LOST COMMUNICATION WITH RESTRAINTS CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0155	LOST COMMUNICATION WITH INSTRUMENT PANEL CLUSTER (IPC) CONTROL MODULE	<Ref. to TEL(diag)-23, DTC U0155 LOST COMMUNICATION WITH INSTRUMENT PANEL CLUSTER (IPC) CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0401	INVALID DATA RECEIVED FROM ECM/PCM “A”	<Ref. to TEL(diag)-23, DTC U0401 INVALID DATA RECEIVED FROM ECM/PCM “A”, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0416	INVALID DATA RECEIVED FROM VEHICLE DYNAMICS CONTROL MODULE	<Ref. to TEL(diag)-23, DTC U0416 INVALID DATA RECEIVED FROM VEHICLE DYNAMICS CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
U0452	INVALID DATA RECEIVED FROM RESTRAINTS CONTROL MODULE	<Ref. to TEL(diag)-23, DTC U0452 INVALID DATA RECEIVED FROM RESTRAINTS CONTROL MODULE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2A00	VIN READING	<Ref. to TEL(diag)-24, DTC B2A00 VIN READING, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2A01	LTE1 ANTENNA CIRCUIT	<Ref. to TEL(diag)-25, DTC B2A01 LTE1 ANTENNA CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2A02	LTE2 ANTENNA CIRCUIT	<Ref. to TEL(diag)-27, DTC B2A02 LTE2 ANTENNA CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2A03	GPS ANTENNA CIRCUIT	<Ref. to TEL(diag)-28, DTC B2A03 GPS ANTENNA CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2A07	BACKUP BATTERY CHARGE SYSTEM PERFORMANCE	<Ref. to TEL(diag)-37, DTC B2A07 BACKUP BATTERY CHARGE SYSTEM PERFORMANCE, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

DTC	Item	Note
B2A08	SOS BUTTON CIRCUIT	<Ref. to TEL(diag)-38, DTC B2A08 SOS BUTTON CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2A09	I-CALL BUTTON CIRCUIT	<Ref. to TEL(diag)-40, DTC B2A09 I-CALL BUTTON CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2A0C	DCM INTERNAL FAULT	<Ref. to TEL(diag)-46, DTC B2A0C DCM INTERNAL FAULT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2A0D	AIRBAG SIGNAL	<Ref. to TEL(diag)-47, DTC B2A0D AIRBAG SIGNAL, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2A0E	MUTE LINE CIRCUIT	<Ref. to TEL(diag)-49, DTC B2A0E MUTE LINE CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2A0F	BACKUP BATTERY DEGRADATION	<Ref. to TEL(diag)-51, DTC B2A0F BACKUP BATTERY DEGRADATION, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2A10	BATTERY VOLTAGE HIGH	<Ref. to TEL(diag)-52, DTC B2A10 BATTERY VOLTAGE HIGH, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

Inspection steps:
1) Perform the Clear Memory Mode. <Ref. to TEL(diag)-18, Clear Memory Mode.>
2) Read the DTC and check that the DTC is not displayed. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs. After solving the DTC, repeat from step 1).
3) Turn the ignition switch to OFF.
4) Turn the ignition switch to ON, and wait for 5 seconds or more.
5) Read the DTC and check that the DTC is not displayed.

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs.

2. INSPECTION MODE 2

DTC	Item	Note
B2A04	MIC CIRCUIT	<Ref. to TEL(diag)-29, DTC B2A04 MIC CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2A05	LEFT SPEAKER/AUDIO CIRCUIT	<Ref. to TEL(diag)-31, DTC B2A05 LEFT SPEAKER/AUDIO CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2A06	RIGHT SPEAKER/AUDIO CIRCUIT	<Ref. to TEL(diag)-34, DTC B2A06 RIGHT SPEAKER/AUDIO CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2A0A	RED LED CIRCUIT	<Ref. to TEL(diag)-42, DTC B2A0A RED LED CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>
B2A0B	GREEN LED CIRCUIT	<Ref. to TEL(diag)-44, DTC B2A0B GREEN LED CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

Inspection steps:
1) Perform the Clear Memory Mode. <Ref. to TEL(diag)-18, Clear Memory Mode.>
2) Read the DTC and check that the DTC is not displayed. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs. After solving the DTC, repeat from step 1).
3) Turn the ignition switch to OFF.
4) Close all doors. (The vehicle enters CAN sleep state.)
5) Wait for approx. 1 minute. After the indicator goes off, wait for another 1 minute. (DCM standby mode)
6) Turn the ignition switch to ON, and wait for 5 seconds or more.
7) Read the DTC and check that the DTC is not displayed.

NOTE:
If the DTC is displayed on the screen, the trouble is still present. Perform the diagnosis for the displayed DTCs.

11.System Operation Check Mode

A: OPERATION

1) On «Start» display, select «Diagnosis».
2) On «Vehicle selection» display, input the target vehicle information and select «Confirmed».
3) On «Main Menu» display, select «Each System».
4) On «Select System» display, select «Telematics» and then select «Enter».
5) On «Select Function» display, select «Active Test».

NOTE:
For detailed operation procedures, refer to “Application help”.

B: LIST

System operation check mode	Note
GREEN LED Lighting	GREEN LED illuminates/flashes/goes off.
GREEN LED Flashing	
GREEN LED OFF	
RED LED Lighting	RED LED illuminates/flashes/goes off.
RED LED Flashing	
RED LED OFF	
Speaker ON	Outputs to speaker.

12.Diagnostic Procedure with Diagnostic Trouble Code (DTC)

A: DTC U0073 CONTROL MODULE COMMUNICATION BUS OFF

Detected when CAN line abnormality is detected.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

B: DTC U0100 LOST COMMUNICATION WITH ECM/PCM “A”

Detected when CAN data from ECM does not arrive.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

C: DTC U0122 LOST COMMUNICATION WITH VEHICLE DYNAMICS CONTROL MODULE

Detected when CAN data from VDC does not arrive.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

D: DTC U0140 LOST COMMUNICATION WITH BODY CONTROL MODULE

Detected when CAN data is not received from body integrated unit.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

E: DTC U0151 LOST COMMUNICATION WITH RESTRAINTS CONTROL MODULE

Detected when CAN data is not received from airbag CM.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

F: DTC U0155 LOST COMMUNICATION WITH INSTRUMENT PANEL CLUSTER (IPC) CONTROL MODULE

Detected when CAN data from combination meter does not arrive.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

G: DTC U0401 INVALID DATA RECEIVED FROM ECM/PCM “A”

Detected when CAN data from ECM is abnormal.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

H: DTC U0416 INVALID DATA RECEIVED FROM VEHICLE DYNAMICS CONTROL MODULE

This is detected when CAN data from VDC is abnormal.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

I: DTC U0452 INVALID DATA RECEIVED FROM RESTRAINTS CONTROL MODULE

Detected when CAN data from airbag CM is abnormal.

NOTE:
Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, PROCEDURE, Basic Diagnostic Procedure.>

J: DTC B2A00 VIN READING

DIAGNOSIS START CONDITION:
When ignition switch is ON.
DTC DETECTING CONDITION:
When ignition switch is ON, VIN information (CAN) sent from ECM cannot be read.
TROUBLE SYMPTOM:
- Telematics function cannot be used.
- RED LED illuminates.

CAUTION:
CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC B2A00 displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**CHECK DTC.** Check DTCs in the following systems. • Telematics <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.> • Engine <Ref. to EN(w/o STI)(diag)-63, Read Diagnostic Trouble Code (DTC).> <Ref. to EN(STI)(diag)-47, Read Diagnostic Trouble Code (DTC).>	Is DTC U**** displayed? (Current malfunction)	Perform the diagnosis for LAN system. <Ref. to LAN(diag)-2, Basic Diagnostic Procedure.>	Go to step **3**.
3	**CHECK CURRENT DATA.** Confirm VIN information from the engine OBD mode. <Ref. to EN(w/o STI)(diag)-41, General Scan Tool.> <Ref. to EN(STI)(diag)-31, General Scan Tool.>	Is VIN information displayed?	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>	Replace the ECM. <Ref. to FU(w/o STI)-124, Engine Control Module (ECM).> <Ref. to FU(STI)-56, Engine Control Module (ECM).>

K: DTC B2A01 LTE1 ANTENNA CIRCUIT

DIAGNOSIS START CONDITION:
When ignition switch is ON.
DTC DETECTING CONDITION:
Any of the followings continues for 5 seconds or more.
- LTE1 impedance is more than 1 MΩ. (Detached antenna, etc.)
- LTE1 impedance is less than 1 kΩ. (Short-circuited antenna, etc.)

TROUBLE SYMPTOM:
- Telematics function cannot be used.
- RED LED illuminates.

WIRING DIAGRAM:
Telematics <Ref. to WI-356, WIRING DIAGRAM, Telematics System.>

CAUTION:
CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC B2A01 displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

	Step	Check	Yes	No
2	**CHECK HARNESS (OPEN CIRCUIT).** 1) Turn the ignition switch to OFF. 2) Disconnect the antenna connector. 3) Disconnect the DCM connector. 4) Disconnect the PRG DU connector. 5) Measure the resistance between antenna connector and DCM connector. ***Connector & terminal*** ***(AN41) No. 1 — (AN24) No. 1:***	Is the resistance less than 1 Ω?	Go to step **3**.	Repair or replace the open circuit of harness.
3	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Measure the resistance between DCM connector and chassis ground. ***Connector & terminal*** ***(AN41) No. 1 — Chassis ground:***	Is the resistance 1 MΩ or more?	Go to step **4**.	Repair or replace the short circuit of the harness.
4	**CHECK HARNESS (SHORT CIRCUIT TO POWER SUPPLY).** 1) Turn the ignition switch to ON. 2) Measure the voltage between DCM connector and chassis ground. ***Connector & terminal*** ***(AN41) No. 1 (+) — Chassis ground (–):***	Is the voltage less than 1 V?	Go to step **5**.	Repair or replace the short circuit of the harness.
5	**CHECK ANTENNA.** Check the telematics antenna. <Ref. to ET-43, Antenna.>	Is the check result OK?	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>	Replace the telematics antenna. <Ref. to ET-43, Antenna.>

L: DTC B2A02 LTE2 ANTENNA CIRCUIT

DIAGNOSIS START CONDITION:
When ignition switch is ON.
DTC DETECTING CONDITION:
Any of the followings continues for 5 seconds or more.
- LTE2 impedance is more than 1 MΩ. (Detached antenna, etc.)
- LTE2 impedance is less than 1 kΩ. (Short-circuited antenna, etc.)

TROUBLE SYMPTOM:
- Telematics function cannot be used.
- RED LED illuminates.

CAUTION:
CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC B2A02 displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**CHECK ANTENNA.** Visually check the telematics sub antenna. <Ref. to ET-43, Antenna.>	Is the check result OK?	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>	Replace the telematics sub antenna. <Ref. to ET-43, Antenna.>

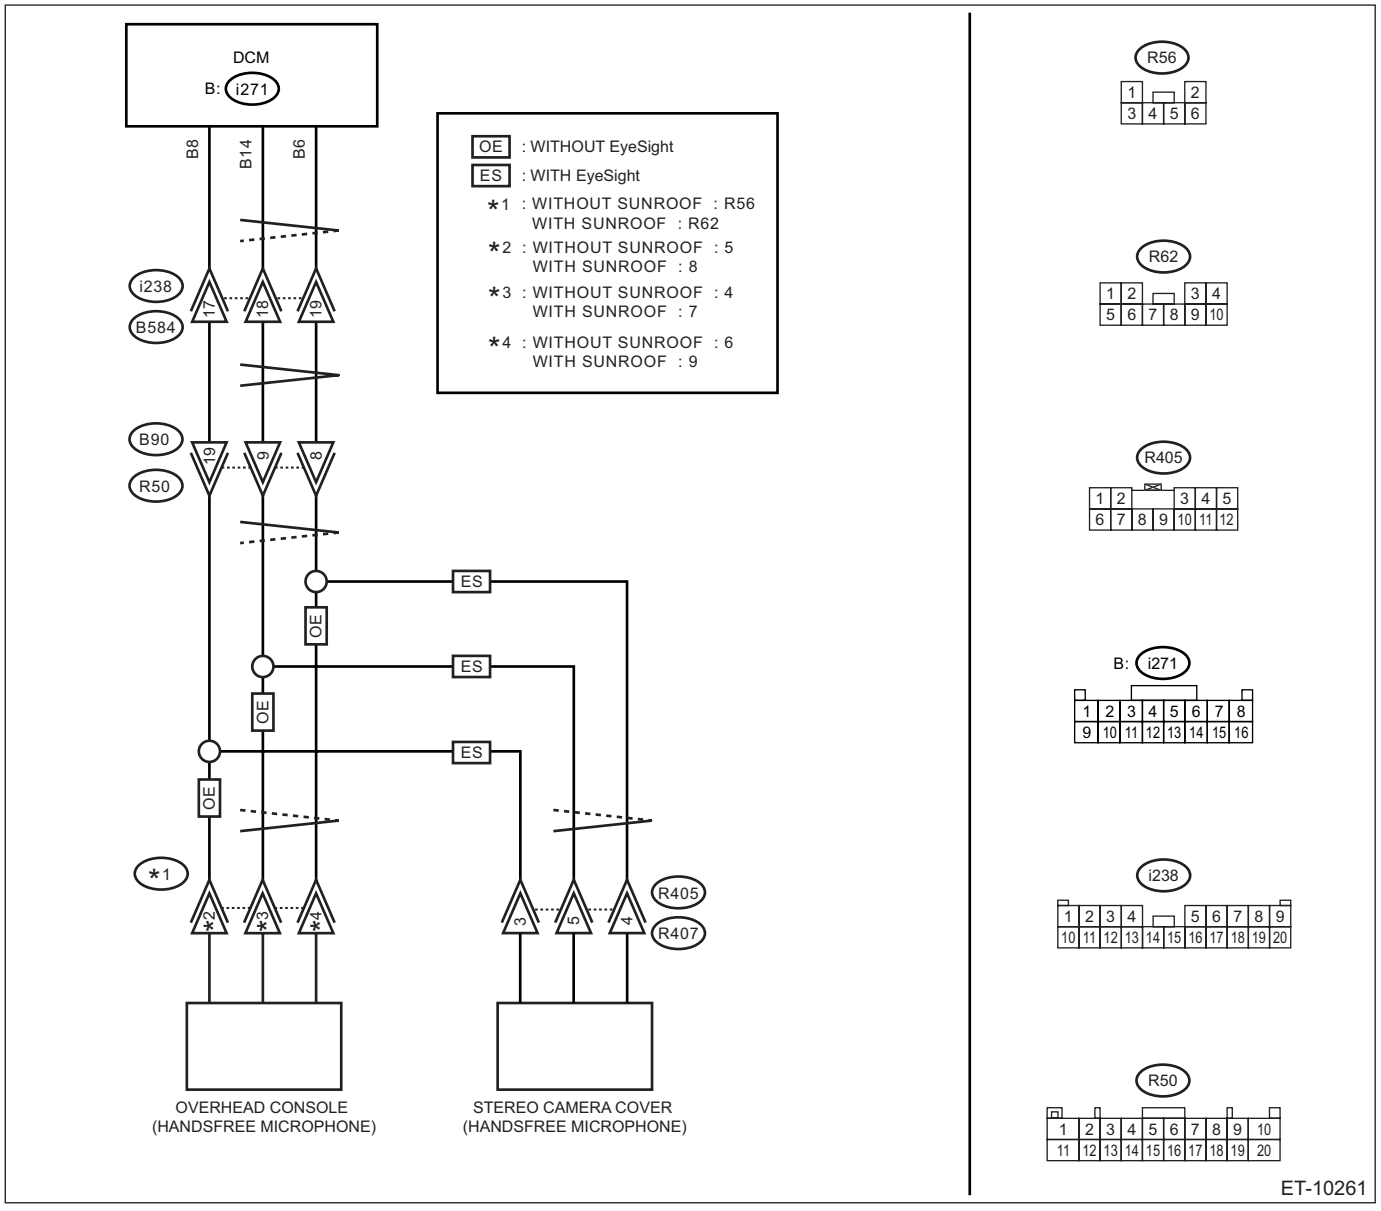
M: DTC B2A03 GPS ANTENNA CIRCUIT

DIAGNOSIS START CONDITION:
When ignition switch is ON.
DTC DETECTING CONDITION:
Any of the followings continues for 5 seconds or more.
- GPS antenna impedance is more than 1 MΩ. (Detached antenna, etc.)
- GPS antenna impedance is less than 10 Ω. (Short-circuited antenna, etc.)

TROUBLE SYMPTOM:
- Telematics function cannot be used.
- RED LED illuminates.

