

■ FUEL SYSTEM

1. General

- A fuel delivery pipe made of plastic has been adopted.
- A compact 12-hole type fuel injector has been adopted to improve the atomization of fuel.
- A fuel tank made of plastic has been adopted. This tank has fluorinated polyethylene layers on the inner and outer surfaces to prevent the permeation of fuel. For details, refer to the 1TR-FE and 2TR-FE Engines Fuel System Section on [page EG-25](#).
- A compact and lightweight module fuel pump with fuel sender gauge has been adopted.
- A quick connector is used to connect the fuel pipe with the fuel hose for excellent serviceability.

2. Fuel Delivery Pipe

- The fuel delivery pipe is made of plastic to reduce weight.
- The right and left fuel delivery pipes are connected by a nylon tube.
- The pulsation damper is sealed with an O-ring and secured with a holder.
