

EXTERIOR

Front View

- The radiator grille, which integrates the Toyota symbol, is designed to emphasize the taut and flat round shape in order to express a tough, sophisticated, and modern look. Some models come with a radiator grille containing chrome-plated moldings to achieve an elegant look (refer to Equipment List on [page MO-30](#)).
- On some models, fog lights have been provided on the front bumper to suit their use environment (refer to Equipment List on [page MO-30](#)). These fog lights help the driver's visibility while driving under adverse weather conditions.
- An engine hood bulge for the intercooler is provided on the 1KD-FTV engine model and the 2KD-FTV High Version engine model for Thailand.