CAUTION:
CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC B2A03 displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**CHECK GPS ANTENNA.** Visually check the GPS antenna. <Ref. to ET-51, GPS Antenna.>	Is the check result OK?	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>	Replace the GPS antenna. <Ref. to ET-51, GPS Antenna.>



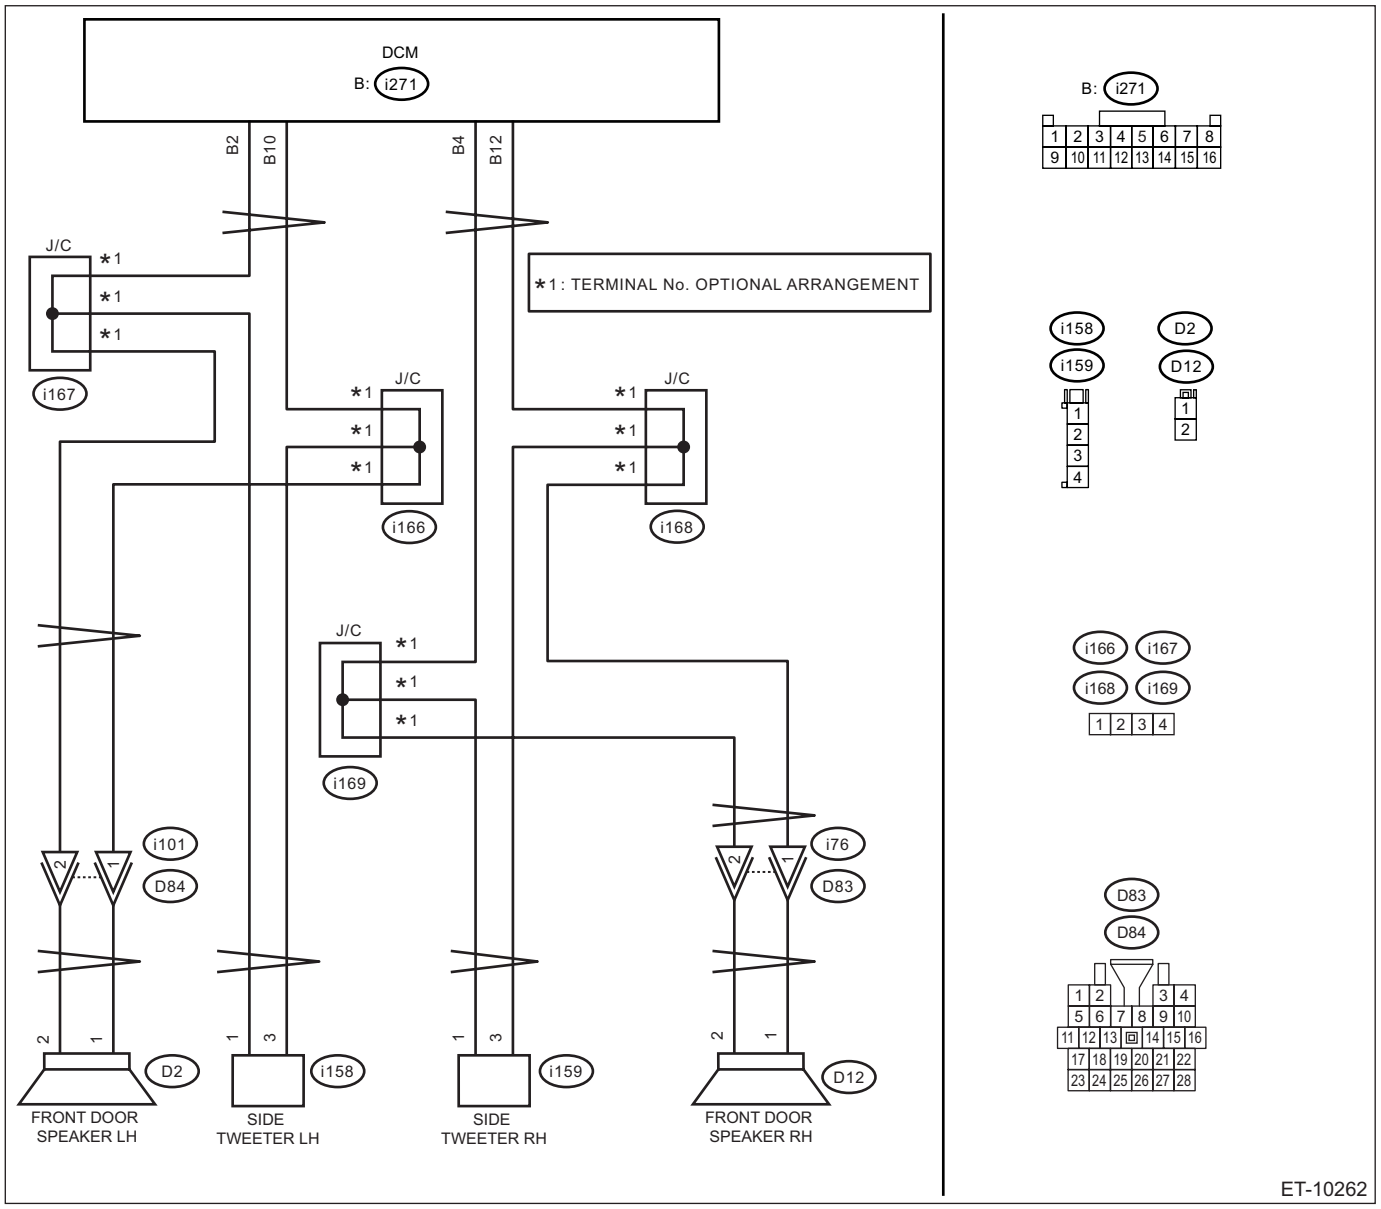
N: DTC B2A04 MIC CIRCUIT

DIAGNOSIS START CONDITION:
When ACC is ON.

DTC DETECTING CONDITION:
Any of the followings continues for 1 second or more.
- MIC impedance is more than 10 kΩ. (Detached MIC, etc.)
- MIC impedance is less than 10 Ω. (Short-circuited MIC, etc.)

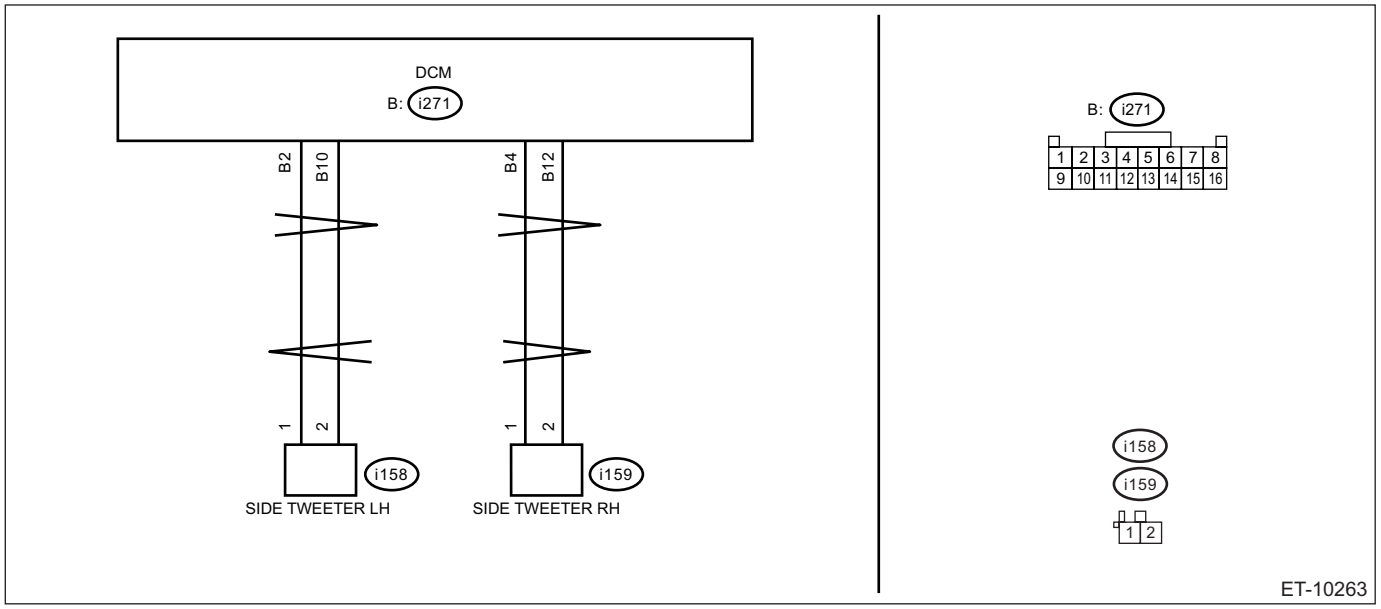
TROUBLE SYMPTOM:
- Call function cannot be used.
- RED LED illuminates.

WIRING DIAGRAM:
Telematics <Ref. to WI-356, WIRING DIAGRAM, Telematics System.>



CAUTION:
CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC B2A04 displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**CHECK HARNESS (OPEN CIRCUIT).** 1) Turn the ignition switch to OFF. 2) Disconnect the microphone connector. 3) Disconnect the DCM connector. 4) Measure the resistance between microphone connector and DCM connector. ***Connector & terminal*** ***Without EyeSight and without sunroof*** ***(R56) No. 5 — (i271) No. 8:*** ***(R56) No. 4 — (i271) No. 14:*** ***(R56) No. 6 — (i271) No. 6:*** ***Without EyeSight and with sunroof*** ***(R62) No. 8 — (i271) No. 8:*** ***(R62) No. 7 — (i271) No. 14:*** ***(R62) No. 9 — (i271) No. 6:*** ***With EyeSight*** ***(R405) No. 3 — (i271) No. 8:*** ***(R405) No. 5 — (i271) No. 14:*** ***(R405) No. 4 — (i271) No. 6:***	Is the resistance 1 Ω or less?	Go to step **3**.	Repair or replace the open circuit of harness.
3	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Measure the resistance between DCM connector and chassis ground. ***Connector & terminal*** ***(i271) No. 8 — Chassis ground:*** ***(i271) No. 14 — Chassis ground:*** ***(i271) No. 6 — Chassis ground:***	Is the resistance 1 MΩ or more?	Go to step **4**.	Repair or replace the open circuit of harness.
4	**CHECK THE CONNECTOR (SHORT CIRCUIT TO POWER SUPPLY).** Measure the voltage between DCM connector and chassis ground. ***Connector & terminal*** ***(i271) No. 8 (+) — Chassis ground (–):*** ***(i271) No. 14 (+) — Chassis ground (–):*** ***(i271) No. 6 (+) — Chassis ground (–):***	Is the voltage less than 1 V?	Go to step **5**.	Repair or replace the short circuit of the harness.
5	**CHECK MICROPHONE.** Confirm the microphone voice input.	Is the voice input OK?	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>	Replace the microphone. <Ref. to ET-49, Microphone.>



O: DTC B2A05 LEFT SPEAKER/AUDIO CIRCUIT

DIAGNOSIS START CONDITION:
When ACC is ON.
DTC DETECTING CONDITION:
Speaker impedance is more than 10 kΩ for 100 ms. (Detached speaker connection, etc.)
TROUBLE SYMPTOM:
- Call function cannot be used.
- RED LED illuminates.

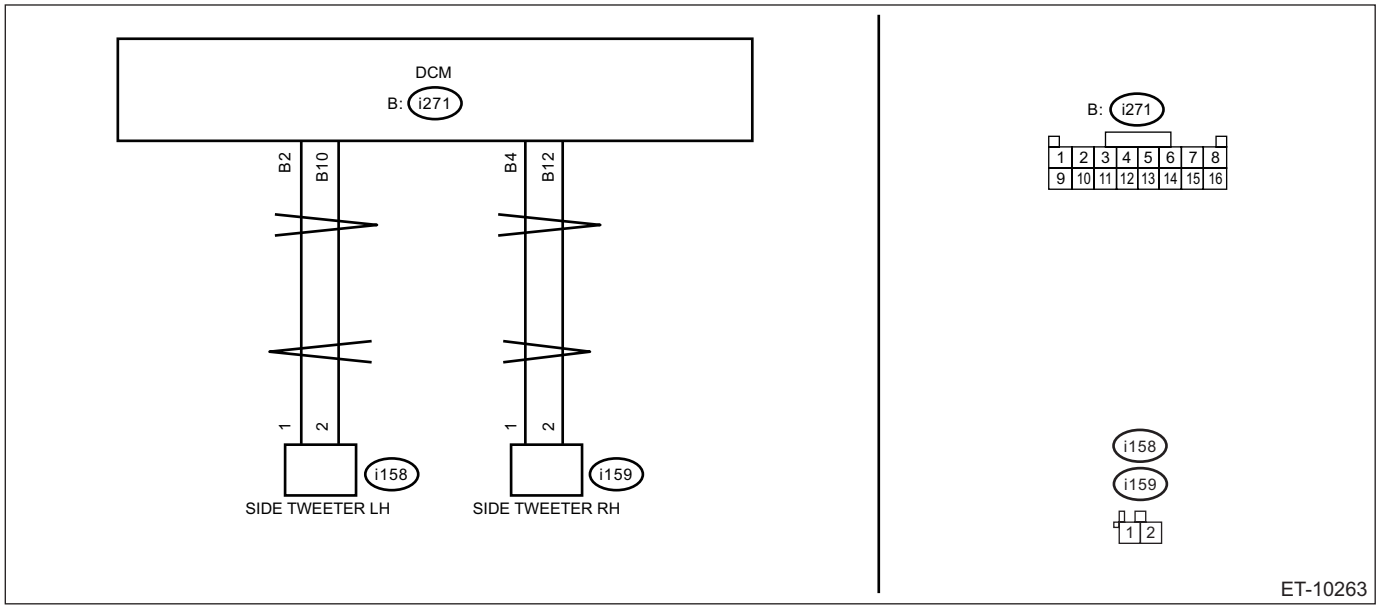
WIRING DIAGRAM:
Telematics <Ref. to WI-356, WIRING DIAGRAM, Telematics System.>
- Without audio amplifier

- With audio amplifier

CAUTION:
CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC B2A05 displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**PERFORM THE SYSTEM OPERATION CHECK.** Perform the System Operation Check Mode «Speaker ON». <Ref. to TEL(diag)-22, System Operation Check Mode.>	Does it sound?	Go to step **3**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

	Step	Check	Yes	No
3	**CHECK HARNESS (OPEN CIRCUIT).** 1) Turn the ignition switch to OFF. 2) Disconnect the speaker connector and tweeter connector. 3) Disconnect the DCM connector. 4) Measure the resistance between speaker connector and tweeter connector and DCM connector. ***Connector & terminal*** ***Without audio amplifier*** ***(i271) No. 2 — (D2) No. 2:*** ***(i271) No. 2 — (i158) No. 1:*** ***(i271) No. 10 — (D2) No. 1:*** ***(i271) No. 10 — (i158) No. 3:*** ***With audio amplifier*** ***(i271) No. 2 — (i158) No. 1:*** ***(i271) No. 10 — (i158) No. 2:***	Is the resistance 1 Ω or less?	Go to step **4**.	Repair or replace the open circuit of harness.
4	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Measure the resistance between DCM connector and chassis ground. ***Connector & terminal*** ***(i271) No. 2 — Chassis ground:*** ***(i271) No. 10 — Chassis ground:***	Is the resistance 1 MΩ or more?	Go to step **5**.	Repair or replace the open circuit of harness.
5	**CHECK THE CONNECTOR (SHORT CIRCUIT TO POWER SUPPLY).** Measure the voltage between DCM connector and chassis ground. ***Connector & terminal*** ***(i271) No. 2 (+) — Chassis ground (–):*** ***(i271) No. 10 (+) — Chassis ground (–):***	Is the voltage less than 1 V?	Go to step **6**.	Repair or replace the short circuit of the harness.
6	**CHECK THE SPEAKER.** Perform the inspection of speaker unit and tweeter unit. <Ref. to ET-38, Front Speaker.> <Ref. to ET-40, Rear Speaker.>	Is the check result OK?	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>	Replace the speaker and tweeter. <Ref. to ET-38, Front Speaker.> <Ref. to ET-40, Rear Speaker.>



P: DTC B2A06 RIGHT SPEAKER/AUDIO CIRCUIT

DIAGNOSIS START CONDITION:
When ACC is ON.
DTC DETECTING CONDITION:
Speaker impedance is more than 10 kΩ for 100 ms. (Detached speaker connection, etc.)
TROUBLE SYMPTOM:
- Call function cannot be used.
- RED LED illuminates.

WIRING DIAGRAM:
Telematics <Ref. to WI-356, WIRING DIAGRAM, Telematics System.>
- Without audio amplifier

- With audio amplifier

CAUTION:
CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC B2A06 displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**PERFORM THE SYSTEM OPERATION CHECK.** Perform the System Operation Check Mode «Speaker ON». <Ref. to TEL(diag)-22, System Operation Check Mode.>	Does it sound?	Go to step **3**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

	Step	Check	Yes	No
3	**CHECK HARNESS (OPEN CIRCUIT).** 1) Turn the ignition switch to OFF. 2) Disconnect the speaker connector and tweeter connector. 3) Disconnect the DCM connector. 4) Measure the resistance between speaker connector and tweeter connector and DCM connector. ***Connector & terminal*** ***Without audio amplifier*** ***(i271) No. 4 — (D12) No. 2:*** ***(i271) No. 4 — (i159) No. 1:*** ***(i271) No. 12 — (D12) No. 1:*** ***(i271) No. 12 — (i159) No. 3:*** ***With audio amplifier*** ***(i271) No. 4 — (i159) No. 1:*** ***(i271) No. 12 — (i159) No. 2:***	Is the resistance 1 Ω or less?	Go to step **4**.	Repair or replace the open circuit of harness.
4	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Measure the resistance between DCM connector and chassis ground. ***Connector & terminal*** ***(i271) No. 4 — Chassis ground:*** ***(i271) No. 12 — Chassis ground:***	Is the resistance 1 MΩ or more?	Go to step **5**.	Repair or replace the open circuit of harness.
5	**CHECK THE CONNECTOR (SHORT CIRCUIT TO POWER SUPPLY).** Measure the voltage between DCM connector and chassis ground. ***Connector & terminal*** ***(i271) No. 4 (+) — Chassis ground (–):*** ***(i271) No. 12 (+) — Chassis ground (–):***	Is the voltage less than 1 V?	Go to step **6**.	Repair or replace the short circuit of the harness.
6	**CHECK THE SPEAKER.** Perform the inspection of speaker unit and tweeter unit. <Ref. to ET-38, Front Speaker.> <Ref. to ET-40, Rear Speaker.>	Is the check result OK?	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>	Replace the speaker and tweeter. <Ref. to ET-38, Front Speaker.> <Ref. to ET-40, Rear Speaker.>

Q: DTC B2A07 BACKUP BATTERY CHARGE SYSTEM PERFORMANCE

DIAGNOSIS START CONDITION:
When ignition switch is ON.
DTC DETECTING CONDITION:
Backup battery is disconnected for at least 5 seconds when the ignition switch is turned ON. (Detached back-up battery connection, etc.)
TROUBLE SYMPTOM:
- ACN/SOS function cannot be used when the main battery is disconnected.
- RED LED illuminates.

CAUTION:
CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC B2A07 displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**CHECK THE BACKUP BATTERY.** 1) Remove the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.> 2) Remove the backup battery cover. 3) Disconnect the backup battery connector. 4) Measure the backup battery voltage.	Is the voltage 2.0 V or more?	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>	Replace the backup battery. <Ref. to ET-53, DATA COMMUNICATION MODULE.>

R: DTC B2A08 SOS BUTTON CIRCUIT

DIAGNOSIS START CONDITION:
When ignition switch is ON.
DTC DETECTING CONDITION:
The following conditions occur for at least 50 ms.
- SOS button impedance is more than 10 kΩ.
- SOS button is stuck for at least 60 seconds.

TROUBLE SYMPTOM:
- SOS function cannot be used.
- RED LED illuminates.

WIRING DIAGRAM:
Telematics <Ref. to WI-356, WIRING DIAGRAM, Telematics System.>

CAUTION:
CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

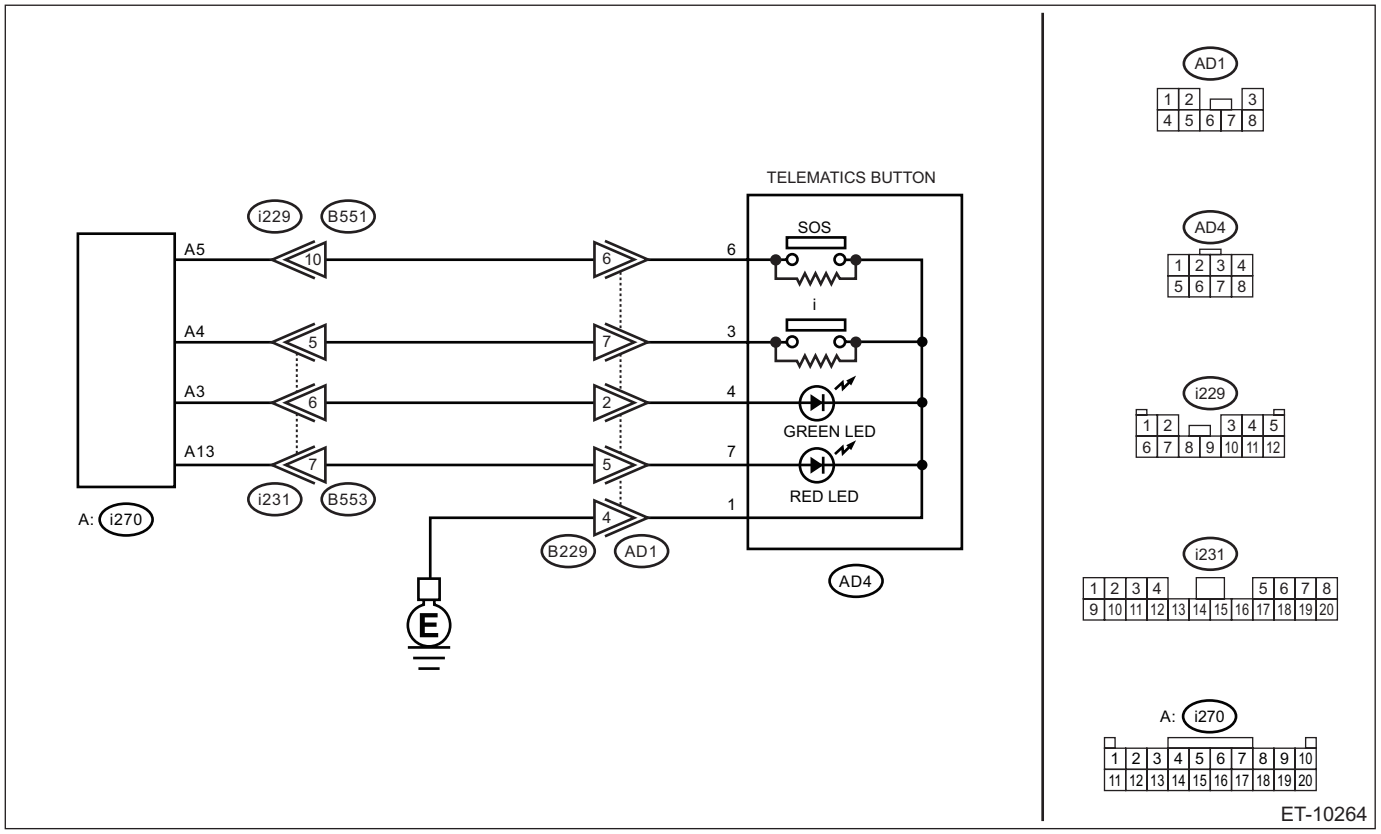
	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC B2A08 displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**CHECK HARNESS (OPEN CIRCUIT).** 1) Turn the ignition switch to OFF. 2) Disconnect the telematics button connector. 3) Disconnect the DCM connector. 4) Measure the resistance between telematics button connector and DCM connector. ***Connector & terminal*** ***(i270) No. 5 — (AD4) No. 6:*** ***(AD4) No. 1 — Chassis ground:***	Is the resistance 1 Ω or less?	Go to step **3**.	Repair or replace the open circuit of harness.
3	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Measure the resistance between DCM connector and chassis ground. ***Connector & terminal*** ***(i270) No. 5 — Chassis ground:***	Is the resistance 1 MΩ or more?	Go to step **4**.	Repair or replace the open circuit of harness.
4	**CHECK THE CONNECTOR (SHORT CIRCUIT TO POWER SUPPLY).** Measure the voltage between DCM connector and chassis ground. ***Connector & terminal*** ***(i270) No. 5 (+) — Chassis ground (–):*** ***(AD4) No. 1 (+) — Chassis ground (–):***	Is the voltage less than 1 V?	Go to step **5**.	Repair or replace the short circuit of the harness.
5	**CHECK THE SOS BUTTON UNIT.** Measure the resistance of the SOS button unit. ***Terminals*** ***No. 6 — No. 1:***	Is the resistance 1 Ω or less when SOS button is ON, and 1.6 (±5%) kΩ or more when SOS button is OFF?	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>	Replace the telematics button. <Ref. to ET-46, Switches and Harness.>

S: DTC B2A09 I-CALL BUTTON CIRCUIT

DIAGNOSIS START CONDITION:
When ignition switch is ON.
DTC DETECTING CONDITION:
The following conditions occur for at least 50 ms.
- i-button impedance is more than 10 kΩ.
- i-button is stuck for at least 60 seconds.

TROUBLE SYMPTOM:
- i-Call function cannot be used.
- RED LED illuminates.

WIRING DIAGRAM:
Telematics <Ref. to WI-356, WIRING DIAGRAM, Telematics System.>



CAUTION:
CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC B2A09 displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**CHECK HARNESS (OPEN CIRCUIT).** 1) Turn the ignition switch to OFF. 2) Disconnect the telematics button connector. 3) Disconnect the DCM connector. 4) Measure the resistance between telematics button connector and DCM connector. ***Connector & terminal*** ***(i270) No. 4 — (AD4) No. 3:*** ***(AD4) No. 1 — Chassis ground:***	Is the resistance 1 Ω or less?	Go to step **3**.	Repair or replace the open circuit of harness.
3	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Measure the resistance between DCM connector and chassis ground. ***Connector & terminal*** ***(i270) No. 4 — Chassis ground:***	Is the resistance 1 MΩ or more?	Go to step **4**.	Repair or replace the open circuit of harness.
4	**CHECK THE CONNECTOR (SHORT CIRCUIT TO POWER SUPPLY).** Measure the voltage between DCM connector and chassis ground. ***Connector & terminal*** ***(i270) No. 4 (+) — Chassis ground (–):*** ***(AD4) No. 1 (+) — Chassis ground (–):***	Is the voltage less than 1 V?	Go to step **5**.	Repair or replace the short circuit of the harness.
5	**CHECK THE I-BUTTON.** Measure the resistance of the i-button unit. ***Terminals*** ***No. 3 — No. 1:***	Is the resistance 1 Ω or less when i-button is ON, and 1.6 (±5%) kΩ or more when i-button is OFF?	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>	Replace the telematics button. <Ref. to ET-46, Switches and Harness.>

T: DTC B2A0A RED LED CIRCUIT

DIAGNOSIS START CONDITION:
When ACC is ON.
DTC DETECTING CONDITION:
- Current in LED is less than 1 mA. (Improper LED connection, etc.)
- Current is more than 200 mA for at least 50 ms. (Short-circuited LED, etc.)

TROUBLE SYMPTOM:
LED does not illuminate.
WIRING DIAGRAM:
Telematics <Ref. to WI-356, WIRING DIAGRAM, Telematics System.>

CAUTION:
CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC B2A0A displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

	Step	Check	Yes	No
2	**PERFORM THE SYSTEM OPERATION CHECK.** Perform «RED LED Lighting» in the system operation check mode. <Ref. to TEL(diag)-22, System Operation Check Mode.>	Does it sound?	Go to step **3**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
3	**CHECK HARNESS (OPEN CIRCUIT).** 1) Turn the ignition switch to OFF. 2) Disconnect the telematics button connector. 3) Disconnect the DCM connector. 4) Measure the resistance between telematics button connector and DCM connector. ***Connector & terminal*** ***(i270) No. 13 — (AD4) No. 7:*** ***(AD4) No. 1 — Chassis ground:***	Is the resistance 1 Ω or less?	Go to step **4**.	Repair or replace the open circuit of harness.
4	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Measure the resistance between DCM connector and chassis ground. ***Connector & terminal*** ***(i270) No. 13 — Chassis ground:***	Is the resistance 1 MΩ or more?	Go to step **5**.	Repair or replace the open circuit of harness.
5	**CHECK THE CONNECTOR (SHORT CIRCUIT TO POWER SUPPLY).** Measure the voltage between DCM connector and chassis ground. ***Connector & terminal*** ***(i270) No. 13 (+) — Chassis ground (–):*** ***(AD4) No. 1 (+) — Chassis ground (–):***	Is the voltage less than 1 V?	Go to step **6**.	Repair or replace the short circuit of the harness.
6	**CHECK THE TELEMATICS BUTTON (LED) UNIT.** Measure the resistance of the telematics button (LED) unit. ***Terminals*** ***No. 7 — No. 1:***	Is there continuity?	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>	Replace the telematics button. <Ref. to ET-46, Switches and Harness.>

U: DTC B2A0B GREEN LED CIRCUIT

DIAGNOSIS START CONDITION:
When ACC is ON.
DTC DETECTING CONDITION:
- Current in LED is less than 1 mA. (Improper LED connection, etc.)
- Current is more than 200 mA for at least 50 ms. (Short-circuited LED, etc.)

TROUBLE SYMPTOM:
RED LED illuminates.
WIRING DIAGRAM:
Telematics <Ref. to WI-356, WIRING DIAGRAM, Telematics System.>

CAUTION:
CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

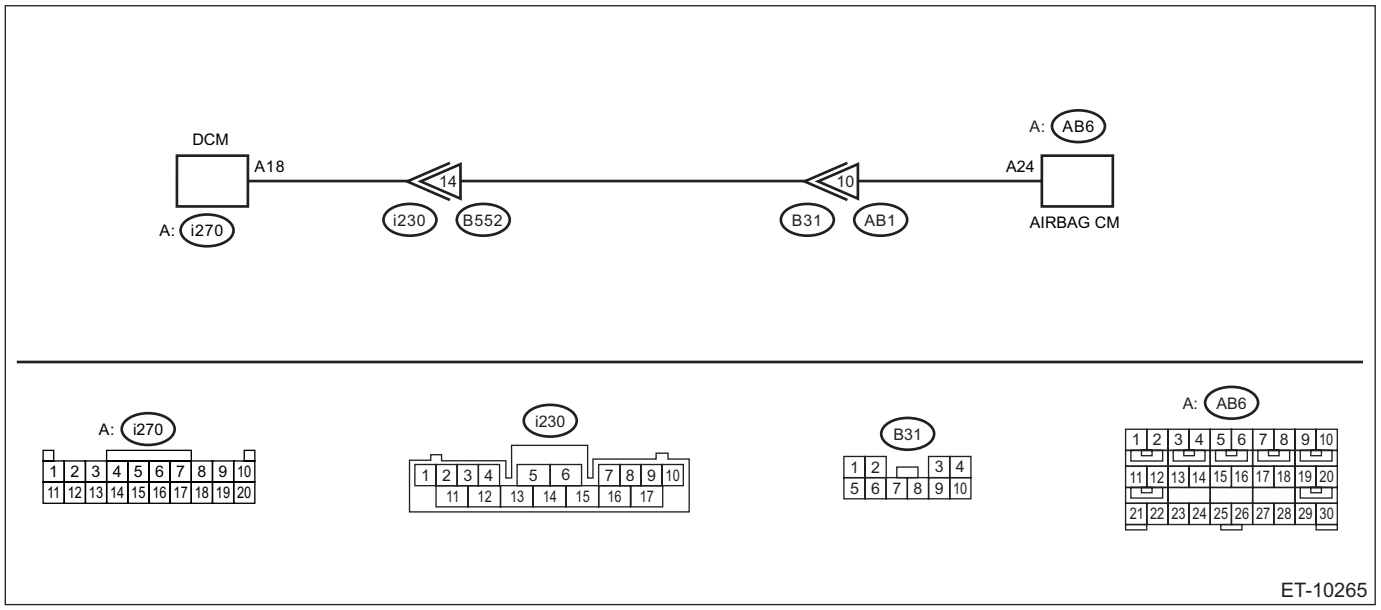
	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC B2A0B displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

	Step	Check	Yes	No
2	**PERFORM THE SYSTEM OPERATION CHECK.** Perform «GREEN LED Lighting» in the system operation check mode. <Ref. to TEL(diag)-22, System Operation Check Mode.>	Does it sound?	Go to step **3**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
3	**CHECK HARNESS (OPEN CIRCUIT).** 1) Turn the ignition switch to OFF. 2) Disconnect the telematics button connector. 3) Disconnect the DCM connector. 4) Measure the resistance between telematics button connector and DCM connector. ***Connector & terminal*** ***(i270) No. 3 — (AD4) No. 4:*** ***(AD4) No. 1 — Chassis ground:***	Is the resistance 1 Ω or less?	Go to step **4**.	Repair or replace the open circuit of harness.
4	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Measure the resistance between DCM connector and chassis ground. ***Connector & terminal*** ***(i270) No. 3 — Chassis ground:***	Is the resistance 1 MΩ or more?	Go to step **5**.	Repair or replace the open circuit of harness.
5	**CHECK THE CONNECTOR (SHORT CIRCUIT TO POWER SUPPLY).** Measure the voltage between DCM connector and chassis ground. ***Connector & terminal*** ***(i270) No. 3 (+) — Chassis ground (–):*** ***(AD4) No. 1 (+) — Chassis ground (–):***	Is the voltage less than 1 V?	Go to step **6**.	Repair or replace the short circuit of the harness.
6	**CHECK THE TELEMATICS BUTTON (LED) UNIT.** Measure the resistance of the telematics button (LED) unit. ***Terminals*** ***No. 4 — No. 1:***	Is there continuity?	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>	Replace the telematics button. <Ref. to ET-46, Switches and Harness.>

V: DTC B2A0C DCM INTERNAL FAULT

DIAGNOSIS START CONDITION:
When ignition switch is ON.
DTC DETECTING CONDITION:
- Main microcomputer and communication circuit IC cannot communicate. (Defective IPC)
- SIM (communication chip) cannot be read. (Defective SIM)

TROUBLE SYMPTOM:
- Telematics function cannot be used.
- RED LED illuminates.



CAUTION:
CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC B2A0C displayed? (Current malfunction)	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

W: DTC B2A0D AIRBAG SIGNAL

DIAGNOSIS START CONDITION:
When ignition switch is ON.
DTC DETECTING CONDITION:
Either the regular signal or collision detection signal cannot be detected from the airbag CM for at least 30 seconds.
TROUBLE SYMPTOM:
- ACN function does not operate.
- RED LED illuminates.

WIRING DIAGRAM:
Telematics <Ref. to WI-356, WIRING DIAGRAM, Telematics System.>

CAUTION:
CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC B2A0D displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**CHECK DTC.** Read DTC of the airbag. <Ref. to AB(diag)-22, Read Diagnostic Trouble Code (DTC).>	Are any DTCs displayed? (Current malfunction)	Perform the diagnosis for the displayed DTCs of airbag.	Go to step **3**.

	Step	Check	Yes	No
3	**CHECK HARNESS (OPEN CIRCUIT).** 1) Turn the ignition switch to OFF. 2) Disconnect the airbag CM connector. 3) Disconnect the DCM connector. 4) Measure the resistance between airbag CM connector and DCM connector. **CAUTION:** **To measure the voltage and resistance of airbag system component, be sure to use the specified test harness. <Ref. to AB(diag)-4, General Description.>** ***Connector & terminal*** ***(i270) No. 18 — (AB6) No. 24:***	Is the resistance 1 Ω or less?	Go to step **4**.	Repair or replace the open circuit of harness.
4	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Measure the resistance between DCM connector and chassis ground. ***Connector & terminal*** ***(i270) No. 18 — Chassis ground:***	Is the resistance 1 MΩ or more?	Go to step **5**.	Repair or replace the open circuit of harness.
5	**CHECK THE CONNECTOR (SHORT CIRCUIT TO POWER SUPPLY).** Measure the voltage between DCM connector and chassis ground. ***Connector & terminal*** ***(i270) No. 18 (+) — Chassis ground (–):***	Is the voltage less than 1 V?	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>	Repair or replace the short circuit of the harness.

X: DTC B2A0E MUTE LINE CIRCUIT

DIAGNOSIS START CONDITION:
When ignition switch is ON.
DTC DETECTING CONDITION:
Any of the following conditions occurs continuously for five seconds or more after the ignition switch is turned to ON when DCM does not mute the audio or navigation system.
- Current in the mute line is less than 1 mA. (Improper line connection, etc.)
- Current exceeds 50 mA. (Short-circuited line, etc.)

TROUBLE SYMPTOM:
- The mute function of audio or navigation system does not operate.
- RED LED illuminates.

WIRING DIAGRAM:
Telematics <Ref. to WI-356, WIRING DIAGRAM, Telematics System.>

CAUTION:
CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC B2A0E displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.

	Step	Check	Yes	No
2	**CHECK HARNESS (OPEN CIRCUIT).** 1) Turn the ignition switch to OFF. 2) Disconnect the audio or navigation connector. 3) Disconnect the DCM connector. 4) Measure the resistance between audio or navigation connector and DCM connector. ***Connector & terminal*** ***(i270) No. 19 — (i272) No. 8:***	Is the resistance 1 Ω or less?	Go to step **3**.	Repair or replace the open circuit of harness.
3	**CHECK HARNESS (GROUND SHORT CIRCUIT).** Measure the resistance between DCM connector and chassis ground. ***Connector & terminal*** ***(i270) No. 19 — Chassis ground:***	Is the resistance 1 MΩ or more?	Go to step **4**.	Repair or replace the open circuit of harness.
4	**CHECK THE CONNECTOR (SHORT CIRCUIT TO POWER SUPPLY).** Measure the voltage between DCM connector and chassis ground. ***Connector & terminal*** ***(i270) No. 19 (+) — Chassis ground (–):***	Is the voltage less than 1 V?	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>	Repair or replace the short circuit of the harness.

Y: DTC B2A0F BACKUP BATTERY DEGRADATION

DIAGNOSIS START CONDITION:
When ignition switch is ON.
DTC DETECTING CONDITION:
- Backup battery voltage of charger is low.
- Charging attempt of 2 V or more fails after the backup battery has been charged for 1 hour continuously.
- Full charging is not achieved after the backup battery is charged for 7 hours in total (not continuously).

TROUBLE SYMPTOM:
RED LED illuminates.

CAUTION:
CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC B2A0F displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**CHECK THE BACKUP BATTERY.** Check the backup battery unit. <Ref. to ET-53, DATA COMMUNICATION MODULE.>	Is the check result OK?	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>	Replace the backup battery. <Ref. to ET-53, DATA COMMUNICATION MODULE.>

Z: DTC B2A10 BATTERY VOLTAGE HIGH

DIAGNOSIS START CONDITION:
When ignition switch is ON.
DTC DETECTING CONDITION:
DCM battery power supply input of 16 V or more continues for 5 seconds.
TROUBLE SYMPTOM:
RED LED illuminates.

CAUTION:
CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

	Step	Check	Yes	No
1	**CHECK DTC.** Read the DTC. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC B2A10 displayed? (Current malfunction)	Go to step **2**.	Even if DTC is displayed, the circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.
2	**CHECK CURRENT DATA.** Check the current data «Battery Voltage» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	Is «Battery Voltage» OK?	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>	Go to step **3**.
3	**CHECK BATTERY.** Check the battery unit. <Ref. to SC(STI)-24, Battery.> <Ref. to SC(w/o STI)-50, Battery.>	Is the check result OK?	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>	Replace the battery. <Ref. to SC(STI)-24, Battery.> <Ref. to SC(w/o STI)-50, Battery.>

A: LIST

No.	Symptoms	Reference
1	The system does not notify the Telematics Service Provider Center automatically after collision.	<Ref. to TEL(diag)-54, THE SYSTEM DOES NOT NOTIFY THE TELEMATICS SERVICE PROVIDER CENTER AUTOMATICALLY AFTER COLLISION, INSPECTION, Diagnostics with Phenomenon.>
2	The system does not notify the center even if the SOS button is pressed.	<Ref. to TEL(diag)-56, THE SYSTEM DOES NOT NOTIFY THE CENTER EVEN IF THE SOS BUTTON IS PRESSED, INSPECTION, Diagnostics with Phenomenon.>
3	The system places an SOS call unintentionally during driving.	<Ref. to TEL(diag)-57, THE SYSTEM PLACES AN SOS CALL UNINTENTIONALLY DURING DRIVING, INSPECTION, Diagnostics with Phenomenon.>
4	The system places an I-CALL unintentionally during driving.	<Ref. to TEL(diag)-57, THE SYSTEM PLACES AN I-CALL UNINTENTIONALLY DURING DRIVING, INSPECTION, Diagnostics with Phenomenon.>
5	The system does not notify the center even if the i-button is pressed upon vehicle malfunction.	<Ref. to TEL(diag)-57, THE SYSTEM DOES NOT NOTIFY THE CENTER EVEN IF THE I-BUTTON IS PRESSED UPON VEHICLE MALFUNCTION, INSPECTION, Diagnostics with Phenomenon.>
6	Remote Vehicle Locator cannot locate the vehicle.	<Ref. to TEL(diag)-58, REMOTE VEHICLE LOCATOR CANNOT LOCATE THE VEHICLE, INSPECTION, Diagnostics with Phenomenon.>
7	Remote Vehicle Locator indicates an incorrect location and therefore the vehicle cannot be located.	<Ref. to TEL(diag)-60, REMOTE VEHICLE LOCATOR INDICATES AN INCORRECT LOCATION FOR THE VEHICLE, INSPECTION, Diagnostics with Phenomenon.>
8	Remote Door Lock does not lock the doors of the vehicle.	<Ref. to TEL(diag)-60, REMOTE DOOR LOCK DOES NOT LOCK THE DOORS OF THE VEHICLE, INSPECTION, Diagnostics with Phenomenon.>
9	The doors lock unintentionally.	<Ref. to TEL(diag)-62, THE DOORS LOCK UNINTENTIONALLY, INSPECTION, Diagnostics with Phenomenon.>
10	The doors unlock unintentionally.	<Ref. to TEL(diag)-62, THE DOORS UNLOCK UNINTENTIONALLY, INSPECTION, Diagnostics with Phenomenon.>
11	Remote Horn & HAZARD Lights do not operate upon request.	<Ref. to TEL(diag)-63, REMOTE HORN & HAZARD LIGHTS DO NOT OPERATE UPON REQUEST, INSPECTION, Diagnostics with Phenomenon.>
12	When the Vehicle Security Alarm is activated, notification is not sent.	<Ref. to TEL(diag)-64, WHEN THE VEHICLE SECURITY ALARM IS ACTIVATED, NOTIFICATION IS NOT SENT, INSPECTION, Diagnostics with Phenomenon.>
13	When a Malfunction indicator light/warning light is lit, notification is not sent.	<Ref. to TEL(diag)-65, WHEN A MALFUNCTION INDICATOR LIGHT/WARNING LIGHT IS LIT, NOTIFICATION IS NOT SENT, INSPECTION, Diagnostics with Phenomenon.>
14	Maintenance Notifications are not sent.	<Ref. to TEL(diag)-67, MAINTENANCE NOTIFICATIONS ARE NOT SENT, INSPECTION, Diagnostics with Phenomenon.>
15	The LED does not display the status. (LED malfunction)	<Ref. to TEL(diag)-68, THE LED DOES NOT DISPLAY THE STATUS. (LED MALFUNCTION), INSPECTION, Diagnostics with Phenomenon.>
16	Phone conversation is not possible. (The microphone does not respond to a voice. No sound is heard from the speaker.)	<Ref. to TEL(diag)-70, PHONE CONVERSATION IS NOT POSSIBLE. (THE MICROPHONE DOES NOT RESPOND TO A VOICE. NO SOUND IS HEARD FROM THE SPEAKER.), INSPECTION, Diagnostics with Phenomenon.>

B: INSPECTION

1. THE SYSTEM DOES NOT NOTIFY THE TELEMATICS SERVICE PROVIDER CENTER AUTOMATICALLY AFTER COLLISION

NOTE:
Perform the diagnostics for "Phone conversation is not possible. (The microphone does not respond to a voice. No sound is heard from the speaker.)". <Ref. to TEL(diag)-70, PHONE CONVERSATION IS NOT POSSIBLE. (THE MICROPHONE DOES NOT RESPOND TO A VOICE. NO SOUND IS HEARD FROM THE SPEAKER.), INSPECTION, Diagnostics with Phenomenon.>

CAUTION:
CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

	Step	Check	Yes	No
1	**CHECK COLLISION TYPE.** Check the type of collision of the vehicle.	Is it a frontal collision, or a side collision, or a rollover?	Go to step **2**.	For rear collision, Go to step **3**.
2	**CHECK DTCS.** Read DTC of the airbag. <Ref. to AB(diag)-22, Read Diagnostic Trouble Code (DTC).>	If no DTC is displayed, go to A. If any DTC of «Front Impact Deployment», «Side Impact Deployment» or «Rollover Ignition» is displayed, go to A. If DTC other than «Front Impact Deployment», «Side Impact Deployment» or «Rollover Ignition» is displayed, go to B.	A: There is no malfunction in the airbag system. Go to step **6**. B: Perform the diagnosis for the airbag system. <Ref. to AB(diag)-2, Basic Diagnostic Procedure.> At the same time, Go to step **6**.	—
3	**CHECK COLLISION DETECTION SIGNAL RECEPTION STATUS.** Display the current data «Timestamp at Emergency Notification Event» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	Is a time stamp recorded?	Go to step **6**. (Rear collision detection was activated)	Go to step **4**.
4	**CHECK DTCS.** Read DTCs of the Telematics. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs. <Ref. to TEL(diag)-16, LIST, Diagnostic Code(s) Display.>	Go to step **5**.
5	**CHECK DTCS.** Read DTC of the airbag. <Ref. to AB(diag)-22, Read Diagnostic Trouble Code (DTC).>	Is DTC displayed?	Perform the diagnosis for the airbag system. <Ref. to AB(diag)-2, Basic Diagnostic Procedure.> At the same time, Go to step **6**.	There is no malfunction in the airbag system. Go to step **6**.
6	**CHECK MODE STATUS.** Display the current data «Subscription Status» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	Is the data «Normal Mode»?	Go to step **7**. NOTE: If step 4 is in progress, Go to step **8**.	This is not a malfunction because the function is limited in other than normal mode. Press and hold the SOS button for two seconds to enter normal mode.

	Step	Check	Yes	No
7	**CHECK DTCS.** Read DTCs of the Telematics. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs. <Ref. to TEL(diag)-16, LIST, Diagnostic Code(s) Display.>	Go to step **8**.
8	**CHECK THE RECEIVED SIGNAL STRENGTH AT THE TIME OF THE ACCIDENT. (CHECK THE CURRENT DATA.).** Display the current data «Signal Strength at Emergency Notification Event» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	Is the data 26% or more?	Go to step **10**.	Go to step **9**.
9	**CHECK SPECIFIED AREA.** 1) Check whether the collision occurred within the specified area. 2) Display the current data «GPS Data at ACN Event» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	Is the displayed positional data located within the AT&T coverage area? (For the AT&T coverage area, refer to the AT&T website. This system operates on 3G and 4G mobile communication technology.)	Go to step **10**.	The collision occurred outside the specified area.
10	**CHECK THE COMMUNICATION STATUS AT THE TIME OF THE ACCIDENT. (CHECK THE CURRENT DATA.).** Display the current data «Call Status at Emergency Notification Event» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	If the data shows «Call Started» or «Call Connected»; Go to A. If the data shows «Call Not Started»; Go to B. If the data shows «No Network Service»; Go to C. If the data shows «Call Ended by SXM»; Go to D.	A: Go to step **11**. B: Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.> C: Replace the antenna. <Ref. to ET-43, Antenna.> D: The connection ended due to a server-side reason; therefore, there is no failure on the vehicle.	—
11	**CHECK THE TIME OF THE ACCIDENT. (CHECK THE CURRENT DATA.).** Display the current data «Timestamp at Emergency Notification Event» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.> NOTE: The time stamp is displayed in the Coordinated Universal Time (UTC), which is different from actual time at each location. Therefore, time difference needs to be corrected for use. Example: [12/22 01:30 in UTC time] is corrected as [12/21 20:30 in New York time].	Does the time of the accident match with the data?	Replace the antenna. <Ref. to ET-43, Antenna.>	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>

2. THE SYSTEM DOES NOT NOTIFY THE CENTER EVEN IF THE SOS BUTTON IS PRESSED

NOTE:
Perform the diagnostics for "Phone conversation is not possible. (The microphone does not respond to a voice. No sound is heard from the speaker.)". <Ref. to TEL(diag)-70, PHONE CONVERSATION IS NOT POSSIBLE. (THE MICROPHONE DOES NOT RESPOND TO A VOICE. NO SOUND IS HEARD FROM THE SPEAKER.), INSPECTION, Diagnostics with Phenomenon.>

CAUTION:
CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

	Step	Check	Yes	No
1	**CHECK THE SUBSCRIPTION STATUS.** Display the current data «SOS Active» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	Is the data «TRUE»?	Go to step **2**.	The user does not have a service subscription; therefore, it is not a failure.
2	**CHECK DTCS.** Read DTCs of the Telematics. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs. <Ref. to TEL(diag)-16, LIST, Diagnostic Code(s) Display.>	Go to step **3**.
3	**CHECK THE RECEIVED SIGNAL STRENGTH WHEN THE SOS BUTTON WAS PRESSED. (CHECK THE CURRENT DATA.).** Display the current data «RSSI at SOS/ ICALL(1)» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	Is the data 26% or more?	Go to step **5**.	Go to step **4**.
4	**CHECK THE AT&T CELLULAR COVERAGE AREA.** 1) Check whether the SOS button was pressed within the cellular coverage area. 2) Display the current data «GPS Data at Time of Button Push(1)» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	Is the displayed positional data located within the AT&T coverage area? (For the AT&T coverage area, refer to the AT&T website. This system operates on 3G and 4G mobile communication technology.)	Go to step **5**.	The SOS button was pressed outside the cellular coverage area.
5	**CHECK THE COMMUNICATION STATUS OF WHEN THE SOS BUTTON WAS PRESSED. (CHECK THE CURRENT DATA.).** Display the current data «Call status at SOS/ ICALL Event(1)» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	If the data shows «Call Started» or «Call Connected»; Go to A. If the data shows «Call Not Started»; Go to B. If the data shows «No Network Service»; Go to C. If the data shows «Call Ended by SXM»; Go to D.	A: Go to step **6**. B: Go to step **7**. C: Replace the antenna. <Ref. to ET-43, Antenna.> D: The connection ended due to a server-side reason; therefore, there is no failure on the vehicle.	—
6	**CHECK THE TIME OF WHEN THE SOS BUTTON WAS PRESSED. (CHECK THE CURRENT DATA.).** Display the current data «Timestamp at Time of Button Push(1)» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.> NOTE: The time stamp is displayed in the Coordinated Universal Time (UTC), which is different from actual time at each location. Therefore, time difference needs to be corrected for use. Example: [12/22 01:30 in UTC time] is corrected as [12/21 20:30 in New York time].	Does the time of the SOS button operation match with the data?	Go to step **7**.	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>

	Step	Check	Yes	No
7	**CHECK THE SOS BUTTON.** Check the SOS button. <Ref. to TEL(diag)-38, DTC B2A08 SOS BUTTON CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>	Is the check result OK?	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>	Replace the SOS button. <Ref. to ET-46, Switches and Harness.>

3. THE SYSTEM PLACES AN SOS CALL UNINTENTIONALLY DURING DRIVING

	Step	Check	Yes	No
1	**CHECK DTCS.** Read DTCs of the Telematics. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs. <Ref. to TEL(diag)-16, LIST, Diagnostic Code(s) Display.>	Check the SOS button. <Ref. to ET-46, Switches and Harness.>

4. THE SYSTEM PLACES AN I-CALL UNINTENTIONALLY DURING DRIVING

	Step	Check	Yes	No
1	**CHECK DTCS.** Read DTCs of the Telematics. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs. <Ref. to TEL(diag)-16, LIST, Diagnostic Code(s) Display.>	Check the i-button. <Ref. to ET-46, Switches and Harness.>

5. THE SYSTEM DOES NOT NOTIFY THE CENTER EVEN IF THE I-BUTTON IS PRESSED UPON VEHICLE MALFUNCTION

NOTE:
Perform the diagnostics for "Phone conversation is not possible. (The microphone does not respond to a voice. No sound is heard from the speaker.)".

CAUTION:
CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

	Step	Check	Yes	No
1	**CHECK THE SUBSCRIPTION STATUS.** Display the current data «ICALL Active» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	Is the data «TRUE»?	Go to step **2**.	The user does not have a service subscription; therefore, it is not a failure.
2	**CHECK DTCS.** Read DTCs of the Telematics. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs. <Ref. to TEL(diag)-16, LIST, Diagnostic Code(s) Display.>	Go to step **3**.
3	**CHECK THE RECEIVED SIGNAL STRENGTH WHEN THE I-BUTTON WAS PRESSED. (CHECK THE CURRENT DATA.).** Display the current data «RSSI at SOS/ICALL(1)» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	Is the data 26% or more?	Go to step **5**.	Go to step **4**.

	Step	Check	Yes	No
4	**CHECK THE AT&T CELLULAR COVERAGE AREA.** 1) Check whether the i-button was pressed within the cellular coverage area. 2) Display the current data «GPS Data at Time of Button Push(1)» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	Is the displayed positional data located within the AT&T coverage area? (For the AT&T coverage area, refer to the AT&T website. This system operates on 3G and 4G mobile communication technology.)	Go to step **5**.	The i-button was pressed outside the cellular coverage area.
5	**CHECK THE COMMUNICATION STATUS OF WHEN THE I-BUTTON WAS PRESSED. (CHECK THE CURRENT DATA.).** Display the current data «Call status at SOS/ICALL Event(1)» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	If the data shows «Call Started» or «Call Connected»; Go to A. If the data shows «Call Not Started»; Go to B. If the data shows «No Network Service»; Go to C. If the data shows «Call Ended by SXM»; Go to D.	A: Go to step **6**. B: Go to step **7**. C: Replace the antenna. <Ref. to ET-43, Antenna.> D: The connection ended due to a server-side reason; therefore, there is no failure on the vehicle.	—
6	**CHECK THE COMMUNICATION STATUS OF WHEN THE I-BUTTON WAS PRESSED. (CHECK THE CURRENT DATA.).** Display the current data «Timestamp at Time of Button Push(1)» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.> NOTE: The time stamp is displayed in the Coordinated Universal Time (UTC), which is different from actual time at each location. Therefore, time difference needs to be corrected for use. Example: [12/22 01:30 in UTC time] is corrected as [12/21 20:30 in New York time].	Does the time of the i-button operation match with the data?	Go to step **7**.	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>
7	**CHECK THE I-BUTTON.** Check the i-button. <Ref. to TEL(diag)-40, DTC B2A09 I-CALL BUTTON CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>	Is the check result OK?	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>	Replace the i-button. <Ref. to ET-46, Switches and Harness.>

6. REMOTE VEHICLE LOCATOR CANNOT LOCATE THE VEHICLE

	Step	Check	Yes	No
1	**CHECK THE SUBSCRIPTION STATUS.** Display the current data «Account Status» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	Is the data «TRUE»?	Go to step **2**.	The user does not have a service subscription; therefore, it is not a failure.
2	**CHECK THE CURRENT COMMUNICATION ENVIRONMENT OF THE USER'S SMARTPHONE.** Check that the user's smartphone can be connected to the Internet.	Can it be connected to the Internet?	Go to step **3**.	The user's smartphone or the Internet environment has a problem.
3	**CHECK THE CURRENT COMMUNICATION ENVIRONMENT OF THE USER'S SMARTPHONE.** Check that the user's smartphone can display the current location.	Is the current location displayed?	Currently no failure is found. If the current location is not displayed, the user's Internet environment (radio waves, etc.) possibly had a problem.	Go to step **4**.

Step		Check	Yes	No
4	**CHECK THE CURRENT RECEIVED SIGNAL STRENGTH. (CHECK THE CURRENT DATA.).** Display the current data «Signal Strength» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	Is the data 26% or more?	Go to step **6**.	Go to step **5**.
5	**CHECK THE AT&T CELLULAR COVERAGE AREA.** Ask the user where he/she operated the remote control.	Is the location of the remote control operation located within the AT&T coverage area? (For the AT&T coverage area, refer to the AT&T website. This system operates on 3G and 4G mobile communication technology.)	Go to step **6**.	The location of the remote control operation was outside the cellular coverage area.
6	**CHECK DTCS.** Check DTCs in the following systems. • Body control <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).> • Telematics <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs of body control, or of telematics. <Ref. to BC(diag)-31, LIST, List of Diagnostic Trouble Code (DTC).> <Ref. to TEL(diag)-16, LIST, Diagnostic Code(s) Display.>	Check the Starlink Server report to verify that there was no server outage that coincides with the day/time the customer reported that the issue occurred. (Refer to STARLINK Server Maintenance/Down Report under Reports and Starlink section in Subarunet.) If no outage exists for that time frame, it is possible that there was environmental interference (radio waves, etc.) when the user performed the operation. No further actions are recommended.

7. REMOTE VEHICLE LOCATOR INDICATES AN INCORRECT LOCATION FOR THE VEHICLE

CAUTION:
CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

	Step	Check	Yes	No
1	**CHECK DTCS.** Read DTCs of the Telematics. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs. <Ref. to TEL(diag)-16, LIST, Diagnostic Code(s) Display.>	Go to step **2**.
2	**CHECK THE CURRENT COMMUNICATION ENVIRONMENT OF THE USER'S SMARTPHONE.** Check that the user's smartphone can display the current location.	Can the current location be displayed correctly? (Is the deviation range 100 m (328 ft) or less?)	Currently no failure is found. When the user had a problem, there was a failure with the GPS antenna reception environment, etc.	Go to step **3**.
3	**CHECK THE CURRENT COMMUNICATION ENVIRONMENT OF THE USER'S SMARTPHONE.** Check again that the user's smartphone can display the current location in a place where the sky is open.	Can the current location be displayed correctly? (Is the deviation range 100 m (328 ft) or less?)	Currently no failure is found. When the user had a problem, there was a failure with the GPS antenna reception environment, etc.	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>

8. REMOTE DOOR LOCK DOES NOT LOCK THE DOORS OF THE VEHICLE

	Step	Check	Yes	No
1	**CHECK THE SUBSCRIPTION STATUS.** Display the current data «Account Status» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	Is the data «TRUE»?	Go to step **2**.	The user does not have a service subscription; therefore, it is not a failure.
2	**CHECK THE CURRENT COMMUNICATION ENVIRONMENT OF THE USER'S SMARTPHONE.** Check that the user's smartphone can be connected to the Internet.	Can it be connected to the Internet?	Go to step **3**.	The user's smartphone or the Internet environment has a problem.
3	**CHECK THE DOOR LOCK FUNCTION.** Check that the user' smartphone can lock the doors in the current situation.	Are the doors locked?	Currently no failure is found. When the user had a problem, there was a failure with the Internet connection environment, etc.	Go to step **4**.
4	**CHECK THE CURRENT RECEIVED SIGNAL STRENGTH. (CHECK THE CURRENT DATA.).** Display the current data «Signal Strength» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	Is the data 26% or more?	Go to step **6**.	Go to step **5**.

	Step	Check	Yes	No
5	**CHECK THE AT&T CELLULAR COVERAGE AREA.** Ask the user where he/she operated the remote control.	Is the location of the remote control operation located within the AT&T coverage area? (For the AT&T coverage area, refer to the AT&T website. This system operates on 3G and 4G mobile communication technology.)	Go to step **6**.	The location of the remote control operation was outside the cellular coverage area.
6	**CHECK THE DOOR LOCK FUNCTION.** Check that the keyless transmitter can lock the doors of the vehicle.	Are the doors locked?	Go to step **7**.	Perform the diagnosis according to the inspection for the door lock control system. <Ref. to SL-10, INSPECTION, Door Lock Control System.>
7	**CHECK DTCS.** Check DTCs in the following systems. • Body control <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).> • Telematics <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs of body control, or of telematics. <Ref. to BC(diag)-31, LIST, List of Diagnostic Trouble Code (DTC).> <Ref. to TEL(diag)-16, LIST, Diagnostic Code(s) Display.>	Check the Starlink Server report to verify that there was no server outage that coincides with the day/time the customer reported that the issue occurred. (Refer to STARLINK Server Maintenance/Down Report under Reports and Starlink section in Subarunet.) If no outage exists for that time frame, it is possible that there was environmental interference (radio waves, etc.) when the user performed the operation. No further actions are recommended.

9. THE DOORS LOCK UNINTENTIONALLY

Step		Check	Yes	No
1	**CHECK DOOR LOCK SWITCH.** Check the door lock switch. <Ref. to SL-10, INSPECTION, Door Lock Control System.>	Is the check result OK?	Check the Starlink Server report to verify that there was no server outage that coincides with the day/time the customer reported that the issue occurred. (Refer to STARLINK Server Maintenance/Down Report under Reports and Starlink section in Subarunet.) If no outage exists for that time frame, it is possible that there was environmental interference (radio waves, etc.) when the user performed the operation. No further actions are recommended.	Perform the diagnosis according to the inspection for the door lock switch. <Ref. to SL-10, INSPECTION, Door Lock Control System.>

10.THE DOORS UNLOCK UNINTENTIONALLY

Step		Check	Yes	No
1	**CHECK DOOR LOCK SWITCH.** Check the door unlock switch. <Ref. to SL-10, INSPECTION, Door Lock Control System.>	Is the check result OK?	Check the Starlink Server report to verify that there was no server outage that coincides with the day/time the customer reported that the issue occurred. (Refer to STARLINK Server Maintenance/Down Report under Reports and Starlink section in Subarunet.) If no outage exists for that time frame, it is possible that there was environmental interference (radio waves, etc.) when the user performed the operation. No further actions are recommended.	Perform the diagnosis according to the inspection for the door lock switch. <Ref. to SL-10, INSPECTION, Door Lock Control System.>

11.REMOTE HORN & HAZARD LIGHTS DO NOT OPERATE UPON REQUEST

	Step	Check	Yes	No
1	**CHECK THE SUBSCRIPTION STATUS.** Display the current data «Account Status» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	Is the data displayed as «TRUE»?	Go to step **2**.	The user does not have a service subscription; therefore, it is not a failure.
2	**CHECK THE CURRENT COMMUNICATION ENVIRONMENT OF THE USER'S SMARTPHONE.** Check that the user's smartphone can be connected to the Internet.	Can it be connected to the Internet?	Go to step **3**.	The user's smartphone or the Internet environment has a problem.
3	**CHECK THE HORN AND HAZARD LIGHT FUNCTIONS.** Check that the horn and hazard light currently operate by the user's smartphone.	Do the horn and hazard light operate?	Currently no failure is found. When the user had a problem, there was a failure with the Internet connection environment, etc.	Go to step **4**.
4	**CHECK THE CURRENT RECEIVED SIGNAL STRENGTH. (CHECK THE CURRENT DATA.).** Display the current data «Signal Strength» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	Does the data indicate 26% or more?	Go to step **6**.	Go to step **5**.
5	**CHECK THE AT&T CELLULAR COVERAGE AREA.** Ask the user where he/she operated the remote control.	Is the location of the remote control operation located within the AT&T coverage area? (For the AT&T coverage area, refer to the AT&T website. This system operates on 3G and 4G mobile communication technology.)	Go to step **6**.	The location of the remote control operation was outside the cellular coverage area.
6	**CHECK THE HORN AND HAZARD LIGHT FUNCTIONS.** Check that the horn and hazard light operate by the keyless transmitter. (Press the lock button three times.)	Do the horn and hazard light operate?	Go to step **8**.	Go to step **7**.
7	**CHECK HORN OPERATION.** Activate the function check «Horn Output» of the body integrated unit. <Ref. to BC(diag)-30, Function Check.>	Does the horn sound?	Check the keyless transmitter. <Ref. to SL-84, Keyless Transmitter.><Ref. to SL-86, Access Key.>	Check the horn circuit. <Ref. to WI-243, Horn System.>

	Step	Check	Yes	No
8	**CHECK DTCS.** Check DTCs in the following systems. • Body control <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).> • Telematics <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs of body control, or of telematics. <Ref. to BC(diag)-31, LIST, List of Diagnostic Trouble Code (DTC).> <Ref. to TEL(diag)-16, LIST, Diagnostic Code(s) Display.>	Check the Starlink Server report to verify that there was no server outage that coincides with the day/time the customer reported that the issue occurred. (Refer to STARLINK Server Maintenance/Down Report under Reports and Starlink section in Subarunet.) If no outage exists for that time frame, it is possible that there was environmental interference (radio waves, etc.) when the user performed the operation. No further actions are recommended.

12.WHEN THE VEHICLE SECURITY ALARM IS ACTIVATED, NOTIFICATION IS NOT SENT

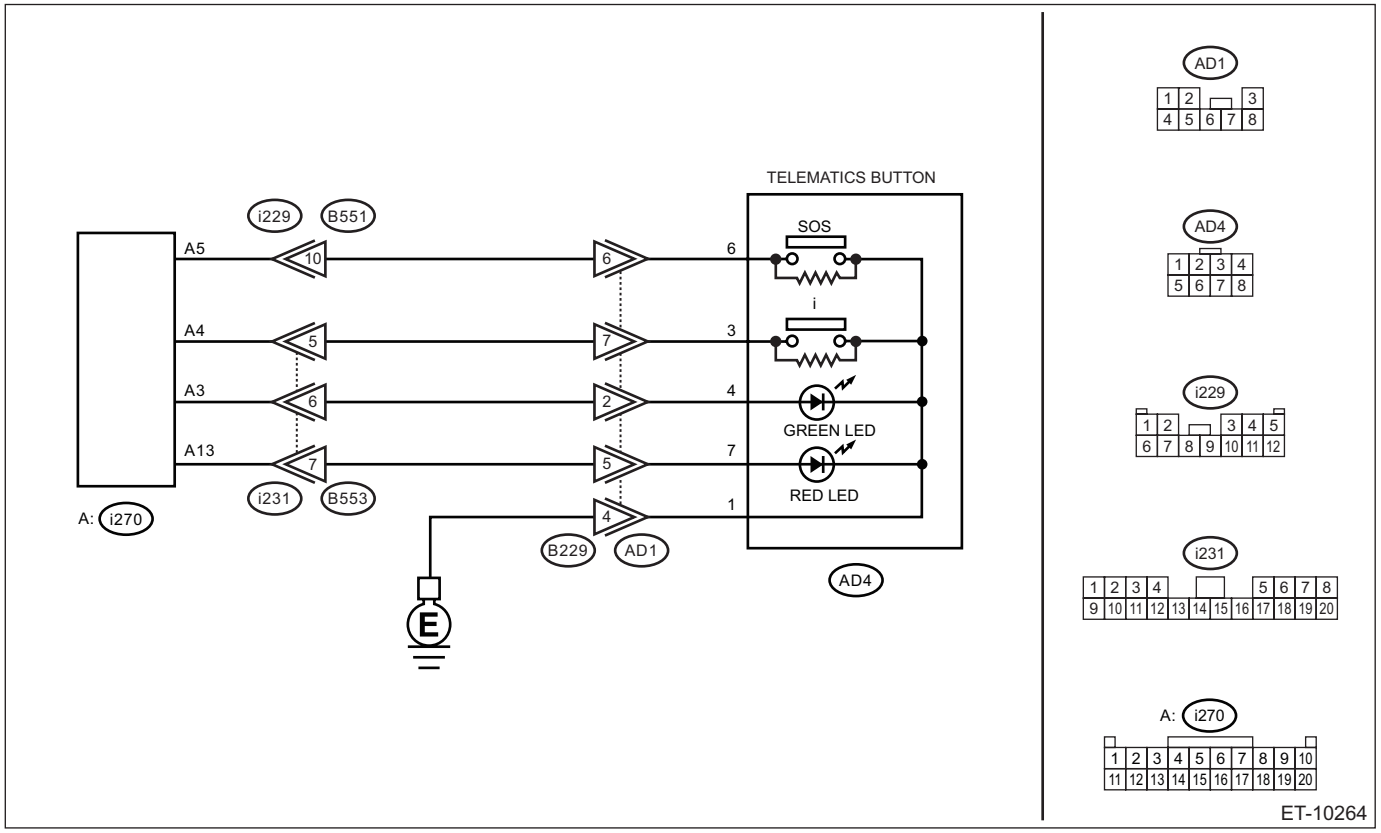
	Step	Check	Yes	No
1	**CHECK THE SUBSCRIPTION STATUS.** Display the current data «Account Status» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	Is the data displayed as «TRUE»?	Go to step **2**.	The user does not have a service subscription; therefore, it is not a failure.
2	**CHECK THE CURRENT COMMUNICATION ENVIRONMENT OF THE USER'S SMARTPHONE.** Check that the user's smartphone can be connected to the Internet.	Can it be connected to the Internet?	Go to step **3**.	The user's smartphone or the Internet environment has a problem.
3	**CHECK THE SECURITY ALERT SYSTEM.** Operate the security alert system.	Does it operate?	Go to step **4**.	Check the security alert system. <Ref. to SL-28, INSPECTION, Security System.>
4	**CHECK THE CURRENT COMMUNICATION ENVIRONMENT OF THE USER'S SMARTPHONE.** Check that a notification is sent to the user's smartphone after the security alert is activated.	Does the smartphone receive a notification?	Currently no failure is found.	Go to step **5**.
5	**CHECK THE CURRENT RECEIVED SIGNAL STRENGTH. (CHECK THE CURRENT DATA.).** Display the current data «Signal Strength» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	Does the data indicate 26% or more?	Go to step **7**.	Go to step **6**.

	Step	Check	Yes	No
6	**CHECK THE AT&T CELLULAR COVERAGE AREA.** Ask the user where he/she operated the remote control.	Is the location of the remote control operation located within the AT&T coverage area? (For the AT&T coverage area, refer to the AT&T website. This system operates on 3G and 4G mobile communication technology.)	Go to step **7**.	The location of the remote control operation was outside the cellular coverage area.
7	**CHECK DTCS.** Check DTCs in the following systems. • Body control <Ref. to BC(diag)-11, Read Diagnostic Trouble Code (DTC).> • Telematics <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs of body control, or of telematics. <Ref. to BC(diag)-31, LIST, List of Diagnostic Trouble Code (DTC).> <Ref. to TEL(diag)-16, LIST, Diagnostic Code(s) Display.>	Check the Starlink Server report to verify that there was no server outage that coincides with the day/time the customer reported that the issue occurred. (Refer to STARLINK Server Maintenance/Down Report under Reports and Starlink section in Subarunet.) If no outage exists for that time frame, it is possible that there was environmental interference (radio waves, etc.) when the user performed the operation. No further actions are recommended.

13.WHEN A MALFUNCTION INDICATOR LIGHT/WARNING LIGHT IS LIT, NOTIFICATION IS NOT SENT

	Step	Check	Yes	No
1	**CHECK THE SUBSCRIPTION STATUS.** Display the current data «Diagnostic Alert Active» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	Is the data displayed as «TRUE»?	Go to step **2**.	The user does not have a service subscription; therefore, it is not a failure.
2	**CHECK WARNING LIGHT.** Check if the warning light illuminates.	Does it Illuminate?	Go to step **3**.	Currently no failure is found. Since the warning light is not lit, notification is not sent.
3	**CHECK DTCS.** Check the DTC of telematics. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs. <Ref. to TEL(diag)-16, LIST, Diagnostic Code(s) Display.>	Go to step **4**.

Step		Check	Yes	No
4	**CHECK THE AT&T CELLULAR COVERAGE AREA.** Ask the user where he/she turned the ignition switch to OFF after the warning light was lit.	After the warning light comes on, is the location where the user turned the ignition switch to OFF located within the AT&T coverage area? (For the AT&T coverage area, refer to the AT&T website. This system operates on 3G and 4G mobile communication technology.)	Check the Starlink Server report to verify that there was no server outage that coincides with the day/time the customer reported that the issue occurred. (Refer to STARLINK Server Maintenance/Down Report under Reports and Starlink section in Subarunet.) If no outage exists for that time frame, it is possible that there was environmental interference (radio waves, etc.) when the user performed the operation. No further actions are recommended.	The location where the ignition switch was turned to OFF (where warning light illumination information was sent) was outside the cellular coverage area.



14.MAINTENANCE NOTIFICATIONS ARE NOT SENT

	Step	Check	Yes	No
1	**CHECK THE SUBSCRIPTION STATUS.** Display the current data «Maintenance Alert Active» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	Is the data displayed as «TRUE»?	Go to step **2**.	The user does not have a service subscription; therefore, it is not a failure.
2	**CHECK DTCS.** Read DTCs of the Telematics. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC displayed?	Perform the diagnosis for the displayed DTCs. <Ref. to TEL(diag)-16, LIST, Diagnostic Code(s) Display.>	Check the Starlink Server report to verify that there was no server outage that coincides with the day/time the customer reported that the issue occurred. (Refer to STARLINK Server Maintenance/Down Report under Reports and Starlink section in Subarunet.) If no outage exists for that time frame, it is possible that there was environmental interference (radio waves, etc.) when the user performed the operation. No further actions are recommended.

15.THE LED DOES NOT DISPLAY THE STATUS. (LED MALFUNCTION)

WIRING DIAGRAM:

Telematics <Ref. to WI-356, WIRING DIAGRAM, Telematics System.>

CAUTION:

CommCheck is required after replacing the DCM. <Ref. to ET-34, REGISTRATION (COMM CHECK), OPERATION, TELEMATICS SYSTEM.>

	Step	Check	Yes	No
1	**CHECK THE SUBSCRIPTION STATUS.** Display the current data «Account Status» of the Telematics. <Ref. to TEL(diag)-13, Read Current Data.>	Is the data «TRUE»?	Go to step **2**.	The user does not have a service subscription; therefore, it is not a failure. (Both LEDs are turned off.)
2	**CHECK THE LED.** 1) Turn the ignition switch to ON. 2) Check the LED condition.	Does the RED LED go off and the GREEN LED illuminate?	The circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.	Go to step **3**.

	Step	Check	Yes	No
3	**CHECK DTCS.** Read DTCs of the Telematics. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC B2A0A or B2A0B displayed?	Perform the diagnosis for the displayed DTC B2A0A or B2A0B. <Ref. to TEL(diag)-42, DTC B2A0A RED LED CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> <Ref. to TEL(diag)-44, DTC B2A0B GREEN LED CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>	Go to step **4**.
4	**CHECK THE LED ILLUMINATION CONDITION.** Perform the telematics system operation check. <Ref. to TEL(diag)-22, System Operation Check Mode.>	Is the LED turned on or off?	Go to step **5**.	Go to step **6**.
5	**CHECK THE LED.** 1) Turn the ignition switch to ON. 2) Check the LED condition.	Does the RED LED go off and the GREEN LED illuminate?	The circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>
6	**CHECK THE LED.** Measure the continuity of the telematics button (LED) unit. ***Terminals*** ***No. 7 — No. 1:*** ***No. 4 — No. 1:***	Is there continuity?	Replace the DCM. <Ref. to ET-53, DATA COMMUNICATION MODULE.>	Replace the telematics button. <Ref. to ET-46, Switches and Harness.>

16.PHONE CONVERSATION IS NOT POSSIBLE. (THE MICROPHONE DOES NOT RESPOND TO A VOICE. NO SOUND IS HEARD FROM THE SPEAKER.)

Step		Check	Yes	No
1	**CHECK DTCS.** Read DTCs of the Telematics. <Ref. to TEL(diag)-16, Diagnostic Code(s) Display.>	Is DTC B2A04, B2A05 or B2A06 displayed?	Perform the diagnosis for the displayed DTC B2A04, B2A05 or B2A06. <Ref. to TEL(diag)-29, DTC B2A04 MIC CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> <Ref. to TEL(diag)-31, DTC B2A05 LEFT SPEAKER/AUDIO CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).> <Ref. to TEL(diag)-34, DTC B2A06 RIGHT SPEAKER/AUDIO CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>	Go to step **2**.
2	**CHECK THE SPEAKER OPERATION.** Perform [Speaker ON] in the telematics system operation check. <Ref. to TEL(diag)-22, System Operation Check Mode.>	Does it sound?	Go to step **3**.	Go to step **4**.
3	**CHECK MICROPHONE.** Perform the microphone voice input.	Is the voice recognized?	Go to step **4**.	Replace the microphone.
4	**CHECK THE SPEAKER.** Check the speaker.	Is the check result OK?	Go to step **5**.	Replace the speaker.
5	**CHECK THE TELEPHONE CALL.** 1) Place the mobile phone in the vehicle. 2) Establish a Bluetooth connection between the mobile phone in the vehicle and the vehicle unit. 3) Make a call from outside to the mobile phone in the vehicle. 4) Check that a telephone call is available through the in-vehicle microphone with the hands-free function.	Is a telephone call successful?	The circuit has returned to a normal condition at this time. Reproduce the failure, and then perform the diagnosis again. NOTE: In this case, temporary poor contact of connector, temporary open or short circuit of harness may be the cause.	Perform the diagnosis of DTC B2A04 MIC CIRCUIT. <Ref. to TEL(diag)-29, DTC B2A04 MIC CIRCUIT, Diagnostic Procedure with Diagnostic Trouble Code (DTC).>

WIRING SYSTEM SECTION

WIRING SYSTEM WI

This service manual has been prepared to provide SUBARU service personnel with the necessary information and data for the correct maintenance and repair of SUBARU vehicles.
This manual includes the procedures for maintenance, disassembling, reassembling, inspection and adjustment of components and diagnostics for guidance of experienced mechanics.
Please peruse and utilize this manual fully to ensure complete repair work for satisfying our customers by keeping their vehicle in optimum condition. When replacement of parts during repair work is needed, be sure to use SUBARU genuine parts.

All information, illustration and specifications contained in this manual are based on the latest product information available at the time of publication approval.

1. Basic Diagnostic Procedure

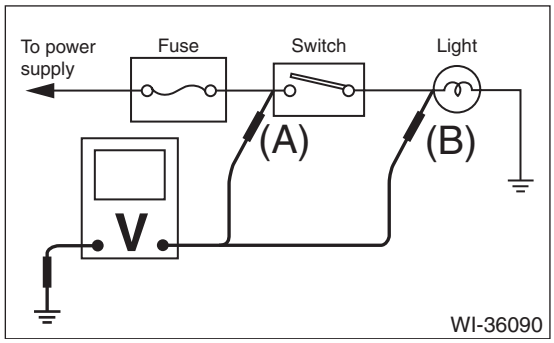
A: BASIC PROCEDURES

1. GENERAL DESCRIPTION

The most important purpose of diagnostics is to quickly determine which fault is the root cause of the symptom, to save time and labor.

2. IDENTIFICATION OF TROUBLE CAUSE

1) Using the diagnostics, narrow down the causes.
2) Refer to the wiring diagram and check the system's circuit. If necessary, use a voltmeter, ohmmeter, etc.
3) Before replacing component parts, check for fuse blowout, open wiring harness on the power supply circuit and the ground circuit, and poor connectors, switches, relays, etc. If no problem is encountered, check the component parts.

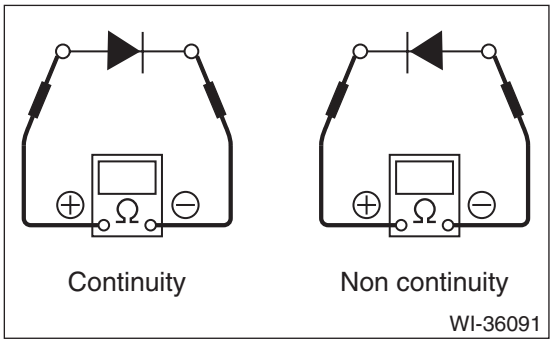


3. SYSTEM OPERATION CHECK

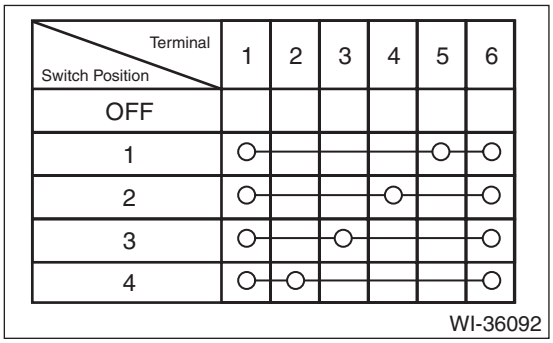
After inspection and repair, ensure that the system operates properly.

B: BASIC INSPECTION

1. VOLTAGE MEASUREMENT



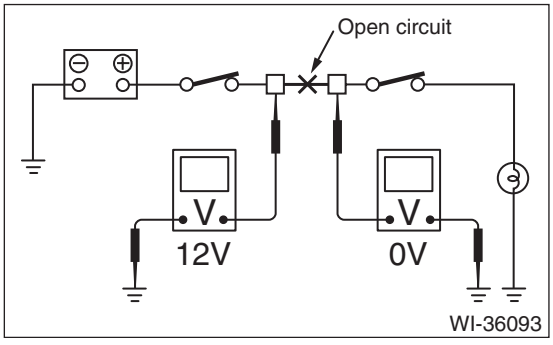
1) Using a voltmeter, connect the negative lead to a good ground point or negative battery terminal. Connect the positive lead to the connector or component terminal.
2) Contact the positive lead of the voltmeter on connector (A). The voltmeter will indicate a voltage.
3) Shift the positive lead contacting the connector (A) to the connector (B). The voltmeter will indicate no voltage.
4) Turn the switch to ON with the positive lead contacting the connector (B).
The voltmeter will indicate a voltage and, at the same time, the light will illuminate.
5) The circuit is normal. If a problem such as a light failing to illuminate occurs, use the procedures above to track down the malfunction.



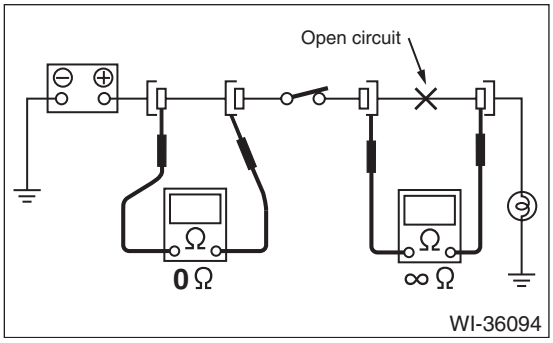
2. CONTINUITY CHECK

1) Disconnect the battery terminal or connector so there is no voltage between the check points.
Contact the leads of an ohmmeter between the check points, and check that there is continuity.
2) When checking the diode continuity using an ohmmeter, allow the positive lead to contact the diode positive side and the negative lead to the negative side. At this time, there must be continuity. Also, when contacting the leads in reverse, there should be no continuity.

NOTE:
Some testers have reverse polarity, therefore, refer to the instruction manual of the tester.

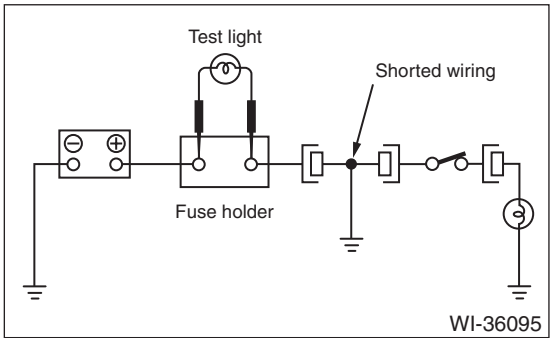


3) When checking switch continuity using an ohmmeter, perform the check while the switch operates. For example, when a switch position is at 3, continuity exists among terminals 1, 3 and 6, as shown below.

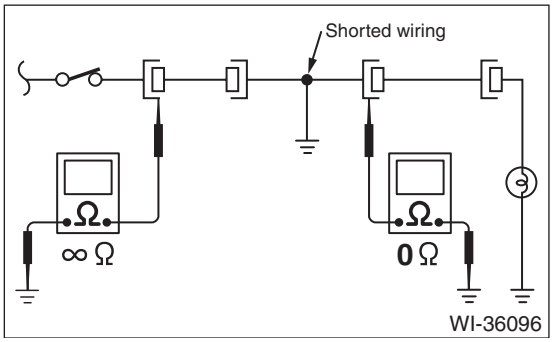


3. HOW TO IDENTIFY AN OPEN CIRCUIT

1) With voltmeter:
An open circuit is determined by measuring the voltage between respective connectors and ground using a voltmeter, starting with the connector closest to the power supply. The power supply must be turned ON so that current flows in the circuit. If voltage is not present between a particular connector and ground, the circuit between that connector and the previously checked point is open.

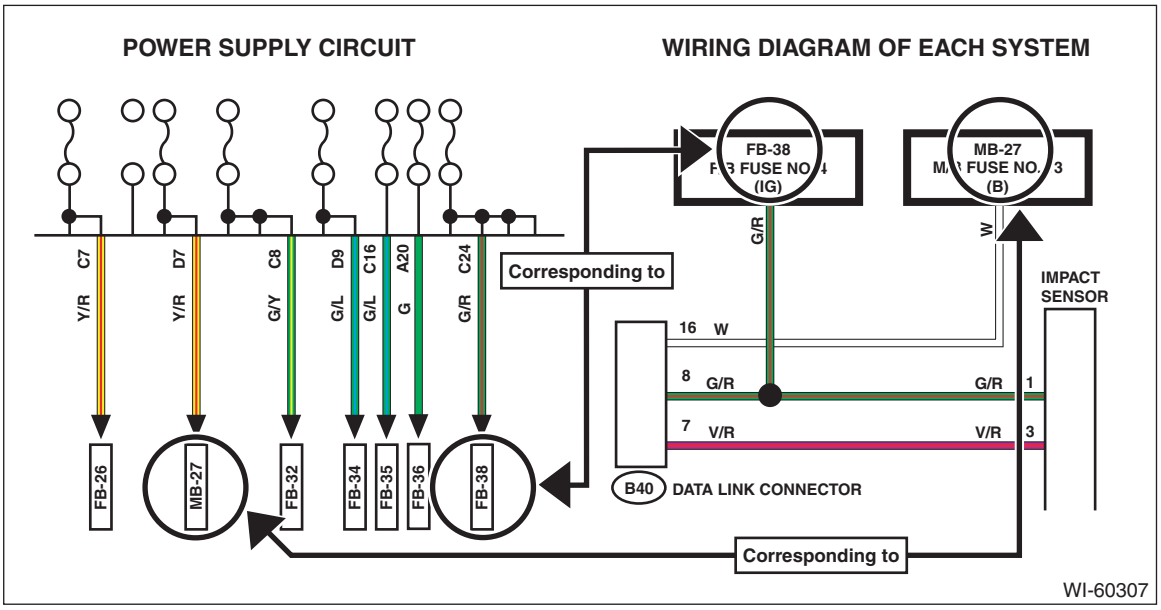


2) With ohmmeter:
Disconnect all connectors affected, and check continuity in the harness between adjacent connectors. When the ohmmeter indicates “infinite”, the harness is open.



4. HOW TO DETERMINE A SHORT CIRCUIT

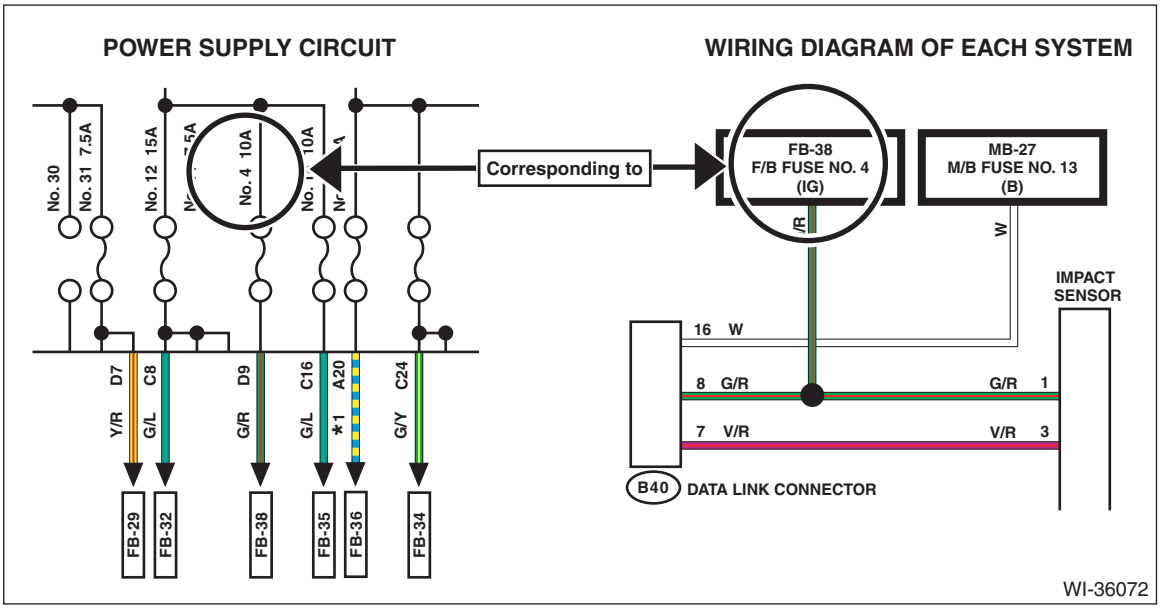
1) With test light:
Connect a test light (rated at approx. 3 watts) in place of the blown fuse and allow current to flow through the circuit. Disconnect one connector at a time. At that time, always start with the connector located farthest from the power supply. If the test light goes out when a connector is disconnected, the harness between that connector and the next connector (farther from the power supply) is shorted.



2) With ohmmeter:
Disconnect all affected connectors, and check continuity between each connector and ground. When the ohmmeter indicates continuity between a particular connector and a ground, that connector is shorted.

C: HOW TO READ WIRING DIAGRAMS

1. POWER SUPPLY CIRCUIT

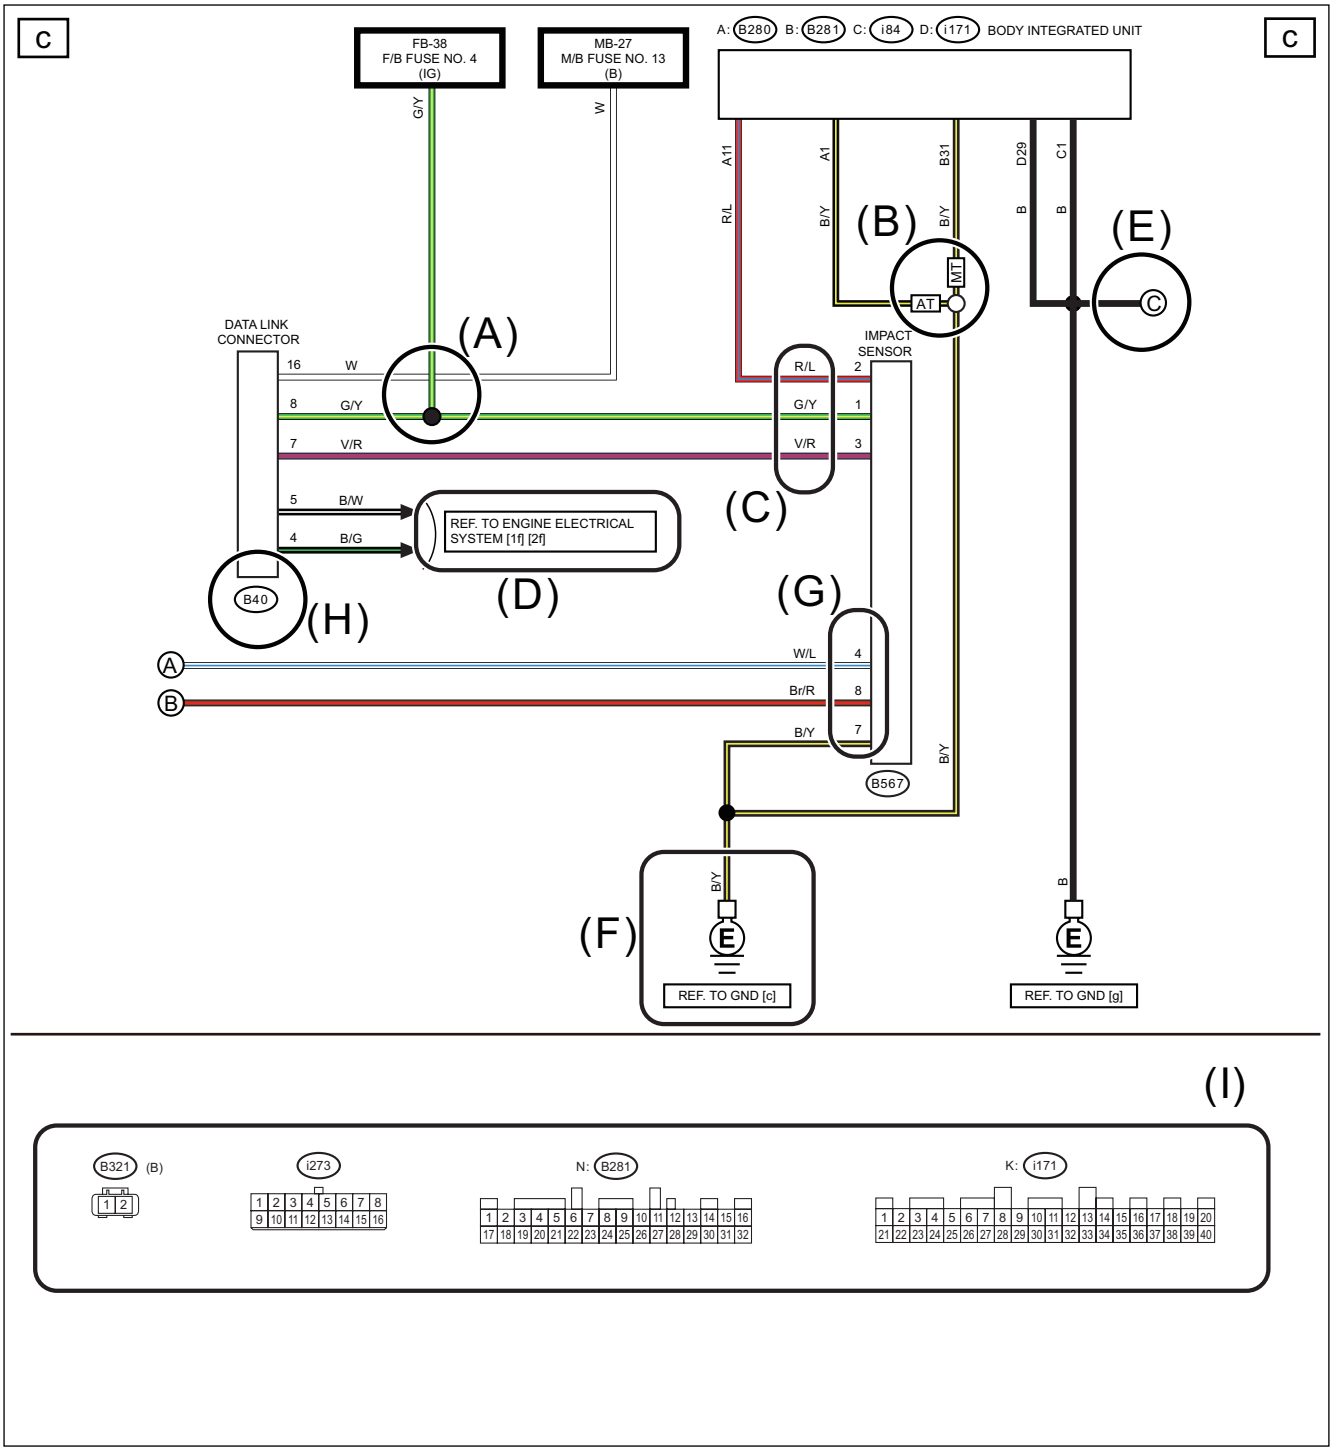


Circuits are described to indicate the power supply in the wiring diagram of each system. “MB-5”, “MB-6”, etc., which are used as power-supply symbols throughout the text, correspond with those shown in the “DC POWER SUPPLY CIRCUIT” in the wiring diagram of each system. Accordingly, using the DC power supply circuit and the wiring diagram of each system permits service personnel to understand the entire electrical arrangement of the system.

2. WIRING DIAGRAM OF EACH SYSTEM

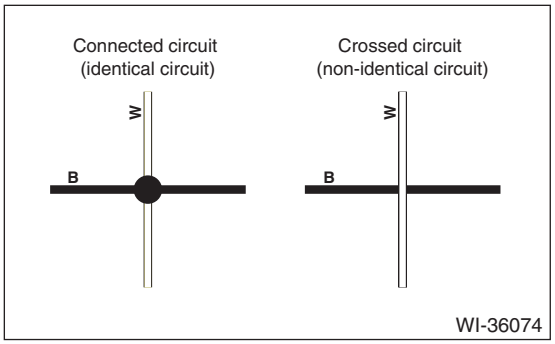
1. **Fuse No. & rating**

The “Fuse No. & rating” is the same description as that in the DC power supply circuit, and corresponds with that used in the vehicle.



2. **Wiring diagram of each system**

To help figure out the route from the DC power supply circuit, wiring diagrams are classified and described in each system.



NOTE:

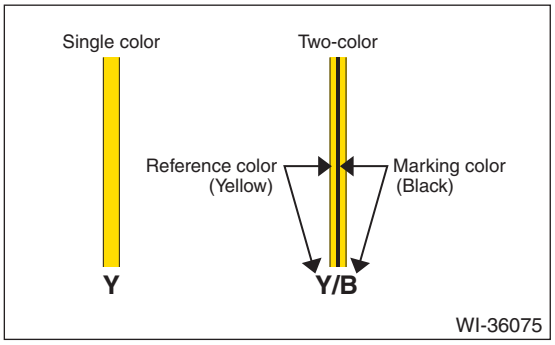
This manual includes harness information. Information of parts that are not routed via harness and adapter code is described as a reference. If no information is described in this manual, refer to each section.

WI-62491

- (A):Wire connection and crossing in a circuit

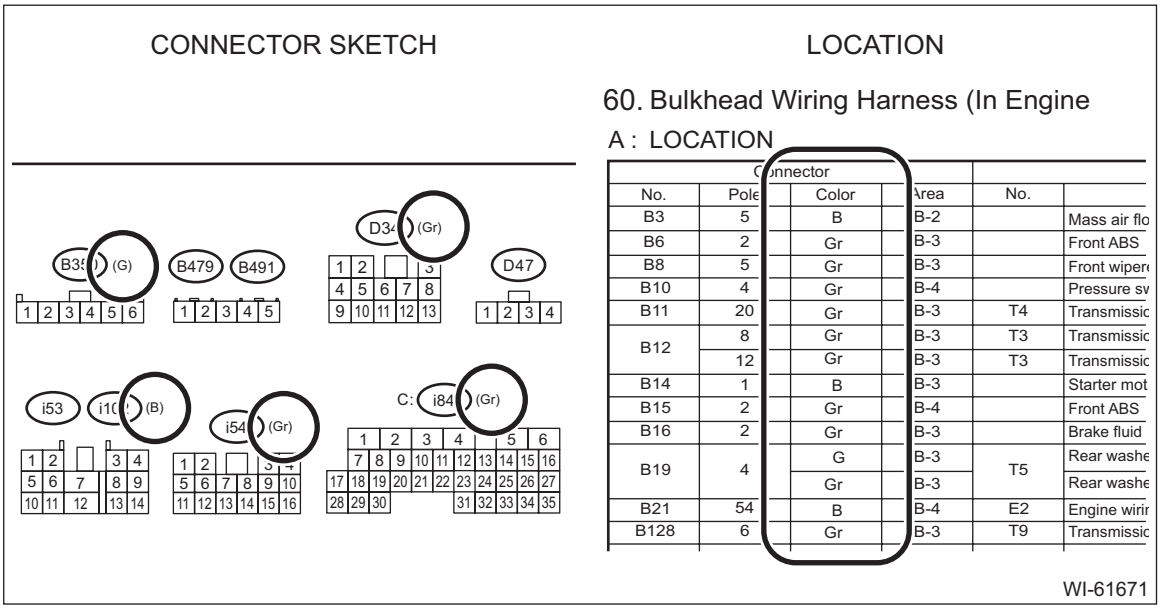
- (B):Classification by specifications

If a circuit differs from another circuit according to vehicle specifications, the specification difference is indicated with abbreviations.



- (C):Color code

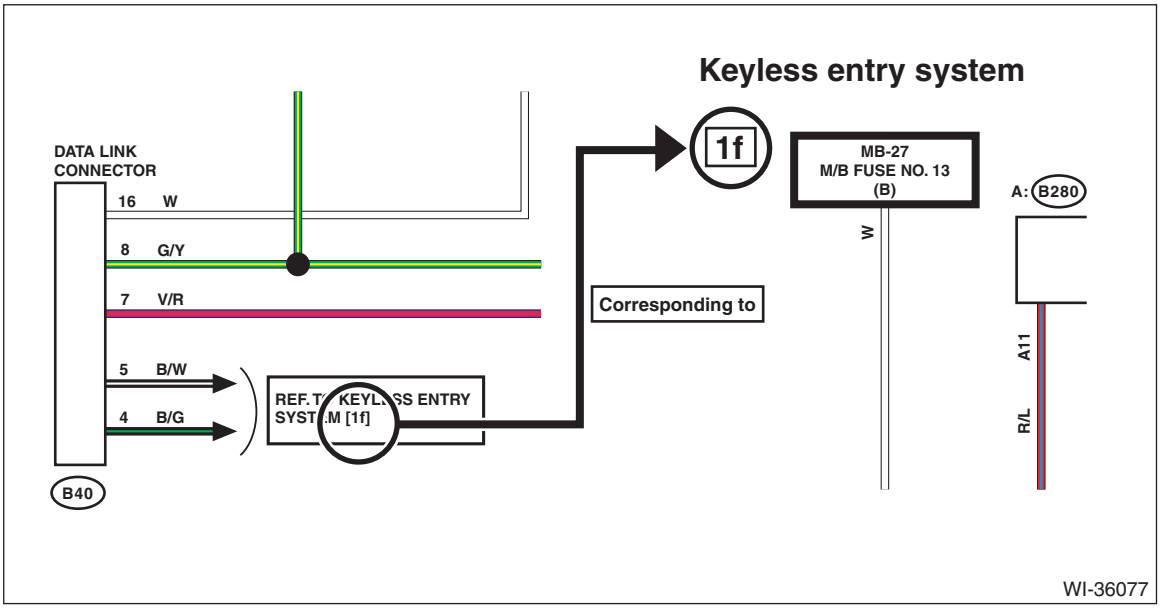
Indicates the color of harness and connector housing.



Color code	Color	Color code	Color	Color code	Color
B	Black	S	Shield line	Gr	Gray
G	Green	V	Violet	Lg	Light green
L	Blue	W	White	Sb	Light blue
Or	Orange	Y	Yellow	★	White or natural color
P	Pink	Be	Beige		
R	Red	Br	Brown		

(Color code of harness)

Single color is indicated with a color code, and double colors are indicated with “standard color / marking color”.

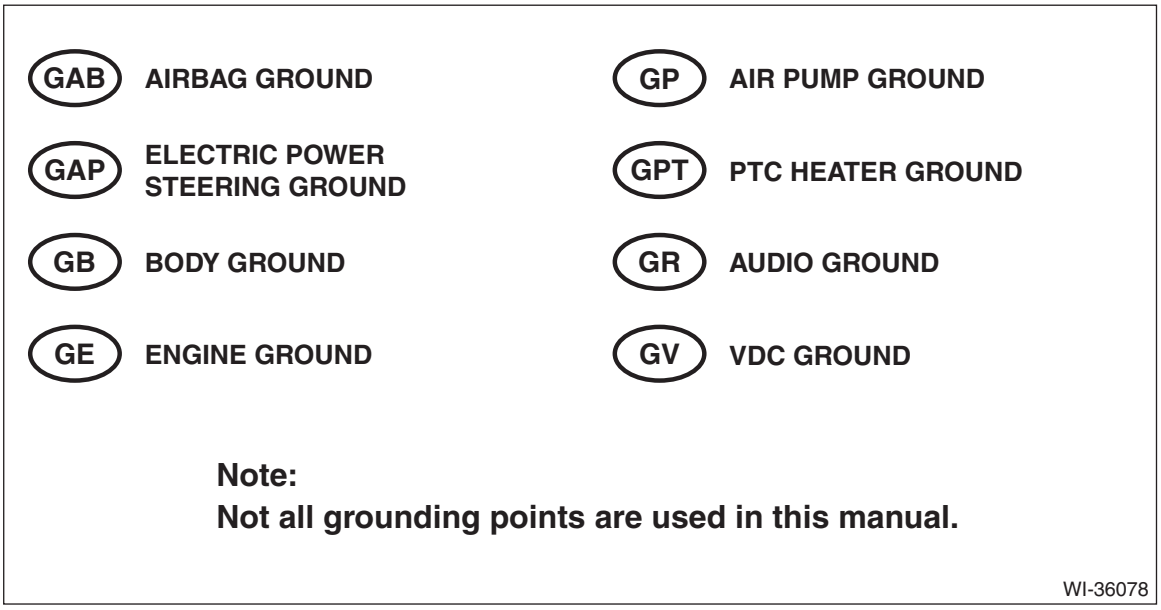


(Color code of connector housing)
Used in the connector sketch and the locations.

Connector No.	Pole	Color	Area	No.	
B3	5	B	B-2		Mass air flo
B6	2	Gr	B-3		Front ABS
B8	5	Gr	B-3		Front wiper
B10	4	Gr	B-4		Pressure sv
B11	20	Gr	B-3	T4	Transmissic
B12	8	Gr	B-3	T3	Transmissic
	12	Gr	B-3	T3	Transmissic
B14	1	B	B-3		Starter mot
B15	2	Gr	B-4		Front ABS
B16	2	Gr	B-3		Brake fluid
B19	4	G	B-3	T5	Rear washe
		Gr	B-3		Rear washe
B21	54	B	B-4	E2	Engine wirir
B128	6	Gr	B-3	T9	Transmissic

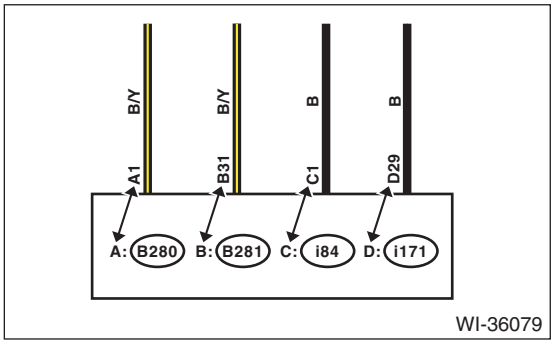
- (D):Connection to another system in the same circuit

Indicates the connecting to with alphanumeric characters, which correspond to the descriptions shown on the upper section of each page.



- (E):Connections in the system

Indicates with alphabetic characters, which correspond to the same alphabetic characters shown in the following pages.



- (F):Ground

The ground points shown in the ground circuit refer to the following, which correspond to the locations.

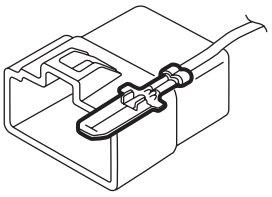
- (G):Terminal No.

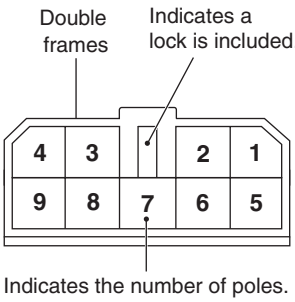
Indicates the terminal number of the connector to be connected. If several connectors are connected to a component, they are identified with alphabetic characters.

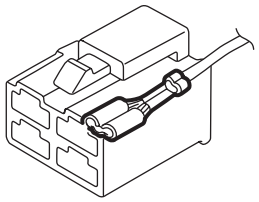
- (H):Connector No.

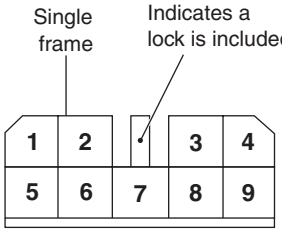
The first alphabetic characters of the connector number correspond with the following symbols that indicate harnesses or systems.

Symbol	Harness/cord	Symbol	Harness/cord
AB	Airbag wiring harness	F	Front wiring harness
AD	Adapter cord		Generator cord
AT/T	Transmission cord	i	Instrument panel Wiring harness
B	Bulkhead wiring harness		
D	Door cord / Rear gate code	R	Rear wiring harness
E	Engine wiring harness		Fuel cord / Roof cord
	Oxygen sensor cord		Rear gate cord / Trunk lid cord
ST	Steering cord		





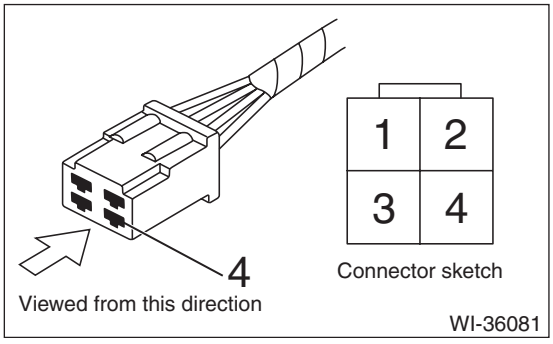




- (I):Connector sketch

The connector sketch at the bottom shows the connectors used in the wiring diagram.

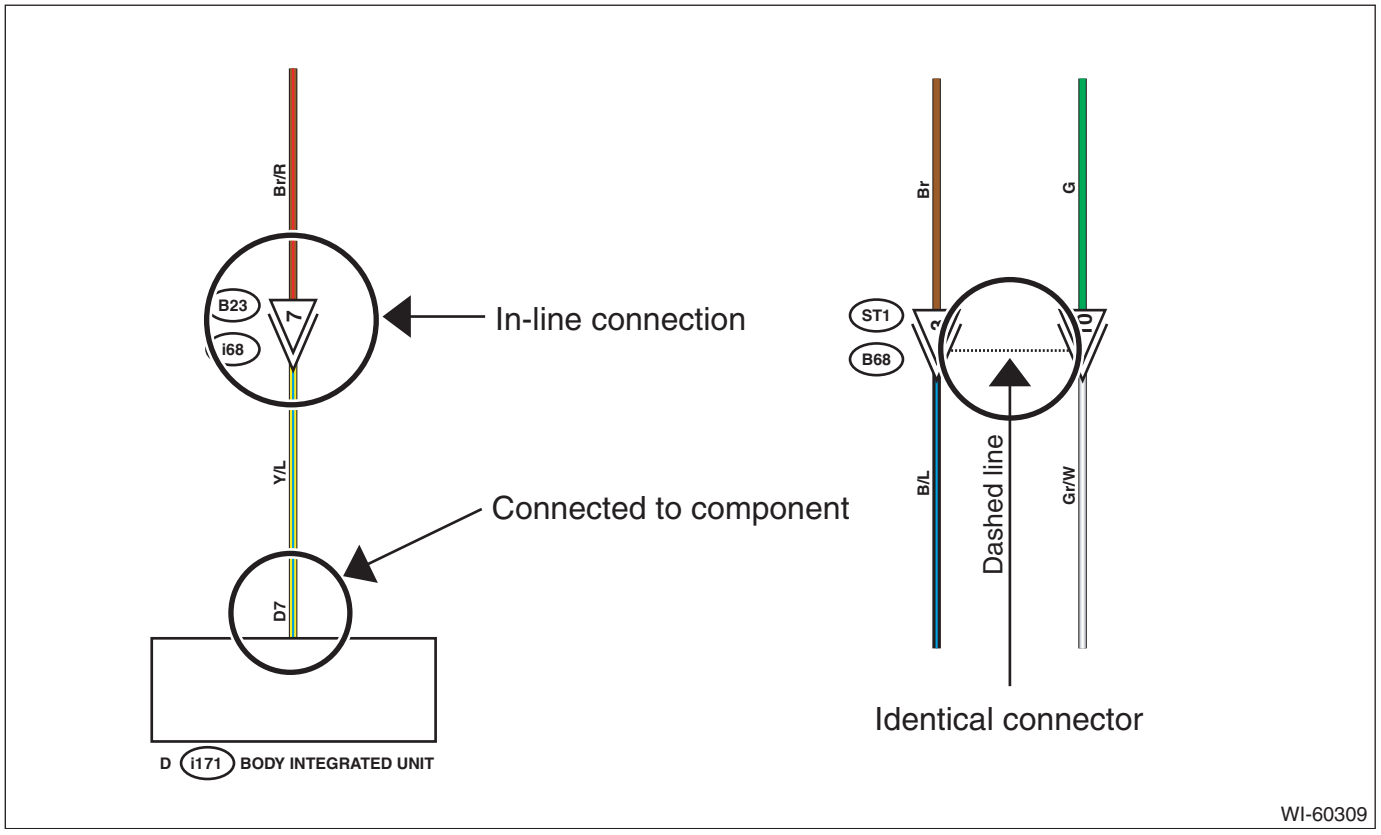
3. **Connector**



The following shows the connector shape, lock position, connection and terminal number that are used in this manual.

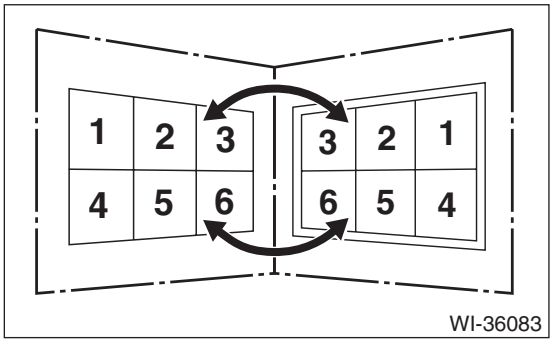
For connector shape, refer to the connector sketch.

Connector used in vehicle	Connector shown in wiring diagram		
	Connector sketch	Wiring diagram symbol	Terminal arrangement order
 Male connector			Numbered in order from upper right to lower left.
 Female connector			Numbered in order from upper left to lower right.



WI-41116

• The sketch of the connector and the terminal number are indicated in a disconnected state which is viewed from the terminal side.



WI-36081

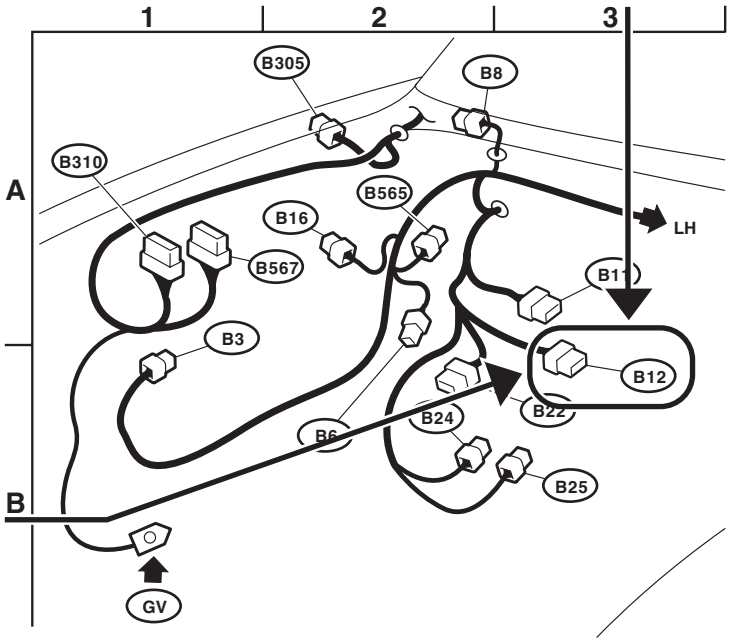
- The connector sketch usually indicates a female connector.
- The connector used in the wiring diagram of the system indicates only the intermediate connection, therefore, no parts, J/Cs and grounds are described. In addition, if the different circuits are connected with the same connector, a dot line is used to indicate that these are the same.

- When connecting the connector, the terminals with the same number are jointed. When the connector is disconnected, the terminal location is symmetrical.

3. LOCATION

In this manual, the location is classified in each harness, and the connector location is indicated using coordinates.

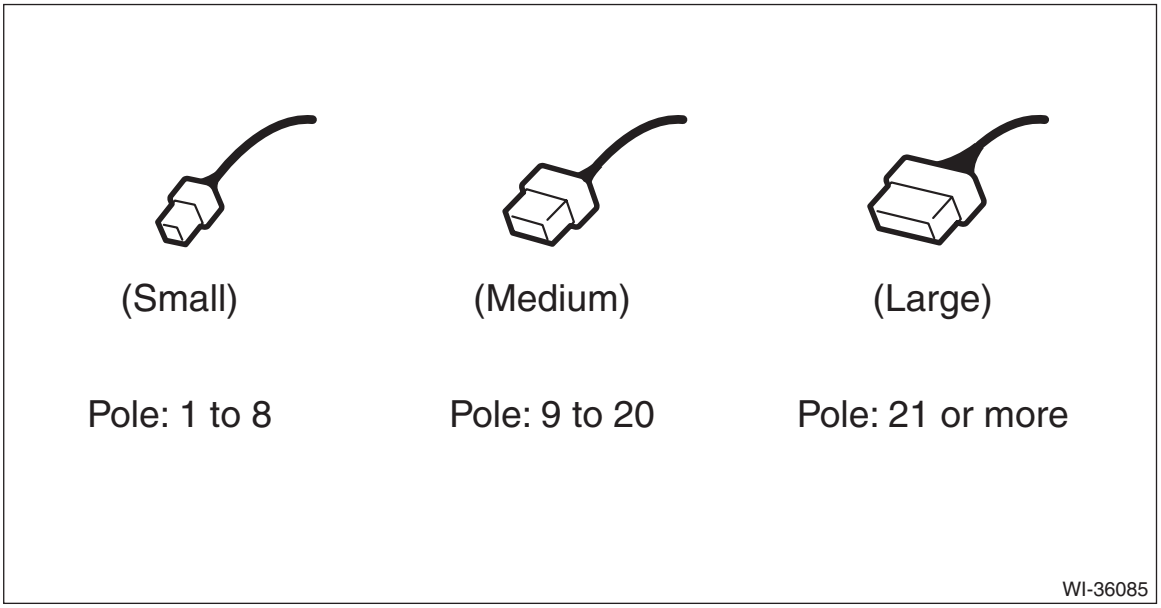
CONNECTOR LOCATION CHART



60. Bulkhead Wiring Harness (In Engine Com

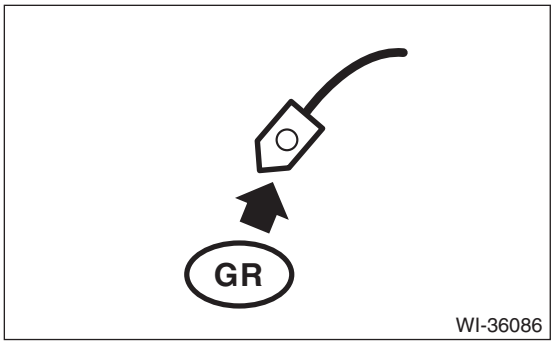
A : LOCATION

Connector					
No.	Pole	Color	Area	No.	
B3	5	B	B-2		Mass air fl
B6	2	Gr	B-3		Front ABS
B8	5	Gr	B-3		Front wiper
B10	4	Gr	B-4		Pressure s
B11	20	Gr	B-3	T4	Transmissi
B12	8	Gr	B-3	T3	Transmissi
	12	Gr	B-3	T3	Transmissi
B14	1	B	B-3		Starter mo
B15	2	Gr	B-3		Front ABS
B16	2	Gr	B-3		Brake fluid
B19	4	G	B-3	T5	Rear wash
		Gr	B-3		Rear wash
B21	54	B	B-4	E2	Engine wir
B128	6	Gr	B-3	T9	Transmissi



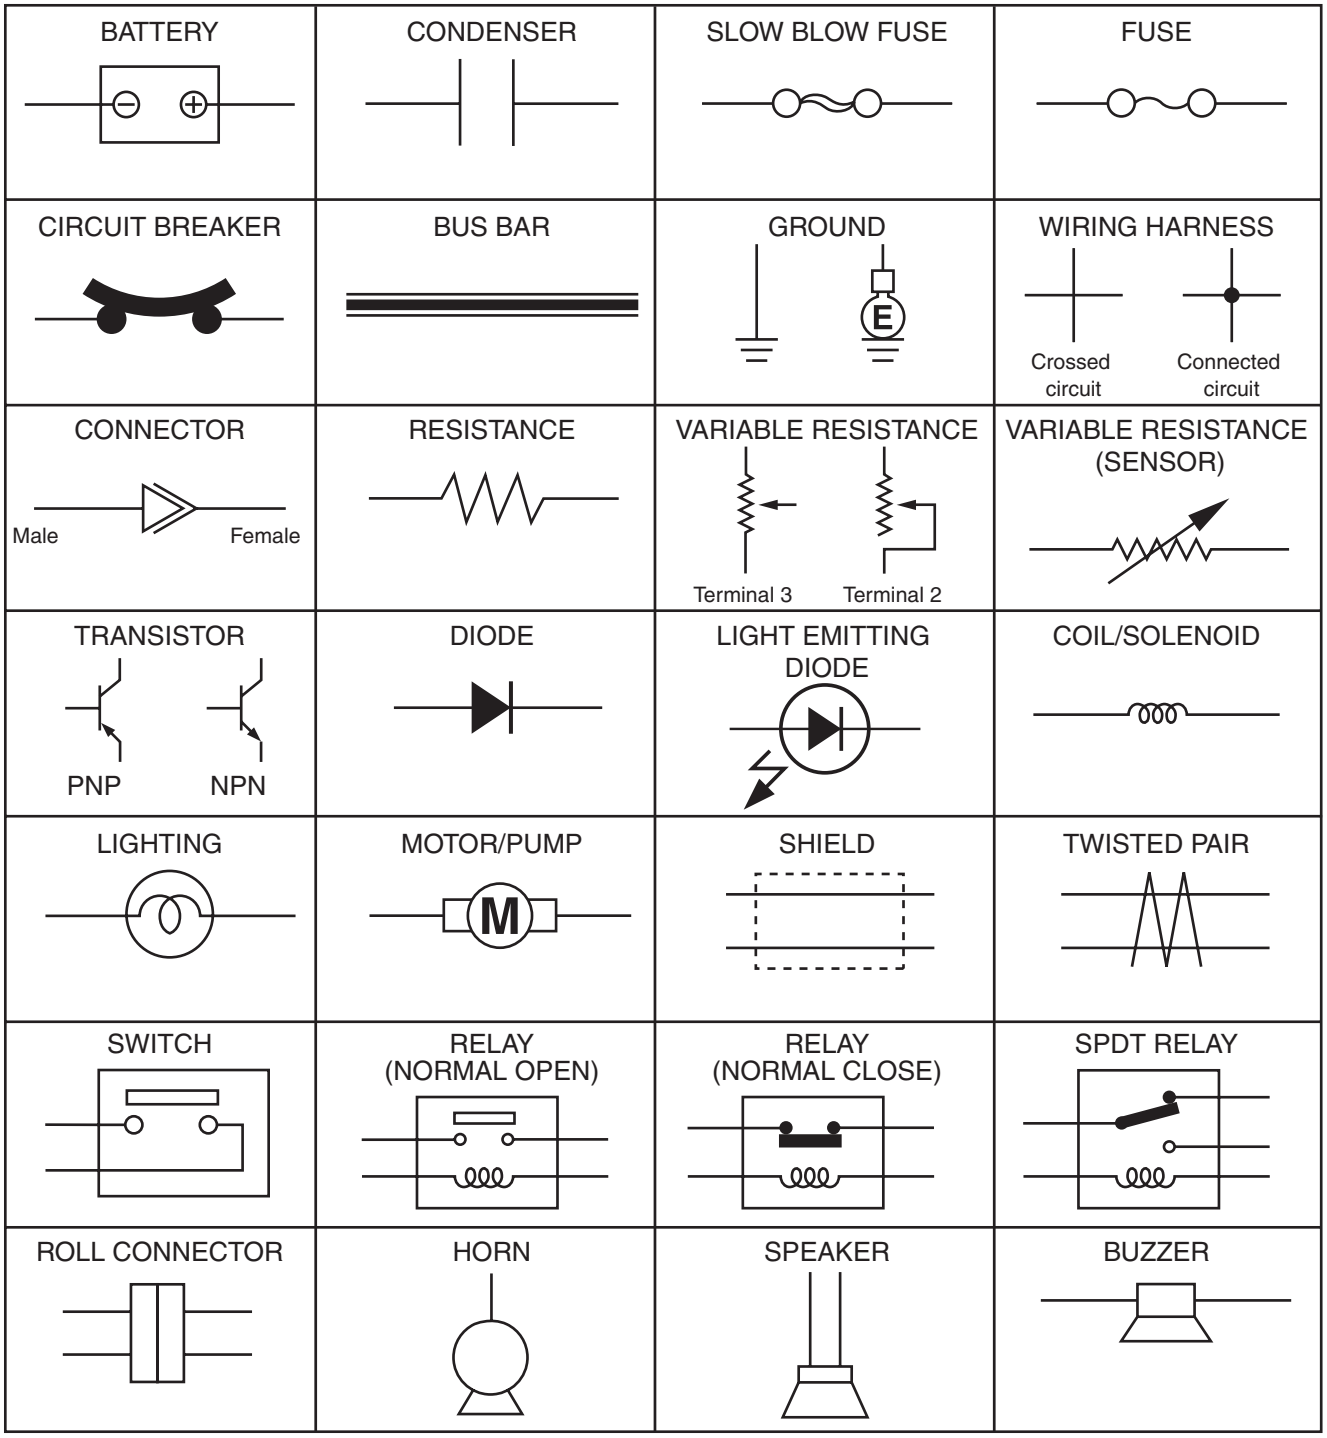
Letters in "Area" corresponds with connector location view.
"B" indicates vertical line and "3" indicates horizontal line in above chart.

CONNECTOR LOCATION VIEW



WI-60310

- The following connector symbols are used to easily identify the connectors.



WI-36085

- The ground point is indicated as follows.

4. SYMBOLS IN WIRING DIAGRAMS

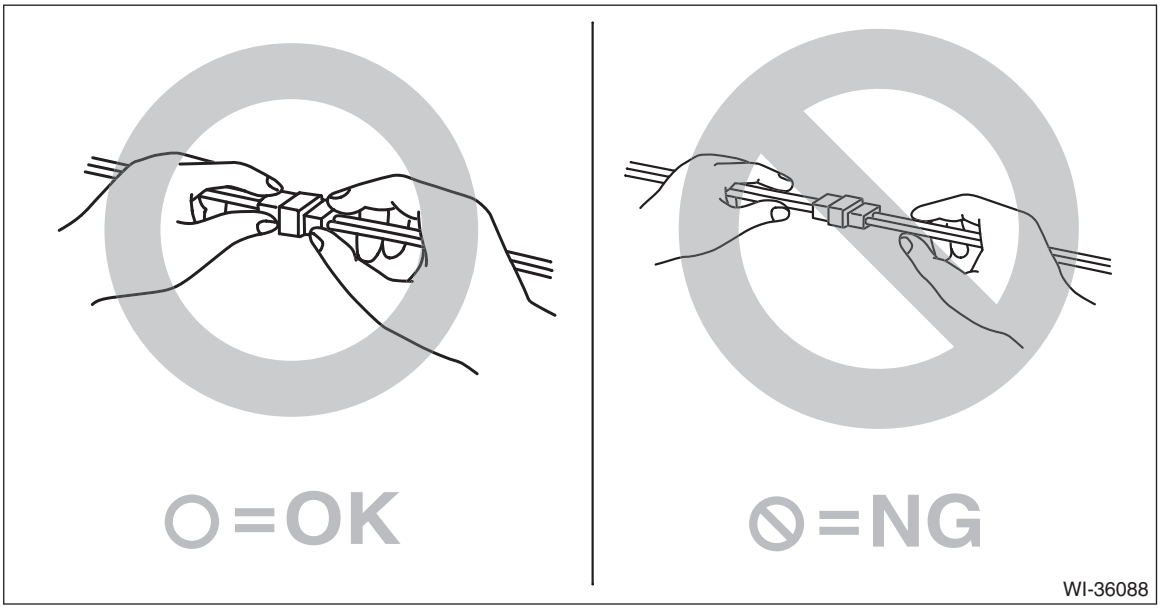
5. ABBREVIATIONS IN THIS MANUAL

Abbr.	Full name
ABS	Anti-lock Brake System
ACC	Accessory
A/C	Air Conditioner
ASSY	Assembly
A/F	Air/Fuel (air fuel ratio sensor)
ATF	Automatic Transmission Fluid
AUX	Auxiliary Audio Input Terminal
AWD	All Wheel Drive
B, BAT	Battery
BSD/RCTA	Blind Spot Detection/Rear Cross Traffic Alert
CAN	Controller Area Network
CL	Close
CM	Control Module
CVT	Continuously Variable Transmission
D	Drive range or Down
DC/DC	Direct Current / Direct Current (converter)
DCCD	Driver's Control Center Differential
DN	Down
E	Ground
ECM	Engine Control Module
EEPROM	Electrically Erasable Programmable Read-Only Memory
EGR	Exhaust Gas Recirculation
EPB	Electronic Parking Brake
F	Front
F/B	Fuse & Relay Box
FL	Front Left
FR	Front Right
G	Gravity (G sensor)
H/L	Headlight
HI	High
I/F	Interface
IG	Ignition
INT	Intermittent
ISO	International Organization for Standardization
J/C	Joint Connector
LCD	Liquid Crystal Display
L, LH	Left Hand
LO	Low
LWR	Lower
M	Motor
M/B	Main Fuse Box
MFD	Multi Function Display
MIST	Wiper for mist
MT	Manual Transmission
N	Neutral Range
OP	Optional Parts or Open
P	Parking or Parking range
PASS	Passing

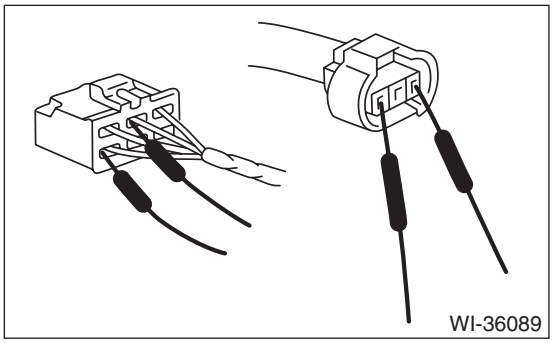
Abbr.	Full name
R	Reverse Range
RAB	Reverse Automatic Braking
RES	Reset
R, RH	Rear or Right Hand
RL	Rear Left
RR	Rear Right
SBF	Slow Blow Fuse
SI-DRIVE	SUBARU Intelligent Drive
SRF	Steering Responsive Fog Lights
ST	Starter
SW	Switch
TCM	Transmission Control Module
TEL	Telephone
TFT	Thin Film Transistor
TPMS	Tire Pressure Monitor System
UP	Up
UPR	Upper
VDC	Vehicle Dynamics Control
WASH	Washer



2. Working Precautions

A: PRECAUTIONS WHEN WORKING WITH THE PARTS MOUNTED ON THE VEHICLE

1) Always refer to “CAUTION” and “NOTE” of “General Description” in the same model’s service manual before starting the service.
2) When working under a vehicle which is jacked-up, always be sure to use rigid rack.
3) The parking brake must always be applied during working. Also, in automatic transmission vehicles, keep the select lever set to the P (Parking) range.
4) Be sure the workshop is properly ventilated when running the engine.
5) Be careful not to touch the rotating parts such as a belt or a fan while the engine is operating.
6) Be careful not to touch hot metal parts immediately after the engine has been turned on or off.

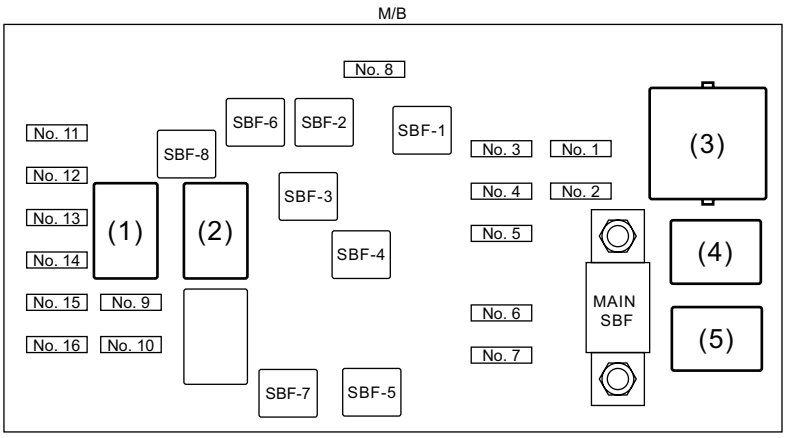


B: PRECAUTIONS IN TROUBLE DIAGNOSIS AND REPAIR OF ELECTRIC PARTS

1) Always refer to “CAUTION” and “NOTE” of “General Description” in the same models service manual before starting the diagnostics and repair.
2) Always refer to the cautions of each section when diagnosing and repairing each system and component.
3) The battery cable must be disconnected from the negative terminal after the ignition switch is set to the OFF position, unless otherwise required by the diagnostics.
4) When disconnecting a connector, do not pull the harness, but pull while holding the connector housing.

5) Confirm the locking shape completely before disconnecting a connector. In addition, firmly push in the connector until a click sounds when connecting a connector.
6) When checking continuity between connector terminals, or measuring voltage across the terminal and ground, always touch tester probe (s) to terminals from the harness side.
If the probe is too thick to gain access to the terminal, do not push it in forcibly but use a mini test lead.
7) When measuring the voltage or resistance of individual sensor or all electrical control modules, use a tapered pin with a diameter of 0.6 mm (0.024 in) or less and touch it to the tip of terminal. Never insert the tapered pin into the terminal at this time. Doing so may cause internal deformation and a malfunction can occur.

8) To check water-proof connectors (which are not measurable from the harness side), touch tester probes on the terminal side and be very careful not to bend or damage the terminals.



9) Securely fasten the harness with clamps and clips so that the harness does not interfere with the body end parts, edges, bolts or screws.
10) When installing a harness and a component, be careful not to catch them on the harness.
11) Sensors, relays, units, etc., are sensitive to strong impacts. Handle them with extra care so that they are not dropped or mishandled.
12) Because the HID headlight uses high voltage, be sure to confirm that the power supply is turned off before diagnostics and repair. Furthermore, do not perform diagnostics and repair with wet hands because there is a possibility of electrical shock.
13) When inspecting the airbag system, in order to avoid malfunction, always refer to “CAUTION” of “General Description” of the airbag system in the same model’s service manual.
